interest at No. 216 West Madison Street, and one year later moved to his present store, where he remained for twenty years. After the expiration of his temporary tenancy, he took charge of Schafer's Restaurant on Randolph Street, it having been bought by his brother Philip in 1852. He remained there two years, when he removed to his present location, on the corner of State and Van Buren streets. Mr. Thomson was born in the Rhine province, Germany, on May 12, 1848, the son of Daniel and Theresa (Blaser) Henrici. He attended the common schools of his native country, and at the age of fifteen left school. After a few years working at the trade of a miller, he emigrated to this country, his father leaving the trade of a miller, at the end of that time he came to America, arriving in Chicago in the fall of 1864. He was married in 1881, to Miss Lila Bolinger, of Massillon, Ohio. They have three children, two boys and a girl.

Andrew Cummings succeeded to the business established by S. H. Wright. He purchased the stock of Mr. Thomson on May 2, 1881, and immediately thereafter enlarged the business until, at the present time, it is the largest restaurant in Chicago comprising Nos. 147-153 Dearborn Street, with a seating capacity of four hundred and forty people, serving over three thousand meals daily. His restaurant is undoubtedly one of the largest and best-managed houses in America. Mr. Cummings was born at Port Henry, Essex Co., Vt., on May 5, 1848, and is the son of Michael and Susan (Cestero) Cummings. At the age of four years he came West with his family, settling at Watertown, Wis. There he attended the common schools, and at the age of nineteen years came to Chicago and was employed as a bell-boy in the City Hotel. After three years' service in that capacity, he was transferred to the more trustworthy position of salesman behind the bill counter. In 1865, the house changed hands, and he accepted a position as store clerk and cashier with Mr. Thomson, and was afterward made general manager of Mr. Thomson's immense business. He remained with Mr. Thomson until May 2, 1881, when he became his successor by purchase. Mr. Cummings was married, in 1866, to Miss Sarah Shaffer, of Chicago. They have four children,--William A., Frank, Henry T., and Edmund C. Mr. Cummings deserves the success he has attained, and is among the most prosperous young business men in the city.

Edgar H. Johnson, proprietor of Johnson's Iume Bakery, established his present business on May 29, 1880, at No. 969 West Madison Street, there being in partnership with him his father, E. S. Johnson, and his brother, W. E. Johnson. This was the first bakery in Chicago to put upon the market articles which were made after domestic recipes, and its success was instantaneous, so much so that since their establishment scores of other alleged home bakeries have sprung up, but only one survives. In 1885, a lunch room was founded at No. 157 Fifth Avenue, with a capacity of serving one thousand people a day, and averaging seven hundred meals daily. Mr. Johnson was born in Bureau County, Ill., on April 11, 1862. He is the son of Edward S. and Amanda L. (Robinson) Johnson. During his boyhood he attended the common schools, devoting a part of his time to working on his father's farm and also in his father's mill. At the age of twenty years, he became a teacher, a position he held for four years. Subsequently he became connected with his father and brother in a bakery, which they had established at Buda, in Bureau County, and the following year came to Chicago to establish his present business. Mr. Johnson was married to Miss Emma Rowe, of Tiskilwa, Ill. They have two children, Myra and Winnie. He is a member of Garfield Lodge, No. 656, A.F. & A.M.

The Livery Business.

Andrew J. Wright is the oldest liveryman in Chicago, having been in active business for thirty years. In the latter part of 1854, he formed an equal partnership with L. W. Currier, their torn being behind the scenes on the Michigan Street side of the North Market, the present site of the Criminal Court building. The name of the firm was Wright & Currier. In 1865, Mr. Currier removed to Springfield, Ill., and the firm was continued by Mr. Wright and the firm became Wright Brothers. In January, 1866, they removed to the prominent No. 250 Kinzie Street, a building possessing an historic interest from having been from the first burned in the great fire on the North Side of Chicago (June 2, 1867), after he had crossed the river. After the fire, the Wright Brothers rebuilt the west side and built new stables, which they occupied until 1873, when the partnership was dissolved, and A. J. Wright, the senior partner, continued the business at its present place--Kinzie Street. In June of the same year, the Grand Pacific Hotel was opened to the public, and Mr. Wright was given the exclusive control of the livery business in connection therewith. Mr. Wright was born in Danville, Ill., the son of George and Elizabeth (Taylors) Wright. He obtained his early education at Dunstable and Tyngsboro, and between the ages of fifteen and twenty years was a general clerk in a great mercantile house, of his cljerkship, having previously learned the trade of a blacksmith, with his father, he established a shop of his own, and for eight years worked at his trade. In 1847, he accepted a position in the New Northern Western Railway, and the following year, was a passenger conductor on that line. In 1854, he came to Chicago, expecting to obtain employment with the Chicago & Milwaukee (now the North Western) Railway, but finding that they did not require a conductor, he engaged in the livery stable business, and in the spring of 1855 entered the business of an independent livery stable, under the name of Wright & Company, No. 1251, Michigan Avenue, and has been able, not only to pay all previous indebtedness in full, but also to accumulate for himself a handsome competency. Mr. Field was born at Seneca, Mich., on September 17, 1837, and is the son of Robert G. and Harriet (Strong) Field, his ancestors on both sides for five generations being residents of Brattleborough, Vt., and vicinity. While an infant, his parents moved to Troy, N. Y., where he was scarcely a year old, his mother died. He was then sent to Saratoga Springs a place in the care of a relative, and attended the public schools there. On the death of his father, which occurred when he was twelve years of age, he left New York, and, having a bosiness for travel and being placed under no restrictions, he journeyed westward. His wanderings were perhaps guided only by caprice, but when, in the winter of 1847, he found himself sitting in a country tavern a mile's west of Milwaukee, with but a three-cent piece in his pocket, he realized that the world was wide and that his own exertions must win him a place in it. Fortune favored him, however, and making the acquaintance of a farmer who was a guest of the same tavern, he learned for him and his wife the care of a horse. The gentleman invited him to go to his farm, a distance of thirty miles west of Milwaukee, and the offer was gladly accepted. There he became a farm hand under the tuition of his father's friend, and, faithful to his duty, he attended to his chores, and from his earnings won the confidence of his employer, and it was with mutual regret that, in the fall of the following year, his relation with his benefactor and his excellent wife were severed. A desire to travel and adventure, however, had once more possessed him, and he started for St. Louis. On reaching that city, he formed the acquaintance of L. P. Suage, General Singleton, and ex-Governor Jones of Tennessee, who at that time had the contract for furnishing horses and mules to the Government for the war with Mexico, and entered their employ. After the contract was filled, a portion of the stock remained to be disposed of, and Mr. Field was sent by them to St. Paul, Minn., where there was a sale. Soon after accomplishing this journey, Mr. Field met John Butterfield, who had taken the contract for carrying the United States mails by the southern route, overland to the Pacific coast, from St. Paul, Minn., to San Francisco, California, and, finding the routes through Nevada and California lay through an unknown region, and as an employee of Mr. Butterfield, Mr. Field was sent on the frontier to establish the relief posts and station the required number of horses. This he successfully accomplished, and, having received a large sum of money through from the western coast over the southern route. His service having been found of rare value, he was assigned to the management of a division, in the North Western Territory, of the mail line from El Paso to Fort Churchill. At the breaking out of the Civil War, he was transferred to one of the northern divisions, and given charge, as line agent, of the route between Atchison, Kan., and Central City, Colo., carrying the first mails to Kentucky, and Washington, D.C. In 1862, he located at Chicago permanently, since which
time has been a prominent resident of this city. Mr. Field was married in 1859, to Mrs. Stokes, of Chicago, the widow of Charles Stokes, who died in 1857. He is a member of the Illinois State Bar Association, A. F. A.M. and Washington Chapter. No. 35, R.A.M. Mr. Field owns a stock farm of four hundred and seven acres at Crissman, Ill., on which he has an establishment of valuable cattle.

Francis Amberg, a popular West Side liveryman, became a partner with Mr. Hoffman in 1857, the firm name being Hoffman & Amberg. This partnership existed until 1859, when Hoffman retired, having been elected Sheriff of Cook County. Mr. Amberg has since continued the business until the present time. He was born in Bavaria, Germany, on September 1, 1838, the son of John and Margaret (Desh) Amberg. During his boyhood he attended the common schools of Germany; at the age of fourteen, he left home and went to America, where he worked in a manufactory for three years. Returning from America, he arrived in Chicago in October of that year. He first obtained employment as a team man in Frank Bush, who owned a shop at the corner of Washington and Franklin streets.

In the following year, he was employed by the Gates Bros., on Canal Street, who were engaged in building freight-cars for the Galena Railway. In 1861, he enlisted in the 1st Illinois Cavalry, with an independent company called the Hoffman Dragoons, under Captain Schumacker, and went with the regiment to Beloit, Iowa, thence to Virginia, and subsequently participated in the celebrated Salem raid under Gen. Averill, in the history of the "fourteen days' raid." Returning through Maryland, he was engaged in the battles of South Mountain and Antietam, and, going back again through the Shenandoah Valley, fought under General Sigel and his successor in command. He was captured at Bradford, in March, 1863, and soon after established a flour and feed store, the firm name being Heffern & Amberg. In 1865, the partnership was dissolved, and Mr. Amberg entered into another similar business of his own account at No. 34 West Randolph Street. He continued his business until entering into a partnership with Mr. Hoffman, in 1872. He was married in 1867, to Miss Anna Gerhardy, of Chicago; they have two children, named Gerhardy Amberg.

Edwin D. Morse has been very successful in business, by buying the interest of the Hendrickson Brothers in the livery stable at Nos. 504-6 West Madison Street, on May 1, 1877. He is the youngest and most highly remunerated employment in Chicago. Laboring under the worst discouragements, he purchased a business which commanded no goodwill, owing to previous mismanagement, and though scarcely eighteen years of age, he boldly made a commercial venture, which has brought him large returns for his labor. By close attention to his interests, he has built up a large patronage, and, in 1884, he opened a branch stable at No. 609 West Madison Street to accommodate his increasing trade. At the beginning, he owned but one horse, and now he has on hand not less than forty of the finest livery horses on the West Side. He was the first liveryman in Chicago to dress his drivers in uniform, and was the first to introduce the glass-paned coaches which have become so popular. On a visit to Europe in 1883, he saw, used in London, the Hansom cab, and became so impressed with its utility, that he ordered a number shipped to him here. On his return, he learned that the cab was to be introduced by Mr. Pullman, and fearing too active a competition, he countermanded his order with the English manufacturers. Later on, he ordered built by Hincks & Johnson, at Bridgeport, Conn., a number of coupe-Hansons, which were an improvement on the cab, and when his designs reached the manufacturers they obtained a patent on the vehicle, for which they have since been offered $60,000. Mr. Morse was born at Waterloo, Seneca Co., N. Y., on March 21, 1860, and is the son of Marcellus A. and Jennie (Lattimer) Morse. His father is now the president of the Municipal Gas-Light Company of this city, and has been a resident of Chicago for some years, coming here for the purpose of drilling artesian wells. Mr. Morse was sent at an early age to Waverly, N. Y., where his family had removed soon after his birth. When thirteen years of age, he left his native State, and came to Chicago, attending the LaSalle school for nearly four years. At the end of that time, he began the present business which has proved so prosperous an enterprise. He has shown remarkable tact in his business relations, and may be said to be one of the most phenomenally successful liverymen in Chicago.

Thomas O'Brien is the manager of the livery and boarding stable of Herbert M. Kinley. He was born at Westfield, Mass., on January 7, 1853, in the town of Batholomew and Ann (Dwyer) O'Brien. At the age of seven years, he removed with his family to Dixon, Ill., and there became a pupil in the common school. When about fourteen years old, he was employed in a team stable, driving a team in Dixon, and two years later went to Aurora, where for four years he was employed in the same capacity by Jenks & Van Vleet. In 1870, he came to Chicago, and was with George Barton, trading in trotting horses. In one year, he went to Minneapolis, Minn., and for one year worked in a livery stable in that city. Returning to Chicago, he was in the employ of Frank Parmalee for four years, and for two years succeeding, was travelling in the West. On his return, for Chicago, he became the manager of Mr. Kinley's stables, which position he has held until the present time. He was married, in 1855, to Miss Ella Hogan, of Chicago. Joseph Sawyer became a partner with Louis Dutton in the livery business in 1856, the firm name being Dutton & Sawyer. They remained two years at Couch Place, occupying the stables fitted up by the Dutton Brothers in 1858. In 1867, the partnership of Dutton & Sawyer was dissolved, the senior partner selling his interest to M. M. Brown. The style of the firm then became Sawyer & Brown, and the business was successfully continued until the great fire terminated the partnership. In January, 1872, Mr. Sawyer built the stable still occupying it at 947 Third Avenue. During the two years following, Mr. Truclid was his partner, the firm being Sawyer & Trudell. Since Mr. Trudell's retirement, in 1874, Mr. Sawyer has continued the business alone. He was born at New London, Conn., on April 23, 1837, and is the son of John and Lydia (Dyke) Sawyer. He early became a pupil at the common schools, and afterward attended the academy at his native place. At the age of nineteen, he left school and began his career, but not, however, before he had taught, upon his father's farm, those habits of industry and frugality which are indispensable to success. He first obtained employment with the New York Central & Hudson River Railway. During his two years' service with the company, he contracted a severe illness, from which he did not recover until nearly two years after. Upon regaining his health, he was employed in a hotel, and two years later came to Chicago. In 1862, he went to Galesburg, Ill., and for nearly four years was proprietor of the Galesburg House. Early in the year 1865, he came to Chicago, and soon became one of the firm of Dutton & Sawyer. Mr. Sawyer was married, in 1865, to Miss Susan Sawyer, of Wells River, Vt. They have one son,—Frank E. Mr. Sawyer became manager of Galesburg Lodge, A.F. & A.M., and was also a member of the Commandery of Knights Templar in that city.

Alexander B. VanDerVoorde was the manager of the livery stables of William J. McFarlirle, when they were opened on South Broad Street, Chicago, in 1893. His associations with the business, however, date to some months previously, when he assisted a friend on the West Side who was unable, on account of a serious accident, to attend to his duties. Mr. VanDerVoorde was born in Somerset County, N. J., where his father was a farmer. He attended the common schools, after which he entered Rutgers College, from which he graduated in 1874, receiving the title of A.B., and in the course of the title of A.M. After graduating, he began the study of law in the office of the eminent criminal lawyer, Abraham V. Schenck, at New Brunswick, N. J. Three and one half years later, he was admitted to the New Jersey State Bar and was made master and examiner in chancery. He immediately entered upon the practice of the law at Jersey City, on December 1, 1877, and, in February of the following year was appointed assistant prosecuting attorney of Hudson County, which comprises Jersey City and its environs. He held that position for nearly four years, at the time, conducting many important criminal cases in the courts of that county. At the end of that time, that failing health, brought on by overwork and labor, compelled him to discontinue and seek new strength by a change of scene and a relaxation from the arduous toil attendant upon the duties of his office. Accordingly, he paid a visit to Chicago, in 1881, and, having a natural love for riding and driving, has, from that time, with Chicago horsemen as to deserve mention in these pages. He holds a responsible position at the present time, and enjoys the confidence of his employer.
THE LUMBER TRADE.

A few interests in Chicago are of more vital importance to the city's prosperity than the lumber trade. From an insignificant beginning, in 1847, the trade has attained almost phenomenal proportions. In 1856, the receipts of lumber had reached 456,673,169 feet, which were increased the following year to 459,639,198 feet. It is only natural that lumbermen should recognize an urgent necessity for some trade organization which, operating under the authority of State law, might be able to impose such regulations and restrictions upon the trade as were deemed necessary for its successful prosecution. They first looked to the Board of Trade, which, by its charter, was authorized to regulate the inspection of lumber and other matters pertaining to the general trade in forest products. Many firms had representatives in the Board, among them being Bates & Co.; Hilliard, Howard & Morton; T. M. Avery; Read A. Williams & Co.; Hannah, Lay & Co.; Fraser & Gillette; Perry & Sons; John M. Williams; Chapin, Marsh & Foss; Holbrooks, Elkins & Co.; Jacob Beidler; Pierson & Messer; R. K. Bickford; Artemas Carter; Holt & Mason; Throop, Larned & Co.; Frost & Bradley, and George E. Scott (of the firm of S. N. Wilcox & Co.). The Board of Trade intrusted to such of its members as were lumbermen all matters pertaining to the lumber business, and these gentlemen held daily meetings in the afternoons, after the regular business of the Board had been transacted. The inspection of lumber was the most important matter that came before them, and an inspection committee was appointed, consisting of Eli Bates, George C. Morton, T. M. Avery, Artemas Carter, R. H. Foss, R. K. Bickford and Mr. Dickey (who represented the firm of Perry & Sons). A sub-committee of this committee, consisting of Artemas Carter and R. K. Bickford, was appointed to draft rules for lumber inspection, which, with modifications in minor points, are still in force.

The representative connection of Chicago lumbermen with the Board of Trade continued about two years. The trade had become so vast, that a separate organization was demanded, and effected under a special act of incorporation, its title being The Lumbermen's Board of Trade of Chicago. The incorporators were Robert H. Foss, Eli Bates, T. M. Avery, George C. Morton and Read A. Williams. Robert H. Foss was the first president, and Nathaniel A. Haven the first secretary. The first exchange room was opened in the Lind Block, at the corner of Market and Lake streets. There daily meetings were held, business hours being from 10 a.m. to 2 p.m. The financial distress resulting from the panic of 1857 caused a diminution of interest in the organization, and it practically passed out of existence. It would, undoubtedly, have died from inaction, had it not been for the commission men, who held annual meetings, elected officers, and discussed the advantages of membership in the association. The yard masters attended the meetings in full force, and, under the leadership of Thaddeus Dean, secured control of the organization and filled the offices with their own members. The commission men were thus deprived of the control of an organization which they had for eight years kept alive. The triumph of the yard-owners, however, ultimately proved a benefit to both classes of dealers.

During the winter of 1868-69, the Legislature, on application, passed articles of incorporation for the Lumbermen's Exchange of Chicago. The outgrowth of this organization was the harmonizing of all differences between the two classes of dealers. The Lumbermen's Exchange still exists, and exercises a widely felt influence upon the vast trade and commerce of the nation. The date of the passage of the act of incorporation was on March 31, 1869. The first step toward organization under its provisions was taken on April 15, 1869, when a large meeting of lumber dealers was held at No. 240 South Water Street. Artemas Carter was made chairman, and W. I. Southworth secretary.

The first board of directors was composed of T. M. Avery, George B. Roberts, William Blanchard, A. C. Calkins, W. D. Houghteling, R. K. Bickford, A. F. Dwight, Wirt Dexter, R. E. Queal, H. H. Porter, John Garrick and H. T. Porter. Rules for the government of the Exchange were drafted by the directors, and submitted for approval to a meeting held on Wednesday, April 21. The first officers of the board were: President, T. M. Avery; Vice-President, W. D. Houghteling; Secretary, W. I. Southworth; Treasurer, A. G. Van Schaick. Upon election, Mr. Avery said there was no reason why the largest lumber trade in the world should not be conducted in the same way as other large trade interests were, and it would be his aim to have this brought about. W. I. Southworth, the secretary, then read the following rules and by-laws, which were submitted for the action of the members:

Proviso.—Having a desire to advance the commercial character and promote the general lumber interests of Chicago and the Northwest; and wishing to inculcate just and equitable principles in trade; establish and maintain uniformity in the commercial relations in the city; acquire, preserve and disseminate valuable business information; and with a view to avoid, as far as practicable, the controversies and misunderstandings which are apt to arise between individuals engaged in trade, when they have no acknowledged rules to guide them,—we, the members of the Lumbermen's Exchange of Chicago, by virtue of the power vested in us by the preceding charter, do hereby agree to be governed by the following rules and by-laws:

Rule 1.—The name of this Association shall be the Lumbermen's Exchange of Chicago.

Rule 2.—The affairs of the corporation shall be managed by a board of thirteen directors, to be elected annually. The officers shall consist of a president, vice-president, secretary and treasurer. The president and vice-president shall be elected annually by, and selected from, said board of directors, and the said board of directors shall appoint the secretary and treasurer, and require of each proper bonds and securities for the faithful performance of their duties. There shall be chosen, each year, five members of the association, who shall hold their offices for one year, and shall constitute the committee of arbitration. And also five other members of the association, who shall constitute the committee of appeals. Elections shall be by ballot, and shall be held on the first Monday in March of each year.

Rule 7 and 8 prescribed the duties of the president and vice-president.

Rule 5.—The directors shall appoint a secretary, treasurer, and such inspectors, measurers, and other officers as are thought proper, and shall establish rules, fees, compensation, etc. They shall hold a meeting once in each month. They shall cause to be provided suitable Exchange rooms, for meetings of members, which shall be kept open during the usual business hours, and may provide dockage where cargoes may be exposed for sale.
and shall make a special assessment on all such cargoes that may be offered for sale on the market, for the purpose of defraying such expenses of dockage. The board shall examine into charges of misconduct in business matters on the part of members, and may suspend or expel. If the party charged shall be found guilty of willfully neglecting to comply with the terms of any contract, either written or verbal; of making false or fictitious reports of sales, or of violation of any of the rules of the association, or any other act contrary to the spirit which should govern all commercial transactions, they shall report the same to the association either at the regular annual meeting or at a meeting called for that purpose, and the members present may suspend or expel if so determined by a majority of the members present. No member, however, shall be suspended or expelled without having an opportunity of being heard in his own defense; and any member having been expelled shall be ineligible to membership until the association so proper to remove his disability. All votes on expulsion of members shall be by ballot. It shall be the duty of the board of directors to cause proper notice to be given to any member, with suspension, expulsion or restoration under this rule, and to cause the same to be publicly announced on 'change. It shall be in the power of the board of directors, from time to time, to establish a standard of grades for lumber, burl, shingles, timbers, and the like, and any other article of traffic commonly dealt in by the members of this association; and the certificate of any inspector or measurer, appointed by the board of directors, as to the quality and quantity of the same, and shall be binding upon the members of this association, or others interested, who shall obtain, require or assent to the employment of such inspectors or measurers; nothing herein contained shall compel the employment by any one of any such appointee. The board may appoint special committees and representative delegates, and may provide legal aid.

Rules 6 and 7 prescribed the duties of the secretary and treasurer.

Rule 6.—It shall be the duty of the committee of arbitration to investigate and decide all disputes which shall come before it. Its decisions may be appealed from, and carried to the committee of appeals, whose decision shall be final. Three members of either committee shall form a quorum, and, in case of absence, vacancies may be filled by the choice of contending parties. Members failing to attend, unless for satisfactory reasons, shall be fined three dollars. The fees for arbitration and appeals shall be as follows: For each award under $1,000, $10, for each award from $1,001 upward, $20. The secretary shall receive three dollars each for each case. The annual assessment is considered due when made, and any persons failing to pay such assessment within ten days thereafter shall forfeit his membership. Each firm or business house, all the resident members of which are members of the Lumbermen's Exchange, shall be entitled to one clerk's ticket of admission to the Exchange Room, such clerk to be an employee of the firm applying for the ticket, and to be approved by the board of directors, but no clerk shall be entitled to sit in any of the rooms of the Exchange Room, for himself, or for any other person than the employer to whom the ticket is issued.

After the adoption of these rules, forty lumber dealers became members of the Exchange.

At a meeting held on April 29, 1869, the directors recommended the appointment of Russell K. Bickford, George R. Roberts, William Blanchard, A. F. Dwight, and A. C. Calkins as an inspection committee, with authority to appoint inspectors to be licensed by the Lumbermen's Exchange, and the entire matter of the inspection of lumber, including rules and rates, was referred to this committee. The following committees were then appointed:

Arbitration.—Addison Ballard, J. C. Maxwell, A. A. Bigelow, G. W. McCutchan, and Malcolm McDonald.

Appraisals.—Jacob Beidler, Jesse Spading, H. H. McCrea, J. C. Brooks and T. M. Avery.

During the first year of its existence, the Exchange exerted comparatively little influence upon the trade. A change of officers occurred in 1873; W. W. Calkins being elected president and George E. Stockbridge secretary. It is due to the first secretary, W. L. Southworth, that the Exchange gave five years of service without any renumeration other than a small percentage on the amount collected for dock rents.

Since 1876, the Exchange has directed its efforts mainly to the collection of statistics regarding the receipts and shipments of lumber, as well as to the ruling market rates and the licensing of lumber inspectors, who are guided by rules formulated by the director. The publication of monthly statistical statements was commenced by George E. Stockbridge during his term of office as secretary, and has since been continued. On Mr. Stockbridge's resignation, in March, 1879, A. H. Hitchcock was elected his successor, and the latter was succeeded by George W. Hotchkiss, in 1881.

The following is a complete list of the officers of the Lumbermen's Exchange, from its organization to the present time:

Presidents.—T. M. Avery, 1869-71; W. W. Calkins, 1872; William Blanchard, 1873; A. C. Calkins, 1874-75; Thaddeus Dean, 1876; Malcolm McDonald, 1877; Thaddeus Dean, 1878-79; A. A. Bigelow, 1880; A. G. Van Schalek, 1881; A. A. Carpenter, 1882; J. P. Ketcham, 1885-86; T. H. Swain, 1887.

Vice-Presidents.—W. D. Houghteling, 1869-71; William Blanchard, 1872; W. D. Phillips, 1873-74; A. A. Irish, 1875; A. A. Carpenter, 1876; S. A. Irish, 1877; John McLaren, 1878-79; C. C. Thompson, 1880; S. K. Martin, 1881; W. E. Kelley, 1882-84; Perley Lowe, 1885.

Secretaries.—W. L. Southworth, 1869-75; George E. Stockbridge, 1875-79; A. H. Hitchcock, 1879-86; G. W. Hotchkiss, 1881-85.

In 1859, the Lumbermen's Association was formed. For a time it exerted a peculiar influence on the market. An under estimate of the prospective receipts of 1859, issued by the Association, resulted in a temporarily firmer market. In April, prices advanced $1 a thousand, sales being made at from $7 to $9. This advance stimulated manufacture for this market, and, from all points along the western shore of Lake Michigan, nearly everything in the shape of a log was shipped to Chicago; the receipts of the year exceeded the Association's estimate by more than one hundred million feet and a fluctuation of prices was the result. An exception may be noted as regards first, second and third clears, which sold at considerably higher prices, the quotations in March of that year (immediately after the opening of the Illinois and Michigan Canal) being $14, $19, and $24 respectively, and, in June following, several lots were sold to St. Louis customers at $16, $23 and $28. But, later in the season, prices ruled materially lower. Over-production was in part responsible for this, though other causes were also at work, among them the indebtedness of the farmers, which was unusually heavy.

One of the remarkable features of the lumber trade in 1860, was the shipment of clear lumber from Chicago to Albany, N. Y., and to several points in New England, and the establishment of a substantial trade with Cincinnati, Indianapolis and other points in Indiana and Ohio. In 1864, the receipts of lumber from Western Canada were unusually large, owing to the high prices ruling in the Chicago market, notwithstanding the high rate of exchange. The high prices of that season may be attributed directly to a scarcity of lumber, caused by low water in the Mississippi and its tributaries, preventing the cutting of lumber on the upper streams. The season being a prosperous one for agriculturists led to the erection of larger and better farm buildings throughout the country—and especially the Northwest—thus stimulating the demand for forest products. The low water, however, also prevailed in the Illinois River, thereby transportation upon the railroads, whose facilities were already taxed to the utmost by the forwarding of troops and supplies. With high water in 1864, the receipts of lumber in this market increased ninety
million feet; while the increase for 1865, over that of 1864, amounted to more than one hundred and forty-five million feet. The noticeable feature of the trade of 1870, was the shipment of lumber from this market to the interior of Wisconsin, and its sale there at lower prices than those at which it could be procured from the forests of the State. The average price of first clearings during that year was $35 a thousand.

Careful estimates, made by competent authorities, fix the total consumption of lumber throughout the United States at ten billion feet, one-tenth of which was received and handled in the Chicago market.

In 1868, a movement was started to transfer the lumber business to what has since been known as the New Lumber District. A series of canals was excavated by the South Branch Dock Company, extending from the river to Twenty-second Street, affording a dock front of twelve thousand five hundred feet, which, together with the river front adjoining, makes a total dock front of nearly three miles. These canals are one hundred feet wide, and were, at first, eleven or twelve feet deep; since then, they have been dredged to the depth of from twelve to fourteen feet. The lots owned by the South Branch Dock Company were one hundred by two hundred and forty-four feet in size, each having a dock and street front; and being furnished with a switch track connecting with the Chicago, Burlington & Quincy Railroad, thus placing them in direct communication with the entire railway system of the Northwest. These lots were rented to lumber dealers at ten dollars a foot per annum. In 1869, the lumber trade of Chicago reached the enormous proportion of nine hundred and ninety-four million feet, and this immense trade moved southward to the new district as rapidly as it could find accommodations. In the spring of 1869, about forty lumber firms were doing business there, besides eight first-class planing mills. Colonel R. B. Mason was then president of the South Branch Dock Company, and under his direction the company completed a new canal in the spring of 1869, the demand for dock-room keeping pace with the company's ability to furnish it.

Among the first lumber firms to move to the new district were Ludington, Wells & Van Schaick, who located on the west side of Joy's canal; T. W. Harvey, who located on the east side of Mason's canal; the Menominee River Lumber Company, also on the east side of Mason's canal; the H. Witbeck Lumber Company and the South Branch Lumber Company, and the South Branch Lumber Company, on the west side of Mason's canal. Others moved to this location, until soon a considerable portion of the lumber trade was transferred thereto.

The increase in the amount of lumber handled in the Chicago yards became so great that a still further extension of facilities was imperative, and, in 1881, another district was added upon the South Branch of the river, extending from Thirty-fifth Street to the city limits at the Stock-Yards. To this territory, during 1881-82, were removed the yards of the B. L. Anderson Company, Bigelow Bros, the Chicago Lumber Company, Flinn & Uhrich, Adams, Lord & Co., S. R. Howell & Co., and Crandall, Schultz & Co. Here, in 1884, occurred the first extensive conflagration originating in a Chicago lumber yard. This fire commenced in the yard of the Chicago Lumber Company, being ignited by a spark from a passing locomotive. It was not checked until twenty million feet of lumber and one hundred million shingles, aggregating in value about $40,000,000, had been consumed.

The extent of the trade demanding still greater facilities, in 1884, the firms of Thaddeus Dean & Co., James Charnley Lumber Company, and D. F. Gross & Co., removed from the Twenty-second Street district to South Chicago, where several firms had already preceded them, and whither they were followed, in 1884-85, by the Commercial Mill & Lumber Company, L. Sands & Co., Thomas Stimson and Josiah S. Leonard. With the growth of the city toward the north, various yards were soon established on the North Branch in various localities, their business being at first largely confined to the supply of a retail demand from this section of the city.

The use of hardwood lumber gradually increased with the establishment of manufacturing interests, particularly that of furniture, and, in 1885, the number of yards of this character increased to thirty, handling an average of about three hundred million feet of hardwood lumber annually, and carrying stocks averaging about forty-five million feet, embracing all varieties of native timber with a liberal supply of foreign woods. The volume of trade in this department comprises, at the present time (1886), about one sixth of the sum total of the lumber trade of the city, its supplies being drawn from nearly everyone of the Western, Northwestern and Southern States.

Reference has been made above to the Lumber Manufacturers' Association. That organization had but an ephemeral existence. When its ability to influence market rates had ceased, it died. In 1883, was formed the organization known as the Lumber Manufacturers' Association of the Northwest, embracing in its membership representatives from the leading manufacturing interests of Michigan, Wisconsin and Minnesota, with headquarters at Chicago. The association holds semi-annual meetings and collects and publishes a large amount of statistical information.

The lumber yards of Chicago, in 1885, if consolidated in one, and the lumber piled in a solid body, twenty feet in height, would probably occupy a space fully one mile square; but spread as the business is, through various sections of the city, it occupies a dock and stock frontage of probably twenty miles. In the transportation by lake, not far from five hundred steamers and sailing craft are employed, landing eight thousand cargoes a year. In addition, not less than thirty thousand railroad cars, averaging ten thousand feet a car, are employed in supplying the yards.

In the sale and shipment of lumber (the majority of which is shipped to the West and South), about two hundred thousand cars are yearly demanded. The number of dealers in pine lumber in the city, in 1885, was one hundred and twenty; of dealers in hardwood, fifty, while the number of commission men was one hundred and five. The aggregate capital invested in the business was about $18,000,000, and the total value of the forest products received was about $65,000,000.

The following tables give a concise résumé of the business transacted:

*This remarkable increase is due to the fact that, previously to 1880, the figures only exhibit shipments by rail, while after that date they represent the entire distribution and include the city trade.*

It is interesting, in this connection, to trace the condition of the cargo market at three several periods of the season, and compare prices with those prevailing at the same date for the year preceding. With this in view, data have been selected and presented at about the opening, the middle and the close of the season, with the following result:

**George R. Roberts** was one of the early lumber dealers in Chicago, having come here from Grand Rapids, Mich., in 1846. He established a lumber yard, in 1847, on the river, between Madison and Rush streets, continuing at that spot until burned out by the incendiary fires of that year. In 1847, he sold out to DeWillo K. Holt. He then sold lumber manufactured by his father and brother, at Grand Rapids, Mich. Then he and T. S. Parker formed a co-partnership, which was terminated in 1852, Mr. Roberts buying the interest of Mr. Parker. In 1863, Mr. Roberts formed a co-partnership with William H. Waite, who was at the time secretary of the Western Marine & Fire Insurance Company, and then doing a banking business. This co-partnership ceased in March, 1866, J. W. Calkins and M. B. Hull buying out Mr. Waite. The firm name was then Roberts, Calkins & Hull, until the fall of 1868, when Mr. Calkins retired and the firm continued until the death of Mr. Roberts in June, 1875. Mr. Hull then, for three years, by direction of Mr. Roberts's will, continued the business and closed up the estate. The lumber of this firm was manufactured at Muskegon and Muskegon City, Mich., and then shipped to the corner of Wells and Harrison streets. From 1867 to 1868, it was on Clark Street, near the crossing of the Chicago, Burlington & Quincy Railroad. In the latter part of the business was sold to M. B. Hull and the firm confined themselves strictly to the manufacture of lumber, selling only by the cargo, after that time, until 1878, when Mr. Roberts's interest in the business was sold to A. B. Bowers, of Grand Rapids, who thus became a partner of the firm, and the business continuing then being carried by M. B. Hull & Co., under which name they continued until January, 1880, when they sold their entire interests in Michigan to Bloodget & Byrne.

M. B. HULL was born in Berlin, Rensselaer Co., N. Y., in 1832, the son of Benjamin L. and Maria (Jones) Hull. He spent his early life, up to the age of seventeen, on a farm, and then taught school. In 1853, he commenced his business life as bookkeeper for James H. Jones, lumber dealer in Allegany County, N. Y., continuing in that position three years. He then went to Dubuque, Iowa, and, from 1856 to 1859, clerked in a wholesale goods house. In September, 1859, he came to Chicago, and traveled through the Northwest, collecting doubtful claims for Foster & Eaton, wholesale houses. In 1861, he accepted a clerkship in the firm of George R. Roberts & Co., lumber dealers, and, in 1866, became a member of the firm. Early in 1881, he married the daughter of Jonathan Denison, of Rensselaer County, N. Y. They have two children, -Morton D. and Made E. (twins).
Alexander Officer was born in New Cumberland, Penn., in 1817, the son of Alexander and Sarah (Shock) Officer. He learned the carpenter's trade from his father, and in June, 1834, entered the lumber business by buying the spring of 1835, when he came West. He then located at Mount Carroll, Carroll Co., Ill., where he remained until the spring of 1848. In 1848, he came to Chicago, and he and his wife built the first frame house near Kindred, which he operated until 1860, when he became a commission dealer, and continued thus during the remainder of his career. His business was very large, amounting some years to $2,500,000 to $2,000,000. He died in 1898.

James McMullen, Jr., entered the business of his father, and thus continued the business which resulted in the formation of the firm. In 1861, Mr. Officer retired from the lumber business, and a new firm was organized, under the style of McMullen, Funk & Co., the members being James McMullen, Jr., John F. Funk and J. B. Beidler; this firm operated one yard at No. 10 North Canal Street and another at the corner of Lake and Jefferson streets. In 1866, Mr. Officer purchased the interests of Mr. Funk and Mr. Beidler, and the name became McMullen & Officer. The firm occupied the two yards until 1869, when they removed to the southwest corner of Throop and Lumber streets, and in 1876 removed to the corner of Main and Cologne streets. Mr. Officer was married to the adopted daughter of Dr. Dickinson, of Peoria, Ill., in 1850. His wife died in 1860, leaving two children.—Walter and Kate. Kate is now the wife of R. A. Keyes, of the firm of Franklin MacVeagh & Co.

James McMullen was born in Ireland. When he was five years of age, he emigrated from that country to St. Lawrence County, N. Y., where James remained until 1832. He came to this city and found employment with John Kitzie, and afterward with Granger & Van Osdel, who had a foundry on North Water Street, between LaSalle and State streets. In 1836, he went to work for R. T. Thomas, a lumber dealer, and in 1849 entered the employment of Alexander Officer. Since April 15, 1846, Mr. McMullen has been engaged in the lumber trade, and is therefore probably the oldest continuous lumber dealer in the city. In 1852, he married Margaret Curran, daughter of Philip Curran, of Ireland. She died in 1855, leaving one child, Elizabeth, now wife of Eugene Keogh, of Chicago. He was married a second time to Mary A. Young, of Canada; they have six children living,—John H., Walter J., William T., Agnes E., Alice M., and Mary A.

George C. Morton, one of the old lumbermen of this city, was born on October 25, 1819, in Genesee County, N. Y., the son of Eleazer and Joanna (Cotton) Morton. He received his early education at his native place, and there did some boy's work upon his father's farm. In 1831, he went with his parents to Medina County, Ohio, to the extensive schoone, and in 1834, removed with his parents to St. Joseph, Mich., where his father resided until his death in 1844. In 1847, Mr. Morton commenced his business life at Milwaukuee, and engaged in the lumber trade, and there remained two years, when he came to this city. Here, he entered the lumber business, and became a member of the firm of Morton, Gilbert & Co., the partners being Thomas D. and F. B. Gilbert, of Grand Haven, Mich., and the lumber yard being situated on the southeast side, between Monroe and Adams streets. He there remained in the same business association until 1858, when he formed a partnership with Laurin P. Hilliard, under the firm name of Hilliard & Morton, their yard being on the corner of Market and Adams streets, where the Farrell Block now stands. In 1860, on account of ill-health, Mr. Morton sold out his lumber interest, but remained more or less connected therewith, until 1866, when he again resumed active operations, and continued them until 1868, when he permanently retired from the lumber trade. At the time he became interested in real estate interests and in the settlement of various estates, at the present time being interested in the interests, principally the management of the land, which his predecessor the late Isaac E. Morton, had managed, and is a member of the Board of Trade in Chicago. He was married on September 9, 1851, to Miss Charity J. Rathbun, of Grand Rapids, Mich. They have four children,—Anna, Cornelie, Albert H., and Eugene C. Mr. Morton and family are members of St. Paul's Universalist Church, of which congregation he has been an officer for about five years and a constant member for thirty years.

Artemas Carter was one of the early lumbermen of Chicago, having come to this city in 1830 for the purpose of engaging in that business. He was born on a farm near Leon, Mass., on August 17, 1813, the son of James and Sarah Carter. His education was obtained at the district school contiguous to his native place. The age of fourteen he went to work in a store at Leomin- ster, remaining one year, and was then employed three years in a dry goods store at Salem, Mass. He then entered a dry goods store, and after some time began business for himself, as the head of the firm of Carter & Nye, the firm afterward becoming Carter & Stanfield. In 1846, he left Boston and went to Southfield, Mich., at that time a new settlement, where he erected a saw-mill and was engaged as a manufacturer of lumber for two years. He then came to Chicago and opened a lumber yard on the west side of State Street, near Kincardine, which he operated until 1856, when he became a commission dealer, and continued thus during the remainder of his career. His business was very large, amounting some years to $2,500,000 to $2,000,000. He died in 1897.

Mr. Carter was a member of Unity Church, at which his funeral services occurred on Monday, May 15, 1877.

Hannah Lay & Co.—This company was started in 1856 by Perry Hannah, Albert Tracy Lay, and James Morgan, their lumber yard being originally located at the corner of Canal and Jackson streets. Mr. Hannah had been previously employed for three years as a clerk by Jacob Beidler & Co., and Mr. Lay had recently come to Chicago. In 1852, William Morgan was admitted to partnership, but the firm name remained the same. Hannah, Lay & Co. advertised themselves as wholesale and retail dealers in lumber, and in 1857 the firm transferred its business to the mouth of the Kalamazoo River, where it remained until 1877. They also have a planing-mill at Traverse City, capable of dressing fifteen million feet a year. They own a large number of acres of pine and lumber land, and their yard has a frontage of 1,000 feet. They employ nearly five hundred men, and own the steamers "City of Traverse," "T. S. Paxton," and "City of Grand Rapids," styled The Chicago, Grand Traverse & Mackinaw Line. Mrs. Hannah is a resident of Michigan.

J. K. Russell & Co.—The business of this firm dates back to 1850, the members then being Reuben Cleveland and J. K. Russell, when it was located at the southwest corner of Fulton and Jefferson streets, where the firm employed about seventy-five men. Their mill was burned in April, 1854, then re-built on the north side of Fulton Street. It was again destroyed by fire in November, 1856, and immediately re-built, and was burned again on June 6, 1860, and re-built the same summer. It was destroyed by fire in December, 1868, by which misfortune the loss was about $45,000, but it was re-built and considerably enlarged. After being in running order it did not for some time do the largest business of any mill in the city, with one exception. In November, 1869, their mill was totally destroyed by fire, the loss being $250,000, with no insurance, either at this time or the time preceding. The business was then transferred to the warehouse in the rear of the factory, and the building was re-built, commencing in late 1867, and was occupied by five different firms, one of them being J. K. Russell & Co., who are engaged in the planing-mill business and in the manufacture of sash, doors and blinds. They are also engaged in the production of furniture about fifty men are employed, and in the planing-mill about twenty, while in the entire building, which contains, besides the planing-mill and factory, several furniture manufacturing shops. About three hundred men are employed.

J. K. Russell was born in 1825, in Upper Bay Quinte, Canada, the son of Timothy David and Eliza (Tate) Russell. His father moved to Sycamore, Ill., in 1833, and died there in 1883; his mother is still living at Sycamore, and Mr. Russell was brought up on a farm. In 1849, he came to Chicago, and at once engaged in building docks and warehouses with Reuben Cleveland, the firm being continued until 1864, when the name was changed to Cleveland & Russel, on the death of Mr. Russell, and the same firm was continued under the firm name of Cleveland & Russell until 1869. Mr. Russell was married, in 1856, to Miss Mary J. Randall, of Waukecha, Wis. She is a daughter of Hon. Phineas Randall, and sister of Alexander Randall, postmaster-general under President Johnson. Mr. and Mrs. Russell have three children, Edward Mary Grande and John K.

Reuben Cleveland, the former partner of Mr. Russell, was born in Montreal, Canada, in 1814. He was of English ancestry, and
a relative of Grover Cleveland, president of the United States. His father was a ship-builder, and he, at an early age, became a contractor and builder. At the age of eighteen he was married to Miss Julia Slooson, in Clinton County, N. Y. After his marriage, he returned to Monticello, remaining there a number of years and gaged as a contractor and builder. In 1848, he went to Chicago, where he followed his trade, and also became associated with J. K. Russell in the manufacture of saws, in which he continued in business until 1856. About this time he was appointed, by Mayor John C. Haines as commissioner of public works. At the breaking out of the Rebellion, he became captain of Co. F, 8th Illinois Cavalry, a company which had been organized by General Beveridge. After serving about eighteen months, he was obliged to resign his commission on account of ill-health. At the close of the War, he was appointed tobacco inspector in the Internal Revenue Department. A year or so after this, he was appointed, by Governor Medill, as police commissioner, and after four years' service in that capacity, he again was appointed tobacco inspector. His wife died in 1874, and he afterward married Mrs. L. B. McClintock, who survives him. His children living are Mrs. Amelia Waterman, Mrs. Esther Buckley, S. E. Cleveland and T. D. Cleveland. Mr. Cleveland was a member of the Masonic order in 1854, and at a later date he founded Cleveland Lodge, No. 231. He was also a member of Washington Chapter, No. 43, R. A. M.; Apalachee Commandery, No. 1, K. T.; Orabion Consistory, S. P. R. S., 32d; and also a Knight of the Red Cross of Rome and Constantinian. He was a member of the No. 28, G.A.R., the Chicago and Northwestern line, and of the Union Veteran League Club.

The S. N. Wilcox Lumber Company was organized and incorporated in 1873, at White Cloud, Mich., under the laws of that state, with a capital of $10,000. The officers elected at the time of incorporation were S. N. Wilcox, president; George G. Wilcox, vice-president; F. S. Newell, secretary; and Frederick K. Ramsey, treasurer. The objects of the organization were to manufacture lumber, to build planing-mills, and to deal in general merchandise. In Michigan they own a saw-mill, planing-mill, lumber yards, a store, offices, etc. The mill was moved, in January, 1881, to Whitehall, near the mouth of the White River, in order to afford the advantages of shipment by water as well as railroad. At this time the company was organized and incorporated in Wisconsin, and G. Wilcox was elected general manager of the company. Upon the death of S. N. Wilcox, George W. Smith was elected president. The company has been a going concern, and has steadily increased in business, as is shown by the existence of a surplus of $250,000. It consists in the manufacture and the handling of pine lumber and shingles by wholesale; and the company, although it has cleared many thousand acres of pine timber, yet has sufficient to last for a number of years to come.

Saxin Newell Wilcox was born on February 11, 1826, at Enfield, N. Y., the son of Erastus Wilcox, who settled in Chicago in 1839. He became a farmer's boy for about a year, but not finding Cobblelife congenial to his tastes he returned to Chicago, and learned the tinner's trade, commencing with Botsford & Beers, and afterward was in the employ of William Blair, becoming a journeyman tinner. He followed this trade about five years, and then embarked in the shingle business on his own account, then into the lumber business. From about 1850 till 1854, he was one of the partners, with Newell & Co., at Lake City, Minn. In the spring of 1854, he organized the firm of Wilcox & Lyon, and soon after Wilcox, Lyon & Co. The panic of 1857 proving disastrous, Wilcox, Lyon & Co. were compelled to make an assignment, and a dissolution of the firm followed. Soon afterward, S. N. Wilcox took up the assignment and continued the lumber business alone. In 1864, he built one of the largest steam saw-mills on Muskegon Lake, which he owned until 1887. In 1873, he became the founder of White Cloud, a village of Newaygo County, Mich., where he built a large steam saw-mill and water planing-mill. About this time he incorporated the S. N. Wilcox Lumber Company. At first, he felt the greatest faith in the future of pine timber lands, and located such land as rapidly as he could, and would permit, and so laid the foundation for an estate worth nearly a million dollars at the time of his death. He was married in 1845 to Miss Arabella Avery, daughter of Mr. S. A. Avery, by whom he had three children, one only of whom is living, Charles S. Wilcox. He was married the second time to Miss Sarah Ann Adams, daughter of Rev. Mr. Adams. They had five children, two sons and three daughters—Walter D., Henry J., Charles S., Ada Adelaide, and Anna Elizabeth—members of the Republican Party and the Presbyterian Church.

The Lumber Industry...
twenty-four hours. The company have now no lumber yard in Chicago, and the rest of their lumber is shipped by the mills. They are in the habit of purchasing their lumber during the season, which consists of about seven months, from thirty-five to forty feet of lumber. Mr. Martin Ryerson was born in Bergen County, New J., in 1818. At the age of sixteen he left home and went to Michigan, and entered the employ of an Indian trader, Richard Godfrey, of Grand Rapids, remaining with him one year. In 1835, he was with Louis Carpenter, at Racine, then with Jos. Ryerson & Co., for three years. In 1845, he purchased the saw-mill, which was carried on by Green & Ryerson, and afterward by Ryerson & Knickerbocker. In 1845, Mr. Knickerbocker sold his interest to Mr. T. R. Morris, and in 1852, Mr. Morris dissolved his partnership with Mr. Ryerson, and moved to Muskegon. In 1851, he established the firm of Williams, Ryerson & Co., in Chicago. Mr. Ryerson married Louisa M. Duvernay, daughter of Pierre C. Duvernay, of Lower Canada. She died in 1855. He married again Mary A. Campau, daughter of Antoine Campau, of St. Clair County, Mich. They have one son, Martin A., in business with his father.

Adams, Hastings & Co.—This firm has succeeded to that of A. T. King & Bro., which was established by Andrew T. and Fred W. King, in 1851. F. W. King died, and Abbott L. King bought out the interest of his brother. Into the partnership of this firm was attached the name of C. J. King & Co., and the style of the firm was King & Co. In 1854, A. T. King died, and the firm name became Adams & Lord, and the location of the yards was changed to 506 Lumber Street. In 1856, T. F. Hastings was admitted to the firm, the name being Adams, Hastings & Co., and yards were established on the South Side. In 1853, Mr. Lord retired and R. B. Currier, of Springfield, Mass., became a partner for one year, and the yard of the firm was transferred to the Stock-Yards district. In 1855, Mr. Currier retired. The amount of lumber handled by the firm has increased, from 6,000,000 feet in 1857, to 12,000,000 feet in 1858, of lumber, lath and shingles. Abbott L. Adams was born at Keene, N. H., in 1831. His parents were Benjamin F. and Louisa R. (Redington) Adams, who moved to Chicago in 1823. Mr. Adams attended school until 1851, when, on purchasing the estate of his grandfather in Batterymarch, Mass., he joined the 4th Illinois Artillery for three months. At the expiration of his term of service, he returned to Chicago, and in July, 1852, enlisted as a private in the Chicago Board-of-Trade Battery for three years, and was mustered out of the service at Chicago on July 3, 1855. He took a position in the United States Depository, in this city, under Luther Havens, in July, 1856, where he remained three years. He then went to Portage La Prairie, Minn., in charge of the lumber mills of Porter & Co., of Chicago, and remained at that location until the formation of the firm of Adams & Hastings, in 1871.

George W. Hastings was born in Winchendon, Mass., in 1836. He attended school at Jaffrey, N. H. At the age of sixteen, he commenced his business life in the employ of E. Murdock & Co., manufacturers of wooden ware at Winchendon, with whom he remained four years. In 1857, he came to Chicago, and engaged for two years with W. S. Skeele & Co., lumber dealers, and afterward for one year as traveling salesman. In the spring of 1859, he entered the employ of Stock Yards lumber dealers as their city buyer and shipping clerk. In the spring of 1859, he became connected with the firm of Adams & Lord, having a working interest in that house. In the spring of 1855, he was given an interest in the firm, and the name was changed to Adams & Lord, Co. In the spring of 1858, Mr. Lord retired, and the present firm of Adams, Hastings & Co., originated, as above stated. Mr. Hastings married Miss Anna B., daughter of John Bruner, formerly of Alton, Ill. They have one child, George C.

The Gardiner & Spey Company originated in 1852, with Freeland B. Gardiner, who established his business on West Water Street, between Washington and Randolph streets. In 1853, he moved his lumber yard to Wells Street, between Harrison and Adams streets, and received into partnership Henry B. Hinsdale. About this time, another yard was opened by the firm, at the corner of Old Slip and Wall streets. In 1855, one of their yards was transferred to the corner of Beach and Taylor streets, the other being discontinued. In 1863, Mr. Hinsdale retired, and, in 1865, H. B. Gardiner took the yard, and Gardiner & Spey became associated as partners. In 1867, they removed to present location, and Gardiner & Spey Company, as the firm was styled by the latter. In 1872, John Spey retired. In 1873, the business of the company in Wisconsin and Chicago was combined, and incorporated, under the laws of Wisconsin, as the F. B. & Gardiner Company, with E. B. Gardiner as president, John Spey as secretary and treasurer. By reason of unfortunate investments made directly after the fire of 1871, F. B. Gardiner became financially involved, and, in realizing upon his interest in the company, the assets were sold out in 1876. H. H. Gardiner and John Spey bought the stock in the yards of the company at Chicago, and continued under the firm name of Gardiner & Spey until 1882, when John C. Spey was admitted, and the company incorporated, under the laws of Illinois, as the Gardiner & Spey Company, of Chicago. John Spey is president, H. H. Gardiner is vice-president and treasurer, and John C. Spey is secretary. The mills of this company are at Neebish Island, Mich., and their productive capacity is about 10,000,000 feet of lumber per month, being only about one-third of the quantity handled and sold yearly.

Freeland B. Gardiner (deceased) was born in Ellbridge, Oonodaga Co., N. Y., on July 30, 1837. When only nine years of age of his father, a merchant, in Cohoes, N. Y., near Fort Ann, Washington Co., N. Y., and remained with him as clerk in his store until he reached his majority. He then commenced selling goods on his own account, and, in 1865, he came to Chicago. Having received a proprietorship in the Lumber Exchange, he bought property and commenced buying and selling goods on his own account, and subsequently went to Neebish Island, Mich., and engaged in mercantile business. Having, however, selected the lumber business as his future field of operations, on November 9, 1849, Mr. Gardiner set out for the Peninsula, Wis., on the western shore of Green Bay, at that time a wilderness. There he commenced building a saw-mill, which was completed on May 9, 1850. It was the second steam saw-mill upon Lake Superior. The saw-mill was carried on by Green & Gardiner. For some time he had a lumber yard in Kenosha, but in the spring of 1852 he removed to Chicago, where he established a large lumber yard, as above stated. His business rapidly increased up to 1857, when he became somewhat embarrassed, like many others, by the great financial panic of that year. In 1857, he sold his interest in the firm and an amount of his obligations and maintained fully his reputation for integrity. He employed at that time some one hundred and fifty men, and owned, on the Pensaukee River, thirty thousand dollars worth of vessels which he used, he was largely instrumental in furnishing steam communication with the shores of Green Bay. Mr. Gardiner died in December, 1859. He was married, in 1841, to Miss Fanny Copeland, of New York. They had three children, H. B. (son) and two daughters.

Joseph Peacock, one of the oldest living settlers of Chicago, was born in Cambridgeshire, England, on August 21, 1813, the son of Joseph Peacock, a farmer. For several years during his early childhood he lived with his parents at his native town, and then went to Huntington, the birth-place of Oliver Cromwell, to live with his grandfather Caldecott, a jeweler. A clock of his grandfather Caldecott's manufacture, which is over one hundred years old, Mr. Peacock still has in his possession. After residing for some years in Huntington and obtaining his education at the common schools, he learned the trade of a gunsmith at his native village, working at it in different places in England until 1836, when he came to America. He at first located in Cleveland, Ohio, where he worked seven months for a gunsmith named E. P. An-son, who started a small gunsmith shop of his own, which he ran about a year, when he removed to Chicago, Ill., where he worked one winter, and, in the spring of 1836, came to Chicago. In the succeeding fall, he opened a gunsmith shop at the corner of Water and Lake streets, which he ran about three years, and continued in this business, in various locations on Lake Street, until 1850, when he retired from it. In 1842 or 1843, he erected a two-story brick building at No. 224 Lake Street, one of the first erected on that street, and occupied it with his shop for some years. After selling his gunsmith business in 1850, he was unoccupied for some years, and, in 1853, purchased the pine timber lands and saw-mill owned by Silas Billings, near the mouth of Ford River, in Delta County, Mich. After selling lumber by the yard for about a year, he opened a yard near the east end of Twelfth-street bridge, for storing the lumber for which a ready market was not found. He returned to manufacture lumber on Lake Street, and managed this Chicago yard and business in lumber, until 1864, when he sold both lands and mill to John M. McDonald, John Lynch and Mr. Simple. After making this sale, he commenced the manufacture of ironing machines. At the end of an office at various places until 1882, when he, for the most part, went out of business. Mr. Peacock was married, in 1842, to Miss Margaret Sabroar, they had two children, six men of whom are living, as follows: Mary, now wife of S. O. Phillips, Mr. S. L. Peacock, Mr. Peter H. Peterson Company; Alfred L., Russell D., George C., Alice M. and Florence. Mr. Peacock is highly respected for his sternness and strength of character.

Addison Ballard, one of the early and prominent lumber men of Chicago, was born in Warren County, Ohio, on November 30, 1823. On August 21, 1841, he went to LaPorte, Ind., and, in partnership with others, learned the carpenter trade. He afterward became a contractor and builder, and in that capacity erected the Kedron Fort House at LaPorte, in 1842. The lumber for this building he purchased of Hugh Dunlap, whose lumber yard was then on Mar-
THE LUMBER TRADE.

JAMES HENRY PEARSON was born on December 10, 1820, at Haverhill, N. H. His father, Isaac Pearson, better known as Major Pearson, was engaged in the lumber business, owning a saw-mill and a first-class mill-yard. Major Pearson married; first to Miss Charlotte Merrill, by whom he had two children, one of whom, Merrill Pearson, is still living at Bloomington, Ill., at the age of seventy-eight. His second wife was Miss Charlotte Atwood. He died on May 28, 1883. By this marriage he had nine children, the subject of this sketch being one of the nine. Major Pearson died on February 13, 1854, and his widow died on February 16, 1868, at the age of seventy-five.

James Henry Pearson attended a common school and was educated at the academy of his native town. At the age of fifteen he went to Boston, and there entered a dry goods store as clerk, remaining two years. He then returned to Haverhill, and spent two more terms at the academy; this finished his education; he possessed of more than usual business capacity, at the age of twenty-one he took charge of his father's affairs. Renting the farm and saw-mill, he took a contract for getting out timber in the woods, and he and his brothers kept the family together until 1849, when he made a settlement with his father, mother, and brothers, and removed to South Hadley Falls, Mass. Business there not being satisfactory, he came to Chicago in 1851, as narrated above.

Mr. Pearson is a prominent member of the First Congregational Church, having become a member on July 4, 1858. He was married, on April 10, 1850, to Miss Sarah Elizabeth Witherrill, daughter of George Witherrill, of Haverhill, H. They have four children.—Arthur L., born at Henry, Marshall, Co., Ill.; Eugene Henry, born in Chicago; Helen Grace and Robert Nelson. The eldest son has developed a conspicuous talent for art, having spent seven years in Paris, where he has studied painting.

Some of his landscape paintings have been on exhibition here, and are said by good judges of such work to be as fine as any in the city. Mr. Pearson is a Unionist and raised a Union soldier, at Saginaw, Mich., under the firm name of J. H. Pearson & Son. The daughter, Helen Grace, was married to Charles P. Gladwin, of Philadelphia, on June 26, 1877. Her husband died on December 29, 1877, and Mrs. Pearson, after residing with her daughter, at her father's house, until May 2, 1883, was married to Professor Hugh McDonald Scott, of the Chicago Theological Seminary.

Robert Nelson Pearson is engaged in the lumber business in Kansas. He has been with the T. W. Harvey Company, of Chicago, since 1854, and went to work for Abbott & Kingman, then the largest manufacturers of saws, doors, blinds, etc., in Chicago. Their establishment was on Clark Street near Twelfth. In October, 1854, he became foreman, and retained the position until 1859, when he formed a partnership with P. B. Lamb, under the firm name of Lamb & Harvey, and embarked in the planing-mill business. Their mill was at No. 329 South Canal Street. In 1861, they built a mill at the corner of Polk and Beach streets. In 1866, Mr. Harvey bought the interest of Mr. Lamb, and conducted the enterprise alone until January 1, 1883, when the present company was incorporated. The concern was first small, but has steadily increased, until now there are few if any more extensive lumber dealers in the world. In 1869, Mr. Harvey built a planing-mill at the corner of Morgan and Twenty-second streets. The entire floor space is 52,400 feet, upon which portion of timber can be unloadied at once, and the two yards have a capacity of storing, at one time, thirty-five million feet of lumber, and of handling over one hundred million feet yearly. The company owns four thousand acres of primeval timber in Michigan, which are employed large numbers of men in cutting logs and preparing them for the rafts. The mills, which are located at Marinette, Wls., have a capacity of twenty-five million feet a season, which is about one-fourth of the average amount now handled annually by the T. W. Harvey Company. The balance of the amount is purchased in all the Lake markets, and shipped to Chicago. In the vessels owned by the company—one propeller and three schooners—having an aggregate carrying capacity of twelve hundred thousand feet. The planing-mill contains ten planers, which are run by a 250-horse power engine. For drying the lumber there are ten kilns, each with a capacity of ten thousand feet of timber. The kilns are burned by a large and extensive furnace, having an aggregate carrying capacity of twelve hundred thousand feet.
HISTORY OF CHICAGO.

A general business in building material, including all kinds of lumber, lath, shingles, lime, hair, cement, plaster of paris and stucco. He joined a country-road business, before going into business in Missouri, Nebraska and Iowa. The officers of the company are as follows: Sir Edward Syme Hutchinson, Bart., president; T. W. Harvey, vice-president; A. S. Badger, secretary and treasurer; and A. Mears, a director.

T. W. Harvey was born at Siloam, Madison Co., N. Y., on March 10, 1835, the son of Johnson and Paulina (Walker) Harvey. He was a native of New Bedford, N. S., and the son of Samuel and Mary, of Massachusetts. In 1856, his parents moved to Sandwich, Ill., where his father died in 1850; his mother is still living. Young Harvey, from the ages of eleven until fourteen, was employed during the winter months as a clerk in the store of C. Mears & Co. at Duramville, N. Y., also attending school in the winter months. He then worked in a carpenter shop of his father at Duramville, until he was sixteen years of age, when, his father having built a planing-mill, sash, door, and blind manufacturer, he worked in the business until 1853. In that year the mill was destroyed by fire, and his father and he built a planing-mill, at Oneida, N. Y., which they carried on for one year under the firm name of J. Harvey & Son. In 1854, T. W. Harvey came to Chicago and entered the employ of James McFall, a manufacturer of sash, doors and blinds, at the corner of Franklin and Tyler streets, with whom he remained but two weeks, when he was made foreman of the factory of Gray, Morrison & Co., at the corner of Sixteenth and Clark streets, this firm also being engaged in the manufacture of sash, doors and blinds. The senior member of the firm dying of cholera, in 1855, his son was then engaged by the firm of Abbott & Kingman, as specified in the foregoing sketch of the firm; which sketch also gives Mr. Harvey's subsequent business career. He was married to Miss Mary L. Hardman, daughter of Jacob W. Hardman, of Louisville, Ky., in 1856, and they have five children,—Ibelle B., Turlington W., Jr., Elbert A., Paul S. and Elvira. Mr. Harvey has been prominently and influentially identified with many commercial, charitable and theological interests. He had charge of the Shaker Committee of the Relief and Aid Society at the time of the fire; he has been president of the Young Men's Christian Association for six terms; he was president of the Chicago Relief and Aid Society for the years 1855-56, of which institution he has also been director, and has been superintendent of the Sunday School of the Missions of the Wabash-Avenue Methodist Episcopal Church since 1862, and is president of the Board of Trustees of that Church; he is president of the Chicago Bible Society, of the Chicago Evangelistic Committee, and of the Chicago Prayer Alliance and Bible Reading Society. He is a director of the Metropolitan National Bank, of the Commercial Exposition Building Association; he is also president of the Harvey Lumber Company, and vice-president of the National Lumber Company. He has taken great interest in the work of improving the streets and public buildings in this city, having been an extensive importer of fine marble and other building materials from England and Scotland; his herds of Short-horns and of Pollled Angus, having been prize-winners at every fair where they have been exhibited. In connection with stock interests, Mr. Harvey was chosen treasurer of the Short-Horns Breeders' Association, and is also proprietor of the celebrated Turlington Stock-farm, at Turlington, Neb.

A. C. Badger was born at Dover, N. H., in 1828. In 1844, he went to Louisville, Ky., and was employed as clerk in a bank. In 1850, he became a partner in the banking house of A. D. Hunt & Co., with whom he remained until 1851. In that year, the firm dissolved, and Mr. Badger came to Chicago and engaged in the banking business, as the firm of A. C. Badger & Co. Upon the organization of the T. W. Harvey Lumber Company, Mr. Badger was made its vice-president, which position he now holds. He is married and has seven children,—Ibelle C., daughter of John J. Sher- ridan, of Louisville, Ky. They have five children,—Harold, infant, and the family of T. W. Harvey, of Chicago; Ada, now wife of R. L. Henry, of Chicago; Sherman S., Alphonso S., and Abram H.

H. H. Badger was born at Lousville, Ky., in 1851, the son of Leonidas V. and Mary M. (Stanwood) Badger, who came to this city in 1851. At the age of fifteen, he entered a bank, in which he held a clerkship until 1873, when he entered the employ of T. W. Harvey, with whom he remained until the incorporation of the T. W. Harvey Lumber Company, when he was made its treasurer. Mr. Badger married Sophie S. Hutchinson, daughter of John H. and Mary A. (Cross) Hutchinson, of Chicago in 1862, and Mr. and Mrs. Badger have three children,—Carlton S., Alice H., and Franklin H.

Mr. Cross was born in Elginhampton, N. Y., in 1854. His parents, Alfred J. and Frances (Hatchin) Cross, settled in Chicago in 1857. At the age of eighteen, Mr. Cross commenced his business life as a clerk for T. W. Harvey, and continued in that position up to 1859, when he became a member of the firm, and was continued in the business and, in 1873, he married Grace L. Sherman, daughter of Ezra L. Sherman, of Chicago. They have three children,—Bessie, Alfred and Mary.

The Malcolm McDonald Lumber Company was incorporated on April 14, 1857, by James McDonald, Eliza A. McDonald, George H. Richey, Michael Minuter and G. M.underson. The first, and present, firm of the corporation is Michael Minuter, treasurer; and G. M.underson, secretary. The original capital was $25,000, which was afterward increased to $50,000. This company established themselves on the premises formerly occupied by the firm of Johnson & Co. Their yard is a stock of four feet in length, and a depth of 90 feet. Sixty men are employed and about 24,000,000 feet of lumber sold annually, including laths and shingles. It is almost exclusively white pine, though a small quantity of Southern pine is handled.

Malcolm McDonald was born on September 22, 1830, in New York, the son of Angus and Margaret McDonald, both from Scotland. His mother died of cholera during the first visitation of that pandemic to the United States, and his father some years later, leaving young Malcolm an orphan when of very tender years. He was then taken into the home of James Frazer, a wealthy lumber manufacturer and dealer of Saginaw, Mich. When he attained his majority, he went to the Lake Superior copper mines, remaining one year. He came to Chicago in 1851, and found employment almost immediately with Mears, Bates & Co., with whom he remained until the establishment of the firm of McDonald & Richey in 1857, when he was associated with Addison Ballard, under the name of A. Ballard & Co. He continued a partner of Mr. Ballard until 1857, when he became connected with James C. Johnson. Mr. McDonald was born September 21, 1819, and died July 18, 1887. They have had three children, of whom only one is living,—Malcolm McDonald, Jr., born on September 10, 1864, and now salesman for the Malcolm McDonald Lumber Company. Mr. Donaldson has served for two terms as alderman of the ward in which he resides.

G. H. Richey was born at Toronto, Canada, in 1848. His parents, John H. and Frances (Cross) Richey, originally came from Cincinnati; they died while he was young, and he was brought up by his uncle, C. V. Bell, at Spring Lake, Mich. He worked in his uncle's saw-mill until 1871, when he came to Chicago, where he has since resided. He was married to Miss Nettie Mandens & Winter, lumber dealers, with whom he remained until the incorporation of the Malcolm McDonald Lumber Company, of which he was one of the incorporators and the first president, a position which he still retains. Mr. Richey is a member of Chicago Lodge, No. 211, A.F.&A.M.; also of Washington Chapter, No. 43, R.A.M.; of Chicago Commandery, No. 19, K.T., and of Oriental Consistory, S. P. R. S., No. 32. He married on September 2, 1866, at Saginaw City, Mich., to Miss Eliza A. Spar, of that place. They have had three children, of whom only one is living,—Malcolm Donaldson, Jr., born on September 10, 1864, and now salesman for the Malcolm McDonald Lumber Company. Mr. Donaldson has served for two terms as alderman of the ward in which he resides.

G. M.underson was born in Chicago, on October 5, 1855. His father, Gabriel Munderson, was a lake captain for about twenty years. His mother's maiden name was Maria Ann Johnson. Both are living. Mr. Munderson was educated in part at the public schools of Chicago, and at the Chicago College, where he remained two years. He then went to Europe, spending there the summer of 1873. Returning to Chicago, he entered the employ of McDonald & Roe, on April 15, 1874, and continued with them until 1875, when the firm was dissolved he was out of business about a year, and, upon the incorporation of the Malcolm McDonald Lumber Company, he became its secretary. Mr. Munderson was a member of the First Regiment, Illinois National Guard. He is a member of the Illinois Club, also of Covenant Lodge, No. 926, A.F.& A.M.; of Washington Chapter, No. 43, R.A.M.; of Chicago Commandery, No. 19, K. T., and of the Norwegian Evangelical Lutheran Church. Mr. Munderson was married, on July 4, 1885, to Miss Nannie Hayes.
and James H. Ferry, whose father was the capitalist of the Ferry family, both partners having come to Chicago in that year. The lumber yard of this firm was located at the corner of Market and Washington streets. In 1856, Mr. Ferry retired from the firm and Mr. Turner, who was given the place of manager, continued the style of business for Howard & Barton, and were located at the corner of Twelfth and Lumber streets. This firm continued three years, after which, Mr. Barton conducted the business until 1864 at the same location. He then disposed of his interest in the firm. The lumber business was continued until 1880, when it was closed out, and the firm have since confined their attention to the wholesaling of lumber from their own excellent yard at (Winslow), succeeding Captain Howland, and establishing the firm of Ferry & Barton employed from six to eight men, and sold two million feet of lumber; during the last year Barton & Jones carried on the yard business they employed from forty to fifty men, and sold 125,000 feet of lumber. During 1844 the sales amounted to 18,000,000 feet, 40,000,000 shingles, and 6,000,000 lath, and the various contractors, cutting logs and lumber for them, employed from one hundred and twenty-five to one hundred and fifty men.

Turner, daughter of Captain John M. Turner, who came to Chicago in 1850, and who, for about sixteen years, followed the sea as captain of one of his father's vessels, his father being a large ship-owner of Philadelphia. Mr. and Mrs. Foster have five children,—Mildred, Mrs. Belle, Cornelia F., Laurence, and Ida Belle. Mr. and Mrs. Foster, as well as two of their daughters, are members of the Emmanuel Baptist Church.

CHARLES RITZ BROTHERS LUMBER COMPANY is composed of four brothers, Charles, August, Frederick and Edward G. W. Rietz. The four entered the employment of Loomis & Loomis, in 1853, remaining six years. In 1855, they established themselves in business as Ritz & Rietz, at No. 27, N. W. Street, and continued the firm name of Charles Rietz & Bros. In 1862, they opened a second yard on Twelfth Street, near Beach, continuing it until 1870, when they moved to the corner of Beach and DeKoven streets, where it remained until 1875, when they removed it to the present location. Here it is really in three parts, the first having a front of 443 feet, and a depth of 240 feet; the second part, which is opposite the first, is 150 feet square, and the third is 200 x 100 feet. Their original yard, which has been used ever since 1853, is 40 feet deep and has a front of 254 feet. In 1870, the Charles Rietz Brothers Lumber Company was incorporated, with a capital in $50,000. Mr. Charles Rietz, president; Frederick Rietz, vice-president; August Rietz, secretary; and Edward G. W. Rietz, treasurer. They own 19,000 acres of land in Michigan, and the second brother, Mr. Charles Rietz, president; Frederick Rietz, vice-president; August Rietz, secretary; and Edward G. W. Rietz, treasurer. They own 19,000 acres of land in Michigan, and the second brother, Mr. Frederick Rietz, the third brother, was also born in Saxony in 1835. He married, in 1856, Johnneta Gross, of Milwaukee, Wis. They have three children,—Julia, wife of John Brandt, of Chicago; Charles F., now engaged in above firm; and Nettie H.

Edgar G. H. Rietz, the youngest brother, is also a native of Saxony, Germany, born in 1849, and the firm being one of Frederick Rahmann, daughter of Frederick Rahmann, of Saxony. They have seven children.—Edward F., engaged in business with the firm; Minnie George, Frederick Rietz, and Mary L. Rietz, also engaged in business; Walworth & Reed.—This firm comprises N. H. Walworth and E. H. Reed, and is the result of the consolidation of two separate firms, one of which was the firm of Reed (Horatio) & Bushnell, and the other the firm of Walworth & Reed. Their yard was at the corner of Clark and Sixteenth streets. The other firm was Conger (C. H.), Walworth (N. H.), & Co., the original company being Roberts, Calkins & Hull, composed of George R. Roberts, J. W. Calkins, and E. H. Reed, who in 1870, sold out to Conger, Walworth & Co. The yards of these two companies adjoined each other. The firm of Reed & Bushnell, which in the meantime had changed to Bushnell & Reed, by the substitution in the firm of E. Reed for his father, Horatio Reed, moved to the corner of Twenty-second and Latm streets. In 1870, Conger & Walworth bought out the interests of Roberts, Calkins & Hull, and, in 1871, Mr. Walworth bought the interest of M. C. & a new firm, Bushnell, Walworth & Reed, composed of Winslow Bushnell, N. H. Walworth and E. H. Reed, was then formed. In 1874, Mr. Bushnell purchased a large tract of pine timber in Wisconsin, and built a saw-mill and grist-mill there. He transferred the same to the firm of Bushnell, Walworth & Reed, who, in that year, built a planing-mill, dry-kilns, etc., and established a lumber yard at that point, which was continued until 1880. The firm of E. H. Skelton & Co., of which Mr. Bushnell retired from the firm, leaving it composed, as at present, of N. H. Walworth and E. H. Reed. In 1871, the firm of Bushnell, Walworth & Reed bought a saw-mill at Miskegon, Michigan, of Mr. Bushnell, and reorganized the company at the firm in 1876, when it became Walworth & Reed. They continued to run the mill at that place, which had a capacity of 35,000,000 feet a season, until 1885, when they moved it to Minnesota, and closed the mill. In the same year they opened a lumber yard at Cedar Springs, Mich., and continued the business there. They purchased, in 1876, by a capital stock of $55,000, under the laws of Illinois, in June, 1884. This company does a retail lumber business at Albion and other points in Nebraska. The president is N. H. Walworth; W. J. Reed, vice-president; E. H. Reed, secretary and treasurer.

The Holdrege Live Stock Company was incorporated under the laws of Illinois, with a capital stock of $20,000, for the purpose of dealing in live-stock and grain. The stockholders of the company are N. H. Walworth, E. H. Reed, J. N. Conger, W. J. Jones, and E. L. Parsons.

Henry N. Holden, hardware-lumber dealer, was born at Providence, R. I., in 1835. He was educated at the common schools of his native city, and became a member of the firm of Holden, Bishop & Co., in 1850. His father, Isaac H. Holden, was a manufacturer of stove and machinery for twenty-five years before coming to Chicago. During the latter part of this time he was the principal stockholder of the High-street Furnace Company, of Providence, R. I., and during the last ten years he was the sole proprietor of that business. At the age of seventeen, Henry N. Holden apprenticed himself to a jeweler, and continued in this capacity for eighteen months. After this time he studied bookkeeping a few months, and then entered the employ of Baker, Smith & Co., coal dealers, of Providence, R. I., where he remained until 1856, when he came to Chicago, and became bookkeeper for Holden, Bishop & Co., a lumber firm composed of his father, Isaac H. Holden, and James E. Blahop, and having their office and yard at the northwest corner of Market and Jackson streets. The firm of Holden, Bishop & Co., went out of business in September, 1856, and Mr. Holden proceeded to the East, for the purpose of extending the business. He moved to Providence, R. I., and continued the business for almost two years, until 1858, when he returned to Chicago, and joined a company of stockholders, of which he was the head, and under the name of Holden & Company, engaged in a general hardware business, consisting of handling the various kinds of natural hardwood lumber and mahogany, rosewood and Florida cedar. Mr. Holden has always conducted his business according to legitimate principles, and, having the confidence of his fellow citizens, he has made a fortune. He is the oldest lumber dealer in Chicago. He and Mrs. Holden have been members of the First Congregational Church since 1856, and Mr. Holden has been a member of the Board of Trustees of the society about the same length of time. He is also a director of the Chicago Theological Seminary, elected in 1883.
for five years. He was married at Providence in September, 1858, to Miss Jane Perkins, of that city. They have had five children, two boys and three girls.

The Lord & Bushnell Company is composed of E. A. Lord and Winslow Bushnell, and was incorporated in May, 1862. Prior to that time Mr. Lord had been a member of the firm of Adams & Lord, of New Orleans for two years, and was one of the firm of Adams, Lord & Co. Mr. Bushnell commenced the lumber business in 1859, as a member of the firm of Reed & Bushnell. In 1860, this firm was changed to Winslow, Walthew, & Co. In 1874, Mr. Bushnell retired from this firm, and during most of the time until 1882 was out of business. The Lord & Bushnell Company was incorporated with a capital stock of $56,000. E. A. Lord was made president of the company. In 1882, Mr. Bushnell and Winslow Bushnell incorporated the Lord & Bushnell Company. Mr. Lord married Miss Mary B. Hoyt, daughter of Augustus Hoyt, of New York. They have six children,—James E., Henry P., and Mary B.

Winslow Bushnell was born in Greene County, N. Y., in 1850. His parents were Alanson and Betsey (Deevey) Bushnell, his father being a descendant of one of the early settlers of Columbia County, N. Y. His father dying when he was six years of age, his mother took her son, Winslow, to live with her father. From the age of sixteen to twenty-three, he took charge of his grandfather's farm. In 1855, he went to Kendall, N. Y., and for one year clerked in a grocery store. In 1856, he was employed as a clerk on a steamboat plying upon the Hudson River, and in November, 1866, came to Chicago, and for two years was bookkeeper for Henry Torcland & Company. Here he entered into partnership with Horatio Reed in the lumber business, as the firm of Reed & Bushnell, as stated above. Mr. Bushnell was married in 1884, to Miss Kate Van Winkle, daughter of Daniel Van Winkle, who came from New Jersey to Illinois in 1841, and to Chicago in 1849. They have three children,—Edward A., engaged in business with his father; James F. and Augustus T.

William G. Ott, lumber dealer and inspector, was born in Maryland, on November 1, 1835. He lived in his native State until coming to Chicago, in 1857. His father was William Ott, a large slave-owner and planter of Frederick, Md., who freed all his slaves in 1826. In 1835, at the age of ten years, he entered Frederick College, graduating from that institution in 1854. He then attended the Gettysburg Theological Seminary, a Lutheran institution, in 1854, and was ordained in 1856, in the view of becoming a Lutheran minister, but being of a jovial disposition, and as ministers at that day were expected to be exceedingly sedate and dignified, he concluded that his calling was in some other line, and left the Seminary before the expiration of the three years for which he was trained.

This was in 1857, and in the same year he came to Chicago. In 1859, he was appointed lumber inspector, and still continues to perform the duties pertaining to that office. In 1857, he established himself in the commission lumber business, dealing in the long-leaft, or yellow, pine. The Georgia Lumber and Turpentine Company was incorporated under the laws of Georgia in 1880, with a capital of $70,000. Of this company, W. H. Low, of Atlanta, Ga., is president; R. F. Woodward, of Nashville, Tenn., general manager; and William C. Ott, secretary and treasurer. The company owns two saw-mills, one located at Eastman, Dodge Co., Ga., and the other at Milledgeville, Hightown, Ga, in which they have about four hundred thousand boxes. During the year ending October 1, 1884, they made one million barrels of rosin. Mr. Ott is also stockholder in the Western Nashville Planing-Mill and Lumber Company, and in 1872, when the company was incorporated at Chicago. This company was incorporated in 1875, and has a capital of $80,000. Hon. Isaac Lytton, of Nashville, is president, and T. O. Treanor, of Nashville, secretary and treasurer. He is also a member of the firm of T. A. Anderson & Co., which, in July, 1884, started a saw-mill at Jefferson, Ala. This mill has a capacity of 40,000 feet a day. In connection with Captain John A. Reid, Mr. Ott is also stockholder in the Western Southern Pine Company of Chicago, and a member of the firm of Henry H. Bigelow & Co. He also deals largely in all kinds of hardwood lumber.

The extent of his sales amounts annually to about 4,000,000 feet of hardwood, 4,000,000 of Southern pine in Chicago and the Western States, and 16,000,000 feet of Tennessee pine, in the Northeastern market. He deals extensively in European countries, in heavy pine and black walnut. Mr. Ott was married, on October 14, 1861, to Miss Jane Seaton, daughter of the late Capt. Seaton, editor for many years of the National Intelligence, Washington, D. C. He has four children,—Ivanorah L., Minnie C., Bessie Seaton, and William Helmer.

The W. E. Frost Manufacturing Company is composed of W. E. Frost, the President, who, in 1837, came to Chicago; and A. C. M. Frost (Davis), from that time to 1861, was foreman in the planing-mill of Simeon Mayo, which was located at the corner of Twelfth and Lumber streets. In the latter year, W. E. Hall and W. E. Frost formed the firm of Hall & Frost, and erected a planing-mill and saw mill, door and blind factory, at the corner of Clark and Sixteenth streets. In 1866, they moved their buildings to the corner of Sixteenth and Dearborn streets, where they have been since, increasing their business. In 1874, Mr. Hall sold his half of the business to A. H. Larned, A. M. Schilling, H. H. Drew and Daniel Keller, and the firm name became W. E. Frost & Co. in 1875. Mr. Keller sold his interest to W. E. Frost & Co. During this year the firm suffered a loss of their property by fire, and moved to a leased place on Lumber Street, near Twelfth, where they remained twenty-one months, when they were again burned out, and in May, 1881, purchased and moved to their present location. The company conducts a saw, door and blind factory and planing-mill, builds stairs and manufactures mouldings, bank counters, book-cases and furniture. They make a specialty of hardwood flooring, of which they manufactured and sold, in 1883, about one million five hundred thousand feet, using, in this department of their business, maple, oak, ash, walnut, cherry and other native woods. Its large and splendid mill building contains an interior finishing of the new Board of Trade building. Besides their planing-mill they have dry-kilns with a capacity of one hundred and fifty thousand feet of lumber, where they kiln-dry all the lumber they use. At the beginning of the year 1885, they employed forty to fifty men, and they now employ from two hundred and fifty to three hundred, and in 1885, the amount of business done was $250,000. The company was incorporated in March, 1835, and the amount of capital was increased to $100,000. The first and present officers of the company are W. E. Frost, President; H. H. Converse, Vice-President; and A. H. Larned, Treasurer. All of the stockholders are working members of the company, which may be one reason for its continued prosperity. Mr. Schilling entered the employ of Hall & Frost in 1856, and remained with the company until 1883. W. E. Frost was foreman in Chicago, in 1855, of George D. and Deborah (Davis) Frost, both natives of Maine. Until he was twenty years of age he lived upon a farm. He then went to Massachusetts and worked in a furniture factory in Manchester, for two years and afterward in the planing-mill of Simeon Mayo, in Worcester, Mass. In 1854, he moved to Boston and became connected with the repair shops of the Boston & Worcester Railroad. In 1855, he went to California, where he remained eighteen months, spending a part of this time working in a saw-mill. In the spring of 1857 he returned to Maine, and in the fall of the same year came to Chicago. Mr. Frost is a member of the firm of W. E. Frost & Co., of Chicago, also of Thomas J. Turner Lodge, No. 409, A.F. & A. M. He married Miss Emma L. Wright, daughter of J. C. Wright, of Massachusetts. They have three children,—Maud L., Mabel G., and Anna M.

Bigelow Bros. — This firm was established in September, 1862, by Anson A. and Charles H. Bigelow, who conducted the business until 1864, when, on account of the illness of Charles H. Bigelow, another brother, William H. Bigelow, of Sioux City, Iowa, came to Chicago to take a place in the firm. Their lumbar yard was at first at the corner of Eighteenth and Lumber streets. On May 1, 1857, they changed their location to Twenty-second and Fisk streets, in the then new lumber district, where they had opened a lumber yard and built an office in August, 1866, running two yards during the eight months from August to May. Bigelow Bros. were among the first to this firm to open and erect a planing-mill in that locality, when they moved, but very few firms, among them the N. Lindington Company, and possibly the Menominee River Lumber Company. Bigelow Bros. remained at this location until 1867, when they moved to their present quarters. William H. Bigelow died in August, 1882, leaving Anson A. and Charles H. only in the firm. The latter resides at 810 Peoria Ave., St. Louis, Mo. In 1865, this company bought saw-mill property at Muskegon, Mich., the capital being four hundred thousand feet a day. This mill they still own. From the time of its purchase until 1882, it was run under the firm name of W. H. Bigelow & Co., and in 1882, William H. Bigelow & Co. The company also own two sailing vessels, having an aggregate carrying capacity of 475,000 feet. They deal exclusively in pine lumber. During the first year of their business, they closed in September, 1866, and in 1867, opened a yard of 5,400,000 feet of lumber, lath and shingles, being estimated in lumber

376 HISTORY OF CHICAGO.
measure. Twenty years afterward, in 1853, they sold on the same basis, 35,500,000 feet, planing-mills on Ullman Street, directly opposite the yard-gate of Bigelow Bros., for the purpose of planing lumber sold by the latter firm. Taking all things into account, the conveniences for conducting business that they enjoyed were by no means the most excellent.

A. A. Bigelow was born in Washington County, N. Y., on November 7, 1833. His parents were Anson and Eliza (Moore) Bigelow, his father a native of Washington County, N. Y., and his mother of the same State. Mr. Bigelow spent his early life upon a farm, receiving his education at Cambridge Academy, in Washington County. At the age of nineteen, he went to Troy, N. Y., and obtained a position as a clerk in H. Dyer & Co., planing-mill and shirt manufacturer, with whom he remained one year, and, in the spring of 1854, engaged as a clerk in the commission and forwarding house of Griffin & Buel, in Albany, N. Y. In March, 1855, having been well settled in his business, he moved to his native town, Racine, Wis., and became a clerk for Nelson Pendleton, lumber manufacturer, who was operating mills at Two Rivers, Wis. In 1858, he took an interest in the business, the firm being Pendleton & Bigelow, which was dissolved on January 1, 1863. Mr. Bigelow having previously, in September, 1862, come to Chicago and established the firm of Bigelow Bros. Mr. Bigelow has been a member of Grace Episcopal Church of Chicago since 1862, and, during many years, a vestryman, and for three or four years a warden. He is also a member of the Calumet Club, the Citizens' Association, and the Chicago Club. He was married, on December 15, 1859, to Miss Minnie Emily, daughter of Isaac I. Miller, of Racine, Wis. His family consists of a son,—Nelson P., connected with his father in business, and a daughter, Emeline S.

DANIEL W. HOLMES was born in Lowell, Mass., in January, 1837, and is the son of Daniel G. and Huldah B. (Currier) Holmes. Mr. Holmes attended the public schools, and, in 1857, graduated from the Academy at North Chelmsford, a technical school in Buffalo, N. Y., for five years. In 1862, he came to Chicago and engaged in the grain and commission business on State Street, near the corner of Lake, as a member of the firm of C. M. & A. A. Carver, and later with both partners being members of the Board of Trade. This partnership continued until 1867. He then embarked in the wholesale metal trade, as a partner in the firm of Downs, Garland & Holmes, afterward interested in the wholesale carriage business, under the same name, up to 1873. On January 1, 1876, he formed a co-partnership with P. G. Dodge, under the firm name of P. G. Dodge & Co. In January, 1883, W. S. Smith was admitted a member of the firm. P. G. Dodge & Co. deal in all varieties of hardwood, as well as turned balusters, table legs, newel-posts, etc., in the rough. In 1883, their sales of Southern pine, alone, amounted to one million feet; their entire sales aggregating, during the three years, over one hundred million feet, they increased their capacity for handling lumber by adding a branch yard. Near this yard they operate a dry-kiln which has a capacity of one hundred and twenty-five thousand feet a month. Mr. Holmes married Mrs. Lydia A. Wentworth, formerly Miss Lydia A. Moody.

THE KIRBY CARPENTER COMPANY.—The business of this company was established in Milwaukee, Wis., in 1852, by Abner Kirby, who named his firm Carpenter. Here he resided until 1861, when he sold out and removed to Chicago. He resided there until 1857, when he returned to Chicago, and found employment as a carpenter with the firm of Sheppard, Sheppard & Smith. After working for them about five years, he borrowed a sum of money, and started out for himself. In 1867, he purchased a new mill on the corner of Blackwell and Nineteenth streets, which he conducted for three years, and then formed a partnership with James L. Johnson, who had been his bookkeeper for five years, under the firm name of Hart & Johnson. They conducted business at the
corner of Seventeenth and Grove streets, and continued seven years, at the end of which time Mr. Johnson died, and Mr. Hutt purchased of Mrs. Johnson her deceased husband's interest, which, from an original investment of $1,000, had become, in the seven years of operation, $5,500. Since this time, Mr. Hutt has been the owner. In 1873, Mr. Hutt purchased a tract of land at the corner of Nineteenth and Grove streets for $40,000, and erected thereon his present magnificent box, ashlar, and blind-faced building, occupied by the Soper Lumber Company. In 1850, he bought his present lumber yard for $5,000. In his mill, factory and lumber yard, and on his vessel, he employs one hundred and thirty-five men. The sailing vessel is worth about $10,000, and is named 'Little Hutt.' It is capable of carrying about 275 feet of lumber. Mr. Hutt handles annually upwards of 15,000,000 feet of lumber, 3,000,000 shingles and 2,000,000 Similar, and does an annual business of about $500,000. Mr. Hutt was a private in Co. "E," 72d Illinois Volunteer Infantry. In 1852, he was commissioned aide-de-camp on the staff of Governor Hamilton by the rank of colonel. In 1870, he was elected one of the Commissioners of Cook County by the republican party, to which party he has always belonged. In 1852, he was the republican candidate for county treasurer, but was an honest democratic opponent, William S. Selph.

Hair & Rigdway.—The firm of Hair & Rigdway was established in 1866, when Samuel Hair started a planing-mill on Wells Street near Polk. Here he remained alone two years when he took in as partners, Mr. C. Mateer, Alexander Brown, W. A. Fuller, and R. M. Hair. In the same year Mr. Mateer sold his interests to William H. Odlum. In 1869, the firm became Hair & Odlum, the members of it being Samuel G. Hair, James A. Hair and William H. Odlum. In 1870, the business was transferred to Paulina Square, and the planing-mill was sold to Hair & Elphicke, the individual members of this firm being J. S. and B. M. Hair, and C. W. Elphicke. The firm of Hair & Odlum went out of business in 1870. In 1876, B. M. Hair bought the interest of J. S. Hair, and, in early 1879, purchased that of Mr. Elphicke. In the latter year, Mr. Hair sold a one-third interest to William Ridgway, and the firm of Hair & Ridgway was formed. The two partners were in business for twenty-three years in connection with their other interests.

R. M. Hair was born at Covington, Ky., in 1848. His parents were Rev. Gilbert M. and Jane M. (Seuple) Hair. His father, a Presbyterian minister, was a native of Washington County, Penn.; his mother of Pittsburgh. At the age of fourteen, Mr. Hair learned to be a planing mill hand in clerking in the dry goods business in Cambridge, Ind., for three years. He then attended school at Elders Ridge Academy, Penn., and finished his education at the Centreville College Institute, Centreville, Ind. In 1867, he went to Baltimore, and after clerking in a grocery store for a short time, in connection with Joseph Ashbury, started a grocery store as the firm of Ashbury & Hair. He then sold out his interest to Mr. Ashbury, and moved to Keesport, Penn., where he took charge of a hardware store two years. In 1870, he came to Chicago, and for one year was clerk in the real-estate office of Mr. Geary. In 1871, he returned to Pittsburgh, to accept a position in the office of his brother-in-law, H. D. Odlum, member of the law firm of Odlum & Doughty, clerks of the United States Court, which he held up to 1875, when he moved to Springfield, Ill., and became assistant State Treasurer under Hon. Thaddeus S. Ridgway. In 1877, he came to Chicago and established the firm of Hair & Elphicke. Mr. Hair was married, in 1873, to Hattie Ridgway, daughter of Hon. Thomas S. Ridgway, of Shawneetown, Ill. They have four children,—Mabel, Genevieve, Ada and Thomas G.

William Ridgway was born at Shawneetown, Ill., in 1838, and is the son of Hon. Thomas S. Ridgway. In 1858, he came to Chicago, and in 1875, when he purchased a one-third interest in the business of B. M. Hair. In March, 1884, he purchased an additional interest, making him an equal partner. Mr. Ridgway was married in December, 1858, to Miss Minnie Carroll, daughter of Charles Carroll, of Shawneetown, Ill.

Palmer, Fuller & Co.—This firm is composed of William A. Fuller, George B. Marsh and Vine A. Watkins. Azariah R. Palmer, one of the original members of this firm, commenced the business as a manufacturer of sash, doors and blinds in 1850, at Aurora, Ill., near which place his father had settled many years before. He continued to run his branch of manufacture there until 1866, when he came to Chicago. On January 1, of that year, he formed a partnership with William A. Fuller, and purchased the property and business of Fuller & Phillips Manufacturing Company. In 1867, George B. Marsh became a member of the firm, the name of which became Palmer, Fuller & Co. In 1868, this firm purchased six acres of land at the corner of West Twenty-eighth Street and Union Avenue, and erected thereon the present extensive buildings. In 1871, they occupied their new quarters, and in 1872, Mr. W. A. Watkins became a partner. In May, 1874, Mr. Palmer died, from a disease contracted from exposure in överseeing the work of erecting the new buildings in 1870. These structures, which are three stories high, comprise machinery and finishing buildings, washhouse, workshops, yards, and the office. The machinery, which is propelled by a 900 horsepower Corliss engine, turns out an array of designs which it would be impracticable to describe in detail, and consists of all kinds and hard wood articles which are used in the interior and outside decoration of buildings. They employ in their factory and on their dock (which contains nine acres of ground with ample warehouse and wharfage), five hundred hands. The business extends all over the United States, to Mexico, Canada and Australia, and amounts annually to from one million to one and a half million of dollars.

Babcock & Park.—This firm is composed of W. S. Babcock and George H. Park. It was formed in 1850, previous to which time both members of it had had considerable experience in the lumber business. The firm of Babcock & Martin & Co., of which this firm is the successor, was formed in 1866, and was composed of W. S. Babcock, S. K. Martin and S. V. Babcock. As such, it existed until 1870, when S. K. Martin withdrew from the partnership, and the two brothers continued business under the style of Babcock Bros., near the old location on Lumber and Twenty-second streets. In 1880, the firm of Babcock & Park was formed. Mr. Park commenced business in the corner of State and Clark streets, sold out his interest to a member of the firm of Fenner, Park & Co., and became a member of the firm of Fenner, Park & Co., this firm having a planing-mill, and sash, door and blind factory. The partnership was dissolved in 1884, and Mr. Park became a member of the firm of Park & Soper, of No. 775 South Canal Street. This firm was dissolved in 1886, and W. J. Edwards commenced the manufacture of roof-graders at Halsted Street, where he is still engaged in the same enterprise. Mr. Park formed a partnership with Albert Soper, in 1886, under the name of Park & Soper, which lasted until 1880, when he joined Mr. Babcock in business. The firm of Babcock & Park employ thirty-five men, and sell about 12,000,000 feet of lumber, 3,000,000 shingles and 1,000,000 lath each year.

George H. Park was born at Millbury, Mass., in 1833, and is the son of John W. and Betsey (Hurlbuck) Park. He began his business career in 1853 as an employee in the sash, door and blind factory of Arushy, Morse & Co., in Millbury, remaining with them five years. In 1858, he came to Chicago, and was at first a sash, door and blind factory of Cunis, Merry & Co., corner State and Seventeenth streets, and in 1865, a partner in the firm of Fenner, Park & Co. In 1860, Mr. Park married Elvira J. Willard, daughter of Joseph B. and Mary B. Willard, formerly of Westfield, Mass. They settled in Chicago in 1858, and, in 1864, moved to Mattoon, Ill., where Mr. Willard died in 1877. Mrs. Willard is now living in Milwaukee.

Charles W. Davis.—In 1866, Mr. Davis entered the employ of Richard Mears, one of the planing mill manufacturers, and remained in that capacity ten years. During that time, he became familiar with the lumber trade in all its details, and, in 1876, established a lumber yard of his own, on the south side of the river, at his present location. He has a dock front of 200 feet, and his yard is 400 feet in depth, and it is admirably arranged for convenience in handling large quantities of lumber. Ten million feet may be piled on his yard at one time. Mr. Davis both stores lumber and sells it.
THE LUMBER TRADE.

STATE.

of itereas. His receipts annually average about 30,000,000 feet, and his business requires the constant employment of about one hundred and twenty-five men.

The Chicago Lumber Company was established in 1866, and is the oldest company in the United States. This business was conducted in Kansas, Nebraska, Iowa and Missouri, for some years before the opening of their present large yard in Chicago. The average amount carried is 35,000,000 feet, and from this, pay was supplied. The company were two other yards, located in the principal cities and towns of the States just named, but principally in Kansas and Nebraska, are mainly supplied. In 1881, they commenced to erect 24,000,000 feet of lumber, of which they realized the enormous amount of 375,000,000, valued at $8,500,000. On May 8, 1885, one of the largest fires that ever occurred in a lumber yard destroyed them, in Chicago, 15,000,000 feet of lumber, amounting to $1,300,000. This insurance realized on this loss was $300,500, and 10,000,000 feet of lumber were saved from the flames. This company commenced handling Southern pine on a large scale in 1882, and, in 1883, their sales of this species of lumber reached 20,000,000 feet. The cash capital of the company in 1884, was over $3,000,000. In 1885, they erected a planing-mill and sawd and door factory, both of which are thoroughly fitted up with improved machinery.

M. T. Greene, manager of the Chicago Lumber Company, was born in Western New York in 1840, the son of Ferguson and Mary S. (Torrey) Greene. He spent his early boyhood and acquired instruction in Western New York. At the age of sixteen he entered the 26th New York Battery, and remained connected with it until mustered out of service in July, 1865. He then returned to his home, and in a short time went to West, to seek his fortune. His venture was in Carverville, Cass Co., in thirty-eight miles southeast of Kansas City. This was early in 1866. In the latter part of 1868, he started a lumber yard at LaCygne, Kans., before the Kansas City, Fort Scott & Gulf Rail- way reached that town. He also established numerous other lumber yards in these States, as well as in Nebraska and Iowa. In 1872, he came to Chicago where he has since resided as the gen- eral manager of the large interest of the Chicago Lumber Company. Mr. Greene takes unusual interest in the history of Southeastern Kansas, aside from the fact of having numerous lumber yards in that section of the country, inasmuch as one of the present owners in the Lumber Company (Frank Colpe) is a son of William Colpeter, who was one of the five fatal shot by James A. Hamilton’s men, at the inhuman massacre of the Marals des Cygnes.

FITZ SIMONS & CONNELL.—This firm is composed of Charles Fitz Simons and Charles J. Connell. It was established in 1867, in which year they erected a mill on Magazine Slip, for sawing heavy timber. Many of the contracts taken by this company have been very large, one of the most extensive in the way of bridge-building being that under which they constructed all the wooden bridges on the Union Pacific Railway between the North Platte River and Lincoln City. During this work, for freighting lumber to Chicago, the firm conceived the idea of rafting their timber in the log across Lake Michigan, and made the experiment, sometimes bringing as much as one million feet of tim- ber in one load. It was landed at the North Pier, and then into such timber as their trade demanded. After the panic of 1873, timber freighters were so far reduced that there was no profit in towing saws with the pretence was abandoned. Since then they have continued the manufacture of heavy timber and the building of bridges, the Howe-truss bridge being one of the kinds made. During the year they handle about six million feet of timber, selling to the trade, to railway companies and to bridge-builders. They are also engaged in dredging and dock-building. Upon the dissolution of the firm of Fox & Howard—the oldest firm of dock-builders in the city—Fitz Simons & Connell formed a partnership with Harry Fox, and under this death assumed entire control of the business which they still conduct. As illustrations of the character of the work done by this firm may be mentioned the Fullerton-avenue con- duct, for thousands of feet of Lincoln Park breakwater, two thousand feet of the United States breakwater, the substructure of the Rush-street bridge (built in 1884), and five thousand feet of the lake shore protection at South Pier. The latter is a novel and remark- able construction, received by J. P. Foster, the engineer, consists primarily of sloping pavement, commencing in piles driven in the lake, the upper ends of which are about six inches below the low-water line, and extending back upon the shore to a distance of about 15,000 feet along this line. Rising gently in a curvilinear in- cline, thus permitting the force of the waves gradually to expand itself, the pavement is constructed of Lemont stone, and cost about $2,500,000. It is confidently believed that, although this kind of shore protection has as yet received little attention, it is destined to become widely approved and in great demand.

Brigadier-General Charles Fitz Simons is a native of New York State, and of Irish parentage. He entered the Union army on July 17, 1861, from Rochester, N. Y., as captain of the 3d New York Cavalry. On May 15, 1862, he was promoted to the rank of major of the same regiment, and was made lieutenant-colonel of the 21st New York Cavalry. In October, 1863, he was elected colonel of this regiment, and brevetted brigadier-general, in February, 1865. After serving one year on the frontier, he was mustered out of the service on June 26, 1866. He then came to Chicago, and has ever since been actively connected with the business of his firm. Since 1884, he has had command of the First Brigade of the Illinois National Guard. He was a candidate for Congress in the Third Illinois District in the fall of 1884, but, owing to a dark republican candidacy, James H. Ward, democrat, was elected. General Fitz Simons married Augusta M. Kiley, daughter of the late Justin Kiley, of Brighton, N. Y.

William E. Strong was born at Granville, Washington Co., N. Y., on August 10, 1840. In 1863, he was taken by his parents to Western New York, and, in 1853, removed to Jefferson Prairie, Rock Co., Wis., where his father had purchased a farm. He worked on this farm until he was about seventeen years of age, and, in November, 1857, removed to Racine, Wis., and studied law with Strong & Fuller until his admission to the bar on April 15, 1864. Mr. Strong immediately thereafter raised a company of volunteers, of which he was elected captain, his commission bearing date April 24, 1861. He served in the Army five years, four months and seven days, and was honorably discharged from the service on September 1, 1866, as a direct result of services in connection with The Peshtigo Company, and removed to this city. On April 25, 1867, he was married to Miss Mary Bostwick Ogden, a daughter of Mahlon D. Ogden, and a niece of Chicago’s first mayor, William B. Ogden. On July 12, 1887, he was elected secretary and treasurer of The Peshtigo Company, retaining that office until October 25, 1873, when he was elected president and has retained that position since. On May 3, 1879, he was elected treasurer and assistant secre- tary of the Sturgeon Bay and Lake Michigan Ship Channel and Harbor Company, this Company having organized on that date for active operations. On November 13, 1874, Mr. Strong was chosen a representative in Congress from Wisconsin. He continued in active service in the construction of the Sturgeon Bay Canal, which was completed and accepted by the State of Wisconsin in December, 1881. On August 3, 1877, Hon. William B. Ogden died, and designated Mr. Strong as one of his executors and trustees; he qualified as such in New York City, on September 13, 1877, and immediately entered upon the discharge of the duties of his office, and has continued to act as such executor and trustee since that time.

Kelley, Rathbone & Co.—This firm is composed of Asa P. Kelley, Joseph Rathbone and William E. Kelley. Their business was established in 1867. They have mills at Muskegon and Spring Lake, Mich., and three yards in Chicago,—one on the Illinois Central pier, with 1500 feet of dockage, another on Center Avenue with 1000 feet of dockage, and the third at the corner of Lock and Cople streets, with a dock front of 400 feet. Their sales amount to about 70,000,000 feet per year.

Asa P. Kelley was born at Conway, N. H., in 1822. His parents were David and Annie (Sterling) Kelley. His early life was spent upon a farm, receiving his education at the Fryeburg Academy, Fryeburg, Maine. In 1844, he commenced his business life as a civil engineer, but after three years’ practice of his profession, engaged in the lumber trade on his own account at Passadumkeag, Maine, until 1853, when he went to Desopot, Iowa, and dealt in live stock for seven years. In 1862, he came to Chicago and engaged in the grain and commission business as a member of the firm of Higgins, Kelley & Co., of which he continued a member until 1876, when he established the lumber firm of Kelley, Wood & Co. This partnership was dissolved in 1876, and the firm of Kelley, Rathbone & Co. established. Mr. Kelley married Mary A. Morrill, of Maine. They have three children: William E.; Annie E., now wife of William W. Ireland, of Rochester, Minn.; and Mary H.

William E. Kelley, eldest son of Asa P. Kelley, was born in Passadumkeag, Maine, in 1850. He received his education in a pre-
HISTORY OF CHICAGO.

Paratory school in Massachusetts and at Yale College. In 1871, he entered the employ of Kelley, Wood & Co. as a clerk, continuing with them up to 1876, when he became a member of the above firm. He was vice-president of the Lumbermen's Exchange for several years from 1882 to 1895. Mr. Kelley married Miss Margaret A. Vail, daughter of Asa Vail, of Chicago. They have three children,—William R., Eleanor V. and Asa R.

T. H. SHEPPARD & Co.—T. H. Sheppard is at present the only survivor of this firm. In 1857, the lumber firm of Sheppard & Smith was established, of which Mr. Sheppard was a member for five years. In 1863, he entered the firm of A. R. Gray & Co., remaining seven years. In 1873, he established himself in business at the foot of Paulina Street, Chicago. In 1883, he handled twenty-three million feet of lumber. Mr. Sheppard deals in pine lumber, his specialty being thick uppers and sub-fours from the Lake Superior region.

T. H. Sheppard was born in Cumberland County, N. J., in 1844, the son of Thomas and Mary (Porter) Sheppard. At the age of nineteen, he came to Chicago, and became connected with the United States Railroad Postal Service under George B. Armstrong, superintendent, and was one of the first to take a car out of Chicago on the old Chicago & Galena Railroad, which position he held two years. In 1867, he became an employe of Fuller & Fuller, wholesale druggists, and later entered the lumber business. He was a stockholder, and served as secretary and treasurer, of the Ontonagon Lumber Company, from 1860 to 1862. Mr. Sheppard married M. A. Wells, daughter of S. G. Wells, of Chicago, who was the first managing agent of the Western Union Telegraph Company here. They have one child, a daughter,—Birdie Louise.

George E. Wood commenced the lumber business at Davenport, Iowa, in 1861, and remained there until 1869, when he came to Chicago, and became a member of the firm of Kelley, Wood & Co. He erected a lumber yard on the corner of Second Street and Centre Avenue, where Kelley, Lowe & Co. still carry on the business. Mr. Wood remained a member of this firm until 1872, when he retired, taking, for his share of the concern, the Michigan interests of the firm, consisting of a sawmill and pine lands at Muskegon, and on the Muskegon River. Since 1877, he has carried on the business alone. His mill at Muskegon is a circular and gang-saw mill, and has a capacity for cutting, during the season, about twenty million feet of lumber. This business is handled by Mr. Wood, and is sold by him to yard dealers. Mr. Wood was born at East Douglas, Mass., in 1837. His parents were William F. and Emily (Curts) Wood, who settled in Moline, Ill., in 1855, where his father died in 1866, his mother residing in Chicago up to the time of her death in 1883. Mr. Wood spent his early life in Worcester, Mass. In 1855, he went into the employ of Burnett, Gillot & Co., manufacturers of Fuller at Davenport, Iowa, remaining with them until 1861, when he engaged in the lumber business in that city on his own account. Mr. Wood married Ellen (Lovely) Wood, daughter of Landon Lovely, of Lenox, Mass. They have two children,—William F., engaged in business with his father, and Annie L.

The LUDINGTON, WELLS & VAN SCHACK COMPANY succeeded a firm of the same name, which was established by Harrison Ludington, Daniel Wells, Jr., Anthony G. Van Schack and Robert Stephen Kemp. They commenced business in May, 1867, with sawmill, dock, boathouse and yards and a capital of $50,000. The company occupies a prominent place among local firms and manufacturers, and possesses an average of fifty millions of pine lumber annually. The officers are Harrison Ludington, president; A. G. Van Schack, vice-president; C. S. Bursdale, Jr., secretary; and Daniel Wells, Jr., treasurer.

Anthony G. Van Schack was born at Albany, N. Y., in 1828. In 1849, he removed to Milwaukee, Wis., where he became a clerk for Ludington & Co. In 1847, he entered the lumber business and four years later came to Chicago, continuing in the lumber business. In 1866, he became manager of the Ludington, Wells & Van Schack Lumber Company. During Mr. Van Schack's residence in this city he has occupied several responsible positions in various corporations. He has been twice elected president of the Chicago Lumber Exchange, and is now serving his third term as president of the Lumber Manufacturers' Association of the Northwest, including Michigan, Wisconsin, Minnesota, Iowa and Illinois. He is vice-president of the Ludington, Wells & Van Schack Company; the Joliet Mound Company, and the Marquette Barge Line Company. For the past fourteen years he has been treasurer of the Vocalio Owners' Towing Company and the Lumber Exchange. He is a stockholder in, and a director of, the Continental Manufacturing Company, and is also a director of the Lumbermen's Iron Mining Company and the Menominee Manufacturing Company, all being active and successful corporations.

Mr. Van Schack has been twice married, his present wife, Ellen Ludington, being a daughter of Ex-Governor Harrison Ludington, of Wisconsin.

Sawyer-Gooodman Company.—This firm was organized in Chicago, in the spring of 1849, by Mr. Kelley and Mr. Sawyer was a member. The individual members of the firm were Philetus Sawyer and his son Ed- gar P., of Oskosh, Wis., and James B. Goodman and William O. Goodman, of Chicago, all of whom had been engaged for years in the manufacture and handling of lumber. Philetus Sawyer was born in Rutland County, Vt., in 1816, and moved to Wisconsin in 1837, and in 1849, moved from his farm at Rosendale, Fond du Lac Co., to Oskosh. There he contracted to run a mill by the thousand, but soon branched out on his own account, dealing in logs, contracting with other mills and, in 1855, built a mill for himself. He also made large purchases of pine lands built other sawmills and established himself in the lumber business. He was also largely instrumental in improving the Wolf River, by a series of booms along flat places and dams at rapids, until it became one of the best driving-streams in the Northwest. Mr. Sawyer was one of the first directors of the Wolf River Boom Company, which was incorporated in 1857. He was elected to Congress in 1864, and served five consecutive terms in the House. In 1859, he was elected United States Senator from Wisconsin. The Messrs. Goodman became identified with the lumber business in Chicago in 1867, and are members of a family engaged in the lumber business in Pennsylvania. Their business in Chicago was commenced as a private concern in 1867, and when the company was incorporated with Philetus Sawyer, United States Senator from Wisconsin, president; Edgar P. Sawyer, vice-president; James B. Goodman, secretary, and William O. Goodman, treasurer. The mills of this company are situated on the Wolf River, and contain all modern improvements. Owning large tracts of pine timber, this company is enabled to produce the stock necessary for their trade. Their yards in Chicago have a capacity of about fifty million feet per annum. Its specialty is pine, wholesale and retail.

William Owen Goodman was born at Wellsborough, Togoa Co., Penn., in 1811, the son of Samuel Owen and Philetus Goodman. His parents dying when their son was quite young, he was taken to Columbia, Penn., where his early life was passed in his grandmother's home; there he resided until he was sixteen years of age, when he attended school at Bettendorf, Iowa, and afterward, in 1862, at the age of twenty, entered the mercantile business in the employ of his uncle, General Williston, lumber dealer, at Athens, Penn., with whom he remained two years. In 1863, he came to Chicago and was employed by the Menominee River Lumber Company as bookkeeper, which position he held up to 1869, when he became salesman for the firm, and after represented the interest of Hon. Philetus Sawyer, in the same capacity. In 1878, Mr. Goodman, in connection with Hon. F. Sawyer, Edgar P. Sawyer, his son, and his brother, James B. Goodman, organized the firm of Sawyer, Goodman & Co., which was incorporated in 1880, as the Sawyer-Gooodman Company. Mr. Goodman was married, on October 24, 1865, to Ellen (Armstrong) Sawyer, daughter of Hon. P. Sawyer. They have one child,—Kenneth S.

Gruendedorf, Ott & Co.—This firm is the successor of that of Henry Gruendendorf & Co., established in 1867. In 1868, eight individuals united and incorporated the Union Lumber Company. In 1872, the name was changed to Gruendendorf & Miller. In 1873, Mr. Miller sold his interests to John Ott and Fred. Fischer, since when the firm has been known as Gruendendorf & Co. They have a dock frontage of one hundred and fifty feet, the depth of the yard being three hundred feet. Two vessels can unload their cargoes simultaneously. Their trade is mainly with city dealers, and reaches annually about eight million feet of lumber, three million shingles and five million lath. Mr. Fischer, of this firm, resides in Elmhurst, DuPage Co., Ill.

Henry Gruendendorf was born in Hanover, Germany, on September 15, 1829, the son of Hans H. and Catharina (Wolters) Gruendendorf. His mother died in Germany in 1843. His father, who had again married, came to America with his family in 1854, his sons, Henry and Frederick, having preceded him in 1850. Mr. Gruendendorf, Sr., settled within sixteen miles of Chicago, and moved to Clinton County, Iowa, where his sons Henry and Frederick purchased for him a homestead. At this place he lost his second wife, and then immediately moved into the same county to reside with his son Henry, who cared for him until 1862, when he went to visit his other son, Frederick, with whom he resided for a time. Henry Gruendendorf came to America in 1850, and settled in Elmhurst, DuPage Co., Ill., where he employed upon farms and attended the country evening schools. At the age of twenty-three he entered a store at Elmhurst as a clerk. He was employed there two years. In 1852, he moved to Lyons, Iowa and opened a hotel, which he conducted until 1857, when he returned to Elmhurst and purchased a country store of D. Mong, which he conducted until 1860, at the same time being postmaster of the village. He then went back to Lyons, Iowa, and for a short time
carried on a country store. In 1852, he came to Chicago and engaged in the commission business on West Randolph Street. In 1853, he formed a partnership with Henry Butterman in the wholesale and retail grocery trade, as the firm of Butterman & Co. In the fall of 1854, he left the grocery business and became a clerk of the Board of Trade, doing a commission business until June, 1867, and in July of the same year founded the firm of Henry Grusendorf & Co., lumber dealers. The various changes in the formation of the original firm, Mr. Grusendorf has exercised a personal superintendence of the business, having charge of the finances and general office work. In 1865, he married Miss Dora Neeley, daughter of Mr. and Mrs. B. S. Neeley, of Athens, Ill. They now reside in New York. In 1868, he was the business of Hamilton, Murrey & Co. was commenced at Watertown, Wis., where they have carried on the business and model mill, and also secured at Chicago dock and yard facilities. Their pine forests, which lie tributary to the mill, aggregate about 70,000 acres. The mill was enlarged in the winter of 1863, 1864, and in 1867 and has been expanded each year since, with the exception of 1868, when it was operated as a contract. The company was incorporated in 1873, with I. K. Hamilton, president; W. C. Murrey, vice-president; and A. C. Murrey, secretary. The company was organized in 1869, the vice-president being a resident of the Wisconsin Territory, as it now is, and in 1872, the company was organized in the State of Wisconsin, as it is now. The company has now accumulated about 50,000 tons of good Bessemer ore. The company was leased and worked on a location in the need of a large amount of lumber. The company was incorporated in 1873, with I. K. Hamilton, president; W. C. Murrey, vice-president; and A. C. Murrey, secretary. The company is now a large concern, with a capital stock of $280,000. C. C. Thompson was chosen president, Thomas Walkup, secretary, and W. A. Thompson, treasurer. The business of the company for the last few years has amounted to about fifty million feet of lumber per annum. The mill in Mackinaw County, Mich., and the large tract of valuable pine lands in the Lake Superior country, formerly owned by C. C. Thompson & Co., they sold in the fall of 1882.
PRAIRIE AVENUE, NORTH FROM TWENTIETH STREET.

The company is now composed of S. A. Brown and F. E. Parish, the latter having united in business with Mr. Brown in 1877. An incident connected with their lumber business in Kansas is of interest in this connection. In 1853, the merchants of Humboldt, that State, organized a stock lumber company for the purpose of attracting trade to that city. In order to protect their lumber interests, not only in Humboldt, but in other cities and towns in the State, S. A. Brown built a large one-story store in Humboldt. The name under which this business is conducted is the S. A. Brown Mercantile Company, the store is called the "Revolution," and is managed as a Granger store. Customers come to it from distances as great as one hundred and fifty miles. Since its establishment, the prosperity of the city of Humboldt has been very largely enhanced, real-estate having increased in value, and many sales having been made during the year 1854, while previous to that year the city seemed to have ceased to grow.

S. A. Brown was born in Ontario County, N. Y., in 1837, the son of Allen and Louisa (Gooding) Brown. His father lived at South Bristol, Ontario County, where he had a large farm and also kept a store, blacksmith shop, shoe manufactory, saw mill, etc., all being on his farm. S. A. Brown remained at home until he was twenty-one years of age, when he went to Michigan to manage a farm owned by his father. In 1860, he came to Chicago, and from that time to 1870, moved about from place to place, being a portion of the time in Chicago, a portion on the farm, and elsewhere. In 1870, he started a lumber yard in Kankakee, Ill.

T. Wilce & Co.—The planing-mill of this firm was established by Thomas Wilce in 1852, and the lumber yard in 1857. The amount of lumber worked up annually is upwards of 30,000,000 feet and about seventy-five men are employed in the mill. In the yard, the firm employs an average of fifty men. They handle 16,000,000 feet of lumber per annum, worth $5,000,000 of lumber. The aggregate amount of sales is $50,000 annually.

Thomas Wilce was born at Cornwall, England, in 1819, and is the son of Thomas and Mary (Venning) Wilce. He spent his early life upon a farm, and at the age of nineteen became employed as a builder in his native town. In 1842, he emigrated to Montreal, Canada, and was engaged in building until 1845, when he came to Chicago and continued in the same trade up to 1867. He then retired from active business until 1872, when he started a planing-mill, and in 1872, connected with the mill his present lumber yard. Mr. Wilce was alderman of the old Tenth Ward of Chicago from 1869 to 1871, during which time he was a member of the finance committee, and chairman of it in 1870-71. He was a member of the Board of Education from 1871 to 1875, also treasurer of the Washingtonian Home from 1875 to 1883, and director of the same for seven years. Mr. Wilce was married in Montreal, in 1846, to Jane Carlisle, daughter of William and Jane Carlisle, of Lincolnshire, England. They have had eleven children—Mary J., now wife of H. H. Chandler, of Chicago; William H., deceased; Emeline W., deceased; Thomas V., deceased; Edwin L., Jennie L., Edmund H., George C. and Daniel V. (twins); Thomas E. and Jessie, deceased.

E. P. Wilce & Co.—The business of this firm was established in 1863, by William Stevens, at the corner of Franklin and Van Buren streets, remaining there until 1872, when it was moved to its present location. Here Mr. Stevens continued the business alone up to 1881, when E. P. Wilce became a partner and the firm name was changed to Stevens, Wilce & Co. In 1883, Mr. Wilce bought the interest of Mr. Stevens, and the firm has since been E. P. Wilce & Co. They employ one hundred and sixty men, using, annually, about 12,000,000 feet of lumber, and their business amounts to from $325,000 to $350,000 a year.

E. P. Wilce is the eldest son of Thomas Wilce, and was born at Chicago in 1857. From 1872 to 1879, he was associated with his father in the lumber business. He then went to Winona, Minn., and manufactured saws, doors, etc., until 1881, when he returned to Chicago. Mr. Wilce married Miss Eva Bodeley, of Newton, Iowa, and has one child, Edwin M.

Robert Larkins commenced the lumber business in 1863, with J. S. Tuttle, at Niles, Mich. He continued with Mr. Tuttle five years, when he became manager for M. E. Douglass. Here he remained also five years, and in 1872, came to Chicago, and established himself in the lumber business at the corner of Twenty-second and Union streets. His specialty is hardwood lumber, oak, ash, cherry, walnut, etc., of which he sells, annually, about 3,500,000 feet. Mr. Larkins was born at Geneva, Saratoga Co., N. Y., in 1836. His parents, Henry and Eliza Larkins, were pioneers of England and settled in Canada, in 1836. In 1848, they removed to Monroeville, Ohio. Robert Larkins, at the age of seventeen, learned the trade of a machinist in the shops of the Cleve-land & Toledo Railroad (now the Lake Shore Railroad), at Norwalk, Ohio, and was employed there until the end of four years. In 1858, he went to Valparaiso, Ind., and engaged in logging, and then in buying lumber in Marshall County, Ind., on his own account, selling it and delivering it himself. In 1867, he removed to Niles, Mich., and commenced the lumber business with J. S.
Tuttle, as stated above, Mr. Larkins married Miss Helen Jud, of Flint, Mich. They have two children living.—Augusta, now wife of William Daubenspeck, of Chicago, with the Goss & Phillips Manufacturing Company; and Robert, Jr. Nellie and Gracie are dead.

Ruddock, Nuttal & Co.—The predecessors of this firm were Ruddock & Palmer, organized at Berlin, Wis., in 1861, by Thomas S. Ruddock and James H. Palmer. The latter had been a member of a lumber company, originally from New York State, which was one of the pioneers of Wisconsin. Both he and Mr. Ruddock had been in the lumber business in Wisconsin some ten or twelve years before entering into partnership with each other. When they commenced business in 1861, they began business as lumber manufacturers, running at that time two mills, each with a capacity of 5,000,000 a year. Closing out their business at Berlin, in 1867, they established themselves in Racine, Wis., at the mouth of the Racine River. In 1872, they opened a lumber yard on Orange street, Racine, and engaged in the manufacture of twenty-second street. In 1877, William H. Gift, of Hudson, N. Y., became a member of the firm, remaining connected therewith until 1876, when he retired, and Charles H. Ruddock was admitted into partnership. In 1881, Mr. Palmer retired, and the name of the firm became Ruddock & Nuttall & Co. The mills of this company are still located at Manistee, Mich., where they own about twenty thousand acres of land. Most of their lumber is shipped to Chicago from these mills in the two men, and then sold to them. Mr. Nuttall & Co. was formed in 1881, when he went to California and engaged in mining and prospecting. In 1881, he returned to Kenosha, and engaged in the mercantile business. In 1884, he commenced lumbering in Berlin, Wis., owning and running several saw-mills and a saw-mill. He also owned a steamboat which plied on the Fox and Wolf rivers between Portage and Oshkosh. He was also president of the First National Bank of Berlin. In 1886, he established the firm of Ruddock & Palmer, predecessors of the present firm. Mr. Ruddock married Miss Mary N. Newell, daughter of Asa Newell, of Danville, Ill. They have four children.—Charles H., Fred S., May and Sarah N. Nuttall & Co. was formed in 1881, when Mr. Ruddock married Miss Sarah A. Billings, daughter of A. M. Billings, of Chicago.

Charles H. Ruddock, eldest son of Thomas S. Ruddock, was born at Racine, Wis., in 1848. At the age of eighteen he commenced his business career as an employee with the firm of Ruddock & Palmer, in Berlin, Wis., remaining with them three years. In 1869, he came to Chicago, and after a residence of six months, returned to Berlin to take a position in the First National Bank. In 1871, he removed to Milwaukee, Wis., and engaged in the lumber business with E. B. Simpson, then the senior partner. In 1873, he removed to California and engaged in mining and prospecting. In 1881, he returned to Kenosha, and engaged in the mercantile business. In 1884, he commenced lumbering in Berlin, Wis., owning and running several saw-mills and a saw-mill. He also owned a steamboat which plied on the Fox and Wolf rivers between Portage and Oshkosh. He was also president of the First National Bank of Berlin. In 1886, he established the firm of Ruddock & Palmer, predecessors of the present firm. Mr. Ruddock married Miss Mary N. Newell, daughter of Asa Newell, of Danville, Ill. They have four children.—Charles H., Fred S., May and Sarah N. Nuttall & Co. was formed in 1881, when Mr. Ruddock married Miss Sarah A. Billings, daughter of A. M. Billings, of Chicago.

Walter Shoemaker & Co.—This firm is composed of Walter Shoemaker and Charles D. Bull. The business was started in Aurora, Ill., in 1858, by Mr. Shoemaker, father of S. R. Howell. It was continued in Aurora until 1873, when Mr. Shoemaker and S. R. Howell formed a partnership and established themselves in Chicago, locating their lumber yard and office on the corner of Throop and Twenty-second streets. This firm continued until 1875, when it was dissolved. Mr. Shoemaker then located a yard and office on Ashland Avenue, south of Twenty-second Street, and in May, 1881, he admitted into partnership Charles D. Bull and J. P. Higgins, the style of the firm being Walter Shoemaker & Co., as it still remains. In the fall of 1881, J. P. Higgins died, since which time the two other members have constituted the firm. The yard has a front of 750 feet, and a dock-front of 875 feet. This firm confines themselves exclusively to Northern pine, of which they handle about twenty miles a week.

Walter Shoemaker was born in Montgomery County, N. Y., in 1839. His parents, Jacob A. and Catharine (Wohlgemuth) Shoemaker, both natives of Montgomery County, settled in Aurora, Ill., in 1858. His father died in 1869, leaving his mother still living. At the age of eighteen, Walter Shoemaker engaged in the dry goods house of Miller & Pease, in Aurora, remaining with them four years, and afterward for one year with Hackney & Gardiner in Aurora. In 1868, he joined the firm of Ruddock, Nuttall & Co., which firm was dissolved, Mr. Shoemaker engaged in the lumber business with Mr. Hackney as the firm of Hackney & Shoemaker. One year afterward, J. M. Howell purchased the interest of Mr. Hackney and the firm was changed to Howell & Shoemaker, as stated above.

Mr. Shoemaker is a member of the Illinois Club and of the Centenary Methodist Episcopal Church. He married Miss Kate Shull, daughter of Daniel L. Shull, of Montgomery Co., N. Y. They have one child,—Charles L.

Fred L. F. Basse & Co.—The firm of Shoemaker & Howell was established on May 1, 1873, and was composed of Walter Shoemaker and S. R. Howell. It was located at Twenty-second and Throop streets, and remained there until 1875, when Mr. Howell bought the interest of Mr. Shoemaker, and has since continued the lumber business alone under the name of S. R. Howell & Co. On May 1, 1883, he moved to his present location. His yard has a dock-front of 750 feet. In 1883, he sold out, but retained 256 feet, and he has since disposed of 128,000,000 feet and 1854, 40,000,000 in the aggregate. In 1885, 100,000,000 in aggregate. He has also a lumber yard at Audubon, Kan., doing the largest business and being the wholesale yard of the company. His sales aggregating, in 1884, 60,000,000 feet of lumber. He also has yards at different points in Missouri, Kansas and Nebraska.

S. R. Howell was born in Aurora, Ill., in 1849, the son of Isaac M., and Cornelia (Buggs) Howell. He was educated at the public schools of his birthplace, graduating from the high school. Upon leaving school, he entered the wholesale and retail business in Providence, where he remained fifteen years. In
1868, he came to Chicago, and commenced the publishing business, and became connected, in 1875, with the Northwestern Lumberman, in the advertising department, and later that year was elected secretary of the firm. In 1876, Daniels was chosen President of the National Building Company at the first election held by the corporation. He is a man of energy, coupled with the caution so proverbially attached to Chicago men, born and afterwards an engineer, and after emigrating to Warren County, Iowa in January, 1863, to Miss Mary E. Moore, and has five children,—Nellie, Frank B., Alexander M., Constance and Walter.

Augustus F. Fisher, lumber merchant, was born at Princeton near Lebanon, N. J., on October 4, 1831. He came to the city of Chicago in June, 1855, joining his older brother Henry, who was engaged in business in Chicago. Here he learned the trade of carriage maker. In the fall of 1857, he commenced his career as a lumberman in the employ of his brother, who was conducting a retail yard on West Randolph Street. In April, 1858, he went to Pontiac, Ill., taking charge of and conducting the lumber business of William Ellis, a resident of Chicago, for four years. In August, 1862, he enlisted in Co. "G," 129th Illinois Volunteers, serving until the close of the War, being mustered out of service on June 8, 1865, in camp near Washington, D. C., having taken part in General Rosecrans' campaign in 1862-63, through Kentucky and Tennessee, and General Sherman's campaigns, in 1864-65, through Georgia and the Carolinas. He then returned to Pontiac, Ill., the senior member of the firm, as the firm of Fisher & Turner, which firm he succeeded in March, 1866, continuing and establishing by his unaided efforts the largest lumber business in the State outside of Chicago. In November, 1869, he removed his store to Chicago, after travelling with his family for six months in Europe. While a resident of Pontiac, Mr. Fisher was one of its most influential and enterprising citizens. He was married, from 1852 to 1872, to Isabella, daughter of Thomas and Aliza (Olds), of that city, and was married in April, 1872, to Josephine F. Schneider, daughter of John Schneider, of Pontiac, Ill. She was born in Ohio, her parents having settled there in 1833. Mr. and Mrs. Fisher have had three children,—Frederick A., Harriet A., and Horace E. (deceased).

Cutler, White & Boice.—The business of this firm was started by William M. Fisher, who established himself in the lumber trade in Chicago, in 1849, on Market Street, between Madison and Madison streets. N. H. Fisher was at this time his clerk, and in 1852, the firm became Fisher & Sons, by the admission into partnership of N. H. and Thomas W. Fisher. In 1857, their office was removed to 106 Adams Street, and the yard to the buildings at Lumber and Old streets. About this time, N. H. Fisher retired, and the firm name became Fisher & Son, remaining thus until 1868, when William A. Fisher retired, and Edward P. Fisher became the partner of his brother, Thomas W., the firm name being changed to the firm of Fish & Bros., and remaining thus until 1882. This firm was one of the oldest in the city, and it was also one of the wealthiest and largest. It had, in Michigan, three first-class steam mills, two for lumber, with a capacity of eighty thousand feet a day, and one for shingles. Its lumber was transported from the mills in Michigan to the yard in Chicago by three large barges. Besides owning these three vessels, Fisher & Brother were interested in the Michigan Barge Line which sailed fourteen vessels, and they were also largely interested in the Great Haven Steamboat Line. Thomas W. Fisher also became acting vice-president of the United States upon the death of Vice-President Winfield Scott. From December 20, 1875, to March 4, 1877. He began his political career in 1850, as representative in the Michigan Legislature, and was a member of the United States House of Representatives during the sessions of the XIth, XIIth, and XIIIth Congresses, after which he was elected United States senator, to succeed Jacob M. Howard. The firm of Fisher & Brothers sold their business and property in Chicago in 1852, to Cutler, White & White (D. Cutler, & White, of Great Haven, Mich., and T. S. White, of Grand Rapids). In May, 1853, H. M. Boice, who had been agent for Fisher & Bros. since the time of its organization, entered the firm, Cutler, White & Boice retain all the old employees of Fisher & Brother and have nearly all their trade. Their yard, which lies alongside the South Branch, north of Eighteenth Street, has a river front of seven hundred feet. Mr. Cutler is also a member of the Cutler & Savage Lumber Company, at Spring Lake, Mich., and Mr. White is a member of the firm of White, Franti & Co., of Grand Haven, Mich., two companies which together manufacture over 100,000,000 feet of lumber a year. White, Franti & Co. run the boom on Grand River, Mich. The average annual sales of Cutler, White & Boice, in Chicago, have been with that joint-stock company.

H. M. Boice was born at Utica, N. Y., in 1835. His parents were Philip H. and Isabella (Mitchell) Boice. At the age of thirteen he commenced his business life as a clerk in a dry goods house in New York. He afterwards entered the wholesale dry goods business in the same city. In 1860, having learned the art of telegraphing, he engaged as an operator at Hamilton, Madison County, and also at Fort Benton, N. Dakota. He then became a telegrapher at the head office of the superintendent of the New York Central Railroad at Utica, and afterward ticket agent of the same road at Fort Plain, N. Y. In 1870, he removed to Negaunee, Lake Superior, and for a short time was engaged in the lumber business, and subsequently started his own lumber business and opened a telegraph office there. In 1874, he came to Chicago, and went into the employ of Ferry & Bros., lumber dealers, as their bookkeeper, and continued with that house until he became a member of the firm of Cutler, White & Boice. Mr. Boice married Maria Kendall, daughter of Orin Kendall, of Chicago. They have one child,—Hugh K.

Maxwell Bros.—The planing-mill and box-making business conducted by this firm was started on January 1, 1880, by James and Henry B. Maxwell. They erected a two-story brick building, seventy-five feet square, and employed about twenty-five men. In 1882, business had so increased that it became necessary to add a second building, also two stories high and 75 by 100 feet. Upon its completion, their force was increased about one hundred per cent. Since then, another building, 125 by 100 feet, has been erected, and upon its completion this force was increased another 50 per cent. In proportion as their business increased they increased their force to meet the demands of their business. They employ nearly one hundred and fifty men, while the annual product of their mill and factory amounts to 30,000,000 feet, and the planing-mill contains twelve planing-machines, three large re-sawing mills, and has a capacity of 300,000 feet a day, and the box factory a capacity of about 5,000 medium-sized boxes a day. The engine employed in compelling the machinery is a double one, of 300 horse-power. The firm owes one hundred and forty horses and wagons, and their business is done almost entirely upon a cash basis, strictly so with regard to asking credit. In August, 1884, in addition to their planing-mill and box factory, they erected a large and valuable stock-yard and warehouse, and have established a lumber yard.

James Maxwell was born in Scotland in 1857, and is the son of William and Jean (Kerr) Maxwell, who came to America during 1849, and settled in Chicago, where his father died in 1859, his mother is still living. At the age of fourteen, James Maxwell became employed in the box-factory of Cage & Soper, with whom he remained four years; then worked for Vogler & Co., trunk manufacturers, three years, and afterward for David Goodwillie, box manufacturer, for four years. In 1874, he went into the employ of Pond & Soper, afterward known as Soper Lumber Company, up to the establishment of the firm of Maxwell Bros. He married Emily M. Davis, daughter of Charles and Emily M. Davis, of Chicago. They have one child,—Jennie R.

Henry B. Maxwell was born in Scotland in 1859, and came also with his parents to Chicago in 1849. At the age of sixteen, he entered the office of Robert Harris, then general superintendent of the Chicago, Burlington & Quincy Railroad, and, after remaining there two years, was appointed assistant on the main line of road, and held that position up to the time he became a member of the firm of Maxwell Bros. He married Miss Sadie H. West, daughter of the late Judge Augustus L. West, of New Bedford, Mass., at Clinton, Conn., on June 15, 1879. They have two children,—Henry W. and Augustus K.

The Hitch & Baker Company.—On January 1, 1880, Robert A. and Henry W. Baker started in the manufacture of sash, doors and blinds in Chicago as the firm of Hitch & Baker, and, on January 1, 1882, organized the above stock company. The officers of the company are W. B. Baker, president; R. A. Hitch, treasurer, and W. B. Farson, secretary. Their warehouse is a three-story building, 144 by 225 feet in size. Their factories are located in Forestville and Two Rivers, Wis., and also in Chicago. The products of these factories consist of sash, doors, blinds, moldings, etc. The success which this company has met with is highly remarkable.

K. A. Hinze was born in Prussia in 1849. His parents, Godfried W. and Fredrika Hinze, came to America in 1852, and settled in Chicago. His father, engaged in the cabinet-making business here until the year 1874, when he removed to Elizabeth, N. Y., but is now resides. His mother died in 1874. R. A. Hinze, at the age of seventeen, went into the employ of Charles J. Meyer as bookkeeper and during the last three years had entire charge of the business. In 1880, he formed a partnership with W. B. Baker. Mr. Hinze married Miss Jennie K. Gillett, daughter of William K. Gillett, of Fond du Lac, Wis. They have three children: Irene F., Arthur W. and Mary C.

W. B. Baker was born in Windham County, Conn., on April 3, 1843, the son of George V. and Georganna (Olds) Baker, both of

384

HISTORY OF CHICAGO.
New York State. When he was three years of age, his parents moved to Natick, R. I. In 1829, the family moved to Springfield, Ill., where W. B. Baker, at the age of thirteen, began to serve his time at the trade of machinist, and worked until 1831, in which year he entered Co. "I," 9th Illinois Infantry, and served until 1844, when he was mustered out. He then went to Springfield and worked one year in the Wabash shops. In 1835, with J. H. Schuck, he formed the firm of Schuck & Baker. In 1838, he bought out Mr. Schuck, and continued business alone until 1853, then came to Chicago and formed a partnership with R. A. Hintze. He married Miss Adelia M. Hill, daughter of James L. Hill, of Springfield, Ill. They have one son, Ralph N.

K. B. Farson was born at Lowell, Mass., in 1832. His parents were James and Louise (Doc) Farson, his father a native of New Hampshire and his mother of Maine. They came to Chicago in 1866, where they still reside. At the age of nineteen, Mr. Farson engaged with his father in the manufacture of sash, doors and blinds, and continued with him until 1873, when he went into the employ of Henry Barker & Co. In 1880, he engaged with Hintze & Baker, and, on January 1, 1882, upon the organization of the above company, was made secretary. He married Miss Clara M. Jones, daughter of S. S. Jones, of Chicago. They have one child, Robert B., Jr.

H. F. Seymour and John Sargent. Mr. Seymour commenced the lumber commission business in 1851, at No. 242 South Water Street, and the next year moved to No. 252 South Water Street. In 1883, Mr. Sargent, who had for four years previously been salesman for the J. Dekker & Buo, lumber company, became a member of this firm, and, in 1884, they moved to their present location. Previous to the formation of the firm Mr. Seymour was engaged in the general commission business, but since then the firm has confined its attention to the long-leaf yellow pine and mahogany. The pine is obtained mainly from Mississippi and the mahogany from New Orleans. The sales of the latter amount to from twenty-five to thirty car-loads a year.

H. F. Seymour was born at Boston, Mass., in 1845. In 1862, he enlisted in Co. "I," 5th Massachusetts Volunteer Infantry, was detailed in the Quartermaster's Department at Fort McHenry; and was mustered out with his regiment in November, 1864. He then returned to Boston, and went into the employ of his father, E. H. Seymour, who was a contractor and builder. In the spring of 1865, he came to Chicago, returning again to Boston in the fall of that year, where he again engaged in business with his father. In March, 1872, he returned to Chicago and entered the employ of the Goss & Phillips Manufacturing Company, in their lumber yard. He went to Manistee, Mich., in the interest of this firm, inspecting lumber. In the following year he became salesman for Gifford, Ruddock & Co., afterward Ruddock, Palmer & Co., lumber manufacturers and dealers, continuing with them up to 1881, when he commenced the lumber commission business, as above stated. Mr. Seymour married Miss Addie Gill, daughter of Charles Gill, of Aurora, Ill.

The Ayer Lumber Company was incorporated in 1852, with a capital stock of $250,000, and with the following officers: Edward E. Ayer, president, and Lot P. Smith, secretary and treasurer, at Chicago; D. M. Rior- dan, superintendent, and H. C. Ayer, superintendent and treasurer, at Flagstaff, Arizona.

Edward E. Ayer, the president of the company, was born at Kenosha, Wis., on November 16, 1841. His father, Elbridge G. Ayer, was one of the earliest settlers in that town, and was one of the trustees of the village in 1847. His sister, Mary Ayer, was the first child born in the then new settlement of Kenosha, in 1835. Elbridge G. Ayer lived in Kenosha, Wis., until 1841, when he moved to Big Foot Prairie, Walworth Co., Wis., and in 1856 to Harvard, McHenry Co., Ill. Ed. E. Ayer went West to the plains in 1860, and, in 1861, went to California, where he enlisted that year in the first California Cavalry. He was promoted to second lieutenant of Co. "I," 1st New Mexico Infantry, and resigned in 1864, after which he came home to Harvard. In 1865, he commenced business as a railroad contractor, which industry he continued and made a very successful business. In 1891, when he built the sawmill now owned by the Ayer Lumber Company, at Flagstaff, Arizona, in the vicinity of this mill there is an immense quantity of white pine timber, four hundred million feet of it accessible to the mill. The Co. Gifford & Co., at Flagstaff, Arizona, marketed in all the surrounding territories, Lower California and Mexico. The mill was started in connection with the building of the Atlantic & Pacific Railway and the Mexican Central Railway. It furnished the ties, timber and lumber for five hundred miles of the latter road. The business done by Mr. Ayer is very large, aggregating from $500,000 to $1,000,000 a year, depending in part on the extent to which new railroads are being constructed. Ed. E. Ayer has a yard for the storing of telegraph poles, etc., in Chicago; and the business here consists in handling ties, telegraph poles, and railroad material in general. Mr. Ayer was married, in 1865, to Miss Emma Burbank.

Charles B. Crombie was born at Fulton, Oswego Co., N. Y. Early in life he removed to Brooklyn, where he was for some time connected with a retail pine and hardwood lumber yard, and had extensive dealings with the Government, filling large contracts for hemlock and spruce. In 1868, he accepted a position as correspondent in the Fourth National Bank of New York City, and after one year's service he was promoted to the position of assistant note-teller, which he held until 1872. On account of ill health, he resigned, and went to Canada as cashier and assistant manager of the Huntertown Lumber Company, located at Riviere du Loup. In 1876, he returned to Brooklyn, N. V., and after remaining there about eighteen months, spent six months in European travel. In 1879, he came to Chicago, and was employed by Kellogg, Johnson & Bliss, as cashier and bookkeeper, for two years. His health failing, he resigned, and accepted a position as assistant manager, salesman and buyer for Marsh Bros. & Ransom (now Marsh & Ransom Company), travelling for three years in this capacity throughout the States, from the Lakes to the Gulf and between the Missouri River and New York. In the fall of 1883, he established his present business, which consists in handling redwood lumber, Spanish, Tennessee and Pacific cedar, Southern cypress, long-leaf yellow pine, hard and soft pine, and various kinds of hardwoods. Mr. Crombie has been instrumental in introducing California redwood into Chicago and the Middle States. In order to do this, he has spent considerable time and money in advertising and other expenses; but now the people are acquainted with the wood, which sells on its merits, it has become very popular. He handles an immense quantity of railroad material, such as car-sills, bridge and track rails, railroad ties, and fence posts. Formerly, his office was at No. 294, South Water Street, in the Lumbermen's Exchange, but since December 1, 1885, his office has been in the Adams Express Building, No. 185 Dearborn Street. This is found much more convenient.
for him, and, besides, it is only a question of time when he, as well as the rest of the lumbermen on North Water Street, will be forced from that territory, and give way to production men. His company, like most others, extends to Dubuque, and from one hundred to one thousand miles in length. The business, through Mr. Cramblit's persistent and careful energy, has grown to a very large proportions, amounting annually to $50,000,000 in dollars, $50,000,000 in shingles, 2,000,000 feet of pine, 4,000,000 feet of hardwood, 2,000,000 feet of railroad material, 400,000,000 feet, and 200,000,000 posts. The spacious yard for the redwood business is located on the North Pier.

The A. R. Dick Company was incorporated on May 1, 1883.

Previously to this time the same company was known as A. B. Dick & Co. This firm was composed of A. B. Dick, T. W. Dunn, H. Z. Lewis and R. R. Harrington and was established in December, 1883. The A. B. Dick Company was incorporated with $85,000 capital. The members and officers at the time of incorporation were A. B. Dick, president; T. W. Dunn, vice-president; and R. R. Harrington, secretary. Their lumber, which is principally hardwood, comes mainly from the Southern States. During the first year of their existence as a company, they sold about six million feet. Mr. Lewis's interest was purchased by A. B. Dick on October 1, 1884, A. R. Dick, president of the above company, was born in 1856, in Bureau County, III., the son of Adam and Rebekah (Wilde) Dick. In 1853, Mr. Dick moved with his family to Galesburg, Ill. At this place A. B. Dick received his education, attending the common schools, and afterward Knox Academy, leaving the latter institution in 1872. From this time to 1879, he was engaged with George W. Brown & Co., agricultural implement manufacturers at Galesburg, and from that time, until 1883, he was connected with Deere & Co., Moline, Ill. During this time, he was established, in connection with Charles II. Deere, the Moline Lumber Company, at Moline, Ill., and is still connected with that company. Mr. Dick was married on June 30, 1884, to Miss Alice Smith, of Galesburg, Ill. They have one child, Mabel E. Mr. Dick, for a man so young, has established himself in a profitable business, and is, as it were, but just commencing a career which promises to be a gratifying success.

The Coleman Lumber Company is composed of the following members: Seymour Coleman, Vine A. Watkins and William A. Fuller. It was incorporated on July 27, 1883, with a capital of $85,000. Vine A. Watkins was elected president of the company, William A. Fuller, vice-president, and Seymour Coleman, secretary and treasurer. Mr. Coleman came from Saginaw, Mich., to Chicago in 1873. He had for a number of years, in company with others, owned a considerable quantity of exceptionally fine pine timber land in the vicinity of Menominee, Mich., and in Northeastern Wisconsin. At length he purchased the interests of his old partners, and formed the present Coleman Lumber Company, for the purpose of manufacturing this timber into lumber and selling it to wholesale lumber dealers. The office of the company was opened in the American Express Building, where it still remains. Owing to the dulness in the lumber trade that has prevailed since the organization of the company, but little has as yet been done in the way of cutting this timber.

The Northwestern Lumberman was first started in Grand Rapids, Mich., by Judson & Walter, who published two numbers under the title of the Michigan Lumberman, when they moved to Muskegon, and published the remaining numbers of the first volume. The importance of Chicago being considered, the second volume was commenced in this city, the name being changed to the Northwestern Lumberman. In 1877, it was regularly incorporated and worked under a charter until 1885, when the charter was relinquished and the business was continued as a private corporation. The journal is entirely devoted to the interests of lumbermen. It is considered good authority on anything connected with the lumber interests, and has a large circulation among lumber dealers. In connection with the journal, the company publishes several works, among which are the Lumberman's Handbook, the Pocket Reference Book, and the Lumberman's Telegraphic Code. The average issue of the paper is about thirty thousand, with a subscription list of about twenty-five thousand.

The Coal Trade.

The history of the coal trade in Chicago, since 1871, while it affords no instance of abrupt increase in either receipts or shipments, presents a statement of natural and healthful growth. A tabulated statement is appended, which is the best synopsis of the progress made. A brief reference to a few of the more salient points in the history of what has grown to be one of the city's leading commercial industries, is, however, of interest.

An examination of the table will show a decided decrease in the volume of business for 1874. The cause is to be found mainly in the depressed condition of the manufacturing interests, resulting from the panic of 1873, although the unusual mildness of the winter was not without its influence. The price of anthracite touched a lower point than during ten years preceding; and an increase in activity, during the latter portion of the year, did not compensate dealers for the losses sustained between January 1 and the opening of navigation. The opening of new mines resulted in what may be not inaptly termed a plethora of bituminous coal, all of which sought a market here, to the great derangement of the market and the lowering of prices. The total value of coal received in this market during 1874, has been estimated, by competent judges, at $9,393,000. The year 1876, as also appears from the table, was not a prosperous one for Chicago coal dealers. A combination of Eastern anthracite mine owners and operators had resulted in so far advancing prices that the demand on the part of consumers materially fell off. In August of that year, the monopoly was broken, the demand increased and prices somewhat advanced. The receipts of bituminous coal, during 1876, were the largest known in the history of the trade up to that time. The very excess of shipments to this city, however, resulted in a glutted market and profits were consequently reduced. From this time forward, the volume of business increased with each successive year. No special feature marked the history of the trade. An examination of the appended table shows a rather remarkable increase in the ratio of shipments to receipts,—a fact which is interesting, as tending to show that Chicago is becoming a depot for distribution of coal as of every other variety of supplies.

CLARENCE H. Dyer, of the firm of Dyer & Clark, has been in the coal business for many years in Chicago, and is one of the leading dealers in it; first under the firm of Dyer & Co., which continued four years; then as Dyer & Payne, continuing five years; then as Dyer & Co., again. He was then associated with his present partner, Stewart Clark, which partnership continued five years. They are now the largest dealers and dealers in the trade, and are agents for Sufferin Bros., of Coal Creek, dealers and miners in Wilmington coal. Major Dyer is a native of Litchfield County, Conn., where he was born on July 21, 1825, and is a son of Thomas Dyer, who was mayor of Chicago in 1857, and afterward a member of the Illinois Legislature. His mother's maiden name was Adeline Hopkins. His paternal grandfather was a soldier in the Revolutionary War. In 1844, Major Dyer's parents removed to Chicago, but he afterward returned to his native state, and attended the academy at Farmington, and Mount Pleasant Academy, at Amherst, Conn., obtaining a good, thorough, practical education. He served five years in the Union Army as assistant adjutant-general, with the rank of major, in the Armies of the Potomac and of the Tennessee. He was an efficient and patriotic officer, alert in the performance of duty. He was part in the battle of Antietam and Gettysburg, and also was in numerous other minor engagements; and was mustered out of service, in 1865, at the termination of the war. In 1869, Major Dyer was married to Esther E. Rutter, an esthetic and accomplished lady, the daughter of a well-known physician formerly practicing in Chicago. They have two sons,—George T. and Thomas.

WM. W. CROSBY, of the firm of Dwyer & Co., has been in the coal business for many years in Chicago, and is one of the leading dealers in it; first under the firm of Dwyer & Co., which continued for four years; then as Dyer & Payne, continuing five years; then as Dyer & Co., again. He was then associated with his present partner, Stewart Clark, which partnership continued five years. They are now the largest dealers and dealers in the trade, and are agents for Sufferin Bros., of Coal Creek, dealers and miners in Wilmington coal. Major Dyer is a native of Litchfield County, Conn., where he was born on July 21, 1825, and is a son of Thomas Dyer, who was mayor of Chicago in 1857, and afterward a member of the Illinois Legislature. His mother's maiden name was Adeline Hopkins. His paternal grandfather was a soldier in the Revolutionary War. In 1844, Major Dyer's parents removed to Chicago, but he afterward returned to his native state, and attended the academy at Farmington, and Mount Pleasant Academy, at Amherst, Conn., obtaining a good, thorough, practical education. He served five years in the Union Army as assistant adjutant-general, with the rank of major, in the Armies of the Potomac and of the Tennessee. He was an efficient and patriotic officer, alert in the performance of duty. He was part in the battle of Antietam and Gettysburg, and also was in numerous other minor engagements; and was mustered out of service, in 1865, at the termination of the war. In 1869, Major Dyer was married to Esther E. Rutter, an esthetic and accomplished lady, the daughter of a well-known physician formerly practicing in Chicago. They have two sons,—George T. and Thomas.

THE DELAWARE AND HUDSON CANAL COMPANY has been in business in Chicago since 1871. It started as the Chicago and Minooko Coal and Coke Company, and its business now amounts to about five hundred tons daily. The mines of this company at Minooko, being extensive, and the product excellent. The secretary of this company is Mr. Mike.

Walter S. Bogle, of the firm of Dwyer & Co., has been in the coal business for many years in Chicago, and is one of the leading dealers in it; first under the firm of Dwyer & Co., which continued for four years; then as Dyer & Payne, continuing five years; then as Dyer & Co., again. He was then associated with his present partner, Stewart Clark, which partnership continued five years. They are now the largest dealers and dealers in the trade, and are agents for Sufferin Bros., of Coal Creek, dealers and miners in Wilmington coal. Major Dyer is a native of Litchfield County, Conn., where he was born on July 21, 1825, and is a son of Thomas Dyer, who was mayor of Chicago in 1857, and afterward a member of the Illinois Legislature. His mother's maiden name was Adeline Hopkins. His paternal grandfather was a soldier in the Revolutionary War. In 1844, Major Dyer's parents removed to Chicago, but he afterward returned to his native state, and attended the academy at Farmington, and Mount Pleasant Academy, at Amherst, Conn., obtaining a good, thorough, practical education. He served five years in the Union Army as assistant adjutant-general, with the rank of major, in the Armies of the Potomac and of the Tennessee. He was an efficient and patriotic officer, alert in the performance of duty. He was part in the battle of Antietam and Gettysburg, and also was in numerous other minor engagements; and was mustered out of service, in 1865, at the termination of the war. In 1869, Major Dyer was married to Esther E. Rutter, an esthetic and accomplished lady, the daughter of a well-known physician formerly practicing in Chicago. They have two sons,—George T. and Thomas.

247 T. THATCHER, a member of the firm of A. C. Brackebush & Co., is a native of Illinois, and was born at Galena, on November 22, 1854, the son of George T. and Harriette A. (Lichtenberger) Thatcher. He was educated in the public schools of that city, and entered the firm of A. C. Brackebush & Co., in 1877, and the general prosperity of this firm and its high standing indicate how well he has managed whatever has come under his direction. The average yearly sales of this company are two hundred thousand tons of coal, derived from both anthracite and bituminous coal. Mr. Thatcher is a bright, active young man and an excellent citizen.

WAREHAM W. CROSBY is the agent, in Chicago, for the great coal firm of W. L. Scott & Co. Their principal office is in Erie, Penn., where the head of the house resides. The firm have docks in the harbor, immense quantity of coal, and ship it by lake and railroad. In this city they succeeded one of the oldest coal firms; for it was in 1854 that William H. Dewey first established the business. He died in 1860, and, after his death, H. C. Dewey was the manager of the firm. In 1863, the firm of Dewey & Co., was established, and Thomas Dyer, who was mayor of Chicago in 1857, and afterward a member of the Illinois Legislature, his son, the now agent for Scott & Co., became a partner, having for nine years been connected with the house. In 1875, the firm of Dewey & Co. was sold out to Scott & Co., the company's, its affairs were conducted until 1883 under the old name. It was at this time (1878) that W. W. Crosby assumed charge of the extensive business of Scott & Co. at Chicago. As an evidence of how their transactions have increased at this point, under his energetic management, it may be stated that the sales of the firm of Dewey & Co., when they sold out to Scott & Co., amounted to 25,000 tons annually while now they equal fully 125,000 tons. Wareham W. Crosby was born at Akron, Ohio, on April 7, 1848, and is the son of H. C. and Mary (West) Crosby. In 1853, his father removed to Green Bay, Wis., where he engaged in the lumber business, and his son followed him until 1856, when he returned to the firm of Dewey & Co., of which his father had become a member. In 1857, he became an associate, and has since been one of the leading members of that firm and the chief representative of their successors, Scott & Co., at this point. In 1859, he was married to Mary L. White. They have two children,—John B. and Alice.
huling year, he continued in the same position and also acted for the additional five roads leading from New York to Buffalo,—New York Central, etc. Upon the organization of the Onedia Central Bank, Rome, N. Y., he was elected teller, where he remained until 1857. During that year he moved to New York City and through his influence Lyman J. Churches was made present vice-president and manager of the First National Bank of this city, obtained a situation in the Onedia Central Bank and laid the foundation for his future success as a banker. Upon his return to Rome, Mr. Buchanan took the position of teller of the old Merchants' Savings Loan & Trust Company, at the corner of South Water and LaSalle streets. In 1858, he was chosen president of the Bank of Pooria, Ill., where he continued for three years and then returned to his former position with the Merchants' Savings Loan & Trust Company of this city. He afterward became cashier for Chapman, Wheeler & Co., with whom he remained until 1863, when he chose to connect himself with the firm of Bridgeport, a member of the firm of Buchanan, Richards & Co. Three years later he acted as paying teller for the Merchants' National Bank of Chicago, and subsequently, with the Commercial National Bank, of which he officiated as cashier seven years. Then he organized the Prairie Loan & Trust Company, and served as vice-president of that house, subsequently purchasing the Wilmington Star Mining Company, with coal mines at Coal City, Grundy Co., Ill., of which he is president, and his son, Gordon Buchanan, is treasurer. Mr. Buchanan was married on October 10, 1851, to Miss Mary C., daughter of E. W. Pratt, of Chicago. They have four children: Gordon, Mary C., Margarette and DeWitt W. Buchanan. Mr. Buchanan is one of the original members of the Chicago Library Association, which was organized in 1859.

WILMINGTON & VERNIMILLON COAL COMPANY has the largest plants west of the Allegheny Mountains, having a capacity of over six thousand tons per day. Its mines, situated at Braidwood, Will Co., and Stratford, LaSalle Co., Ill., at the present time are yielding four thousand tons per day.

Albert L. Sweet, the general manager of this company, was born at Diamond Grove near Jacksonville, Morgan Co., Ill., on August 31, 1831, the son of Rev. Joel Sweet, a prominent Baptist minister, who came from Illinois to Osgo, N. Y., in 1830. His paternal grandfather was Rev. Jonathan Sweet, who came to Illinois during 1820. Mr. Sweet's mother, before marriage, was Miss Patience Dow, of Rock Island, a place which has become quite famous as a fashionable pleasure and summer resort. Mr. Sweet had the benefit of the district schools in the different towns where his father lived and preached; and made good use of his opportunities, having acquired a good business education. He first began life as a farmer at Jacksonville, and afterward at Berwick, Warren Co., where he remained about three years. In 1850 he went to New Brunswick, N. J., where he had a pleasant and profitable situation as clerk in a canal office, remaining 1848 years. He then held the position of teller in the Bank of New Brunswick for two years. In 1858, he went to St. Louis, Mo., and was employed until the breaking out of the War, in 1861, as agent of the Altom Packet Company. He then returned to Illinois, and was appointed agent of the Rock Island Railway Company at LaGrange Park, one of the most southern points of the War. In 1865, he came to Chicago, and acted as bookkeeper for Colonel Wyman & Co. in the coal business, where he continued until March 17, 1868. He then took charge of the Chicago, Wilmington & Vermillion Coal Company, and continued in that position ever since. When Mr. Sweet first took charge of this company it had a capital of $500,000, and was producing three hundred tons of coal per day; it now has a capital of $2,000,000, and is capable of producing six thousand tons daily, which fact of itself speaks loudly in his praise as the most glittering example could do. Mr. Sweet was married on October 15, 1869, to Miss Anna E. Sanders, an accomplished and estimable lady of New Brunswick, N. J.

PRATT, PARKER & CO.—This firm is composed of Horatio Pratt and James O. Parker, of Chicago, general partners, and J. J. Allbright, of Buffalo, special partner. The latter is the general sales agent of the Reading & Philadelphia Coal and Iron Company. The firm was organized in April, 1882, and immediately entered into contracts with Mr. Allbright, under which they have the exclusive sale of the "Reading" coal in the West and Northwest. During 1882, the Reading completed its arrangements to reach the West by means of a connecting link between the Pennsylvania & Ohio Coal Company and the New York Central Railroad, and an alliance with the Wheeling & Lake Erie, by which the Philadelphia and Reading Coal and Iron Company are the largest producers of anthracite coal in the country. In the year 1883, it mined 13,790,290 net tons of coal, the largest competitor of the Reading Company, its enormous capacity of production, and its unequalled facilities for transportation enable Pratt, Parker & Co., within the three years of the lease from the Reading, to take the leading position in the anthracite coal trade in the West. They carry stocks of anthracite in important ports on Lakes Michigan and Superior; seven large whole-
sale yards in Chicago, besides a large number of retail yards, are supplied with anthracite coal entirely by them. At Superior City, at the head of Lake Superior, they have large investments in dock property. One of the docks in which they are interested is the largest in its machinery and capacity for unloading and handling of coal than any other on the western lakes. From this point they supply the trade at St. Paul, Minneapolis, Duluth, and other points in the Northwest. The sales of Pratt, Parker & Co., for the year 1883, have been principally on the market lying between Green Bay and Marquette, Mich., on the northeast; Cincinnati, Ohio, and Nashville, Tenn., on the southeast; El Paso, Tex., on the south, and Dakota, on the northwest. They have made considerable shipments to each of the above points. They deal largely in Morris Run, Bloomsburg, and also in Chillicothe Brier Hill coals. They are the agents of the Brier Hill Company, whose mines are at Braidwood, Ill., and sell the product of that company.

FRANCIS S. PEABODY is a native of Chicago, and was born in July, 1856, and is son of Francis B. Peabody, a well known real-estate dealer and financial agent of this city. Francis S. prepared for college at Exeter, N. H. He entered Yale College, and graduated from that institution in 1881. He intended to fit himself for one of the learned professions, but having taste for commercial affairs, entered the coal trade in 1881, in which he has been very successful, his sales amounting to $50,000 per month. Eugene F. Wager has been in the coal business fifteen years; first at Gardiner, Ill., as manager of coal mines, where he remained six years, and then went to Covington, Ind., as manager of the Fountain County Coal Mining Company; and, in 1883, III., as agent for the Illinois Central Railroad company. He has had the management of the coal mines four years; and then, in 1880, came to Chicago where he has done an extensive business. He is now interested in the Wares patent telephone resonator, an adjustable mouth-piece and a valuable improvement. He was born in New York, February 15, 1848, in Delaware County, N. Y., the son of Mr. A. S. Wager. His was a carpenter, and when the War of the Rebellion broke out he joined in the 17th Illinois Cavalry Volunteers, serving nearly three years, but was discharged for disability just before the expiration of his term in service, and in 1874, Eugene obtained a good business education in the public schools, paying his own way on a farm and clerking in stores; and thus he is a self-made man in every respect. He was married on May 24, 1871, to Miss Evelyn L. Neishon, of W. C. WYMAN & CO. are among the original shippers of Hocking Valley coal (known as the Ohio Central coal), owning their mines and railroad with terminal at Toledo and on the Ohio River. This company operates five thousand cars, selling chiefly to rolling-mills and large manufactories; they sell two hundred thousand tons annually in the Chicago limits, the amount of their business in other points in the Northwest and Canada. They have docks at Duluth and Milwaukee, which handle coal at several points. They have had a depot in Chicago for three years last past, which is under the personal management of Walter C. Wymann. Mr. Wormann was born at Boonville, Ill., in 1839, and is the son of Richard F. Wymann, who came to Chicago almost fifty years ago and is a well-known business man in this city. He was associated with his son until the death of the former, which occurred two years ago.

FRED G. HARTWELL, coal merchant, is a son of Abraham V. Hartwell, and Margaret Hartwell, and was born at Amsterdam, N. Y., on August 1, 1858. His parents came to this city in 1860, where he attended the public schools until fourteen years of age. He then left his studies and began business life in his father's coal office, at Twelfth-street Bridge. From minor desk-duties, he became familiar with the details of the business, and, when competent, assumed the superintendence of the establishment. In 1882, he continued the business at the same stand, in connection with J. J. Kelly, under the firm name of Hartwell & Kelly. At the end of two years thereafter, the firm dissolved, and Mr. Hartwell removed his office to more central and convenient quarters, at No. 170 Dearborn Street, where he has continued in the coal business under the style of F. G. Hartwell Coal Company, with yards at the old station on Twelfth Street, and having one of the youngest men in the trade in this city, but is thoroughly posted in his line of business, and is held in high esteem in the social and business world.

JOHN JOSEPH CORCORAN, coal merchant, is a son of John and Ellen Corcoran, and was born at Kingston, Ontario, Canada, on January 17, 1852. When he was three years of age his parents came to this city, and since that time he has lived with his parents. He received his education from the Christian Brothers School, and finished by a thorough course in Bryant & Stratton's Business College. At thirteen years of age he entered the employ of Edwin Walker, stone dealer, Lemont, where he remained until
the spring of 1864, when he came to Chicago and continued in his service two years. It was at this time that he attended Bryant & Stratton's College. In the following spring he engaged with Clifton & Sprague, commission merchants, who were then located in the old Chamber of Commerce Building, and remained with them until the fall of 1866. At that time he entered the employ of Goat & Curtiss, coal dealers, on the river at Van Buren Street, in the capacity of a salesman. In May, 1872, that firm was succeeded by O. W. Goat, with whom he continued, and, upon the decease of Mr. Goat, the business was conducted by his executors until May 1, 1873, when Mr. Corcoran purchased the business, and has since been actively engaged in the coal trade. Mr. Corcoran was married on September 19, 1876, to Miss Maggie E. Bourke, daughter of Ulrick Bourke, well known as a leading furniture dealer of this city. They have three children,—Edward J., William L. and Vincent A.

Edward Fitch West, coal merchant, is a son of Samuel C. and Harriet West, and was born at Saratoga Springs, N. Y., on April 22, 1840. He attended school until fourteen years of age, and then began commercial life in the employ of Hopkins & Rae, dry goods merchants of Syracuse, N. Y., with whom he remained three years. He then engaged with DeForest & Sherwood, in the same line of business, at Cleveland, Ohio, and continued in their employ fifteen years, for which time he was manager for eight years. In January, 1871, he came to this city and was associated with his father and brother, Andrew F., in the coal business, under the firm name of West & Sons, at the Erie-street bridge. Immediately after the fire of October 9, 1871, he returned to Cleveland, and resumed his former position with DeForest & Sherwood. In 1875, he came back to this city and engaged in the coal trade. He followed his maternal grandfather's business in the following spring with Daniel McGary, under the firm name of West, McGary & Co., and established a yard and office at Twenty-third Street and Archer Avenue, where they did business sixty years. He was engaged in the coal trade at that time he was in the employ of the Tribune company at the present location at the corner of Twenty-seventh and Clark streets. He handles only the finer grades of coal and has the largest known experience and perseverance that the process of unloading coal from vessels, etc., known as Hunt's elevated railway, became a success. Mr. West was married on October 12, 1865, to Miss Carrie Frost, of Batavia, N. Y. They have one daughter,—Grace

Andrew Gustave Johnson, coal merchant, is a son of Eric and Anna C. Johnson, and was born at Utebro, Sweden, on March 26, 1849. He received his elementary education in the public schools of his native city. At the age of eighteen he went to sea, in the trade between Hamburg, Germany, and foreign ports, following a sailor's life five years, during which time he visited nearly all of the seaports known to commerce. In 1871, he came to New York, and made a trip to Porto Rico in the coasting trade, and in the fall of that year came West to this city. He was engaged in the lake marine until 1873, when he went into the grocery business, near the corner of Townsend and Chicago Avenue, where he remained one year. After disposing of this establishment, he entered the employ of the Eureka Coal Company, and continued with them four years in charge of their dock and yard. The following year he spent in Bryant & Stratton's Business College, from which he graduated, after taking a full course of study. He returned to the coal business, and engaged with the Silver Creek Coal Company; then was in the employ of J. D. Stone and Langdon, Richardson & Co., two years. In August, 1882, he established himself in his present line of business at No. 95 Division Street, where he has since been located, under the style of A. G. Johnson & Co. Mr. Johnson married, in 1883, Miss Laura Wallweber of Chicago. They have one daughter,—Vinetta.

D. Stone was born at Streator, Ill., on August 17, 1848, the son of Jacob G. and Lydia (Echs) Stone. He received his education in the public schools, and, in 1870, dug coal in the mines at Streator, laboring there about one year. He then went to St. Charles, where he worked in the coal mines for a short time, and, in 1872, he came to Chicago and entered at once into the coal trade, continuing ten years and doing an extensive business. He then sold out to the Western Fuel & Charcoal Company, since which time he has acted as their manager. He has also acted as agent for several mines, and is manager of the Coal Creek Mine, in Indiana, handling 240,000 tons of coal and 250,000 bushels of charcoal yearly. He has also the agencies of the Hett & Dyer Company and the Ohio Potash Company. Mr. Stone is an active, energetic man, and gives prompt attention to each branch of his business. He is a member of Englewood Lodge, No. 690, A.F.&A.M., and of Elwood M. Jarrett Chapter, No. 175, R.A.M. He was married, in 1875, to Arnesta Fowcon, of this city. They have two children, Josephine and Charles Edward.

H. Alexander Bischoff, editor of The Black Diamond and manager of the Bureau of Coal Statistics, is a son of John G. and Louisa Bischoff, and was born in Chicago, on June 2, 1843. He began business life at the age of fourteen with the firm of Ross & Foster, on Lake Street, with whom he remained one year; then was employed by J. M. Adsit, banker, for one year. With the restlessness of youth, he traveled and worked his way to St. Louis. After sojourning in New Orleans a short time, he returned to St. Louis and subsequently continued his traveling on foot toward this city. Upon reaching Bloomington, he secured employment for the winter, and in the following spring came to Chicago and entered the dry goods house of Manheinbroth Bros. At the first call for troops, in 1861, he enlisted in the 25th Illinois Volunteer Infantry. He saw active service in the Army of the Cumberland, and, upon receiving an honorable discharge in 1862, entered the service of the United States Sanitary Commission as corresponding secretary. He was connected with the western department at Louisville, Ky., until 1865, and after taking the department archives to New York City, remained there in the employ of the Commission until 1866. He then returned to Louisville, and was engaged by Meyer Bros., tobacco and cigar merchants, as traveling salesman, and, in the following year, came back to Chicago and took a position as bookkeeper in the furniture establishment of Charles Wippo. He afterward was in business, in connection with Emil Hiedermann, in house furnishing, etc., at No. 137 North Clark Street, where the firm was burned out on October 7, 1869. They resumed business, and added the department of plumbing, gas-fitting, etc., to their establishment, until the fire of 1871 again destroyed their house. They were among the first to re-open the business at No. 151 North Clark Street, with a branch store on the corner of Van Buren and State streets. They were among the sufferers during the panic of 1874, and Mr. Bischoff gave up commercial life to enter the medical profession. He traveled with Theodore Thomas during the concert seasons of 1875, 1876 and 1877. In 1880, he taught music at Cleveland, Ohio, afterward returning to Chicago. He established the bureau of coal statistics of this city, and is now engaged in that business, and is also the editor of The Black Diamond, a publication devoted to the coal interests. Mr. Bischoff was married on April 11, 1871, to Miss Hattie A. Mize, of Akron, O. They have two children,—Gertrude and Bessie.
SOCIAL PROGRESS.

The exigencies of the winter succeeding the fire laid the foundation for a great transformation in the society and social life of the city. So many church circles were entirely broken up, and such multitudes of people were transferred from one division of the city to another, that new ties and associations were formed. During this season were sown the seeds of acquaintance and intimacy from which ripened many of the organizations of the social or artistic character which now exist. Then the Apollo Club came into being. At this time, too, was born the Athenaeum, which was an outgrowth of the necessity which then existed for providing for the young men whose ordinary modes of passing their leisure time had been destroyed. Thence, dates the foundation of that really metropolitan society, which, ignoring those bounds of church or faction that are so apt to close years after the earlier associations of a city, includes within its circle all of kindred mind. The "reception" of to-day differs no more widely from the "tea-party" of an earlier stage of development, than does the society of the present from that of the past. While its strata are marked and its distinctions sharp, its ramifications are more wide-spread and its bounds more extended. The receptions accorded by society to the celebrities who have visited Chicago, have been a marked feature of the past decade. Distinguished foreigners and prominent Americans (statesmen and military leaders, as well as those who have achieved distinction in art, music or letters) have alike been received with a round of entertainments, in which society and the clubs have vied to deepen the feeling of Chicago's hospitality.

This development of club life, too, which has been another distinguishing feature of the period, is one of more than ordinary significance. While, at all stages of their careers, men are drawn together in social organizations for one purpose or another, in the earlier life of a growing community the demands of business are too exacting, and the contest for wealth too fierce, to admit of the entire gratification of the instincts for social communion and luxurious surroundings which are found in club life. So the advent of this element in a city's life marks an era in the growth of the community. It indicates that the business ventures which have long been so carefully watched have reached a safe haven; that the commercial interests are secure; and that the men by whose unceasing vigilance the city has been conducted to prosperity, have reaped the reward of their labors, and possess the means and leisure whereby to gratify their tastes for elegance and ease. This period appears to have dawned on Chicago about six years after the fire, when the anxieties consequent upon the re-establishment of business and the recuperation from the financial depression succeeding had resulted in the firm grounding of her commerce and industries. Then were organized most of the clubs which now form so prominent a factor in the social activities of the city.

The development of these higher orders of social life by no means augurs the extinction of the varied forms of an earlier period. A growing city must ever embrace all stages of social progress. The lyceum and debating society of a primitive civilization; the societies for the acquisition of a literary education by those whose daily life of toil precludes much study—are present, side by side, with the varied forms of church activity. In all strata of society, little coteries and associations for pleasure or improvement are formed; but it is beyond the scope of this work to follow or particularize them.

THE CHICAGO CLUB.

The club history of Chicago had its inception in the comparative oblivion suggested to the average Chicagoan by the year 1861. In May of that year, a number of gentlemen put together the foundation on which the present Chicago Club stands. This small circle included M. C. Stearns, W. P. Coolbaugh, C. T. Wheeler, N. K. Fairbank, Andrew T. Dickey, John J. Jones, William B. Ogden, J. Mason Parker, James Robb and T. J. S. Flint. The first organization was known as the Dearborn Club; Hon. William B. Ogden was its first president James Robb vice-president, and J. Mason Parker secretary and treasurer.

The original club rooms were in the top story of the old Portland Block, on the southeast corner of Dearborn and Washington streets. The facilities for indulging in good dinners, ever a foremost club proclivity, were primitive. A negro steward, who on his small stove in a side pantry could produce an occasional rash of bacon and a cup of good coffee, represented the catering department. With such limited facilities, in war times, and with the true club spirit scarcely as yet existing in the city, the Dearborn Club struggled along for two years; and finally paid its debts and turned the keys of its club-rooms over to the lessors, having disposed of its effects and furniture. This was in the latter part of 1863. For the following five years there was no social club of this character in Chicago.

In 1868, the spirit of the old Dearborn Club was revived through some of its original members, reinforced by a number of new Chicagoans, and the Chicago Club was organized. The meeting at which this was effected was held at the Sherman House, in December, about forty being present. A charter was issued on March 25, 1869, with Philip Wadsworth, Charles B. Farwell, Octavius Badger, Emery Washburn, Jr., George Henry Wheeler, Edmond Carrey and William J. Barney, as incorporators. The officers of the first year were Ezra B. McCagg, president; Philip Wadsworth, vice-president; John J. Jones, secretary; Edward I. Tinkham, treasurer. The first executive committee was composed of Charles B. Farwell, Henry R. Pierson, N. K. Fairbank, George R. Whitman, William J. Barney, Anson Stager, Wilbur F. Storey, Wirt Dexter and John DeKoven.

The residence of Henry Farnum, on Michigan Avenue, adjacent to Adams Street, was secured as the first club-house. This was a very spacious and elegant building for the period, and considered a somewhat ambitious home for a new organization in an untired field. The event, however, justified the venture, and
here the Club led a tranquil existence, with occasional additions to its membership, up to October, 1871.

In the great fire it saved nothing but a basket of silverware and the original picture of Sheridan’s Ride. The life of the Club itself, by this time a strong and united body, was unhurt by the disaster. It at once

The capital stock of the company was $130,000, afterward increased to $160,000, of which the full amount was expended in the erection of the building. The Chicago Club has bought of its stock to the present amount of about $50,000, with the view of finally re-incorporating it. To N. K. Fairbank, for ten years past its president,

sought new quarters, and in November, following, moved into the house of B. F. Hadduck, at No. 279 Michigan Avenue, which was leased with the furniture. During its two years’ stay there, prominent additions were made to the membership. In 1873, a removal was made to the former residence of T. J. S. Flint, at the corner of Wabash Avenue and Peck Court, where the Club remained until the opening of its new club-house, at Nos. 43-45 Monroe Street, in August, 1876.

The Chicago Club-house was built by an association of members calling themselves the Dearborn Club, who became duly incorporated with that special end in view. perhaps belongs, more than to any other one man, the credit for the prompt and successful completion of the Club’s present quarters. By eminently successful management, the building association, of which he was chief promoter and the most liberal contributor, has paid its stockholders a yearly dividend of six per cent, on the investment.

The history of the Chicago Club for the past decade is a record of which any social organization might justly be proud. That which is representative of our city’s progress in its highest sense has found its center here. The members are men of social and commercial
mark, the builders of the city and the upholders of its progress. They have entertained, from year to year, at public receptions, and with that hospitality for which the Club is celebrated, the most distinguished citizens of all nations. In 1879, a memorable banquet was given to General Grant; three presidents have, in their turn, been entertained; and on the occasion of the visit of Princess Louise and Prince Leopold, in 1880, honors were worthily paid to the royal guests. The club-house has been the favorite resort of distinguished foreigners, and its registers contain the names of nearly every notable from foreign lands who has visited this country of late years. Its list of non-resident members includes prominent men of nearly every State in the Union, and the numbers nearly one-fourth of its resident membership.

The number of resident members on April 1, 1885, was four hundred and twenty-six; of non-resident members, one hundred and three; and of army and navy members, seven; showing a total register of five hundred and thirty-six.

Notwithstanding the somewhat exclusive policy adopted, the membership is constantly increasing. The management of the Club has practically been in the same hands for years, the institution being conservative in this as in other respects. Its officers from the time of organization have been—

1870—President, Ezra B. McCagg; Vice-President, Philip Wadsworth; Secretary, John J. Jones; Treasurer, Edward I. Tinkham.
1871—President, Ezra B. McCagg; Vice-President, Philip Wadsworth; Secretary and Treasurer, John J. Jones.
1872—President, Ezra B. McCagg; Vice-President, Philip Wadsworth; Secretary and Treasurer, John J. Jones.
1873—President, Philip A. Hall; Vice-President, George F. Rumsey; Secretary and Treasurer, John J. Jones.
1874—President, Philip A. Hall; Vice-President, David A. Garoutte; Secretary and Treasurer, John J. Jones.
1875—President, Philip A. Hall; Vice-President, Franklin MacVeagh; Secretary and Treasurer, Francis Morgan.
1876—President, Nathaniel K. Fairbank; Vice-President, Anson Stager; Secretary and Treasurer, W. Scott Keith.
1877—President, Nathaniel K. Fairbank; Vice-President, Anson Stager; Secretary and Treasurer, W. Scott Keith.
1878—President, Nathaniel K. Fairbank; Vice-President, Marshall Field; Secretary and Treasurer, W. Scott Keith.
1879—President, Nathaniel K. Fairbank; Vice-President, Marshall Field; Secretary and Treasurer, W. Scott Keith.
1880—President, Nathaniel K. Fairbank; Vice-President, Marshall Field; Secretary and Treasurer, Preston C. Maynard.
1881—President, Nathaniel K. Fairbank; Vice-President, Stephen F. Gale; Secretary and Treasurer, Henry C. Bannard.
1882—President, Nathaniel K. Fairbank; Vice-President, W. Scott Keith; Secretary and Treasurer, Henry C. Bannard.
1883—President, Nathaniel K. Fairbank; Vice-President, Charles D. Hamill; Secretary and Treasurer, George W. Montgomery.
1884—President, Nathaniel K. Fairbank; Vice-President, Charles D. Hamill; Secretary and Treasurer, Thomas S. Kirkwood.

CALUMET CLUB.

In the early spring of 1878, a small number of young men agitated the question of forming a social club. A paper was circulated, and, on the evening of April 9, 1878, a meeting was held. One hundred and twenty persons had already signed their intention to join the club, the large increase over the limit of fifty members having been caused by the desire of a number of elderly business men, to obtain suitable quarters where they could pass their leisure moments. At this preliminary meeting, a name was decided upon, and, on April 13, 1878, a charter was received from the Secretary of State, authorizing the incorporation of the Calumet Club, a private social organization. The name "Calumet," synonymous of good-will and kindly greeting, was an especially appropriate title, and the "pipe of peace" has since been used by the club as an emblem of such fraternity.

The officers of the club for the first year were—

The large residence on the northeast corner of Michigan Avenue and Eighteenth Street was secured for a club-house, under a three years' lease, and was informally opened to the members on April 14, 1878. The dedication of the house occurred on April 21, 1878, when a reception was given by the president and directors. Another reception of members and ladies occurred on June 30. In the following October, the Club gave a very successful art reception, which was quite noteworthy for an institution not then six months old. A month later, the State Microscopical Society was entertained; and on January 24, 1879, a reception was tendered to Miss Minnie Hauck, the prima donna, in recognition of the efforts made by her in previous years on behalf of the sufferers by the great fire. On November 17, 1879, the Club entertained General and Mrs. U. S. Grant, on their return from their tour round the world.

Its growing popularity and increasing membership warned the Calumet Club that before many seasons more commodious quarters must be sought. In September, 1881, after due consideration, it was decided to build. Ground was at once broken on the lot at the corner of Michigan Avenue and Twentieth Street, which was purchased by the organization, and a brick and stone building was erected, of the Romanesque order of architecture, elegant in appearance, magnificently in proportions, and containing every attribute of wealth and ease. This was opened on April 21, 1883, by a reception.

A description of the edifice can give but a faint idea of the handsome interior. From the imposing entrance, on Twentieth Street, the visitor enters the main hall, 40 by 30 feet in size. To the right is the office; directly in front, a broad stairway leads to the upper floor; on the left, a capacious and old-fashioned fireplace invites by its luxurious warmth and glow. Adjoining the main hall, on the extreme right, is the billiard parlor, containing eight tables; and opening from this is a well-appointed café. The reading-room occupies the entire Michigan Avenue side of the main floor, and is luxuriously furnished and handsomely finished in different woods. The portraits and paintings in this apartment are notable art objects. A full-length portrait in oil, 8 by 13 feet, of the late General Ulysses S. Grant, painted by Thomas Le Clear, of New York, is the latest acquisition; and a full-length oil portrait, 10 by 15 feet, of Hon. John Wentworth, presented by him to the Club, painted by Healy, is on the same wall. Another famous picture is the "Council of War," painted by G. P. A. Healy, and presented by the artist to Hon. E. B. McCagg, the present owner, who represents President Lincoln in consultation with Generals Grant and Sher-
man and Commodore Porter. Portraits of General An-son Stager and Edson Keith, ex-presidents of the Club; a half-length crayon of General P. H. Sheridan; an oil-portrait of the late John McCullough, as "Virginius," owned by John B. Carson; and a collection of eight hundred and twenty-eight paintings loaned to the Club by Albert A. Mungo, also adorn the walls of the reading-room. The lot and building cost $200,000 and the furnishings an additional $50,000.

The membership of the Calumet Club embraces a fair sprinkling of all vocations, while its chief components are the business men of the city. There are five hundred and eighty-one regular members, and thirty-eight non-resident members, scattered between Paris, France, and San Francisco.

The annual art reception of the Club has become an established institution. At the exhibit in December, 1885, ninety-six paintings were displayed. A movement has been made to organize an art association within the Club, whose duty it will be to attend to this feature. Since opening the new house there have been two art receptions, two annual receptions, two old settlers' receptions, a reception by John Wentworth, the members' annual banquet and ball, and the last reception, given by the president and directors on January 25, 1886—all notable society events.

The officers and directors of the Club, from the first organization, have been—

1878—Anson Stager, president; Charles J. Barnes, vice-president; Frederick B. Tuttle, secretary and treasurer; Charles J. Barnes, William Chisholm, Joseph G. Coleman, Charles W. Drew, Augustus N. Eddy, James B. Goodman, Edson Keith, Robert L. Perry, Anson Stager, Frederick B. Tuttle, A. G. Van Schaick, directors.

1879—Anson Stager, president; Edson Keith, first vice-president; A. G. Van Schaick, second vice-president; Frederick B. Tuttle, secretary and treasurer; Watson F. Blair, Xavier L. Otis, Robert L. Perry, Anson Stager, Frederick B. Tuttle, A. G. Van Schaick, directors.

1880—Anson Stager, president; Edson Keith, first vice-president; A. G. Van Schaick, second vice-president; Frederick B. Tuttle, secretary and treasurer; Watson F. Blair, Xavier L. Otis, Robert L. Perry, Anson Stager, Frederick B. Tuttle, A. G. Van Schaick, directors.

Thomas R. Jenkins, secretary of the Calumet Club and ex-president of the Farragut Boat Club, is a member of the well-known dry goods commission firm of Jenkins, Keer & Co. He was born at Pittsburgh, Penn., in November, 1848, but was reared in the West, his family removing to Wisconsin when he was a lad. He was educated at Oshkosh, graduating from the high school in 1866. After finishing his studies he apprenticed himself as a druggist's clerk, and served three years in a pharmacy at Berlin, Wisconsin. In 1868, he came to Chicago, and entered into the employ of Field, Lcter & Co. He was engaged as general utility man in the offices of that house for one year, and for the following nine years was credit man, and had general charge of the books of the retail department of Field, Lcter & Co. In 1879, he resigned his position and took a trip to Europe to recruit his health. On his return, the firm of Klapp, Jenkins & Co. was organized, and they commenced a foreign and domestic dry goods commission business, which has been carried on most successfully up to the present time. In July, 1884, Mr. Klapp retired from the firm and John J. Kreer purchased his interest, the firm name then changing to Jenkins, Keer & Co. In 1874, Mr. Jenkins was importuned to join the
HISTORY OF CHICAGO.

Farragut Boat Club, and, with hopes of aiding his then poor health by the manual exercise of boating, he became a member of the club, and has since occupied various prominent positions in that organization. In April, 1875, he was elected vice-president of the club and in the following October was made its president, holding the office for five consecutive years. He has since served on several committees, among them being that of ways and means for taking measures toward the erection of the club’s present handsome home. Mr. Jenkins was an original member of the Calumet Club, and, in 1884, was elected secretary of the same, holding that office at the present time. He is also a member of the Washington Park Club and of Garden City Council, No. 202, of the Royal Arcanum.

The Old Settlers.—In February, 1871, some attempt was made to organize an Old Settlers’ Society, but the meetings held resulted in nothing of importance, and the work of gathering historical facts of the early days of Chicago remained dormant, and had it not been for the careful and energetic labor of the Calumet Club this valuable work would have never been performed. In May, 1879, the Calumet Club extended an invitation for a reception to the old settlers,—those who had come to Chicago prior to the year 1840, and had at that time attained their majority. These receptions, since held once each year, have been productive of much good, and the Club has taken a special pride in conserving and invoking history on their behalf. In the club-house is an apartment devoted solely to the uses and memories of early Chicagoans, and called the “Old Settlers’ Room,” where may be found portraits of all of the more prominent pioneers and a number of interesting relics. Among the latter are the famous Mark Beaubien fiddle (now three-stringed and voiceless) and the historic tomahawk and peace-pipe of Captain William Wells, who was slaughtered by the Indians on August 15, 1812, Year by year, the Calumet Club adds to this collection, and its registers and records of the pioneers are gradually growing more complete.

The banquet occurring in May of each year has been from the first, under the direct supervision of a committee of old settlers, which is composed of all members of the Calumet Club whose residence in Chicago antedates 1840. The original committee was composed of Silas B. Cobb, Franklin D. Gray, James H. Rees, Marcus C. Stearns, Frederick Tuttle, and Joel C. Walter; and the changes in the committee since have been through the deaths of James H. Rees and Thomas Hoyne, and the admission to membership of John M. Van Osdel, John Wentworth, A. G. Barley, Horatio G. Loomis and Jerome Beecher. The invitations to the last annual banquet numbered nearly four hundred and fifty. Each recurring occasion has served to revive many old memories and renew old acquaintance, as well as awakening a new interest in, and furnishing much valuable matter for, early history.

It is the pride of the Calumet Club to foster the feature it has thus undertaken, in every way. From its records is obtained the following list of settlers, of age and resident in Chicago prior to 1840, and living at this date (December 13, 1885), with their places of residence:

Ackley Benjamin M., No. 422 West Washington Street, Chicago.
Adams Charles, Norwalk, Conn.
Admiral James M., No. 400 Dearborn Avenue, Chicago.
Allee Edward R., Aurora, Ill.
Ambrose Rev. Joshua G., Reedsburg, Sauk Co., Wis.
Amundson Edward O., No. 152 Lakeside Street, Chicago.
Armstrong T. R., Central Hotel, Chicago.
Atwell Tobias, Downers Grove, Ill.
Bailey Amos, Pacheco, Contra Costa Co., Calif.
Bailey Henry, No. 355 West Jackson Street, Chicago.
Balch William Amos, No. 3026 Lincoln Street, Chicago.
Baldwin Joseph N., Braintree, Vt.
Barratt Charles Herbert, Diamond Lake, Lake Co., Ill.
Baum Rev. Peter, Illinois, Ill.
Bass J. W., St. Paul, Minn.
Bassett George, No. 710 Hubbard Street, Chicago.
Bateman Ezra, No. 155 Lakeside Street, Chicago.
Bates John, No. 237 State Street, Chicago.
Becker Henry T., No. 3153 Prairie Avenue, Chicago.
Becker Jerome, No. 341 Michigan Avenue, Chicago.
Boger Rev. Stephen H., Plainfield, Ill.
Borden Charles, No. 201 West Randolph Street, Chicago.
Borg Atlan, No. 200 Fifth Avenue, Chicago.
Bolton Rev. John, No. 75 Honore Street, Chicago.
Bolton Isaac H., Paw Paw, Ill.
Bishop James E., No. 49 Lincoln Avenue, Denver, Colo.
HISTORY OF CHICAGO.

Names of ladies invited, residents prior to 1840, in addition to the wives of the old settlers:

Adams Mrs. Hannah, widow of Joseph S., Evanston, Ill.
Adams Mrs. Mary, widow of John, No. 4214 Dearborn Place, Chicago.
Albright Mrs. Julia Bowers, widow of Horace, Bower’s Grove, Ill.
Alickman Mrs. Sarah Thomas, widow of Henry, Hyde Park, III.
Allison Mrs. Thomas Jefferson, widow of Isaac, No. 641 Dearborn Place, Chicago.
Barnes Mrs. Anna M. Fish, widow of Hamilton, No. 157 South Michigan Avenue.
Beach Mrs. Sarah, widow of John, No. 974 West Madison Street, Chicago.
Brooke Mrs. Prudence Trumbull, widow of Dr. Harvey, No. 3503 Lake Avenue.
Brown Mrs. Sarah, widow of John, No. 45 South Ann Street, Chicago.
Browning Mrs. Susan L., widow of Joseph E., No. 59 Aberdeen Street, Chicago.
Burns Mrs. Anna W. Germann, widow of Silas, No. 229 Michigan Avenue, Chicago.
Butler Miss Elizabeth, widow of J. R., St. Charles, Ill.
Cahoon Mrs. Pamelia C. Hathaway, widow of John, No. 76 Twelfth Street, Chicago.
Carver Mrs. Sarah L. Warren, widow of John, Aurora, III.
Childs Mrs. Eliza Woodburn Aiken, widow of Shubael Evans, Evanston, Ill.
Church Mrs. Rebecca Shimer, widow of Thomas, No. 331 Michigan Avenue, Chicago.
Cox Mrs. Hannah Pine, widow of William Linn, Hyde Park, III.
Clymore Mrs. Mary Galloway, widow of Archibald, No. 153 Seminary Avenue, Chicago.
Collin Mrs. Maria Hidden, widow of Frederick, Oswego, Ill.
Coore Mrs. Harriet DeLoe (Richardson), widow of Joseph Warren Chase, Crystal Lake, III.
Connolly Mrs. Clarissa Granum, widow of Francis, No. 643 West Adams Street, Chicago.
Cook Mrs. Anna S. Newton, widow of Charles W., No. 3241 Indiana Avenue,
Cook Mrs. Thomas, Western Springs, Cook Co., Ill.
Cook Mrs. Caroline E., widow of John, No. 741 Michigan Avenue, Chicago.
Curtis Mrs. Mary, widow of James, Champaign, Ill.
Davis Mrs. Eliza, No. 452 West Twelfth Street, Chicago.
Demeys, widow of William H., No. 88 West Jackson Street, Chicago.
Dwyer Mrs. Adeline S. Lincoln, widow of Dennis S., Monticello, Ill.
Dwyer Mrs. Mary Ann, widow of Edward, No. 88 West Jackson Street, Chicago.
Dwyer Mrs. Sebron C., widow of Philip, Troma, N. Y.
Dwyer Mrs. Elizabeth DeBunton (Hobart), widow of Thomas, Lake View, Ill.
Eddy Mrs. Grace K. King, widow of Philander, Keene, N. H.
Egan Mrs. William B., No. 824 Dearborn Avenue, Chicago.
Fair Mrs. Caroline C., widow of David, River Forest, Cook Co., Ill.
Farr Mrs. Jane, widow of John B., No. 815 Larrabee Street, Chicago.
Ferris Mrs. Sarah, widow of Franklin, No. 208 South Morgan Street, Chicago.
Fletcher Mrs. Amelia P., widow of L. M., Chicago.
Foster Mrs. John W., No. 1921 Indiana Avenue, Chicago.
Foster Mrs. Rose, widow of Francis, Porter Station, Ind.
Foster Mrs. Louise, widow of Thomas, No. 263 Michigan Avenue, Chicago.
Foster Mrs. Julia Elvira Smith, widow of Henry George, Hotel, Ill.
Foster Mrs. Anna Ballon, widow of Theodore, No. 46 College Place, Chicago.
Jones Mrs. Frances Maria Northam, widow of Nathaniel A., No. 1921 Indiana Avenue, Chicago.
Jones Mrs. Frances Maria Yarn-controlled, widow of Daniel Andruss, No. 110 West Madison Street, Chicago.
Kearney Mrs. Caroline Chapman, widow of William Henry, No. 90 Thirty-third Street, Chicago.
Keegan Mrs. Felicitas M., widow of John, No. 1835 Clark Street, Chicago.
Kearney Mrs. Maria Theresa Ellis, widow of Dr. Edward Stoughton, Barrington Station, Ill.
Kelly Mrs. Jane, widow of Stilley, widow of John, No. 1835 South Michigan Avenue, Chicago.
Kellogg Mrs. Robert Allen, widow of John, No. 320 Wabash Avenue, Chicago.
Larabee Mrs. Mary Margaret Haight, widow of William J., General, Ill.
Leventrout, widow of Jesse H., No. 191 Farrell Avenue, Milwaukee, Wis.
Lloyd Mrs. William, No. 1415 Michigan Avenue, Chicago.
Lovell Mrs. Adaline, widow of John, No. 1347 West Harrison Street, Chicago.
Lyman Mrs. Sarah Alexander, widow of Daniel, Mendota, Ill.
McNab Mrs. Jesse Guthrie, widow of John, No. 351 West Jackson Street, Chicago.
McNab Mrs. Anna Hamilton Boyd, widow of George, No. 1928 Calumet Avenue, Chicago.
McNab Mrs. Abramine Harmon, widow of Theodore, Boudin, Cook Co., Ill.
Miller Mrs. Barbara Samuels, widow of William, Bloom, Cook Co., Ill.
Mitchell Mrs. Charlotte Elizabeth Yard (Talmadge), widow of John Berry, Lake View, Ill.
Montgomery Mrs. Elizabeth, widow of William L., No. 2518 Cottage Grove Avenue, Chicago.
Moore Mrs. Henry, Norville, Kendall Co., Ill.
Morris Mrs. Lucy P., widow of Groves, No. 1510 Washington Boulevard, Chicago.
Marshall Mrs. Harriet Austin, widow of John, No. 331 West Adams Street, Chicago.
Norton Mrs. Mary, No. 3022 Michigan Avenue, Chicago.
O'Donnell Mrs. Margaret Maria Williams, widow of Patrick, No. 970 Wabash Avenue, Chicago.
Outlaw Mrs. Maria Smith, widow of John, Park Ridge, Ill.
Perry Mrs. Mary Kent Witter, widow of Philip F., No. 2025 Michigan Avenue, Chicago.
Perry Mrs. Amelia C, widow of Charles W., Wicker, Chicago.
Peck Mrs. Anna, widow of John, No. 3248 8th Avenue, Chicago.
Ransdell Mrs. Elizabeth Randle, widow of Peter, No. 408 State Street, Chicago.
Rhino Mrs. Minerva, widow of Henry, No. 278 West Jackson Street, Chicago.

Bowers Mary B., widow of Edward Kendall, No. 259 Ontario Street, Chicago.

Saucer Mrs. Catharine McKibben, widow of James Y., No. 267 Indiana Avenue, Chicago.

Sayre Mrs. Harriet Lovett, widow of William E., Monte Claire, Cook Co., Ill.

Shaw Mrs. Edith, widow of James F., 2106 West Lake Street, Chicago.

Shay Shadrack, widow of Peter, Evanston, Ill.

Sutherland Sr. Mrs. Hiram, widow of John, Evanston, Ill.

Sims Mrs. Laura Brown Sprague, widow of George L., 247 E. Superior, Pacific, Co., Ill.

Stokely Mrs. Jane, widow of Charles G., St. Charles, Ill.

Stout Mrs. Margaret, widow of Ann Hicks, widow of James, No. 566 State Street, Chicago.

Stout Anna, widow of Horace L., Mentor, Ohio.

Swole Mrs. Elizabeth, widow of George W., No. 321 Dearborn Avenue, Chicago.

Soden Mrs. William H., No. 88 Dearborn Avenue, Chicago.

Steele Mrs. Rebecca Allen, widow of Jonathan William, No. 184 Goethe Street, Chicago.

Stin Mrs. Malvin A., widow of Charles, Blue Island, Ill.

Straus-b Mrs. Katherine Berg, widow of Martin, Elgin, Ill.

Taylor Mrs. Mary Olin, widow of Reuben, No. 744 Washington Street, Chicago.

Taylor Mrs. Charles, No. 199 South Peoria Street, Chicago.

Thayer Mrs. Nathan, widow of David, River Forest, Ill.

Train Mrs. Catherine Walter Vogt, No. 515 Clark Street, Chicago.

Tanner Mrs. Catherine, widow of John, Mandan Wash Co., N.Y.

Tyser Mrs. Sarah M. Stout, widow of Elmer, No. 1 Woodlawn Park, Chicago.

Updike Mrs. Mary Towbridge, widow of Peter Lewis, No. 2919 Michigan Avenue, Chicago.

Walker Mrs. A. Fred., widow of Delmar, Elgin, Ill.

Walker Mrs. Euphemia Collins, widow of Ethan, West Northfield, Ill.

Walker Mrs. Hiram, widow of John R., No. 2150 Michigan Avenue, Chicago.

Wells Mrs. Isabella G., No. 320 Prairie Avenue, Chicago.

Wescornt Mrs. William, Riverville, Ill.

Whiteright Mrs. Agnes, Mandan Wash Co., N.Y.

Williams Mrs. Edw. F., Railroad Home, Chicago.

Williams Mrs. Geo. H., widow of John, St. Paul, Minn.

Woodbury Mrs. Sarah Routon Clarke, widow of John, St. Clair, Mich.

Woodruff Mrs. D. W., widow of Ralph, No. 320 Michigan Avenue, Chicago.

Woodworth Mrs. Mary J., Houghton, widow of Hiram P., Evanston, Ill.

Woodworth Mrs. Hannah T., Love, widow of A. A., No. 120 Waveland Avenue, Chicago.

Yoe Mrs. Catherine A. Geare, wife of Peter Lynch, No. 470 Dearborn Avenue, Chicago.

From the Calumet Club record is obtained the following names of pioneers, deceased since May, 1879:

**NAME**

- Edward Kendall Rogers, May 2, 1883.
- Barnard Blaiser, May 3, 1883.
- General Hart L. Stewart, May 4, 1883.
- Thomas Haynes, May 6, 1883.
- Thomas M. McVeigh, May 7, 1883.
- Wm. T. Look, May 8, 1883.
- Richard Kellogg Swift, May 8, 1883.
- Stephen W. Edgell, May 9, 1883.
- Joseph Keelbret, May 10, 1883.
- T. H. N. Head, May 11, 1883.
- William B. Hubbard, May 12, 1883.
- Thomas McCabe, May 13, 1883.
- Edward Benjamin Beaulien, May 14, 1883.
- Joseph K. Keene, May 16, 1883.
- M. A. McCallum, May 17, 1883.
- George M. Homan, May 18, 1883.
- Alexander Wooton, May 19, 1883.
- Eliza E. Bane, May 20, 1883.
- Mary G. Hay, May 21, 1883.
- Horace Parker, May 23, 1883.
- Victor Wike, May 25, 1883.
- John Nolte, May 27, 1883.
- Tamaz Dunkirk, May 28, 1883.
- Frank Sears, May 29, 1883.
- Abram Clarro, May 31, 1883.
- J. W. Henderson, June 1, 1883.
- Hogue E. R. Eustis, June 2, 1883.
- Jesse H. Lemon, June 3, 1883.
- Rev. Henry Blodgett, June 4, 1883.
- Charles McMillan, June 5, 1883.
- Capt. Henry Starks, June 6, 1883.
- William Romay, June 7, 1883.
- George Sullivan, June 8, 1883.
- Henry Dotson, June 9, 1883.
- H. James Sterling Beall, June 10, 1883.
- Hartman Markoe, June 11, 1883.
- Robert Seals, June 12, 1883.
- David Andrews, June 13, 1883.
- Joseph Adams, June 14, 1883.
- Theodorus Dury, June 15, 1883.
- Charles Watts, June 16, 1883.
- Alonzo R. Seratton, June 17, 1883.
- John McFarlane, June 18, 1883.
- George Cheadlefield, June 19, 1883.
- Charles M. Gray, June 20, 1883.
- Colonel Ely Taylor, June 21, 1883.
- Captain Noble, July 1, 1883.

Following are given some sketches of old residents of this city:

**SAMUEL WILLIS GRANNIS,** a native of Marcellus, N. Y., and the son of Samuel J. and Clarissa (Ford) Grannis, was born on July 16, 1813. His father was born in Connecticut, and was a soldier of the War of 1812. The fact, however, was made public when young Grannis was ushered into the world. Mr. Grannis was a shoemaker by trade, and when his son was about three years old, removed to Batavia, Genesee Co., N. Y. He established the shop, and, by his carefulness, he gained the confidence of the people, and his business prospered. He was a man of great honesty, and his integrity was never questioned.
known by him. After his (Morgan’s) disappearance, it was believed by many that he had been foully dealt with by reckless and irresponsible men. It was commonly understood that he was killed on his way from Chicago to the west, and that his body was thrown into the Illinois River.

Mr. Lane was a patient man, and his death was a great loss to the community. He was a man of great resource, and had a wide knowledge of the world. He was a great lover of literature, and his library was a valuable one.

Mr. Lane was the son of David Lane, a wealthy merchant of Chicago, and was born on the 4th of July, 1830. He was educated at the University of Illinois, and was a member of the bar of that state. He was a man of great energy and ability, and was a great help to his father in the management of the family estate.

Mr. Lane was a member of the Illinois legislature, and was a member of the House of Representatives. He was a man of great influence, and was a great advocate of the interests of the state.

Mr. Lane was a member of the Illinois legislature, and was a member of the House of Representatives. He was a man of great influence, and was a great advocate of the interests of the state.
being his present residence. During these years he was variously employed in farming at Brighton, in the teaming and also the packing-house business, he having started the first establishment of the latter class on Blue Island Avenue. After twenty years he retired from business, a wealthy man. Mr. Murphy was married in Pennsylvania, in 1841, to Miss Sarah A. Dempsey. He has four children—John, Joseph, James, and Frank. His daughter, Mary Ann, lately deceased, was married twice, her first husband being John J. Ryan, her second, Louis Stuart. Mr. Murphy bears his years well, and, as an old resident and successful business man, is highly esteemed and well known in the community.

Andrew Nelson was born in Norway, on February 24, 1817, and came to Troy, N. Y., on July 20, 1829. Before leaving his native land he was married to Miss Inger Nelson; they had three children, who, with their mother have deceased. When Mr. Nelson first arrived in this city his occupation was that of a day laborer. In the spring of 1840, he went to work for John Wright, and remained with him until the following spring when he worked for Matthew Laffin, continuing with the latter gentleman for about six years. Mr. Nelson states that he is under many obligations to John Wright, Matthew Laffin and Solomon A. Smith for the interest they always manifested in his welfare and the tangible methods they used to express that interest. In 1845, Mr. Nelson was elected street commissioner for the North Side, in the City of Chicago, which office he held for two years. The same year he was elected a trustee of the first Norwegian Evangelical Lutheran Church in Chicago, and later he was elected treasurer of the same church, which office he held until 1869. In 1856, he was elected city assessor of the North Side, which office he retained for four years. In 1859, he was appointed one of the first Lincoln Park Commissioners, remaining as such until after the great fire of 1871. In 1845, he purchased the property on Superior Street, between Clark Street and Dearborn Avenue, where he has since continuously resided. In 1845, he and Herr Lawson bought twenty acres in Section 27, Township 39, Range 37 East. In the meantime he gradually increased his real-estate business and building operations up to the time of the great fire, by which his losses, in comparison with his means, were very heavy. Since the fire he has been engaged in re-building and managing what property he had left. Being one of the oldest Norwegian settlers in Chicago, Mr. Nelson should occupy a prominent position he does among his countrymen and all his fellow-citizens. In 1849, he was married the second time, to Miss Julia K. Williams; they have had seven children, three of whom are still living.

Devotion C. Edby was born in Rensselaer County, N. Y., on December 23, 1812. He is a son of Tisdale and Elizabeth (Button) Edby, and was reared on the parents’ farm until he attained a sufficient age to enter Kinderhook Academy, where he prepared to enter an advanced class in Union College, and there he took the full literary course, and graduated in the class of 1831. He then commenced the study of law in the office of Marcus T. Reynolds, a prominent lawyer of Albany, and, in 1837, Mr. Edby was admitted to the New York bar. He at once commenced the practice of his profession in the City of Troy, and continued there with splendid success until 1841, when he decided there were much greater opportunities for enriching his possessions in the Far West. He closed up his affairs in Troy, and came to Chicago in the fall of 1841, and from that time to the present he has resided in this city and watched the development of the marvelous metropolis. Mr. Eddy is one of the oldest settlers of Chicago, having about completed his forty-fifth year of residence here. Upon his arrival in Chicago he commenced the practice of law, and later on engaged in the banking and brokerage business, which proved quite successful. Mr. Eddy has been but little identified with civil or criminal practice of law in Chicago, having devoted himself mainly to commercial law and handling of collections for Eastern houses. A few years ago he withdrew from active business life, and is now living a retired life. In politics Mr. Eddy has not been eager for distinction, but, in 1879, he was placed as a candidate on the democratic ticket for representation from the 69th district. The outcome of the election proved him popular, but as it was a republican stronghold he hardly hoped for success. In 1873, he was democratic candidate for senator from the Fifth Senatorial District, but again, owing to the above mentioned fact, the party suffered a defeat. Mr. Eddy was married on July 7, 1843, at Schenectady, N. Y., to Miss Isabella Campbell, of that place. They are the parents of four daughters: Mary, now the wife of Dr. H. R. Stout, of Jacksonville, Ill.; Isabella, now Mrs. Frank C. Bishop, of Chicago; and the other two daughters are Clementine and Marie A. Edby. During his long residence in Chicago Mr. Eddy has lived quietly and unobsta-

tiously, and has ever held the respect of his friends and the esteem of members of the Bench and Bar.

Samuel Beers, one of the earlier residents of Chicago, son of Simon M. and Ann E. Beers, was born at Newton, Conn., on June 13, 1833. In 1847, his parents came West and located on the prairie south of the then small town of Chicago, in the vicinity of Thirty-ninth Street, taking up four hundred and forty acres of land. He assisted his father in farming and in the cattle business, meanwhile proving himself a diligent and intelligent pupil in the public schools, until he reached his eighteenth year. At that time his father's death threw upon him the responsibility of caring for the family, and he gave up his books for an active business life. He continued the farming of a portion of the property and conducted a profitable business in raising and feeding stock until 1862, when the property was divided among the heirs, Phoebe H., George T., William, Cyrenius, and Simon E. Mr. Beers disposed of a portion of his tract and sub-divided another for city lots, from which opera-

---

A.J.N.
College for a short time, studying bookkeeping. He afterward became employed by J. B. Shaw's Parcel Delivery Company, carrying business for the city. After having occupied for some time in this line he went back to the college and studied languages. After completing this course he assisted in his father's grain and feed store, and so continued until he became twenty years of age at which time the school term being over he took a position in Henry Greenbaum's business, as cashier of the Hamburg-Bremen Fire Insurance Company. He acted in that capacity for one year, and was then transferred to the German Savings Bank, where he was employed as bookkeeper. He remained with them for a short time, and then entered Harper's Academy in 1857, and then accepted a position as summons clerk in the office of Sheriff Charles Kern. He did not remain there long, however, until he was requested by the receiver of the defunct Bank to return and assist in winding up its affairs. In company with James T. Foley, Mr. Herting conducted that work until the last statement was made and the receiver had finished his accounting, in 1859. Since then Mr. Herting has withdrawn from active business life and attends to his private property, among which is the Herting Block, at the corner of Clark and Division streets.

In the fall of 1857, Mr. Herting was elected by the Republicans from the 8th Ward to the XXVIIIth General Assembly, and was one of the youngest member of that body, being at the time only twenty-six years of age. He served on the committees on finance, banks and banking, education and enrolled and engrossed bills of a prominent member of the Illinois legislature, Mr. Silliman, of the Constitution devoted upon the XXVIIIth Assembly, and Mr. Herting passed two busy winters at Springfield during the preparation of that body, when the party was Husting movement began. Mr. Herting joined hands with the democratic party, and was affiliated with it. His father, John Herting, whose death occurred in 1851, was prominent in business and political circles, having served as alderman for several years, also as county treasurer.

He was of the well known distilling firm of Lynch & Herting, and at his death left on estate to his family. William A. Herting was married, on August 23, 1870, to Julia H., daughter of Hon. Jacob Minor, of old resident and prominent gentleman of Rochester, N. Y. Mr. and Mrs. Herting's only child, Agnes, died at the age of two and one half years. Mr. Herting is a member of the Bavarian Verein, a social and benevolent organization.

Horace II. Yates may well be classed among the earliest settlers of Chicago, for the date of his residence in this city extending back to 1829. Mr. Yates was born on the west bank of Geneva Lake, in the town of Burton, N. Y., on February 25, 1815, and is the son of Thomas and Olie (Rawson) Yates. His boyhood days were spent upon his father's farm and at the district schools, until he arrived at the age of seven years. When, by the death of his mother, the family was broken up, and he was sent to live with an uncle at Walworth, New York. When he reached the age of ten years his prospects for a future were to remain with him and work upon the farm until he should arrive at his majority. By service he was to receive $150, his board and clothes, and was to be sent to the college of attending the common school during the winter. This he did, and as a result of twenty-one receipts he saved a sum of money which he had so laboriously earned. Leaving Walworth, he journeyed westward to Buffalo, where he purchased two tin trunks, and filled them with a peddler's wares, began a journey on foot to Niles, Mich., selling the contents of his trunks to the farmers on the way. No event marked his journey until he arrived at a point near his destination, when he met an old peddler and disposed of his entire stock, being nearly six dollars other than when he left Buffalo and having completed the entire journey on foot. Arriving in Niles, Mich., he obtained employment with a house-keeper for a short time, and soon after went to St. Joseph, Michigan, where he bought eighty acres of land, and, as the demand for harvest was approaching, readily obtained work among the farmers. Remaining through the harvest, he was sick, which necessitated his return to his former home in New York. The following spring he came to Chicago, arriving in the city early in 1838. He obtained employment with Thomas Church, a half-brother, who, at that time, owned a grocery store at Nos. 11-13 Lake Street. After a year's experience in the employ of his brother he opened a store on his own account on Clark Street, between Lake and Randolph, where he remained six years, selling the first goods to order, which he could obtain at a discount of south of Lake Street, and the last year from a permanently located store. In 1845, he moved to N. Lake Street, enlarging his business so as to comprise croycker ware and nails in addition to a full line of groceries, also dealing heavily in flour and allied products. After three years later, he built a four-story brick store on the corner of Canal and Randolph streets, which was the second building structure west of the river, and the first to be used for business purposes. In 1850, he removed his store to his new store, and after continuing his business for two years at that place, his health compelled him to give up the business entirely. He partially regained his health by hunting and fishing, which are his favorite pursuits, and, in 1853, was appointed assessor of Krimble & Fuller, who failed during the year. For the next two years, Mr. Yates took time to settle up all the affairs which had been a cause of great trouble, and bought mortgages on the property which he had been unable to recover. He died on March 31, 1852, leaving one daughter, now Mrs. S. Chaterdon, of Chicago. Mr. Yates was married the second time on May 10, 1853, to Miss Eliza J. Selkirk, of Erie Co., Penn. They have two children, Edward P. and Mrs. Linnie F. Higgins, of Chicago. Mr. Yates has always attended the Old Settlers' meetings, having never missed one since his institution.

Mark B. Clancy, so well known in Chicago as a large property owner, as an old citizen, and for his long connection with the Methodist Episcopal Church, was born at Mitchelltown, County Cork, Ireland, in 1822. When about eleven years of age he immigrated with his parents to the United States, and in twenty-six years of age, was a prominent member of the firm, the firm which he did not exceed on his account. He found employment on the Gem of the Prairie. He also assisted in the employment of the firm, and bought a tract on the corner of Van Buren and Clark streets for $1,250, his purchase including a house and barn. This is the property which he now owns, and which he has partially used in a house and barn. This is the property which he now owns, and which he has partially used, for the benefit of the Settlers' movement, and in guarding the interests of the Church, of which, for over forty-three years, he has been a member. He has nearly always been connected with it in some official capacity, being at present the first of the trustees. In this capacity he has disposal of his property, which includes the valuable block on the southwest corner of Clark and Washington streets. Mr. Clancy was married, in 1844, to Mary L. Coburn, a native of New York State. They have five children living.—William M., Merrill C., Frank B., Sarah (Mrs. George W. Shaw), and Laura A. (Mrs. J. L. Clancey).

Edward Simons (dec.) was born at Lebanon, Grafton Co., N. II., on January 20, 1811. His father's name was Lewis Simons, who was a native of Enfield, Conn., whom he removed to New Hampshire about 1772. In 1818, he moved with his family into Ashitabula County, Ohio, where he remained for about seven years. When sixteen, he entered a general store at Conn- naugh as a clerk, and there he remained for seven years, or until he came to Chicago, where he was on April 15, 1834. His first business engagement here was in a wholesale market, in company with Mr. Marsh. It was known as the Boston Market, and besides selling meat to the people of the town they furnished that staple to the general public. After three years in the business, he formed a co-partnership with Archibald Cblogurn in the same business, which lasted until the spring of 1839. The business depression of 1837 to 1840, reached both Chicago, and Mr. Simons concluded to open a firm in lieu of the provision business; he then purchased a quarter-section of Government land, about five miles northwest of the present county-house square, in the town of Jefferson, and removed to it on June 7, 1838. That was a fortunate move for
both himself and his heirs—-it made them all rich. The next nine years of his life was spent in quiet development of his farm property, but at the end of that period the city began to look up so brilliantly that he sold his farm and went into business again. He married with a general stock of goods at No. 40 W. Randolph Street, and moved into the city. For the next four years he prospered financially, but the city was too much to the health of his family. He returned to his farm and to his oldest children. After a couple of years he moved his family back to his farm, and tried to run it with hired help; this however not working well he finally sold out his store altogether, and returned to the farm life himself, realizing Ben Franklin's proverb that

"He that by the plow would thrive, Himself must either hold or drive."

From this time onward to the close of his life, on August 30, 1856, he lived quietly and unostentatiously on his farm. His hospitality was celebrated, and his farmhouse was always open to friend or stranger. It was situated just far enough for a pleasant drive from the city, and his tables and his barns were always full of his friends and their horses. In later years, especially when old memories were becoming more and more endeared to him, his home was the happy and constant resort of the old settlers of Chicago, and the memory of the good times they used to have at his hospital school will linger long with the survivors. He became acquainted with Miss Laura B. Sprague, who was teaching school, the first one started in the then little hamlet of Joliet; she was the daughter of Howe Sprague of Erie County, N. Y., who came West in the early days of the settlement first in Illinois, but afterwards removed to Vernon in Lake County. On December 17, 1837, they were married, and from the union there sprung seven children. One of these, surviving Junius, a practicing lawyer of Washington, D. C.; Almira, the wife of Frederick A. Winkel- man; Edward, residing on that part of the old estate owned by him; and Charles B. Simons, in partnership with his brother-in-law, Mr. W. W. Gage. Miss Simons, still resides at the old homestead with abundant means at her command, the center of the affection of her family and esteemed by a large circle of warm friends. As an instance of the progress in real values in the vicinity of Chicago, it may be mentioned that the farm mentioned above, in 1838, cost Mr. Simons the entrance fees at the Government land office, was worth at his death not less than $2,000 an acre. The whole 40 acres, and while it lies on his farm, its position on three sides saves a deal of trouble in taxation by remaining outside. The village station of Almira, on the branch of Milwaukee & St. Paul Railway, is built on it, and a flourishing community is springing up all over it. Mr. Simons at the time of his death was a member of the Second Universalist Church of this city, and was an excellent, honest and a charitable man. Though too advanced in life to take active part in the War of the Rebellion, Mr. Simons contributed liberally of his means to fund the good cause and sent two of his sons to the front. Junius, whose health prevented his entering the ranks, became a hospital nurse, but afterwards was of a more robust constitution, enlisted in the Chicago Mercantile Battery early in 1862, and served with credit during the War.

CHARLIE B. SIMONS was born at Jefferson on March 7, 1834, and graduated at the Jefferson College. The first school in a free school- ship, where his father resided. He began his business career in 1855, when he entered the ranks of the followers of the "Art Preservative" and adhered steadfastly to his course for eight years. He then left the printing business and entered the real-estate business.

JACOB GROSS is one of the oldest settlers of Chicago, his residence in this city dating back to 1837. He was born on the Rhine, Germany, on July 11, 1809, and is the son of Jacob and Catherine (Schlafer) Gross. According to the customs of his native country, he was placed in the public schools at the age of six years, and was a constant attendant until he arrived at the age of 6. His father, a sugar-refiner, brought him into his business, and it was a farmer, for two years, when he apprenticed himself to learn the weaver's trade, finishing his apprenticeship on the attainment of his majority. At the age of twenty-one, he entered the German army, and as a private in the cavalry. Obtaining a furlough of three years, he secured employment during that time as a coachman to a German nobleman. At the end of that time he received an honorable discharge from the army, and soon after came to America, arriving in New York in 1835. For two years he was employed in New York and its suburban towns, and, in 1837, journeyed westward, reaching Chi- cago on July 11, of that year. At the time of his arrival, he had some money to buy the team he had been driving; for $300, lacking $50 of the purchase price, for which he gave his note as security.

Among his acquaintances was Thomas Cook, the veteran drayman of Chicago, who had been engaged in teaming from this city to Galena and Peru. Mr. Cook invited Mr. Gross to join him in carrying freight overland, and Mr. Gross readily assented, and for fifteen years thereafter was engaged in overland freighting between Chicago and Galena. Meanwhile, in company with his brother, he had left several other hireling stables, retiring from active business in 1852. Mr. Gross was married, in 1841, to Miss Elizabeth Kiefer, of Chicago. They have five chil- dren.—Michael, Katie, Elizabeth, Jacob and Matilda. He is a member of Lessing Lodge, No. 557, A. F. & A. M., and always endeavored to live as instructed by the tenets of the Order. During his declining years, his mind is replete with pleasing memories of his early struggles upon the vast prairie, which is now the Great West Division of the City of Chicago, and when that locality had not a habitation upon it.

NATHAN S. PECK was born in Onondaga County, N. Y., on December 3, 1828. He came with his parents to Chicago in 1836, and during the same year his father, Joseph W. Peck, bought a farm near Lockport, Ill. He remained upon his father's farm three years, and then moved with him to Riverside, Ill., and en- gaged with Solomon and A. J. Cahill in the melting of silver, which they had acquired by going into partnership with the employer of his father, who was then proprietor of the Pavilion Hotel, at No. 958 Lake Street, at which farmers were accustomed to receive accommodations. He was married with his father until his death, in 1863, when he went to Naperierville. On his return to Chi- cago, about one year later, he opened a bakery on North Clark Street, and later moved to Halsted Street. One year afterward he built three ovens at Nos. 275, 275 1/2 and 277 Randolph Street, the firn being Peck & Co., a branch being established at the corner of Madison and Morgan streets. He continued business successfully until 1857, when he sold out, and retired. He was married on April 12, 1853, to Miss Augusta, A. F. & A. M. of Naperville. V. Forbes, the first sheriff of Cook County. They have six children: Nina E., wife of A. B. Wait; Arthur S., Joseph W., Emma F., Harry V., and Nathan S., Jr. Mr. Peck is a member of Euclid Lodge, No. 65, A. F. & A. M., of Naperville.

IROQUOIS CLUB.

A desire to form a substantial society in the form of a social club that should be representative of progressive democratic principles, induced a number of leading democrats, nearly all of whom were prosperous business men, and including a large proportion of young men, to form what is now widely known as the Iroquois Club of Chicago, a society organized two years, by a committee of four, the interest was taken at a meeting held in the Palmer House reading-room. Those present on this occasion were James P. Grund, Robert H. Patton, Thomas M. Hoyne, Dr. L. C. Waters, Edward O. Brown, James T. Hoyne, Edward Forman, Clinton C. Snowden, Walter Mattocks, J. H. S. Quick, Frank G. Hoyne, Alexander Coignard, S. S. Gregory and Emmett C. Fisher. These gentle- men, with others who speedily joined them, at once formed an association under the title of the Chicago Democratic Club. At the meeting above mentioned Thomas M. Hoyne presided, and Robert H. Patton was secretary. A committee of five was appointed to prepare a constitution and by-laws, consisting of John H. S. Quick, James P. Grund, Dr. L. C. Waters, Robert H. Patton and Edward O. Brown; and a committee of three was named on permanent organization.—C. C. Snowden, James P. Grund and Edward O. Brown.

The present address of the Iroquois Club was appointed represented, and the following were declared the officers for the first year:

President—Perry H. Smith, Jr.
Vice-Presidents—First Congressional District, Thomas M.

Recording Secretary—Robert H. Patton.
Corresponding Secretary—Dr. L. C. Waters.
Treasurer—Frank G. Hoyne.

At the third meeting, held on August 3 following a committee to actively direct the work of the club in the coming presidential campaign was named, consisting of Henry M. Shepard, chairman, Emmett C. Fisher, George Mills Rogers and Louis Palmer.

One of the immediate objects of formation having been for service during the Hancock campaign, the club took an active and uniting part all through the contest, both individually and by its concerted action. Two mass-meetings were held under its auspices, of which it defrayed all expenses. As a culmination of its demonstrations, a grand parade took place on the night preceding the election, in which the club occupied the post of honor as a mounted body.

On December 14, 1880, further steps were taken towards solidifying the organization. At this meeting the following preamble and principles were adopted:

The undersigned, believing that it is the duty of every good citizen to take not only a deep interest, but also an active part, in the political affairs of the country; and believing, further, that the welfare of the country and the continual prosperity of its institutions require for their preservation that the policy and character of the Government shall be determined and guided by the principles of the Democratic party; and in order to add to the organized strength of the Democratic party in Chicago, have formed ourselves into a club known as the Chicago Democratic Club.

PRINCIPLES.

First. The largest liberty of the individual consistent with public order.

Second. Local self-government.

Third. Opposition to centralization.

Fourth. The separate independence of the legislative, executive and judicial departments.

Fifth. Recognition of the Supreme Court of the United States as the proper tribunal for the final decision of all constitutional questions.

Sixth. An indivisible union of indestructible States.

Seventh. Strict maintenance of the public faith.

Eighth. Public office a public trust, admission to which should depend on proved fitness.

Ninth. Tariff for revenue only at the earliest practicable period consistent with a due regard for existing interests and the financial needs of the Government; and, immediately, such a revision of the present system as shall fairly and equally distribute its burdens.

One or two meetings for further discussion of an enlargement of the club's social functions were held, till, on July 15, 1881, a committee of four, consisting of F. G. Hoyne, H. W. Goodman, S. G. Swisher and Lawrence M. Ennis, was appointed to look up permanent quarters. All business meetings had up to this time been held in the reading-room of the Palmer House.

At an ensuing meeting, on September 6, fifty-seven new members were reported, and the committee appointed in July recommended the third floor of Haverty's Theater, on Monroe Street, for the club-rooms. The association, at its next meeting, on October 4, after a lively discussion changed the name to the Iroquois Club. Officers were then elected as follows:

President—Erskine M. Phelps.
Vice-Presidents—First Congressional District, J. H. S. Quick, T. M. Hoyne, Dr. Robert Hunter; Second Congressional District, Carter H. Harrison, S. G. Swisher, C. L. Bonney; Third Congressional District, E. J. Stokes, V. C. Turner, Malcolm Caruthers.
Recording Secretary—E. C. Fisher.
Corresponding Secretary—F. G. Hoyne.
Treasurer—J. H. McAvoy.

On the following eighth of December, the club took formal possession of its first club rooms, the third floor over the present Columbia Theatre, which was divided into an office, reception, reading and dining rooms. Speeches were made by Hon. S. Corning Judd, E. M. Phelps, Hon. Thomas Hoyne and others.

On March 15, 1882, after a very successful winter as an organized social and political club, a banquet was given in honor of the birthday of Andrew Jackson, at the Palmer House. Covers were laid for about four hundred on this occasion, and toasts were responded to in person by Thomas A. Hendricks, William F. Vilas, L. Q. C. Lamar, W. C. P. Breckenridge, Lyman Trumbull, Frank H. Hurd, James R. Doolittle, Henry Watterson, William J. Allen, Richard T. Merrick, John C. Black and Carter H. Harrison, nearly all statesmen of national reputation. The second and third annual banquets of the club, of April 13, 1883, and April 15, 1884,—the former commemorative of Thomas Jefferson, the founder of Democracy,—brought altogether a like distinguished assemblage, making it the just boast of the Iroquois Club that the first men of the land have partaken of its hospitality.

With the growth of the club and the gradual gain to its ranks of the best representative element of the party in Chicago, came an added desire for activity, albeit on somewhat more conservative lines. Early in 1883, a resolution was passed restricting the action of the club as an organization in local politics. At a regular meeting on December 5 preceding, a committee was appointed to prepare a memorial to Congress on behalf of the club, on the subject of the acceptance the Illinois and Michigan Canal, and the completion of the Hennepin Canal by the General Government. The committee, consisting of Lyman Trumbull, Carter H. Harrison, M. W. Fuller, S. Corning Judd, W. G. Goudy and Henry Waller, Jr., duly prepared a memorial, a copy of which was sent to every delegate to Congress.

The labors of the club in the last presidential campaign began early in 1883. At a meeting held on April 3, a committee was appointed to take measures to secure the meeting of the National Democratic Convention in Chicago. This committee, composed of Erskine M. Phelps, S. Corning Judd, Frank G. Hoyne, M. W. Fuller and Hon. Thomas Hoyne, visited the East early in the summer, and consulted with leading members of the party and the National Committee. As a result of their labors, Chicago was promised second choice by Eastern Democrats as the place of meeting, in case of first choice falling at Saratoga. The committee then addressed itself to Western and Southern members of the party, and as the result of its untiring efforts, Chicago was finally selected.

At a regular meeting held on March 4, 1884, the club emphasized its views on the tariff question by the passage of the following unanimous resolution:

Resolved, That the members of the Iroquois Club desire to record their high appreciation of the courageous, patriotic, and intelligent services to the cause of revenue reform, rendered at the present session of Congress by the Hon. William K. Morrison, of
Illinois; and they wish further to express their conviction that the measures proposed by him for the relief of a people oppressed by the burden of a partial and unjust scheme of taxation are well calculated to awaken the public conscience; and that the interests of all classes demand their speedy adoption by both Houses of Congress."

On September 9, 1884, a committee of ten was appointed to arrange for all meetings and work during the campaign. This committee consisted of E. M. Phelps, F. G. Hoyne, R. J. Smith, John H. Prentice, James T. Hoyne, Thomas E. Courtney, Charles Kern, J. E. Callahan, Asa Dow and S. S. Gregory, and continued in session till after the November election. An advisory committee, to act with the chairman of the State Central Committee, was also appointed, consisting of Julius S. Grinnell, Martin J. Russell, C. P. Kimball and Henry Waller, Jr. A fund, amounting to $10,000, was collected and disbursed by the club during the campaign. Lexington and DeKalb, Illinois, were visited in a body, the members of the Iroquois forming an important force in large demonstrations at both places. Two general mass-meetings were held in Chicago during the campaign, and a Bayard and a Watterson meeting, on the occasion of the visits of these distinguished standard-bearers of the party, all under the management of the executive committee of the Iroquois Club. On the night of November 8, following the election, the club appropriately celebrated the victory, in which it had borne its full part, and, on March 4, participated in the inauguration ceremonies at Washington.

Among minor items, the club defrayed the full expenses of the chairman and secretary of the State Central Committee in Chicago during this campaign.

After the discovery of frauds on the ballot during the election, the club took characteristic action by the appointment, on December 2, 1884, of a committee to investigate and to aid in the prosecution, consisting of Edmund Jus sen, chairman, I. N. Stiles, F. H. Winston, J. K. Boyesen, T. M. Hoyne, R. J. Smith and Malcolm Caruthers. It also passed unanimously the following resolution:

"Resolved, That the members of this club demand that the local prosecuting officers, both State and Federal, share in the effort to ascertain the truth as to the dishonest and fraudulent conduct charged against the officers of the late election in the second precinct of the Eighteenth Ward in this city, and others implicated therein, and also exert every legitimate means to bring those who are guilty to justice, irrespective of their party affiliations and of all political considerations whatever; and that this organization pledges its cordial and hearty support to these officers in all their efforts in that direction."

The club at present numbers an active membership of three hundred and seventy-five representative Chica-

**VIEW OF IROQUOIS CLUB HOUSE.**
also among the club's possessions, and chief among its treasured relics is an autograph letter of Thomas Jefferson to Edmund Pendleton of Virginia, dated at Philadelphia, March 24, 1783, announcing the receipt on that day of the first settlement of the peace preliminaries at Versailles, which resulted in the formal declaration of the United States as a free nation. This valuable autograph letter was presented by William H. Harbut, of New York City.

The officers of the Iroquois Club, omitting those already given, have been—

1839—President, Thomas M. Hoyne; Vice-Presidents—First Congressional District, J. H. S. Quick, Robert H. Patton, H. W. Goodwin; Second Congressional District, George M. Rogers, Stephen G. Stephenson, Henry Waller; Third Congressional District, S. S. Gregory, W. M. Le Moyne, Edward J. Stokes; Secretary, Frank G. Hoyne; Corresponding Secretary, Dr. L. C. Waters.

1839—President, E. M. Phelps; Vice-Presidents—South Division, J. H. S. Quick, T. M. Hoyne, Edward Forman; West Division, Carter E. Harrison, S. G. Swisher, George M. Rogers; North Division, E. J. Stokes, Cornunger Judd, Malcolm Carrothers; Secretary, M. E. Bremer; Corresponding Secretary, Frank G. Hoyne; Treasurer, J. H. McAvoy.

1839—President, E. M. Phelps; Vice-Presidents—South Division, John H. McAvoy, George Bohnen, Charles Kern; West Division, Carter E. Harrison, R. J. Smith; George M. Collins; North Division, S. C. Judd, H. S. Gregory, S. W. Warren; Secretary, E. M. Boddle; Corresponding Secretary, Frank G. Hoyne; Treasurer, Edward Forman.

1839—President, Stephen S. Gregory; Vice-Presidents—South Division, B. Lowenham, Paul Morton, Samuel D. Farling; West Division, R. J. Smith, George P. Holmes, Thomas E. Courtney; North Division, Potter Palmer, W. G. McDowell, A. F. Gilmore; Secretary, T. Ewing; Corresponding Secretary, Edward Forman; Treasurer, D. T. S. Hoyne.

Esrkin M. Phelps, ex-president of the Iroquois Club, was born at Stonington, Conn., on March 31, 1839. His father, Charles H. Phelps, was a member of the largest drygoods firm in the city of New Orleans from 1815 to 1835, the firm being Phelps & Ballock. He was making a trip on the steamer "Lexington," on Long Island Sound in the latter part of 1839, and the ship went down with the passengers being among those lost. The main name of the mother of Esrkin M. Phelps was Ann R. Hammond, whose father was one of the oldest and best known merchants of New Orleans, having carried on business there for over thirty years. The son, Esrkin, was educated at Williston Seminary, East Hampton, Mass. After completing his studies he went into the banking house of Allen, Cupp & Needham of St. Louis. He remained there some time, but on account of the health restored, went to East, and located in Boston, where he continued two years. In 1844, he came to Chicago, and with George E. Dodge established the now well-known house of Phelps, Dodge & Palmer. Mr. Phelps was married in 1856, to Miss E. Wilber, of Lancaster, Mass. During his twenty-two years' residence in Chicago Mr. Phelps has been a conspicuous figure in the mercantile history of the city, and has ever shown a hearty interest in all matters pertaining to the development and growth of western trade. In social matters he has also been prominently identified, having for a long time been a member of the Columbian and Chicago Clubs of the Washington Park Club since its organization, and of the Manhattan Club of New York. For many years he has been a trustee of Hahnemann Hospital, and a large contributor to the support of that institution. When the Iroquois Club was organized, Mr. Phelps was honored by an election to the presidency of that organization, and so highly esteemed is he by the club members that he was re-elected a series of resolutions by the club, expressing their regret at the loss of his valuable services as president.

George Bohnen, senior of the firm of George Bohnen & Co., was born in Buffalo, N. Y., on November 20, 1845. He was brought up there, and received a first-class classical education. At the age of seventeen he entered the wholesale glassware and crockery house of W. H. Glenny & Co., of Buffalo, but only remained one year, coming to Chicago at the end of that time, in 1863. On arriving in this city he took a position with N. F. Merrill, wholesale dealer in lamps and glassware. That line of trade was then in its infancy as compared with its proportions to-day, and the house of N. F. Merrill the pioneer of the West. The demands of the times required improvements, and during his leisure hours, Mr. Bohnen exerted himself toward the perfection of something new and novel in that line. In 1871, he perfected his invention and placed upon sale Bohnen's Patent Liquid Lamp, the first of the kind ever offered to the public. He has since originated the great variety of library lamps now so largely in use. He afterward invented the double extension library lamp, the parabolic receiving and reflector being on the principle of chandeliers. All of Mr. Bohnen has taken out eighteen or twenty patents for various devices in lamp-trade originated by him. From an employee in the pioneer lamp house of Chicago he has risen to a proprietorship of the same, and the success which has followed his efforts has been well earned. Mr. Bohnen is a widower, having one son, George Hunt Bohnen. Since the organization of the Iroquois Club he has been a member thereof, and is now one of the vice-presidents representing the South Division of the city, and is also chairman of the house committee. He has not been active in political matters, but takes a hearty interest in democratic institutions. He is also a member of the Douglas and Washington Park clubs.

Benjamin E. Bremer, ex-recording secretary of the Iroquois Club, has been one of the most enthusiastic members of that organization and, up to a recent date, has been closely identified with the workings of the club. He was born in Bergen County, N. J., on August 18, 1834, and was reared to manhood in his native State. He was educated at private schools, and also took a two years' course of study in the University of Michigan. He moved to Chicago, in 1858, since which time he has been almost wholly identified with the house of Rathbone, Sand & Co. Since May 1879, he has been connected with the firm, and his reputation for integrity and general worth has been with his employment on account of the popularity he has so long held among the members of the Iroquois Club. In the organization of the latter institution he took an active part, and in 1882, he was elected to the office of recording secretary; in 1883, was made vice-president, representing the West Division, and in 1884, he was tendered and again occupied the position of recording secretary, the duties of which he performed to the highest satisfaction of both officers and members. At the election of January, 1886, he was tendered and urged to retain his official position, but was obliged to decline owing to the work incumbent upon him in his commercial life.

Edward Forman, corresponding secretary of the Iroquois Club, was born in Tioga County, New York, on February 10, 1820. He was there reared and educated, attaining his elementary studies at the common schools and afterward preparing for entrance into a collegiate institution. His health failed him and he was obliged to forego the completion of his higher education, and instead decided to come West. He located in Chicago in 1855, and took a position in the house of N. M. Appleton, which was later consolidated into the firm of Appleton & Fisk. He is now entering upon his twenty-third year of service in that house, and since the incorporation of the firm has been one of the stockholders. When the Iroquois Club was being formed, Mr. Forman took great interest in its organization, and was identified with the organization of the club. He was elected one of the first vice-presidents, representing the South Division of the city, and was re-elected a second term of office in the spring of 1882, and again in all three years. In January, 1884, he was made treasurer, and a year later was nominated to the office of corresponding secretary, to which he was elected by a large majority. Always a staunch democrat, he has taken great interest in National politics, and has been an earnest worker in the ranks of the party, although never an aspirant to official honors in the Government service. Mr. Forman was married on June 15, 1871, to Miss Carrie Clarke, daughter of Henry B. Clarke, one of the early settlers of Chicago.

COMMERCIAL CLUB.

The first meeting for the organization of the Commercial Club was held at the Chicago Club-house, on the evening of December 27, 1877. At this meeting there were present J. W. Doane, L. Z. Leiter, J. H. Walker, A. A. Sprague, H. J. Macfarland, William T. Baker, Anson Stager, N. K. Fairbank, W. A. Fuller, George C. Clarke, Edwin Keith, Murry Nelson and John J. Jones. These were enrolled as members of the Commercial Club to be called the Commercial Club of Chicago, and in addition Marshall Field, C. M. Henderson, C. P. Kellogg, John Crear, John M. Clarke,
SOCIAL PROGRESS.

405

John B. Drake, and George M. Pullman were elected members. A second meeting was held on January 19, following, at which the officers were chosen: President, J. Z. Leiter; Vice-President, J. W. Doane; Treasurer, Murry Nelson; Secretary, George C. Clarke. Application was made to the Secretary of State for a charter, the objects of the incorporation being the discussion, at stated meetings, of questions of local polity and economy from a strictly non-partisan point of view. The last Saturday of each month from October to June was chosen as the time of meeting. On these occasions, after partaking of dinner, the members present to the open discussion of the topics chosen for the evening, due notice of which has been previously sent to each member by the secretary.

The membership at the beginning was selected from among the leading business men of Chicago. The club has followed in its constitution and aims the plan of the Commercial Club of Boston, of which it is in some measure the offspring. Two years after its organization it gave a dinner to General Grant, as retiring president, on which occasion two hundred and twenty distinguished guests from Boston, New York, Philadelphia and St. Louis enjoyed its hospitabilities. In like manner, President Garfield and Lieutenant-General Sheridan have been received by the club. It has been the custom of the club, since its organization, to invite any distinguished person present in the city at the time of its monthly dinner, to a seat at its board. Among other practical benefits which have followed its discussions, may be mentioned the establishment of the Manual Training School for mechanics and artisans, on Michigan Boulevard, which was built and equipped entirely from the subscription of $100,000 contributed by the members of the Commercial Club, and has since been governed by an executive committee selected from its roll.

The club, as a body, has made four notable trips since its organization. The first of these occurred in June, 1879, when on invitation of the distinguished club of Boston bearing the same name, and the father of all like organizations in the country, became its guests for four days. The visit was repeated in June of the present year, the sister clubs of St. Louis and Cincinnati joining in the excursion. The Chicago club was distinguished through an address by its able president, Franklin MacVeagh, on the higher aims of mercantilism, which has since been widely copied, and become in some sort the accepted exposition of the doctrines of the leaders of trade throughout the country. The club has also been entertained at St. Louis and Cincinnati by the Commercial Clubs of those cities, whom it has in turn received here.

The monthly meetings have been held from the first at one of the four leading hotels, in alternation. The membership of the club numbers sixty, and is fixed at that limit. No active part is taken in any public movement, the policy of the club being of an eminently conservative stamp, and its aim to be a beneficial factor through indirect but not less potent influences.

The officers of the club, in addition to those already given, have been—

1879—President, John M. Clarke; Vice-President, George M. Pullman; Secretary, George C. Clarke; Treasurer, A. F. Seeberger.

1880—President, Franklin MacVeagh; Vice-President, George M. Pullman; Secretary, George C. Clarke; Treasurer, John B. Drake; Executive Committee, John DeKoven, Lyman J. Gage, Thomas Murdoch.

ILLINOIS CLUB.

The Illinois Club was chartered April 26, 1878. The charter membership numbered about fifty prominent residents of the West Side, nearly all of whom were business men. The first officers of the club were—President, John G. Rogers; Vice-President, S. H. McCrea; Secretary, O. P. Dickison; Treasurer, S. W. Rawson. The first board of trustees consisted of A. Courtney Campbell, H. Z. Culver, O. P. Dickinson, Wiley M. Egan, George Gardner, Frederick S. James, S. P. McConnell, S. H. McCrea, S. W. Rawson, John G. Rogers, A. A. Sprague, R. L. Tatham and P. B. Weare. The objects of the club were stated in its charter to be "the cultivation and promotion of literature and the fine arts, and of social intercourse." In connection with the second feature the Illinois Art Association was formed a few years later from the members of the Illinois Club, and there is now in the gallery of the club-house a collection of notable paintings, the results of its labors.

The first home of the club was the residence on Washington Street, near the corner of Elizabeth Street, where they remained two years. Thence a removal was made to the building on the southwest corner of Ashland Avenue and Madison Street. In 1884, the club purchased of J. Russell Jones the fine residence on Ashland Avenue, between Adams and Monroe streets. The building is a handsome structure of brick, with stone front, three stories in height and was greatly enlarged two years since by the addition of a wing containing the present art-hall, library, assembly-room, billiard-room, bowling-alley, etc.

The present membership is about three hundred and fifty. Many clergymen are among the honorary members of this club, and the list includes Bishop Samuel Fallows, Rev. A. K. Parker, Rev. James Blake and Rev. Luther Pardee.

The officers of the club have been—

1879—President, J. W. Doane; Vice-President, S. H. McCrea; Treasurer, S. W. Rawson; Secretary, O. P. Dickison.

1880—President, S. H. McCrea; Vice-President, A. A. Sprague; Treasurer, J. F. Lawrence; Secretary, O. P. Dickison.

1887—President, Richard T. Crane; Vice-President, S. N. Wilcox; Treasurer, S. W. Rawson; Secretary, O. P. Dickison.

1889—President, John G. Rogers; Vice-President, R. J. Smith; Treasurer, W. A. Hammond; Secretary, Rev. William A. Farr.

1892—President, J. Harley Bradley; Vice-President, Simeon H. Crane; Treasurer, W. A. Hammond; Secretary, Fred K. Morrill.

1893—President, J. Harley Bradley; Vice-President, Simeon H. Crane; Treasurer, William A. Hammond; Secretary, Fred K. Morrill.

1895—President, Simeon H. Crane; Vice-President, Alon E. Clark; Treasurer, William A. Hammond; Secretary, W. E. McQuiston.

JEFFERSON I. FULTON, of the well-known firm of J. I. Fulton & Co., was born at Zanesville, Ohio, on April 1, 1826. At the age of twelve he removed to Cincinnati, and there finished his education in the common schools. His first venture in business life was at an early day, when he engaged in the hat and cap trade at Covington, Ky. He was so identified for some time, and when his attention was drawn to a new system of street-paving, he sold out and, in 1866, engaged in that occupation, with which he has been identified. He opened business in Cincinnati and continued successfully up to 1869, when he decided to go to Europe and investigate the system of asphalt paving. He remained at Paris about
one year making observations of the matter, and while there had a volume in reference to the manufacture of asphalt translated from the French into the English language. On his return to America he removed his business to Chicago, and, in the spring of 1870, laid the first asphalt pavement ever put down in Chicago, at the intersection of Monroe and Clark streets. It proved a success, and the business has consequently increased largely from year to year. The firm of which he is a member is engaged in the manufacture of asphalt and Portland cement paving, and has its headquarters at No. 175 LaSalle Street. The business was originally established

in 1863, in Cincinnati, Ohio, and, in 1870, was removed to this city, and since coming here the management has won a high reputation for the excellence of all work performed by them. They make a specialty of asphalt paving and also largely handle Portland cement in connection therewith. The first work performed by the firm in Chicago was at the intersection of Clark and Monroe streets, in 1870; and since they have laid pavement all over Chicago, as well as surrounding cities in this and other States. Among the finest specimens of their work is the asphalt roadway and Portland cement sidewalk at Rosalie Villa, and their work on the Farwell buildings, Marshall Field's buildings, Sibley's warehouses, C. H. McCormick's estate, Adams & Westlake's new buildings, and many others attest the superiority of their work. The firm is among the largest in the West, and they have, during the past sixteen years in which they have operated in this city, laid many miles of roadway and pavement. Mr. Fulton is a member of the Builders' and Traders' Exchange, and of the Union League and Illinois Clubs. He became a member of the Masonic fraternity at Covington, Ky., in 1863, and is now a member of Chicago Commandery, No. 19, K. T. He was married on May 3, 1859, to Miss Eugenie Fonds, of Cincinnati, Ohio. They have two children,—Lester and Gertrude. Mr. Fulton is a genial, courteous gentleman, and is highly esteemed in commercial circles for his honorable business methods and strict integrity.

THE UNION LEAGUE CLUB.

The Union League Club of Chicago was organized late in the fall of 1879. The first call for a meeting, in October, 1879, bears the signatures of Lewis L. Colburn, Luther Laffin Mills, William Aldrich, William Penn Nixon, S. J. Hanna, Samuel J. Medill, Hiram Barker, Jr., Philip A. Hoyne, Consider H. Willett, C. S.

in 1870; and since they have laid pavement all over Chicago, as well as surrounding cities in this and other States. Permission of Inland Architect and Builder.

UNION LEAGUE CLUB HOUSE.

Squiers, C. H. Salisbury, E. R. Bliss, E. G. Keith, and Ira W. Buell. On December 5, following, these gentlemen met in the club-room of the Sherman House, and drew up a petition for a charter, which, with a copy of the proposed by-laws, was forwarded to the Secretary of State at Springfield.

On January 20, 1880, a meeting was again held at the Sherman House, to take permanent action under the charter, which had been received, dated December 19, 1879. This document authorized the incorporation of the Chicago Club of the Union League of America, which was the name first adopted.

The articles of association stated the objects of the organization to be the following:

1st. To encourage and promote, by moral, social and political influence, unconditioned loyalty to the Federal Government, and to defend and protect the integrity and perpetuity of this Nation.

The condition of membership shall be absolute and unqualified loyalty to the Government of the United States.

The primary objects of this association shall be:
has always been foremost in carrying out the primary objects of its incorporation. Loyalty to the Union has been its watchword, and the guarding of the purity of the ballot one of its first missions. With this end in view, the League was active in unearthing fraudulent voting in the election of the fall of 1884, and bringing to justice all concerned in it. The present election law owes its existence to the labors then undertaken by the club, and continued unremittingly until its adoption was secured. In the Federal elections, the club has co-operated with its officers, offering rewards for the detection of illegal voting.

The club has now a membership of seven hundred, including an honorary roll which contains the names of four ex-Presidents (two deceased), three of the most distinguished living American Generals, an Associate Justice of the Supreme Court of the United States, and several jurists and statesmen of national fame.

The officers of the club from its organization have been as follows:

1888—President, Elbridge G. Keith; vice-presidents, Charles M. Henderson, J. McGregor Adams; treasurer, George M. Bogue; secretary, Rollin A. Keys.

In addition to the officers, three standing committees and a board of seven directors constitute the executive staff.

**UNION CLUB**

On January 17, 1878, twenty-five young men, representing the best element of the social and business life of the North Division, met at No. 308 Chicago Avenue, to discuss the formation of a social club in that part of the city. A committee was appointed, consisting of H. W. Raymond, A. W. Cobb, Arthur Ryerson, A. Davidson, J. L. Houghteling, C. N. Fessenden, 0. F. Aldis, W. P. Conger and F. S. Wheeler, to report at an adjourned meeting, on January 26. This committee soon learned that the same question had been considered by a number of older men resident on the North Side, and their cooperation was invited. As a result, about sixty gentlemen met in the parlors of the Clarendon Hotel, on the evening of January 26, when a constitution was drafted, and the following officers, of an organization to be called the Union Club of Chicago, elected for one year:

President, Henry W. Bishop; Vice-President, Henry W. Raymond; Treasurer, Albert W. Cobb; Secretary, William P. Conger.

On February 1, the committee on membership reported one hundred names enrolled. The constitution was formally adopted, and a committee appointed to take the necessary steps for incorporation. On February 7, the club received its charter. The residence on the corner of Chicago Avenue and State Street was first rented, whence the club removed, March 10, 1879, to the Ogden mansion, on LaFayette Place. Here it began a new era of life as a social organization. A leading feature of this period was a series of open-air concerts given during the summers of 1879–86–81, in the fine grounds of the club-house.

At the business meeting of March 1, 1879, the board
of directors was increased, by the addition to those already named, of John DeKoven, R. Hall McCormick, V. C. Turner and James J. Hoyt. On April 8, following, the limit of membership was raised, on account of the increasing growth of the club, from two hundred to three hundred; in February, 1880, the limit was increased to four hundred. Negotiations in the summer of 1880, to buy the Ogden property, then occupied as a club-house, did not reach a consummation, and the club at once set about providing for itself a permanent home, which resulted in its removal, in December, 1883, to the club-house at present occupied. This is a stone

building, in the Tudor style, finished with an air of solidity and comfort that have been the envy of many metropolitan visitors. In the matters of taste, comfort and convenience, the house leaves little to be desired. The building is of Long Meadow Mass., brown stone. It was begun in the spring of 1882, under contract for completion by May, 1883. In April, 1883, it was destroyed by fire, the loss being entirely covered by insurance. It was re-built without delay, and the club established therein the following December. The interior follows the style emphasized in the exterior, the design being to reproduce, as nearly as possible, an old English manor-house. The cost was about $500,000. The present membership of the club is four hundred and seventy-two.

The following is a complete register of its officers since 1878:

1879—President, Henry W. Bishop; Vice-President, Henry W. Raymond; Secretary, William P. Conger; Treasurer, Albert W. Cobb.

1880—President, Henry W. Bishop; Vice-President, John DeKoven; Secretary, William P. Conger; Treasurer, Albert W. Cobb.

1881—President, Henry W. Bishop; Vice-President, John N. Jewett; Secretary, William P. Conger; Treasurer, Albert W. Cobb.

1882—President, Henry W. Bishop; Vice-President, John N. Jewett; Secretary, William P. Conger; Treasurer, Albert W. Cobb.

1883—President, Henry W. Bishop; Vice-President, A. A. Carpenter; Secretary, William G. McMillan; Treasurer, Albert W. Cobb.

1884—President, August A. Carpenter; Vice-President, Lyman J. Gage; Secretary, Henry A. Keith; Treasurer, Albert W. Cobb.

HISTORY OF CHICAGO.

The Standard is a social club composed chiefly of Jewish citizens, and numbers among its members many of our leading business men. It occupies the building erected for its accommodation in 1879, on the corner of Michigan Avenue and Thirteenth Street. The club was organized early in 1869, and on April 5 received its certificate of incorporation. The officers for the first year were—President, E. Frankenthal; Vice-President, L. Wimpold; Treasurer, D. Stettauer; Recording Secretary, Philip Stein; Financial Secretary, H. Goodman. The first board of directors was composed of Gerhard Foreman, Joseph Austrain, H. L. Frank, J. B. Schlossman. The objects of the club are stated in the articles of incorporation to be “the mutual improvement of members, to be effected by social gatherings,
dramatic entertainments, the establishment of a library, and the pursuit of such other purposes as are generally considered to be within the scope and object of a club.

On the New-Year day of 1870, the organization celebrated its removal to its present quarters by a ball. In October, 1871, the organization gave up the club-house to the relief work of the city. The building continued to be, for about a year, the headquarters of the Central Relief Committee, during which period the club suspended its activity.

In the fall of 1872 the club re-occupied its quarters, and a considerable sum was spent in repairing and refurnishing the club-house.

The club has taken steps looking to the erection of a new club-house, the present quarters being inadequate to properly accommodate the growing membership. The current membership is about two hundred. The club borne to a natal State, and to revive old memories among the sons of the Green Mountain State.

The following 17th day of January being the one hundredth anniversary of the declaration of independence by the State of Vermont, was the occasion of a large and interesting reunion, which included many residents of the city distinguished in State and local councils. A permanent organization, under the title of the Sons of Vermont, was consummated at a third meeting, held February 22, in the parlors of the Tremont House.

Quite a large membership was enrolled at this meeting, and the following officers were elected: President, D. K. Pearsons; Vice-Presidents, Charles B. Lawrence, Norman Williams, S. W. Burnham; Treasurer, Henry H. Nash; Secretary and Librarian, A. D. Hager.

An annual banquet is given on January 17, and other pleasant re-unions are held. Business meetings take place when necessary, at the call of the secretary, being usually held in the club-room of the Palmer House.

The present membership is two hundred and nineteen, of which one hundred and seventy-seven are resident in Chicago, twenty nine in the State outside of the city, and eleven in other States.

The officers of the association have been as follows:

1879—President, Charles B. Lawrence; Vice-Presidents, E. G. Keith, Ezra J. Warner, E. A. Kilbourne; Secretary and Librarian, Frank B. Williams; Treasurer, Henry H. Nash.
1880—President, George N. Boardman; Vice-Presidents, E. G. Keith, O. G. A. Sprague, Eugene Canfield; Secretary and Librarian, Frank B. Williams; Treasurer, Henry H. Nash.
1881—President, Norman Williams; Vice-Presidents, O. G. A. Sprague, L. L. Coburn, Eugene Canfield; Secretary and Librarian, E. B. Sherman; Treasurer, H. H. Nash.
1882—President, L. L. Coburn; Vice-Presidents, O. G. A. Sprague, F. N. Waterman, Sanford B. Perry; Secretary and Librarian, E. B. Sherman; Treasurer, Henry H. Nash.
1883—President, E. G. Keith; Vice-Presidents, Silas B. Cobb, H. E. Sawyer, E. A. Kilbourne; Secretary and Librarian, E. B. Sherman; Treasurer, Henry H. Nash.
1884—President, John H. Hills; Vice-Presidents, Norman Bridge, E. B. Sherman, A. D. Hager; Secretary and Librarian, Franklin Denison; Treasurer, Henry H. Nash.
1885—President, Arlo N. Waterman; Vice-Presidents, E. B. Sherman, John M. Thacher, J. W. Butler; Secretary and Librarian, Franklin Denison; Treasurer, H. H. Nash.

SONS OF VERMONT.

In response to a call for a meeting of native Vermonters, a number of gentlemen assembled in the club-room of the Sherman House on the evening of January 19, 1877. The meeting was called to order by Lewis Meacham; Gurdon S. Hubbard was chosen president, and Frank B. Williams, secretary. The purposes for which an organization was to be formed were set forth, in an open letter from Hon. D. K. Pearsons, read at this meeting, to be the perpetuation of the love and respect

SONS OF MAINE.

On March 12, 1880, a meeting was held in the club-room of the Gardiner (now Leland) House, which was called to order by Leonard Swett, J. S. Brewer acting as secretary. Among those present at this meeting, were Abner Taylor, C. P. Kimball, J. L. Hathaway, A. A. Libby, J. J. P. Odell, and C. P. Libby. A committee, consisting of Messrs. Kimball, Odell and Taylor, was appointed to prepare a constitution and by-laws for an organization to be known as the Sons of Maine. At an adjourned meeting on March 19, the constitution was read and adopted, and permanent officers were elected for the first year, as follows:

President, Hon. Thomas Drummond; First Vice-President, Hon. Leonad Swett; Second Vice-President, John Young Scammon; Secretary, J. S. Brewer; Treasurer, J. J. P. Odell.

In the winter of 1880–81, it was determined by the society to give its first banquet, and committees were appointed to carry out its plans. The banquet was arranged to take place at the Palmer House on July 4, 1881. Invitations were sent to the Governor and all ex-Governors of Maine, to the two United States Senators, and to many distinguished natives of the State, who were met in Boston by a member of the executive committee, Henry A. Hersey, and accompanied to
Chicago in a special car as the guests of the association. Among those present on this occasion were Hon. Humbert Hanlin, Hon. Ellhu B. Washburne, of Chicago; ex-Governor Garcelon, of Maine; Hon. Henry W. Paine, of Boston, Hon. Bion Bradbury, of Maine, and Hon. C. A. Boutilier, of Maine. The feature thus successfully inaugurated has since been continued by the Sons of Maine yearly, with but one omission.

The club, which is composed of natives of the State of Maine, includes some of our leading citizens. It is now engaged in the formation of a library.

The present officers of the association are—

President, John N. Jewett; Vice-Presidents, Melville W. Fuller, Leonard Swett, Aaron Taylor; Secretary, C. H. Howard; Treasurer, William Sprague; Directors, Charles H. Kirkland, James P. Smith, Jr., J. B. Hobbs, Charles M. Morse, J. V. Scammon, Benjamin V. Page and C. H. Muliken.

IRISH-AMERICAN CLUB.

The Irish-American Club is composed of men of all creeds and parties, the only principle insisted on as a requisite to membership, being an acknowledgment of Ireland's right to be governed by and for her own people, as an independent nation. It thus includes in its ranks many Americans and one English member. The organization was effected in May, 1882, by a number of prominent Irish citizens interested in the cause of their native land. Social features were included from the inception, the club leasing a fine suite of rooms at Nos. 38 and 40 Washington Street, which it has continued to occupy. Two formal receptions are given annually, in the spring and autumn, by the members of the club to their friends, and the association appropriately celebrates, by a banquet and ball on St. Patrick's day, the anniversary of the patron saint of Ireland. The latter entertainment usually takes place at some leading hotel. They have received and entertained all distinguished Irishmen who have visited this country during the past five years, including T. M. Healy, M.P., T. P. O'Connor, M.P., Rev. Eugene Sheehy, and other notables. The membership now includes nearly every prominent Irish-American resident of Chicago, and the club is a flourishing, energetic and representative body.

The following is a list of the officers from the first organization:

1882-83—President, William J. Hynes; Vice-President, Michael Keeley; Recording Secretary, John McKeough; Financial Secretary, Henry O'Rourke; Treasurer, Peter J. Hanley.

1883—President, Michael Keeley; Vice-President, J. McHugh; Recording Secretary, M. J. Keene; Financial Secretary, William Foyart; Treasurer, Patrick Cavagnagh.

1885—President, Travis Agnew; Vice-President, Ambrose Hamond; Recording Secretary, F. D. Kinsella; Financial Secre-
Sheldon reported that the Gilpin Fund, now amounting to over $72,000, had been secured from the estate of the late Hon. Henry D. Gilpin, of Philadelphia. He further stated that he and George F. Rumsey had sold the brick, stone and iron from the ruins of the Society's building for $2,668, and had received from Mr. Scammon, on account, 3,475, which amounts had been applied to the payment of interest, incidental expenses and also to paying $4,000 of the principal of the Society's indebtedness, reducing the latter to $13,500.

Among the contributions for the relief of those who had suffered by the great fire, were many boxes of books directed to the Chicago Historical Society. In the second great fire on July, 1874, this collection was also burned. A catalogue of the books, and copies of the letters of acknowledgment and a few portraits, were all that were saved of this collection. Owing to this last calamity, and the panic of 1873, little was done for a time, except keeping alive the organization and attending to its financial interests; very few books were received, and these were mostly Government documents. Mr. Sheldon took them in charge, and kept them till May, 1877, at his office on Clark Street.

On December 19, 1876, Hon. Isaac N. Arnold was elected president. He continued in office till the time of his death, April 24, 1884, since which time Hon. E. B. Washburne has occupied the position.

At a meeting held on January 23, 1877, George F. Rumsey, in behalf of the executive committee, solicited funds for the erection of a building and to enable the association to start again its active existence of usefulness. The following members responded to the appeal, and subscribed as follows: E. H. Sheldon, George J. Dunlap, Levi Z. Leiter, John Cerrar, W. S. Johnson, Mark Skinner, Samuel M. Nickerson and William B. Ogden, each $250. George F. Rumsey, J. S. Rumsey, J. S. Waterman and E. T. Watkins, each $100. Charles H. Farwell, $85 and two hundred chairs, and John F. Ryerson, $25. With this amount, and $135.25 taken from membership dues which had been paid prior to December 11, 1877, the present building was erected and paid for.

In May, 1877, Albert D. Hager was elected secretary and librarian.

The nucleus of the Society's third library, consisting of about two hundred books, were removed from Mr. Sheldon's office to Room 44, Ashland Block, gratuitously provided for the Society's use by D. M. Mitchell, agent for General S. B. Buckner. On October 16, 1877, the present building was finished and the first meeting held in it. At that date, the library contained seven hundred and three bound volumes and eight hundred and thirty-four pamphlets.

The Historical Society received at the death of Mrs. Henry D. Gilpin her bequest of $6,000; Jonathan Burr donated to the Society $2,000. Mrs. Elizabeth E. Atwater, a former resident of Chicago, died at Buffalo, on April 11, 1878. Her collection, which she donated to the Society, is one of the finest in its possession. On January 31, 1879, occurred the death of Miss Lucretia Pond, of Petersham, Mass., a parishioner of Rev. Wm. Lucia Barry, through whose influence she bequeathed to the Society eight lots on the southwest corner of Superior and Market streets, with all her books, maps and paintings. The income derived from the sale of these lots (which brought $13,500) was to be used for the purchase of books, maps and paintings. The conditions of the will have been complied with, and the library is enriched with one thousand four hundred and twenty-seven volumes purchased with this income.

The memorial tablet which marks the site of the old Fort Dearborn, and placed in the building on the corner of River Street and Michigan Avenue, occupied by the W. M. Hoyt Co., was unveiled, May 21, 1881, in the presence of the First Illinois Regiment and a large concourse of citizens, and under the auspices of the Society. The tablet is of marble, and upon its upper half is a bas-relief of the old block house, while beneath is the following inscription:

This building occupies the site of the old Fort Dearborn, which extended a little across Michigan Avenue, and somewhat into the river as it now is. The Fort was built in 1803 and in 1804, forming our outmost defense. By order of General Hull, it was evacuated August 15, 1812, after its stores and provisions had been distributed among the Indians. Very soon after the Indians attacked and massacred about fifty of the troops and a number of citizens, including women and children, and the next day burnt the Fort. In 1816, it was re-built, but after the Black Hawk War went into gradual decay, and in May, 1877, was occupied by the association which now owns this site till the great fire of October 9, 1871.

At the suggestion of the Chicago Historical Society, this tablet was erected by W. M. Hoyt, November, 1880.

Thereat, John Wentworth made a memorable speech to the immense concourse of spectators, which appears in full in the account in the Fergus Historical Series, No. 16.

At 1881, a tablet was placed in the front of a dwelling, No. 137 DeKoven Street, under the auspices of the Society, to mark the site on which the great fire of October, 1871, originated.

The Society was burdened with a mortgage debt of $13,500 contracted in 1858. The interest on this was a constant drain upon the treasury of the Society, and frequently an extra tax upon its most valuable members. In 1882, L. Z. Leiter, a member of the executive committee, suggested that the debt should be paid, and started a subscription with $2,500. Judge Mark Skinner, E. H. Sheldon and Henry J. Willing each gave the same amount. Daniel K. Pearson, Samuel M. Nickerson, Albert A. Munger and Byron Laffin Smith each gave $1,000, and Thomas Hoyne completed the sum needed to pay the debt by subscribing $500. The Society now entered upon a period of prosperity. Twenty-five new members were added within six months. The first and second volumes of the Society's collection were published, and one year later the third volume. L. Z. Leiter paid for the first two volumes and Marshall Field for the third volume, which cost over $1,600. The library now contains over forty-eight thousand books, bound and unbound. The collections comprise rare and valuable works, and are especially noted in certain departments, among them the following:

Indian History and Early Explorations.—This is considered by many the most valuable historical matter, when measured by its rarity and completeness, of any in the Library. All of Schoolcraft's works are here—his "Indian Antiquities," "Source of the Mississippi," "American Lakes," "Travels in the Mississippi Valley," "Thirty years with Indian Tribes," etc. Also, Brinon's "Library of Aboriginal American Literature," and his other writings, 8 vol. Thwavenr's "Recueil de Voyages," including Marquette's journal and map of 1673. Herrera's History of America, 6 vol., 1740. Parkman's "Frontenac and New France," "Iroquois and the Discovery of the Great West," and other of his writings. Sheas works. Jeffrey's "History of the French Domin-
HISTORY OF CHICAGO.

Mr. Kellogg, which he presented to the Chicago Historical Society, another to the representative of Tasmania, another to the Mercantile Library of Philadelphia, and three were retained by Messrs. Rowell & Kellogg. The most valuable is the complete run of the catalogue of the newspapers and magazines printed in the United States at that time. All these are bound, and make 47 volumes of folio, 7 quarto and 28 octavo volumes. A large portion of the State is there so large, varied and valuable a collection of historical data bearing upon the events which go to make up Chicago and the lives of her prominent men that at these rooms and the Count de Salle's room contains, from 1834; the proceedings of the City Council and County Board of Commissioners from 1871; complete reports of the Board of Public Works and of the Park Commissioners; an invaluable series of city directories, from 1848; a complete run of the historical series, containing the directory of 1839; and valuable contributions to local and State history by those who have helped to make the events of which they speak. There are a dozen local histories and biographical dictionaries; fifteen scrapbooks containing newspaper clippings from home prints, which make up an interesting history of early Chicago; three large scrap books arranged by Charles Harrod, containing obituaries of those who have died in Chicago and also of prominent persons in all parts of the world. These are all catalogued and so arranged that the date of any person's death, in either book, can be readily found. There are also reports of her benevolent and secret societies; governments and wars since 1832; a very large and complete series of maps, manuscript and printed, of Chicago, indicating by their dates the rapid growth of the city; and nearly continuous files of newspapers from 1834, up to date, including the only material extant from which to collate a history of the Great Fire.

The Atwater Collection.—This is the unique collection owned by the Society, containing about eighteen thousand, six volumes and pamphlets; over one hundred medals and metallic badges, including the political badges of 1840 and those worn on the Chicago Sanitary and Millwaukie Home fair; over seven hundred coins and metallic business cards, including a complete set of American and Colonial pence, except the issues of 1793 and 1804-9; and much continental and Confederate money. There are also autograph letters, letters, newspaper scrap books, and eighteen volumes of newspaper and pamphlet prints. From 1782 to 1850, the autograph letters of the presidents, and hundreds of newspaper slips in regard to the death of Abraham Lincoln, nicely bound into volumes, with badges worn at his obsequies. Mrs. Atwater contributed a curious collection of patriotic envelopes, comprising three thousand different specimens; relics from Shiloh, Corinth, Chickamauga, Fort Sumter, of the Great Fire, the Arctic regions and the world generally. A large folio volume of "Scenes from Rome," printed from copperplate in 1757. She also donated a fac simile of the death warrant of Charles I. The manuscript collection consists, among other coins, of medallions, about the size of a penny, stamped with political devices, including a large group of "shipplasters:" also numerous specimens of Confederate and "Wildcat" money. There are also English bank tokens and some counterfeit bank notes. Included is the Federal Cabinet, Pennsylvania, including Franklin's famous penny and paper money. There is also the facsimile copy of the gold medal presented by forty thousand French workmen to Mrs. Lincoln, in memory of her husband. The specimens of newspaper and paper tokens differ in their business houses: Chicago, Illinois, Wisconsin, Indiana, Michigan, Ohio, New York and Pennsylvania, with the collection of fractional currency, are both unique and of historical value.

Other Valuables.—The most imposing work of art in the Society's rooms is the allegorical painting of the Chicago fire, the famous Armitage painting of Britannia and Columbia ministering to the stricken Chicago. It was presented to the city shortly after the great fire by the London Graphic. There is also a large painting representing the Chicago massacre, and portraits of John H. Kinzie, Daniel P. Cook, Governor Ninian Edwards, Edward Coles, J. B. Rice, Thomas L. Hoyne, William H. Brown, Isaac N. Arnold, John Wentworth, William B. Ogden, and Deardorn, Mr. and Mrs. George Flower, Shab-oo-nee, Christopher Columbus, American Venus, Chevalier La Salle, and others. A cabinet of curiosities, mostly from Mexico and Peru, is the gift of Rockwell Sayer, of the firm of Clement & Sayer. The collection of autograph letters and other manuscripts is very large. It includes the entire run of the private papers of E. K. Kane, Judge J. Gillespie, Colonel Gabriel Jones, Captain John C. H. Ellis, Horatio Hill, Zebina Eastman, David Trickett, A. P. French, and others. The latter are signed and autograph letters from Henry Clay, John C. Calhoun, and other noted statesmen, and were presented by Ninian W. Edwards.

Among the collections may be mentioned the volumes containing badges and original documents relating to the Grant reception of November, 1879, and the National Republican Convention of
1850, also the documents relating to the Republican and Democratic Conventions and campaign documents of 1884.

The religious literature of the Society comprises, among other rare works, twenty-two versions of the Bible, in different languages. All of Swedenborg's works are here, and the Religious Society of Friends (Quakers) has a very complete representation.

The "Saints' Herald" of the Latter Day Saints (Mormons), from 1832 to 1875, The North Star, also of the Mormon sect, November, 29: "Times and Seasons," 1859-45; and the "Millennial Star," and a large and very rare collection of other Mormon literature, manuscript, and records, are in the library. Among the latter is the Book of Mormon in English; and also, in a peculiar phonetic style that requires a "key" for its translation, "Doctrines and Covenants," "Life of Joseph, the Prophet," and several other very rare books and manuscripts relating to the expulsion of the Mormons from Illinois.

The Library contains a large number of colleges and school catalogues. The American Educational Society has its catalogue bound within volumes from 1852 to 1885. The American Colonization Society reports from 1815-85, five volumes. The American Tract Society from its organization (1825) to 1885. The Society also possesses a unique collection of school books, in the "Pond Library," dating from 1762 to those of more modern days. Railroad reports the Society has a very large number, including nearly or quite complete series of the annual reports of every railroad that enters Chicago.

There are five tables that record and fold marked, showing the routes of all the railroads leaving the city, all of which are bound into an atlas.

The officers of the Historical Society, since 1874, have been as follows:

President—Edwin H. Sheldon, 1874-75; Isaac N. Arnold, 1876-83; E. R. Washburne, 1884-85.

Treasurer—Solomon A. Smith, 1874-78; Byron L. Smith, 1879; Henry H. Nash, 1880-85.

Elish B. Washburne was born at Livermore, Oxford Co., Me., on September 25, 1816, and is a lineal descendant of John Washburne, secretary of the Council of Plymouth. His father kept a general country store, where the son made himself generally useful and gathered much information from the political and social issues of the neighborhood who there congregated and discussed the newspapers, and the local and national issues at the country establishments, and, previous to his seventeenth year, had exhausted the circulating library. He then went into the office of the Christian Intelligencer, published at Gardiner, Me. The young man's experience which he obtained in the printing office was of great value to him, bringing to his notice many men of prominence who resided there, especially George Evans, then a member of Congress. It was during this period that the republican principles, which had been sown in his mind by his father, were strengthened so that they ruled his political life. The paper, however, failed, and, returning to his home, he obtained the position of teacher of a district school, at a compensation of ten dollars a month, with board. His three months' apprenticeship brought the rebellious school into submission, and he entered the office of the Kennebec Journal, the leading paper of the state, then edited and published by His. Luther Swenson. He commenced his apprenticeship in May, 1835, but on account of failing health, caused by over-work, he abandoned the newspaper profession, never to return to it, and to study law. In the spring of 1836, he left Portland, and commenced study at Kent's Hill Seminary. After a reasonable course of preparation, in 1838, he entered the law office of John Otis, of Hallowell, a distinguished member of his profession, a representative in Congress, and subsequently a member of the Northwestern Boundary Commission. To that gentleman's credit be it said that he afterward advanced Mr. Washburne sufficient money to enter Cambridge Law School, which he did in March, 1839. Having graduated, he returned to Maine, and after a time moved to New York, where he remained two years. He also pursued a course of medical study at Woodstock, and, after graduating, removed to Chicago. He entered the Illinois bar, and engaged in the general practice of the law, moving to Ogle County, Illinois, and engaged in farming, but he required a larger scope for his active mind and business ability, and shortly afterward removed to this city, engaging in the real estate business. He sold land for the Illinois Northern Railroad, Michael Sullivan, the farmer king, and others, his sales in Illinois
alone amounting to more than one million acres. In 1860, he began loaning money, chiefly as agent, on farm lands. This soon grew into a considerable business, and for twelve years he loaned an average of $1,000,000 annually. In 1857, Mr. Pearson retired from the loaning business, so far as acting for other capitalists was concerned, his own affairs having assumed such extensive proportions as to require his whole attention. He is now the owner of farms, tracts of land and timber in Michigan, Illinois and elsewhere, a director of the Chicago Chamber of Commerce, Chicago City Railway Company, the Metropolitan National Bank, and other leading institutions. He is an earnest and active Democrat and an acceptable stockholder in the stock which he elected alderman from the First Ward, by far the most important political district of the city. While chairman of the finance commission, the financial condition of Chicago was deplorable, but Mr. Pearson's management had so far outstripped the exigencies of the time, that a dividend was paid, and the company's credit restored. It was thought that in this manner Mr. Pearson had made an income that an indebtedness largely in excess of the constitutional limit had been created, while the city had issued certificates of indebtedness, the legality of which was disputed in the courts. Meanwhile, large numbers of these certificates had been taken by eastern bankers and others, and the holders had become alarmed at the situation. Hard times were still lurking gloomily through the land, and capital was averse to almost every new proffer of investment and solvency for its securities everywhere. Chicago was soon to need more money and had particular necessity for the maintenance of its good financial name. At this juncture there appeared among the bankers of New York, an earnest, straightforward sort of man, just in from the West; he was known, personally or by reputation, to some of them, and was not long in making himself understood by the others. He had come officially as a member of his city's Governmental Council, and was regarded as a capitalist and man of honor, like themselves, to assure them that Chicago was going to pay its debts. He pledged his individual word, and that of his city, that no matter what he might be, so long as this was not broken, he would do all in his power to have no matter how courts might decide, no matter how long financial depression might brood over the Nation, Chicago was sure to meet its certificates of indebtedness, principal and interest, promptly on time, dollar for dollar. The eastern financiers believed him and believed in the city he represented. Their fears were allayed, and he returned home. His word to them was so well kept, and his predictions so well verified, that some time later, when Chicago needed a little ready money, the same man moved among the eastern social capitalists, and easily raised half a million dollars. This he did, despite the fact that the courts, in the interrim, had decided the many discussed certificates to be practically worthless paper, illegal promises to pay, which the city might repudiate if it pleased, but which the city never did. The man who made these two memorable journeys was Daniel Kimball Pearson, and so pronounced was their effect upon the financial standing of Chicago, that when Mr. Pearson retired from the Council, two years later, a committee of citizens waited upon him, and, in a series of handsomely engrossed resolutions, testified their appreciation and that of the city for his liberal and effective work in this and other important matters. As the resolutions said, Mr. Pearson held his office "with the approval and plaudit of his entire constituency, regardless of party affiliation." At the end of his term, he took his retirement from political life, and, having drawn from business, and invested largely in choice residence property, chiefly in the Northern Division of the city. He erected a fine residence in a short time, which was the owner of some fifty elegant houses and flats, which he still retains. For a few years he has been traveling extensively, having visited Europe twice and all the American States. His charity is of the unostentatious order, but if his right hand does not always know the effect of his giving, it is not because the latter is idle. Most of the charitable institutions count him among their steady contributors, founding libraries, assisting young men and women to obtain educations, and dispensing large amounts in private. Mr. Pearson was married many years ago to Miss Marietta Chapin, of Western Massachusetts. Mr. Pearson has for many years attended the First Presbyterian Church, although other churches are not unfriendly to his presence and contributions. Mr. Pearson is unconventional in manner, his liberal and personal independence manifesting itself in an absence of all affectation. He is highly domestic in his tastes, the society of wife and a few of the friends whom he really likes, suits him better than more diversified and mixed social enjoyments. He was among the founders of the Vermont Society of Illinois, and one of its first presidents, while he has also been an earnest and active member of the Chicago Historical Society, and a liberal giver to the Presbyterian Hospital and now its acting president.

ALBERT DAVID HAGER, son of David and Hannah (Cary) Hager, was born at Chester, Vt., on November 11, 1817. He learned the carpenter's trade from his father, and mastered it at the age of twenty. In the summer of 1839, he entered the employ- ment of a map publisher, and in the sale of his goods, traveled through Ohio and Kentucky. During his travels, he became much interested in fossils, many of which he collected and took with him to Vermont, on his return there from Kentucky. When again at home he resumed his trade as a carpenter, and devoted every leisure moment to it. In 1847, he married Miss Julia A. Wheeler, buying a farm, which he cultivated for five years, and then he resumed his trade. In May, 1852, he received a McCormick reaper at his place at W. It is a very early one of the manufacture of the company, and he was for five years a farmer, after which he returned to Vermont and married Miss Amherst, Mass. This father of American geology accepted the position, with the condition that Mr. Hager should be his first assistant and do most of the field work; under which arrangement the geological survey of the State was completed in 1861, and, by order of the Legislature, was published by Mr. Hager. In February, 1857, a fire at Montpelier, Vt., destroyed the State House, including the cabinets, etc., and Mr. Hager was made curator of the State cabinets, and subsequently State Geologist. In 1858, Mr. Hager helped to form the Proctorville Library Society, of which he was for many years president, and of which he was the first treasurer. In 1859 he recommended and drafted and secured the passage of the existing general law of Vermont, authorizing towns to raise money for founding and supporting public libraries. In 1860, he again became interested in pisciculture, and was appointed commissioner; under his direction 50,000 salmon eggs were incubated and 40,000 hatched out, the largest number then produced in the United States. In 1867, the Governor and Mr. Hager, presented the Paris International Exposition as a representative of Vermont exhibitors. In 1870, he received the appointment of State Geologist of Missouri, and there rendered efficient official service, but his anti-slavery tendencies made him personally unpopular. He thereupon resigned that position, and sought, in travel, to repair the inroads on his health caused by his exhaustive labors. While travelling in Wisconsin, he met Miss Kosco F. Blood, to whom, in 1872, he was married. They both became interested in the libraries, and on reaching Chicago were proffered the positions of superintendent and matron, respectively, of the Washington Home in this city, which positions they filled for eighteen months. In May, 1877, Mr. Hager became secretary and librarian of the Chicago Historical Society (and to assist the Society in its rehabilitation, worked gratuitously for one year), a position which he has filled until the present day. For several years he has been a member of the corresponding secretary of the Vermont Historical Society. He has written many articles for the public press on scientific and historic subjects; and, in 1871, he read a paper before the Academy of Science in St. Louis, suggesting that the stratum of ammonites was the result of coraline life of the Devonian age; this theory is one that is generally accepted by scientists of the present age. In 1875, he received the degree of Master of Arts; in 1882, he was elected a member of the Imperial Geological College of Vienna, and before his departure for Europe, in 1887, was commissioned by Lafayette Lodge, A. F. & A. M., of Proctorsville, Vt., its representative to the Grand and Scorial lodges in Great Britain, and on the Continent of Europe. He had been for many years an officer of the Grand Lodge of Vermont.

CHICAGO PUBLIC LIBRARY.

The Chicago Public Library had its origin in the sympathy felt for Chicago by England after the great fire of 1871. In addition to money subscribed for the aid of fire-sufferers by the people of Great Britain, while Chicago was still in ashes some liberal-minded English gentlemen realized that this city had been the benefit of what few libraries existed previous to the conflagration, and, with Thomas Hughes and other eminent men of letters at their head, started a subscription to amass this loss. The money thus collected included the largest reading collection then in the city, that of the British Association, embracing eighteen thousand volumes. The founders of the movement made an appeal throughout England for books; and authors, societies and
Mr. Hager was born in 1795 in Vermont, the son of a well-to-do farmer. He was educated at the local academy and subsequently studied law. In 1820, he moved to Cincinnati, Ohio, where he practiced law and established a successful legal practice. He was a prominent figure in the legal community and was known for his dedication to public service.

In 1830, Mr. Hager moved to Chicago, where he continued his legal career. He was instrumental in establishing the city's legal and educational institutions. With a passion for education, he was a key figure in the establishment of the University of Chicago and the Chicago Public Library.

Mr. Hager was a lifelong advocate of education and was known for his contributions to the field of law. He was a member of numerous legal societies and was respected for his expertise in constitutional law. He was also a prominent figure in the abolitionist movement and served as a delegate to the 1848 Convention in Hardscrabble, New York.

Mr. Hager was married twice. His first wife was Elizabeth Smith, and they had three children. His second wife was Sarah Ann Hager, and they had four children. Mr. Hager is remembered as a man of integrity, dedication, and philanthropy.

In 1860, Mr. Hager was elected to the Illinois State Senate, where he served until 1865. He was a strong supporter of the Union and played a key role in the passage of the Illinois Volunteer Act, which allowed for the creation of a volunteer militia.

Mr. Hager died in 1870 at the age of 75. His legacy lives on through his contributions to the city of Chicago and his dedication to education and public service.
The library was supported wholly by public taxation, the State allowing a tax of one dollar on the dollar valuation, which was laid for the express purpose of the maintenance and extension of the library. Under the direction of the librarian, its operations became thoroughly systematized, and proved a vast benefit to the community. By 1885, there were 111,621 volumes in the library, and the expenses aggregated $54,330.72, with $121,382.24 of the fund of 1877, 1878, 1879, 1884 and 1885 to the credit of the library. With the circulating department open for the delivery of books three hundred and fifty days during the year, 159,698 volumes had been taken out for circulation. Average circulation of 1,704; $3,088 had been received for fines; and 65,271 volumes had been through the six branch stations established in various portions of the city.

The table given is a summary of library statistics from 1875 to 1885:

William Frederick Poole, L.L.D., librarian of the Chicago Public Library, is a descendant, in the eighth generation, of John Poole, who came from Reading, England, with the first settlers of Wolcott, Colony, and who resided in Cambridge in 1742, and, in 1793, was the leading proprietor in the settlement of the town of Reading, Mass. The parents of William Frederick were Ward and Eliza (Wilder) Poole, and he was born in Salem, Mass., on December 21, 1821. He received his early education in Danvers (now Peabody), Mass., leaving school when twelve years old. In 1834, he resided in Keene, N. H., and learned something of the jeweler's trade. In 1836, his father's family having removed to a farm in Worcester County, Mass., he worked on the land; and, returning to Danvers, he engaged as clerk in a mercantile house, and also learned the trade of a tanner. In 1838, he entered Leicestcr Academy, where he fitted for college, teaching in a district school one winter, and, later, was employed as an assistant teacher in the Academy. In 1842, he entered Yale College, and at the end of his freshman year was obliged, for financial reasons, to give up his studies temporarily. During the three years following, he was engaged in teaching and other employment. He then returned to Yale College, entered the sophomore class, and graduated in 1847. During the last term of his sophomore year, his first step in this direction was to prepare, during his junior year, an index to the bound sets of periodicals in the library, which proved to be of immense value to the students, and was published by George P. Putnam, in New York, in 1848, under the title, "Index to Periodicals to Which no Table of Contents is Published," 174 pages, octavo. During his senior year (1848-49), he was the librarian of the Society. The edition of the "Index"
being soon exhausted, the author immediately began the preparation of a larger and more exhaustive work on the same general plan, under the title "Index to Periodical Literature," 524 pages, octavo; it was published at New York City in 1853. In 1852, a third edition of this work was issued, in which the references were carried down to January of that year. It made a royal octavo volume of 1499 pages, and is regarded by him as the crowning work of his literary life. In 1854, he became assistant librarian of the Boston Athenaeum, and in the following year librarian of the Boston Mercantile Library. He remained there for four years, and during that time prepared and printed a catalogue of the Library. In May, 1858, he was elected library agent of the Boston Athenaeum. The Athenaeum Library was then the largest library in Boston. He continued in this position for thirteen consecutive years. He was in the position of a literary expert, for the organization and management of libraries. During 1859, he organized the Brown Library, at Waterbury, Conn.; re-arranged and catalogued the Naval Academy Library, at Annapolis, Md.; selected and purchased the books, and was the general adviser in the management of the Newton and Easthampton (Mass.) public libraries and the Athenæum Library of St. Johnsbury, Vt. In the autumn of the same year, he was invited, as an expert, to organize and take charge of the Cincinnati Public Library, with which he continued for four years. In October, 1873, he was elected librarian of the Chicago Public Library, and entered upon his duties on the first day of January, 1874. His services as a library expert have been constantly in demand in the organization of libraries and the construction of library buildings in all parts of the country. Besides those of which he has been the librarian, he has organized eight or ten other libraries, selecting and buying the books, cataloguing them, and the aid of trained assistants, and arranging all the details of administration, without, in more than half the instances, ever visiting the locations. One of "The Organization and Management of Public Libraries," in the United States Board of Education's "Report on Public Libraries," 1876, is the standard authority on the subject. His numerous papers on "Library Construction," printed by the Bureau of Education in the Library Journal and the Architect, and in separate forms, are accepted as the highest authority in the last edition of the Encyclopedia Britannica. The Library Journal, for September, 1885, has a paper by him on "Small Library Buildings," in which is given a list of his earlier papers on the subject. Dr. Poole is now the president of the American Library Association, the membership being the principal librarians of the country. For thirty years he has been a constant writer, and, outside of the topics relating to his own profession, his writings have been chiefly in the direction of American history and historical criticism. In 1854-55, he edited, in Chicago, a literary monthly called The Owl; and since the starting of The Dial, in 1858, he has been a constant contributor, chiefly in historical criticisms. He received the degree of L.L.D. from the Northwestern University in 1882. He is a member of the American Antiquarian Society, the American Historical Association, and the Essex Institute, and corresponding member of the Historical Societies of Massachusetts, New York, Pennsylvania, Maryland, Wisconsin, and other States. Dr. Poole was married on November 22, 1854, to Miss Fanny M. Gleason, daughter of Dr. Ezra W. Gleason, of Boston, and of seven children, four are living—Alice (wife of Z. S. Holbrook, of Chicago), Anne (wife of C. Clarence Poole, of Chicago), Mary, and William Frederick, Jr.
means, to extend the educational features which are now the chief work of the institution. For the first three years the society was maintained almost entirely by the contributions of enterprising citizens, the only other source of income being the small membership fee of one dollar. In 1874 it inaugurated in addition to its reading-rooms and like privileges, evening classes in German, French, bookkeeping, vocal music, etc., for instruction in which a moderate fee was charged. The success of this plan was almost immediate, and to these classes others have been added, till the school now presents a complete curriculum of all the useful educational branches, in which instruction is given at very moderate rates. The report of the superintendent, Edward I. Galvin, for the current year, states that nearly a thousand pupils have received instruction during the year, who come not only from this city and its suburbs, but from other parts of the State, as well as from adjoining States.

The first rooms of the association were opened in May, 1872, at No. 738 Michigan Avenue. It was then removed to No. 114 Madison Street, and afterward to more ample quarters, at Nos. 63 and 65 Washington Street. In the spring of 1878, the Athenaeum removed to the new building at No. 43 Dearborn Street, which had been erected for its special accommodation. This building, ninety by eighty feet, with its neat front of pressed brick, ornamented with brown stone facings and trimmings, is four stories high. The second, third and fourth stories are occupied by the Athenæum, the second being used as the reading-room and library, in addition to which there are on this floor eight well-appointed rooms for separate class instruction. The third and fourth stories are thrown into one hall and devoted to a spacious gymnasium, twenty-six feet high, well lighted, and ventilated. The gymnasium has a full equipment of apparatus and six bath-rooms. Yearly athletic tournaments are held, and much interest is manifested in this department of the Athenæum’s work.

The present corps of teachers number seventeen. Five languages, including the classics, are taught by special professors. Besides the common branches, there are special instructors in drawing, music (vocal and instrumental), elocution, English literature, shorthand, gymnastics and sparring.

The annual membership, entitling to privileges of reading-room, etc., is one dollar, a contributing membership, adding the use of the gymnasium, costs ten dollars, life memberships one hundred dollars. The government is vested in the usual officers and a board of twelve directors elected for one, two and three years.

George M. Pullman was president from 1872 to 1874, and George N. Carpenter, secretary; Hon. Henry Booth was president from 1874 to 1881, and Ferd. W. Peck, secretary; Byron R. Moulton, now president, was elected in 1881, with John Wilkinson, secretary and treasurer. Other officers are—Ferd. W. Peck, first vice-president; John J. Glessner, second vice-president; Edward I. Galvin, superintendent; Joseph Silvers, assistant superintendent; with the following board of directors: Henry Booth, A. A. Carpenter, Eugene Cary, C. L. Hutchinson, William R. Page, William T. Baker, A. C. Bartlett, J. J. P. Odell, O. S. A. Sprague, R. T. Crane, Louis Wampold, Byron L. Smith. Charles R. Barrett is the principal of the Business and Shorthand School.

The Chicago Mechanics’ Institute, organized in 1843, whose library and records were all destroyed in the great fire, has since united its interests with those of the Athenæum, and a large number of pupils have yearly received free instruction under the provisions of that organization. A very large part of the success of the present Athenæum is due to the efforts of the Superintendent, Edward I. Galvin; and it is a widely prevailing sentiment that this Institution, which has labored so faithfully for the public good during the past fourteen years, is worthy of a permanent, spacious and well-equipped building; that would do honor to the enterprise and generosity of Chicago.

REV. EDWARD I. GALVIN, superintendent of the Chicago Athenæum, a Unitarian division of the First Unitarian Church, the son of Theodore A. Galvin, of German descent, was born in Calais, Maine, on April 3, 1858. After receiving his elementary education in New England, he finished his academic studies in Philadelphia, and spent one year in a special classical course under the guidance of the late Dr. Leonard Tale. Having determined upon the ministry as his work, he entered the theological department of Harvard College, from which he graduated and was ordained in 1876. He was called to his first charge in Brookfield, Mass., and was afterward settled in Peabody and Brighton District, Boston. In 1884, he entered the army and was appointed lieutenant and acting chaplain of the 42d Massachusetts Infantry, and continued with his command until mustered out at the end of that year. In 1876, he went to Portland, Oregon, as temporary supply for Rev. T. L. Eliot, son of the well-known Rev. William G. Eliot, D.D., of St. Louis, and subsequently was active in missionary work in Washington Territory. He continued in the Northwest until 1879, when he came to Chicago, and during the succeeding two years served as pastor of the West Side Unitarian Church, which, under his leadership, was freed from a long standing debt. Upon being unanimously elected to his present position as superintendent of the Chicago Athenæum, in December, 1881, he accepted the honor and devoted his entire attention and interest to the management of the interests of that excellent institution. His education, and the enrolling ability of twenty years in the pulpit, eminently fit him for the responsibility of directing the varied affairs of the Athenæum, which, from its organization, has ever been wholly under a sectarian spirit, and, through his influence and control, this institution has made marked progress, having not only been freed from debt, but having paid the foundation of a permanent fund, added a thousand volumes of choice literature to its library, and opened the way to still greater prosperity. Mr. Galvin was married to Miss Annie M. Stambach, of Philadelphia, on June 20, 1866. Mrs. Galvin died in South Carolina in the spring of 1872, leaving one child, Carroll D., a namesake of the eminent physician, the late Dr. Dunham, of New York. His present wife is Miss Mary E. Mack, formerly of St. Louis, to whom he was married, in Portland, Oregon, on July 2, 1879.

YOUNG MEN’S CHRISTIAN ASSOCIATION.

The Young Men’s Christian Association, for the second session, suffered the loss of its building by fire, October 9, 1871. The lecture-room of the First Baptist church, on the corner of Wabash Avenue and Hubbard Court, was secured for the noon-day prayer meeting, and used until the completion of the First Methodist Episcopal Church, on the corner of Washington and Clark streets, where rooms were obtained for all of its meetings: a business office, No. 97 Randolph Street, having been previously occupied for the latter purpose.

The third building of the Association was completed on the lot owned by it, at No. 148 Madison Street, on November 26, 1874, and, together with Farwell Hall, cost about $100,000. The Association had incurred a large debt in the erection of this building, but through the efforts of D. L. Moody, in 1877, $110,000 was raised by subscription, and its pecuniary obligations were discharged. In 1882, the building was remodeled and improved at a cost of $30,000. It now contains a gymnasium, literary and class-rooms, reading-room, members’ parlor, ladies’ parlor, social room, lavatory and library, besides offices and the spacious hall.

The aim of the Association is “to keep young men from evil, and win them to be Christian gentlemen, industrious workmen, good citizens, loyal to their homes and church.” In addition to the religious instruction imparted, lectures are given in German, social science, English literature, bookkeeping, phonography and mechanical drawing, which every member is entitled to receive without any
other charge than the payment of the annual fee of five dollars. He is also entitled to the free use of the member's rooms, parlor, social room, library, gymnasium and bath-rooms.

The labors, usefulness and influence of the Association are increasing each year. The membership, which numbered twelve hundred and fifty-eight in 1880, on January 1, 1885 (including the railroad department), had grown to be three thousand one hundred and ten. Their church preferences were as follows:

Methodist Episcopal, 445; Presbyterian, 395; Roman Catholic, 100; Independent, 157; Congregational, 396; Baptist, 377; Episcopalian, 270; others, and no choice, 647.

To show the extent and variety of the work of the Young Men's Christian Association, the following table is copied from the last report:

- Number of devotional services held (including those in the hall, at the various charitable institutions in the city and county, and open-air meetings). 11,189
- Average attendance: 140
- Entertainments, lectures and socials: 76
- Average attendance: 526
- Lessons in the educational classes: 251
- Average attendance: 45

The work in the railroad department, which is commanded by the general managers of many leading railroad companies, is growing in general favor and importance. Three buildings, or stations, are maintained for the employment of this branch of the Association, one at Forty-seventh Street, one at Kinzie and Canal streets, and one at Stewart Avenue. They are kept up at an expense of about $8,000 per annum, which is contributed by the different railroads.

The current expenses of the Association for 1884-85 were $31,156, the greater portion of which, $24,000, was contributed.

The officers since 1872, have been:

President—T. W. Harvey, 1872-73; N. S. Bouton, 1874-75; T. W. Harvey, 1876-79; E. G. Keith, 1879-81; J. L. Houghtaling, 1882-85; John V. Farwell, Jr., 1884-85.

Secretary—W. W. Vanardale, 1872-75; A. T. Hemingway, 1876-78, 1882-85.

The officers and managers for 1885 were:

John V. Farwell, Jr., president; Cyrus H. McCormick, Jr., first vice-president; S. A. Kem, second vice-president; J. L. Whitlock, treasurer; W. H. Klee, recording secretary; A. T. Hemingway, corresponding and general secretary; A. G. Copeland, assistant general secretary; G. B. Townsend, financial secretary; J. M. Hitchcock, superintendent of employment; C. C. Helmick, office secretary; O. Miller, superintendent of gymnasium; Mrs. S. G. Cleveland, city missionary; E. A. McClane, librarian.

Board of Trustees—H. E. Sargent president; George M. High, secretary; John V. Farwell, treasurer; N. S. Bouton, E. G. Keith, E. S. Albans, C. E. Carrier, B. F. Jacobs, S. M. Moore, Philip Myers, Orrington Lunt, H. Z. Calver.

WOMAN'S CHRISTIAN ASSOCIATION.

The Woman's Christian Association of Chicago was organized on December 5, 1876, and incorporated on April 12, 1877. The object of the Association is to promote the moral, religious, intellectual and temporal welfare of women, especially those who are dependent upon their own exertions for support. Its first work was to assume, in December, 1876, the entire control of the employment bureau of the Woman's Aid Association. A dispensary was established at Farwell Hall, where gospel meetings were conducted. Next, a boarding-house was opened, on May 22, 1877, at Nos. 1514-15 Wabash Avenue, for the accommodation of young women, where all the comforts and privileges of a Christian home are afforded, at a very low rate. The boarders are seamstresses, teachers, students, clerks and compositors. A daily Bible service is maintained and daily family worship. The work of the Association is principally directed toward these three objects.

The following table, gathered from the annual reports, shows the operations from the commencement of the Association:

In 1879, the Association decided to exclude applications for domestic service, which accounts for the falling off in the number of places furnished after that year. The removal of the office of the employment bureau and dispensary to No. 242 Wabash Avenue, in 1882, and to the boarding-house in 1883, were unfortunate, as the diminished results show, a good location in a business center being essential to success.

What the Association needs to render its work more efficient is a home of its own, where its efforts may be concentrated. This the managers are endeavoring to secure. A fund has been started for this purpose, which already amounts to over $30,000, and the hopes of the Association are in a fair way of being realized.

The annual members number about five hundred; life members, one hundred and forty; honorary life members, forty. The annual dues amount to $764. The expenses in 1885 were $1,867, the boarding-house being nearly self-sustaining.

The dispensary and employment office have been removed to No. 184 Dearborn Street, where the business of these bureaus is increasing, and much better results are promised.

The officers and managers have been as follows:

President—Mrs. E. G. Clark, 1877-78; Mrs. Thomas H. Hill, 1879; Mrs. Leander Stone, 1881-86.

Secretary—Mrs. P. L. Underwood, 1877; Mrs. C. D. Hamill, 1879-80; Mrs. T. M. Eldy, Mrs. D. F. Groves, 1886-82-83; Mrs. E. B. Sherman, —; Mrs. C. D. Hamill, 1887-85; Mrs. W. W. Wilson, 1885-86.

Treasurer—Mrs. Chester Warner, 1877; Miss Helen Kingsley,
ART.

With the growth of Chicago's material interests and the accumulation of wealth by her citizens, has come that broadening of artistic tastes which inevitably followed the possession of means for gratifying them. Her wealthy citizens, from their travels in Europe, bring back treasures from the studios of France and Italy; and in their homes and private galleries are now to be found the works of the most distinguished artists in the world. That this is so, is attested by the long lists of noted painters which appear in the catalogues of the "loan exhibits" which are given from time to time.

A potent factor in the creation and dissemination of a desire for the possession of objects of art, and the growth of an artistic sense in a community, is ever the Art Association. This generally finds its first expression in the union of artists for mutual improvement and the imparting of instruction, together with the exhibition of their works. Of such a nature was the Academy of Design, which had attained to a good degree of success at the time of the fire. It was subsequently reorganized, and for several years maintained its exhibitions and instruction with varying success. But associations of the kind never furnish as artists the stimulus which comes from a ready market for their higher productions.

Even in the older countries of Europe the exhibitions of the academies, successful as they were, failed to induce that demand for the best achievements of the painter which followed the establishment of the Art Unions. So, an association of patrons of art, who, by combination, are enabled to purchase a better class of paintings, becomes an incentive for their production. These societies result in the creation of schools of art, and cultivate an artistic taste higher than that which exists in the community for the time being. This general diffusion of culture re-acts upon the individual, who, coming to see in beauty, as exemplified in works of art, a commercial value of which he had scarcely dreamed, and he pays ungrudgingly such sums for pictures as he would earlier have thought preposterous. When this sentiment possesses a community, the picture is no longer regarded as a mere adornment of the walls; it becomes the center around which the home grows, and an artistic unity prevades the dwelling with a sense of luxury and refinement.

Of such a nature is the Art Institute, which sprang from the Academy of Design. Its founding was the inevitable and natural result of that stage of culture which seeks the gratification of its instincts outside the restrictions which might be placed upon it by creative art. As everywhere else, the Institute has here made it possible for artists to realize better returns for their work, and has enhanced the appreciation of their efforts. It has given a positive and strong impetus to all forms of artistic creation, and its exhibits have served to reveal the wealth of art treasures owned in Chicago.

At the loan exhibit which marked its opening, the productions of not less than one hundred of the best artists of the age were on its walls, among them being such noted names as Traylor, Bouguereau, Maurice LeLoir, Ed. Yon, Rosa Bonheur, Jerome, Vernier, Detaille, Meissonier, Rico, Van Marcke, Corot, Diaz, Willet, DeNittis, Aubert, Outin, Ziem, Michetti, Merle, Schreyer, Boughton, Kate Greenaway, Bridgman, Shirley, Veder, Meyer von Bremen, David Neale, Witt, Quarterly, and others equally famous. That such a showing should be made barely a decade after the accumulated art treasures of years had been swept away in a night, was matter at once for surprise and congratulation.

Other institutions have existed in Chicago during the period treated in this volume. In 1886, a number of young artists organized the Chicago Art League, which opened rooms on Van Buren Street, and projected an exhibition. In the course of two or three years, the society diminished in numbers, ceased to hold regular meetings, and is now practically extinct. In 1886, the Chicago Art Guild was organized, and for several years maintained rooms on Wabash Avenue. Its membership was not confined to artists in the strict sense, and the organization was largely social in its nature. Other associations have been formed from time to time, but those of any prominence all receive due mention in the pages following.

There are now nearly four hundred artists in Chicago who earn a livelihood by their profession, and probably not less than two thousand students who are earnestly engaged in making themselves proficient in art. Although there may be few institutions where instructions are given, there is scarcely an artist who has not a number of pupils. Many of these teachers, having been grounded in the principles of their art in Europe, are abundantly competent to impart the necessary preparation for foreign study, which is taken advantage of by those who wish to go abroad to obtain perfection in their profession.

The Vincennes Gallery of Fine Arts is located in one of the most delightful residence districts in Chicago, on Vincennes Avenue, near Aldine Square. It was established in 1876, by D. Knight Carter, and, in 1886, a syndicate, comprised of Henry Arthur Elkins,
Frank C. Bromley and other artists, was formed for the purpose of establishing a permanent gallery for the exhibition and sale of oil paintings, and for the further purpose of providing a temporary home for those artists who happened to be in this city. In 1881, the present buildings were finished at a cost of $30,000, and since that time it has been a flourishing institution. The main gallery is the finest gallery-interior west of New York, and contains hundreds of valuable paintings, communicative, among which are Mr. Elkins's masterpiece, "Sierra Madre," valued at $20,000. "Sunset on the Mediterranean," by Haubman, "A Scene in the Bavarian Alps," by Schreyer, and scores of others equally artistic, both foreign and American. Above the doors, at either end of the room, are groups of imported statuary, and upon the marble-finished wainscoting are baso-relievos in bronze from European art centers. The walls are covered with pictures by various artists throughout the United States, and contributions are continually received. Twelve other rooms are devoted to oil paintings, and the storeroom contains nearly five hundred pictures, each valuable because of intrinsic merit. Mr. Elkins, the originator of the gallery, was one of the leading American artists. At the age of nineteen he painted his first great picture, "Morning in the Valley." It was exhibited at P. M. Allkins's first store on Clark's Street, and was seen by Ex-Vice-President Collar, who purchased it for $500. No other American landscape painter has thrown upon canvases such majestic grandeur of mountain scenery, atmospheric perspective, and such bold and yet delicate handling of cloud effects. Art lost a favorite son through the death of Mr. Elkins, which occurred on July 25, 1884, at Georgetown, Colo. His works are principally owned by the Vincennes Gallery.

Frank C. Bromley, a landscape and marine artist of great promise, was born at Eureka, near Oshkosh, Wis., on May 30, 1859. He received a common school education, most of his hours of recreation being passed in studying nature and transplanting his vivid impressions to paper. Having determined to become an artist, he bent his endeavors toward that end with that courage and enthusiasm which have always been marked traits of his character. His means were scanty, which only spurred him on the more, and leaving his native town he came to Chicago and became a pupil of Henry A. Elkins, the great landscape painter. Spending much of his time in drawing and in sketching from nature, he turned everything that he could see into sketches, remarkably original. At length, encouraged and enabled to gather sufficient means to obtain the advantages of European study and training. Placing himself under the best of instructors in 1881, one of his paintings was admitted to the Paris Salon. At this time he was a pupil of Mr. Weismann. Since Mr. Bromley's return from Europe, his studio has been in the American Express Building, where he has a large class of pupils. His specialties in painting are mountain landscape scenery, marine and cattle painting—embracing both foreign and domestic examples—and his productions manifest great facility, fancy and taste. His easy and polished manners, coupled with his energy and ability, have made him hosts of friends and added to his standing before the public. Mr. Bromley is the son of Lester R. and Frances H. Bromley, being a direct descendant of William Bromley, associate engineer of the Royal Academy, who engraved the Elgin Marbles for the British Museum. He was married at Washington, on October 30, 1884, to Miss Willimene W. Peckham, of that city.

Frank Russell Green, one of the youngest and most promising artists in Chicago, was born in this city, on April 16, 1850. He is the son of Russell and Caroline Green, his father coming to Chicago in 1836 and engaging in lumber business. Mr. Green died in May, 1850, his wife still surviving him. The son's mind was early attracted to artistic occupation, and the pencil coming away to his hand as a top or knife to the fingers of the average boy. In 1873, he commenced to use his brush, going to the Rocky Mountains, with Henry A. Elkins, during the same year. There he imbibed the notions and grandeur of western landscape, and transferred his vivid impressions to canvas in several works of merit. In 1880, he went abroad and, after studying in Paris, returned to his native city. He then spent about a year and a half in Boston and New York City, occupying himself principally in illustrating for Harper Brothers, John A. Lowell & Co., and other prominent publishing houses. In the fall of 1883, he returned to Europe, prosecuting his artistic labors in Paris for about four months. Among his works which attracted the most attention here may be mentioned "Francesca da Rimini," "The Death of Juliet" and the "Palace of Indolence." "The Toliars of the Sierra," exhibited in London, is among one of his strongest pieces. Since returning to Chicago, he has devoted himself almost exclusively to figure-painting, in which specialty he takes high rank, his pictures meeting with a ready sale in many of the art-galleries of the East. Mr. Green was married on May 23, 1877, to Miss Hattie J. Collins, of Campton, Kane Co., Ill.

Academy of Design.—The academicians of the Chicago Academy of Design came together in 1873, and re-organized, choosing H. C. Ford as their president. About a dozen persons were engaged in this enterprise, including artists Volk, Spread, Brown, Bigelow, Schwerdt and Root, who were materially assisted by Belden F. Culver. J. F. Gookins was the first teacher. They rented the upper part of Volk's building, corner of Michigan Avenue and Van Buren Street, and the Academy was opened in a prosperous condition. Studios and an art-gallery were fitted up, together with a general school-room. Drawing from the antique and studies from life were taught at evening schools in the gallery proper.

The Academy was successful for two years, when, in 1875, it moved to Pike's Building, corner Monroe and State streets. The fifth floor of the building was taken out, giving the Academy a large gallery some fifty feet high; and it was also provided with a gallery for oil colors, another for water colors, and a third for drawing. H. F. Spread became teacher after the Academy was well under way. The patronage was encouraging, and for a year and a half things seemed to go along smoothly; then dull times came, with business depression and falling off of pupils, until the institution was no longer able to pay its heavy rental and meet other legitimate expenses. A plan was matured by which a board of twenty-five managing trustees was chosen from leading merchants. J. H. Dole was appointed president, Murry Nelson vice-president, J. D. Gage treasurer, and W. M. R. French secretary.

The affairs of the Academy moved along smoothly and prosperously for the next year, when disagreements regarding the art conduct of the school arising between the board and the academicians, the trustees withdrew from the Academy, and then the creditors foreclosed their mortgage liens, entered judgment and took out executions, and the paraphernalia, accessories and material were sold by the sheriff. Discouraged, but not entirely disheartened, the Academy started on a smaller scale, hiring a room on the third floor of the American Express Company's building, on Monroe Street, where their schools were re-established and studios opened, but no public exhibition of pictures was attempted.

J. C. Cochran was president of the Academy in 1881-82, and Enoch Root occupied that office in 1883-84. Not making satisfactory progress, it was decided to discontinue its schools. The academicians, who are some sixty in number, keep up their organization, and at the annual election in November, 1882, chose the following officers for the ensuing year: President, D. F. Bigelow; Vice-President, Frank M. Pebbles; Secretary, John Stauffer; Treasurer, J. J. G. Burghheffer; Council, A. J. Pickering, J. R. Sloan, H. C. Schwerdt, Leonard W. Volk, James F. Gookins, J. E. Verbeck. The members provided for the resumption of active operations, and feel sanguine that the Chicago Academy of Design will, at not distant date, attain to more than its former prestige.
The galleries on Van Buren Street during years 1883–85. The foundation of a permanent collection was laid by the acquisition, through purchase or gift, of pictures and casts of antique sculpture. At this time the school numbered about two hundred students, and the property of the Institute was valued at about $80,000.

During the summer of 1885, under the lead of C. L. Hutchinson, the president, provision was made for the purchase of additional land south of the Institute, and also for the erection of a large museum building, fronting on Michigan Avenue, to cost $50,000. One-half this sum was donated, in sums of $1,000 each, while the remainder was raised by the issue of bonds. The building will be in the Romanesque style, and will have a frontage of eighty-four feet, the walls being of two colors of brown stone, four stories high. There will be galleries for collections, class-rooms, school-rooms, and every appointment of a first-class Art Institute. The third and fourth stories, as soon as finished, will be occupied by the Chicago Literary Club, the Fortnightly Club, and the Women's Club. It is expected that the new building will be completed in the summer of 1886.

The art school already takes rank among the best institutions of its class in the country. It numbers about two hundred and thirty students, has ten teachers, and includes instruction in drawing from the antique, drawing and painting from a figure, still-life painting, composition, artistic anatomy, architecture, perspective, and ornamental designing, with occasional lectures upon other subjects. There are, besides, large evening and Saturday classes, designed especially for the accommodation of teachers and pupils of the public schools. The following are the officers:

A. J. Rupert, a professor of the Art Institute and instructor of the life classes, was born at Fort Plain, N. Y., on August 19, 1854. He came to Chicago at the age of eighteen, 1872, as a fresco painter with Almini. Mr. Rupert also studied in the Academy of Design, and in 1876 went to Munich, where for four years he was a student of the Royal Academy of Fine Arts. He then travelled extensively throughout Europe, visiting the chief painting centers of interest in England, France, Germany, Austria, Switzerland and Italy, and returning in 1881. Mr. Rupert has always made a specialty of figure-painting and working from life. Besides being a founding member of the Art Institute, he is also connected with the Western Art Association and is, all in all, considered as one of the most promising of the younger artists in Chicago.

H. Vanderpoel, one of the instructors in the Art Institute in drawing from the antique, was born in Holland in 1857. At the age of eleven years he came to Chicago with his parents, and was educated in the public schools of this city. Mr. Vanderpoel received his first instruction from James F. Farnham and H. F. Spread, and soon after the organization of the Chicago Art Institute, he was appointed to his present position. He is considered as one of the rising artists of the city, his special line of work being figure-painting and portraits. During 1886 it is his intention to take a European tour for study, remaining some time in Munich, Paris and Holland, and then make Chicago his permanent place of residence.

Exposition Art-Hall.—In September, 1872, the Inter-State Industrial Exposition of Chicago opened an Art-Hall in the Exposition Building on the Lake Front, which continued from the first week until the third week of the following month. In this hall, which contains six art galleries, were exhibited a creditable collection of oil and water-color paintings, engraving, sculpture, and casts and antique sculpture.
nings, statuary, and bronzes, under the management of an art committee. This exhibit has been continued annually, down to the present time, in connection with the State exhibition, and has uniformly been attended with success, gaining in interest and importance with each succeeding year. It is properly a loan exhibit, embracing not only works of art executed by Chicago painters and fine pictures borrowed from many of our citizens, but also, in some cases, almost entire collections from galleries in Boston, New York, Philadelphia and other cities.

In 1882, the art exhibition was given under the direction of the committee. James H. Dole, Laurence C. Earle and Henry F. Spread, Miss Sarah T. Hollowell being then, as well as for a number of years previously, the secretary. The marked feature of the exhibit was a collection of prints loaned by James L. Claghorn, of Philadelphia, forming a sort of chronological catalogue of works of art from the year 1420 down to contemporaneous times. For variety, rarity, and excellence of impression, this has never been equalled; in this country, the exhibit including examples of many of the best engravers of the different schools. The collection embraced three hundred and one representations. Other departments of the exhibit that year consisted of two hundred and ninety-seven oil paintings, one hundred and twenty-six water colors; and the casts of marble and bronze statuary and architectural fragments, which are owned by the management, and are never removed from the room of the art department. Thirty-nine Chicago artists exhibited sixty-four pictures.

For the 1883 exhibition, commencing on September 4 and continuing to October 20, the art committee was James H. Dole, Charles L. Hutchinson, Watson F. Blair, Charles D. Hamill and Harry D. Spears, Miss Hollowell continuing as secretary. The associated artists of New York made a special exhibit of embroidery, painting, and arrangement of color in art fabrics; and there were hung in the galleries three hundred and fifty-seven oil paintings and one hundred and forty-four water-color pictures. The characterizing feature, however, was the exhibition of twenty-two paintings from the Paris Salon of 1882-83, embracing works by F. A. Bridgman, George W. Chambers, Charles N. Davis, Sarah Paxton, Ball Dobson, Ruge Donohoe, Clifford P. Grayson, William H. Howe, Alexander Harrison, Charles E. Morse, Frank Moser, F. C. Penfold, F. D. Williams and L. L. Williams.

In 1884, the art committee was James H. Dole, Charles L. Hutchinson and Henry Field, with Miss Hollowell as secretary. The exhibition opened on September 3 and closed October 18. Sixteen pictures from the Paris Salon were exhibited, from the pencil of Bridgman, Dobson, Donohoe, Grayson, Alexander Harrison, Penfold, Walter F. Brown, Walter Blackman, F. M. Boggs, William M. Chase, George W. Chambers, Walter Gay, Birge Harrison and William T. Richards, Society of American Artists (of which Abbott H. Thayer was president, with eighty-two members) exhibited seventy-four paintings. The total exhibit was three hundred and seventy-five oil and one hundred and eight water-color paintings, including sixty-five painted by forty-one Chicago artists, ten from a Chicago sales-gallery and seventy-four loaned from the private galleries of the city.

The 1885 exhibition opened on September 2 and closed on October 17. The art committee was James H. Dole, Charles L. Hutchinson, Henry Field and Walter C. larned, with Miss Hollowell as secretary. The catalogue embraced two hundred and thirty-five oil and one hundred and three water-color paintings. Nine pictures were from the Paris Salon. Thirty-six Chicago artists placed on exhibition sixty-eight paintings. The Boston Oil Club loaned five pictures; the Massachusetts Charitable Mechanic Association, seven; the American Art Association of New York, three; thirteen were from private galleries in Chicago; and the remainder mostly from sales-galleries in Boston and New York.

Nine-and-twenty local artists have had their pictures hung in the annual exhibitions. They are:

M. H. Holmes, most favorably known in art circles, was born at Philadelphia, December 24, 1836. He is the son of T. W. and Martha (Hayes) Holmes, both artists of standing, his father being the oldest teacher in painting now living in the country. From him the son inherited many of his characteristic talents and also received from him a most thorough training in those lines of art in which he is now a master himself. In 1856 he moved to Minnesota, engaging in various pursuits, but devoting his best energies to art. Upon the breaking out of the War, he joined the army, and remained in it until 1866. During the same year he actively resumed his profession and reputation. In 1867, Professor Holmes located at St. Paul. During his residence there he was connected with Hamline University and founded the Academy of Fine Arts. Professor Holmes came to this city in 1868 and continued to labor earnestly in his profession, being connected with the University of Chicago, in his capacity as master of drawing, for nine years. He also filled a like position at the Northwestern University, Evanston, and has been the accented the highest testimonials from J. C. Burroughs, chancellor of the University of Chicago, and Lemuel Moss, his president; C. H. Fowler, president of the Northwestern University; W. F. Haskell, superintendent of schools; also from Holmes having been instructor of drawing in the town schools for five years; and S. S. Norton, president of the Mount Vernon Military Academy, Washington Heights, Cook County. In 1875, Professor Holmes established the Chicago School of Art, which is now flourishing under his direction. Professor Holmes is the author of Holmes's Drawing Books, published by Harper Bros., and they have received the highest testimonials by the profession and the press as being the best series ever published. He has, recently prepared a new and more advanced series, which is now ready for publication.
SOCIAL PROGRESS.

PRIVATE GALLERIES.—Following are given some of the notable collections in this city.

COLUMBIA THEATRE.—In August, 1884, a collection of thirty high-class works of art, of the modern school, was opened by the management of the Haverty Theater (since called the Columbia), the whole costing $88,000, and embracing the following well-known paintings:

- "Romeo and Juliet" and "Francesca da Rimini," Frank Russell Green;
- "Eternal Storms of Colorado," Frank C. Bromley and George C. Bromley and Green;
- "Ruby Lake, Nevada," George E. Colby;
- "Aksot" Clifford P. Grayson; "The Golden Gate," John R. Key;

CALUMET CLUB.—This club owns several excellent paintings, and for the past three years has given annual art exhibitions. The exhibition of 1885 was remarkably fine, embracing nearly one hundred oil paintings, many of which were loaned.

THE BEMIS GALLERY.—On October 1, 1885, H. V. Bennis opened to the public a magnificent art collection, embracing two hundred and forty oil paintings and water-color paintings, in the Hotel Richelieu, in two galleries, each 25 x 40 feet.

SOCIETY OF DECORATIVE ART.—The Chicago Society of Decorative Art was organized in the spring of 1877, and is an offspring of the New York Society of the same name. Its special object, in its incepiney, was to meet the distressing need of a large and increasing number of gentlewomen thrown upon their own resources for self-support, combining education in decorative art with honorable employment. Mrs. J. Y. Scammon was one of the earliest and most efficient movers in the formation of the Chicago society, and was its first president. She has been succeeded in turn, in the executive chair, by Mrs. John N. Jewett, Mrs. B. F. Ayer and Mrs. R. Hall McCormick. The society established itself at first in modest quarters, and, after one or two moves, has found a permanent home in the Art Institute Building, where, on the completion of the new wing, it will transfer its operations to a suite of apartments occupying the whole front of the second floor facing on Michigan Avenue. The aims of the society are to raise the standard of and create a market for woman's work. Painting, drawing and Kensington embroidery were started, and the rooms of the society were soon filled with contributors' work. The success of the movement began to be manifest in the imitation of the society's designs and styles by dealers in fancy goods, while many of the leading houses sought the skilled services of graduates of the institution. The society has, besides the contributors' department, an embroidery department, where orders are taken, and every variety of art needlework is done. It has filled orders for various clubs and churches, and also for many of the handsomest private residences of Chicago, in styles including Kensington, Moorish, Ecclesiastical and Oriental. The membership of the society is one hundred and fifty, and the board of directors consists of: Mrs. John N. Jewett, Mrs. S. M. Nickerson, Mrs. B. F. Ayer, Mrs. Charles Henrotin, Mrs. John A. Yale, Mrs. Potter Palmer, Mrs. T. B. Blackstone, Mrs. J. C. Peasley, Mrs. O. W. Hennessey, Mrs. C. Griggs, Mrs. Corloryn Beckwith, Mrs. Henry W. King, Mrs. Henry, Mrs. Charles Hitchcock, Mrs. Fred Eames, Mrs. William Walker, Mrs. Walter C. Larned, Mrs. Colton, Mrs. Bryan Lathrop, Mrs. Chauncey J. Blair, Mrs. D. C. Bradley, Mrs. Carter H. Harrison, Miss Helen Snow, Miss Frances Keep, President, Mrs. R. Hall McCormick; Vice-President, Mrs. Clinton Locke, Mrs. J. Y. Scammon, Mrs. Byron Moulton, Mrs. J. J. Glessner; Recording Secretary, Mrs. W. G. McCormick; Corresponding Secretary, Mrs. Frank Gilbert; Treasurer, Mrs. J. M. Flener.

THE AURENEUM ART ASSOCIATION.—Very early in its history, the Chicago Aureneum organized a department of free-hand, mechanical and architectural design, under Herman Hansel, who has been the instructor in this institution upward of ten years. The classes are held five evenings in each week, for two hours each evening, and also every Saturday morning from the first of September to the latter part of June. The pupils are mainly drawn from young men who are engaged in various mechanical pursuits, or in lithography, engraving, architecture, carpentry or designing. Many of these pupils have taken a course of instruction in algebra and geometry in connection with drawing. About ninety per cent of the pupils in drawing (numbering three hundred or more) are engaged daily at some trade or in some profession which demands a knowledge of the art of free-hand drawing. At the National Educational Convention, held at Madison, Wis., in the summer of 1884, the large exhibit made by Mr. Hansel of the drawings of his pupils received high commendation from the press, and was pronounced one of the most interesting and attractive features of the art exhibit. At the Illinois State Fair, held in Chicago, in the autumn of 1884, the exhibitions of drawing submitted by the Aureneum took the first prize. At the World's Exposition in New Orleans, in 1885, so much interest was manifested in Mr. Hansel's pupils' exhibit of free-hand and mechanical drawing, that the request was made by the American Educational Association that they might be admitted to the Federal Government and placed in the National collection at Washington. The Aureneum art department is well supplied with models in plaster, and with the best French and German charts. Its library contains excellent books of reference on art and science, and it is also one of the designated depositories of the United States Patent-office records, which are always at the disposal of the students.

THURBER'S ART GALLERY was opened to the public, in a business way, in 1880. It is especially intended to amuse those interested in art, and to encourage the young in their efforts to excel in the production of the beautiful. The gallery is an additional room fitted with a sky-light, calculated to render the works of art adorn the walls more beautiful, softening the lines and tones of the artist. This little annex has, at various times, contained some of the famous pictures of the dreamed, always supplied with those that will repay the visitor. The business of art merchandise has, within a few years, developed beyond expectations, until the artists' proofs being exceedingly good prices and offer encouragement to those devoting their time to the production of works of merit.

Winfred S. Thurber was born at Oshkosh, N. Y., in 1848; was educated at St. Peter's College, and completing his studies at the Seminary at Gouverneur. He was the youngest child of a family of ten, and his parents died while he was yet young. After school he went to Oshkosh in the same year, and was for some time connected with the business in the grocery business as a salesman, in which he continued about four years. He then entered the employ of a dealer in art goods, and continued about six years, getting a practical knowledge of the business which he embarked in, opening Thurber's Art Gallery in 1880. He was married, in 1884, to Miss Martha Chord. William C. Stevens was born, in 1839, at Fayette, Maine, and is the son of Rev. L. D. Stevens, who was one of the pioneer agitators of anti-slavery in Maine fifty years ago. William C. was educated at Hebron Academy in Maine, and at the Brown University, Literary and Scientific Institute, of New London, N. H. He first engaged in literary pursuits and teaching, and became a banker in the State of New Hampshire and Massachusetts, until 1865, when he came West, and took charge of the public schools at Geneva, Kane Co., Ill., where he remained as principal five years. On the organization of the National Life Insurance Company of the U. S., Mr. Stevens became the manager for New England and the lower British provinces, and was at that time, for several years, associated with Hon. William E. Chandler, Secretary of the Navy. In November, 1878, he came to Chicago, and, associated with Charles F. Haseltine, opened an art room, but in May of the following year he took a more extensive establishment, still associated with Mr. Haseltine, under the firm name of Haseltine & Stevens Co. This firm was engaged to engage more extensively in the sale of original paintings of a high class, he said, of establishing an Art Gallery for the better display of rare imported works of art, and, in the spring of this year, he leased a piece of ground on Adams Street from the Associated Depositories of America, as Stevens' Art Gallery. The building was opened to the public in April, 1882, and during the year he sold some of the most celebrated oil paintings owned in the West, among which may be mentioned, "The Departure," by Meissonier, for $14,000. Since then there have been hung upon the walls of his gallery magnificent works of art from the masters of the world. Rubens' "Agnus Dei" is valued at $30,000, and a sum approaching those figures has been offered for it. He also has a Marillia and a Correggio, "Dockare Far Niente," Benjamin Constant's finest production, and "Summer on the lower Rhine," by Clays, the greatest marine painter in Europe, Helen witness to Mr. Stevens' discriminating taste. Among other gems, some of which have been disposed of and some still gracing the walls of his galleries, are the following: "Norwegian Fjord," by Rasmussen; "Moonlight," by Donzette; "A Hare," by Heimerdinger; "Ox in a Field," by Ferrer; "Early Morning on a Holland Farm," Turnier; "In the Stable," Jacques; "The Vidette," Detaile; "Starring the Signals," Bassini; "Young Duchess," by Knebel; "A Day in Havana," Braith; "The Advancing Foe," Schreyer; "In Maidens Mediation," Free; "A Summer Day," Van Marcke; and "Espionage," Eau-forte. Among the pictures which Mr. Stevens has quite recently added to his magnificently furnished collection of "Lands," by Emile Van Marcke, $1,200; "A Maid of Sorrento," L. J. Bonnat, $1,200; "Roaming," Rosa Bonheur, $3,500; "Reverie in the Moonlight," Leo Hermann, $1,500; "Austrian Prisoners forced to Labor," E. J. Herwey Vermeers, $500; "Psychologist," M. Munkacsy, $1,500; "Waiting Orders for the March," A.
M. DeNewville, $1,500; "The Zenana of the Sultan," F. Roybet, $5,500; "Saturday Night in Amsterdam," P. Van Scheudel, $2,500; "The Counsel of War," Ad. Schreyer, $5,000; "Moonlight in America," J. P. Deets, $3,000; "Aloha," F. Real, $5,000; "Perfuming after the Bath," Benjamin Constant, $1,000. Mr. Stevens was first married on August 4, 1858, in Ep- phraim, N. H., to Mary J. Edgerly, F. 1870, and moved to Racine, Wis. He soon afterward went to work in a hardware store, where he remained four years. In 1874, he decided to learn the art of Daguerreotyping, a process now almost obsolete. He went to Buffalo, N. Y., learned the art, and returned to Racine the same year. After a short stay in Chicago, Wis., where the Legislature was in session, he was kept busy there, doing a thriving business in Daguerreotype work. That art was vastly improved by Mr. Hesler, and he made his profession a thorough study. On leaving Madison he went to Galena, Ill. In 1853, he came to Chicago. Upon first arriving here he had so far advanced in the Daguerreotyping business that he was made an exhibiting artist by the art club, and then already famous in the West, at the Crystal Palace World's Fair in New York, where he took the highest award. That exhibition created a sensation, as nothing so perfect in the way of portrait work had been produced. In 1856, at the Massachusetts Charitable Institute, he was awarded three medals, one for Daguerreotype, one for photography and one for colored photographic work. In 1857, at the State Fair, Mrs. Hesler was awarded a silver medal—one for Daguerreotype work, another for photography and one for microscopic photography, the latter exhibit showing the photographic enlargement of minute insect specimens to a size six- times natural size. In 1876, at the Centennial Exhibition in Philadelphia, he received the highest awards for general photographic work, especially portraits of children and the life-like expression produced in his pictures. When Mrs. Hesler first located in Chicago, he occupied rooms in the old Metropolis Block, remaining there five years, removing thence to No. 113 Lake Street. In the latter place he remained thirteen years, when he was burned out in the fire of 1871. He then had his studio at Evanston, for five years. Returning to Chicago, he opened at the corner of State and Washington streets, where he continued until 1884, when he removed to his present new and elegant quarters. He occupies a suite of ten rooms, and employs a force of six talented artists in various branches of the work. Mr. Hesler gives personal attention to all sittings, and he has rank at the head of his profession for the past forty years. Recent years have wrought wonderful changes and improvements in the depart- ment of Daguerreotype portraits, and Mr. Hesler has kept in the van of the progressive march. Portrait and landscape photography, enlarging and copying old pictures, oil and crayon work, are carried on by him constantly. Recently he has made a new improvement in his art, in the way of carbon photographs, which are absolute perfection in accuracy of expression. Mr. Hesler organized the first photographic society of the West in 1862—the National Photographic Society of America, of which organizations he has been the president. He was married, in 1849, to Miss Helen, daughter of Capt. Dorchester, of Racine, Wis. Of their eight children, four are living.—Frederick Alexander, now a surgeon in the U. S. Navy; Arthur John, Harold Reid, and Helen Julia.

A commercial and necessary phase of art work is the supplying of requisite material, a sketch of a prominent house in this line is appended.

COFFIN, DEVoe & Co., manufacturers and importers of paints, varnishes, brushes and artists' materials, are an incorporated firm under the laws of Illinois, with F. W. Devoe, president; Gorham R. Coffin, vice-president, and J. S. Crony, secretary and treasurer. The phenomenal developments of the West and Northwest during the last five years, has created a heavy demand for the line of goods carried by this firm, and in order to meet it they have in stock until April, 1880, when their warehouse is emptied, and vailable of their goods has won for them a position as one of the leading firms in the West, and, notwithstanding the fact that they were only established in 1878, they now rank with older concerns, with an unceased reputation. Gorham R. Coffin was born at Newburyport, Mass., on December 18, 1840. He lived with his parents and attended school until the age of ten years, when he entered a dental cabinet, where he remained until the age of 16. In 1858, he entered the Utica Free School, an institution which justly merited its reputation for excellence. Upon terminating his studies he again went to Boston and secured a position in the paint establishment of Barker & Carpenter, and remained with them for seven years. Obeying Horace Greeley's mandate, he departed for the West in 1860, and connected himself with the firm of Heath & Milligan of this city, holding his position for fourteen years. On February 8, 1875, he was married by Rev. E. Wilgrass, of Chicago, and has four children, Adie, Fred, Helen, and Ralph. Mr. Coffin is a member of Covenant Lodge, No. 326, A.F. & A.M.; of York Chapter, No. 148, R.A.M.; and of St. Bernard Commandery, No. 35, K.T.; and is also a member of the Illinois Club.

J. Seymour Carvey was born at Peckskill, N. Y., on October 2, 1844. Until he was fifteen years of age he remained with his parents and attended the city schools. At that time he came West; and after a brief stay at Champaign, Ill., he returned there seven years, when he connected himself with the firm of Heath & Milligan of this city for six years. He was married to Miss Mary E. Corey, of Evanston, Ill., in March, 1875, and has four children.—Marguerite, Harold, Frances, and Rachel. During his connection with the firm of Heath & Milligan, he made the acquaintance of Mr. Coffin, his present associate in business, and in 1879, removed to New York, organized the establishment bearing their names.

MOULDINGS AND PICTURE-FRAMES.—The manufacture of mouldings and picture-frames is closely associated with the progress of art, in a commercial sense, the demand for pictures necessitating a demand for the frame-maker's productions. This, like other interests of Chicago, has developed with wonderful rapidity, the factories now supplying not only the demands of city trade, but filling orders from all parts of the United States, and even from Mexico, China, and European countries. The progress of this branch of manufacture may be learned from the sketches which embody the history of leading firms in Chicago:

THE BRACHVOGEL & PRESS MANUFACTURING COMPANY was organized in 1834, but the business had been carried on as Brach- vogel, Press & Co., since the death of the founder of the enterprise, Charles Brachvogel, in 1873. In that year the former manager of the business, Adam J. Press, the widow of Mr. Brachvogel (Mrs. Christiana Brachvogel), and his son, Charles H. Brachvogel, arranged to continue the business that had existed for nearly twenty years. The officers of the company are—Adam J. Press, president; Mrs. Christiana Brachvogel, vice-president; and John Consoer, secretary. Charles H. Brachvogel remained with the corporation but a short time, when he relinquished his interest. The extent of terri- tory over which the company sells, and their reach of the world, mirrors, engravings, etc., is very wide, comprising the various sections of the Union, Mexico, China, etc.

Charla Brachvogel, founder of the business referred to above, was born at Warsaw, Poland, in 1829, and died on October 16, 1878. He came to Chicago in 1845, a comparatively poor man. He had learned the machinists' trade in his native country, and for two years after his arrival in this city followed that trade, and for a time was associated with Edward Wilkowsky, a friend of his youth, in small mechanical enterprises. In 1857, Mr. Brachvogel began his first venture, in an independent business way, by manufacturing picture-frames at his home on Quincy Street, his factory consisting of one room, and his family assisting him in the founding of an establishment that, later, became large and prosperous, he doing the first wheel and lathe work in his line in the city. Soon after he removed to Clark Street, and, in 1859, to Randolph, near Franklin Street, thence to No. 48 and later to No. 52 Wells Street, then, from 1877 to 1880, on the site of the great fire, occupied No. 141 Lake Street, where his business was destroyed and the store was rebuilt at No. 153 West Randolph Street, and the factory continued at Nos. 22 and 24 South Jefferson Street. In 1872, Mr. Brachvogel built the structure now occupied by the company. Mr. Brachvogel was married, in 1856, to Lippert, and they removed to Chicago where they have since resided. The second time, the marriage, he was Lippert, and they have one child, by his second wife, Miss Ida C., the daughter of Mr. and Mrs. Charles H.; Ida C., who married Mr. and Mrs. William T., in the planing-mill business: Clara, Robert and Emma; and one child by his second wife, Frank.

Gorham R. Coffin, of Boston. The Brachvogel & Press Manufacturing Company, has been connected with that enterprise since its formation, and was previously associated for seventeen years with
LEWIS SCOFIELD was born at New Canaan, Conn., on March 21, 1819, and is the son of Elijah and Hannah (Studwell) Scofield.

His father was a farmer and school teacher and an old settler of New Canaan. Scofield received his early education, and when he was eight years old he entered the employ of Charles Brachvogel, as errand boy.

Through a business connection of nearly twenty years with Mr. Brachvogel, he established his ability and usefulness in a business that was well-marked and held so conducted the business that the enterprise ranks foremost in its line in the city. Mr. Press was married, in 1869, to Miss Lizzie Loeher, of this city. They have five children.

HISTORY OF CHICAGO.

Miss In the history of Chicago. The family is native of England, and was born in Liverpool in 1828, and there received his early education. He came alone to America in 1847, and resided in the city of seventeen years of age.

In 1847, he settled at Rochester, N. Y., and during a residence in that city of thirteen years, he was engaged in the nursery and picture-frame business alternately for seven years. In 1856, he came to Chicago, locating in the moldings trade, at the old Calhoun Building, on Clark Street, for two years. Then he removed to the corner of Washington and Market streets, where he was operating a large factory, employing sixty workers. In 1863, the business was very depressed, the establishment was discontinued, and a loss of $14,000. Mr. Blakemore then went into business with the pioneer frame manufacturer, R. P. Appley, investing some $5,000 in the establishment. They were located for nearly two years in the Monroe Street. In 1869, the partnership was dissolved; and he began business in the old Morrison Building, on Clark Street, and the ensuing year removed to Nineteenth Street, where he manufactured picture-frames, and, after that business was formed,ug, Mr. Seely, manufacturer of frames and moldings, has been identified with that line of business since 1852, and his name has been marked by more than average ability and perseverance, and his personal experience has been a varied and interesting one. Mr. Seely, a native of East Hesse-Darmstadt, Germany, in 1838, there he received his early education, and served a thorough apprenticeship to the glider's trade. In 1864, he joined the Prussian army in the war against Denmark, and was engaged in active service from February to October of that year, although he returned to the forces four years. He was in three battles, and was decorated for bravery by the government. In 1866, he came to America, and for two years was a resident of Texas and New Orleans, finally locating in St. Louis, business in the picture-frame business, until in 1869, Mr. Wolfarth came to Chicago, and was employed for two years by W. T. Noble, losing his home and war decorations in the great fire of 1871.

The following year he began business on State, near Thirteenth Street, and, in 1875, went to Washington Avenue, where he remained for ten years. In 1883, he removed to his present establishment, where he now operates fifteen workmen.

Mr. Wolfarth was married, in this city, in the year 1871, to Miss Maria Keller. They have two children, Max and Carl. Mr. Wolfarth is a member of the United Ancient Order of Druids and the Ancient Order of Thern, and is a progressive and useful member of the community.

JOSEPH KLECKA, manufacturer of moldings and picture-frames, has been engaged in that branch of trade since 1877. He is a native of Bohemia, and was born in 1851. In 1866, he accompanied his father to America, coming direct to Chicago, returning to Bohemia two years later on a visit. The ensuing year he located permanently in this city, and after receiving a common school education, apprenticed himself to a mechanism, and mastered the details of the gilding art. In 1877, he borrowed $400 from his father, and engaged in business on his own account, repaying the loan three months later. At that time he was the only manufacturer in Chicago who made a specialty of selling frames to jobbers only. The original enterprise, located at Nos. 103 and 105 South Canal, was known as Fillman & Klecka, and so continued for three years, his partner being E. C. Fillman. In 1880, Mr. Klecka sold out his interest and re-established the business, which, small as it is, has grown to a representative branch of the manufacturing industry. The company employs some thirty-five workmen, and operates through agents and circulators, selling to jobbers and retailers.

KAUFELD & LAMBIN, manufacturers of gilt, imitation and gold moldings, and picture-frames, organized as a firm in 1878. Previous to that date the members of the firm of J. L. Lambin, were expert workmen in the silver-gilding business, being employed by Richter & Husch, in March, 1875, they branched out in business for themselves, and by enterprise and perseverance have made a large commercial success,ấuishing a gross annual profit of over $200,000. They were first located at No. 59 South Canal Street, where they removed to West Washington Street, and from 1881 to 1881, at Nos. 49-51 South Canal Street, after which they moved to their present location. From their small beginnings they have grown to an extensive enterprise, selling goods through two travelling agents all over the West, and doing a business of $200,000 a year. 
John G. Rauholt was born in Chicago in 1854. His father and mother were natives of Germany, and came to this city in the early fifties. His father died in 1860; his mother is still living. Here the son received his education, and mastered the rudiments of the silver-gilding trade, finding employment in the factory of Richter & Husche. From his boyhood he was an associate of his present partner, and together they have spent their apprenticeship. And there, while still finishing his education, he joined the business of Mr. J. P. Sullivan, and has been a regular employee of the firm in the silver-gilding line for fifteen years. Frederick H. J. Lambin has been a resident of Chicago since his early childhood, and has been identified with the interest he now represents for over twenty years. He came to Chicago in 1881, and became a partner of Mr. Rauholt & Lambin. Mr. Lambin is a practical man, and, with the cooperation of an intelligent and enterprising partner, has seen his business become a success. He was married, in 1877, to Miss Christiana Nachtsheim, of Chicago. They have three children—Anneliese, Charlotte, and Leonidas.

Matthew Schaefer, manufacturer and dealer in picture-frames, has been a resident of Chicago since 1870. He is a native of Germany, and was born at Cologne in 1822. There he received his education, and, after serving a term as an apprentice in his father's carriage-trade, he entered the Prussian army, and served three years during the German revolution. In 1855, he came to America, and located at Milwaukee, Wis., where he was engaged in business for six years, and he was one of the pioneers of the frame-trade in Wisconsin. When the Civil War commenced, Mr. Schaefer served in the Union Army, in the Department of the Mississippi, and was discharged for disability at Brownsville, Texas. In 1867, he returned to Chicago, and commenced his present business. He was married at Cologne in 1854, to Miss Cecilia Pohr of Cologne. They have two children, leaving five children, two of whom were born in Europe, and three natives of Milwaukee—William J.; Chas., now with Mr. A. R. Ogelby; Frank; Adella, now wife of Louis Oelrich, of Chicago; and Pauline.

John Slaby, manufacturer of picture-frames, has been a resident of Chicago since 1865, and identified with the manufacturing interests of the city for these years. He is a native of Bohemia, and was born at Jung-Wozicz, in 1850. He accompanied his parents to America, in 1867, and came direct to Chicago, where he received his early education. After leaving the carpenter's trade, he employed himself on the manufacture of picture-frames, and, after seven years, he commenced his present business, in 1877, with limited capital and machinery, his factory consisting then of one small room. Since then his business has prospered, and he employs a large work force. He was married, in 1880, to Miss Mary Powell, of this city. They have two children—Tony and Victoria. Three of Mr. Slaby's brothers, Daniel, Frank, and Joseph, are employed with him in business; he has now a resident in Minnesota, and two sisters are married and reside in this city.

The Adley Manufacturing Company was incorporated in 1883, and is the outgrowth of the original founders of the enterprise, Adley, Allen & Co., a firm consisting of Henry Adley, Austin Allen and Dennis J. Sullivan. They started at No. 229 Randolph Street, in 1852, and after a year, when Mr. Allen retired, formed the present company, with Henry Adley as president, Dennis J. Sullivan treasurer, and George Corlett secretary and general business manager. In August, 1883, they removed to Nos. 208 and 210 Lake Street, and in May, 1885, to their present location. They employ some fifty men, and manufacture picture-frames and mouldings for all kinds, selling to country dealers through three travelling agents.

Henry Adley, president of the Adley Manufacturing Company, is the founder of that enterprise, and has been identified with the frame and moulding interest for some fifteen years. He is a native of New York City, where he was born in 1851. There he received his education, and at an early age learned the trade of painting. In 1869, he came to Chicago, and has resided in the house he now occupies for seventeen years, at which time he commenced his present business. He has grown his business from its modest foundation to one of the largest in the world, and, in 1881, came to Chicago. He became connected with the Adley Manufacturing Company in 1883, and now has the management of its business affairs. Mr. Corlett was married, in England, in 1879, to Miss Louie Thomas. They have one child, born in England, named Marie Louise.

Mr. Charles J. Sullivan, treasurer of the Adley Manufacturing Company, and one of the original founders and active promoters of that enterprise, was born in London, England, in 1845. In 1852, when nine years of age, Mr. Sullivan accompanied his parents to America. They settled in Waterbury, Conn., where he was educated and entered business, remaining a citizen of that town for twenty years. In 1871, he came to Chicago, and in 1882, became one of the original partners of the firm of Adley, Allen & Co. At that time the enterprise had then $50,000 capital, and employed seven workmen, but the company has now become a representative institution in its line. He was married, in 1866, to Miss Mary Castello, of Waterbury, Conn. They have three children,—Eugene, Etta and Edward.

James K. Pumpleny, member of the firm of Parker & Co., dealers in pictures and artistic frames, was born at Oegwo, Tioga Co., N. Y., in 1835. He received his early education at New Haven, graduating at Yale College, and, when twenty years of age, came West and settled in Wisconsin. From 1857, until the Rebellion broke out, Mr. Pumpleny was a resident of Fond du Lac, where he had acquired extensive land interests. On the day of his marriage he entered the Union army, having raised a company, and being first lieutenant, under Colonel James Howe, in the Army of the Tennessee. He served in the War over two years, and then returned to Fond du Lac, where he remained until 1870, when he came to Chicago and became a partner in the firm of Parker & Co. Mr. Pumpleny is an artist by profession, and for two years followed that profession as a student in Europe. For Wisconsin he was noted for large real-estate transactions, and gained special recognition against the Fox River Improvement Company in the matter of Government lands, which had been in litigation for fifteen years. He is now a citizen of Chicago, and has since then prospered, and his business, which he now carries on at 635 Randolph, for twenty-five years. They sell their goods throughout the country and have no travelling agents, their trade being largely secured by correspondence. The establishment now employs, in the busy seasons, one hundred and fifty hands.

August F. Schultz, founder of the firm of A. F. Schultz & Co., has been a resident of Chicago for thirty years. He was born at Drenau, near Berlin, Germany, in 1845, and when an infant came with his parents to this country. Here he received his early education, and learned the trade of gold and silver gilding; for ten years being the foreman of the moulding factory of John Moore. In January, 1854, he organized the firm which bears his name, and until 1857, his practical ability has conducted materially to its rapid progress. Mr. Schultz was married, in Chicago, in 1878, to Miss Catharina Cann. They have one child, George Henry. Mr. Schultz was at one time a prominent member of the Turners' Society of this city.

Patrick Flanagan, junior member of the firm of A. F. Schultz & Co., came to Chicago in 1870, and since that time has been identified with the interest he now represents. He is a native of Canada, and was born on Prince Edward's Island, in 1849. There he was educated, and served an apprenticeship to the carpenter's trade. When nineteen years of age he came to Chicago, and had followed his trade for some time, and, from 1877 to 1884, was employed in the moulding factory of John Moore. Mr. Flanagan was married in 1877, to Miss Mary Burke, of Morris, Ill. They have four children: Thomas, Nellie, John and Anna. Mr. Flanagan is a prominent member of the St. Vincent de Paul Society.

George W. Weibe, manufacturer of picture-frames, has been engaged in that business since April 10, 1885, succeeding M. Nordgren, who was located at the same address, and who is now a resident of Minneapolis. Mr. Weibe was born in this city in 1863. Here he was educated, and learned his trade of gilding. He is the son of Mr. James Weibe, manufacturer of gold and bronze frames. His business, which is mostly retail, is confined to a regular local trade. He employs four workmen, and he himself worked for Mr. Nordgren before he
succeeded him. He buys mouldings and makes frames. Mr. Welte was married, in 1855, at Kenosha, Wis., to Miss Jennie Irwin, of Chicago. His father, August Welte, settled here in 1854. His wife's parents settled here in 1860, and then went to Kansas City, returning here in 1874.

SCIENCE.

It is a matter of extreme difficulty to give any comprehensible statement of the scientific progress made in this city. The prime reason for this is, that the advancement of science is indissolubly connected with the progressiveness of the medical profession, as with every other whose province embraces scientific research. The erection of the magnificent Board of Trade building was no less a scientific than a mechanical triumph; the tunnels under the lake are scientific and mechanical solutions of vexed problems; the telephonic, telegraphic and railway communications are all marvelous exemplifications of what can be accomplished by scientific intelligence allied to proficient craftsmanship. Hence, in every domain of commerce, manufactures, trade, art or professions are striking examples of scientific progress. The historian can, therefore, merely present some specimens of associated evolution in this province.

The Chicago Astronomical Society.—At the time of the great fire the Chicago Astronomical Society was practically dead, not having had a meeting for years. Hon. J. Y. Scammon, the president of the Society, paid the salary of the Director of the Observatory, Truman Henry Safford, who was ex-officio Professor of Astronomy in the University of Chicago. Professor Safford had previously discovered about a hundred new nebula by the use of the great equatorial telescope of eighteen and a half inches aperture, but did nothing with it after the fire except to observe the appulse of Mars to a star in Sagittarius, in the hope of aiding to determine the solar parallax more closely. Part of these discoveries were published in London, England, with Herschel's catalogue.

The original construction of the dome was so faulty that it had become unsuable, and he devoted his efforts after the fire to work on the great star catalogue (as described in our second volume) till the inability of Mr. Scammon to pay his salary forced him to seek employment elsewhere in the spring of 1873, after a temporary absence on Government surveys in the Territories. The duties of the position were assumed by Elias Col bert, who had been for several years Emeritus Assistant Director of the Observatory. He continued in charge five years, giving to the work all the time he could spare from his daily labor on the Tribune. During his term of office, Professor Colbert re-organized the Astronomical Society, by obtaining a good many life members at one hundred dollars each, and on the re-organization, in June, 1875, was appointed secretary, succeeding Hon. Thomas Hoyne. Professor Colbert used the money thus obtained in re-building the dome of the observatory, and in paying the current expenses of the institution, which did not include a salary for him. He also recommenced the time service, which had been suspended by the fire. The signals were given automatically to the Board of Trade, the City Hall, the different lines of railroad, and the leading jewelers of the city. In July, 1878, he went to Denver, Colo., and observed the total eclipse of the sun, as chief of a party which included Professor Hough, Dr. Lewis Swift, A. C. Thomas, and a class of twenty of the citizens of Denver. Each member of the class made a sketch of the corona, and on the return to Chicago the whole of these were combined into one sketch, which was published by the Society, and set the example of composite pictures which has since been successfully applied by the photographers to represent the average expression of the individuals of a family or profession. It was as a member of this party that Dr. Swift, of Rochester, N. Y., shared with Professor Watson the honor of making the discovery of what was claimed to be an intra-mercural planet.

In July, 1877, Sherburne Wesley Burnham began the observation and discovery of double-stars with the 186-inch refractor. Mr. Burnham continued his observations up to October 15, 1878, when he submitted the results of his labors to the Royal Astronomical Society of England, which, in 1883, published Mr. Burnham's second catalogue of double-stars, comprising one hundred and fifty-one new ones, with micrometrical measurements of seven hundred and seventy double-stars already known. The subjoined table gives all the principal original double-star catalogues published, and the number of pairs (such of Class I (distance from $r$ to $r$) and Class II (distance from $r$ to $r$)) The last column contains the ratio of stars of these classes to each 1,000 double-stars, catalogued by the discoverer:

Professor George W. Hough, formerly director of the Dudley Observatory at Albany, N. Y., was elected director in May, 1879.

He began to make systematic observations with the great refractor. The planet Jupiter was made a special study; in order to ascertain definite facts relating to the physical constitution of its surface, and these are the most complete of any hitherto made, and are recognized by astronomers as an important contribution to this department of Astronomy.

Two new clocks, manufactured by Messrs. Howard & Co., of Boston, were purchased by the Astronomical Society in 1885, in order the more efficiently to fulfill the contract of the Society with the city for furnishing standard time to the City Hall. The expense incurred was about $1,200 for the clocks, and $774 the cost of running wires and other equipments. One of the clocks was placed in the Observatory and the other in the Fire Alarm Office.

In May, 1885, time was furnished to the new clock in the Board of Trade building.

The Astronomical Society became involved in litigation, extending over the years of 1881 to 1885, consequent upon the mortgage foreclosure proceedings instituted by the Union Mutual Life Insurance Company against the Chicago University, to recover the sum of $150,000. The mortgage was executed during the Society's occupancy of its premises, and the Company had legal notice of its rights.

A bill of interpleader was filed in the Circuit Court of the United States for the Northern District of Illinois, in the Society's behalf, together with all the neces-
sary affidavits and papers, by Messrs. Willard & Driggs and Hon. Thomas Hoyne, under the supervision of Mr. Scammon.

The bill was demurred to by the Company, and, at the hearing before Judge Henry W. Blodgett, the case was taken from the court, mainly on the unexpected and extraordinary testimony of Dr. Burroughs. Mr. Driggs, who presented the case to the Court in the absence of Mr. Scammon, was unable to rebut the evidence of Dr. Burroughs, from lack of personal knowledge. Mr. Scammon, who made the concluding argument, asked leave to file a bill of review, in order that the utterly erroneous statements of Dr. Burroughs might be met by the real facts. Judge Blodgett permitted Mr. Scammon to make a motion for a re-hearing, which was granted, and many affidavits by the original contributors for the purchase of the instruments and building of the Observatory, together with original and historical documents, were filed. Judge Blodgett decided that the Observatory was the property of the Society.

In 1880, the Astronomical Society published its first annual report. The officers for the year were—

The resignation of J. Young Scammon from the presidency of the Society in 1882, after a tenure of office of nineteen years, deprived the Society of his valuable services in an official capacity. Dr. Hosmer A. Johnson had already chosen his successor.

During 1881–82, the following gentlemen became life members of the Society:

Hon. W. H. Wells, vice-president of the Astronomical Society from its organization, died in January, 1885, and, after suitable action the Directors unanimously chose to fill the vacancy. At the same time C. H. S. Mixor became treasurer and Henry C. Ranney secretary.

Professor George W. Hough, M.A., Director of the Dearborn Observatory and Professor of Astronomy in the University of Chicago, was born on October 24, 1836, in Montgomery County, N. Y. His father was William Hough, a farmer, afterward a merchant of Western New York. In 1856 he went to Rockford, Ill., and in 1871 to Riverside, Ill., where he was engaged in milling until his death in 1884. Mrs. Magdalene (Selmer) Hough was a daughter of Martin Selmer, a farmer of Fulton County, N. Y. The ancestors of the subject of this sketch, on both sides, came from Germany, at an early day, and settled in Montgomery and Fulton counties. He was educated at Seneca Falls Academy, and later at Union College, from which latter institution he graduated in 1856, with the degree of Bachelor of Arts. In 1859, he received the degree of Master of Arts. After graduating, he taught school one year in Iowa, and then became assistant astronomer of the Cincinnati Observatory under Prof. O. M. Mitchell. In 1860, he was appointed assistant at the Dudley Observatory, and at the death of Mitchell, which occurred October 20, 1862, he was appointed director, which position he held until 1874. While thus engaged, he published the Annals of Dudley Observatory in two volumes, and was very prolific in valuable inventions. Among his inventions are the following: A cataloguing and changine machine, for making maps of the stars automatically; an automatic registering and printing barometer; an automatic registering and printing anemometer; an automatic printing chronograph—

the only invention of the kind in the world; a registering chronograph; an observing chair (which on account of its simplicity and cheapness has been introduced into all the leading observatories of the country); and an absolute sensitometer. While at the Dudley Observatory he made thousands of observations, his work there being mainly meridian work. After leaving this Observatory, in 1874, and engaged in business until 1879, when he was elected director of the Dearborn Observatory and Professor of Astronomy in the University of Chicago. Here his special work has been with the equatorial on the planet Jupiter and upon difficulties due to which he has discovered about two hundred. Professor Hough was married on April 20, 1870, to Miss Emma C. Shear, daughter of Jacob H. Shear, of Albany, N. Y. They have two children,—George Jacob and William Augustus.

**Chicago Academy of Sciences.**—One of the most valuable naturalistic collections on the continent, that of the Chicago Academy of Sciences, was swept away on the second day of the great fire. Out of the valuable collections of twelve years, all that remained were a few unidentified potsherds. The Gould manuscripts on the crustacea of the world, which cost the Federal Government upwards of $100,000, were in the Academy's building. Dr. William Stimpson, director of the Museum, having undertaken their editing. Within a year after this disaster, Dr. Stimpson, who had gone South for his health, died near Baltimore.

In less than two weeks after the fire, the board of trustees met, and took steps to establish a new and splendid building. The building was made to the utmost demands a more pressing character, and the incumbrance of $86,000 remained upon the building until its sale in 1882.

The first meeting of the Academy in this building was held on October 14, 1873, the library of J. Young Scammon having meanwhile served for this purpose. After the sale of this building, the Academy still occupied the premises, at a yearly rental of $1,200, for two years. The Museum was removed in April, 1885, to the Exposition Building, where quarters had been furnished it free of rent. After Dr. Stimpson's death, the Museum was intrusted to the care of Dr. Jacob W. Velie, who devoted himself to the task of restoring the Museum to the enivable position it occupied prior to the fire. In a few years it was again the repository of a large collection of birds, reptiles, mammals, fish, minerals, etc., and to-day it ranks fifth among the museums of the world, and is valued at about $40,000. Roughly estimated, it contains the following specimens:

<table>

The library contains one thousand bound volumes, nine hundred unbound volumes, and about one thousand fugitive papers and pamphlets, which comprise the reports and transactions of all the principal Natural Science Societies in the world. No portion of the library, however, is catalogued, except that which contains the transactions of foreign societies.

Very few additions have been made to the Museum since 1880, except those made by the personal efforts of
the curator, Dr. Velie, but the investigation of scientific questions is prosecuted with zeal and learning.

The only really valuable and rare specimen which the museum contains is a fossil beaver's head (Casteroides ohioensis). It came into the Academy's possession from the Wooton Museum, but nothing is known as to its discovery. Its subsequent history is interesting. Shortly before the fire, Dr. Stimpson sent it to Professor Agassiz, at Cambridge, Mass., who desired to make a plaster cast of it, but it was impossible to procure an original specimen. It was not returned until after Professor Agassiz's death, some years after the fire. Thus escaped the only complete specimen from the old museum which is known to exist.

Before the fire, The Transactions of the Chicago Academy of Sciences, Vol. I., was published under the careful editorship of Dr. Stimpson. It contained original papers by various members, with lithographs of Illinois fossils and colored plates of birds never before figured, besides many new illustrations. The volume, which was the result of the very best work of several years' scientific investigation, attracted universal notice among learned men in Europe and America. The first article of the second volume, by Dr. Edmund Andrews, on the Modern Geological Changes on the Shores of Lake Michigan, with maps and engravings, was issued immediately before the fire, in which disaster the lithographic plates were all destroyed.

Since the fire the Academy has only published six bulletins, consisting of carefully prepared original scientific papers, which had been read at the regular monthly meetings. Everything but the fruit of original research has been excluded, and some of the bulletins are of great scientific value, notably the fourth of the series, by W. Thomas and Dr. Hosmer A. Johnson, on Microscopic Organism in the Boulder Clays of Chicago and Vicinity. "This paper," remarks Dr. G. M. Dawson, of the Canadian Geological Survey, whose amplification of it appears in the sixth issue of the series, "refers principally to certain remarkable bodies first found by these gentlemen in 1865-66-67, in specimens of the clay through which the lake tunnel, which supplies the City of Chicago with water from Lake Michigan, was being constructed. On the completion of the tunnel large numbers of the same bodies were observed in the filtrate from the city water-supply, and which were subsequently proved to be identical with organisms described in 1871, by Sir J. W. Dawson, from the Devonian shales of Kettle Point, Lake Huron. They have since been observed in the Devonian rocks of a number of widely separated localities, and are now believed by Sir J. W. Dawson to be macrospores of rhizocarps. In accordance with this view, the generic name of Protoselavia is proposed by Dawson, instead of Sporangites. Properly speaking, this term would apply to the Sporangia containing these macrospores, and which are absent in the specimens in question."

The other publications of the Academy are the following:

In 1882, an important change took place in the management of the Academy. Under the constitution, the control of the finances of the Academy, and its property, was vested in a Board of ten trustees, appointed for life, and thus amenable in no way to the members. Vacancies occurring by death or removal were filled only by nominees of the Board. It was evident that the position of the Board of the Academy would be advanced by more direct responsibility, no difficulty was found in making a constitutional change which vested controlling power in the members.

The membership of the Academy is now greater than it has been at any other period, aggregating about three hundred; there are one hundred and seventy-five life members, about seventy resident members, and about fifty corresponding members.

The officers of the Academy since 1871 have been as follows:

1871-72—J. W. Foster, president; E. W. Blatchford, first vice-president; Dr. Hosmer A. Johnson, second vice-president; Dr. William Stimpson, librarian and secretary; Dr. Norman Bridge, recorder.
1872—J. W. Foster, president; E. W. Blatchford, first vice-president; Dr. Hosmer A. Johnson, second vice-president; Jacob W. Velie, librarian and secretary; Dr. Norman Bridge, recorder.
1873-74—Dr. Hosmer A. Johnson, president; W. W. Blatchford, first vice-president; H. H. Babcock, second vice-president; J. W. Velie, librarian and secretary; Dr. Norman Bridge, recorder.
1874-76—E. W. Blatchford, president; H. H. Babcock, first vice-president; William Bross, second vice-president; S. H. Peabody, librarian and secretary; Dr. Norman Bridge, recorder.
1875—H. H. Babcock, president; William Bross, first vice-president; H. N. Hibbard, second vice-president; S. H. Peabody, librarian and secretary; C. N. Holdren, recorder.
1876-79—H. H. Babcock, president; William Bross, first vice-president; H. N. Hibbard, second vice-president; Dr. Charles Adams, recorder.
1878-80—William Bross, president; H. N. Hibbard, second vice-president; F. H. Davis and J. W. Velie, librarian and secretary; Dr. Charles Adams, recorder.
1881—William Bross, president; W. W. Wells, second vice-president; N. S. Davis, Jr. and J. W. Velie, librarian and secretary; C. N. Higginson, recorder.
1882-85—Dr. Edmund Andrews, president; B. W. Thomas, first vice-president; W. W. Wells, second vice-president; S. C. Fellows and J. W. Velie, librarian and secretary; N. S. Land, recorder.
1885-88—William Bross has been president of the Board of Trustees since J. Young Scammon's retirement in 1885, and Jacob W. Velie has been curator since 1878.

Jacov W. Velie, secretary and curator of the Chicago Academy of Sciences, the son of Philip J. and Betsey (Wilbur) Velie, was born in 1829 near Amsterdam, Montgomery Co., N. Y. His paternal ancestors, several generations previously, came from Holland and settled at Albany. Dr. Velie's paternal grandfather married Catharine Boyd, a native of New York, of Gaelic ancestry. The Wilurs are natives of Vermont. Dr. Velie received his early education at Hammondsport, N. Y., where his youth was passed. At the age of twenty-one he began the study of medicine under Dr. C. S. Younglove of Hammondsport, with whom he remained three and a half years, at the same time supplementing his medical practice with a course of lectures at the Geneva Medical College. On the removal of Dr. Younglove to Illinois, Dr. Velie assumed the former's practice at Hammondsport. In February, 1856, he moved to Dixon, Ill., and, after a few months went to Rock Island, and engaged in the practice of medicine. He continued in this work without interruption until 1864, which made him proficient in this occupation has been greatly utilized in his position at the Academy of Sciences. In 1864, he spent five months in the Rocky Mountains with Dr. C. C. Parry the eminent botanist. During this time he assisted in taking the height of several peaks, one of which, 13,173 feet in height, by name was Mount Audubon, in memory of John James Audubon. The naturalist Dr. Parry named Velie's property, in honor of his brother, Dr. Parry named Velie's. In 1867, Dr. Velie returned to Bath, Steuben Co., N. Y., where he engaged in business as a druggist.

He had married Adela, a daughter of Leary Noble, of that town, in 1858. Mrs. Velie died on December 14, 1859, at Hyde Park, leaving
no children. In November, 1859, Dr. Veile removed to Chicago, and became the assistant of Dr. Simpson, then secretary and curator of the Academy of Sciences, on August 1, 1871. After the destruction in the fire of the Academy's collections, which included his own private collections, extending over thirteen years, and his scientific library with all its books, he accompanied Dr. Simpson, on a scientific expedition to Florida, Cuba and Yucatan, bringing back what formed the nucleus of a new collection for the Academy. Dr. Simpson died on the return trip, in Maryland, May 27, 1872. Dr. Veile, on his return with his collection placed in the new Academy building. In July, 1871, for faithful services rendered, he was presented with a paid-up life membership by the Academy. He has, since his first expedition with Dr. Simpson in 1872, made six similar ones to Florida in the interests of science and the Academy. He is an orthonologist of reputation, but of late years has given more special attention to zoology and archeology. He is a careful student, and there is no department of modern practical science which does not engage his interest. He is a corresponding member of the Davenport (Iowa) Academy of Natural Sciences, of the Biological Society of Washington, D. C., and of the National Ornithological Congress of the United States. In March, 1885, he received the honorary degree of Doctor of Medicine from the Medical faculty of the Northwestern University.

STATE MICROSCOPICAL SOCIETY.—The State Microscopical Society of Illinois had its origin as early as 1868, and is, therefore, nearly as old an institution as the Royal Microscopical Society, whose charter was obtained in 1866. In the autumn of the year first named, several informal conferences were held in Chicago by those interested in the microscope, for the purpose of forming a society to promote investigations with that instrument. The Academy of Sciences proposed an organization as a section of the Academy, but an independent course was decided on. On December 12, 1868, the Chicago Microscopical Club was formed, out of which grew the present society. Its original founders were—

By-laws and constitution were adopted on December 22, and W. W. Allport was appointed president, Henry F. Munroe secretary, Samuel A. Briggs curator and librarian, and Geo. M. Higginson, treasurer. Regular monthly meetings were held; a charter obtained from the State on March 31, 1869; and on April 23 of the same year, an organization was effected under the present corporate name, by-laws being adopted and officers elected on May 7.

The promotion of research in microscopy was augmented by conversazioni, in imitation of the Royal Microscopical Society, and experiments of a popular character maintained. At the first of these, held May 28, 1869, fifty instruments were used and about five hundred guests present. In March, 1870, the society adopted a constitution, amended its by-laws, divided its meetings into stated and scientific, relative for business and experiments, and a board of trustees was appointed. At the close of the first year there was an active membership of eighty-nine, thirty-one meetings had been held, the receipts had been $1,267, and the disbursements $1,033. Donations of books and specimens were made and the nucleus of a library and a cabinet had been obtained. In March, 1871, a conversazione at Farwell Hall, at which some fifteen hundred guests were present, gave the society an impetus in popular favor. In October, the Academy of Sciences, containing the property of the society, was destroyed, but the books and specimens were saved. The school journal, was started under the editorial management of S. A. Briggs, and in December the society was placed upon a permanent basis of operation. In 1879, the Royal Society made the president of the State Society an ex-officio member of the former organization. In 1883, occurred a joint meeting of the American and State Societies at the Calumet Club house, the session lasting three days. The largest exhibits ever held in this country, two hundred and fifty instruments being in position. During its existence of over seventeen years, the society has made marked progress, and some valuable papers have emanated from its members. The presidents have been W. W. Allport, Henry W. Fuller, Hosmer A. Johnson, S. A. Briggs, H. H. Babcock, B. W. Thomas and Lester Curtis. The present membership-roll shows five honorary members, twenty-two corresponding members, and eighty-five active members. The officers for 1884-85 are—

E. S. Bastin, president; E. J. Hill and W. H. Bullock, vice-presidents; William Hoskins, secretary; Charles S. Fellows, corresponding secretary; W. H. Summers, treasurer; Charles O. H. B. W. Thomas, B. F. Nourse, Hosmer A. Johnson and H. Grable, trustees.

THE WESTERN SOCIETY OF ENGINEERS was organized on May 25, 1869, as the Civil Engineers' Club of the Northwest, its object being to promote acquaintance among civil engineers in the West, particularly those residing in Chicago or having business interests centering here. The originator was Charles Paine, then chief engineer and general superintendent of the Michigan Southern Railroad. The fire of 1871 retarded the progress of the club, and no special efforts were made to enlarge its membership or extend its field of operations. In 1886, however, steps were taken to adopt a new constitution, and the present title was assumed when the society was incorporated, on September 1. Under the new régime regular meetings were held, papers and discussions were included in the exercises, a library of valuable engineering and scientific literature was formed, excursions to public works were made, and annual conventions held. The society has about one hundred and fifty members, nearly one-half of whom are residents of Illinois, the others being scattered through twenty-eight States, territories and foreign countries.

The presidents of the society have been as follows:

Roswell B. Mason, June 1, 1869, to June 13, 1870; Charles Paine, June 13, 1870, to June 9, 1873; Ellis S. Cheshbrough, June 9, 1873, to June 9, 1877; William S. Whipple, June 9, 1877, to July 1, 1879; John N. Stimpson, July 1, 1879, to August 3, 1880; Ellis S. Cheshbrough, August 3, 1880, to July 2, 1882; Willard S. Pope, January 2, 1882, to January 8, 1883; DeWitt C. Gregor, since January 8, 1883. S. F. Morehouse has been secretary since the organization of the society.

BENNETTE WILLIAMS, civil engineer, was born on November 9, 1844, in Logan County, Ohio. His father was a farmer and he was brought up in the country. After attending the local schools, he entered the University of Michigan, at Ann Arbor, where he was graduated in 1869, receiving the degrees of Civil Engineer and of Mining Engineer. On leaving the University he came to Chicago, and for a short time was employed in the private office of the well-known engineer, E. S. Cheshbrough. He shortly afterward secured employment in the office of the city engineer of Milwaukee. After a short stay there, he spent two years on railroad engineering work in Wisconsin and Illinois. In July, 1872, he obtained a position as assistant engineer in the office of the city engineer of Chicago, being engaged in the Sewerage Department and also in the Water Works Department. While holding this office, he was in charge of the design and construction of the Fullerton avenue conductor. He afterward became Superintendent of Sewers. On the retirement of Mr. Cheshbrough, civil engineer, Mr. Williams was appointed to that important office, holding it until September, 1879. Since then he has engaged in private practice, having, among other works, built the sewage and water works at Grand Haven, and others which are among the most perfect in the world. He has also designed systems of water-supply and drainage for the towns of La Crosse, Wis.; Saginaw, Mich.; Council Bluffs, Iowa; Decatur, Ill., and a number of places of minor importance. In 1882, Mr. Wil-
HISTORY OF CHICAGO.

McDowell, civil engineer, was born at Columbus, Ohio, on July 22, 1825. He entered Kenyon College, Gambier, Ohio, where he was graduated. He then studied law for two years with Judge Joseph R. Swan, at Columbus, Ohio, but, in 1848, he gave up the law and began his engineering career, being engaged in the Drainage of the Calumet region of Chicago. In 1853, he was admitted to the Bar and practiced law; he was also, for a time, the mayor of Monterey. In December, 1852, he returned to Ohio, and, until the close of 1854, was occupied in surveying and in general engineering work in Kentucky and Ohio. In February, 1855, he removed to Keokuk, Iowa, where he built the railroad around the rapids, and surveyed the harbor. He lived there until 1861, during part of which time he was city engineer of Keokuk. When the Civil War broke out, Mr. McDowell hastened to Washington and obtained the acceptance by the Secretary of War of seven independent regiments from Iowa, which were immediately raised and mustered into the United States service. These were the 4th Iowa Volunteer Infantry, commanded by Colonel Granville Dodge; the 5th Iowa Volunteer Infantry, commanded by Lieutenant-Colonel McColl; the 6th Iowa Volunteer Infantry, commanded by Colonel Mc- Dowell; the 7th Iowa Volunteer Infantry, commanded by Colonel Lancaster; the 1st Iowa Volunteer Cavalry, commanded by General Fitz Henry Warren. On March 22, 1861, Colonel McDowell went to Missouri, with his regiment, reporting to Major-General John Charles Fremont, then in St. Louis, and was by him assigned to command the 1st Brigade of General Sherman’s Fifth Division of the Army of the Tennessee. He participated, with his command, in the battle of Shiloh on April 6, 1862, where he was wounded. He moved with the army on Memphis, and down into Northern Mississippi, and thence to Grand Junction, Tenn. Continued exposure had now so affected his health that, in March, 1863, he resigned from the army and returned to Keokuk, Iowa. Shortly afterward he was appointed special agent of the United States Treasury Department, and exercised the functions of that office in Vicksburg, Miss., and Helena, Ark., until the close of the War in 1865. Colonel McDowell then returned to Keokuk, where he again engaged in the practice of engineering until 1868, when he was elected mayor of the city. This office he held for two years, when he was elected clerk of the Circuit Court of Lee County. In 1873, he removed to Chicago, and entered upon the practice of his profession, remaining there until 1877, when he accepted a clerkship in the Department of Agriculture in Washington, a position he held only a year, when he was transferred to charge of the construction of the new Post Office building in Chicago. This occupied Colonel McDowell until December, 1880, when he resumed the practice of engineering in Chicago, where he was married, in 1853, to Miss Geraldine Cowles, of Worthington, Ohio. Mrs. McDowell died in Boston, in 1873, leaving four children,—Gerald R., Malcolm H., Selden Lord and Lucy F.

GUSTAF HENRY CARLSON, civil engineer (a member of the firm of Gleyree, Carlson & Co., civil engineers and surveyors), was born at the city of Malmo, Sweden, on April 16, 1848. As a child he attended the schools of his native place, but at the early age of ten years he was sent to a fine school in Christiansfeld, in Germany, where, after studying the classics, and engineering, he was graduated, in 1865, at the age of nineteen years. Returning home to Sweden he was variously engaged until 1870, when he emigrated to the United States and became a citizen of this country, and went into stock raising in Kansas. However, he determined to practice his profession, so he came to Chicago, and entered the employment of the well-known engineer and surveyor, Mr. S. S. Gleyree, as his assistant engineer. Two years later, in 1872, he became assistant engineer of the Village of Hyde Park, where he was being actively engaged in getting out the atlas of that village. In 1874, Mr. Carlson returned to the firm of Gleyree, and in 1882, was admitted to partnership, under the firm name of Gleyree & Carlson & Co., since Gleyree, Carlson & Co., Mr. Carlson was married, in 1878, to Miss Julid Vodoo, of Hyde Park. They have one child, Gustaf Henry.

WELLAND FAIRBANKS SARGENT, civil engineer, was born at Sedgwick, Maine, in 1853. He was educated at the Institute of Technology in Boston, Mass., where he graduated in 1875. He was then placed in charge of certain surveys in Boston and vicinity, and engaged in preparing the necessary plans and specifications for the drainage of Dorchester, Newton, and other surrounding towns. This occupied him until 1877, when he removed to Chicago and became assistant engineer on the Chicago & Eastern Illinois and on the Chicago & Western Indiana Railroads, on which he worked until 1880. Pullman’s Palace Car Company then employed Mr. Sargent as their civil engineer of grounds for the new town of Pullman, Ill., where he was occupied, until 1882, in laying out the town, locating streets and sidewalks, and planning and constructing the system of surface drainage. He then went to Dakota as chief engineer of the Grand Forks & Missouri Valley Railroad, being engaged in constructing the Little Missouri siding in 1884, and having completed it in 1885, and returned to Chicago. Here, he became the superintendent and constructing engineer of the National Manufacturing and Milling Company of Chicago, a corporation engaged in planning and constructing that large and imposing mill complex, and Mr. Sargent is a member of the Western Society of Engineers. He was married in Chicago, in 1880, to Miss Fanny Baker, of Maine. They have one child, Marjorie C., born on March 31, 1884.

LEONARD HOLMOE, mechanical engineer, was born in Norway, in 1859. He was educated at the Polytechnic Institution in Christiana, in Norway, where he graduated in 1870. He at once immigrated to America, coming directly to Chicago, where he was employed by the North Chicago Rolling Mill Company as assistant engineer, on duty in connection with the construction of the works for that company in South Chicago. He remained with this company until Feb., 1875, when he was elected as chief engineer in this city, of R. Forsyth, civil engineer (member of the American Society of Civil Engineers), as assistant to him in making general plans and estimates for the improvement of steel-works. He continued in this employed for six years, 1874, Colonel N. S. Richardson opened an office for himself in the city of Chicago for the practice of his profession as a mechanical engineer. Since that time he has been engaged in the planning and construction of machinery for use in machinery and industrial appliances, giving special attention to the preparation of patent-office drawings. Mr. Holmoe was married in Chicago, in 1852, to Miss Hannah Peterson of this city. They have one child, a daughter, Astrid, 14.

O. D. ORVIS.—Chicago is fortunate in possessing not a few men who, as inventors, have achieved a reputation little short of world-wide, and the value of whose inventions have been, and are to be, appreciated abroad as well as at home. Mr. Orvis, who has been a citizen of Chicago for the past twenty years, and whose name as an inventor is known all over the civilized world, is one of those who has not only done credit to the city he calls his home, but to the whole country; for, by the force of his genius, he has only furnished another illustration of the truth that American inventors lead the world in producing both methods and appliances that have become milestones in marking the progressive civilization of the age. Mr. Orvis is a man yet in the prime of life, and one of the few inventors who have, in their lifetime, reaped in a measure the benefits of their skill. He is a native of the State of Michigan, born in Oakland County, June 10, 1831. His father was a farmer, and removed with his family to Wisconsin about 1848, where Orland was reared, passing his boyhood days on the farm. On leaving the common schools he entered Fox Lake College, from which institution he graduated in 1856, and then took a thorough course in one of the commercial colleges in this city. He then entered upon a mercantile career, founding the firm of O. D. Orvis & Co., wholesale dealers in picture-frames, mouldings, etc., at Nos. 111-113 State Street. This firm, which was one among the many others burned out in the great fire of 1871, was in existence until 1875, when failing health compelled Mr. Orvis to retire from business. He spent two years in comparative rest, when his attention was turned to the problem of doing away with the ‘smoke nuisance,’ which exists not only in Chicago but in all large cities. He then began to study carefully the chemistry of combustion, and, in 1879, invented an appliance embodying the air vacuum principle, and which, when applied to steam boiler furnaces, produced such perfect combustion that all smoke and gases arising therefrom were wholly eliminated. At the same time, too, he invented his smokeless hydro-carbon furnaces, and, in 1881, went abroad to introduce his invention in the larger European cities. He was everywhere received with marked cordiality, and in London, the smallest city in the world, the patent on which duty he continued the most satisfactory character. His first public test of his smoke-con- sumer in that city was given on the Fourth of July, 1881, and two days later the London correspondent of the Chicago Tribune wrote his paper as follows: "A Mr. O. D. Orvis, of Chicago, has just been granted a patent for a new invention which he calls a Smoke Expendance Burner, and which has just been demonstrated to the public in London. The substance is dried coal, and the object is to burn it with a vacuum, and to make the process as perfect as possible. The smoke is removed by a vacuum, and is rendered harmless. The process is very simple, and the apparatus is very much lighter than any other."
the burners in operation. In less than one minute the plume of unconsumed carbon that darkened the sky had disappeared from the head of the tall chimney, and the eyes-holes of the furnaces revealed the wonderful increased intensity of combustion, while the pointer on the steam-gauge began moving rapidly toward higher figures. Then the operation of the burners was suspended, and in another moment there rolled out from the top of the great stack clouds upon clouds of black smoke that drifted lazily away in the still summer air. And so the exhibition went on, until the most skeptical were obliged to succumb to the force of the ocular demonstration, and it was conceded on all sides that the Yankee had accomplished what the mechanic and scientific man of Europe had been working in vain for during the last fifty years. Following up his success in London, Mr. Orvis went to Paris, where, after a time, his appliances were placed on the boilers of the water works of that city, and were commended in the highest terms by the building engineers and scientists. A stock company was formed in Paris for their manufacture and sale, and is to-day doing a large and prosperous business. In fact, to-day nearly every factory in the manufacturing towns of England and France have adopted this furnace, and Mr. Orvis has received awards in the shape of medals and diplomas from England, France, Germany, Italy, and from countries as remote as China and Japan. The hydro-carbon furnace, also the invention of Mr. Orvis, is intended to burn oil as fuel, is likewise smokeless, and is so simple and yet so perfect in its construction that it is a matter of surprise that it was not discovered sooner. After his return from Europe, Mr. Orvis formed a joint stock company in this city for manufacturing and pushing his inventions in this country. Accordingly, in 1884, the Orvis Hydro-Carbon Furnace Company was incorporated, with a capital stock of $1,000,000, and with the following gentlemen as officers: Orland D. Orvis, president; Jonathan Clark, vice-president; T. D. Hall, secretary; and G. G. Alford, treasurer. The company's offices are in the Lakeside Building, corner of Clark and Adams streets. In concluding this brief sketch, it is only a matter of justice to say that Chicago is to be congratulated in having, as one of her citizens, a man who has been so highly honored in foreign countries as an inventor, and that, even by royalty itself, have the merits of his invention been noticed and acknowledged. In Russia, for instance, the distinction bestowed upon Mr. Orvis, gave to him a castle and sermons whenever he may choose to visit the Czar's dominions. In Austria, he could, had he desired it, have been made a Baron, but he preferred to return to this country, as he left it, a plain, unassuming American citizen, such as he is to-day: but his value and worth and what he has accomplished for the convenience of his fellow-men all over the world, will not soon be forgotten.

BANKING HISTORY.

In the second volume of this History has been given an account of Chicago banking, during the period when the system of finance, commonly characterized as "Wild-Cat," ruled supreme. As has been there said, the secession of the Southern States, with its attendant repudiation of State indebtedness and derangement of securities on which was based a not inconsiderable proportion of the currency, on whose fluctuating value ordinary commercial transactions were based, resulted in the deepening of the already wide-spread distrust in the then existing system. With the legal establishment of a national currency in 1862, the institutions popularly known as State Banks ceased to be banks of issue. "Wild-Cat" money disappeared from circulation, and the complications inseparable from an era of illegitimate and sometimes irresponsible, banking, began gradually to adjust themselves. The year 1871 saw a uniform and well-established circulation and a well-organized system of finance established in Chicago, of which the banks necessarily formed the corner-stone. Immediately before the occurrence of the fire, there were nineteen National and nine State (or private) banks established and carrying on business in this city. Their aggregate capital (not including that of the savings banks) was $13,500,000, divided relatively as follows:

- State (or private) banking institutions .......... $8,950,000
- National Banks ........................................... 6,550,000

An idea of the volume of business then being transacted by them may be gathered from the following statement of clearing-house returns for the years 1870 and 1869, the ratio of increase during the first nine months of 1871 being presumably not less than that for the year 1870:

The conflagration exerted a serious effect upon the banks, for the time being. The estimated loss of personal property alone, including money burned up (but not as a matter of course evidences of indebtedness), was placed at $1,000,000. Of the nineteen National banks, all were burned except one. The other banks which stood in the track of the devouring element and suffered were as follows: Germania, Hibernian (savings), Marine, Real-Estate Loan & Trust Company, Union Insurance & Trust Company, Chicago (savings), Commercial Loan Company, German (savings), National Loan & Trust Company, Normal Company, and Illinois State Savings Institution. Their vaults were, almost without exception, buried in the ruins, and pending their recovery great anxiety prevailed. The contents of the vaults, however, as a rule, ultimately proved to be uninjured. There was but one case of serious loss. A safe belonging to the firm of L. Silverman & Co., containing $50,000 in gold and currency, was destroyed.

As early as Wednesday, a meeting of the principal bankers was held, over which W. F. Coolbaugh, president of the Union National Bank, presided; no formal action was taken, but the immediate resumption of business was tacitly resolved. Before the close of the day, at least twelve banks had secured temporary quarters, and announced their intention to recommence operations as soon as their chosen places could be arranged. While much uncertainty was felt as to what the banks might be able to do, this action on their part inspired confidence, which was still further strengthened by a well-grounded report that the Bank of Montreal, one of the richest on the continent, had determined to open an agency in Chicago. On the following day (Thursday), the banks determined upon the immediate repayment to depositors of fifteen per cent., and this determination was publicly announced through the press on Friday. Of their own ability to pay more, they had no doubt; the arbitrary limit was fixed with a view of avoiding a general run, which might have followed the adoption of any other policy. At the same time, the savings banks declared their willingness to pay in full all depositors whose claims did not exceed twenty dollars, and to pay twenty dollars on account to those whose legal demands exceeded that sum. At the time of the adoption of this policy, many denounced it as too close, but time justified its wisdom. A considerable proportion of the assets of the banks consisted of commercial paper;
to have pressed payment of this at such a time would not only have been cruel, but would undoubtedly have precipitated a panic. Moreover, the banks desired to keep in their control funds sufficient to facilitate the transaction of business and the movement of produce. For the first several months after the fire, the principal demand for accommodation came from the grain, produce and lumber interests, and the revival of these in-

dustries being essential to the general revival of com-
merce, the banks did all in their power to aid merchants and forwarders.

On the Tuesday following the fire (October 17), most of the banks resumed payment unconditionally, and coped with the emergencies of the situation without difficulty. The deposits exceeded the drafts, even with the savings banks. Among the causes of this fact may be named the circumstances that large sums of money were forwarded here for relief and millions of dollars paid by insurance companies in settlement of losses. In addition, much Eastern capital was sent here for investment in real-estate at anticipated low prices. The operation of these causes, with the action of the banks, prevented a panic, and the sequel showed that Chicago had not only the sympathy, but the confidence, of capitalists of other cities. On November 15, an agency of the Bank of Montreal was established here, resulting in the forwarding of the mercantile movement, by an increase of credits on the East, on Europe, and on China. On October 16, Comptroller Hubbard made an official examination of the Chicago banks, and reported their condition as satisfactory, and from the date of the resumption forward, for a period of some months, money was so "flush" in this city that the banks had more money than before the fire, notwithstanding the fact that immense sums were sent East in payment of mercantile indebtedness. This plethora of money lasted until the following May. Moreover, the credit of Chi-

cago and her mercantile community was such, both at home and abroad, that loans to almost any amount were obtainable on request. Indeed, many Eastern and Euro-

pean capitalists formed associations for the express pur-
pose of loaning money to aid in the rehabilitation of the city. Millions were placed here at rates of interest which may be said to have been comparatively reasonable and on favorable terms, and that the city was sub-

stantially re-built within two years may be largely at-
tributed to the immense opportunities for investment afforded by the fire itself.

In what has been said, no mention has been made of the action of the savings banks, other than to refer to their partial resumption of payments at the same time with the other banking institutions of the city. The
Among them was the Third National, the second in importance in the city, which, however, resumed almost as soon as an examination into its financial condition could be made. Commenting on its resumption, on October 9, 1873, the Times of that date said:

"This event may be said to mark the conclusion of the panic, so far as this city is concerned, though it had virtually ended several days since. In other cities the banks are still considering the question of resuming payments in currency, but they find a pretext for not doing so, in the fact that the New York banks are still issuing loan certificates."

In concluding a review of the local effects of the crisis on the following day, the same journal remarked:

"Chicago can say 'vent, vidii, vivi.' There never was a severer test than that we have just undergone, and it has more than demonstrated the substantial foundation of our business structure. Had there been any shame about Chicago, the last panic, coming when it did and how it did, would have ground us to powder. That it did not; that it has passed without leaving a mark of its passage, is a fact which we commend to our own citizens and those of other cities who need to be reminded of it."

The attention of the reader should be directed to the general solvency of the State banks, as evidenced by the manner in which, as a rule, they weathered the storm. Notable illustrations were the Merchants' Loan and Trust Company and the Traders' Bank which have never known one hour's financial embarrassment.

During the five years following the panic of 1873, however, there were, in all, twenty-one failures—more or less important—of banking institutions, most, if not all, of which might be traced to this cause.*

The savings banks were rather benefited by the crisis than otherwise, as owing to the depreciation in Chicago real-estate, which began almost with the announcement of the failure of Jay Cooke & Co., they became the depositaries of a large portion of the current fund which had up to that time sought investment. While their condition had been fairly easy since the fire, during which time the two leading ones, the Bee-Hive and the State Savings Institution, had grown into public confidence, they now indeed experienced a flush of money in their vaults for the first time.

The failure of the two savings banks above named attracted so much attention at the time, not only in Chicago but throughout the State, that a brief sketch of the origin, progress and downfall of each may be of interest.

The first-named—the Bee-Hive, the legal name of which was the Merchants', Farmers' and Mechanics' Bank—was organized under the law of 1861. The original incorporators were M. and Sidney Myers, T. R. Johnson, Josiah Grant and G. B. Chaffee. The amount of capital stock was fixed at $30,000, with the privilege of increase to $500,000. The bank was opened in Galesburg, and three years later was removed to Chicago. The only change of importance in the personnel of the stockholders occurred in 1864, when an interest was bought by R. B. Westfall. The latter's investment in the concern was said to have been $10,000, which amount (as investigation subsequent to the bank's failure in 1877 showed) he very soon drew out. He

* It is worthy of remark in this connection that no shadow of disaster has fallen upon any of the regular banking institutions since the failure of the German Savings Bank in December, 1872, so thoroughly was the system purified by the panic and its results.

---

In commenting on the financial situation on October 28, a leading journal said:

"The policy of the moneyed institutions, though somewhat conservative, is fully as liberal as could be expected with business in its present disturbed condition, and until trade revives in all departments of the general market, and the present nervousness in business and monetary quarters is supplemented by a healthy feeling, a cautious and close policy is likely to be adhered to. The banks appreciate, fully, the responsibility which rests upon them in connection with the speedy restoration of business, and as soon as the condition of affairs will warrant they will unquestionably treat all their patrons in a free and liberal manner."

By the beginning of May following the fire (1872), the resumption of business had become general, and before the close of the year the material and business growth of the re-built city had justified (if it had not demanded) the formation of a number of new banks.

At the end of 1872, the number of banking institutions in the city, with their capital and surplus and deposits, were as follows:

<table>
<thead>
<tr>
<th></th>
<th>Capital and surplus,</th>
<th>Deposits,</th>
</tr>
</thead>
<tbody>
<tr>
<td>21 National banks</td>
<td>$11,044,885</td>

*Some of which were connected with other institutions.
was president; Myers, cashier. During the absence of Myers from the city, in the fall of 1873, Westfall, who was left in absolute control, made to himself liberal advances from the bank's funds, and on the cashier's return insisted that the president in debt to the bank in the sum of $80,000. This account was ultimately closed by the bank's accepting Westfall's stock in settlement, and the surrender of his obligations. The precise amount of stock thus surrendered was never known, the official investigation disclosing no record of any transfer of stock either to or from him.

As in the case of some other savings banks which failed about the same time, the management made loans largely on real estate on which an over-valuation had been placed, receiving an exorbitant rate of interest in compensation for the risk assumed. Six per cent was advertised as the rate to be paid depositors, and it was necessary to resort to "heroic measures" in order to redeem the pledge. In June, 1877, a "run" on St. Louis savings banks occurred, and so sensitive was the money market, that its effect was to create alarm among depositors in similar institutions in Chicago. The Bee-Hive was in no condition to meet any unusual demand for money; and Myers availed himself of the right, legally accorded to the institution, to give twenty and thirty-day notices to depositors. A sixty-day loan of $100,000 gave him temporary relief, and his indomitable self-assurance was of even still more worth to him at this crisis. Three depositors, however, procured an injunction against the institution, and its doors were closed. Even then, Myers, in an open letter to depositors, expressed his sympathy with them, assured them that all assets were available, and announced his belief that they would be paid in full. On September 22, 1877, S. D. Ward took possession of the bank's assets, as receiver. The vaults contained exactly sixty-two cents, in cash, all that remained after a fortnight's run. Every security of value had been pledged, and the aggregate liability was $655,000. It was at once apparent that the only hope of paying depositors anything rested in the possibility of recovering from Westfall. An injunction was obtained by the receiver, restraining that individual from disposing of his property, purchased with funds obtained from the Bee-Hive. This property ultimately passed into the receiver's hands, and ultimately—three years after the bank's failure—a dividend of ten per cent was paid.

The State Savings Institution was organized in 1863. The original charter was granted to the Illinois Savings Institution in 1861, and subsequently transferred. Its capital stock, originally, was $100,000, owned in equal shares by J. C. Haines, Jared Gage, E. M. Haines and C. D. Bickford. To detail the subsequent changes in the list of stockholders would be as tedious as unint- eresting. The first increase in the capital stock was made on June 22, 1869.

In 1872, D. D. Spencer became a stockholder, and also on January 7, 1873, a director. Meanwhile, Mr. Haines had retired from any active participation in the bank's affairs, and Spencer (at the mention of whose name the poorer class of savings bank depositors in this city yet turn pale) gradually obtained absolute control. The finger of suspicion had already pointed toward Spencer, owing to his connection with the Cook County National Bank, an institution organized by him, which failed badly in 1873. Space forbids more than a mere mention of the very peculiar methods of finance employed by him in the conduct of the State Savings Institution. Before February 1, 1873, Spencer, with Thomas S. Dobbins (his nominal backer), had obtained a controlling interest, owning, conjointly, eight hundred and twenty four of the entire one thousand four hundred and fifty shares of capital stock. In March following, the directory voted to increase the amount to $250,000, by the issuance of three thousand nine hundred and fifty and fifty additional shares, of a par value of $100 each. The actual increase of stock, however, was sufficient to raise the entire amount to $650,000. In June, 1873, Spencer and Dobbins became, respectively, president and vice-president of the bank. Two thousand of the three thousand nine hundred and fifty shares authorized were issued to Spencer; Dobbins, shortly thereafter, withdrew from the concern, and, on February 5, 1874, Spencer owned more than four-fifths of the entire capital stock of the institution, and on September 9 of that year, in his capacity as board of directors, he transferred to himself as president four hundred and ninety additional shares; shortly after which he obtained from C. T. Bowen one hundred and twenty more. He was then sole and undisputed dictator of the bank's affairs, which still, however, nominally remained under the control of a board of trustees. The gentlemen on which composed such board gradually (but as rapidly as possible) withdrew from even apparent conduct of the affairs of the concern. Enormous loans were made to Spencer on his personal notes, the obligations being discharged by the payment of bank stock, the acceptance of which in settlement was authorized by the directory. Of course, insolvency, with all the attendant horrors of a failure which involves hundreds, if not thousands, of hard-working, frugal men and women, was inevitable.

As a commentary on the causes resulting in the suspension, it is only necessary to call attention to the following copy of a promissory note, found by the assignee among the bank's assets:

CHICAGO, Dec. 25, 1873.

One year after date I promise to pay to the State Savings Institution, in the City of Chicago, four hundred and seventy-nine thousand one hundred and seventy-seven dollars and forty cents, for value received, with interest at eight per cent, per annum for money borrowed.

D. D. SPENCER.

Simultaneously with the closing of the bank's doors, Spencer disappeared from Chicago; he is now said to be living in Germany. Abner Taylor was appointed assignee of the defunct institution, and ultimately fifty per cent, was realized by depositors, the last dividend having been paid in 1884. Close upon the failure of these two institutions, followed that of the "Fidelity." Dr. V. A. Turpin was made receiver of the latter, and careful management enabled him to pay some seventy per cent, of an indebtedness amounting to $1,500,000. In several instances (including, notably, the concerns mentioned above), the surplus on hand in savings banks' vaults proved too tempting, and instigated, unknown even to some of the directors, the acceptance of a line of loans on suburban property which was just beginning to be marketable, and on which a high rate of interest could be obtained. The greed of profit at the expense of security, combined with other reckless methods of management, brought on what has been commonly termed "the Savings Bank crash" in 1877. All of these institutions were holding out to customers the induc-
ment of a payment of six per cent. interest on deposits. The rates, however, at which profitable and well-secured loans could be made had been gradually decreasing since the War, and the eagerness with which money found its way here at the period of the fire and after, reduced the income of the savings institutions from such securities as could be considered of an undoubted character to a figure which, frequently, barely enabled them to exist.

It is not too much to say that public confidence in savings banks has never fully recovered from the rude shock which it sustained by the exposure of mismanagement in 1873. As a result, comparatively few new institutions of this character have been opened in Chicago since that year. To such as passed safely through the difficulties of that and other trying periods, a steady and growing patronage has been accorded, and it may be said with truth that they rank with the national and State banks in the estimation of the community. There is one additional fact that is necessary to be stated in this connection. From the very nature of savings banks, and because depositors place their money with them as an investment, they are compelled to pay reasonably high rates of interest; hence to obtain good returns, they must make permanent, or lengthy, investments of deposits. Their funds thus being placed, renders them infinitely more susceptible than commercial banks to runs or panics, and should they be compelled to realize upon the securities, such securities must inevitably undergo a shrinkage of value, no matter how judicious or conservative the management. In this instance, a thoroughly reliable bank might be forced to suspend the payment of its depositors, just as a combination of creditors is able to compel the retirement of almost any commercial enterprise. It is an indisputable fact that, in the closing-up of many savings banks, the cause was simply a cumulative presentation of demands on the bank, which forced the diminution of their assets so as to fall below the sums necessary for the redemption of such claims; and, to the credit of Chicago's fiduciary agents, it is said, is considered in the majority of cases the savings banks were forced out of existence by such causes, and not from inefficiency or untrustworthiness in the management.

With the close of 1879, appeared substantial signs of a permanent recovery from a comparative stagnation of business which had succeeded the panic of 1873. It should be remarked here, however, that no bank failure has occurred in this city since 1877. The advance and prosperity of the city have been marked by the constant increase of patronage and confidence in the banks. The growth of business is best shown by the statistics of the banks and the clearing-house. In 1880, the bank deposits aggregated $64,764,000 as against about $47,000,000 in 1879. The clearing-house returns for the year showed an increase of nearly $500,000,000 and of $25,000,000 in 1881. Chicago, in 1880, gained second place in amount of deposits among the great banking centers of the Union. The year 1881 closed with a record of added prosperity. Confidence in all quarters was by this time fully restored. From the beginning of the year the financial institutions had experienced an increasing activity. A steady stream of money flowed into the banks, which they handled to their increasing gain and the best interests of all classes of the community. Several banks found it both safe and expedient to augment their capital; the total increase of capital stock, during twelve months, among the institutions belonging to the clearing-house alone being $3,800,000. There were, besides, large accumulations in other banks, which continued to be carried as undivided earnings.

The increase in clearing-house returns for 1881 was $137,439,400. In the year following, nearly every bank of consequence earned, and paid to depositors, dividends ranging from 10 to 15 per cent., besides adding liberal balances to their surplus or undivided profits, and the clearing-house statistics showed an increase of $159,086,139,—a gain of $80,038,000.

Further signs of the growth of business were seen in the constant enlarging of commercial quarters and additions to clerical force.

The following year saw one of the banks of Chicago (a city of less than fifty years' growth) advanced to the fourth place among the great financial institutions of the country. The dividend-paying of the previous year was duplicated, and the record of the year was that of
The Chicago Clearing-House Association, established as a private institution in 1870, and incorporated under the laws of the State of Illinois in 1882, now includes in its membership twelve National banks, two State banks, three savings and two branch banks.

The clearings made through the Association during 1884 were $2,559,350,836 against 993,060,503.47 for 1872, showing an increase of $166,820,333.33. Chicago to-day occupies the position of the clearing-house for the banks of the West and Northwest, and ranks third in amount of clearings among the cities of the United States.

A. P. Smith, manager of the Chicago Clearing-House Association, is a son of Orson Smith, one of the early and prominent citizens of Chicago. His mother's maiden name was Mary Ann Paul, who came to Chicago from Cooperstown, N. Y., with her husband in 1838. As early as 1842, Orson Smith was elected village marshall, holding that office for two years, and as such had general supervision of the sanitary affairs of the young town. He was also for some time the sheriff and commissioner of the county. There are seven children now living,—Mrs. J. M. Brown, of St. Joe, Mich.; Mrs. Sarah Crow, of Crystal Lake, III.; Mrs. Crosby, of Chicago; Mrs. Barber, of Naperville, Ill.; A. P. Smith, manager of the Clearing-House; Orson Smith, vice-president of the Merchants' National Trust Company; and Miss May Smith, the youngest member of the family. Messrs. A. P. and Orson Smith have for many years been connected with different banking institutions of the city, the former having been clerk in P. Gramlich's bank as early as 1847. When the Traders' National Bank succeeded that institution, he continued his connection, and, from 1870 to January, 1888, he acted as cashier. At that time he was appointed to his present responsible position.

The Chicago National Bank—When the fire of 1871 burned the buildings at the corner of Lake and LaSalle streets, then occupied by the Union National Bank, it was necessary for that institution to find some place in which to re-open its business. C. T. Wheeler, then vice-president of the Union National, tendered the use of a portion of his residence on Wabash Avenue, and for a few months the business was transacted there. In the fall of 1871, Messrs. Coolbaugh, Powers and Wheeler erected the Central Union Block on Madison Street, near the river, and the business was transferred to it in December of that year. In 1873, they again removed to their present location, having moved the quarters in the Union Block to the southwest corner of Washington and LaSalle streets. While doing business at Mr. Wheeler's residence, the directors and officers were the same before the fire, with one exception. In November, 1871, C. J. Cornell, cashier, resigned his position and was succeeded by George A. Ives. In July, 1872, the capital stock of the bank was increased from half a million to one million dollars. In January, 1873, Mr. Wheeler resigned the vice-presidency, but continued in active business in the city, and that office remained vacant until January 11, 1876, when he was re-elected and returned to the vice-president's chair. Upon the death of William F. Coolbaugh, which occurred November 14, 1875, Mr. Wheeler was elected in his place, and held the office until December 22, 1875, when he resigned and withdrew his connection from the bank. In January, 1878, Charles A. Munn was elected vice-president, to fill the vacancy caused by Mr. Wheeler's election to the presidency. On March 29, 1878, the capital stock of the bank was increased from $500,000 to $1,000,000, the change being made owing to the withdrawal of Mr. Coolbaugh's large interest by his estate. In January, 1886, Mr. Munn resigned the vice-presidency, and W. C. D. Grannis was elected thereto. At that time, also, Mr. Ives was succeeded by John J. P. Odell as cashier. At the annual meeting, in January, 1883, Mr. Grannis was elected president, vice Mr. Wheeler, and Hon. Charles H. Farwell was made vice-president. In that month, also, W. O. Hiplow was made assistant cashier. On December 29, 1884, the charter of the Union National Bank of Chicago expired, and the concern went into voluntary liquidation. The name of it was succeeded by a new charter, numbered 3278, and the business went on uninterruptedly under the same name as before. The capital stock of the bank was then increased to $1,000,000, and was authorized to increase to $5,000,000. At the annual meeting of the board of directors, in January, 1885, the following gentlemen comprised the directory of the bank: David Dows, of New York; C. R. Farwell, W. H. Howard, C. R. Cummings, David Kelly, J. H. Dwight, Nathan Corwin, W. C. D. Grannis and J. P. Odeell. They then elected W. C. D. Grannis, president; John J. P. Odeell, vice-president; W. C. Oakley, cashier; and W. O. Hiplow, assistant cashier. The latest annual statement of the Union National Bank shows its liabilities to be $10,324,211.84—figures well illustrating its condition and growth up to the present time.

The steady and prosperous business as reported, even down to the least of the bankers. The clearings, for the year 1884, showed a total of $2,559,350,836, a decrease from 1883 of $266,272,562. This fact must not, however, be accepted as indicative of any actual diminution of the business during the year. It was largely the result of a serious shrinkage in values. The average prices, in 1884, for both grain and merchandise, were the lowest which had ruled during a period covering fifteen years.

The aggregate of bank deposits during the year increased $449,201. The Metropolitan National was organized during the year, and paid its first dividend in less than nine months from the commencement of business. The Continental National was added to a list of dividend-paying banks, which, with numerous others, were conducting the city's banking business, essentially, on a cash basis, thus increasing the proportion of ready money to the bank's capital. The large Eastern and European capital which seeks investment in the West also, to a large extent, passes through the hands of Chicago's financiers. The city's banking facilities, at the close of 1885, included fourteen National and eight State banks, ten savings institutions, three branch banks and some thirty-two private banking firms and individuals. The aggregate capital invested is about $17,000,000; the total deposits are estimated at $75,000,000.

The following summary of the condition and business of the Chicago National banks is taken from the report of the Comptroller of the Currency, of October 1, 1885:

Increase in twelve months... $6,413,189.88 $6,943,590 $2,999,928 $871,600

Since Dec., 1872... 25,351,752 25,555,217 47,984,806...
The Chicago Daily Tribune, 1873:

The New National Bank of Chicago has been in business for two years, having been organized under the laws of Illinois on December 31, 1872. The bank is located at the corner of Dearborn and LaSalle streets, and is one of the largest in the city. The capital stock of the bank is $1,000,000, and the surplus is over $200,000. The bank is conducted by Mr. T. M. Ives, president, and Mr. W. C. B., vice-president. The bank is open from 9 A.M. to 5 P.M., and is closed on Saturday and Sunday.

The bank has a large number of customers, and its business is increasing daily. The officers of the bank are well known and respected in the community, and the bank is Doing a good business. The bank has a large amount of cash on hand, and is well secured by real estate and personal property. The bank is well managed, and its books are in good order. The officers of the bank are doing a good business, and the bank is doing a good business.
The board of directors of the Union National Bank then made Mr. Wheeler president of the bank, and he occupied the chair until the latter part of 1852, when he withdrew from the Union National Bank, and organized the Commercial Bank of Chicago, of which he is president, director and a heavy stockholder. Mr. Wheeler, during his connection with the Board of Trade, was one of its prominent bankers, and was a prominent member of various important committees, nearly all the time, during the years 1853 to 1860, inclusive. In April, 1862, he was elected to the presidency of the Board of Trade for the term of one year, and, in that capacity, he was on the building committee which submitted the plans by which the Board of Trade finally ended in the erection of the Chamber of Commerce built before the great fire. During his career as a banker Mr. Wheeler has become recognized as one of the most able and substantial bankers in the city, and he has surrounded himself with an excellent business with men who are representatives of all that is progressive and conservative. Mr. Wheeler was married to Miss Kate L. Hoyt, of Michigan, in 1857, but her death occurred in this city on May, 1855, leaving an only daughter, Kate. Mr. Wheeler is a member of the Union League Club, and resides near Lincoln Park.

The Merchants' Loan and Trust Company, from its organization, maintained the policy of making only such changes in the directory of its officers and trustees as became absolutely necessary. The resignations of officers have in every instance been unrequested on the part of the individuals, and the vacancies in several instances have been caused by death, resignation, or retirement to the city, or voluntary withdrawal. The history of this monetary institution is given from its organization up to 1857 in the second edition of this work. The Board of trustees and the great fire, was comprised of the following gentlemen: Solomon A. Smith, William E. Daggett, George Armour, E. K. Rogers, P. L. Voe, A. H. Burley, C. F. Kellogg, Jr., John Tyrrell, E. Blackman, H. E. Lowe, Mr. Smith, John C. Farwell, and E. F. Talbot.

The Continental National Bank was organized in March, 1853, at the request of the strongest and the soundest financial concerns in the country. It has a paid-up capital of $8,000,000 and is probably doing as safe and, at the same time, as profitable a business as any bank in Chicago. Its facilities for transacting business, domestic and foreign, are simply perfect, or as nearly as is compatible with human infirmities. The bank first opened for business in the old Grinnell block, which was destroyed by fire on February 19, 1855. The next morning the Continental was open and ready for business, and rooms at the northeast corner of LaSalle and Adams streets.

There are thirty-two employes in the bank. The officers of this excellent concern are Calvin T. Wheeler, president; John C. Black, cashier; and Douglas Hoyt, assistant cashier. The board of directors consists of two of the gentlemen mentioned, and the board of trustees, of T. Crane, A. G. Von Schack, Henry Botsford, James H. Dole, H. C. Durand, M. C. Stearns and William G. Hibbard. These gentlemen are prominent in Chicago, and enjoy a high reputation in business circles East and West. Mr. Wheeler, president of the Continental National Bank, is considered one of the best bank officers in the West, and is admirable management of the new concern is doubtless due to the pronunciation of its success.

Calvin T. Wheeler, the fourteenth vice-president of the Chicago Board of Trade, and president of the Continental National Bank, has for the past thirty-five years been conspicuous in the financial and commercial history of this city. He is a native of the State of New York, and was there reared and educated. In 1841, he made his first advent into this city and formed a partnership with S. Flint, under the firm name of Flint & Wheeler, and commenced a general commission business. He then became a member of the Board of Trade and was identified with the same for over a quarter of a century. During this period Mr. Flint & Wheeler, the firm was among the largest receivers in the city. Their first elevator had a capacity of 100,000 bushels, and, in 1856, they completed Rock Island Elevator "A," which had a capacity of seven hundred and fifty thousand bushels, all the property of the firm, which was a great advance over all others who went into the private banking business. The name of the firm was Chapin, Wheeler & Co. They were succeeded by William W. Coon & Wheel, and, in 1865, organized the Union National Bank of Chicago. Mr. Wheeler became president of the firm, and, under the death of Mr. Coon, the president, on November 14, 1877.
quarterly, and during its whole career has never suspended its busi-
ness nor deferred a dividend. After the declaration of quarterly
dividends, its surplus has rapidly increased, until at present it
amounts to $200,000. Of this bank, John Wentworth was one of its
founders, in 1855, and at one time possessed its original capi-
tal for $5,000. At that time the capital was $500,000, and
with the augmentation of capital its interest has also been added
to its present $1,000,000. It is justly due to him to state, that it is
with his advice and counsel the affairs of the bank have been so
conservatively administered.

Solomon Albert Smith, deceased, was born at Southwark, Mar-
ch 24, 1819, and a "National" liberal education became inter-
tested with his father, who was then engaged in the manufacture
of powder, as his father had been before him. In these days the
business was necessarily small as compared with its present propor-
tions, and Mr. Smith was in the habit of making periodical trips
through the country, disposing of cans and legs of the explosive,
and making calculations. Convinced that the growing West offered
greater attractives than the canal and going New England towns, Mr. Smith resolved to leave his Eastern
home. In 1830, he pushed his way westward, and, after a long
and tedious trip by the Erie Canal and lake steamer, reached Chi-
cago. On arriving here he became connected with the firm of
Larner and Matthew Laffin, then the largest manufacturers of pow-
der in the United States. In 1841, Mr. Smith became interested in
the timbering and the firm became Laffin & Smith. Eight years later,
Mr. Laffin died, leaving all his duties to his son, and Mr. Smith
was retained and continued for several years, when Matthew
Laffin withdrew and the firm was reorganized as the Laffin & Rand
Powder Company. In 1850, Mr. Smith, who had been one of the
original corporators of the Merchant's Loan and Trust Company, and
with which his name is indisputably connected, was called to the
presidency of the concern, succeeding J. H. Dunham, then largely
engaged in the wholesale grocery business. The firm of Laffin, Smith,
thus became one of the oldest concerns in the presidency, infused new life and vigor into the institution. The
financial outlook was far from promising. The political complica-
tions growing out of the election of President Lincoln caused capital
exceedingly timid, and the bank-notes, based on Southern stocks and
bonds, were gathered in and sent home for redemption. Bank suspen-
sions became numerous, and notes at par one day were at a discount
two days later. The situation was an exceedingly trying one. Mr. Smith went to Springfield, Ill., where large blocks of the Southern stock
were on deposit with the Auditor as security for the circulation of
the banks operating under special charter. By carefully watching the
course of events, and by careful and shrewd connections, which
was always his distinguishing characteristic, he so managed the
interests intrusted to his care that his bank passed through the
financial panic precipitated on the country at the breaking out of the
Rebellion. At each successive annual meeting of the bank share-
holders, he was re-elected to the presidency, and to its duties he gave
his whole time and energy. In him they had the most perfect con-
fidence, and his knowledge of men and things kept well in hand, and not until the
fire of 1871 did anything occur to break the even tenor of his way.
On that Sunday night all the books of the bank were de-
stroyed, and it was not for three or four days afterward that he could
entirely, to his intense joy (and this was shared alike by the
stockholders and depositors), that the money vaults had proved faithful. The returns, drafts, letters and papers were intact. There was enough and more to pay the debts in
full. The directors and Mr. Smith would have been perfectly satis-
fied had their prospective losses swallowed up their entire surplus
and left the capital intact. Thanks to the energy of Mr. Smith,
the depositors were paid in full, and his bank at once jumped into
the highway of prosperity. Two years later the Jay Cooke failure
seemed like a panic over the country. Banks tottered and fell, others
temporarily closed their doors, millions dropped off from affluence
and poverty. But through it all came the "Merchants' Loan and Trust
Company," unscared and unscathed. For Mr. Smith was one of those
men who believe in giving what he owes, his directors insored
his action, and as much to him as to anyone else was the financial
credit of the city kept unimpaired. For ten years prior to his death
Mr. Smith had not been well, though promptly and faithfully
attended to his business affairs. After lingering illness for many
months, he died on November 25, 1879. He was conscious to the
last moment, and the evening before his death he advised his subor-
dinates on business matters, and thus virtually controlled the con-
tinuation of affairs in his bank till almost up to the hour of his death.
Mr. Smith was a man of fine physique and commanding appearance.
In his talk quiet and rather reserved, but without a particle of
that hauteur which is popularly supposed to be one of the charac-
teristics of the successful bank president. He was slow to think, and,
before making up his mind on any question, gave it a mature de-
liberation. Having once arrived at a conclusion, he was invomissible,
Frugal and extremely plain in his habits and dress, he devoted himself
entirely to the duties set before him. Extremely methodical in
his business, his private life bore the same impress. He made no
allowance for court polite attentions, and never had time for the
great questions of the day. With more than a father's devotion
he worked for the interest of his bank, and it was only in the circle
of those few for whom he had respect, the cares and responsibilities of his position. He had but a
passing interest in politics, just enough to understand their rela-
tions to the financial interests of the country, and with those who
had a National tie he was a National man and active in his affiliation.
His demise created a void in the banking circles of the country most difficult to fill. As a banker and financier, Mr. Smith
was rated as one of the strongest of the strong, and to him is due
the greater honor of upholdng the course of unbroken integrity
and probity to almost any other man. Mr. Smith was twice married. His first wife was Miss Mills, a sister of Messrs. M. N. and John R. Mills,
whom he had three children, all of whom are dead. His second
wife was Miss Marie L. Laffin, by whom he had two sons. Byron
L. Smith, is the only one now living, the present first vice-president
of the Merchants' Loan and Trust Company

THE NORTHWESTERN NATIONAL BANK, ranking among the
oldest and staunchest of this class of Chicago's monetary institutions,
was established in August, 1864, under its present name, and was
the sixth bank in this city organized under the National Banking
Law, 1863. The first name of its president was Mr. Sturges, and
George Sturges, cashier; and the capital stock was at that time
$500,000. The bank first opened its doors in a building on Dear-
born Street, named the "Smith's Hotel," what it is now called, and at the time a branch office was opened in the Lind Block
on Randolph Street. In the following year, and as soon as the
Chamber of Commerce was re-built, the Northwestern National
again took up quarters there, and remained there until 1876, when
it moved to the present location on the northeast corner of Clark
and Washington streets. Some time afterward S. B. Sturges retired
from the bank and thereafter removed for business elsewhere, where he now resides. On his resignation he was succeeded by
Mr. Hammond, who filled the position until George Sturges, who
up to that time had been cashier, was elected president, which
office he holds, James D. Sturges, who was second cashier, also
being present, and at the same time a branch office was opened in the Lind Block
of Office. Mr. Sturges, president of the Northwestern National
Bank, is a native of Ohio, and a son of Solomon Sturges, who came
with his family to this city in 1854, and engaged in the grain eleva-
tor business, being one of the most prominent in the city. In 1857,
in company with George, he opened a private banking house on Clark Street, near the bridge, under the firm name of Solomon
Sturges & Son. This firm continued in existence until 1864, when
its senior member died. Shortly following this, George Sturges be-
came one of the founders of the Northwestern National Bank, which
was its first cashier, and later became its president, which position he
still occupies. As a banker and director his sagacity is manifested by the
following facts: As has already been mentioned, the capital
of the Northwestern National Bank, at its organization, was
$200,000, on which of course local taxes were paid. Owing to the
fact that in this city the rate of taxation had reached exorbitant figures, amounting to an almost unbearable burden, Mr. Sturges
determined to avoid their payment, in an honorable way, and yet
acquire the credit of his bank wholly unimpaired. Accordingly,
through his influence, the directors of the bank were able to reduce
its capital stock from $500,000 to $200,000, and at the same time pur-
cased $1,000,000 in United States 4 per cent. bonds, which are
pledged as a security for the production of its customers. Mr.
Sturges was also the prime mover in, or the founder of the
resent Clearing-House Association, an institution now admitted to be indispensable in a city having as many banks as has Chicago. The Clearing-House was in the Merchants' Loan
Bank, where for thirty days an experimental trial was made as to
its workings, when it was formally organized and put into exist-
cence in its practically present form.

Robert S. Buchanan, for the past fifteen years connected
with the Canadian Bank of Commerce, was born at Niagara Falls,
N. Y., on September 22, 1852. During his youth he enjoyed every
educational advantage, and, in 1871, came to Chicago to accept a
clerical position in the concern with which he is now engaged as accountant. For the past twelve years he has been closely identified with, and one of the most active members of, the First Regiment. In 1874, he joined the ranks of Co. "E" as a private. He was one of the best drilled men in the crack company, and successively filled the offices of corporal, sergeant, first sergeant and finally first lieutenant of Co. "E." During the time in which he held the latter office, he was honored with an election to the cap-
cacity of Co. "H," but did not accept, preferring to remain with his present company. He, however, was in temporary command of Co. "H" for some time, after Captain Diehl left. In November, 1884, he was made captain of Co. "E," and since taking command of that body has brought it up to perfection in military execution. Captain Buchanan is very proud of his command, for the men of the ranks contain nearly the best young men of the city in point of civil and military demeanor, courtesy and politeness, and as to its standing in point of military drill and execution Co. "E" is among the most proficient. Captain Buchanan has been treasurer of the regiment for three years, and no line officer in the organization stands higher in the estimation of his fellows than he. He was married on September 20, 1872, to Miss Mabel R. Buchanan, a daughter of the late John S. Buchanan, of this city. They have one son, Bertram.

The National Bank of Illinois was organized in August, 1871, with George Schneider as president; W. H. Bradley, vice-presi-
dent; W. M. Scherler, cashier. Its paid-up capital was $500,000, which inside of six months was increased to half a million dollars. There were no changes in the officers except that W. A. Hammond became cashier of the bank. From the last statement of the institution, made March 10, 1885, it is learned that the paid-up capital is $1,000,000, the surplus $300,000 and the undivided profits $85,000.

The Illinois Trust and Savings Bank was organized upon the old charter of the Bank of Sterling in June, 1873. At this time the paid-up capital was $500,000 and the deposits $300,000. The bank passed safely through the panic of October, 1873, and, by 1875, had increased its deposits to $1,250,000. In 1876, the savings-bank panic struck Chicago, when its deposits were paid up to about $240,000, and in 1878 a decrease to $100,000 took place. In January, 1882, the deposits were $1,500,000 and the capital had been increased to $500,000, and which $500,000 was all paid up. In 1885, the deposits amount to $3,400,000, capital $500,000, surplus $200,000. The uniform financial stability which has marked the history of the Illinois Trust and Savings Bank is in great part due to the fact that few changes have taken place in its list of reliable stockholders. Of the original stockholders the following are still with the bank: Gideon Stratton, Levi Z. Letier, John B. Drake, William H. Mitchell, J. C. McMullen, Isaac Walsed, William H. Smith, L. B. Sidway, George Stagers, John H. Smiley, T. E. Crow, John McAfferty, Anson Stager, James S. Gibbs and John K. Lindgren. Its first officers were L. B. Sidway, president; H. G. Powers, first vice-president; John B. Drake, second vice-president; James S. Gibbs, cashier. In January, 1878, Mr. Powers became president; Mr. Drake, first vice-president; W. H. Mitchell, second vice-president; Mr. Gibbs, cashier, and J. J. Mitchell, assistant cashier. In 1880, Mr. Powers resigned and J. J. Mitchell was elected president. There has been no other change in the management. In conclusion, it may be stated that the bank is the only institution in Chicago which loan on a strictly cash security. Among the important interests managed by the trust department of the bank, and under the direct supervision of President Mitchell, are those of the Union Warehouse Company and the Keith and Noely elevator.

John J. Mitchell, president of the Illinois Trust and Savings Bank since 1880, was at the time of his elevation to this position the youngest incumbent of such an office, connected with a metropolitan institution, in the West. He was born in Alton, Ill., on November 3, 1853, being the son of William H. Mitchell, for many years president of the First National Bank, of that city, and a large stockholder, from its organization, of the Illinois Trust and Savings Bank. He, with his wife, whose maiden name was Mary A. Smith, has lived in Alton as early as 1832. After receiving a primary education, young Mitchell was sent to the Waterville (Me.) Institute, but left in 1873, without having completed his course, to become a messenger boy in the bank of which he is now president; the steps of his advancement were teller, assistant-cashier, and president. In addition to fulfilling the duties which attach to this post, Mr. Mitchell acts as director in the Traders' Insurance Company and Chicago Stock Exchange.

The Corn Exchange Bank is the successor of the Corn Exchange National Bank, which commenced operations in 1870. The officers of the concern then were Julian S. Ramsey, president; S. A. Kent, vice-president; and Orson Smith, cashier. After the great fire, the bank was opened for business in the basement of the house of B. P. Hutchinson, one of the directors. His residence was then on Washington Avenue, just above Harrison Street. In the following December the bank was removed to Room No. 4, in Lind's Block, northwest corner of Randolph and Market streets. In October, 1872, it was located in the Chamber of Commerce building and there remained until it went out of existence as a National Bank, in March, 1881. When the bank closed its officers were, S. A. Kent, president and Mr. Smith, cashier; the capital $1,000,000 and the surplus $300,000. Then Messrs. B. P. and C. L. Hutchinson and S. A. Kent organized a company, and continued as the Corn Exchange Bank. Charles C. Swinborne was made assistant-cashier and took general charge of affairs. The capital of the bank is $1,000,000 and it has a surplus of an additional million dollars. In May, 1883, the bank was located at No. 42 LaSalle Street and, on the completion of the Insurance Exchange Building, on LaSalle and Adams, it was removed to large and elegant quarters on the main floor. The operations of the Corn Exchange Bank are largely confined to the business of the Board of Trade, and it is unquestionably the largest clientage from that class of business men of any banking in-
situation in Chicago.

Charles C. Swinborne was born at New York City in 1851, but, with his parents, came West in 1859, locating at Dixon, Ill. His education was such as is afforded in the common schools of the West. On leaving Dixon he went to Chicago in 1870. He then took a position with the banking house of George C. Smith & Bro., with whom he remained until their failure in 1874. He then became connected with the Corn Exchange National Bank, and served as teller in that concern until it went out of existence in 1881. The

GEORGE SCHNEIDER,
Corn Exchange Bank was then organized, and Mr. Swinborne was retained by the proprietors, and placed in full charge of the bank's affairs.

He attained to the confidence in Mr. Swinborne's ability and integrity that they placed him at the head of their banking department, with the title of assistant-cashier, the only titular official of that bank. Mr. Swinborne has won his present station by a series of valuable services with him in the performance of duties in the particular department assigned to him as an under-clerk has rapidly made his way to a position where his abilities are recognized by his employers and the public. He was married on November 16, 1875, to Jennie L. Wode, daughter of the late Charles W. Mr. Swinborne is a member of the Douglas Club and of the Royal Areanaum, Oakwood Council, No. 809.

Charles Franklin Gray, president of the National Safe Deposit Company of Chicago, is one of the early merchants of this city and has been identified with the wholesale grocery trade for over forty consecutive years. Mr. Gray was born at Sharon, Litchfield Co., Conn., on May 19, 1818. His father was a farmer, and the boy worked on the farm and attended the district school until he was ten years of age. With the exception of one year spent in the high school, this was the only educational opportunity he ever enjoyed.

He left his home when twelve years old, and took a position as clerk in a country grocery store at Goshen Centre, Conn. He continued employed there until he had attained the age of twenty-one, at which time, in company with Messrs. Norton and Walter, of Goshen, he came to Chicago in 1836. The latter named gentleman opened a general store on South Water Street, and Mr. Gray continued to act as clerk for them until January, 1835, when he was admitted into partnership, and the firm then became Norton & Gray.

This firm dissolved in 1839, and Mr. Gray formed a partnership with E. W. Demorest. In 1853, the firm became Gray, Demorest & Co., and five years later, Mr. Gray bought out Demorest's interest, and took in his brother, Moses W. Gray, and Frederick Gaylord as partners, the new firm name becoming Gray, Phelps & Co. In January, 1860, Mr. Gaylord withdrew, and the copartnership name of Gray Brothers, Phelps & Kingman was identified with the business here, while the other partner resided in New York and was purveyor of goods for the establishment. The firm has changed very slightly, until the present style of the concern is Gray, Phelps, Kingman & Kingman, composed of Moses W. Gray, William Burt, Charles H. Kingman as general partners, and Franklin D. Gray, and George H. Phelps attending to the business here, while the other partner resided in New York and was purveyor of goods for the establishment. The firm has changed very slightly, until the present style of the concern is Gray, Phelps, Kingman & Kingman, composed of Moses W. Gray, William Burt, Charles H. Kingman as general partners, and Franklin D. Gray, as special partner.

On January 1, 1860, Mr. Gray retired from active connection with the grocery trade, to devote his personal attention to the interests of the National Safe Deposit Company. In 1867, when Mr. Nickerson was elected president of the First National Bank of Chicago, Mr. Gray was elected vice-president, after having been one of the directors for two years previously. He held that official position till the organization of the National Safe Deposit Company, when he resigned the vice-presidency of the bank and accepted the presidency of the corporation.

Mr. Gray has always been more or less identified with the benevolent, charitable and public movements and institutions of Chicago since early manhood. He is now, at the age of seventy-four, a well-known fireman on Sunday, and now prides, among his most precious relics, a certificate of ten years' faithful service in that capacity, from Charles M. Gray, mayor. He was a member of Engine Company No. 1, acting as second foreman therefor during the entire ten years, and was one of the founders of the Firemen's Insurance Company. He was vice-president of the Chicago Home for the Friendless in 1866, president of the same institution for a number of years thereafter, and is now vice-president.

He has been a liberal and cheerful contributor to many of the charitable and benevolent institutions of the city, and is his peculiar fate to be chosen as an officer of almost every company or institution in which he manifests a personal interest. Mr. Gray is a prominent member of the Calumet Club. Mr. Gray was married on July 4, 1833, at Norfolk, Litchfield Co., Conn., to Miss Ann O. Phelps, daughter of Jeremiah W. Phelps, of Brimfield, Conn. They have two children, both born in the town of Sharon, Conn. This is the brief history of one of Chicago's most successful business men. His career has been marked with an energetic administration of his business affairs, and though he is now approaching the allotted three-score-and-ten years, he is yet very active and enterprising, and personally attends to the management of the large and important interests confided to his care.

John Chamberlain Neely, cashier of the Merchants' National Bank, son of Alexander and Mary Jane Neely, was born at Belvidere, Ill., on August 26, 1846. After finishing his studies at Westfield Academy, N. Y., he became infected with the Pike's Peak gold fever, and started, in April, 1863, to seek his fortune in the Far West. He spent the greater part of three years in the Rocky Mountain region, in and about Denver, returning in January, 1866. On February 1, 1862, he enlisted as a private in Battery "B," 1st Regiment Light Artillery, Illinois Volunteers, then organizing at Camp Douglas. The battery was soon ordered to St. Louis, to complete its organization and equipment, when he received a commission from the Governor as junior second lieutenant. About April 1, the battery was ordered to Peoria Landing, arriving there the same evening.

The following day night, and participating in the memorable battle of Shiloh the following Sunday and Monday; soon after which he was appointed ordnance officer on the staff of Major General W. T. Sherman, and was also engaged in the siege and battle of Vicksburg. At Memphis he organized a general depot of ordnance supplies, constructing extensive repair stations and warehouses for the purpose. In this war, being the only supply and repair depot between St. Louis and New Orleans. During the siege and until after the capitulation of Vicksburg, he was in the field with General Sherman, and supplied and equipped the armies by the use of Grant's stores, having headquarters, during the siege, on a steamboat on the Yazoo River, where the ordnance supplies from the northern arsenals and supply depots were consigned to him. After the surrender of Vicksburg, broken in health, he returned to Memphis, remaining there until the fall of 1864, when he was promoted to the captaincy of his battery, joining it at Nashville, Tenn. During the battle of Nashville, he was inspector of artillerists, having under his supervision a park of forty batteries of artillery. He again rejoined his command at Eastport, Miss., remaining there and at Iuka, Miss., until July, 1865, when, the War being over, he returned with his command to Chicago, and has honorably mustered out of service July 26, 1865.

He engaged in banking in the First National Bank of Belvidere, Ill., the president of the bank being General Allen C. Fuller, who, during the War, was adjutant-general of Illinois.

A year after at Belvidere, he was employed by the National Bank as bookkeeper, and afterward was corresponding and discount clerk. He entered the Merchants' National Bank in December, 1870, as a bookkeeper, and was subsequently advanced to the position of assistant cashier, which position he held for ten years, succeeding John DeKoven as cashier on January 13, 1883.

Mr. Neely is an active member of the Masonic fraternity, a member of Landmark Lodge, No. 11, and also a member of the Calumet Chevalier Commandery, No. 52, Knights Templar. He was married on May 26, 1871, to Mary E. Crosby, and has two children.

—John Crosby and Carrie Blair.

FREDERICK E. ACKER was assistant managing bookkeeper of the First National Bank, was born on March 7, 1862, at Tomah, Wis., the son of J. H. Acker, a commission dealer. He attended the common schools until he was fifteen years of age, when he entered the bank of Tomah as bookkeeper and teller, remaining there for two years. At the end of that time he went to Milwaukee, accepting the position of chief cashier in the retail dry goods house of Rich & Silver. Two years later, he became cashier and bookkeeper of the Anchor Line Transportation Company, at Milwauk ee, and, at the end of the season of 1882, came to Chicago and entered the First National Bank, taking a position in the clearing-house department, and, afterward, in the bookkeeping department, and now holds the responsible post of assistant general bookkeeper. Mr. Acker, although but twenty-two years of age, has reached this present standing in the commercial world entirely through his own exertions, and maintains it by honest merit and industry.

Edward Lester Brewster, son of Frederick W. and Jeannette (Bowers) Brewster, was born at Brockport, N. Y., on September 16, 1842. His grandfather was Judge Henry Brewster, of Genesee County, N. Y. He attended the Brockport Collegiate Institute until he was about fifteen years of age, when he became a clerk in a dry goods store in that place, and remained there a little over a year. He then went to Buffalo, N. Y., and obtained a position as clerk in one of the largest insurance agencies, remaining there until November, 1869, when he came to Chicago. While in the service of an insurance agency in Buffalo, he developed his leisure time to study at a commercial college, and, thus equipped, he found no difficulty in securing employment on his arrival here. He first engaged in bookkeeping in the firm of Tinkham & Co., at the corner of Lake and Clark streets, and from that time to the present he has been either directly or indirectly identified with the banking interests of Chicago. In January, 1868, in connection with Samuel Parker Lumsing, Mr. Brewster established the wholesale grocery house of Farrington & Brewster, at the corner of Dearborn and South Water streets. Though a heavy loser by the great fire, he was able to pay dollar for dollar, and successfully continued in the grocery business until July 1, 1872. He was retired from the firm to engage in a general banking and brokerage business, associating himself with John H. Wrenn, under the firm name of Wrenn & Brewster. During this time Mr. Brewster devoted himself to the wholesale grocery house of Tinkham & Co., at the corner of Lake and Clark streets, and from that time to the present he has been either directly or indirectly identified with the banking interests of Chicago. In January, 1868, in connection with Samuel Parker Lumsing, Mr. Brewster established the American National Bank, and was elected its president, remaining in this position until the close of the session of the legislature of 1873. He was then named cashier of the First National Bank of Chicago, and served in that office until the close of 1874.
101 Washington Street, but finding himself cramped for room, soon moved to more commodious quarters, across the street, at No. 104. In July, 1855, he arranged the consolidation of his house with that of Messrs. Gwynne & Day (successors to A. O. Slaughter), bankers, No. 111-13 Dearborn Street (Grannis Block), and removed to that place. At this time he associated with him Daniel Ullmann and Charles C. Yooc, under the firm name of Eduard L. Brewer & Co. They remained in the Grannis Block until it was destroyed by fire on the evening of February 19, 1885, and then moved to their present quarters, at the corner of Dearborn and Washington Streets. As evidence of Mr. Brewer's business energy and quickness of action, it may be stated that, while the fire was driving him from his old place of business, he secured the new one, and was ready to proceed with business without embarrassment or delay. When the new Bank of Trade building was completed, Mr. Brewer, recognizing the change in business center, established a branch office in that building, and connected it with his main office by private wire, thus securing a means of instantaneous and absolutely private communication between the two offices. Mr. Brewer has been a member of the Board of Trade since 1873, and of the New York Stock Exchange since 1881. He was married to Mary, daughter of Hiram Niles, of Buffalo, N. Y., in 1863, and had five children: three survive, a boy of thirteen years and a girl of seven years.

THE AMERICAN BANKERS' ASSOCIATION.

The American Bankers' Association was organized at Philadelphia, on October 4, 1876, and consists of the leading bankers and financiers throughout the country. As might be expected of the greatest grain, lumber, live-stock and packing market in the world, Chicago has been active and prominent in the affairs of this organization. Lyman J. Gage, of the First National Bank, has been three times elected president of the body, and now holds the office. George Schneider, John J. P. Odell, and other Chicago bankers have been active members.

FELSENTHAL, GROSS & MILLER.—This banking-house was established here in January, 1884, succeeding the firm of Felsenthal & Kozinski, which was originally formed in 1870. The members of the firm of Felsenthal, Gross & Miller, at the date when it was established, were Herman Felsenthal, Jacob Gross, Frederick Miller, and Adam Miller. Frederick Miller, who was an old and honored citizen of Chicago, died on January 18, 1885, his estate, however, still retaining an interest in the business of the firm of which he was the life-time member. The location of this house is now, as it has been from the first, at Nos. 80-82 Fifth Avenue. In addition to a general banking business, the firm also acts as financial agents for prominent capitalists in this and other countries, and do a general discount business, making a specialty of real-estate loans. All the members of this firm are old and well-known citizens of Chicago, and, as such, brief sketches of them can not fail to be of interest.

Felsenthal is a native of Germany, born at Offenbach, in the Prussian province of the Rhine, in 1834. His parents, Benjamin and Agatha Felsenthal, immigrated in 1861, and his father died in New York City, where he made his business in this city. His sister, Mrs. Agatha Felsenthal, a most estimable lady, arrived here safely, and resided with her children until her demise on November 20, 1882. His father, Benjamin, was a prominent teacher at Offenbach, and it is therefore needless to say that the son of whom we write received a careful training in the schools of his native place. In 1854, and when only twenty years of age, Mr. Felsenthal decided to come to America. He spent two years in New York City, Rochester, N. Y., and Cleveland, Ohio, and then came West and located in Chicago, which has been his home. He first sought, and obtained, employment as a bookkeeper with the old firm of Greenbaum's Sons, with which house he remained one year. He then embarked in the retail grocery business on Milwau-kee Avenue. Four years later, he engaged in the produce commission business until 1865, when he was seriously injured by an explosion, which necessitated his retirement from business for nearly two years. In 1867, he established himself in the real-estate and loan business at the corner of Randolph and Canal streets, and, in April, 1870, formed a partnership with Charles Kozinski, which continued until January, 1883, when the present firm of Felsenthal, Gross & Miller, was founded. In 1884, Mr. Felsenthal was elected a member of the Board of Education, proving himself a most efficient member of that body for two years. At the end of that time, though still taking the warmest interest in educational matters, he found it impossible, owing to the demands of his business, to longer retain his membership, and accordingly resigned his position, much to the regret of his many friends. For years Mr. Felsenthal has also taken a prominent part in the social as well as the business walks of life. He is a prominent and leading member of the Sinai Congregation, and of the L.O.B.B. and Masonic fraternities. Mr. Felsenthal married, in 1857, Miss Gertrude Hyman, daughter of Eliezer Hyman, of Germany. They have nine children, two sons and seven daughters. Elie R., the eldest, was reared and educated in this city, and is now a practicing attorney and a member of the law firm of Thompson & Felsenthal. Leah, the eldest daughter, is now the wife of Benjamin Bissinger, a well-known real-estate dealer in this city. Judith, the second daughter, is married to Samuel J. Cline, also of Chicago, and who is credit-man with the firm of Beldin Bros. The other children are Flora, Hannah, Kosa, Emily M., Matilda E., and Herbert C. Jacob Gross, State Treasurer of Illinois, and for the past twelve years clerk of the Circuit Court of Cook County, has justly earned all his honors by a life of industry and faithful performance of whatever trust was imposed upon him; but, whether as a brave soldier or an able, conscientious public servant, he has ever com-
Henry Peterson, then a member of the firm, was born at the town of Kolding, Denmark. He was reared and educated in that country, until he had reached his nineteenth year. He then decided to make a visit to this country, and shortly after coming here, established himself in business at Binghamton, N.Y., with a friend of his. He was involved in business as a general merchant until 1865, when, disposing of a portion of his interests, he came to Chicago, not locating permanently here until 1872. Mr. Peterson was a prime mover in the establishment of the Chicago Board of Trade. He owned and operated a wholesale house in that business during the great fire. In addition to conducting a bank of deposit they do a general loan and discount business, dealing extensively in local stocks and securities. As bankers they enjoy the confidence and esteem of the business public, and as successful financiers they deservedly take a leading rank among the bankers of the West.

George F. Bay, a native of Denmark, was born at the town of Viborg, in Jutland, Denmark, on July 18, 1850. His father, Soren Bay, was an officer of the town where the son of whom we here write was born, and of which the latter's grandfather was also in this, his day, barmaster. George was given a liberal education, and on attaining his majority entered the mercantile business. In 1872, and when only twenty-two years of age, he left Denmark and came to America, locating at once in Chicago where he has since lived. Here he engaged for a time in the furniture business; then in the real-estate trade until he entered business in the brokerage line with Mr. Peterson. They founded the business the firm of which has already been given. Mr. Bay married, in 1855, Miss L. S. Miller of McHenry County, Ill. She had eleven children, five sons and six daughters; of these two, a son and daughter, are deceased. Those living are—Clarke E., now the wife of Robert Miller, of Washington Territory; Alice A., married to B. R. Buck of McHenry, Ill.; Mabel C., now of the firm of Bay & Butler, wagon manufacturers; Alice M., wife of William Spinks, of Englewood. The younger are—Hiram S., Ella L., Henry M., Irene Jeanette and George P., Jr.

E. S. Dreyer & Co. is a well known and respected firm of financial agents that the world has known been have been members of the great German nation, and among the prominent fiduciaries and repositories of public funds and trust in our own city, the large majority are Germans. Mr. E. S. Dreyer was born August 5, 1844, at Buckeburg, Schumacher, Germany. He received a liberal education and spent several years at school in his native city and in the City of Hamburgh, Hanover. His studies included the classical, mathematical and scientific, as well as general literature. He lost his mother at four years of age and his father at eleven, and, up to fifteen, lived with different relatives, in the meantime attending school, his schooling being defrayed by the Government, as his father, and his ancestors, for many generations, had held the Government office of Forester. This office was an inherited office, which he could have had, but he had so chosen, but he preferred to cast it aside and choose an occupation for himself. In fifteen years, he had learned carriage-making. In this employment he engaged until he was nearly twenty-one years of age and was about to be drafted into the Army. He compelled to leave the firm of Cleary & Brothers, a firm which he had joined, and learned carriage-trimming. In this employment he engaged until he was nearly twenty-one years of age and was about to be drafted into the Army. He then, as the result of his exertions, became established in business on his own account. In 1864, he opened a wholesale house, called "The Chicago Market." A short time after, Mr. Peterson and Mr. Bay, and opened a private banking office at No. 56 South Clark Street. They remained there five years, when they removed to No. 66 Randolph Street, and five years later to
BANKING HISTORY.

445

in December, 1854. At this time he was chosen tax collector of North Chicago, and his popularity was strikingly shown by the fact that out of thirty candidates for the position he was unani-
mously elected. The election was called to fill the vacancy caused by the death of F. J. Niebling, and the responsibility of the trust is evident from the fact that he was obliged to give bond of $5,180,000. Mr. Dreyer was married on August 26, 1876, to Augusta Billigmann whose father, F. W. Billigmann, died on Sep-
tember 26, 1873, at the age of fifty-eight years, and whose mother, at the age of sixty-one, is living with Mr. Dreyer. Mr. Billigmann was among the early settlers in this city, and died leaving a large es-
tate. Mr. Dreyer has three children.—Charlotte S., born June 12, 1877; Edward S., born November 24, 1880; and Florence S., born Septem-
ber 26, 1873.

HENRY J. CHRISTOPH.—This private banking-house was estab-
lished by Mr. Christoph in 1872, the place of business being located on Wabash Avenue, near Twelfth Street. Shortly afterward he re-
moved to No. 72 Clark Street, and, in 1875, to his present location on the northeast corner of LaSalle and Randolph streets. Here, he occupies the entire lower floor of the premises, and transacts a gen-
eral banking and brokerage business.

Henry Jacob Christoph is the son of Henry and Christina (Kege) Christoph, and was born near Worms, Duchy of Hessen-Darmstadt, on June 24, 1849. His father was a landed proprietor in easy circum-
stances, and the son received his education at the public schools and Gymnasium of Worms. When about seventeen years of age, he con-
nected himself with a silk house at Frankfurt-on-the-Main, in order to learn the business, remaining there two years, when he abandoned the country of his birth to avoid conscription into the army, this being against his religion, that of a Mennonite. After travelling for a short time upon the Continent and through England, he sailed for America with the intention of making Chicago his home, but the steamer arrived here in September, 1868, and subsequently he accepted a position as clerk in the banking-house of Messrs. Greenebaum & Co., who then carried on business at the corner of LaSalle and Randolph streets. Here he remained for about five years, when he removed to his present residence, which he purchased in 1871. Mr. Billigmann, his return, six months later, he opened a loan and real-estate office at No. 511 Wabash Avenue, but soon moved to No. 71 Clark Street, and then engaged in a general banking business. In 1875, he again changed his residence, taking a new and commodious residence, upon which he moved in 1878. Mr. Christoph, then, six months after, he removed to the Grannis Block, on Dearborn Street, but, in 1883, returned to the corner of LaSalle and Randolph streets, where he now is. Mr. Christoph was married, in 1878, to Harriet, daughter of Conrad Seys, of Chicago, and has had four children, one-half of whom is in her present home, and a boy fifteen months younger. He has been a member of the Board of Trade for some three years, but is not active on the brokerage side.

Wasmanstorff & Heineman.—This firm was formed on Jan-
uary 1, 1872, by Otto Wasmanstorff and William Heineman, for the purpose of carrying on a general banking, real-estate, loan, bro-
kerage, foreign exchange and steamship-passage business, and since their advent in financial circles have conducted a successful and prosperous concern. Their first office was located on the second floor of No. 106 West Lake Street, but they only remained there a short time. The firm was one of the first to remove to the re-
built business district after the conflagration of October, 1871, and the first firm in the Metropolitan Block, located in the basement at No. 165 Randolph Street. They then carried on a general banking business and represented the North German Lloyd Steamship Company, the Hamburg-American Packet Company, besides several Liverpool steamship companies. From the very foundation of their business they have prospered, and, in February, 1882, were obliged to remove to more commodious quarters. They now occupy the roomy basement in the Yates Building, on the south-
west corner of Randolph and LaSalle streets. In 1884, Wasmans-
orf & Heineman were appointed general western passenger agents of the Red Star Line (Royal Belgian Mail steamers), between Antwerp and New York and Philadelphia. They deal in all kinds of negotiable paper, negotiate real-estate mortgages, receive deposits and issue foreign and domestic exchange. Wasmansorf & Heineman successfully rode the financial storm of 1873, and have exhibited themselves as careful, conservative and trustworthy busi-
ness men. They receive a large clientele from the German-speaking population, and their annual transactions are constantly increasing.

William Heineman was born on January 10, 1854, in Strzelitz, capital of the Grand Duchy of Mecklenburg-Strelitz. His father was a merchant of that place, Carl Friedrich Heineman, and he entered the highest class in the splendid schools of that town, and, when, in 1872, he went to Chicago, there he entered the business. He was educated at New-Stertzl, but, shortly after entering the school there, added with his parents to Woldeng, where he entered the home of the Congregational School, and, from there, the University of Chicago, where he received his education by taking private lessons in languages and other branches. In July, 1870, the family emigrated to America, coming directly to this city. The senior Heineman died here in 1875, and his widow is still living in this city. William Heineman, on coming here, was sent to a gymnasium, and was then educated by Rev. Joseph B. Hevener, and, after his graduation, he entered a firm in the employ of the Western Bank Note Engraving Company, which company was organized in Chicago by Messrs. Charles Kinkelboecker and Clarence G. Cheney, both of Albany, New York. For two years connection with them, he went into partnership with his former employer, Charles Shober, but, in 1876, he returned to the Western Bank Note Company, with whom he remained until the beginning of 1878. Mr. Heineman had by that time secured sufficient means to enable him to go into business, and, on January 1, 1878, he formed business relations with his present partner, Mr. Wasmanstorff. Mr. Heineman is an active, energetic business man, and, having received a sound education, he has made himself a valuable member of the business community. He has been a member of the board of trustees of the North Western Masonic Aid Association of Chicago since 1875, and at present occupies the position of treasurer.

H. Schaffner & Co.—This private banking business was es-
ablished here, in 1875, by H. Schaffner and A. G. Becker, under their present firm name. Their first place of business was at No. 123 LaSalle Street, where they remained until 1851, when they removed to their present quarters at No. 125 on the same thorough-
fare. This firm does a general banking and brokerage business, including also note-brokerage and local business. Mr. Schaffner, senior member of the firm, is a native of Germany, born in Hessen-Darmstadt, in 1845. When only eighteen years of age he came to this country and located in Chicago, which has since been his home. Here he obtained employment with Henry Greenebaum, whose bank was afterwards merged in the German National Bank, of which institution he became cashier at his organization, and so remained until 1875, when he became the founder of the business in which he is still engaged.

A. G. Becker, of the firm of H. Schaffner & Co., bankers, was born in Ohio, where his parents resided. They located in Chicago, in 1862, where A. G. was reared and educated. He entered the service of the German National Bank as bookkeeper, and remained there until the close of the Civil War, when, having come in contact with Mr. Schaff-
ner, he engaged in business on his own account.
REAL-ESTATE INTERESTS.

The fire of 1871 caused less of a shock to the real-estate interests of Chicago than was at first anticipated. After the momentary bewilderment consequent upon so great a disaster, a renewed buoyancy was imparted to the market, and, within a week, capitalists from New York, Boston, Cincinnati and St. Louis had invested over a million dollars in the burned district. Between March and October of the succeeding year, the sales of city real-estate amounted to over forty-five million dollars, while suburban property valued at upward of five million dollars changed hands. So far from being paralyzed, the trade, during the two years immediately succeeding the fire, was unsurpassed in the history of Chicago. The era is still spoken of among dealers as the "great speculation years." Aside from the large investments of outside parties, it is notable that since 1870, the accumulations that formerly went into savings banks have sought real-estate investments, and at the present time hundreds of safe and profitable buildings and loan associations exist, and operate upon these savings, to the advantage of small investors.

The transactions since the fire show that the number of sales and amounts of consideration were about equal for the years 1871 and 1872. The losses of the fire had not yet been repaired, when the disastrous set back caused by the financial crash of 1873 occurred, producing, in 1874, a falling-off in sales of over $11,000,000, and, in 1875, of $25,000,000, from those of 1873. In comparing the total sales for fourteen years, it will be seen that, as between 1873 and 1877, the decrease was over $40,000,000 in the latter year. In 1876, the total sales fell to $42,000,000, and the backward tendency continued during 1877, when the total amount was but $38,000,000. In 1878, there was an improvement in the volume of business, but the signs of an expected "boon" failed, and the recorded transfers have never since reached the figures of 1872-73.

From 1871 to 1879, many owners of valuable real-estate, who previously had been lenders in all improvements, were hampered by the necessity of providing for the payment of mortgages which they had negotiated just after the fire. In most cases, it was confidence in a future great advance in value which induced owners to incumber their real-estate instead of selling it. Many succeeded in paying their indebtedness, saving their property, and reaping the benefits to which their foresight and courage entitled them; but in other cases owners failed to meet their heavy obligations, and money-lenders and mortgage companies secured the property.

In 1880, the spring sales were heavy, and evidences of a continuance of the buoyant tendency of business inducing confidence, considerable speculation set in. For the year the total of sales showed an increase of upward of $5,000,000 over the preceding year. During 1881, the aggregate was $11,000,000 greater, with about the same increase in 1882, bringing the total for that year up to $55,735,185. The fire debt by this time had been very generally liquidated, and the values, unsettled by the panic, restored. The year was noted for the almost total absence of speculation. In no other year had so large a percentage of purchase money been paid down. Aside from the transactions in reality, extensive building enterprises were inaugurated, which alone involved an outlay of over $200,000,000, and included, besides many large commercial buildings, numerous flats and apartment-houses, which sprang into great favor with those seeking investment for renting purposes, to the exclusion of single dwellings. These building operations continued during 1883 and 1884, many of the structures requiring over a million dollars for their completion. In 1882, a traveller, corresponding for a foreign journal, wrote:

"The architecture of the finer structures is imposing and refined, with a look of permanence and elegance entirely absent from the majority of structures erected in the early days of new Chicago."

Reference was made, by this, to the flimsy brick-and-plaster structures put up in haste immediately after the fire, some of which had fallen to pieces, one, Dake's bakery, collapsing as late as October, 1885. In the business district the more conspicuous of these buildings, the "Exchange Building" and the "Old Rookery," have been torn down to make room for more worthy and enduring successors.

The causes of the steady increase in land values are to be found in the vast and diversified commerce of Chicago, and the phenomenal growth of its population. The vigorous recuperative power shown after the fire, and the stability of our business men, secured the confidence of outside investors; and other influences, such as street improvements, the parks, boulevards, and public works of every description, while improving property, have also promoted investments. The subject of taxation, which is intimately related to that of the real-estate, is discussed in the Corporate History; and it is only necessary here to say that, despite occasional eras of improvident government, the State laws limiting taxation and governing assessments are of such a character as to offer ample protection to landholders, and the rate of taxation will compare favorably with that of any other great city in America. The stability of Chicago land values has never been permanently disturbed, and the increase is natural, as it is the manifest destiny of the city to enlarge and grow more prosperous and wealthy year by year.

The tendency of business, and its demand for building accommodations, is well marked in given directions. In December, 1880, a few interested parties predicted that the removal of the Board of Trade to its present location would ruin the property adjacent to Washington and La Salle streets. When it was proposed to vacate the south end of La Salle Street to provide a site for the new structure, the cry of "jobbery" was raised, and it was charged that it was a move on the part of a "real-estate pool" and would seriously disturb values. A temporary cheapening of rents around the old site was the only serious result; while the new building, with its many stately companions, formed the center of a fresh district, and induced immense investments, with a corresponding increase of values and toning up of the real-estate market throughout the South Division.

In 1883, there was a slight reaction from the selling and building "boom" of the previous year, the total sales amounting to $54,000,000, a decrease of $11,000,000. This condition may be well compared to
the decrease of $11,000,000, in 1874, following the two
great speculation years, although in each of these years
the sales exceeded those of 1882 by nearly $16,000,000.
While the building operations in 1882 exceeded
$20,000,000, and probably reached nearly $27,000,000, in
1883, they dropped to less than $17,000,000.
The year 1884 was an active one in the real-estate
market, but the sales at the close fell short of those of
the preceding year by nearly $13,000,000, and showed a
decrease from the total of 1882 of about $24,000,000.
Values were not disturbed in any wise by this showing,
but the market was not stimulated, and some of the
more easily agitated dealers began to predict a long
season of stagnation. Building operations were exten-
sive, however, exceeding $20,000,000, and had a direct
influence upon the real-estate market, serving to en-
courage many, and promote more or less activity.
Brokers endeavored, by a variety of reasons, to explain
why there had been a falling off in the volume of business
while other matters incidental to the trade were in such
a promising condition.
The records of the Department of Building are of
interest in this connection, as showing a decrease of
nearly six hundred permits for the erection of
buildings, but an increase of $3,472,031 in value.
In 1883, three thousand three hundred and ten per-
mits were issued for buildings to cost $16,634,382;
while, in 1884, two thousand two hundred and sev-
enteen permits were issued, with an estimated value for
buildings of $20,000,000. In March, 1884, per-
mits were issued for buildings representing a cost of
$4,990,570, which included several large and costly
office-buildings in the Board of Trade district, to be
completed in the following spring, while the permits issued
for the corresponding month in 1883, represented a
value of but $1,141,880,— a difference in favor of the
preceding year of $3,758,690 for this one month alone.
The value of buildings for the first nine months of
1884 was $16,887,870, and for the first nine months of
1883, $13,770,130, showing an increase of ninety three
permits issued, and a decrease of $3,117,740 in value.
Of the total amount, $762,100 was expended for cot-
tages, $2,681,600 for flats, $5,133,100 for dwellings, and
$5,103,000 for other buildings. While the building
season started in more slowly in 1883 than in 1884, the
brokers seemed to see nothing but bright prospects,—
increased inquiry for good property, plenty of money
seeking investment, and a flourishing market generally.
The following table shows the total annual amounts
of sales for fourteen years:

<table>
<thead>

<tr>
<td>Total</td>
<td>$7,429,285</td>
</tr>
</tbody>
</table>

Thus, we have the enormous total of $36,536,650
expended in the construction of new buildings within
the first ten years after the fire; and the estimate is a
low one, for the reason that, on account of the license
fee, builders in taking out permits are apt to give an
under statement, rather than a correct estimate of the
cost.

In September and October preceding the fire, there
were many extensive real-estate schemes on foot. The
most important auction-sale of the year was advertised
to take place on Tuesday, October 10, the property to
be sold being lots owned by M. C. Stearns at the north-
east corner of Adams and Dearborn streets,— on every
side of which were being erected the finest buildings in
the city,— as the hill-road. The sale did not occur, and
these fine buildings in process of construction were
heaps of smoldering ashes on the day set for the sale.

For several years after the fire, A. J. Averill had in
his office a neatly framed trophy, which told an inter-
esting story, and which he proudly exhibited to his friends.
It was a note which ran as follows:

“A. J. AVERILL:

We will give for the Catholic Church property and the Hale
property, in all 210 feet on Wabash Avenue, $125,000.

F. & L.”

The property referred to was the St. Mary’s Church
site, now occupied by the St. Mary’s Block, at the south-
west corner of Madison Street and Wabash Avenue.
The note was written by Field & Leiter about two weeks
before the fire. On the Saturday preceding the fire, Mr.
Averill began the work of raising a subscription
among the property owners on Wabash Avenue, in the
vicinity of Madison Street, to make up $5,000,000, the
sum needed to be added to what Field & Leiter were willing
to give, in order to complete the purchase of the prop-
erty. One-third of this amount was raised by Mr.
Averill without much effort, several merchants giving
$5,000 each; and in another week the entire amount
would have been secured, and Field & Leiter would
have been located at the corner of Madison Street and Wabash Avenue. In 1881, good judges estimated the value of this realty at $1,500 a front foot, or $360,000 in all.

Before the fire, Wabash Avenue was a fine residence street, handsome homes extending to Washington Street, and a fine row, tenanted by leading citizens, fronting Dearborn Park on the latter thoroughfare, while the residences on Michigan Avenue extended northward to the same point. Subsequently to the fire, business property on Wabash Avenue advanced from $300 to $1,500 a front foot. The residence district was located farther south, on Michigan, Indiana, Prairie and Calumet avenues. Residence property on Michigan Avenue steadily appreciated, and in 1881, when the street was turned over to the Park Commissioners and became a boulevard, many sales were made at from $700 to $800 a front foot.

The increased price of property to the south and east created the new wholesale district on Market, Wells, Franklin and lower LaSalle streets. The wholesale firms found they could get deeper lots on Franklin Street for $350 a front foot than on Wabash Avenue for $1,200 and $1,500; and when such firms as Field & Leiter, J. V. Farwell & Co., and others located in the new district, it occasioned a rush of wholesale houses that prevented the occupation of this locality by the cheap structures and low resorts with which it had been infested.

The fire made other changes no less noticeable. From forty to fifty thousand more people located on the West Side, and while re-building was in progress on the South Side, West Madison was the main retail street, and the corner of Halsted and Madison streets was considered the great center. Prices of property rapidly advanced, and many permanent improvements were undertaken.

For over a year after the fire, the North Side gave no evidences of recuperation, but the building "boom" finally crossed the river, and business blocks took the places of vacant lots along North Clark Street, and fine residences began to spring up on LaSalle, Dearborn and the cross streets. In 1881, business property was worth from $500 to $600 a front foot. It is only necessary to advert to the present magnificence of the select residence district east of Wells Street and north of Superior Street.

The fire of July, 1874, which destroyed one thousand houses and swept clear fifteen blocks, on the South Side, below Van Buren Street, and between South Clark Street and Wabash Avenue, did not have any immediate effect upon the tendency of business to follow lines already marked out, but perhaps it prepared the way for the building operations which, in 1886, began to make the large structures put up in this section immediately after the fire look less isolated. This fire was a benefit, in that it cleared out a large area of wooden shells, which had been a constant menace to the re-built district. They were replaced by a more durable and less inflammable class of structures along South Clark and State streets and Wabash, Third and Fourth avenues. F. A. Stearns began, the day after the fire, on Thursday, July 16, the erection of the first building in the burned district, a block of six three-story and basement brick stores, at the corner of Wabash Avenue and Jackson Street.

The following table shows the valuation of real estate and personal property in Chicago from 1871 to 1885, inclusive; and the ratio of increase and total valuation may be learned by reference to tables for previous years, on pages 183, Vol. I., and 572, Vol. II., of this History:

</table>

The most phenomenal growth in the values of Chicago real-estate, may be judged from a few transactions subjoined:

In 1864, a twenty-acre tract in Section 33, Township 39, Range 14, brought $250 an acre, and a few months afterward sold at the rate of $10,000 an acre. The sub-divided sixty acres, corner of Reuben Street and Archer Avenue, which sold in 1870 for $50,000, are now selling at the rate of $250,000 for the tract.

In 1886, Asaot Pierce bought eighty acres in the neighborhood of Humboldt Park for $20,000, and, in 1873, was offered $400 an acre for it; which, he declined; and subsequent bids have realized $500,000 for his investment. In 1882, Mr. Pierce secured a quarter-section near the same plat for two dollars an acre, which is now worth $200,000.

In 1869, seventy-five acres in the east one-half of the northwest quarter of Section 2, Township 39, Range 14, was bought for $208 an acre. In 1872, it sold in lots for $19,500, and in 1885, was worth $370,000.

The subdivision running from Loomis to Laflin streets, south of Monroe, comprising eighty acres, was bought in 1869, for $2,400. In 1881, building lots sold for $60 a front foot, and are now worth $100 a foot, making an aggregate value of $2,400,000 for the tract.

Twenty acres on Central Boulevard, which sold in 1872, for $50,000, and in 1873, for $8,000, in 1884, were worth $100,000.

The hundred acres near the northwest corner of Humboldt Park, which sold in 1873 for $55,000, are now worth $75,000.

In 1875, a sale of the "Long John" engine-house lot on LaSalle Street, near the Chamber of Commerce, was made by order of the City Council to D. J. Small for $2,500, and was vetoed by the Mayor. In 1877, the lot was sold to George Watson for $44,000 cash,—about $1,000 a front foot,—and it is now worth more than double the amount.

The amount of real-estate transfers since 1873, have been—

Real-Estate Board.—In 1883, Edmund A. Cummings, William L. Pierce, and William A. Merigold proposed an association of those interested in the protection or promotion of real-estate interests, and it speedily became formulated under the foregoing title.
During 1883–84, Henry C. Morey was president; in 1885, Lyman Baird. The present (1886) officers are as follows: Edmund A. Cummings, president; Bryan L. Means, vice-president; E. R. Charvat, secretary; Edward S. Dreyer, treasurer. Its membership already includes most of the leading real-estate men in the city, as will be recognized by this list:

Its transactions, in sales alone, counting two parties to each transfer, has reached $80,000,000 a year. An enthusiastic real-estate man and worker anticipates the time when real-estate exchanges, under the fostering of the bank and through the operations of the Board, will amount to millions of dollars a day. Real-estate interests, in all their details, are taken cognizance of, such as abstracts, transfers, rentals, protection of property in the form of improvements, etc. It is endeavoring to reduce the cost of abstracts and to simplify transfers, and has taken the lead in the effort for revenue reform in Illinois.

Shortly after its organization, the Board began to hold annual reunions and banquets, which were occasions of great social enjoyment and of importance in a material sense to interests of the members. The first banquet was held in February, 1884, and each succeeding one was more replete in interest to those in attendance. The most notable gathering was that of Thursday evening, February 4, 1886, at the Palmer House, at which over two hundred gentlemen real-estate dealers and their guests sat down to the festive spread. Nearly all the more important real-estate men were present, and among the number were gray-haired men who had seen Chicago attain a magic growth out of the swamp and prairie, until the valuation of its lands and buildings reached far into the hundreds of millions of dollars, and representatives of the younger generation of dealers who have adopted real-estate speculation as a permanent business and hope to see the field of their operations make as wonderful strides in the future as in the past. The decorations were characteristic of the city and suggestive of the doctors. There were floral representations of the first hotel ever erected in Chicago, the old "Bull's Inn"; Fort Dearborn, and the "Vacant Lot," of course bearing the familiar legend "For Sale." The menu, too, was indicative of the pursuit of the banqueters, and the cover was artistic in design and wonderfully well executed showing the "Beautiful Country Residence," a house founded on submerged land, swimming in a waste of waters, representing a swamp—the beginning of Chicago—emerging from which was a mighty bullfrog, with eyes bulging with wonder at the strange scene. The menu also read: Edward S. Dreyer, treasurer. This house shall be occupied by a first-class thirty-six story, fire-proof, building, for office and store purposes," and a significant margin to the whole was a rent-roll, the perspective of which extended into the millions.

The invited guests present represented the capital and invested wealth of the city. The president of the Board and chairman of the feast, Edmund A. Cummings, welcomed the assembly.

Charles Henry Mulliken, who, since 1874, has been prominently and actively identified among Chicago's leading real-estate dealers, was born at Hallowell, Maine, on March 18, 1831. His father, James Mulliken, was a merchant of that place, but removed with his family to Augusta when Charles was quite young, and there he was reared and educated until he had attained his eighteenth year. He then went to Boston, where he secured a situation in a wholesale dry goods house, in which he spent a considerable time. Returning to Augusta, he started in business on his own account, as a member of the firm of Davis & Mulliken, and was thus engaged for seven years. His next venture was in the Southern commission business, in connection with W. R. Means & Mulliken, in Augusta, and from there to the firm of Means, Mulliken & Co., at Boston. They established a line of packets between that city and Indianola, Texas, having also a store at San Antonio, where a branch of Mr. Mulliken was located in charge. The firm did a thriving and prosperous trade until the breaking out of the Civil War, which brought, as a rule, speedy ruin upon all Northern men who had business enterprises in the South. Their stock of goods valued at nearly $100,000 was seized by the Confederate government and confiscated, Mr. Means, on hearing of the calamity which had befallen them, went South to see what could be done toward retrieving their losses. He was at once arrested at San Antonio, and sent to Mississippi under guard, where he escaped to Mexico, and afterward got to New Orleans, whence, by the help of General Butler, he came North. Their losses amounted to about $50,000, and as Mr. Mulliken had his all invested in the enterprise, this misfortune of course left him a ruined and penniless man. At the same time too his health failed him, which for some years compelled him to retire from anything like an active business life. The fatherly and disinterested solicitude of his business affairs, also, left him deeply in debt, but those obligations he afterward paid off, by paying one hundred cents on the dollar to his creditors. He then made up his mind to come West, and, in August, 1865, came to this city which has since been his home. Here he entered the employ of Page & Sprague, wholesale dealers in paints, oils and glass, on Dearborn Street, as confidential man. He continued with them until 1872, meantime losing all he had in the fire. He then bought a cashiers in a savings bank until 1874, when he entered the real-estate business, in which he has remained until the present time. Mr. Mulliken is an elder and active member of the Fourth Presbyterian Church. He is particularly active in mission work, and is assistant superintendent of the Home-street Mission, with a Sunday-school numbering six hundred, and a very prosperous industrial school attached. He is also a member of the Citizens' Association, Chicago Club, Union Club, Real-Estate Board, and is on the Executive Committee of the Presbyterian Social Union.

As a real-estate dealer Mr. Mulliken has from the first taken a leading position and, since 1874, has been connected with many of the important changes in Chicago real estate. Mr. Mulliken was married, December 3, 1851, Miss Sarah E. Hallett. They have had four children. One is now living; A. Henry Mulliken, of the firm of Pettibone & Mulliken, dealers in railway supplies, in this city. Mrs. Mulliken is Grace C. Vierling, of Chicago, five years, fourteen of which he has been engaged in the real-estate business. His predilection for this business may have received a bias from the vocation he pursued while attending the High School—collecting debts for lawyers and doctors. The proceeds of which collections he paid his expenses while a student. Immediately after leaving school, in 1870, he opened an office and furnished it by means of the commission derived from his first sale of a frame house on Dearborn Street, between Twenty and Twenty-first streets. The office was not furnished in a style of lavish expenditure; an eight-dollar desk, some second-hand chairs, at seventy-five cents each, and some男子’s hat, that cost about ten cents, comprising the outfit. But in this office he laid the foundation for decided prominence in his chosen profession. In 1875, the City
HISTORY OF CHICAGO.

Council appointed Mr. Vierling as appraiser of the school-fund property, at which time the valuation of the property was increased by the appraisal of $160,000, and upon which basis rents were present.
In the city and the adjoining suburbs. During the years of 1882-
1883, the real-estate history of the city was illustrated by the
erection of one of the handsomest buildings ever built in Chicago,
and whose architectural beauty, in design and elegance enabled it to
vie with any edifices constructed for business purposes in the
world. Such a typically handsome structure is the Adams Express
Building, near the southeast corner of Monroe and Dearborn
streets, Chicago, erected by A. J. Cooper and James J. Carson.
In 1855, Mr. Cooper, in company with Stephen D. Hatch, of
New York, commenced the construction of a ten-story, fire-
proof building on the corner of Fourth and Olive streets, in
St. Louis, Mo. Thus will Chicago largely contribute to the
real-estate interests of St. Louis, the expenditure necessita-
ting the use of a half-million of dollars. Mr. Cooper is a
typical Western man, full of energy, replete with the keen,
quick appreciation of the salient points of a proffered tran-
saction, possessed of indomitable perseverance—it is such
men that most contribute to the welfare and prosperity of a cit
ted for business purposes in the
world.

Mr. Cooper, married, on September 24, 1851, to Miss Annie Abercrombie, of Chicago. He is a member of
the Washington Park Club.

Charles J. Shields was born in Brunswick, Germany, in
1814. He was partially educated in his native place, and
left Germany in 1857, coming to Cleveland, Ohio. He then
went to Oberlin, in that State, and entered the college, where
he engaged in his studies until the breaking out of the War,
when he received a first lieutenant's commission in the 159th
Ohio Volunteers. He remained in the Army till the close of
the War, and was mustered out at Columbus, Ohio. He spent
some time after the War in travel, finally locating in
Chicago, in 1868, and engaging in the drug trade. Giving
up that branch of business, he embarked in fire insurance,
which he continued up to the time of his death of 1871. After
the fire he engaged in the real-estate business and has devoted
himself to the same, mainly engaged at present in managing his
own property. He was married in Seneca County, Ohio, in
1865, to Miss Mary Boyer, and has three children, Nelson,
Julia and Ellice.

P. E. Stanley is a prominent operator in the real-estate
loan and tax business. He is a native of Toldeo, Ohio, and
was reared in London, Ontario, coming to Chicago on De-
cember 29, 1873. He subsequently became employed in the
office of the treasurer of Cook County—H. B. Miller—with
whom he remained for one year and was afterward two years
with his successor, Louis S. Htck. In 1877, he entered
business as a tax-agent, etc, and, in 1881, added thereto the
real-estate and loan departments; he has built up a large inter-
est in these various branches, and can negotiate loans of any
magnitude. Mr. Stanley was one of the originators of the
Chicago Opera House Company.

Samuel E. Gross commenced the real-estate business in
1867, in Chicago, and, after an experience of twelve years, de-
termined on inaugurating the plan of purchasing large pieces of
property, subdividing them, and erecting neat and commodious
dwellings thereon, which could be sold to persons of moderate
means upon moderate payments. In his early days, Mr. Gross has
been eminently successful, hundreds of houses having been built and sold
by him within the last two years. He does not claim to be a
philanthropist exclusively, but has elaborated a system whereby
good profits accrue to the inventor, and the person possessed of
moderate means can secure a domicile that would be impracticable
to him under ordinary circumstances. Mr. Gross was born near
Harrisburg, Dauphin Co., Penn., in November, 1843. When he
was quite young, his parents moved to Iberouc County, III., where
he spent the greater part of his youth, returning East to complete his
education. In 1863, he entered as a private in the 20th Penn-
sylvania Cavalry, and shortly thereafter was promoted to the rank
of captain of Co. "K" of that regiment, at the age of nineteen,
being one of the youngest captains in the volunteer service. He
served until the close of the War, and after being mustered out came
to Chicago and commenced the study of law, which he continued until he entered the real-estate business in 1867. The
distinction that Mr. Gross gained in military life, he has achieved
in business, and, although a young man, is acknowledged to be one
of the real-estate fraternity.

Charles Harpel, an old and influential resident of Chi-

This man is highly respected in the business world, and
has been actively identified with business as some others, yet he has been engaged in many
important transactions, notably the sale and transfer of large portions
of real-estate on the North Side. At the present time, Mr. Harpel has
practically retired from active participation in real-estate busi-
ness, devoting the greater portion of his time to the management of
his private affairs. He has been an inhabitant of this city since
early in the "forties," and has been an eye-witness of its growth
from a small town to the metropolis of the West.

Thomas Burrows, capitalist, deceased, was born in the north
of Ireland, on March 16, 1826, and was the son of Thomas and
Anna (Caivert) Burrows. He spent his boyhood at home, and at
the age of twenty-two years, having in the meantime acquired a
liberal education, came to this country, landing at New York.
Without friends or money, he resolutely went to work to lay
the foundation of his fortune. With the assistance of a friend, he
was able to take a contract to build a small house, from the sale of

which he realized considerable profit. With the rare judgment
which marked him ever as a practical and sagacious business man,
he foresaw handsome returns from improved real-estate, and he
continued that business. Success attended every investment, and
a few years' work placed a competency in his hands. In 1872, he
came to this city with the view of investing some capital in re-
ality; and as soon as the future of Chicago was a certainty, upon its re-
covered from the gale fire of 1871, he purchased more extensively
and erected many valuable buildings. During the last ten years
of his life he retired from active business and devoted his entire
attention to his own interests. Mr. Burrows was a devout
worshiper, an Episcopalian, as was his father, and was a member
of St. James's Church. He was a man of high principles, unswerv-
ing integrity in all affairs of life, and, whilum, of rare generosity
and benevolence. He contributed largely and took an active part
in the welfare of various benevolent and charitable organizations
of our city, and made their success a matter of personal interest.
A man of the kindest heart and noblest impulses, he was always
ready to do good, and his many kindnesses won him an unusually
large circle of warm and sympathetic friends. Mr. Burrows de-
parted this life on August 26, 1881.

Mrs. Thomas Burrows, his widow, is widely known as an
active philanthropist, and a lady of extraordinary executive ability,
culture and accomplishments. The Chicago Training School for
Nurses, the Woman's Art Exchange, and the Woman's Club are
greatly indebted to her for efforts in their behalf.

James B. Goodman established his real-estate office in
1868, since which time the transactions made by him have amounted to
millions of dollars. A large portion of the land occupied by
the vast packing-houses at the Union Stock-Yards was sold by Mr.
Goodman, and he has disposed of an immense quantity of property
west of Garfield Park and of the North-Western Railraov car-

REAL-ESTATE INTERESTS.
shops. Mr. Goodman stated that his firm made no specialty of any particular class of real-estate, but circumstances had forced it to conduct the business property in the Woodruff Division and in the vicinity of Lake—the circumstances, it may be remarked, being the opportunities for achieving large trades with correspondingly large remuneration. The firm at present is James H. Goodman & Co., and its premises are in Chicago. Mr. Goodman and Mr. A. Farr, its principal partners, are men of large experience, and is largely invested in timber lands in Wisconsin, and they have handled large quantities of farming lands in Kansas and Iowa, and, in fact, all over the country. The firm is enterprising, yet cautious in its investments, and is known for safety of its investments and the uprightness of its transactions: the pleasure derived from business intercourse with courteous gentlemen being enhanced by the interest of the directors. They are intrusted to the care and direction. Mr. Goodman has been a resident of Chicago since 1857, and, together with his other business, been identified with the lumber business, having been a member of the firm of Sawyer, Goodman & Co., since 1877, also was a member of the firm of Goodman, Bogue & Co.

George A. Springer was born at Hollowell, Me., on May 15, 1815. At the age of eighteen he left home and began life for himself. In 1836, he went to Bermuda, where he spent one year, but, not liking it, returned to New York, and entered the service of the Episcopal Foreign Missionary Society as clerk. In 1838, he came West and taught school for a year and a half in Kendall County, Ill., and at Boone County, Ky. In 1840, he went to Cairo, Ill., expecting to make it his home, but found it under the waters of a great flood, and went on to St. Louis. After this, he spent several years in travel, visiting pioneer points in Iowa, Illinois, Wisconsin, Iowa, and Northern Missouri. He was taken sick in Keokuk, Iowa, and, being homesick as well, started for Boone County, Ky., but being homesick too, he made up his mind to form a partnership with a Canadian by the name of Starns, they went into the retail grocery trade in a small way. They did a prosperous and growing business, which finally developed into a five-and-tenth store, but in 1844 they were joined by one Captain William P. La Moth, and built the first successful passenger steamer that ran between St. Louis and Alton. She was called the "La Bella," and had no successful competitor for thirty years. During this time the great flood of 1844 came, and the boat made money rapidly for a couple of months as the only ferry between St. Louis and the east shore. The steamboat business having a brilliant future, Starns & Springer disposed of their grocery business, and bought another steamer, the "Mississippi," which they put in the passenger and freight traffic between St. Louis and Cairo. They had in the meantime parted company with Captain La Moth and sold him the "La Bella," but immediately replaced her with another fine boat called the "Clamor," with which they completed a semi-weekly line between St. Louis and Cairo. In the spring of 1845, they came to Chicago. The real-estate business here at that time being very promising, the partners engaged in it at once. They were successful, but Mr. Starns was seized with the California gold fever in 1849, and went to the coast. He returned in 1852, and sold out his interest to Mr. Springer. He married Colonel J. L. James, who formed a co-partnership and did business as James & Springer until 1870 when they dissolved. Mr. Springer engaged in his business education there, and after Colonel James withdrew, Mr. Springer took him into partnership. They remained together but one year, when Mr. Morey gave place to F. W. Springer, the nephew of George A. Springer. In two years more they dissolved, and Mr. Springer has done business in that line principally alone ever since. The fire of 1857 destroyed about $80,000 worth of Mr. Springer's property, on which he received but $15,000 insurance. Mr. Springer has been married three times. His first wife was Anne Gray, of Gardiner, Me.; they had five children, two of whom are now living. His second wife was Miss Nena Arvilla Green, a native of Pierce County, Wis., and second cousin to Judge Grecley. His present wife was Carrie C. Pierce, of Watertown, Wis. By the last marriage there have been nine children. Mr. Springer is a member of the Forty-first Street Presbyterian Church, of which he is a Deacon.

Colonel Josiah L. James was an Eastern man. He went into the hardware business in New York City, in 1830, remaining so engaged about ten years. He then moved to Tremont, Sangamon Co., Ill. In 1845, he entered into partnership with Hammond, a humber-dealer of St. Louis, and, in the same year, upon the opening of the Illinois & Michigan Canal, came to Chicago. This was in the infancy of that firm, for the purpose of buying a house in the latter city as James & Hammond. He opened a humber-yard on the corner of Adams and Canal streets. His trade was considerable for a number of years, especially in shingles. The partnership of James & Hammond lasted five years, when it was dissolved, and Colonel James entered into partnership with J. H. Pearson, and remained with him one year. After this he formed a partnership with Mr. Hannah (brother of Perry Hannah) and Mr. Edward Kirby, remaining until 1856. In 1856 he then formed a partnership with George A. Springer, under the firm name of James & Springer, and dealt in real-estate. They afterward dissolved partnership and each continued in the real-estate business on his own account. Mr. James died in 1880, at the advanced age of eighty-four.

S. B. Lingle is one of the energetic real-estate men of Chicago, and has been connected with that business interest since 1872. He makes a specialty of the property near the junction of Michigan Boulevard and Twenty-second Street, in the disposition of which property he is meeting with great success. He has dealt in southern sections, and stands up for the superior vicinicity of Forty-sixth Street, in the towns of Lake and Hyde Park. He came to this city in 1867, and has been associated with real-estate interests since that time.

Sam H. Covere, among the few remaining pioneers who stood by the cradle of this present great city, and whose enterprise and personal character laid the firmations upon which they and others have built so grandly, and who are at the present time actively engaged in business, the name of Sam H. Covere stands prominent, and merits more than passing notice in this connection. Mr. Covere was born in New York State, in 1821. His boyhood up to the age of fourteen, was spent upon the farm and attending district school. In 1835, he and his brother-in-law emigrated to Michigan, settling in Owasso, and four years later they moved to Grand Rapids, where his brother-in-law was extensively located and successful in the lumber business. He remained at home until twenty-one years of age, gaining a thorough business education in his brother-in-law's extensive establishment. Upon arriving at his majority, he engaged in the lumber business for several years, and then carried on until the spring of 1845, when he came to Chicago, embarking in the same line of trade here, connecting with it the very promising enterprise of William H. Crane, by which he was carried on extensively until 1850, when he disposed of his lumber interests, but continued his vessel transportation lines until 1868, when he also disposed of his vessels and retired from the business in which he had been so actively engaged for nearly thirty years. Very soon after he engaged in the real-estate business, in which he has continued ever since, and has made of it a success. His losses in the great fire of 1857 were quite heavy. He was married in Chicago, in 1859, to Miss Ellen C. Teackle; they have three children. During his long life Mr. Covere has been unpretentious in manner, but, in the midst of his marked success, prominently shown those traits of character which have endeared him to their friends and neighbors modesty, fidelity to friendships, and consideration of the feelings and rights of others. In his private life he has been exemplary, and, as he looks back upon his useful career and considers the twentieth year of his life, he is held, his life must appear eminently satisfactory to him.

A. S. Maltman, of the firm of A. S. Maltman & Co., was born at Dunglass, Scotland, on January 5, 1857. He came to Canada in 1864, and engaged in the business of a retailer, in the firm of Wilcox & Maltman, which continued until 1869, when Mr. Wilcox retired. Subsequently Mr. Maltman continued business under the name until 1874, when the existing firm of A. S. Maltman & Co. was formed; the present business is a real-estate and financial agency, wherein the firm is very successful. Mr. Maltman is eulogistic of Chicago real-estate, its present cheapness and its future prospects, and deems no investment more eligible and steadily remunerative.

Willis Drummond, Jr., real estate dealer, was born at Ruttenber, Straight County, Iowa, in 1853. He was reared in Me-Gregor, Iowa, and received a common school education. In 1871, he was appointed to a position in the General Land Office, at Washington, D. C., where he remained for nine years. During the last four years of the time he was chief of the Railway Land-Grant Division. In the spring of 1880, he was appointed commissioner of the Chicago, Milwaukee & St. Paul Railway. On January 1, 1883, he resigned, came to Chicago and opened an office for the purchase and sale of Western lands. He also makes a specialty of attending to land cases before the courts at Washington and its several branches and land offices, for which his experience there peculiarly fits him. Mr. Drummond was married in January 1881, and with that partner, Hon. A. R. Cotton, member of Congress for several years from the Lyons District, Iowa. He has three children.—Minnie Louise, Jesse Jean and Noble.

Lisa D. Hyde, engaged in the real-estate and renting business, is one of the best illustrations to be found among the business men of Chicago of the power of indomitable will and perseverance to conquer adverse circumstances and enable a man to cheerfully and faithfully perform his duties whatever fortune betide
him. Though born near Montreal, Canada, on September 16, 1836, he comes of good New England ancestry on both sides. His ancestors Sewer, St. John, Clinton, Chittenden, and Vermont, an old Revolutionary hero. His father was Alexander Hyde, also a native of the Green Mountain State, who moved with his wife into Canada about the year 1800. He first settled near French Creek, but eleven years later, in 1811, he moved his family into the unbroken forest, ten miles from London, in the town of Oxford, to clear off a farm and make a home. The woods did not frighten those sturdy Vermonters, but what cold and hard winters! His father was taken sick and died after three years of suffering, died at the age of sixty-three, leaving $3,000 of indebtedness, the little farm not paid for and not yet cleared of timber. Upon the death of his father, the boys took charge of the farm, and the time he was twenty-one he had canceled his father's debts, paid for the farm and had the cleared of it, besides caring for his widowed mother and two sisters. In 1848, he came to Chicago to seek his fortune; but, however, at his liking, he returned, after two and a half years, to his Canadian home and the little farm. There he remained until 1855, when he rented the farm and returned to Chicago to stay. In 1861, he began the manufacture of lard oil, in which he prospered and paid up money, but the great fire came and $50,000 went up in smoke. He rallied, and with great skill and determination proceeded to repair his fortunes, when the fire of 1874 swept away every vestige of his business. In 1875, he began renting himself hander, and at the bottom in 1874, he turned his attention more completely into that channel and has made it his sole business ever since. After the fire, although himself nearly a ruin, he did not lack the character of the thorough Chicagoan, the household door and furniture of the Relief and Aid Society, and rendered most efficient help in the good but arduous work. For thirteen years he was a member of the Methodist Church, in Chicago. He was always particularly active in church and Sunday-school work, and has repeatedly held every office in the societies where he has belonged, except that of president-in-charge. He is now a member of the Wabash Avenue Church. He is also a member of the Wabansia Lodge, No. 160, A. F. & A. M. On December 16, 1857, Mr. Hyde married Miss Eliza Vaughan. Having no children of his own, he adopted three: Martha Washington Lee, in New York, on February 18, 1865; Hattie, in 1869; and Fannie, in 1884. The first two are happily married and settled in life. This fact is mentioned as giving an unerring index to the character of the man whose sketch is here written.

GEORGE W. COOPER, an extensive dealer in real-estate, bonds, and mortgages, was born at New Lebanon Springs, Columbia Co., N. Y., in 1825. His parents removed to Clifton Park, Saratoga County, soon after his birth, and there George W. Cooper was brought up. When only a lad he became interested in a saddlery and harness establishment, and also in a hotel in that place, giving his attention to these and others until catching the Western fever, he came to Illinois and settled in the town of Polo, Ogle County. He carried on an extensive mercantile business, in the line of farming implements, machinery, harness, and general merchandise. For many years he has been engaged in the real-estate business, building extensively. He moved to Chicago in the fall of 1873, and has since been engaged in his present business, never having had a partner. In 1851, Mr. Cooper was married to Miss Mary M. Briggs, of Utica, Oneida, Co., N. Y. They have four children, three boys, and a daughter, Kate. The eldest son, Charles, resides at Portland, Oregon, and is agent of the Northern Pacific Railroad & Express Company at that place. Another son, Burt, is in the wholesale house of Marshall Field, of this city, and the youngest, his father's namesake, is at school.

J. S. RANNEY & Co.—This firm comprises John S. Ranney and was established in 1866. It transacts a general real-estate business, but makes a specialty of ranches, cattle-ranches and timber-lands. At the time of writing, J. S. Ranney & Co. have two large negotiations in course of completion; one of a large stock and cattle-ranch in Oregon valued at about $1,000,000, and another cattle-ranch and range in Colorado, whose value is about $1,000,000, also a horse-ranch in Colorado of the value of $800,000, and has had large expectations for a thriving business and constantly augments its list of clients.

J. S. Ranney was born at Batavia, N. Y., in 1824. He was educated at Cary College, N. Y., and moved to Charlotte, Mich., in 1845, becoming employed in his father's store. In the fall of 1851, he enlisted as a member of the band of the 2d Michigan Cavalry Volunteers, and served with that regiment nearly two years, being mustered out in 1853, on account of sickness. In 1854, he engaged in business in Charlotte; in 1856, he was in partnership with a man by the name of Colter, a noted tobacco dealer. In 1857, he engaged in the drug business at St. John's, Clinton Co., Mich., which business he disposed of to come to Chicago. He came here in 1859, and became a member of the Board of Trade, following the business of real-estate as a member of the firm of Harper, Ranney & Co. up to the time of the fire of 1871, and subsequently thereto as the principal of the firm of J. S. Ranney & Co. for some five years. He embarked in the real-estate business in the city of Chicago in 1876, and always has operated in land more or less in connection with the other business wherein he has been engaged. He is a member of Apollo Commandery, No. 1, K. T., and of course of the different lodges; he has devoted himself to charity work, and has a number of charities named after him.

JULIUS C. D. ROSS, a well-known real estate agent, was born at Holstein, Germany, on November 7, 1849. In the public schools of his native place, he began his arduous studies, and in 1865, was six and later completed his education in the country. In 1871, he was in Chicago, and on Locating in Chicago he turned his attention to house, sign and carriage painting, an industry in which he met with considerable success during the sixteen years that he followed it. Acquiring the ownership of considerable property, which necessitated much of his attention, he eventually concluded to retire from his trade as a painter and open an office devoted to a general real-estate and insurance business. Accordingly, in January, 1885, he established himself at his present location, 55 Wabash Ave., the buying and selling of property, in connection with the loaning of money, he confines his attention. Mr. Ross is a gentleman of exceptional business ability, during his interview, it is impossible to escape the characteristics of the thorough Chicagoan. With all remarks appertaining to the real-estate interests of the city, he is thoroughly conversant. On November 26, 1875, in this city, he was married to Miss Marguerite Berlin (Melecker), Mr. Hyde.

GODFREY SCHMID was born at Morrissania, Westchester Co., N. Y., on March 5, 1835. His parents were George and Caroline (Melecker) Schmid, natives of Bavaria, who came to America in 1850. The elder Schmid was a contractor and builder and settled in Chicago in 1855. He accumulated a fine property which was all swept away by the great fire and left him to begin life anew. Godfrey Schmid was carefully educated and reared in this city. In 1856, he entered Dyer's Riflemen, in which he served, from which he retired in 1863, after having served three years without interruption. In 1869, he opened for business in the real-estate and building business, under the firm name of Schmid & Weber—this firm continued until February, 1884, when it was dissolved and Mr. Schmid remained alone. He makes a specialty of North Side buildings, both vacant and occupied, and has been actively engaged, and is an active member of the Real-Estate Board and a shrewd and successful dealer. On October 2, 1878, Mr. Schmid was married to Miss Bertha J. Fontaine, of Toledo, Ohio, and has two children: George Fontaine, a former investor in real-estate and presently sociable in his disposition; Schmid has avoided so-called social clubs, and only belongs to one society of any kind, and that is a mutual benefit insurance society of this city, the Bon Accord Council, No. 450, of the Royal Arcanum.

WESLEY MORMILL was born at Starksborough, Vt., in 1821, and obtained his education at the academies of Poultney and Wil- liston, of that State. He was first employed by John Liscum, a merchant at Huntingdon, with whom he afterward started a branch store at Starksborough, and was in partnership with him in general merchandising for about one year; when he disposed of his interest and went to Bradford, Vt. There he purchased an interest in the jewelry establishment of Philander B. Hatch, which he subsequently sold, and went into general merchandising again as clerk with his former partner, Mr. Liscum, who also moved to Brad- ford. Mr. Morrill soon afterwards bought out Mr. Hatch, and stock he sold afterward to his brother, Charles Morrill, and Philip Olin. At the death of Mr. Hatch, with whom he had formerly been engaged, he was appointed administrator of the estate, which was large and demanded the most of his time and attention; but, after getting it into good running order, he formed a partnership with G. S. Briggs, a son of Hon. E. M. Briggs, an eminent law- yer, of Vermont, who had also disposed of his stock of goods. He was large and demanded the most of his time and attention; but, after getting it into good running order, he formed a partnership with G. S. Briggs, a son of Hon. E. M. Briggs, an eminent law- yer, of Vermont, who had also disposed of his stock of goods. He was large and demanded the most of his time and attention; but, after getting it into good running order, he formed a partnership with G. S. Briggs, a son of Hon. E. M. Briggs, an eminent law-
Iron Workers' Addition, for which they were to pay $100,000, paying $10,000 down and having long time on the balance. This property at the present time is worth nearly, if not quite, $2,000,000, showing an increase in value of more than fifteen years. The confidence in the honesty of humanity, after paying $5,000, Mr. Morrill was denied the rights of title and interest in this property, which was not fully determined until a decision was reached in the Supreme Court before the time, and before the property was recently transferred to these four purchasers, they were offered $50,000 bonus for their purchase. Mr. Morrill now does a general retail business. He was married to Miss Eliza Kingsley, and has three children living, Frances E., John W., and Frederick K. His eldest son, John W., was married at Harrington, Vt., in 1842 to Miss Mary Hay, and has three children living, Mrs. Anna L. Keeley, Mr. John W. Keeley, and Mrs. Omie Isabelle Keeley. His youngest son, Frederick K., was married at Cleveland, Ohio, in 1844 to Miss Sarah Keeley, and has four children living, Miss Ida C., Mr. George E., Mr. Charles Keeley, and Miss Mary Keeley.

James F. Keeley was one of the best-known of thousands of successful business men of Chicago. He is essentially a self-made man, having "paddled his own canoe" through schools and college into successful business life and social and political prominence, in the three States of New York, Illinois and Kansas. He is a native of New York, born in the family of Secrest Keeley. His father, James F. Keeley, was a native of Virginia and his mother was a North Carolina woman—her maiden name was Mary Beck. Both came very early into Indians, married and settled near Crawfordsville, Montgomery County, Indiana, where James F. Keeley was born on September 25, 1840. In 1852, the family moved to Iowa, and settled near Des Moines. His father was an active and ambitious business man, and was much considered in land, mills, brick yards, etc., and was able, when he went to Iowa, to purchase a large tract of land in Polk County. He laid out the village of Avid, on the Des Moines River, about six miles southeast of the City of Des Moines. It was his own land and he prospered in it. James's schooling was at first confined to the usual winter terms given to farmer's sons, but as he grew older the thirst for knowledge increased, and he attended Forest Home Seminary at Des Moines during 1858 to 1860, paying his own way this time. He began teaching school and preparing for college meanwhile. He received much assistance in this, from Rev. J. A. Nash, president of the Forest Home Seminary, whose services he secured as private tutor until 1860, when he went to Brockport, N. Y., to finish his preparatory studies. At the age of twenty-two he entered Rochester University, graduating with high honors in July, 1866, after four years of study. While at college he secured the handling of a large amount of Iowa lands, which he sold to Eastern parties wanting to go west and settle, and his real-estate business was so successful that, during the last year of his course at the University, he cleared over $10,000. In the fall of 1866 he married to Mary Josephine, only daughter of Elijah and Caroline C. Warren; bought and elegantly furnished a residence on East Avenue, and "set up his household gods." A native of the great West, however, he found the difficulties confronting him in the ambition to the narrow bounds of the real-estate business in Rochester, and, after following it two years, he sold out everything and carried his whole capital with him to the fall of 1868. In that year he went west again, and he was appointed quartermaster of the 16th Iowa, and accompanied him, and they went into the real-estate business here together, under the name and style of Warren & Co. The new firm prospered exceedingly. Mr. Keeney took an active and leading part in establishing for Chicago the park system; together, he and Paul Cornell spoke in nearly every precinct of all the wards of Chicago. They bought the land and founded the towns of Kenwood and South Evanston, and, in four years, had accumulated a fortune of over half a million. But the pants of 1873 caught them with too much land, too many enterprises, too much faith in suburban property, and not cash enough to weather the storm. So they were hit before the gale and they were compelled to surrender possession anew in 1876. Everything was lost but honor; everything depression but resolution and grit; and Kansas offering an inviting field, they went to Trego County, and began anew. Mr. Keeley had the foresight to lay off two townships in Trego County, over the road to the railroad at $1.25 an acre, with an option for three years of all the land the company possessed in that county, amounting to two hundred and sixty thousand acres. They incorporated the county, laid out the county-seat, and named it Wa Keeney. Mr. Keeley went to Washington, and by extraordinary effort and good fortune got the United States Land Office changed from Hays City, then the county seat, to Wa Keeney. He did it in the face of the opposition of all the inhabitants of the locality whence the United States Land Office was removed, and it was justly considered his greatest triumph. In 1879, he was elected to the Kansas Legislature from Trego County, on the Democratic ticket, and served during the session of 1880-81. While in the Legislature, he succeeded in securing for Northwestern Kansas the Seventeenth Judicial District, and at once took a leading position as an able legislator and was prominently mentioned by the Kansas press for governor, a position he held at the Kansas State Fair for 1880, and was also a member of the State Board of Agriculture. In the fall of 1881, Mr. Keeney returned to Chicago to permanently reside—although he has always had an office in this city—and since that time has been a leader in the real-estate business. He laid out the town of Garfield in 1881, and is still a large owner of that site. For the last four years he has been actively engaged in developing the Kansas State Fair at Salina, and in 1886, he laid out another real-estate business, the business that he left the Chicago University in the United States, in 1886, completed the corner lots, and his brothers went to Kansas, and J. F. Keeley laid out a town in Trego County, called Wa Keeney. There the younger brother remained two years, carrying on a grain business and agricultural pursuits, and general store, and general store, and in 1887, and have since continued in the real-estate business, although they have formed no regular partnership. Since their return, they have purchased over one hundred and sixty acres northwest of the city, have platted it at an acre, and the entire property is known as Garfield Subdivision. Since that time they have added about one hundred and sixty acres more in other additions. Mr. Keeley is married to Miss Viola O. Barton, of Baragoga, N. Y. Her parents settled here in 1857. They have two children,—Viola F. and Glennie J.

Charles Goodman, of Camp Douglas fame, is a native of Hartford, Conn., but he was reared and educated in Ohio, his father removing to Cincinnati when he was but a boy. Mr. Goodman was educated at the Woodward High School of Cincinnati and at Miami University at Oxford. He subsequently engaged in the banking business, and was then and is still a prominent banker in the United States. In October, 1862, Captain Goodman was taken prisoner at Harper's Ferry, but was soon after paroled, and in the same month was ordered to report to Jefferson Barracks, St. Louis, where Mr. Goodman was at the time the chief quartermaster of the Department, until several months after the close of the War. When Captain Goodman reported at Camp Douglas, he found everything in a deplorable condition; the troops and prisoners wandering around in mud and dirt, and the barracks entirely insufficient for the accommodation of the number then occupying the same and the addition of four thousand Federal troops, which had just arrived. He secured temporary shelter and relief for the large camp, and at once commenced the erection of barracks, hospitals and other auxiliary buildings for the accommodation and comfort of the Confederate prisoners. He also perfected a plan and constructed a drainage system in Camp Douglas, and erected a parapet fence, sixteen feet in height, five feet across on the top, around the entire camp. This was for the protection and safe care of the eighteen thousand Confederate prisoners who were guarded by the Federal forces. Captain Goodman performed a grand work. Ex-Governor Bros, of Illinois, in an address before the Historical Society of this State, says Mr. Goodman was the following high praise of Captain Goodman: "His exhibition of the highest personal gallantry and unwearied efforts of all that characterized his work at Camp Douglas. He is held in the highest esteem in financial and social circles for his unserving honor and integrity. NielS C. Fredericsen was born on the Island of Lolland,
REAL-ESTATE INTERESTS.

J. A. CRAWLEY was born at Rogersville, Tenn., in 1832. At an early age he removed to Greenacres, Ind., where he was educated and finally graduated from the law department of Ashland University, having previously taken the full literary course. In 1854, immediately after graduating, he commenced the practice of his profession in Greenacres. In 1854, he was elected district attorney of Putnam and the next year commenced business as a merchant, two years later resigning.

Mr. Crawley subsequently removed to LaPorte, Ind., where, when the War broke out, he was enjoying a large and lucrative practice. The melancholy death of Samuel M. Ashland, and he promptly entered the field as captain of Co. "A" 28th Indiana Infantry, serving until the War was virtually over, both in that capacity and as post quartermaster and post treasurer at Louisville, Ky. Returning to his law practice, he was engaged in the business of disposing of lands, and, in 1874, was chosen prosecuting attorney of LaPorte and St. Joseph counties. His legal business took him often to Chicago, where he practiced in the United States courts, and also interested in real estate. He is still a large owner, especially in the South Division. He is also proprietor of the Chicago Block & Novelty Manufacturing Company, and owns a large farm near Crown Point, Ind., where he resides at present. He has a real-estate office in Chicago, which he conducts in addition to other important interests.

MUNSON D. DEAN was born at Volney, Oswego Co., N. Y., in April, 1840, and when five years old removed to Oswego, in the same county, where his father was engaged in the lumber business. He was educated in Oswego, where he lived until he was sixteen. At that age he was apprenticed to learn the carpenter's trade, and remained until he was twenty-one, when he returned to Oswego to give his attention to contracting and building. He removed to Brooklyn, N. Y., and remained there from 1850 to 1855, then to Chicago. He at first commence contracting and building, but soon turned his attention to the employment of the Chicago & North-Western Railway, as master builder, remaining in this capacity until 1865. He again located in Chicago, and commenced contracting and building, which he continued until 1871, when he opened a real estate office, and is still engaged in that branch of the business. His mother, Mrs. Seflie Dunn, is still living, and on February 18, 1854, passed away on her eighty-ninth birthday, which was celebrated in her home, her relatives and friends, which constituted quite an event in Berdette, N. Y., eliciting interesting and flattering notices from the local press. She had lived, at that time, seven children, twenty-seven grandchildren, and sixteen great-grandchildren. Mr. Dean was married at Fulton, N. Y., in 1854, to Miss Amelia De Long, who died in 1866, leaving three children, who are still living: Charles C., William E., and Harriet A. In 1868, he married Miss Elizabeth D. Lockwood, of Ashtraba, Ohio; they have five children living: Elizabeth M., Samuel L., Cordelia A., George L. and Edward Garfield.

LEONARD HODGES was born on a farm near Williston, Chitten- den County, Vt., in 1810. During his boyhood he attended the common school and also studied at an academy presided over by the father of Ex-President Arthur, the latter being among the schoolmates of Mr. Hodges. He entered the University of Vermont in 1837, when he went to Ohio and purchased a stock farm, which he carried on successfully for four years. In 1856, he removed to Champaign County, Ill., and located on the farm now known as the city of Champaign, where the city of Champaign and editor of the Champaign County Union, published at Champaign. In this place, he carried on both professions, law and journalism, from 1857 to 1879, and in the latter year desiring a wider field moved to Chicago and became principal proprietor and editor of the Chicago Daily Tele- graph, a paper which rapidly rose to a circulation of over twenty thousand. He was president of the company owning the paper, and his uncle, Colonel Thomas H. Flynn, was the second principal stockholder. He continued with the paper until the spring of 1861, when it passed into other hands and the name was changed to the Chicago Herald. Since this time Mr. Hodges has been interested in real-estate business in Chicago, and was at one time county superintendent of schools in Scott County. He was also city attorney of Winchester. He has been largely engaged in politics, and has written and delivered numerous addresses and essays on political and social subjects. Among his better known works are the following: "The Fire at Chicago"; "Decoration Day"; "The Old Settlers," read at Winchester; also a "Centennial Poem," read at Bloomington, on June 4, 1875. He was the founder of the county society of the Daughters of the American Revolution, which was organized in 1865, and, in 1880, he was one of the organizers and first vice-presidents of the Chicago Press Club. Mr. Hodges was married in May, 1863, to Miss Martha Frances Cheseldine, daughter of James Cheseldine, deceased, formerly a prominent and wealthy merchant of Winchester, and of Mrs. Emily (Coons) Cheseldine. Mrs. Hodges is a graduate of the Western Female Seminary, Oxford, Ohio. Mr. and Mrs. Hodges have one son, James T.
The famous "Glen Flora" farm at Wankegan, he now resides at his country house.

E. R. Hurlbut, dealer in real-estate and Western lands, was born at Milan, Duchess Co., N. Y., on February 10, 1820. When he was three years of age, his parents moved to Mercer County, Pa., where partly in that county and partly in Trumbull County, Ohio, his father carried on a large farm. This life he led until he was eight years of age, when he accompanied his father on a trip to the Western states and from there went to Grant County, Wis., where he entered the lead mines. At this time there was only one house between Galena, Ill., the great center of lead mining, and Plattsburg, Wis. Hurlbut was one of the first to mine lead and was living within the borders of Grant County for ten years. He then started for the gold regions of California. With his ox-team, he finally reached what is now Council Bluffs, a party of twenty-seven men under the leadership of Hurlbut started for California.

They went by the Fort Laramie route, and were one hundred and nine days on the way. Mr. Hurlbut stopped at Hangtown, Eastern California, and had the good fortune, during his two years stay in the gold region, to save a few thousand dollars, which he brought back with him to the East. Renting his farm in Wisconsin, which he afterward sold, he removed with his family to Marshall County, Ill., where he bought a farm, and during the two years period spent there, he was engaged in real-estate business. The panic of 1857 fell heavily upon him, but he rallied and for about ten years conducted a large grain, hardware, and general merchandising business. In 1866, he removed to Rockford County, Ill., and in partnership with another gentleman established an office for the sale of lands. He continued in this line until he removed to Chicago in 1873. During the time of the Hurlbut firm in Illinois was an unpromising and unimposing young man who managed the Union man and remained a firm republican until Grant's second term. He then became an independent voter, and is to this day.

His removal to this city occurred just as the panic of 1873 was preparing to overtake him. While there married, and has formed a community, and has turned his fortune to better hands.

Since then he has been engaged in his present line with success, having also promising mining interests. Mr. Hurlbut was married in 1854, to Miss Annie Felt, of Mercer County, Penn. She died in 1870, leaving two children, one of whom is now living, Ethel, Jr. He married a second time, in 1873, Miss Harriet Thomson, of Lacon, Ill., May 28, 1873.

Among the leading real-estate firms who make a specialty of West Side property, the house of Mauritzon Bros stands prominent. Although only established in January, 1885, both members of the firm, had prior to the founding of the above house, been identified with the real-estate interests of the city for quite a number of years, and were well intrenched in all the intricacies of the same. Comparatively in its infancy, the house always enjoys a fine run of business. Prompt and energetic treatment is bestowed upon every interest intrusted to their care, and the persons who consign their real-estate business into the hands of the firm, can do so with the assurance that it will receive immediate attention, and be also handled in the most satisfactory manner possible. The firm is composed of M. Josephus and Henry Mauritzon, both natives of this city, sons of Hans T. and Gurnia (Enochson) Mauritzon, who came here from Norway, in 1850.

Hokan A. Mauritzon was born in 1856. His early education was received in the public schools, and his business education in H. B. Bryant's business college. He commenced work for himself in his fifteenth year, in a wholesale jewelry-manufacturing house, where he was employed for nine years. His services were next engaged by the Wheeler & Wilson Sewing Machine Company. Afterward he was engaged in a mercantile house in the city as a bookkeeper. In 1884, he became identified with the real-estate trade, and a year later embarked in the business with his brother.

John Conant Long, who is engaged in the real-estate and loan business, may be said to have seen about all there is or ever was of Chicago, although a man only forty-six years old. He was born on the farm lying along the Aux Plaines River, near Jefferson, Cook Co., Ill., on February 25, 1858. The Methodist camp-ground is now located on a part of the same farm. His parents were from Brandon, Vt., and in the second year of their marriage, in 1852—came the first of the ancestors of the carriage and horses, and settled on the Aux Plaines River, where John C. Long was born. James Long, his father, was of the same name. His grandfather, Long of Massachusetts; was a shrewd and active business man, amiable and courteous, and when he died at one time $200,000, and after passing through many vicissitudes and suffering great financial lapses, died in Paris, France, in 1875. His mother's maiden name was Ceresa Conant, and she was descended from Roger Conant, the first governor of Massachusetts. She was a sister of Hon. John A. Conant, ex-member of Congress from Brandon, Vt., and of Rev. T. J. Conant, the eminent professor, author, and member of the committee on Bible revision.

Mr. Long was educated in the common schools of Chicago and entered the Marine Bank in 1855, at the age of seventeen, remaining with it until the War of 1861. He was a member of the Chicago Zouaves and an expert in drill, so that he entered heartily into the work of raising men for the Army. He was one of the most active in raising Co. "A," 9th Illinois Infantry Volunteers, and while in command of the company raised a brigade and took duty in Chicago, and joined it with a commission as second lieutenant. After six months' service in the 9th at the front, he was promoted to the 9th Infantry of the United States Army (regulars), and returned to Chicago as aide-de-camp at Camp Decatur, Ill. Later, he was ordered to report to General Grant at Fort Donelson, and after that engagement was instructed by him to report to the late General Stephen A. Hurlbut, with whom he accompanied to Pittsburg. He acted as aide-de-camp to General Lee, as ranking assistant adjutant-general, and took a very active and prominent part in it. It was his duty to place nearly all the men in the Harper's Ferry division—havens previously gone over the ground—which he did most admirably. On his return to Chi-

Hurlbut thus speaks in his official report: "Lieutenant J. C. Long, 9th Regiment Infantry, my aid, was peculiarly active, ener-
he was fortunate in receiving no wound, although one bullet passed through his cap and one through his sleeve." He remained with General Hurlburt through all that series of battles, ending with the second battle of Corinth, in which he was attached to the 9th Regulars, to which he then belonged, they being on the Pacific Coast; and wishing to see more active service, he obtained permission from Lieutenant General Ulysses S. Grant to perform duty in his regiment. He was commissioned a second lieutenant in the 9th Illinois Infantry in January, 1863, and served with distinction throughout the whole war, rising to the rank of major in the 9th Illinois Infantry. He was brevetted captain by authority of Congress for gallant service, and was mustered out on January 20, 1865. It may be mentioned to his skill as drill-master was constantly recognized by General Grant, who, quick to discern the right man for the right place, was always desirous of him to perform such duty, greatly to the discredit of Lieutenant Long, whose ambition was directed to scenes of greater danger and possible promotion. After the War, Mr. Long returned to Chicago and went into the grocery business. In January, 1868, he married Miss Mary Clara Banks, the only daughter of the well-known Dr. James N. Banks, of this city. In 1872, he engaged in the real-estate and loaning business, which he has successfully followed for over twelve years. Mr. Long was at one time a member of Bishop Cheney's Church, but later found himself a Unitarian, and is now a member of the Church of the Messiah, of which Rev. Dr. Utter is pastor. He is a contributor to the "Huron," and is a censor of the Chicago Bar.  

COLE & CO.—David Cole began investing in Chicago real estate in 1860, at which time he also commenced his Cole's Block, at the southwest corner of Halsted and West Madison streets. In 1865, this block was completed, and the building was occupied by Mr. Cole, who, in that year, took his son, Charles David Cole, as bookkeeper. In 1870, Mr. Cole admitted his son into partnership, and the title of the firm was D. Cole & Son, which continued until 1890, after which the son parted business, and C. D. Cole continued the care thereof until 1879, when he entered into partnership with his uncle, M. T. Cole, and the firm became C. D. & Co., under which title and with the same money it has since remained. The block built by David Cole in 1860-67, was for some time called Cole's Ferry; and he was described for erecting such an edifice, so utterly disproportionate to the then settled suburbs, the block fronting Cole's Ferry, and was occupied within a reasonable number of years. But it was only a few years when blocks far exceeding in size and value Cole's block were erected on Madison Street west of Halsted, and Cole's block became dwarfed by comparison. It has proved a profitable investment, however, as has the fine front-stone block occupying No. 189 West Madison Street; Cole's block is now valued at $250,000, and the latter is worth $40,000. Both are owned and managed by Cole & Co. This firm has always made a specialty of real estate, and has continued therewith the loaning of money on mortgage. The firm is enterprising, and has made the property in which it is interested, very substantially posted in values and a careful and competent judge of realities.  

MOORE T. COLE is a native of Saraga, N. Y., and was born on September 23, 1851. He learned the trade of iron founder and of similar work at some early age, and after working as a journeyman and afterward as contractor in the Eastern States, and also for a year in Canada. He came to Chicago in 1864, and entered into business of contracting for foundry work. About 1869, he commenced taking contracts and superintending work on the public works of Chicago, and for about nine years was engaged in superintending the work on Humboldt, Central and Douglas parks. He subsequently entered the real-estate business with his nephew, as cited.  

ALEXANDER WHITE, Jr., the eldest son of the late Alexander and Ann White, who came to Chicago, from Scotland, in the spring of 1813. This firm was the original of the house, organized September 4, 1851, in the old family residence at No. 83 Wells Street, now known as Fifth Avenue, between Washington and Randolph streets, on which site the White estate has erected one of Chicago's largest and most splendid mansions. Mr. White was educated at the University of Pennsylvania, and early education at the Northwestern University, Evanston, and the Linn University in Lake Forest, the two well-known suburbs of Chicago; and, preparatory courses at the O&I Beebe School, Chicago. He graduated from the University of Chicago in 1871, and from the Illinois Institute of Technology in 1872. In the fall of 1872, he entered the law department of Columbia College, New York, City, but, in consequence of the death of his father in 1872, he returned to Chicago, and in 1873 took charge of David Cole's business, which he had been admitted as a member of the Bar of New York. In the fall of 1881, he became a partner of Isaac Van Winkle, one of New York's oldest and most accomplished lawyers, with whom he made a specialty of the law of corporations and estates. Upon the death of Mr. Van Winkle, he relinquished the general practice of his firm to Mr. D. C. Perry, and devoted his entire attention to the development of the real-estate and corporate interests left by his father. In this charge he is associated with his younger brother, E. H. White, who was born in New York City, on December 30, 1861, receiving his education at the Lake Forest University, preparatory to his entry into the well-known Adams Academy, at Quincy, Mass.  

THE COLORADO LOAN & TRUST COMPANY, of Denver, Colo., consists of a syndicate who purchased from the State of Colorado one hundred and fifty thousand acres of school land, donated by the General Government to that State on its admission to the Union; the company agreeing to construct irrigating canals, with sufficient capacity to irrigate the lands purchased, as well as a large area of Government lands which are open to entry under the pre-emption and homestead acts. As an adjunct to this company there was organized, under the laws of the State of Colorado, the Colorado Colonization Company, having for its object the colonization of these lands, both State and Government.
THE ABSTRACT BUSINESS.

At the time of the fire there were three firms engaged in the abstract business, Chase Bros. & Co., Shortall & Hoard, and Jones & Sellers, who controlled the various sets of books and indexes. After each firm had discovered the exact extent of their losses in the conflagration, it was found that while the most valuable portions of the records had been preserved, not one of the sets was entire, and great apprehension ensued on the part of property owners lest there might be some difficulty in establishing the connected chain of title necessary to the unimpeded transfer of realty. A consultation was held by the proprietors of the various records, and it was decided that the public interests would be best subserved by a consolidation of all the evidences of title extant, of any value, under one common proprietary. This was done, and firms of Chase Bros. & Co., and Jones & Sellers opened offices at No. 240 West Randolph Street, and Shortall & Hoard at No. 493 Wabash Avenue.

The work of re-building the city and perfecting titles began under the auspices of these consolidated firms. Although all of the Cook County land records had been destroyed, the millions of dollars necessary to the re-building of Chicago were furnished by capitalists upon the reliability of these abstracts.

Besides the firms mentioned in a previous volume as having conducted an abstract business in Chicago, that of Wilmanns & Pasdeloup, comprising A. D. Wilmanns and Francis Pasdeloup, was instituted in 1867, and endured until the fire, after which A. D. Wilmanns opened an office, with the few books saved, at No. 107 West Madison Street. William H. Haase had an abstract office in 1865. From 1869, till the fire of 1871, William Brackett and Charles B. Waite conducted an abstract office under the firm name of Brackett & Waite.

Handy & Co.—In the legislative session of 1872-73, the bill known as the "Burial-Record Act" was passed, which, in some of its phases, was objected to by the firms mentioned, as unnecessary and without warrant of constitutional authority, and as assuming to determine the method of the conduct of their business. They therefore, on December 1, 1872, when the act went into effect, retired, and the firm of Handy, Simmons & Co. assumed charge, under a lease from the original proprietors. The methods of conducting the business had met with public confidence and approval, and it was carried on in the same manner and form by the firm mentioned.

On December 1, 1878, Charles E. Simmons retired to become land commissioner of the Chicago & North-Western Railway, and the firm became Handy & Co., being composed of Henry H. Handy, Nicholas J. Neary, Charles D. Martin and Fillmore Weigley. This firm owns the only complete copies of ante-fire records.

Henry H. Handy, the senior member of the abstract firm of Handy & Co., is a native of Chicago, born on March 31, 1838. He was educated here, first entered business life here, and here he has remained in business to the present time. After leaving school, he entered the employ of Francis Clerk, a wholesale and retail dry goods merchant, where he remained for about two years. In 1855, he deserted for Fletcher & Clark, storage and forwarding merchants, on South Water Street, near Clark. In 1856, he entered the employ of Bryan & Borden, who had purchased the abstract indexes from J. Mason Parker, by whom they were originally prepared. In April, 1861, upon the breaking out of the War, Mr. Handy was one of the first to enlist, and did service with the Chicago Battery at Cairo for three months—the time of the first enlistment—when he returned to resume his abstract business. His further connection with this interest is related in the firm history and in the history of the abstract business given in the second volume of this work. In the spring of 1874, Mr. Handy married Miss Sarah C. Wright, daughter of Robert C. Wright, of Wright & Tyrrell, Chicago.

Fillmore Weigley, of the firm of Handy & Co., is the son of Hon. Wellington Weigley, the well-known lawyer of Galena, III., with whom he read law and was admitted to the Bar of Illinois in 1867, but, before entering upon the general practice of his profession, came to Chicago and entered the abstract office of Jones & Sellers. In 1870, he returned to Galena, and formed a partnership with his father, and, as W. Weigley & Son, did a successful business. His previous experience in the abstract business caused him to turn his attention more especially to real-estate, entering the abstract office of Handy, Simmons & Co., where he gave his attention to real-estate law in connection with the abstract business. In 1851, he became one of the present firm of Handy & Co., taking charge of the legal department. The skillful manner in which the abstracts furnished by this firm are made is due to the fact that the members of the firm are all practical abstract-makers, each one taking charge of a department. On account of the large amount of money invested in Chicago real-estate, the title to which is passed or rejected by lawyers on the abstract of title furnished, there is no place where a thorough real-estate lawyer is more needed than in the abstract business, and Mr. Weigley's reputation as such in the profession, adds much to the popularity of the abstracts furnished by his firm.

Between 1871 and 1881, the abstract business augmented over fifty per cent,—the increase in the latter year alone exceeding fifteen per cent. This great increase naturally induced competition. All abstracts of title in Chicago and Cook County may be properly divided into two classes: original abstracts, and copies of such. The firms engaged in abstract-making before the fire may be similarly divided. Some did and some did not own abstract indexes. The owners of indexes have already been mentioned. Among the number of persons engaged in making abstracts before the fire, who neither owned books nor used those belonging to other firms, but who worked from the general indexes and the records found in and kept up in the public offices, was A. F. C. Mueller, who made many valuable abstracts, and who afterward associated himself with Uriah R. Hawley, a lawyer, and clerk of the Court of Common Pleas, now the Superior Court, under the firm name of Mueller & Hawley. Mr. Mueller has not done any abstract work since the fire, Mr. Hawley died some years ago. A. D. Wilmanns was also an independent maker of abstracts prior to the time of associating himself with Francis Pasdeloup. There were a few other persons, employees of the recorder's office, who made many abstracts of title in their overtime, William Haase, who was styled a "conveyancer," and Charles Drandoff, employed in the real-estate department of the banking house of F. A. Hoffman; and later, a firm known as Alexander Dixon & Co.,—made some few abstracts from general records.

After the fire of 1871, the county authorities ordered the recorder to record free of charge original abstracts, and then at a fixed reasonable rate furnish copies from these records. When the three old abstract firms consolidated, as already related, the public, unaware of the true condition of affairs, made a great outcry against what was believed to be a dangerous monopoly. Immediately after the fire, A. D. Wilmanns re-associated himself with
Francis Pasdeloup under the old firm name, and they carried on business until Mr. Pasdeloup's death, which soon occurred. Mr. Wilmanns then joined Harry Thielecke, an ante-fire clerk in Chase Bros.' office, and under the firm name of Wilmanns & Thielecke, they began laying out a set of books from October 9, 1871, onward. This firm continued in business until the spring of 1875, when they left the county and planned in the recorder's office, where they have remained ever since and where abstracts are now made from them by the recorder.

The County Recorder, in 1878, by direction of the County Board, began to copy the books bought, in 1875, from Wilmanns & Thielecke, in order to have a complete set, conforming to the requirements of the statute. Up to November 1, 1885, upward of $70,000 had been expended in carrying out this work. In response to the inquiry of the public, the County Recorder, Colonel Wiley S. Scribner, who was elected recorder to succeed Mr. Brockway, said he would complete the copying within three years from December 1, 1885, at an expense to the county of $80,000 additional.

Haddock, Vallette & Rickcords.—This firm was started immediately after the fire of 1871, by Charles G. Haddock, Edward D. Cox, Charles H. Vallette, under the firm name of Haddock, Cox & Co., Mr. Haddock had been for some years with Jones & Sellers, and also had F. H. Vallette, while Mr. Cox had served an equal apprenticeship with Shortall & Hoard; so that the new company, which started in the fall of 1871, was as well prepared as any in the field to carry on. Of the three, Mr. Haddock was fully equipped in point of skill and experience, and at once commanded the confidence of the public. On October 1, 1881, George E. Rickcords purchased the interest of Mr. Cox, and this change strengthened the firm, and gave it the benefit of the skill and experience of another practical and experienced man. The office was removed to the corner of Fifth Avenue and Washington Street, and subsequently to the present location. The books of the firm date from nearly eighteen years from their organization to date. In 1881, their business increased about one hundred of that over any other year, and has since made steady gains. At present Mr. Vallette is not active in the affairs of the firm, being an invalid in Dakota, but both Mr. Haddock and Mr. Rickcords devote their whole time to the business, with a corps of well-trained assistants. Their motto is "Accuracy and Despatch."

Charles G. Haddock is the eldest son of Dr. Charles H. Haddock, physician and surgeon, of Buffalo, N. Y., and was born at Canton, Stark Co., Ohio, on August 7, 1855. Dr. Haddock was an old resident of Buffalo. Prior to the war of 1812, he had become a subscriber to the plan of patriotic aid in the common cause, and had contributed much in aiding that cause. In 1840, he was made postmaster of Buffalo by President Harrison, and had given up practice and was engaged in the grocery business; but upon the reappearance of cholera in 1849, he went into the business of medicine, for the love of humanity, and lost his life on July 12, 1849, as truly and noble a martyr as ever laid down his life for his fellows. Buffalo and the surrounding country honored him with magnificent funeral obsequies, and will retain his memory fresh and green to the latest generation. Charles G. Haddock, though born in Canton, Ohio, where his parents lived for a short time, and where his mother died while he was but a babe forty years old, received his education in Buffalo, and came West in 1856. He first went to Manitowoc, Wis., where he studied law with General J. B. Sweet, and was admitted to the Wisconsin Bar in 1859. In January of that year, he came to Chicago and went into the law office of E. S. Smith, but upon the breaking out of the War in 1861, he was the sixteenth man that enlisted for the three months' call in the Chicago Militia. He was assigned to duty as General McClellan's body-guard in Virginia, and he served out his time there.

After a turn of typhoid fever contracted in the service, he became Government store-keeper at Camp Douglas for a couple of years, and, in the fall of 1865, went into the abstract business with Jones & Sellers, in 1866. In 1871, soon after the fire, he joined Edward D. Cox and Frank H. Vallette in a new office, and has built up a very fine business in that line. In 1863, Mr. Haddock was married to Miss Katherine H. Priest, the daughter of Mr. Jones & Sellers, in 1866.

REAL-ESTATE INTERESTS. 459
of Chase Bros. in the abstract business, and remained with them until after the fire of 1871. He afterward worked for handy, Simmons & Co., where he leased the books of the consolidated business after the fire, and remained with them, also with Handy, Bond & Co., until October 1, 1881, when the present firm was formed. Mr. Rickcords has been in the abstract business continuously for eighteen years, and is justly regarded as one of the most skilled and expedient of all the men in that field. He is a native of Chicago, in that he has arisen to his present position through merit and his persevering application.

Gilmores, Pollock & Co.—After the retirement from business of Wilmanns & Thielecke, Christopher C. Gilmore and M. Pollock, two of their late employes, combined to make abstracts under the firm name of Gilmore, Pollock & Co., using the index books in the recorder's office.

Otto Peltzer & Co.—This firm was organized in April, 1876, and through the energy and experience of the founders has achieved a large and creditable business. Mr. Peltzer's labors against Louis XIV., about 1865. His father's name was Charles Eugene Peltzer, and his mother's maiden name was Maria Agnes Heymen.

The second firm, the family country-seat, situated near the Eifel Mountains. The father of this was educated for ministerial pursuits, but being fond of rural life, shortly after his marriage left the business of his father, which he represented at Verluis, in Belgium, purchasing a large country-seat, to the management of which he devoted himself upon his return, in 1834, with his sons and children. Otto Peltzer, scarcely thirteen years old, in the city of Chicago in April of that year, he entered a book-keeper as an apprentice. With this establishment was connected a small circulating library and German bookstore, situated on Wells Street, near Washington Street, which Mr. Peltzer attended in the evening as clerk. Here, he took every opportunity of studying the English language, with which, up to that time, he was unfamiliar. In 1852, he left this business, entering the real-estate office of Horatio O. Stone as a clerk. Showing some ability as a drogists of maps in this connection, he opened the way for him into the recorder's office of Chicago, in 1853, as recording draughtsman under the régime of Louis D. Hoar, then clerk of the Circuit Court and ex-officio recorder. Here, Mr. Peltzer remained until the spring of 1857, when he left for St. Paul, Minn., taking a similar position in the recorder's office in that city. He left there in the fall of the same year, returned to Chicago. After a few months at his home, he entered the law office of Henry S. Monroe & Spencer, where he remained some eighteen months in the study of the law. Finding this avenue to greatness and success dry and dusty, he left Chicago and moved to St. Louis, and, after another trip to New Orleans, remaining there during the winter of 1860-61, the War of the Rebellion breaking out, he was driven from Louisiana on account of his strong anti-slavery sentiments, coming to Chicago, where he settled in 1862, and opened an office in Fort Pillow. His father died shortly after his return to Chicago. In the position of chief draughtsman in charge of the map department of the Board of Public Works, which he took in 1862 and held until 1876, he was, among other important duties, connected with the examination and approval or rejection of all new sub-divisions throughout the city, thus providing a more uniform system
of streets, so far as this was possible at this late date. Here he also conducted the compilation of the city directories and the surveying of the river and dock surveys.

In 1860, Mr. Pelzer was elected collector of taxes of North Chicago, taking an active part in the "People's movement," which made that year so eventful in the politics of Chicago. There followed the fire of 1861, the destruction of all the city and county records. Having subsequently restored, for the City Public Works Department, the maps and records in the form of atlases, he published in 1872, from copies of the various subdivisions of the city, his well-known "Atlas of Chicago." The importance, immensity and usefulness of this work may be judged from the fact that he sold one hundred copies at $50 each. It is the only well-arranged work in use in the real-estate offices of this city, the real-estate agencies of Chicago being the only city in the world that can boast of such a work, on such a large scale, in printed form. Mr. Pelzer also took an active part as a republican in the "Greeley movement." He was the only republican that was elected on the Greeley ticket from the Chicago districts to the Thirty-eighth State Assembly of 1872-3-4. He was the first to introduce a bill for compulsory education; another for a State Board of Health, and a bill for the general licensing of physicians and druggists, and another for surveyors. He also introduced many reforms in the laws for registering in the county records the routes and locations of new roads, streets and railroads, all of which recommendations and stockholders were Chalilker J. Hamilton, George D. Broome, Jerome J. Danforth, William J. Wilcox, Chester C. Broome, Jordan J. Wilcox, and J. J. Danforth is president, W. H. Wilson, secretary, George D. Broome, treasurer, and C. J. Hamilton managing director.

J. J. Danforth was connected for twelve years with Handy & Co.; C. J. Hamilton was in the real-estate business for thirty years; George D. Broome was for twenty years connected with the school, and occasional superintendent; W. J. Wilcox was manager, respectively, of the Tremont and Matteson Houses; and Herlet C. Harvey was a young and rising real-estate man. The company prosecuted indexes from 1871 up to date, that were copied from the records of Cook County during the term of Recorder Brooker.

JEROME J. DUNFORTH, president of the Cook County Abstract Company, was born at Boston, on November 1, 1849. He attended the public schools of Boston until he attained the age of thirteen, when he took a position in a wholesale book concern on Cornhill, where he continued until March, 1866. Believing he could better his prospects in the West, he came to Chicago in the latter year. Upon arriving, he took a position as book-keeper in the book-store of N. G. Green, where he continued until the spring of 1868. He then entered the office of Augustus Jacobson, clerk of the Superior Court, where he was employed as copyist until in the fall of the same year, when he was promoted to the post of law-reporter to the same court. In the summer of 1870, he was appointed chancery-record writer in the Superior Court, and that position he retained until 1872. The firm of Handy, Simmons & Co. then offered him a position as a real-estate writer on the clerical force in their abstract business, and he accepted it, remaining with that firm until 1882. In January, of that year, James W. H. Bockrum, county recorder, tendered Mr. Dunforth a place in the Abstract Department, and this he held until October, 1882, when he resigned in order to engage in business on his own account, shortly after organizing the Cook County Abstract Company, and becoming president.

Mr. Danforth has had more than one hundred abstract-making demands, and devotes all his time and energies towards promoting the business in which he is so heartily interested. Mr. Danforth was married to Miss Frances W. McKinney, of Chicago, on January 2, 1881, and they have two children, Monroe J. and Annie L. He is a member of Oriental Lodge, No. 33. A. F. & A. M.

CARNER & DRURY,—This firm is made up of John Carne, Jr., and Edwin Drury, b. & b. experts at clerical work, and, through seasons and years, have become thoroughly acquainted with the various parts of the business, and have made familiar with the best methods in practice in keeping public records and the means of securing unclouded titles to lands and businesses. They have been in the real-estate business for several years; and their present position makes it possible for them to administer the public records with dispatch and accuracy.

John Carne, Jr., is the son of John and Betsey (Rowe) Carne, and was born in Parish, Maine, County of Devon, England, on February 21, 1837. He spent thirty-five years of his life in his native country, coming to Chicago in the early days, where he has made his entire business life has been passed in clerical work of various kinds. After leaving school at the age of fourteen, he was first a clerk in the under-sheriff's office in Liskeard, Cornwall, for four years, and after that for two years clerk for Little, Woolcombe & Venning, for twelve years; ending in 1869. The latter firm was an important law firm, and held simultaneously several important offices. They were the stewards for Sir William Molyneux, Sir Bart., Lord Warden of the Town Clerk and Treasurer of the Borough of Devonport, etc., etc.; and Mr. Carne was also special clerk for Thomas Woolcombe, a partner in the above firm. Mr. Carne is now the vice chairman of the London and Devon Railway. Reaching Chicago the year after the great fire, he obtained employment in the county recorder's office for a short time, and then in the county commissioner's office as real-estate clerk to carry on the important work in this branch of business which they have successfully followed ever since. Mr. Carne has been married twice, but has ten children; seven of whom are still living. His first wife was Ellen Faith Cross, daughter of Thomas Cross, of Parish, Devon, England, who died March 24, 1865, at St. George's Episcopal Church, Stonehouse, Devon. Seven children were born to them,—Bessie, Blanche, Edgar, Reginald, Caroline, Hiram and Charles, all of whom, except Robert, are still living. In 1879, he became engaged to a young lady, Minnie Newman, and in the next year following, took a part of his family back to England, and was married to Lucy G. Cross, the sister of his deceased wife. They have three children,—Marian, Laura and Oliver, of whom the first named alone survives. In 1882, he made another visit to Europe with his wife and a portion of his family. He became a member of the Masonic fraternity in June, 1864, and belongs to the London Lodge, No. 893, Cornwall, England.

Edwin Drury, the junior member of the firm of Carne & Drury, was born at Gage's Lake, Lake Co., Ill., on November 12, 1842. He is the eldest son of George Albert Drury, who, in 1836, from Loring County, Me., to Gage's Lake, and is the father married Mary Elizabeth, daughter of Daniel and Persis (Howard) Head, on January 13, 1842. He was the father of six children, and died on July 12, 1871. On his father's side, Mr. Drury traces his ancestry back to one Hugh Drury, who is said to have been born, in 1640. He was a son of the "Ancient and Honorable Artillery Company," which still maintains its organization and holds its annual meetings. He married Lydia Rice, became the father of three children, and died in London. Through his mother, he traces his ancestry back to John Head, of Concord, Mass., who came from Berwick-on-Tweed, and was admitted freeman of Massachusetts, on June 2, 1641, and whose name was Dorothy, and he was the father of thirteen children. The date of birth of the next John Head, of Concord, Mass., was in 1662. Edwin Drury received a common school education, at Gage's Lake, Ill., and enlisted in the Army on August 9, 1862. He was assigned to Co. "G," 9th Illinois Infantry, served with his regiment in the Department of the Cumberland.
The history of fire insurance in Chicago, so far as great risks and heavy losses are concerned, properly begins with the wooden era, or that expensive period of frame construction just antedating the great fire of 1871. The city area then embraced nearly thirty-six square miles, or 22,497 acres; the number of buildings was estimated at 59,500, the majority being of pine; and the property within the city was valued at $620,000,000. It was the largest wooden-built city in the world. Certain parts of it, like the bamboo cities of China, were always catching fire and constantly menacing the more solidly-built and valuable portions. These conditions, coupled with the remarkable dryness of the air for three months prior to the great fire, gave that sweeping conflagration a chance to wipe out nearly our entire material property interests and to cripple and ruin many insurance companies.

The area burned over and the number of buildings destroyed are given in the fire history. The total loss it would be impossible to reckon accurately. It was ascertained from outside records that two hundred and one fire insurance companies had risk, in the burned district, $400,225,780, but it is as difficult to obtain the exact amount paid to claimants as it is to ascertain the losses, many companies having had "underground" insurance. A score or more of companies were forced into bankruptcy or discontinued business on account of their great losses. The value of property destroyed was estimated at $185,510,000, and the total amount paid by the insurance companies was $60,178,925, leaving an unliquidated loss to property owners of $155,331,075. The distribution of losses among companies, named by States, and the number of companies placed in liquidation, are given in the preceding volume.

After this disastrous experience, the fire limits were made equal in area with the city limits. A distant precinct was set apart for the inflammable and dangerous lumber district. Frame sheds could not be built within the fire limits, and after the conflagration of July, 1874, had destroyed most of the remaining fire-traps on the South Side, Chicago became the safest insurance field in the world. For a long time her fire reputation militated against her in insurance circles; but what with a perfectly re-arranged fire department, the changed character of her buildings, and the caution born of sad experience, together with close competition in insurance rates, the "fire fright" no longer redounds to the benefit of the insurance companies.

After the ravages of the great fire had become somewhat repaired, the Chicago Board of Underwriters was re-organized and went into active operation. The constitution and by-laws were prepared on January 4, 1872, and adopted under the new organization April 22, 1872.

The officers and members at this time were—

Several agents withdrew from the Board of Underwriters in 1879, and on January 27, 1880, organized the Underwriters' Exchange.

The office of Fire Commissioner was successively filled by James Ayars, Lewis H. Davis and S. M. Moore, after which it was abolished. The original membership was composed as follows:

While Chicago has had many isolated fires involving extensive insurance losses, no conflagration since that of 1871, which could be attributed to lack of precautions, inflammable construction or inadequate fire service, has occurred, except the fire of July 14, 1874. At that time, the Chicago Fire Department was, upon the whole, as well organized and serviceable as any in the country; but unfortunately it was also a political machine, in which places were found by aldermen and minor officials for friends who had no particular fitness or training for the service. There was at the same time a contest between rival political factions to gain possession of the Fire Department by the appointment of their favorite as chief, in order to make it still more of a political machine in their respective interests, and consequently less serviceable to property owners and the insurance companies. The strife engendered went abroad in reports that reflected upon the serviceability of the Chicago Fire Department. It was thought strange, too, by the Eastern press, that a fire of such magnitude should happen in a city just recovering from a disastrous experience. The fact that a large and dangerous area of pine tinder-boxes had been left by the fire of 1871, upon the South Side, was not generally known outside. Immediately after the great fire, many temporary frame structures, coming within the restrictions of the fire-limits act, but serving as connections between the old and inflammable fire-traps, had been built. When the July fire once got started, therefore, it did not stop until it had made a clean sweep of the structures described and came up against the new and solidly built portion of the South Side, where it was readily gotten under control. The starting point was a low shanty in the rear of No. 527 South Clark
Street, occupied by a rag peddler as a storehouse. It is thought it may have been caused by the spontaneous ignition of oiled rags or waste, but the incendiary theory had many advocates, for the reason that fire had been discovered in the same place, two weeks before, which was of incendiary origin. The first estimate of the loss was $412,500, but this was subsequently reduced to $35,843,000. The loss to the insurance companies was about $2,100,000, leaving a loss to property owners of between $1,000,000 and $2,000,000. The fire lasted from 4:30 p.m. on the 14th until 3:30 a.m. on the 15th, and at one time it looked as if the city was menaced by another sweeping conflagration. At an early hour in the evening the apprehension was so great in the business district that many firms began cating their valuable goods to the West Side, guests left the hotels, and people on the North Side began to prepare for another visitation by packing up their chattels.

At a meeting of the Board of Underwriters, held on July 15, L. H. Davis, of Davis & Requa, addressed the Board by request. Mr. Davis announced himself in favor of a re-organization of the Fire Department, and the vesting of absolute authority in the hands of the chief; the rigid enforcement of the fire-limits regulation against frame structures; the enlargement of the city water-mains; prohibition of the storing of combustibles in the city and the tearing down of wooden awnings, cornices and capolas. The Board appointed a committee to see that these propositions were carried out, consisting of L. H. Davis, R. J. Smith, George M. Lyon, C. H. Case, George C. Clarke and Mr. Walker, the latter representing non-Board companies having risks in the city. All the reforms and improvements suggested were eventually accomplished.

The National Board of Underwriters adopted a resolution, on October 1, 1874, calling upon all insurance companies to withdraw from the city, and a general exodus ensued. In his message to the City Council, on December 7, 1874, Mayor Colvin adverted to this action, declaring it unadvised for, the result of ignorance of our condition and unnecessary fright, and enumerating the improvements under way; referring to the benefits to be derived from the July fire, by which many squares to the south of the business center were cleared of gut grass and structures and the general security proportionately increased.

"Fortunately, the lapse of time has brought better counsels. The insurance companies have returned to Chicago. The money [for improvements] will only be expended as it is needed. With the assistance of a good soldier's brain, and capacity for organizing, instructing and drilling men, the Fire Department will be brought to the highest state of efficiency, and a winter's careful study will reveal the best and most economical mode of expending such an amount of money for fire purposes as may be needed for our protection, and within our means."

General William H. Shaler, of New York, was brought to Chicago through the efforts of the Citizens' Association and the Board of Underwriters, the former making an appropriation of $5,000 to re-imburse him for his services. Through his co-operation with Chief Benner, the Fire Department was re-organized and placed upon a more efficient and satisfactory footing.

Fire insurance, like other commercial interests, has vastly increased and improved in Chicago within the past ten years. The Underwriters' Association have paid special attention to improvements in the class of the buildings; managers have profited by the experience of years and new methods have been adopted; and owners of property have been educated to a point of intelligent co-operation never known before.

On August 27, 1881, the Board of Underwriters ap-

pointed a special committee, consisting of Fred S. James, Charles W. Drew, T. S. Cunningham, John Cameron and Eugene Cary to investigate the condition of the packing-houses at the Union Stock-Yards, and ascertain what should be done to render that district reasonably safe from fire, many disastrous packing-house fires having occurred. The committee recommended the adoption of a special schedule of rates for packing-houses, which was adopted by the Board of Underwriters and the Underwriters' Exchange. In compliance with the recommendations of the committee, the packers of the Town of Lake expedited $345,553.11, in order to more effectually guard against the possibility of a general conflagration. A chemical engine was procured as an adjunct of the fire-patrol system at the Stock-Yards; the capacity of the Town of Lake pumping works was increased from 3,500,000 gallons per diem to 10,000,000 gallons; reservoirs were constructed at the Stock Yards, containing 20,145,000 gallons of water, to be used for fire purposes only; the packing-houses were connected, by the watch alarm-signal system, with the Fire Insurance Patrol, and were protected by iron shutters and doors; the roads in the district were repaired and many frame structures torn down. During 1884, another chemical engine for service at the Stock-Yards was procured; three hundred and ninety-six inspections and one hundred and thirty-nine re-inspections were made, and five hundred and twelve defects were repaired.

Fire Patrol Service.—In the spring of 1871, the question of organizing a local salvage corps was discussed by various members of the Board of Underwriters, and meetings were held to consider the formation of a fire insurance patrol. General C. W. Drew was appointed a commissioner to inquire into the cost and report at a subsequent meeting. On receipt of his report, A. C. Ducait, C. W. Drew and Thomas Buckley were appointed a committee to perfect such an organization as had been considered, and under the auspices of this committee the Chicago Fire Patrol was organized and made its appearance on October 2, 1871. It was located for the time being in a barn on the alley between Monroe and Adams, Dearborn and Clark streets. Ben. B. Bullwinkle, a member of the celebrated "Long John" engine company of the city Fire Department, had been selected, and was virtually appointed captain of the patrol in July; and the energy, spirit and efficiency then and since displayed by Captain Bullwinkle have made the Chicago patrol and himself well known. Seven days only elapsed from the first appearance of the patrol until the unparalleled conflagration swept the city. Many of the companies contributing to the organization of the service became insolvent, and for a time the future of the patrol was not encouraging. Temporary quarters were found in "America" hose-house, on Blue Island Avenue, and soon afterward a frame building on Michigan Avenue near Jackson Street was completed for patrol headquarters.

The Chicago Board of Underwriters erected, at No. 113 Franklin Street, a spacious brick building, expressly for the patrol, of which the corps took possession on April 30, 1872.

The second patrol company was organized on August 3, 1875, with a captain and four men, for duty on the West Side, and a brick building was erected for its accommodation on Pershing Street, near Congress.

Captain Bullwinkle's company finally opened and occupied the headquarters at No. 176 Monroe Street, on February 16, 1878. This building was erected by L. Z. Leiter, but the entire interior finishing and arrangements were done by the members of the patrol.
In the fall of 1881, the packers at the Stock-Yards furnished a building and entire equipment for a patrol, and guaranteed one-half of the expenses of maintaining the same. This patrol has entire charge of the watch-clocks of the various packing-houses.

Fire patrol No. 1, since its organization in 1871, up and thirty-four fires and spread three thousand five hundred and forty-eight covers.

Patrol house No. 1 is a model of its kind, and the corps can not be excelled anywhere for "time, speed and execution"—the motto of the superintendent. A description of the appliances and conveniences of this house

Permission of Inland Architect and Builder.

HOME INSURANCE BUILDING.

to October 1, 1885, extinguished three hundred and fifty-three fires, involving an insurance of $17,182,299.02, and entailing a loss of $20,364.88; attended three thousand one hundred and twenty-two fires and spread ten thousand three hundred and eighty-seven covers.

Patrol No. 2, since its organization in 1875, up to October 1, 1885, extinguished one hundred and fifty-four fires, involving an insurance of $519,500, and entailing a loss of $7,884.70; attended two thousand four hundred will apply to all in the city. The first floor of the building is 95 by 100 feet, and sixteen feet and eight inches high, with black walnut and maple wainscoting. In the front of the room are two flights of stairs, one on each side, under which are the horses' stalls; between them is the patrol wagon, the pole of which is ten feet from the front doors. These open outward in a vestibule, by means of electricity, and are held by weights. On the right of the room, as you enter, are all the telegraphic
instruments connected with the Patrol, with no wires visible. A raised panel of black walnut, on the wall, contains the Electric Mercurial Fire Alarm, which is connected with numerous business buildings, and which gives an alarm automatically, that also supplies the exact location of the fire in any building. Over this annunciator is a large clock, presented to the Patrol by the American Clock Company. On panels, on the right and left of the above, are two gongs, one giving the fire receipt of a still-alarm in any one house, it is communicated to all. The same instrument can be used with a code of signals and the alphabet. All engine-houses are also connected by telephone. On a shelf above the instrument is an automatic printer, connecting the Fire-alarm office and Patrols Nos. 1 and 2 together; and a telephone connects the two Patrols, so that in case a watchman sees anything which looks like a fire in his district, he can communicate with No. 1, by either the “printer” or telephone.

REPORTS OF FIRES, ETC.—In September, 1873, the fire-patrol committee of the Board of Underwriters detailed W. H. Sloan to be stationed at the city fire-alarm office, for the purpose of making reports of fires, investigating their origin, and obtaining information in regard to losses, of value to companies interested. In obedience to a special order of the Board, he compiled the following information in regard to special hazards:

132 Buildings used as hotels, valued with contents at $12,257,000
210 Buildings used as churches, valued with contents at 6,156,300
10 Buildings used as theaters, valued with contents at 637,500
22 Buildings used as breweries, valued with contents at 1,648,000
Lumber yards, average value of stock kept on hand: 5,116,300
Total ................ $25,875,100

Since January 1, 1870, the valuation on special hazards has increased threefold, but the losses have been much smaller proportionately.

In 1874, four hundred and seventy-six buildings were inspected and two hundred and fifty-three re-inspected in the business district. This inspection was kept up from year to year. In 1879, nearly two thousand buildings were inspected and one thousand and ninety-seven re-inspected. In 1881, the record was—Inspections, 1,392; re-inspections, 1,677; defects found, 3,994; dangerous defects removed, 1,293. In 1884, the total inspections were 18,275.

On July 26, 1874, the Underwriters, at the request of the National Board, directed Superintendent Bullwinkle to engage twenty additional men for night duty, and these watchmen were kept employed for three months.

In 1879, the Board instructed the Patrol to print and deliver bulletins of fires. The first year, four hundred of these reports were sent to companies interested and
delivered to city subscribers, and the number has largely increased year by year.

On January 1, 1879, Superintendent Bullwinkle began to keep a system of reports based upon the total fire losses in the city. The following table is made up from these reports:

<table>
<thead>
<tr>
<th>Years</th>
<th>Insurance interested</th>
<th>Insurance loss paid</th>
<th>Loss over insurance paid</th>
</tr>
</thead>
<tbody>

| Total   | $32,302,289          | $47,777,977.77      | $16,475,724             |

On October 16, 1885, Superintendent Bullwinkle resigned the position which he had so ably filled. The selection of his successor was left to the Patrol Committee of the Board of Underwriters, and they recommended Captain Edward T. Shepherd, who succeeded to the command on November 1st. He is held responsible for the practical working of the service, the committee having decided to take upon itself some of the duties which have hitherto been performed by the superintendent.

Edward T. Shepherd was born in New York City, on May 7, 1850. He came to Chicago in November, 1856. By trade he is a painter and decorator. He joined Patrol No. 1, on November 1, 1875, and his faithful services were acknowledged by transferring him to No. 2, of which he became lieutenant and then captain. In August, 1881, he was made captain of No. 1.

The following is the latest City Fire Department statement, showing the number of fires, losses, insurance, etc., for the past twenty-two years and nine months:

* The great fire of 1871 not included.  † The July fire of 1874 not included.  ‡ Nine months ending December 31, 1875.

During 1884-85, the insurance companies met with many heavy losses through the frequent conflagrations which destroyed costly stocks of goods in business houses. In nearly every instance where costly buildings and valuable stocks were destroyed the fires started from some defect in the heating apparatus, improperly secured lights, or spontaneous combustion, and the destruction was caused by the facility with which the flames spread up elevator hatchways or open courts. A few of the more serious fires during 1884-85, were as follows:

January 10—1884—Grannis block, Dearborn Street, $150,000.
March 21—Langham Hotel, Wabash Avenue and Adams Street, $250,000.
March 30—National Printing Company, and Bradner, Smith & Co., Monroe Street, $250,000.
April 14—Leander Reed building, Wabash Avenue, $250,000.
Michael Brand & Co.'s brewery, Fullerton Avenue, $300,000.
August 21—Oborne, Hosick & Co., Michigan Street, $250,000.
September 11—Pithkin, Vaughan & Cough, Calhoun Place, $100,000.
November 6—Old Farwell block, $100,000.
November 25—George A. Seaverns's elevator, $150,000.
December 6—Cribb's, Sexton & Co.'s foundry, $200,000.
December 6—C. M. Henderson & Co.'s shoe factory, etc., $200,000.
December 21—1-Ink-Belt Machinery Company, Jefferson Street, $50,000.
January 12, 1886—Vehmeyer's warehouse, $200,000.

There were, besides, two great fires in the lumber district during 1884, which entailed a loss of over $1,000,000, that probably might have been averted by proper inspection.

On February 2, 1886, the Underwriters appointed a special committee, composed of E. W. Lyman, W. R. Kerr, P. A. Waller, J. J. James and W. S. Warren, to consider and investigate the subject of continuous inspection. The plan favored by the Underwriters was to have the department of inspection in charge of the separate committee named above, assisted by a corps of regularly employed inspectors whose duty it would be to inspect the buildings in their respective districts and if defects were found to report the same to the committee. If at the end of twenty-four hours the defect was not reme
thousand inspections were made; innumerable defects discovered and remedied; and the new plan of inspection, under the direction of the committee, was found to work satisfactorily and to be of immense value to insurance interests.

**Underwriters' Exchange.**—During 1879 the non-board companies found that close competition outside of the board was bringing rates too low for any profits to accrue to the contestants for insurance business. The non-board companies were not ready to coalesce with the Board at that time, nor was the Board willing to make overtures. Frequent consultations were held between representatives of the non-board companies during the year, and on January 27, 1880, an agreement was reached to form the Chicago Insurance Underwriters' Exchange. Twenty-two non-board companies signified their willingness to enter into the Exchange project, and did so, to their subsequent mutual advantage. The first meeting for organization, and the election of officers, was held on January 27, 1880, and the officers elected for the year were—President, R. J. Smith; Vice-president, T. S. Cunningham; Treasurer, O. W. Barrett; Secretary, B. F. Kent.

The first year's operations of the Exchange were gratifying to the members, and the business transacted highly satisfactory. The Exchange continued to prosper, and agents doing business for the Exchange companies pronounced the organization a great success. In January, 1881, and again in 1882, the same officers were re-elected. On May 1, 1882, Mr. Kent resigned, and R. N. Trimingham was elected secretary of the Exchange.

In January, 1883, the officers elected were—President, E. M. Teall; Vice-president, R. A. Waller; Treasurer, O. W. Barrett; Secretary, R. N. Trimingham. In 1884, President Teall, Treasurer Barrett and Secretary Trimingham were re-elected, and George W. Montgomery was elected vice-president.

**Chicago Fire Underwriters' Association.**—In January, 1885, George W. Montgomery was elected president, C. R. Hopkins, vice-president, and Treasurer Barrett and Secretary Trimingham were re-elected. These officers continue to serve, although, on June 9, 1885, the Exchange consolidated with the old Board of Underwriters, and the name of the joint organization was changed to the Chicago Fire Underwriters' Association. The agencies that brought about this consolidation were, in the first place, a general feeling on the part of members of both associations that there should not be two distinct bodies, with the same general objects in view, in existence, and, secondly, a knowledge that despite the efforts of both sides, bad practices had crept into the methods of doing business, that unless remedied would work serious injury to insurance interests. While the Exchange sustained rates to a certain extent, owing to close competition and depression, rates had been going to pieces, and it was believed the fusion of the two organizations would remedy this condition. It is gratifying to the members of the Chicago Fire Underwriters' Association to be able to say that their expectations as to the improvement of business and the correction of the evils growing out of sharp competition and the cutting of rates, were fully realized, and that a healthier tone has marked the business since the consolidation.

The officers of the Chicago Fire Underwriters' Association were elected on June 9, 1885, were Charles W. Drew, president; E. M. Teall, vice-president; O. W. Barrett, treasurer; R. N. Trimingham, secretary; T. A. Bowden, superintendent of surveys. These officers were re-elected by the association on January 25, 1886, to serve for the ensuing year.

Both the Chicago Board of Underwriters and the Chicago Underwriters' Exchange keep up their original organizations for the protection of their charters, and elect officers regularly. The Exchange re-elected its officers of 1885, for the year 1886.

**Officers of the Board of Underwriters.**—The destruction of the records of the Board of Underwriters in the great fire has already been adverted to. Since 1871 the Board has elected officers as follows:

- **January 4, 1872.**—S. M. Moore, president; A. C. Ducat, vice-president; H. L. Pasco, treasurer; Alfred Wright, secretary. S. M. Moore resigned on May 9, and George C. Clarke was elected.
- **January 5, 1872.**—George C. Clarke, president; C. H. Case, vice-president; H. L. Pasco, treasurer; Alfred Wright, secretary.
- **January 7, 1872.**—J. Goodwin, Jr., president; E. M. Teall, vice-president; C. W. Drew, treasurer; Alfred Wright, secretary.
- **January 6, 1873.**—C. H. Case, president; C. W. Drew, vice-president; Conard Witkowski, treasurer; Alfred Wright, secretary.
- **January 4, 1873.**—Thomas Goodman, president; R. W. Hosmer, vice-president; J. H. Moore, treasurer; Alfred Wright, secretary.
- **January 3, 1875.**—L. H. Davis, president; R. W. Hosmer, vice-president; J. H. Moore, treasurer; Alfred Wright, secretary.
- **January 2, 1879.**—J. Goodwin, Jr., president; R. W. Hosmer, vice-president; J. H. Moore, treasurer; Alfred Wright, secretary.
- **January 6, 1880.**—Above officers re-elected.
- **January 6, 1881.**—Arthur C. Ducat, president; James L. Ross, vice-president; J. H. Moore, treasurer; Alfred Wright, secretary.
- **January 5, 1882.**—Above officers re-elected.
- **January 12, 1883.**—Thomas A. Bowden was elected assistant secretary.
- **January 4, 1883.**—Thomas Goodman, president; Thomas S. Cunningham, vice-president; J. H. Moore, treasurer; Thomas A. Bowden, secretary.
- **January 3, 1884.**—J. Goodwin, Jr., president, R. W. Hosmer, vice-president; J. H. Moore, treasurer; Thomas A. Bowden, secretary.
- **January 17, 1885.**—Mr. Goodwin sent a letter to the Board, announcing that his duties would not allow him to accept the office of president, and declining to serve. On this date, R. W. Hosmer was elected president, vice Goodwin, and Fred S. James, vice-president, vice Hosmer.
- **January 8, 1885.**—R. W. Hosmer, president; Fred S. James, vice-president; J. H. Moore, treasurer; T. A. Bowden, secretary; E. P. Harrington, assistant secretary.

Above officers were re-elected in January, 1886.

**Charles H. Hunt,** deceased, was born at Rochester, N. Y., in 1819. Hunt, was a native of Northfield, Vt., and an uncle of the present United States Senator, Justice S. Morrill, whose mother was a sister of Solomon Hunt. The maiden name of the mother of Charles H. Hunt was Miss Harriet Hop-kins, of Bath, N. Y. At the early age of fourteen years, Mr. Hunt came to Chicago to visit his cousin, James Rochester, of Rochester, N. Y., then a leading commission merchant in this busy frontier town, and he was induced to become a resident here by Mr. Rochester. Gurdon S. Hubbard, who was then a prominent packer, had his office in the same building with Mr. Rochester, by whom Mr. Hunt was then employed. The health of Mr. Rochester began to fail him, and he was compelled within the year to close his business and return East. Mr. Hubbard, attracted by the boy's bright face and intellectual curiosity, offered him employment to remain with him. Mr. Hubbard had, in 1856, taken the agency of the Kimball Insurance Company of Hartford, the first company to do business in Chicago, and into this department young Hunt was duly initiated. Here he served with marked fidelity and ability in various capacities until 1859, when he was pro-
INSURANCE INTERESTS.

agency. Several years afterward, Mr. Hunt sold a one-half interest of the insurance business to Jonathan Goodwin, Jr., and from that time to his death in 1875 was the leading insurance firms of the city. Their office was first at the corner of South Water and Clark streets, but was afterward removed to No. 86 LaSalle Street. The Security of New York; the Rogers, Williams, of Philadelphia; the American Insurance Company of Rhode Island; the Eina, and represented by that firm until Mr. Hunt’s death, which occurred on June 9, 1875. Mr. Hunt was appointed city treasurer on December 24, 1856, and held that office until April 1, 1861. A position from a leading insurance journal, but at the time of his death, speaks of him as an “underwriter of rare skill, conspicuous for his entire reliability and intimate knowledge of his business. His department has grown into one of the largest and most unrivaled in the United States.” He lived in the most cordial relations with his competitors in the business, and his memory calls up none but the most kindly and pleasant associations. Personally, he was a Christian gentleman, whose every act bespoke a pure mind and a good heart.” In 1860, Mr. Hunt was married to Miss Eleonora Shaw, of Madison, Ind. Close and literally uninter- rupted applied to his business during so many years had seriously impaired Mr. Hunt’s eyesight, but not his energy, for, during the four years of this severe ordeal, he was never found away from his post of duty, where he encouraged those who were in his employ to a faithful service. On the evening of June 9, 1875, Mr. Hunt was returning from his office to his home on Rush Street, and the bridge being open he accidentally stepped from the bank and fell into the river. His body was not recovered until life was extinct, and during the whole inquest of the coroner’s inquest his uncorrupted body and remains were preserved by the railroad company, leaving his wife and two daughters,—Jennie C. (deceased, February, 1875) and Lizzie S., to cherish his memory as their choicest heritage.

The AMERICAN INSURANCE COMPANY OF LIVERPOOL was organized in 1858, and immediately took its rank among the prominent insurance companies of the world. In 1860, it established a branch office in Philadelphia, which grew to such proportions that in January, 1881, it was found necessary to divide up the American field, and as a consequence the Western Department fell to Chicago; the management of which department was placed in charge of Joseph M. Hunt by the parent company. This department has grown into one of the largest in the country, having about $200,000 in 1860, to about $600,000 in 1884, and it bids fair to be one of the largest branch offices of the company. The last statement made by the home office of the company shows as follows:

Subscribed capital .................................................. $2,000,000.00
Paid-up capital .................................................... 1,800,000.00
Assets ................................................................ 1,094,024.64

The United States Branch is located in the company’s own building, at Nos. 37 and 39 Wall Street, New York. The company has an American office, composed of two directors, composed of Robert Lenox Kennedy and David Bingham; and a board of trustees, composed of George L. Talman, Roswell G. Ralston and Samuel Sloan, who have charge of the American assets of the company, and who have amassed greater securities in the United States than the foreign assets are available for its losses. The statement of the United States Branch, made on December 31, 1883, shows assets in this country of $1,725,002, with actual liabilities of only $975,000 in the United States. The company reserves $45,610.58 as surplus, having met the net surplus $73,352.90. The company has received in the United States, since its establishment here, $41,024,171, and has disbursed $31,575,000.

Joseph M. Rogers, manager of the Queen Insurance Company, was born at Lexington, Ky., on July 14, 1839. He was educated at Union College, New York, and subsequently graduated in law from the University of Kentucky, and at Albany, N. Y., later. While a practicing attorney at Columbus, Ind., in 1863, he received the appointment of local agent of the Hartford Fire Insurance Company, which was the date of his induction into the insurance business. In September, 1866, the company established special agents for the Western territory and the South, with headquarters at Louisville. This position he held for two years, when he entered into the local business, in which he continued until 1871. He then received the appointment of general agent of the Imperial Insurance Company of Chicago, which position he filled until the retirement of the Imperial from the fire business, in 1873. A short time afterward he became the general agent of the Insurance Company of Philadelphia. In 1875, he became connected with the Phenix Insurance Company of New York, as special and local representative at Louisville; and on January 1, 1876, he was called to the position of general agent of the Phenix at Chicago, in connection with the Western Department, which position he filled until January 1, 1881, when he was placed in charge of the management of the Queen Insurance Company of Liverpool, which position he now fills. In 1882, a number of gentlemen interested in encouraging art in Chicago and building up a permanent collection of paintings; Mr. Rogers was immediately chosen president of this organization, which is known as the Illinois Art Association, and continues to fill this office.

HOLGER DE ROODE, Western manager of the Clinton Fire Insurance Company of New York and the Providence Washington Insurance Company of Providence, R. I., was born in Cincinnati in 1869, and located in Chicago in 1873, as a partner of the late Edmund E. Ryan. Mr. de Roode was born at Rotterdam, Holland, on October 22, 1853, and is thus the youngest of the prominent underwriters of the country. He retired from the local agency business in 1879, in order to give his entire attention to the large field covered by the Western Department. This position is the second oldest American company now engaged in a general agency business, having been organized in 1799, and is one of the fifteen great companies that practically control the fire insurance situation in the United States. The Clinton was organized in 1859, and is also in high repute among financial men, having realized the rare experience of earning about as much in dividends during the past thirty years as was paid out for losses. The losses sustained in the great Chicago and Boston fires were promptly met and a record thereby established which has since given these companies national prominence. Mr. de Roode has contributed largely to the literature and thought of the profession; he is a gentleman whose character and qualifications have earned for him a high position among the successful underwriters of the West, as well as among the rising young men of Chicago.

DR. HEINRICH WILH. WILLIAMS is probably the most competent and successful insurance man in Chicago, and on October 1, 1884, was appointed general manager of the Western Department of the Connecticut Fire Insurance Company, he being the first manager to represent it in Chicago. This company has an individual capital of $1,837,729.20, and a net surplus or policy-holders on the date of November 1, 1884, and a net surplus to policy-holders on the date of $1,292,417.88, and is a thriving, carefully managed corporation, having a life of thirty-four years to demonstrate its prosperity. Of the appointment of Mr. Williams to his position, an interesting letter from Dr. Rush thus speaks: "This recent movement on the part of the Connecticut fire companies is increasing, sure and persistent success in its most important business. It is a promising and successful venture, and will increase north and west of these as the Rockies. Mr. Williams has had a long, eventful and prosperous career as a business man and underwriter. In 1855, he was a successful young merchant in New York City, where he carried on an important business in connection with a branch house he had previously established in the City of Paris, France, but, on account of failing health, he that year retired from active business, removed West and settled in Dubuque, Iowa. At the breaking out of the War, he was among the first to volunteer his services to the Union Army, in which he served faithfully until the War closed, when he established a local fire insurance agency in Dubuque, Mr. Williams was next best among the well managed agencies of that prosperous city. He was selected in 1866, as the general agent of the Yonkers and New York Insurance Company, and his field embraced the entire territory of New York and the adjoining states. His success in this connection, and the enlargement of his department, and his removal to Chicago as Western manager of the company in 1869, became a necessity. The Chicago fire terminated the company, and the same fire laid Mr. Williams low. In 1873, the Western Insurance Company gave Mr. Williams the superintendency of its Western Farm Department, which, under his management, has proved a wonderful success. During his ten years' service with the Continental, the growth of his department has been rapid and prosperous, until it has attained the highest point of its success at the present time. The desire of Mr. Williams to return to the business of general underwriting must alone account for the change he has made and for which he is so well fitted by many years' experience and careful education in all the duties of the manager.

The FIRE INSURANCE ASSOCIATION, Limited, of London, England, one of the most powerful companies doing business in this country, as is shown by the rapid increase in its receipts. The United States Branch was established less than four years ago, and the premiums now amount to about $1,000,000 annually. Among the prominent gentlemen connected with the company and its business in this country, Mr. Arthur P. and Lord Mountbatten, of London, England, J. A. Richmond, of the American and Foreign Insurance Company, and Lord Ashfield, who is the chairman, the chairman, Colonel Kingscott, C. B., M. P., Alderman Sir Thomas Dakin, Hou, Evelyn Ashley, M. P., R. N. Fowler, and the company's agent at Philadelphia, also Mr. H. H. B. Hughes, Esq., the general manager of the company. Joseph H. Wellman is special agent for the company for the United States, with headquarters in New York City, and the following well-known business men are United States trustees for the company: Mr. Reid, president Mechanics' National Bank, New York; Thomas Reid, of Flupke, Reid & Phelps, New York; Jacob D. Vennilie, president Merchants' National Bank, New York. The capital of the company is $8,000,000, in the state of New York, and it has invested in government bonds and other first-class securities.
Notwithstanding the fearful loss ratio of 1853, the company was enabled to add $140,000 to its reserve, which is certainly very creditable management. The Western Department of the company is located at Nos. 161 and 163 LaSalle Street, Chicago, and includes the following States and territories: Ohio, Indiana, Illinois, Michigan, Wisconsin, Kentucky, Tennessie, Iowa, Missouri, Minnesota, Kansas, Nebraska, Dakota, Montana, Wyoming and Colorado.

Theodore W. Leaton, the manager of the company in this department, has had a great many years' experience as an underwriter and is thoroughly familiar with the business in his field. The handsome gain in receipts each month shows the popularity of his management, as well as the confidence which the agents and insurance public have in the company.

The Connecticut General Life Insurance Company of Hartford, Conn., has been represented in Chicago for about eighteen years, and has, on or about January 1, 1884, assets amounting to $1,434,393.42, and a surplus, according to the New York standard, of $582,811.92. This company, in proportion of its assets to $100 reserve, as required by law, has $137.34, which makes it rank third on a list composed of the leading companies of the country. It is at present represented in Chicago by W. J. Davis, general agent for Illinois and Iowa.

W. J. Davis was born at Billerica, Middlesex Co., Mass., on November 26, 1820. He spent several years of his boyhood in Maine, returning to Massachusetts, where he attended school with a view of preparing for a profession, but impaired health led him to give up the study and to embark in country trade. He married burne Falls, Franklin Co., Mass., where he held the office of postmaster as well as that of deacon in the Congregational Church, of which he was an active and consistent member. Removing to the active business community of Groton, he was elected, at the age of twenty-seven, to represent the town in the State Legislature of 1848, taking an active and influential part in its proceedings and gaining encomium for his ability and discretion as so young a member. In 1856, Mr. Davis removed to Chicago and engaged in the retail and jobbing trade at No. 112 Dearborn Street. He subsequently embarked in the real-estate and life insurance business, and for the last twenty years has devoted himself to these interests, representing the New England Mutual Life Insurance Company of Boston, Mass., also the Charter Oak and Connecticut General Hartford, Conn. In common with most Chicago real-estate men, after the first rush of the early days in building, he discovered that he was one of the founders of the Lincoln Park. He has been connected with the Lincoln Park Congregational Church many years, serving it continuously as one of its trustees, and as superintendent of its Sabbath-school for several years. He was married; the first time to Miss Harriet Griswold, of Buckland, Mass., two of whose children, Mrs. Willis McQuigg and W. J. Davis, of this city, survive her; the second time to Mrs. Mary B. Clark, of Rockford, III. Although having seen over forty years of intensely active business life, Mr. Davis is still vigorous and energetically employed.

William J. Davis, son of William J. Davis, was born in Franklin County, Mass., on September 29, 1856, and came with his parents to Chicago in that year. He received his education at the local parochial and high schools and at Yale College, which institutions he attended for three years. He has been connected with the real-estate business for the past ten years, and has transacted business therein on his own account since March, 1884. He read law in the Union College of Law, Chicago, and was admitted to practice in 1881; doing this to facilitate his real-estate business. Although but a young operator in this branch of Chicago's interests, he has already made an enviable record for his energy and discretion, and the pertinacity of industry with which he watches the interests of his patrons and his attention to their requirements, result in a constant augmentation of their number.

LAWLOR & BARRETT.—This firm, general Western managers of the Accident Insurance Company of North America, is made up of William D. and Charles D. Larabee. They are successors of Larabee & Mead in the same business. The latter firm was organized in Chicago, 1852, and was succeeded by the present concern in July, 1883, William H. Mead giving place to Charles D. Larabee. The company they represent is of Canadian origin and has headquarters at Montreal. It was organized in May, 1852, and has been succeeded by the present concern. It includes the States of Illinois, Iowa and Wisconsin, each with a general and increasing corps of local agents recognizing their management. Charles D. Larabee, the senior member of the firm of Larra-
bee Bros., was born in Chicago, on November 10, 1834. At the opening of the War, he was attending the University of Chicago, but, in 1862, the war-spirit ran so high that he entered the service as a brevet 2d lieutenant in the Illinois Volunteer Infantry, and was placed with his regiment on guard duty at Fort Douglas. When his time was out, he entered the store of Larra-
bee & North, and clerked for them about eight months. He then helped to raise Co. "H" of the 17th Illinois Cavalry, of which he was brevet 2d lieutenant. During the Civil War he served as a second lieutenant. The severe and disagreeable but valuable service of the 17th Illinois Cavalry, brigaded with the "Kansas Battery" and "Gunboat Company," will never be forgotten. After the War closed, Mr. Larabee re-entered the employ of Larabee & North as salesman for three years after their return to their home in Missouri. From then on until July, 1883—when he took the place of W. H. Mead in the company of which he is now a member. He is a member of the G.A.R., Kilpatrick Post, No. 75, at Austin, Ill., where he resides. He was married October 8, 1860, to Miss Clarissa Trimmingham, and the family consists of one son and one daughter, Ralph N. Trimmingham, the secretary of the Underwriters' Exchange. He has three children, Ralph, Margaret and Louise. He is a Republican, and a member of the Royal Arcanum, Royal Council, No. 869. The firm of Larabee Bros. are active members of the City's Association.

Mitchell, Watson & Co., insurance brokers, the firm having been organized and incorporated under the Illinois State Laws some years ago, and is the successor of R. A. Waller's outside brokerage business. The firm makes a specialty of the insuring of large properties throughout the West, and taking charge of large lines of fire insurance. Their field of operations is located principally in the Western States and territories and they do all house brokerage business.

Charles P. Mitchell, manager of the insurance brokerage office of Mitchell, Watson & Co., was born at Liverpool, England, on March 17, 1855. He resided in his native town until he was eleven years old, when there obtained a position as bookkeeper in the firm of W. H. Mitchell & Co., in Chicago, and in 1866, his family came to America and located in this city. At the age of twelve, he commenced business life by entering the house of J. L. Hanson & Co., printers, and becoming city solicitor and travelling salesman. He was with that firm for some time, and then engaged with the abstract firm of Brackett & Waite as clerk. He was employed for a brief period, and then went into the printing house of Mitchell, Lawrence & Fordham, the senior member of the firm being his father. He remained with that concern until the great fire, after which he went into the office of Ducat & Lyon, insurance agents. He was afterward connected for many years with Dunlap, Bowmar, in Chicago, and Bowmar & Waller and R. A. Waller. When in the employ of the latter firm, Mr. Mitchell was cashier and confidential clerk. His abilities proved of such value to the firm that when they decided to divide their business into departments, Mr. Mitchell was selected to represent them in the country brokerage business, and the firm of Mitchell, Watson & Co. was incorporated, and Mr. Mitchell duly invested as manager. Mr. Mitchell was married on February 1, 1875, to Miss Clara M. Hansard, of Lanesville, Indiana. They have five children, Louis, Clara Edith, Dot and Charles D., reside at Evanston. Mr. Mitchell is a democrat in politics and a member of the Tornado Club.

Thomas Scott Cunningham, the well-known fire-underwriter, was born on March 25, 1832, at Harrisburg, Penn. He was educated in the public schools of his native town, and had his first country business training in the office of A. W. Wood & Son, at Philadelphia, where he received a thorough course in
practical and theoretical mechanics, and was engaged in the designing and construction of locomotives from 1851 to 1859, at which time he withdrew, to enter the naval service of the United States, as assistant engineer. Admission was by examination, and the fact that he emerged from the ordeal at the head of a class of twenty-six young men, serves to illustrate how devoted and earnest he had been in the study of his profession. His first assignment was to the steam sloop-of-war "Lancaster," which was made the flag-ship of the Pacific Squadron, and in which vessel he doubled Cape Horn, and cruised from Valparaiso to San Francisco, visiting, meanwhile, the Marquesas and Sandwich Islands in the South Pacific Ocean, until 1864, when, having been advanced to the grade of second assistant engineer, he was ordered home to participate in the crushing of the Rebellion, and was detailed in charge of the engineering department of the gunboat "Wissahickon." In that famous war-ship, Mr. Cunningham served one year as senior engineer in the squadron of Admiral David G. Farragut. He participated in the blockade of the Southern ports in the Gulf of Mexico, and in the engagements with the forts below New Orleans, at Grand Gulf, Vicksburg, and other points along the Mississippi River. Returning North in September, 1862, to repair damages sustained by vessel and machinery in that arduous campaign, he was detailed by the Secretary of the Navy to the staff of Rear Admiral Francis H. Gregory, then in supervision of a bureau of construction of monitors, iron-clads, gunboats, and their machinery, at New York. The work of this bureau ceased with the close of the Rebellion, Mr. Cunningham resigned from the service in November, 1866, and returned to civil life, holding President Johnson's commission as a first assistant engineer, with the relative rank of lieutenant, to which grade he was advanced in July, 1866. He afterward took the general management of the New York branch of the Hartford Steam Boiler Inspection and Insurance Company, and was so identified until the spring of 1873. On March 12, of that year, he came to Chicago as a member of the insurance firm of W. H. Cunningham & Co., the senior member of which was his brother. Their business connection continued until October 1878, when Mr. Cunningham withdrew, and established himself alone. He is a thorough business man, of ample experience in his profession, and is an expert underwriter. He is a member of the Military Order of the Loyal Legion, the Union League Club, the Farragut Veteran Association, and of Apollo Commandery, No. 1, K. T. Mr. Cunningham has two children—a son, William Secor, and a daughter.

A. W. Spalding was born at Montpelier, Vt., on May 29, 1832, and is a son of Azel Spalding, who was a prominent lawyer of his native city. His maternal grandfather, Jonathan Wainwright, was well known throughout the State as proprietor of an iron foundry in Middlebury, at which place he manufactured stoves. Sending them over New England, Mr. Spalding has had a large and successful insurance experience, commencing with the Phoenix of Hartford in 1858, and the Franklin of Philadelphia in 1870, and being on January 1, 1880, when he resigned, manager of the Standard of London, from which position he advanced to the present position as general manager of the Home Mutual Company. The Home Mutual Insurance Company of California—a purely stock company notwithstanding the name—was organized in 1864, and in point of fire premiums is the leading insurance corporation, American or foreign, on the Pacific coast. In February, 1854, the company determined upon establishing a Western Department, comprising the States of Ohio, Indiana, Kentucky, Michigan, Illinois, Wisconsin, Minnesota, Iowa, Missouri, Kansas, Nebraska and the territory of Dakota, with headquarters at Chicago, and selected, as their Western manager, A. W. Spalding. The career of the Home Mutual has been one of continued success. Its record is filled with annual accumulations, during a period which has witnessed the downfall of hundreds of fire insurance companies. Its establishment of the Western Department is so recent that nothing can yet be written of the past. It has a cash capital of $500,000; cash assets, $566,658, and a net surplus of $250,806.61.

EDWIN A. SIMON, general manager of the Western Department of the City of London Fire Insurance Company (Limited), was born in Boston, Mass., on December 1, 1834. He was educated there, attending the common schools and studying for a short time at Amherst College. At an early age he entered the employ of the Old Colony Railroad Company, and was engaged in various capacities for about six years. He then took a position as messenger in the Freeman's National Bank, and worked through the various grades of promotion until appointed paying teller. He resigned
that office and entered the city treasury, where he served until the breaking out of the War. He was called to his country and volun-
teer his musket for the "thirty days' service." At the end of the
time he entered the navy and became a sailing master, attached
to the Charlestown Navy Yard. After the War he re-located in
Boston, having identified with the Firemen's Insurance Company.
Being thoroughly acquainted with marine service and ships, he was
adjutant for about two years. At the end of that period he became
connected with the Insurance Company of North America, of Phila-
adelph, serving them for over sixteen years in various responsible
positions. On February 1, 1852, he was appointed to his present
position, with headquarters in this city. His long experience, as
an insurance man, extending over a period of fifty years, was
brought into requisition on the establishment of this Western Branch,
with the result that it is now doing a flourishing business, and which
is constantly augmenting. Its exhibit December 31, 1853,
showed its assets in the United States to be $769,147.25, and its
net surplus $491,612.84. Mr. Simonds was married at Boston, on
January 7, 1859, to Miss Adelaide Wheeler. They have two daugh-
ters, Mary Adelaide and Alice Isabel. Mr. Simonds is a member of
the Masonic Order, Knights of Honor, Knights of Pythias, and of
the Union League Club of Chicago.

W. W. CALDWELL is general manager for the New Orleans
Insurance Company, to which position he was appointed January
1, 1854, and was associated with the company for eighteen
months previously. In 1857, he was appointed general agent for
the People's Insurance Company, of Newark, N. J., and, in 1859,
governor of the New Hampshire Insurance and Fire Company and
in the Bureau, of which latter Mr. Elphicke is manager, and he
began his career in Jeffersonville, Ind., in 1864, removing therefrom to Indianapolis in 1866, and then engaged in local and
subsequent business until his removal to Chicago in 1877. He was
born in Louisville, Ky., on August 3, 1835, but was reared in Jeffersonville, Ind.,
his parents having removed to that town while he was quite young.
There the Colonel received his education, and in Southern Indi-
ana he raised the first company that was enrolled for the defense of
the Union. The company was mustered in as Co. "B," 23d Indi-
ana Infantry Volunteers, and Mr. Caldwell was mustered in as
captain of that company, which was colored. Caldwell and Shiloh,
Captain Caldwell was authorised to raise a regi-
ment, which he did. This regiment was mustered into service as
the 51st Indiana Volunteer Infantry, and Captain Caldwell was
commissioned its colonel, when not twenty-five years of age,
In 1862.

CHARLES W. ELPHICKE commenced his insurance experience
with the Traders' Insurance Company in 1872. In 1876, he went
into partnership with Eliza C. Hilliard and David Vance, who
came here from Milwaukee, under the firm name of Hilliard,
Elphicke & Co., continuing with them until 1878, when they
returned to Milwaukee, and he accepted the agency for the Minne-
apolis, Department of the Northwestern Insurance Company. In 1884,
James A. Myers, who was also with the Traders' Insurance Com-
pany, and had had an interest with Mr. Elphicke as silent partner since 1882, became an open partner, under the firm
name of C. W. Elphicke & Co. Mr. Elphicke came to Chicago in
1862, and was formerly a resident of Jololo, N. Y., and for eight-
years sailed the Lakes, having been for many years captain of
various vessels. He has been a member of the Board of Trade
since 1873.

WILLIAM E. SMITH came to Chicago in 1866, and was identi-
cified, from the year 1868, with the real-estate, building and insurance
interests. Immediately after the fire, he paid particular attention
to contracting for erecting buildings, in which he built up a large
business and in which department he was very successful. His
insurance agency was established in September, 1882. Although of so
recent introduction he has already taken no insignificant place among the insurance men of the city, and the companies he repre-
sents have had their interests carefully watched and vigorously
promoted since they have been in his hands. He is manager of the
Mississippi Valley Manufacturers' Mutual Insurance Company, of
Rock Island, Ill., and is secretary of the Mutual Mill Insurance
Company of Cook County, Ill., both of which companies are repre-
sented at his agency. They are comparatively young companies, but are constantly increasing in business and the favor of the com-
nunity.

MRS. MARIANDA R. SMITH, the only lady insurance broker in
the United States that is doing the same class of business, is a na-
tive of the State of New York, where she resided during her child-
hood. She was brought up to womanhood in Cincinnati and
educated at Greencourt College, a noted Quaker school of that
city. In April, 1852, Mrs. Smith made her home in Chicago, and
solicited for the Traders' Insurance Company. In July of the same
year, she married for herself, and with a limited experience in the insurance business, she has made a wonder-
ful success in her chosen calling. Starting in with no patronage
whatever, she has secured a patronage that pays her a handsome in-
come and gives employment to three office clerks, two travelling repre-
sentatives and a number of solicitors. From one premium, her
business has grown in the brief space of three years to over one
thousand, and pays five per cent interest per annum, being one of the
only large lines of insurance, her customers extend all over the
country, and she is constantly sending and taking insurance to and from European companies as well as those of America.

MRS. SMITH was a Democrat, and Mrs.'s party in the State. She is
an ambitious and energetic, and solely by her own efforts has built up
a splendid business and by her rare qualities of heart and mind has
won the esteem and highest regards of business and insurance men
generally.

BUREAU OF LIFE INSURANCE INFORMATION.—The late Horace
Greeley once said: "The man who discovers a real public want
official reports of the Insurance Commissioners of Massachusetts,
New York and other leading states, including Illinois, from first
issues up to the present year. These reports are a valuable ency-
clopedia of insurance literature. From these reports, Mr. Tabor
has prepared a complete financial history, from January 1, 1872, to
the present time, of every life company doing business in Illinois,
embracing assets, liabilities, surpluses, expenses, interest earned,
real-estate owned, volume of business, death-losses and matured
endowments, together with other valuable information, and these
are classified and tabulated with special reference to rapid and
thorough comparison of each company with all the others. The
following is from the Commercial World and M. S. Exporter, New
York City, of October 5, 1882: "Mervin Tabor, No. 115 Dear-
born Street, Chicago, is in the fullest sense of the words what he
styles himself, an 'Insurance Expert.' Mr. Tabor has become
such, not only by study, thought and observation; but by many
long years of experience in placing and handling policies of
insurance. Mr. Tabor has no connection or interest in any
insurance company, nor has he ever been a member of the Bureau. Any
one wishing to insure his life, any one having done so who seeks to
make a change of any kind, or wishes any difficulty solved in con-
nection with life-insurance matters, can gain more satisfactory
information from Mr. Tabor than from any other source in Chi-
icago. Such is the judgment of more than a score of the best liter-
ary and scientific literary minds of Illinois." In the early part of
1885, the merits of Mr. Tabor received public recognition by his being
appointed Actuary of the Insurance Department of Illinois by the
State Auditor.
The history of the growth of the manufacture of iron in its various forms in Chicago, if told in detail, would be read with almost the same degree of interest which attaches to a romance. It was conceded at an early period of the city's history, even by commercial rivals, that Nature had chosen her site, and that a quiescent waiting on the part of her citizens would ensure for the city a geographical prominence as a center for the distribution of breadstuffs. Her ultimate control of the grain trade of the Northwest was an admitted possibility. But not even the most sanguine prophet, however biased in his predictions, would have dared to foretell her eminence as a center of manufacture. And yet, despite all adverse predictions, and in excess of the fondest expectations of Chicago's most ardent friends, the manufacture of iron ore into its various commercial forms—utilitarian and ornamental—has assumed such proportions in this city that the Northwestern metropolis at present ranks third among the manufacturing centers of the country, having attained this prominence within the short space of ten years, its relative position in 1870 having been unimportant.

The accuracy of the foregoing statements can be best shown by the following tables, in which are given the figures (gathered from the United States Census reports) relating to the manufacture of iron and steel in the United States in 1870 and 1880, which show the rapid rise of Illinois in the list of iron-producing States. Their perusal is necessary in order to a just appreciation of Chicago's relative importance among the "iron-centers" of the United States.

### Tables relating to the Manufacture of Iron and Steel throughout the United States.

#### I. The production of each branch in 1870 and 1880, with the percentage of increase or decrease during the latter year.

<tr>
<td>New York</td>
<td>595,300 tons</td>
</tr>
<tr>
<td>Illinois</td>
<td>417,967 tons</td>
</tr>
</tbody>
</table>

The fourth rank among the States, in 1880, was occupied by Illinois, which, in 1870, was fifteenth in order of production, having made only 23,751 tons, as against 417,967 tons in 1880. The increase in ten years was one thousand five hundred and twenty-two per cent—the most marvelous in the history of the country.

### Conclusion.

In the production of rails, Illinois ranked next to Pennsylvania, having produced 275,988 tons of all kinds, as against 509,912 tons manufactured in the latter State. Of the total production of rails Pennsylvania made forty-seven per cent., and Illinois twenty-three per cent., the next State in rank being Ohio, which produced but nine per cent.

The causes which have combined to bring about this result have been outlined in the second volume of this History, and need not again be alluded to here. The main feature of the almost phenomenal progress of the iron industry since 1871, however, may be briefly sketched.

The year 1874—following close upon the panic of 1873—was one of depression among manufacturers. The value of the pig iron sold in Chicago during the year was, in round numbers, $4,836,000; the receipts having been about 115,000 tons, and the average price $42 per ton, or about $10 less than the ruling rate for 1873. In comparison with other iron-markets of the country, however, Chicago held its own surprisingly well. The causes of the falling-off in the sales of the year, which amounted to nearly $1,000,000, are to be found in over-production and a decreased demand for manufactured iron. The fever for railroad-building was at its height in 1872, and the development of the manufacture of pig-iron was abnormal; as a result, the prices of iron and steel declined nearly fifty per cent, in two years.

In manufactured iron, the decrease was not so marked, except in the case of car-wheels and steel rails, the production of both of which fell off fifty per cent. The cause of this decrease is to be found in the fact that the panic of 1873 caused a cessation in railroad extension, and had it not been for the adoption of a policy of replacing iron rails with those made of Bessemer steel, the decrease in the latter branch of manufacture would have been even still more marked. The total value of the rolling-mill product of Chicago (including the mill at Joliet, owned and controlled by Chicago capitalists), during 1874, was about $14,000,000, as against $16,000,000 in 1873.

The following table shows the percentage of increase or decrease in the value of product in some of the leading varieties of iron manufacture in 1874, as compared with the preceding year:

The following table shows the number of establishments devoted to iron work in its various branches, in 1874; the capital invested; the number of employes; and the total value of the production. It should be remarked, by way of commentary, that of the entire one hundred and fifty-nine establishments, only twenty-six were in existence prior to 1860.

The total number of establishments in the United States in 1875 was six hundred and seventy-six, with an annual capacity of 4,500,000 tons; more than one-half of all the stocks in the country were out of blast. During one week in November, seventeen furnaces in the "Hanging Rock" region in Ohio stopped work, because of their inability to make iron and realize the cost of production. Of the thirty-six charcoal furnaces in the Lake Superior region, in Michigan and Wisconsin, only twelve were in blast. The decrease in the production of pig iron throughout the United States, however, is best shown by the following table:

Before the close of 1876, many of the mills and furnaces which had been called into existence by the
speculative demand of 1872 (which, as has been said, had its origin in a prevailing mania for railroad-building) were idle, and some of them were destined never again to kindle their fires. Looking at the trade of the country as a whole, however, it may be said that the period had passed when iron was regarded as a legitimate Eastern product. As a manufacturing center for iron and steel, Chicago had assumed a leading position. Of the 290,000 tons of Bessemer steel rails manufactured in the United States during the year, 85,000 tons (or nearly one-third) were the product of Chicago mills. The annual pay-roll of the Chicago mills (including those at South Chicago and Joliet) was $2,900,000 as against $7,500,000 during 1875, and over 1,100 tons of coke and coal were daily consumed in the manufacture of pig iron and rails. Less iron was manufactured here during the latter year than in 1876, although the market value of the total product exhibits a decrease of about eight per cent. The diminution, however, was more apparent than real, a ruinously low scale of prices having prevailed. The decrease in the value of iron manufacture was more perceptible, also, in minor wares than in the products of the rolling-mills. The following table contains a summary of the amount of iron manufactured in this city during 1876, arranged in a form similar to those above given:

The year 1878, while not one of remarkable prosperity among dealers in pig iron, was favorable to iron and steel manufacturers. The amount of the former commodity handled in Chicago exceeded that of 1877; but low prices and the sluggishness of trade affected profits disastrously. During the latter part of the year, however, began to appear symptoms of a general revival of business. Railroad and car building were resumed; the demand was stimulated; prices advanced, and the business outlook became more hopeful. Sales for the year aggregated about 150,000 tons, at an average price of $81.50. In iron and steel manufacturers, however, the value of the product showed a gain of nearly four per cent, as will appear from a comparison of the following table with that preceding. The aggregate sales of steel rails increased about six per cent; the Chicago and Union Rolling Mills in this city were in active operation during 1878, while the works in South Chicago resumed business, running to their utmost capacity—turning out about 20,000 tons of iron and 1,600 kgs of nails per day. The aggregate movement in iron foundries was considerably larger than in 1877. Boiler, bolt and screw, file, and galvanized-iron works were fairly active at unchanged prices. Several Chicago steam-fitting and heating firms filled contracts in South-
ern cities, and two galvanized-iron cornice firms secured
large contracts in Texas and Nebraska. Shipments of
horseshoe nails were made to England, Russia and Ha-
vanna.

The following table presents a summary of the
amount of iron and steel manufactures in Chicago du-
during 1878:

Total: 203, $15,412,320, 19,832, $85,116,715

The year 1879 witnessed the long foreseen reaction
in the trade in pig iron. For the six years follow-
ing 1872, the iron industries of the United States
had languished, and at the beginning of 1879, of seven
hundred blast furnaces in the United States, four hun-
dred and forty were out of blast, and only a portion
of the remainder were required to run on full time.
Mean-
while prices had declined from $54 in October, 1873,
to $25,50 in October, 1878, and the path of decline was
stretched with the wrecks of shattered fortunes. But
having been among the first to feel the blight of finan-
cial depression, the iron industry was among the first
to reap the benefits of returning prosperity. During
the first six months of 1879, the consumptive demand
had so increased that the surplus stocks of the country
amounting, at the close of 1878, to about 516,000 tons
had been nearly all disposed of, and, by midsummer,
supplies had been reduced to smaller limits than had
been known since American pig iron first assumed im-
portance. Short stocks and increased demand stimu-
lated prices, which, from August and September, ad-
vanced from four to five dollars per ton, and continued
to appreciate during the remainder of the year, until
$45.30 per ton (for No. 1 Lake Superior) had been
reached—advance of over one hundred per cent, from
the highest prices of 1878. The year's sales
amounted to 3,500,000 tons,—a decided increase over
those of 1878. In iron and steel manufactures, the ad-
vance was almost equally remarkable. Both the roll-

ing-mills in this city were in active operation during the year and the product of steel rails increased nearly
six per cent, while the shipment of Bessemer steel rails
to Canada was larger than for several years preceding.
Among foundry-men the year was about the same as
1878; prices appreciated, but an increase in the cost of
labor resulted in about equal profits to manufacturers.
Boiler, stove, bolt and screw, galvanized, range and
furnace and wire works were fairly active during the
greater portion of the year. That manufacture in gen-
eral was prosperous, is sufficiently shown by the fact
that the prices of machinists' supplies advanced from
forty to fifty per cent, over those of 1875, and that the
aggregate sales amounted to nearly $326,000.

There can be no doubt that the increase in railroad
building exerted an enormous influence upon the iron
trade. The progress is shown, approximately, in the
following statement:

Total: 316, $19,050,000, 11,212, $323,215,000

The prosperity in the pig iron trade, which began in
1879, continued until March, 1880; the prices of Nos.
1 and 2 Lake Superior rising, in February, to $55 a ton.
But during January and February, 1880, the imports
from Great Britain amounted to 269,000 tons, against
26,900 tons during the corresponding months of 1879.
Scores of furnaces which had been out of blast for sev-
eral years lighted their fires, and the sanguine proph-
ets who had predicted a continuation of the high prices
of February had the mortification of seeing Lake Superior
sell for $35 in August. The shrinkage in values, how-
ever, did not exert so disastrous an influence upon Chi-

icago dealers as might be supposed, owing to the fact
The number of tons of pig iron handled in Chicago during 1881 was about the same as that of the previous year—600,000 tons, but, owing to a fall in prices, its aggregate value did not exceed $16,000,000, or about nine per cent, less than in the preceding year. The policy of the trade during the year was a conservative one; the speculative mania had exhausted itself, and there were consequently no sharp fluctuations in values. The demand may be said to have been continuously good, at times even exceeding the supply. The quotations at the close of the year were $31 to $35 for Lake Superior and $30 to $32 for Scotch iron. The relatively high price of the latter was due to an advance in ocean freights and to a decrease in importations, the falling off in which constituted the noteworthy feature of the year's business.

In this connection, the figures given below are of interest, as showing the growth of the iron industry in the United States, in which this city was an important factor:

The number of pig iron handled in Chicago during 1881 was about the same as that of the previous year—600,000 tons, but, owing to a fall in prices, its aggregate value did not exceed $16,000,000, or about nine per cent, less than in the preceding year. The policy of the trade during the year was a conservative one; the speculative mania had exhausted itself, and there were consequently no sharp fluctuations in values. The demand may be said to have been continuously good, at times even exceeding the supply. The quotations at the close of the year were $31 to $35 for Lake Superior and $30 to $32 for Scotch iron. The relatively high price of the latter was due to an advance in ocean freights and to a decrease in importations, the falling off in which constituted the noteworthy feature of the year's business.

In this connection, the figures given below are of interest, as showing the growth of the iron industry in the United States, in which this city was an important factor:

- **Total amount of iron ore mined in the United States (in twenty-three iron producing States) as shown by the U.S. census report for 1880** is 7,971,076 tons.
- **Production in Lake Superior region alone during 1881** is 2,250,000 tons.

The changes in the iron ore mining industry throughout the country during the decade ending June 1, 1880, expressed in percentages computed on the returns of the census of 1870, are as follows:

<table>

The number of iron and steel manufactures during 1881 increased from 10 to 15 per cent, nearly every department sharing in the improved general activity. Not alone, however, was the augmentation noticeable in the amount of transactions and in the imports and manufactures, but the quotations ruled more steadily and the prices obtained were firmer and more remunerative. The raw material received, being obtainable at a lower price, also contributed to the general prosperity of the manufacturers, enabling them to make a greater proportionate profit from the sale of their product. It is difficult to assign the especial reason for this improvement outside of the general prosperity that attended all branches of trade and commerce. The rolling mills found it necessary to run to their full capacity. Four blast furnaces of the mills then in process of erection at South Chicago were in operation during the year, and it was expected that by March 1, 1882, that establishment would be fully at work, its capacity being about 130,000 tons of steel rails annually. The following table shows the business of the year 1881:
Great depression characterized the pig iron trade during 1883. The causes were threefold,—over-production at home, excessive importations from abroad, and a decline in railroad building. During the latter half of the year there was a great curtailment of production, as is shown by the fact that of the four hundred and seventeen furnaces in blast on January 1, 1883, only three hundred and twenty-five were in operation at the close of the year. The imports for 1882 had been $89,655 tons, and this amount was not greatly reduced in 1883,—importation being stimulated by the extremely low ocean freight. The year was, however, more disastrous to producers than to dealers. The fall in prices was so gradual that the latter were, as a rule, able to avoid loss. The sales of pig iron in Chicago during 1883 did not greatly exceed 500,000 tons, a marked falling off from those of 1882. It is an interesting fact, that while much less Lake Superior ore was received here, the receipts of Southern iron increased fifty per cent.

In manufactured iron, the trade during 1883 was more generally satisfactory than that of the previous year, when the long strike of the iron workers seriously hampered business. The demand, however, fell below manufacturers’ expectations, and long stocks and lower prices were the result. The shrinkage in value was more marked in the case of iron than of steel, the former selling, at the close of the year, for but little more than the latter. The characteristics of the year’s business may be said to have been an increase in tonnage, unaccompanied by an augmentation of profits. The rolling-mills, of which there were five (counting the North Chicago Mills and the works at South Chicago as one) suffered. In February, the Union Iron & Steel Works shut down temporarily about November 1, with the intention of resuming operations early in 1884. The Chicago Steel Works did an average business, but at lower prices. The following table shows approximately, the amount of iron and steel manufactures of the city during 1883:

<table>

The year 1882 was a reasonably prosperous one in the trade of pig iron. The tonnage handled reached 750,000, an increase of about twenty-five per cent. over the volume of business transacted during 1881. Prices somewhat depreciated and profits were not so large as those of the preceding year. Imports were less, most of the iron consumed being American. The trade in manufactured iron was more or less hampered by a strike, which, commencing in June, continued until September, and whose effects were more marked upon the manufacturers of sheet-iron and nails than upon any other department. Despite this drawback, however, the trade in manufactured iron and steel was prosperous, and the number of establishments increased, as did also their capacity. The result of the year’s business may be best learned from inspection of the following table:

</table>
During 1884, the prices of pig iron declined from $1 to $2 per ton in every variety, and sales fell off nearly twenty-five per cent. Disastrous as this decline was, however, it did not keep pace with the shrinkage in the value of steel rails, which, in two years, dropped $29.50 a ton. Only as far back as 1886, steel rails were sold at $85 a ton, while at the close of 1884 the same goods were quoted at about $28 a ton. Notwithstanding this depression, the rolling mills did not greatly suffer. The North Chicago Mills, after running about six months, shut down on October 1, and the works at South Chicago closed for sixty days on November 22, after having been in operation for nearly eleven months. The volume of business done by the rolling mills in general has been estimated by competent authority to have exceeded that for 1883. A depreciation of prices caused the collapse of some of the smaller iron foundries, although the larger establishments were enabled to counterbalance losses in one direction by gains in another. Among boiler manufacturers trade was almost stagnant, and among machinery manufacturers generally the year's business hardly justified the characterization of prosperous. To multiply illustrations of depression is unnecessary; it is enough to say that the year's business fell far below that of 1883. The reader may best learn the details from a comparison of the following table, which relates to 1884, with that which has reference to 1883:

The first three-fourths of 1885 constituted a critical era for American dealers in iron. The demoralizing depression of 1884 repeated itself. The prices of farm products were low; manufacturing proved unprofitable; traffic generally declined; and the construction of new railroad lines was practically at a standstill. The manufacture of pig iron, however, continued to an extent far exceeding the demand. As a natural sequence, prices fell faster than the cost of production could be reduced, and the manufacturer was confronted with two alternatives—failure, or "shutting down" of business, which could be conducted at remunerative rates. The total production of pig iron for 1885, throughout the country, was about the same as for 1884, though the tonnage of the Northwest was materially reduced. In steel rails, there was an equal depression. A glutted market, consequent upon over-production, kept prices so low that on August 25, 1885, a meeting of manufacturers was held at which it was agreed materially to reduce production. The rolling mills of the city did not feel warranted in running to their full capacity during the year, and at the North Chicago Mills a strike in the rail mill occurred in June, and a large number of hands were consequently thrown out of employment during the remainder of the year. The total rolling-mill product of the city was about the same, in tonnage, as in 1884, though the value was somewhat less. The general course of business among iron and steel manufacturers in Chicago, during 1885, may be best learned from the following table:

Following are presented sketches of various houses and of individuals, representatives of the different integral industries composing the vast iron interests.

PIG IRON.

Pickands, Brown & Co.—Among the largest and most extensive dealers in pig iron in this city is this firm, which is located at No. 95 Dearborn Street. This house was established in January, 1884, succeeding the old and well-known firm of A. B. Meeker & Co., of which Mr. Brown was an active member for many years. They are sole agents for the National Furnace Company, with furnaces at Depere and Green Bay, Wis., charcoal pig iron; Lake Iron Company, charcoal pig iron, Iron Belt, Mich.; Spring Lake Iron Company, charcoal pig iron; furnaces at Fruitport, Mich.; Appleton Furnace Company, charcoal pig iron; Franklin Company's anthracite pig iron; Union Bessemer coke pig iron from Lake Superior ores; ironing charcoal pig iron are also dealt in. The works are located in Valley, Salisbury and Hanging Rock anthracite, charcoal and coke pig iron. The firm is composed of H. S. Pickands, W. L. Brown and Pickands, Martin & Co., of Cleveland, O., all well and favorably known throughout the West and Northwest as energetic and enterprising business men.

L. L. Brown was born in 1842, in Michigan, and is the son of Hiram Brown, who, with his family came West in 1833, locating at St. Joseph, Mich., where he resided until 1848. In that year he came to Chicago, remaining here until 1857, when he returned to Michigan, where he continued to reside until his death, which occurred in 1885. The son remained in Chicago, being reared and educated here until the breaking out of the Civil War. In 1862, notwithstanding he had not yet attained his majority, he enlisted in the Chicago Mercantile Battery, in which organization he served during the remainder of the War, being honorably discharged at its close in July, 1865. He at once entered the service of the old iron and coal house of A. B. Meeker. He was admitted to a partnership in 1870, and so remained until 1884, when that firm was discontinued and was succeeded by the present firm of Pickands, Brown & Co. Mr. Brown is to-day without doubt the oldest pig-iron merchant, still in the business in Chicago. The old house of A. B. Meeker & Co. was established in 1857. So far as is known, the first house in the city to handle pig iron was that of Norton & Co., as early as 1835, but that firm has long been out of existence. From the date of Mr. Brown's connection with the trade, he has seen its greatest growth and development, and in all its business life has been found among those who have been the leaders in its progress. Although a young man, comparatively speaking, he is yet an old settler of Chicago, having lived here since 1848; and it is a matter only of
 justice to add, that he has ever been counted among the truest and best of citizens, in always advocating and working for the moral and material advancement of the city as well as for its commercial prosperity. Mr. Brown married in 1871, Catharine Seymour Bigelow, daughter of the late Dr. Stephen Seymour, of Chicago.

RAIL MILLS.

The SPINGFIELD IRON COMPANY was organized under the corporate laws of the State of Illinois in July, 1871. Its leading projectors and first officers were Charles Ridgely, president; J. W. R. Curling, vice-president; and George M. Brinkerhoff, secretary and treasurer. Its first board of directors, in addition to the gentlemen already named, were John Williams, Jacob Bunn, W. D. Richardson and O. H. Miner. The capital stock at the time of organization, was $200,000, and the plant at Springfield was built for the purpose of making iron rails. The mills were put into operation in 1871, and it is now of interest to note that the first iron rails sold, brought the firm would now be considered the remarkable price of $120 a ton. Three years later an addition was made to the mills by putting in a complete set of machinery for the manufacture of bar iron, and at the same time the capital stock of the company was increased to $480,000, which it still remains. In 1881, the company obtained a growing demand for lar steel, both in rails, boiler plates, and for shaped steel for agricultural implements, the mill further increased its capacity by adding the manufacture of these specialties to its plant. The company now employs about twelve hundred hands and turns out an annual product of an enormous value.

In 1881, the company conveyed the property to Messrs. C. L. Wickersham. This gentleman held his position until 1884, when B. L. Keen, the present resident, treasurer, assumed the company's interests here. A commentary upon the production and wisdom characterizing the management of the affairs of this company is afforded by the fact that it has come unscathed through the panic of 1873 and 1884, and, under all the depressions attendant upon the iron industries of this country, has, from the first to last, paid one hundred cents on every dollar of its obligations.

B. L. KEEN was born at Philadelphia, Penn., on June 3, 1853. He received a common-school education, and, in 1875, entered the employ of the Frankfort Steel Works, at Philadelphia, where he remained long enough to familiarize himself with the details of manufacturing steel. In the fall of 1882, he came to Chicago, intending to establish a branch house for the Philadelphia firm, but not fully completing his arrangements, the design was abandoned. He then engaged with the Springfield Iron Company, remaining one year at their mills at Springfield, and, in 1884, came to Chicago where he has resided. Here he looks after the interests of that corporation, giving his attention not only to the trade in this city, but also to that of the entire Northwest. Mr. Keen is a young man, but viva voce, of the greatest ability, and his practical knowledge of the business, there can be but little doubt that he is standing on the threshold of what will prove a prosperous and useful career.

JOSEPH THATCHER TORRENCE, son of James and Rebecca Torrence, was born in Monongalia County, Penn., on March 15, 1852. When nine years of age, he left home and went to Sharpsburg, Penn., where he obtained employment with John P. Agnew, owner of several blast furnaces, and remained with him until the age of eighteen. Leaving there he went to the Dier Hill Furnaces, Mahoning County, Ohio, where he obtained employment. His first work was that of driving a horse and cart. A few weeks of this duty dissatisfied him, and he gave up his horse and cart to enter the blacksmith shop at the same works, where he continued three years, during which time he was made assistant foreman for Mr. Richards, manager of blast furnaces. He was connected with this line of business in the region throughout until the War, and at the age of eighteen enlisting in Co. "A," 156th Ohio Volunteer Infantry, and was appointed a non-commissioned officer. He followed his regiment until the battle of Perryville was fought, where he was wounded four times. He was honorably discharged on account of physical disability, and was given a life pension. Returning to New Castle, Penn., he was employed by Mr. Richards at the blast furnaces and rolling-mills of Keis, Brown & Berger, in their rolling-mills, machine shops, etc. Shortly after his return, however, he joined the Volunteer Forces which were detailed for the pursuit of the Confederate raider, General Morgan, and the time of his excursions north of the Ohio river, and his command took an active part in the plans for the capture of the daring cavalaryman. He remained at New Castle about six years and had charge of several furnaces there, and afterward was in charge of the products of the furnaces and their sale. During the succeeding seven years he was in the same line of business, having travelled through the South, devoting his time as an expert in the construction and repair of blast furnaces and rolling-mills until 1884, when he came to this city and took charge of the furnaces of the Chicago Iron Company, continuing the said business until the close of 1887. During that year, one of the largest improvements for the Joliet Iron & Steel Company, and remained in charge, as its manager, till in 1874, when, at the instance of Thomas Hoyne, W. J. O'Banahan and W. F. Coolidge, he was elected colonel of the 13th Regiment, Illinois National Guard, was commissioned by Governor Beveridge, and remained in office until 1876, when he was commissioned Brigadier-General by Governor Collin. He was thereupon employed on great riots. It was through his energetic efforts and determined resistance of the mobs that no greater loss occurred of life and property. He resigned his commission in 1881. After serving some time as consulting engineer for the Green Bay and Hango, P. R., he associated himself as part owner with Messrs. Hale & Ayer, Chicago, and Joseph H. Brown, Youngstown, Ohio, and organized the Joseph H. Brown Iron & Steel Works, and built the plant on the Calumet River, which was afterward leased by the former. Mr. Brown and sons and Joseph T. Torrence, who operated them. Later they sold their own works to the Calumet Iron and Steel Company. He served as a member of the executive committee, and remained a director until 1892, when he went to the western end of the Canal and West Lake streets, which is among the handsomest and substantial business blocks of the city. The management of the Chicago house was in charge of John Kirk from 1877 to 1881, when Mr. Stein, the present manager, was elected president of the firm. Mr. Torrence, in 1872, to Miss Libbie M. Norton, daughter of the late Judge Jesse O. Norton, of this city. They have one daughter, Jessie Norton.

JOSEPH & LAUGHLIN.—The house of Jones & Laughlin, Limited, proprietors of the American Iron and Steel Works, was estabished in Pittsburgh, Penn., in 1852, by B. F. Jones, James Laughlin and Benjamin Lauth. The branch in Chicago was established in 1857, at the corner of Franklin and South Water streets, at which place the business was conducted until 1884, when it was removed to River and South Water streets, and remained there until burned out in the great fire of 1871; after that the business was moved to the corner of Jackson and Canal streets. In 1881, the firm erected and moved into a new building on the corner of Canal and West Lake streets, which is among the handsomest and substantial business blocks of the city. The management of the Chicago house was in charge of John Kirk from 1877 to 1881, in which latter year Thomas M. Jones, a member of the firm, assumed charge of the business, which he conducted until 1879, when he moved to Pittsburgh, where he has since been manager of the mills of the company. Since 1879, Mr. Larimer has been in charge of the Chicago house.

JOSEPH M. LARIMER was born at Pittsburgh, Penn., on September 23, 1851, and was educated with William Larimer, a prominent citizen of Pittsburgh, and of Raechel M. Larimer, a descendant of one of the oldest families in Pennsylvania. In 1866, the parents removed to the West, locating first in Nebraska but finally settling on a farm near Lebanon, Kas. There, their son Joseph was reared, receiving such educational advantages as were afforded by the common schools, until he was eighteen years of age. In 1869, he came to Chicago and entered the employ of Jones & Laughlin, beginning as an office boy, working the first three months for nominally nothing, and being steadily advanced until, in 1879, he was made manager, a position he has since filled. Mr. Larimer married, in 1876, Miss Fannie L. Sherman, daughter of Ascan S. Sherman, an old and well-known settler of Chicago, and a brief sketch of whose life appears in the first volume of this work. Mr. and Mrs. Larimer have one daughter,—Helen.

CHICAGO STEEL MILLS.

Chicago, occupying the foremost of Chicago's industrial institutions at the present time, is the result of many works, which were established here in 1873, by C. P. Buckingham, John Buckinghain, Ebenezer Buckingham and Malcolm McDowell. The four gentlemen were the first to put on organization the first officers chosen were—C. P. Buckingham, president; Malcolm McDowell, superintendent; and Ebenezer Buckingham, vice-president. The incorporation of the Chicago Steel Works, Malcolm McDowell and George R. Kidgely, had, in a small way, been carrying on the business of manufacturing car springs; their shop located on the present site of the Chicago Steel Works, 770-780 W. Lake St., having retired from the firm, Mr. McDowell sold his plant to the gentlemen mentioned, who at once organized and incorporated the works under
the corporate title already given. They have also from time to time increased the size and facilities of their works, until now they employ at least 200 workmen in the rolling department. The articles manufactured by this company consist principally of various attachments for agricultural implements, their leading specialty being cast steel plow-beams and cast steel plow-plow handles for cultivators; also in large quantities of nail and staple goods. They also manufacture large quantities of wash-house stoves, which are sold in all parts of the country, and which make great inroads upon the sales of the manufacturer of similar products. The present owners of the company are C. P. Buckingham, president; Ebenezer Buckingham, vice-president; Edward H. Buckingham, superintendent and treasurer; and John H. Buckingham, secretary. The two last mentioned gentlemen are sons of the president.

CATHARUSINUS BUCKINGHAM was born in 1808, at a small village near the city of Philadelphia (now Zanesville, Muskingum County), Ohio. His father, Ebenezer Buckingham, was a merchant by occupation, and an early settler in the county where Catharinus was born; his mother was Catherine Putnam, a daughter of General Rufus Putnam. Catharinus was educated in his own town, until he arrived at the age of fourteen, when he was sent to the Ohio University, then located at Athens. He remained at this institution until he reached his sophomore year, when he left it to enter the military school at West Point, from which he graduated in 1828. The class of that year was an exceptionally fine one, and in the intellectual calibre of most of its members, West Point has never turned out a finer body of graduates. General Robert E. Lee was a member of this class, and, as cadets, the warmest friendship existed between himself and young Buckingham; though when the War of the Rebellion broke out, they were arranged on opposite sides in that great conflict. Immediately after his graduation, General Buckingham entered the Army as a member of the Topographical Corps, doing surveying work in Kentucky. He was thus employed for one year, when he was detailed to West Point as assistant professor of military science. A year later, he consented to accept a professorship in Kenyon College at Gambier, Knox Co., Ohio, where for three years he filled the chair of natural philosophy. He then turned his attention to business, remaining for a year later engaged in the manufacture of fine watches, locating in Mt. Vernon, Ohio, and where also, a few years later, he engaged quite extensively in the manufacture of machinery. In 1861, when the West coast belligerent entered the North and South, he was appointed adjutant, and in the same year organized a large body of Volunteers, and assigned to duty at the war department in Washington. In 1863, he resigned his position in the Army, and went to New York, where he engaged in the elevator business until, in 1868, he returned to Zanesville and engaged in the same line, until 1875, when he established the business of which he has already been given. It should have been earlier noted in this sketch, that General Buckingham, in 1856, came to Chicago, and, with Solomon Sturges, built the Illinois Central Elevators, Mr. Sturges operating these, while the General gave his personal attention to his machinery business in Ohio. General Buckingham has been twice married; first, in 1835, to Miss Hartt, of Litchfield, Conn., and a second time in 1847, leaving two children. He married again, in 1835, Mary P. Turner, of Ohio, who died in 1844, also leaving two children. In 1845, he married his present wife, Marion A. Hawkes, of South Hadley, Mass., by whom he has had his present family of two daughters. Of these there are now living four sons and two daughters,—Edward II., is the superintendent of the mills, John H., is the secretary of the company, Roswell II. is master of the rolls in the rolling mill department, and William is a practicing attorney of the city.

EBENEZER BUCKINGHAM, brother of C. P. Buckingham and vice-president of the Chicago Steel Works, was born at Zanesville, Ohio, in 1820. After graduating from Yale College, in 1845, he became a member of a large banking and commission firm of New York City. This firm had several western and southern branches, and Mr. Buckingham took the immediate charge of the one at Zanesville, his native town. He married Miss Lucy Sturgis, daughter of Solomon Sturges, of this city, and a few years later removed to Chicago, where he has since resided.

FOUNDRIES.

CHARLES B. BROWN, president of the Brown & Van Arsdale Manufacturing Company, was born at Vandallia, Ill., in 1830. His father, William H. Brown, was an early and prominent settler of Illinois, and one of the first proprietors of the Union Pacific Railroad, and also identified as a banker and enterprising capitalist; mention of his life and service, has already been made in the first volume of this work. His mother, Harriet (Seward) Brown, was a most estimable lady, belonging to a family that gave to the country a statesman whose name will long be remembered. In 1852, and soon after reaching his majority, Mr. Brown began his business career by establishing a firm of hardware and iron dealers at No. 103 Lake Street. In 1858, he bought up the establishment of Mr. Lake, and admitted to partnership E. L. Canfield, the firm being known thereafter as C. B. Brown & Co. In 1859, Mr. Brown became interested in a small foundry, in company with Oscar G. Lange, which was the nucleus of the present company's business. These works were at the northwest corner of Michigan and Kingsbury streets. In 1861, Mr. Brown bought the interest of Mr. Lange, and the foundry was then operated by C. B. Brown & Co. In 1862, the manufacture of seamless cartridges and rifle barrels was suspended, in order to increase the output of the foundry. In 1869, Mr. Canfield retired and Theodore F. Brown was admitted to partnership, and is still a stockholder in the company. In 1871, the present company was organized, and in the same year as the Brown & Van Arsdale Manufacturing Company, with a capital stock of $50,000. Charles B. Brown was chosen president and treasurer of the company and Mr. Van Arsdale vice-president. The name of the company in 1877, and J. G. Holt, who had been a foreman for some years, became superintendent. In 1878, William H. Brown became a stockholder in the company and was made its secretary, which position he still holds. This company manufactures a great variety of specialties, nearly all of which come under the head of wagon supplies. Their premises occupy nearly an acre of ground. The factory building on the corner of Illinois and King streets escaped destruction by the fire of 1871, and, with the exception of the Ogden mansion, was the only building on the North Side not destroyed. The loss to this company by the fire was about $100,000, only about $8,000 of their insurance being recovered.

The GLOBE FOUNDRY was established in this city in 1865, by Robert M. Eddy and James Gardner; the location then being at the southeast corner of Illinois and Franklin streets. In 1870, Mr. Eddy purchased his partner's interest in the business, which he continued alone from that date until his death, which occurred on February 21, 1884. In 1871, the Globe Foundry Company was incorporated in the Illinois fire insurance company, which has already been made, his two sons, George D. and Albert M., succeeded to the business, and are its present proprietors.

ROBERT M. EDDY was a native of Canada, born near Cobourg on August 16, 1822, the son of Alfred and Charlotte (Ivey) Eddy. In 1830, and when only eighteen years of age, he went to Buffalo, N. Y., and spent five years making himself a practical iron worker. In 1845, he started a foundry on his own account and a few years later formed a partnership with R. M. Blingham, a business connection which lasted until 1865. In that year he came to this city and established the foundry, the history of which has already been given. During his residence in Buffalo, Mr. Eddy was prominently identified with the volunteer fire department of that city; was cap- tain for a long time of Company No. 8, and finally promoted to the position of first assistant engineer of the entire department. He married, in 1845, Miss Sarah M. Quackenbush, daughter of Ithiru Quackenbush and Rosetta (Baker) Quackenbush, of Troy, N. Y. They had seven children, of whom five are now living: the latter, Ellen A., is now the wife of Dr. E. Wight, of this city; and Hattie M. is married to C. B. Bradley, also of Chicago. The sons, George D. and Albert M., who have already been mentioned, were born at Galena and Chicago, respectively. These sons, who have now become prominent capitalists, and are to-day building up and developing the business, to which they succeeded at their father's death and which during their lifetime they materially aided in establishing.

The firm of E. J. Gracie & Co., established at Buffalo, N. Y., on August 18, 1839, and there spent his schoolboy days. In 1865, he entered his father's shops and learned the business with which he has since been identified, ultimately succeeding his father.

On December 28, 1874, he married Miss Mary A. Riley, of Geneva Lake, Wis. He had previously been married, in 1871, to Miss...
Adeline Charbonneau, a native of this city, she demised on December 23, 1851, leaving one son,—George A.

Albert M. Elms was born at Buffalo, N. Y., on July 14, 1851, and there received his schooling, entered his father's shops and became identified with the business. He succeeded his brother, James W. Elms, as has been cited, on his father's death. On January 2, 1872, he married Miss Sarah A. Emery, of Rochester, N. Y.; they have two children.

COLUMBIAN IRON WORKS.—Twenty-five years ago, Carlton D. Elms came from the State of Maine to this city, and established the old Columbian Iron Works on the corner of Clinton and Vine Streets. He stayed there, until 1866, when he opened a new shop on Clinton, near Madison Street, the firm being Elms & Son; this was conducted by Mr. Elms, until his death, in 1877, when his son, Charles F. Elms, succeeded to the business and has continued the name ever since. In 1880, he sold the building on Clinton Street, and immediately purchased ground and erected a new and commodious building, supplied with the best and most improved machinery. In this building he manufactures various kinds of engines, shafting, hydraulic presses, pumps, boilers, trimmings, etc., also coin-molding machinery. His works have a capacity for employing seventy-five men, which is an increase by tenfold of the business established by his father in 1860. He has, in sixteen years employed over one hundred and twenty men, and now has a prosperous and increasing trade, his shops ranking among the very best in the city, both as to quality and class of work turned out.

Charles F. Elms, the only son of Carlton D. and Mary (Freeman) Elms, was born on December 1, 1844, at Hallowell, Me. He received a sufficient English education in the Common School of that place until his seventeenth year, when he came with his parents to this city. Here he entered his father's shop and learned his trade, with him until his death, when he succeeded to the business. Mr. Elms married, in 1869, Miss Clara M. Clark, daughter of Capt. W. L. Clark, of Davenport, Iowa, and who is one of the oldest citizens now living in the county where he resides. Mr. and Mrs. Elms have three children,—Carlton L., Charles Warren and Bessie.

Thomas Augustin Griffin, manager and treasurer of the Griffin & Wells Foundry Company, is a son of Thomas F. and Anna Griffin, and was born at Rochester, N. Y., on August 28, 1840. After passing through the grammar and intermediate departments of the public schools at home, he took a thorough course in the high school. At the age of sixteen he entered the employ of the firm of A. J. & A. E. Griffin, manufacturers, at Hallowell, Me., and remained there, three months after, which he began to learn the manufacture of car-wheels in the establishment formed by his father and brothers, the William Kieth & F. W. Griffin Co., in 1859. In 1860, his father, in the guidance of his father, who was then superintendent of the works, and obtained not only a practical, but an expert, knowledge of each department of the business, in 1872, in connection with his father and brother, he was with the Detroit Car-Wheel Company, at Detroit, under the contract to manufacture all of their wheels, etc. Separating from that establishment, by mutual consent, in 1877, they established the Griffin & Wells Car-Wheel Company, at Detroit, of which he is now vice-president. He withdrew from active duty in that establishment in 1880, and came to this city and organized the Griffin & Wells Foundry Company, of which he is the manager and treasurer. In 1883, he organized the Ajax Forge Company, which is now doing a business of $500,000 a year, from an original investment of $25,000. This concern employs over two hundred men in the manufacture of railroad supplies, etc. Mr. Griffin is a fine specimen of the Western self-made man, and his success has been the result of his own energy, enterprise and sagacity. He is largely interested in the Thomas T. Griffin & Sons' house, of Buffalo, N. Y., the St. Thomas Car-Wheel Company of the town of Innisfil, Ontario, Canada, and takes an active part in their operations. The yearly business in which he participates will aggregate over $2,000,000.

The CHICAGO FOUNDRY was established here in the winter of 1871, as the private enterprise of Edwin Drye, James Gurney, of Boston, and Edwin L. Lamb, under the firm name of Drye, Lamb & Co. The works then, as now, were located at the corner of Stein and Redfield streets, in immediate proximity to the North Chicago Rolling-Mills, for which institution this foundry company had the first done a great deal of work in the manufacture of heavy castings. In December, 1877, the incorporated company was formed, under the name of the Chicago Foundry Company, the first officers of which were—Edwin Drye, president; Edwin L. Lamb, vice-president and manager; and William W. Flinn, treasurer. In 1880, Mr. Lamb retired from the company, being succeeded by the office of general manager by H. A. Keith, who still holds that position. Besides this gentleman, the present officers of the company are—E. Drye, president; T. S. Kirkwood, vice-president; W. W. Flinn, treasurer, and A. J. Kirkwood, secretary. The works of this company are among the largest in the city, occupying a frontage of three hundred and fifty feet by three hundred feet in depth, and have a capacity for melting seventy tons of molten iron in twenty-four hours. A special feature of the concern is the five and a half foot high deck over the floor of the works, which isiversal for rolling-mill machinery, and for this purpose this foundry has cast a single piece of the enormous weight of twenty tons. For handling their work, which is nearly all of the heaviest castings required in steel and wrought iron works and other necessary appliances. They have also what is known as an air furnace, for making large rolls used by rolling-mills in the manufacture of steel rails.

J. L. Keith, general manager of the Chicago Foundry Company's works, is a native of Greenfield, Mass., and was born in May, 1845, the son of William and Almira (Thompson) Keith, H. A. received his education in the common schools of his native town until he was fourteen years of age, when he entered the Highland Military Academy, at Worcester, Mass., graduating from that institution in 1861. He then entered upon a mercantile career, being in business for himself with the firm of Otis Worrell & Co., a large crockery house in Boston. In 1864, he enlisted as a volunteer in the 5th Massachusetts Infantry Volunteers, his regiment being immediately ordered to the front; but as the War was already practiced, he was sent to camp, and not in any active service. Several months later the regiment was mustered out of the service. Mr. Keith returned to Boston and engaged again in the crockery business, which came to this city in May, 1867, when the firm was his own. In 1868, he entered the employ of the well-known iron firm of Joseph T. Ryerson & Son, as their bookkeeper. He remained with this house for nearly ten years, and, in 1876, became identified with the Foundry Company, of which he has been the general manager since 1850.

King & Andrews.—Inventions and processes whereby waste material of any kind is utilized and transformed into some valuable product, are regarded as genuine benefits to the world. Among the most notable instances of this kind is the manufacture of castings from tin clippings, damaged and tangled wire, galvanized and sheet-metal containers, and all manufactory waste, which was originated in the West by Messrs. King & Andrews, Nos. 218-22 North Union Street, which is the only firm in the United States wholly devoted to this line of foundry work. The product of their furnace is like no other metal, as it will not rust, corrode, or erode, and they take the action of any tool. It is preferable to all other material for weights, as its specific gravity is about five per cent, heavier than ordinary cast iron. The firm of King & Andrews is comprised of its own king and John W. Andrews. Both of these gentlemen were formerly connected with leading manufacturing establishments of this city, and formed their copartnership in 1879. This peculiar branch of foundry work is not only unique and unlike that of any other metal casting, but is one of the most interesting novelties of this decade. The production amounts to about three thousand tons per annum of finished castings.

The Rockwell Cup was first manufactured in Chicago on February 7, 1853. He attended the public and high schools, subsequently entering Harvard College, graduating with honors in the class of 1874. His first business experience was with the hardware firm of Sickles & Presto, at Evanston, Iowa, where he remained two years. Afterward, he was with the Adams & Weston Manufacturing Company until the fall of 1857, when he became a member of the firm of Watson & King, corner of Union and Fulton streets, makers of sash weights. In the following year, he formed a copartnership with John W. Andrews, his present associate. This foundry is the only one west of New York devoted exclusively to casting sash weights from tin scraps, cans, and waste material of a similar nature. The intense heat which is required for the melting of this metal unitifies the product for any use save that of sash weights, as it is not malleable, cut, bored or shave, and is extremely hard and brittle. Mr. King was married in January, 1851, to Miss Lucy W. Andrews, of Chicago.

KURTZ BROTHERS & BUIKER.—The business operated by this firm at Nos. 822-30 Hubbard Street, was first established here, in 1860, by Frederick W. Kurtz, at Nos. 24-26. Afterward, Mr. Kurtz came to Chicago in that year from Milwaukee, where he had been a foreman of a foundry, and the shop he started here was his first business venture in Chicago. After his brother, having been made a partner in 1869, his brother, George came from Connecticut and joined him in the enterprise, the style of the firm then being Kurtz Brothers. In 1872, the business having increased to such an extent that more commodious quarters were necessary, the firm moved, and have since grown to the present location, where they now have works, including a foundry, with a capacity of melting ten tons daily, a well-equipped machine shop, and also pattern shops for the manufacture of brass
and melted patterns of all kinds. In 1873, John S. Buhrer became a member of the Glazebrook, held a prominent place in the trade and style has been as it now is, Kurtz Brothers & Buhrer. Some idea has already been given of the growth which has attended the business of this firm, but its real character may be better appreciated from the fact, that during the first year, Kurtz composed his administrators by six or eight men and did only a small jobbing business; now the works of the firm have been increased to many times their former capacity and constant employments. The class of work done at this foundry consists of light-gray iron castings of all kinds, besides the manufacture of many articles known in the trade as shelf hardware. The patent cast-iron chairs described in this issue of the Chicago Manufacturer, in 1855 in the Exposition Building, were made at this foundry.

Frederick W. Kurtz, the founder of the business, is a native of Germany, born in the principality of Hessen, on May 16, 1841. His father, Mr. Kurtz, came with his family to America in 1844 and locating first at Bristol and afterward at Terre-ville, Conn., where Frederick was reared, receiving a fair English education in the common schools. In 1856 he began to learn the trade of a moulder in the town already mentioned, and, after serving an apprenticeship, removed to Naugatuck, where he remained until the War. In 1862, he enlisted in the 14th Connecticut Infantry, and, with his regimen, was assigned to the Army of the Potomac, their first engagement being in the battle of Antietam, which was the last battle this Army fought under the command of General McClellan. His regiment, however, remained with that Army under its subsequent commanders, sharing in all the engagements in the West, and was accordingly mustered first in Milwaukee, Wis., where he remained until May 1865, when he came to this city and founded the business which he is still engaged in. In 1869, North & Taylor, afterwards Charles Taylor, of Iron Ridge, Wis. They have had three children, two of whom only are now living.—George E. and Gertie May.

George Kurtz was born in Heiligen, Germany, in 1839, and came to the United States with his parents in 1847. He learned the trade of a moulder in town of Terryville, Conn., and then entered the employment of the Wheeler & Wilson Sewing Machine Company, where he labored until the breaking out of the Rebellion, being, at that time about twenty-four years of age. He married Miss C. N. Wheelock of Montpelier, Vermont, in 1859, and his family. In 1868, he entered into partnership with Frederick & N. B. N. D. Buhrer, in the 14th Connecticut Volunteers, serving with his regiment in the Army of the Potomac until the close of the War. He was honorably discharged in July, 1864, and returning home, shortly afterward again entered the employ of the Wheeler & Wilson Sewing Machine Company, as a moulder in their works at Bridgeport, Conn. In the summer of 1871, he came West, and, locating in this city, he joined his brother in the business with which they have since been identified. Mr. Kurtz married, in December, 1867, Miss Ellen E. Wells, daughter of C. C. Wells, of Fairfield, Conn. They have one son living.—Fred L.

John Buhrer was born at Cleveland, Ohio, on April 7, 1849. His father was Hon. Stephen Buhrer, one of the early settlers of Cleveland and also one of its honored citizens, who was chosen for four terms mayor of the city. After filling the office of mayor of the city, the duties of which position he discharged with signal ability, John S. Buhrer was given his preparatory training in the common and graded schools of his native town, and, in 1866, came to this city and attended the University of Chicago. In 1867, he went to Europe, completing his studies in the Universities of Berlin and Heidelberg, where he remained two years. Returning home, in 1869, he came to Chicago, and two years later married Miss Caroline Downer, daughter of Samuel A. Downer, an old citizen and the founder of the well-known firm of Downer & Co. Mr. and Mrs. Buhrer have had three children, two of whom are now living.—Stephen and John D. In 1873, Mr. Buhrer formed his connection with the firm of which he is still a member, and toward the succession of which he has contributed, in no small degree, by his close and untiring attention to the management of its affairs.

George Meehan, deceased, late proprietor of the Centre Avenue Foundry, was born in Lanarkshire, Scotland, in 1850. His father, Thomas Meehan, was an iron worker, as was also his grandfather. Thomas was given a fine education in the common branches, but at the age of twenty-one he went to work in the Old Manhattan Foundry Works, where he served an apprenticeship of seven years, learning the trade of a moulder. In the spring of 1870, being twenty years old, he came to this country and worked as a journeyman for two years in New York City. In March, 1871, he worked in Chicago, and worked one year as foreman of the moulding room in the extensive machine works of the Crane Brothers. In the spring of 1872, he came to Glazebrook & Co. as a machinist, working in the machine department. In 1873, he was employed by Messrs. Meehan & Kelly, and since has been connected with them.

Patrick Henry Meekan is a son of Patrick and Elizabeth M. Meekan, and was born at Burlington, Vt., on November 5, 1849. His father, Mr. Meekan, came with his family from America in 1844 to the Fifteenth Street, the specialty being rolling-mill and heavy machine work. His brother came to the town as a boy, and was apprenticed to the trade; after several years, he then entered the iron works at Forsbucka, and was employed in the manufacture of wrought iron articles. He has been a resident of this city for three years, and is an ex-soldier of the Union, and has been connected with the iron works in Donie, also an iron manufacturing center, where he acted as foreman. In 1869, he emigrated with his family to this country, and located at Aurora, this State, where he

THE IRON TRADE.
was employed by N. S. Bouton. At the end of several months he was engaged by the Chicago Car-Wheel Company, as moulder, and remained with it until establishment of the city in 1832. In 1852 he moved to this city and purchased the site of his present works, and has since been doing general iron moulding, light and heavy manufacturing, etc. C. E. Sandstrom his eldest son, has been associated with him as his partner, and the firm of C. E. & J. A. Sandstrom was organized. Mr. Sandstrom was married to Miss Caroline Funke, of Forshacka, Sweden, in 1854. They have four children,—Charles E., Annie C., Zachariah and Hulda M.

Charles Emil Sandstrom was born at Vermland, Sweden, on December 1, 1855. He attended the public school at his birthplace until he was thirteen years of age, and, in 1869, came with his parents to this country. During this time he attended the public schools of Aurora, Ill., and, upon leaving his studies, entered the iron foundry of N. S. Bouton, with whom he remained a year and a half. At the expiration of that time he came to Chicago, and was employed by John Featherstone until 1872. During that year his father came from Aurora, and, with him, purchased the present plant of A. Sandstrom & Co., and he has since been associated with his father as partner in the business of fabricating light and heavy castings. The facilities of this firm for prompt and reliable work are of the best, and their establishment has won an excellent reputation for first-class work with the trade.

Schillo, Cossman & Co. — This firm was established in 1862, by Anthony Schillo, Mathias Cossman and Solomon Senn. Their first location was in the old H. B. Moses foundry, at the corner of Polk and Beach streets, where they remained until 1866, when they removed to their present works. In 1870, after much experimenting with iron and foundry work, Peter Schillo purchased Mr. Senn's interest, and, in 1878, Mr. Senn died, his wife, a sister of Peter Schillo, retaining his business, notwithstanding the fact that his name is still as at first. The business consists of making heavy and light castings, for machinery, buildings and bridges, and ornamental iron works. Patterns of all kinds are also made to order. In the memorable fire of October 8th, 1872, the firm of Senn, Schillo & Co. were burned out, the flames reaching their works between 11 and 12 o'clock on Sunday night. Everything was destroyed, their total losses footing up over $30,000. With commendable energy and enterprise, they, however, began work on the third day following the fire, and, on the 1st day of January, 1872, resumed operations in their new works. As may readily be understood, the firm of Schillo, Cossman & Co. begins in a small way. The growth of their business from the first until now, is seen in the statement that originally they employed from fifteen to twenty men, and the yearly transactions of the firm did not exceed $40,000, now they employ from seventy to one hundred men, and their trade reaches $75,000 annually. The property owned by the firm consists of six lots on Polk street, and six other lots on Clinton street, near Mather street. These twelve lots are worth about $25,000, and the buildings upon them are worth about $50,000.

Mathias Cossman, now the senior member of the firm of Schillo, Cossman & Co., was born in Prussia in 1827. His father was Mathias Cossman, a native of Ravenna, on the Rhine, and his mother was Magaretta Kloskopf. His parents came to this city, and, in the following year, Mathias began learning his trade, that of a stove moulder, in the old Vandercamp foundry, on the North Pier. He worked at his trade as a journeyman, in 1862, when, in company with Messrs. Schillo and Senn, he established the business the history of which has been given. Mr. Cossman married, in 1853, Miss Johanna Simon, daughter of Simon, who came to Chicago in 1847, and who deceased in 1854, at the advanced age of ninety years. Mr. and Mrs. Cossman have had eleven children, three boys and eight girls. The eldest son, Jacob, was born on January 18, 1854. From his early childhood he exhibited a decided liking for books and study, and this, coupled with a deep religious nature, decided his parents upon educating him for the ministry. Accordingly, at thirteen years of age, he was placed in the Academy of St. Francis, near Milwaukee, from which institution he graduated in 1872. In October of the same year, he was ordained as pastor of St. Joseph's Catholic Church at Peru, Ill., and when only twenty-three years of age entered upon the active work of his ministry. He was remarkably industrious in his new field of labor, so much so, in fact, that his health became seriously impaired. In March, 1882, he was taken with an illness which terminated fatally on the 16th day of the month, during the four years of his ministry he had endeared himself, not only to the hearts of his parishioners, but to all who knew him, regardless of sect or creed. He was simple and unassuming in his habits, deep and fervent in his religious work, and sincere and honest in all he did for the welfare of his fellow-men.

His remains now rest in the beautiful cemetery of St. Boniface, Chicago. Of the seven girls now living, Mary, the eldest, is now a sister of St. Francis, as his minister the church, he had endeared himself, not only to the hearts of his parishioners, but to all who knew him, regardless of sect or creed. He was simple and unassuming in his habits, deep and fervent in his religious work, and sincere and honest in all he did for the welfare of his fellow-men.

Larsen, pattern maker, and now one of the oldest artisans in this line in Chicago, is a native of Norway, born on November 2, 1829, the son of Lars Ivensen, also a pattern maker. In 1849, he came to Chicago, which has since been his home, and shortly after his arrival here he went to work for the old firm of A. H. Pitts & Co., with whom he remained for nearly twenty-five years. In 1872, at which time the firm of John逊 was formed, this city, Mr. Larsen established himself in business on his own account, at No. 9 South Jefferson Street, where he remained nearly three years. He then removed to the premises of the Thorn Wire Hardware Co., and after remaining there for a time, he removed to his present location, at No. 51 West Lake Street. In 1883, his son, L. I. Larsen, was admitted to a partnership in the business, which, since that time, has been conducted under the firm name and style of Larsen & Son. Mr. Larsen married in Chicago, in 1854, Miss Maren Nelson, daughter of N. Nelson, of Norway. They have had five children, three of whom are living—L. I. and Clarence Charles.

Lars I. Larsen was born on August 29, 1855, on Dearborn Avenue, in this city. He was reared here and attended the Franklin and Kinzie public schools. After the fire he entered his father's shop, and learned the trade, becoming, in 1885, a partner in the business.

John A. McIntosh, pattern maker, was born near Cornwall, Glengarry Co., Canada, on January 6, 1842, and is a son of Daniel McIntosh. In 1866, he came to Chicago, which has since been his home, and here began to learn his trade in the pattern shop of P. W. Gates. Subsequently he worked as a journeyman in various shops in this city until 1885. In that year he started in business for himself at his present location, 17 North Jefferson Street. Here he has a large and well equipped pattern shop, and is doing a prosperous business, which, in the few years past, he has, by his persistence and enterprise, established.

Frederick Sandham, pattern maker, was born at Montreal, Canada, in 1854. His father was John Sandham and by occupation a painter. Frederick was reared and educated in Montreal, and, in 1874, entered into a partnership with his brother, Millin A. and thus commenced his career in the architectural iron work business, which has since become one of the prominent manufacturing firms of that city. In 1892, he came to New York City, where he worked for the firm who had the contract for furnishing patterns for the architectural iron work for the famous Cricklewood Buildings, which was built for the World's Fair held in that city in 1893. In 1897, he went to Europe and spent nearly a year in travelling. Returning, he located in business in the East, until 1901, when he came to this city, and established the works he still conducts, at No. 40 North Jefferson Street. Here he has a large and well equipped shop, and has built up an excellent trade. Mr. Sandham married, in 1884, Miss Barrett, daughter of Michael Barrett, of Limerick, Ireland. They have six children living.

STOVES.

Shepherd S. Jewett & Co.—This house is well known as one of the oldest and largest stove houses in the country. The firm was originally Jewett & Root, and was founded in 1836 by Sherman S. Jewett and Charles E. Root, of Sandusky, Ohio. The place of business was in the commercial section of the city, the office was open in the city, under the management of Frank F. Spencer, now of the firm of Hibbard, Spencer, Bartlett & Co., at No. 36 South Wabash Avenue. This location was occupied by them for two years, when they were succeeded by Lockwood. In 1854, Samuel H. Jewett succeeded Mr. Spencer in charge of the Chicago branch, who in turn succeeded in being transferred, in 1873, by Charles W. Day. Chris. C. Hegner was the manager, and in 1879, Albert C. Jewett succeeded Mr. Hegner, and in 1881, he was succeeded by Frederick H. Jewett, the present manager. The building of this house, and

THE IRON TRADE. 483

883, with the exception of a few weeks in the fall of 1871, when they supplied a "fire ship" for Wabash Avenue Bridge, near Market Street. In 1882, Sherman S. Jewett erected a magnificent business structure on Market Street.

C. C. Garber is a native of Switzerland, born on April 1, 1836, but was brought, while yet a child, to this country, and located in Buffalo, N. Y., where their son was reared and educated. In 1854, he entered the employ of the old firm of Jewett & Root, and, in 1856, came to Chicago as shipping clerk in the branch house. He remained with them until 1864, when he commenced business on his own account, founding the firm of C. C. Garber & Co., in the wholesale and retail grocery trade. In 1864, he retired from this venture, and opened the firm of C. C. Garber & Com, under the name of Garber & De Marte. In 1886, he returned to the employ of Sherman S. Jewett & Co., as a travelling salesman, in which capacity he remained until 1892, when he was made the manager of the business, a position he has since most ably filled.

Mr. Garber was married on October 1, 1861, to Miss Maria I. Hasting, daughter of the late Hinam Hasting, one of Chicago's early settlers, and a man who is yet remembered as one of its leading citizens.

Mr. and Mrs. Garber have four children: Frank Day, Eugene Edward, Clarence C., and Lucy Warner.
has since conducted its affairs. In 1883, the business was organized as a joint stock company, incorporated under the laws of the State of New York, and of this company William H. Sard has been vice-president from the first. As has already been stated, this company is one of the largest manufacturers of stoves in the country; their works at Albany, N. Y., are very extensive, covering an area of ten acres, employing nearly one thousand five hundred hands, and turning out seventy-five thousand stoves and ranges to the hot-repair trade, as it now exists, was not thought of, and a brief history of the rise and growth of this important branch of business cannot fail to be of interest to the reader. When Mr. Metzner first started in business, as a dealer in stoves, he was continually pressed and worried to obtain parts or repairs for his customers. An order sent to the foundry where the stove was made generally resulted in such delay that, before the missing part could be procured, the stove was ruined. It then occurred to Mr. Metzner that it would

annually. They have also a branch house at Detroit, Mich., but such has been the increase of the business of the Chicago branch that it now has a trade equal in volume to that done by the other two. This company sells stoves in this country from Maine to California, from the Lakes to the Gulf, and from the Eastern house a large number are sold each year in foreign countries, they having received orders for stoves that went to Jerusalem, in the Holy Land.

W. H. Sard, the manager of the house in Chicago, and who has, for the past fifteen years, so successfully conducted its affairs, is a native of Albany, N. Y., and was born in 1850. He was reared and educated in his native city, and, in 1863, came West, locating at Chicago. In 1869, he became a clerk for the firm of which he is now a member. He served in that capacity until 1873, when he was given the management of the business here, and, in 1876, was admitted as a junior partner in the firm, and on the organization of the incorporated company already mentioned, was elected its vice-president, which office he still holds.

The W. C. Metzner Stove Repair Company, now the largest house of its kind in the world, was established in this city in July, 1873, at No. 353 West Randolph Street. At that time he was a profitable business for him to have his patterns made, and, from these, manufacture repairs for stoves of standard make. He began in a small way, and finally, as a venture, advertised in daily papers of the city, that he was able to furnish repairs for almost any stove, on short notice. His advertisement brought him at once a marked increase in trade, not only from private stove customers, but from retail store dealers in various parts of the country, who soon discovered that an order upon Mr. Metzner’s house could be filled more quickly, and would receive more prompt attention, than when sent to the manufacturers of stoves themselves. And so year by year his business grew, until to-day his house is the largest stove repair house, not only in the United States, but in the world. It is perhaps true, too, that in no other city but Chicago could such a business have been built up. Its superiority as a distributing center,—being besides one of the greatest stove markets in the whole country,—making it necessary that a house of this kind be established in a city possessing these advantages. An idea of the growth of Mr. Metzner’s trade may be gleaned from the statement that from a stock of less than ten tons of castings, carried in 1873, he now keeps in stock over six hundred tons, embracing repairs for nearly any stove in existence. He has also made a great number of valuable improve-
ments in the way of simplifying and cheapening the cost of repairs and alterations, and has issued a catalogue in which the names of about twenty-five men in the manufacture of stoves are given. For all of these he keeps casts for repairs or alterations, or both, constantly on hand. In 1883, he built a large foundry at the corner of North Lincoln Street and Chicago Avenue, where he employs about twenty-five men in the manufacture of the stoves he handles, and from three to four million dollars of iron daily. In 1884, a joint stock company was formed, under the name of the W. C. Metzner Stove Repair Company, with a capital stock of $150,000. The officers of the company are—W. C. Metzner, president; J. L. Morris, vice-president; W. F. Bracker, treasurer; and J. A. Pomery, secretary. Since 1876, the business has been located at Nos. 125-27 West Randolph Street, where they occupy a brick building, in addition to operating the large foundry mentioned.

W. C. Metzner was born near Sheboygan, Wis., on September 19, 1850, and is the son of Charles Metzner, an old settler of that portion of the country. The son of whom we write was given a good English education, and on leaving school took to a business life, working several years as a clerk in a country store. In 1872, he came to Chicago, which has since been his home, and where he founded the business he so successfully managed, and of which he is still the head.

Patrick Callahan, dealer in, and manufacturer of, all kinds of stove repairs, at No. 129-31 North Wells Street, has one of the oldest and largest houses in this line in the city. In 1876, he established this business, opening a small shop in the basement of No. 213 Market Street. At that time, so limited were his means and space, that he began by making up the parts of the city from house to house to secure his orders for work; then, as he had no pattern, he often took along with him the broken parts of a stove to be replaced, and going to a foundry put it in the moulds, being himself a good workman. Thus little by little, his business grew and enlarged, until now he carries in stock hundreds of tons of repairs for all the leading stove makes, has his own patterns, and his own foundry wherein his work is done, and which has accrued from his energy and enterprise.

In 1880, Mr. Callahan moved to No. 127 North Wells Street, where he remained until September, 1885, when he occupied his present quarters. His business has grown from year to year, and now employs about 100 men. Mr. Callahan is a native of Ireland, born in County Leitrim in 1814; four years later his parents came to this country and located in this city, where Patrick has since lived. When a young man, he apprenticed himself to the trade of a workman in the shops of the Chicago & Alton Railroad, at Bloomington, Ill. Later, he worked in the different shops in this city.

In 1875, he went to California as foreman for a foundry. In the following year he returned to Chicago, where, being unable to obtain work, he started on his own account, and from that small beginning has developed his present prosperous trade, besides acquiring valuable business and residence property. Mr. Callahan married, in April, 1866, Miss Bridget Arley, daughter of Michael Arley. They have four children:—Catherine, Ellen, Ann, and John.

John D. Bangs & Co.—In 1863, Isaac W. Bangs and his brother, Charles, left Chicago, and went to the West to make themselves a fortune in the hardware and stove business in Monroe Street, opposite the old post-office building. They remained there five years, and then removed to No. 165 State Street, where they were burned out in the fire of October, 1868, in which they suffered losses to the amount of $35,000. After that event they removed to No. 333 State Street, and two years later to the northwest corner of State and Van Buren streets. In 1873, the firm dissolved, Isaac W. Bangs retiring and going into business on his own account, and Dean Bangs and his son, John D., continuing at the old location, under the present firm name and style of John D. Bangs & Co. Dean Bangs, a founder of the business the history of which has been briefly sketched, was born in the town of Brewster, Mass., in 1817. His father, Dean Bangs, was a farmer and school teacher by occupation, and was descended from one of the oldest of New England families. In 1848, he came to Chicago, and in 1851, he enlisted in the Union army and fought in the Civil War. In 1853, he went to Lowell, Mass., where they engaged in the stove and hardware trade for over twenty years, the firm being known as Bangs Brothers. In 1863, they went West and located in Chicago, where they opened a wholesale and retail hardware and stove house for which they are still conducted. In that year his parents removed West, he coming with them to this city, completing his school days here, after which he entered his father's store as a clerk. In 1875, his father retired from the business, and the store was continued and was conducted successfully. In 1885, Mr. Bangs was one of the original members of the 1st Regiment Illinois Infantry, I. S. G., having entered the service as a second lieutenant, and being promoted to captain of Co. C of that organization. He has since been a prominent citizen of the city, and is still the head of the firm.

W. B. Burwell established himself in business here in April, 1848. In the following year he engaged in commerce at Morris, Grundy Co., Ill., for several years and then returned to this city and commenced commercial business. He has since been continuously located at 1251, being located at the corner of Fifth Avenue and Randolph Street, and was there turned out, losing nearly every dollar he possessed. After the fire he re-opened his business, and has since been a prominent citizen of Desplains and Madison streets, where he remained for two years. He then removed to No. 200 Randolph Street, thence to No. 762 Lake Street, and, in 1885, to No. 155 on the same street. Mr. Burwell was born at Grinn, Conn., in 1824. In 1848, he located in this city, and began business as a dealer in stoves, ranges, furnaces, and as a manufacturer of tin ware. In 1847, he married Miss Maria Hazel, daughter of William Hazel, a native of Canada. They have four children.—Charles Millard, living at Kansas City; Ella Maria, now Mrs. J. C. Wheeler; Frances Jennie, now Mrs. DeLancy York; and Mary Adele, now Mrs. Dr. A. E. Hosmer.

F. A. Oswald & Co.—This house was founded in 1859 by F. A. Oswald, on Milwaukee Avenue, very near its present location, where Mr. Oswald removed in 1867, larger quarters being found necessary for his prosperous and thriving trade. In 1873, Theodore Krueger, who for nine years had been a foreman in the employ of Mr. Oswald as a faithful and trusted clerk, was admitted to a partnership, since when the style of the firm has been, as it now is, F. A. Oswald & Co.

Z. A. Oswald was born in 1834, in Germany, where he was reared and educated until his twentieth year. In 1854, he came to America, and in that year landed in this city. Here he obtained employment as clerk in the old firm of Bute & Schiffier, afterward Nolte & Brothers, at No. 172 Lake Street; and has since continued in its employ until 1859, when he founded the business he has since conducted and of which he is still the head. Mr. Oswald married, in 1860, Miss Alvina Going, who died in 1885. By this marriage there is one daughter living. In 1867, Mr. Oswald married Miss S. E. Rendoff; they have eight children.

Theodore Krueger, junior partner in the firm of F. A. Oswald & Co., is a native of Germany, born in 1834. In 1854, he came to Chicago, and, entering the employ of Mr. Oswald as a clerk, remained with him until 1873, when he was admitted to a partnership in the business. Mr. Krueger married, in 1874, Miss Emma Rendoff, of Sauk City, Wis. They have three children living—Looeie, Theodore and Arthur.

Frank A. Stauber & Co., jobbers in stoves and ranges, at No. 713 Milwaukee Avenue, is one of the largest of the stove houses in this branch of trade. The firm was established in 1870, by Frank A. Stauber, the present head of the firm, who then started in a small way at No. 512 (old number) Milwaukee Avenue, where he remained one year, when he removed to No. 471 Menomonee Street, then No. 715, but now known as No. 516, Milwaukee Avenue. In 1850, George A. Engelhardt became a partner, since when the firm has been, as it now is, F. A. Stauber & Co.

A. A. Stauber is a native of Switzerland, born in the Canton of Aargau in 1864. In 1867, he came to America, and located in Chicago, where he has since lived, and where three years later, he founded the business of which he is still the head. Mr. Stauber was a member of the Common Council, for four years, from the Fourteenth Ward, being elected first in 1878, and held that office four years. He also served as member of the Board of Education for three years. Mr. Stauber married, in 1872, Miss Mary A. Doll, of Peru, Ill. They have four children: Mary Antomette, Anna Hermine, Melanie Larsen and Elise.

G. A. Engelhardt is a native of Germany, and was born in 1854. He came to the United States in 1866, and in 1875, became a partner in the firm, of which he is now a member. Mr. Engelhardt married, in 1884, Miss Hanna Stephan, a native of this city. They have one son, Gustav George.

BOILER WORKS.

Devine's Steam Boiler Works were established here in 1854, by Peter Devine, at Nos. 57-59 West Polk Street. In 1862, his brother, Arthur Devine, became a partner, and the firm name was changed to Devine & Devine. In 1875, Peter Devine resigned and sold out his interest in the firm, since which time Peter Devine has been sole proprietor. In 1878, he moved to No. 357 South Canal Street, where he manufactures all kinds of locomotive and marine boilers, large tanks, dryers, and coolers. When Devine was in sole business, he employed but twenty men, and did an annual business of about
$20,000. He has now $50,000 invested in his business, has a trade extending all over the Northwest, employs from seventy-five to one hundred men, and his yearly transactions reach nearly $300,000. In 1863, he made for Brigham Young the first steam boiler in that part of the country. The only way of getting to Lake City, where Mr. Sargent, as the representative of the great Mormon apostle, came to Chicago, and ordered the boiler, which was intended for use in a distillery; and which, when completed, was shipped to the Weber and McCoy, Ltd. on Salt Lake City route. The boiler is still in service, being now in use in a woolen factory. Mr. Devine was born at Paisley, Scotland, in 1833, the son of Peter and Margaret (MacLaren) Devine. In 1841, when only five years of age, Peter, John, and his brother started as boiler makers, in Glasgow, where he served an apprenticeship of nine years. In 1851, he came to America, arriving in New York in the following spring, when he went South for a short time in New Orleans, and finally locating in Montgomery, Ala. The yellow fever breaking out in 1854, impelled him to seek a healthier habitation; and he settled in this city, and a few months later he founded the present business.

development of the steamboat was very rapid. By 1845, Chicago was connected with several points in the interior by flat-boats and canoes. The first steamboat on the Illinois River was the "Franklin," which was built in 1840, and was followed by the "William S.

John Mohr & Sons.—This firm is composed of John and Joseph Mohr, and was formed in May, 1882, at Nos. 52-56 Illinois Street. Mr. Mohr is one of the oldest boiler manufacturers in Chicago, and his works today are also among the largest of the kind in the city. He employs, on an average, one hundred men, and manufactures, in addition to boilers of all kinds, tanks, coolers, and almost all the accessories used with them, on his premises. John Mohr is a native of Germany, born on March 14, 1826, the son of Joseph Mohr, who followed the occupation of a farmer, and was a native of the province of Silesia, in the Kingdom of Poland, and who came to the United States, landing in New York in 1842. The Mohr family settled at the northern part of the old city, and the home of the elder Mr. Mohr is located at Philadelphia, but a little later went to Canada, where he himself learned to make the blacksmith trade. He remained there until the spring of 1834, when he came to Chicago, which had then only eight thousand inhabitants. He opened a shop at 44 W. Water Street, and began the business of boiler-making, and at that time H. H. Warrington, later the founder of the Vulcan Iron Works, was the superintendent for Mr. Mohr, and Carlile Mason, who afterward established the Neosho Iron Works, also worked in the blacksmith shop of Mr. Mohr. In 1852, Mason and McCarty started the works last mentioned, when Mr. Mohr entered their employ, as foreman of the boiler shop. He held this position some five years, when he became a partner in the firm, and so remained until May, 1855, when he established himself in his present business. He came to Chicago possessed of no capital but his hands and skill, and, by his industry and economy, has built up a business of which he may justly feel proud. He says that when he arrived in Chicago, forty years since, there was but one bridge across the Chicago River, and that was only an affair for foot-passengers, located at Carroll Street. At that time the town was the Kaolinolph or the metallurgical district, there were all the old flat-boat ferry. Shortly following his arrival in the village, Mr. Mohr relates that, being temporarily idle, he accepted, with another young man, the job of attending the ferry, which they held for perhaps two weeks. He resigned his position under the following circumstances: One day he and his partner sat on the boat, talking busily, and as there had been but few vessels that day on the river, the ferry man was given to keep a look out for an approaching vessel. In those days, it should be remembered, that tug-boats, with their shill whimsies to give warning of their approach, were not in use here, so that it behoved the ferry-tenders to keep a close watch and get their boat out of the way in time for a vessel to pass. Mr. Mohr and his companion were suddenly aroused from their interesting talk by loud cries, and, turning about, they saw a heavily-laden schooner just rounding the bend in the river, and bearing down upon them at a great rate. Of course a collision followed, the result of which was that the ferry-boat was carried away down stream, and landed high and dry on the river bank. Mr. Mohr and his partner escaped uninjured, but concluded to quit tending ferries, which they did. Mr. Mohr was married in 1856, to Miss Theresa Myers, a native of France. By her, he has had eight children.

The Northwestern Boiler Works, at No. 158 Fulton Street, were founded in July, 1881, by John D. Murphy and Robert Anthony, under the firm name of Murphy & Anthony. This partnership continued until February, 1881, when Mr. Murphy purchased his partner's interest and has since continued the business alone. His works, which are amply equipped with all the appliances now used in this line of trade, were built in 1881, and have a frontage of thirty feet on Fulton Street and running back two hundred feet to Carroll Avenue. His trade from the first has constantly increased, and to-day his patronage is more numerous than at any other time. In the history of his works:

John D. Murphy was born in Chicago on January 24, 1841, on the southwest corner of Market and Washington streets. He is the son of W. Timothy Murphy, who, with his family, came from the East and located in this city in the year previous, and only shortly before John D. was born. John was educated in the common schools of the city, and at the age of twelve years began to learn the trade of a boiler maker in the shop of the late Mr. Cobb, who then had his works located on West Water, near Kinzie Street. In 1855, he went to Rock Island, where he worked in the firm of the Rock Island Steam Boiler Company, and in 1857, was one of a number of others who founded the Chicago Boiler and Iron Works. He returned to Chicago, and worked in the shops of the Racine & Mississippi Railroad Company and of P. W. Gates & Co., and, in 1867, was one of a number of others who founded the Chicago Boiler and Iron Works, of which he is one of the stockholders. He is a native of Ireland, born on July 2, 1845. He was educated in a common school, after which he began to learn the trade of a boiler maker at the age of fourteen. Serving his apprenticeship, he travelled through England and Scotland, working at his trade until he was twenty-one.
then took to the sea, which he followed for four years. In 1870, he conceived the idea of coming to America, which he accordingly did, arriving in New York in that year. He soon afterward came West, and for the next ten years, while he was building his home, he became a member of the present firm at its inauguration in 1881.

The United States Boiler Works, located at Nos. 905-907 South Halsted Street, were established on their present site and by their present proprietors, J. McFarland and F. M. Baker, in 1878. The style of the firm has been from the first, as it is now, J. McFarland & Co., and the progress of their business from that time has been equal to that of most firms in this branch of industry in the West. In 1877, they employed but ten or twelve hands, while now an average of forty men are required the year through, with additional numbers working during the busy months of May and June.

These works are manufactured all kinds of marine, locomotive and stationary boilers, lad, tanks, coolers, and sheet-iron work of every description.

J. McFarland, the senior member of this firm, is a native of England, born at Liverpool in 1810. His parents came to this country in 1843, and located in Albany, N.Y., where the father, James McFarland, worked as the first foreman blacksmith in the shops of the Hudson River Railroad Company. In 1847, the father came West and located at LaPorte, Indiana, where the subject of this sketch began to learn the trade of blacksmith, working under the superintendence of his father, who was the foreman in the shops of the Michigan Southern Railway at that place. Mr. McFarland next went to Amboy, Ill., and there learned the trade of a boiler maker in the Illinois Central Shops, and, in 1859, came to Chicago, having been transferred from the company's shops at Amboy. After two years' service with the Illinois Central Railroad Company, he left the employ of that corporation, and, in 1872, in company with Timothy Tobin, J. Hamer and D. McNullen, started what are now the American Steam Engine Works, which were located at No. 977 South Halsted Street. Two years later, Mr. McFarland retired from that firm, and, in company with Captain Baker, found all they did in this line, which has since been his home. Mr. McFarland married, in 1861, Miss Frances Gilman, daughter of John Gilman; they have six children.

Kroeschell Brothers.—In 1876, two brothers, Albert and Otto Kroeschell, with but a small capital, began business, the steam-fitting business, in a small way, in a basement on Wells Street, near Michigan. On removing to their present quarters, at the corner of Michigan and Kingsbury streets, they added boiler-making to their steam-fitting business, and now manufacture all kinds of tubular and locomotive boilers, oil and water tanks, also doing sheet-iron work. The firm is now composed of four brothers, Charles having become a member in 1881, and Herman in the following year. Herman Kroeschell, father of these young men, is also connected with the firm in an advisory way, and is well and favorably known in Chicago from his long connection with the Board of Works, as chief inspector of tunnels under the administration of Chief Engineer E. S. Cheshbrough.

Herman Kroeschell was born in Hesse Cassel, Germany, in 1818, the son of Charles Alexander and Amelia (Henschel) Kroeschell. Mr. Kroeschell was educated at the Polytechnic School of Hesse Cassel, being a pupil of Professor Frederick Wochter, the world-renowned chemist, who has been called the father of this branch of science. Mr. Kroeschell left school in 1836, and went into the machine-shop of his uncle, Antoine Henschel, the famous inventor of the Turbine water-wheel, as well as of a steam gauge and other things. He remained there until 1842, when he was offered, and accepted, the position of foreman in the first iron foundry ever built in Hesse Cassel. Two years later he sailed for America, and, instead of landing at New York, came to New Orleans, thence up the Mississippi River to St. Louis, arriving in that city in the year of the great flood, and on the day when the Father of Waters had reached the highest point known in its history. Here he started a brass foundry and pump factory, and was soon doing a nice business. At that time the troubles with Mexico was pending, and Mr. Kroeschell offered his services, which were commissioned by the United States, as a field inspector of the St. Louis Legion, and belonging to the 1st Missouri Volunteers. His regiment was at once mustered into the service, and sent to the scene of hostilities. As the enlistment for only six months, their time expired before they were in any engagement, and the regiment was accordingly sent home. Returning to St. Louis, Mr. Kroeschell then became interested in coal and mines in Southern Indiana, and, in 1834, went to Missouri, and, in 1844, to Chicago. He then took to the trade of brass finisher with the firm of Walworth & Hubbard, serving an apprenticeship of three years. At the end of that time, finding this work did not appeal to him, he abandoned it, and began to learn the trade of a steam-fitter with the well-known firm of John Davis & Co., with whom he remained for ten years. He then went to Toledo, Ohio, working there for a short time with Davis, Shaw & Co. On his return to Chicago he and his brother Charles established themselves in the business which they still conduct.

Machinery.

A. J. Kirkwood & Co.—This house is not only one of the oldest dealers in machinery in Chicago, but anywhere in the West. It was founded, in 1858, by George W. Dunbar, who established himself as an agent selling machinery for eastern manufacturers on commission. His place of business was on Dearborn Street, between Lake and South Water streets. Mr. Dunbar was succeeded by the firm of C. L. Rice & Co., who then changed the location of their warehouses to 108 Madison Street, where they continued in business until the fire of 1871, when the building was burned out, with a total loss. A singular incident connected with the burning of their stock is given by Mr. Kirkwood. At the time of the fire the firm was carrying an immense stock of engines and machinery of all kinds, which was, of course, rendered valueless, except the steel plates valued at $100,000, which was accorded by the fire to a heavy dealer in old iron, who bought it all, placing its value roughly estimated, at $1,500. The dealer counted on a handsome profit. His chagrin and surprise may better be imagined than described when, on attempting to remove his stock, he found it had been consumed by the intense heat, so that on cooling it had become one homogeneous mass. The only work left was to remove the iron merchant was dismayed at the task before him, and offered Mr. Rice five hundred dollars to be relieved from his contract. This offer Mr. Rice did not feel inclined to accept, so that the dealer in old iron had to stick to his bargain, but began his work by removing, after the job was through, were all on the wrong side of his ledger. After the fire, the firm of C. L. Rice & Co. at once began building machine shops and warehouses on the corner of Canal and Harrison streets, which were occupied in the fall of 1872. About that time C. L. Rice & Co. sold the business to Thomas S. Kirkwood and William A. Dunklee, who three years later removed it to the present location. In 1875, Mr. Dunklee retired from the firm, which then changed to T. S. & A. J. Kirkwood, and so continued until January, 1885, when T. S. Kirkwood retired, retaining an interest in the business as special partner. Since that date the style of the firm has been A. J. Kirkwood & Co.

Thomas S. Kirkwood was born at Niagara Falls Village, Canada. His father, a Scotchman by birth, a graduate of the University of Edinburgh, was Dr. T. A. A. Kirkwood, and a man who stood high in the profession of his calling. His mother was Anna Beves, daughter of Colonel Beves, of the British army, and who died while in active service in the Indies. In 1801, Mr. Kirkwood located in Oshkosh, Wis., three years later he came to this city, and worked for Keith Brothers until 1871, when he began in business on his own account as a member of the firm of Kirkwood & Dunklee. Since retiring from active business, Mr. Kirkwood has been travelling in Mexico for the benefit of his health, which for a time had been seriously impaired by years of unremitting labor.

Arthur J. Kirkwood was born at Niagara Falls Village, Canada, on May 25, 1841. In 1853, he went to Oshkosh, Wis., where he engaged in mercantile pursuits nearly ten years. In 1867, he went to Chicago and joined his brother in the business in which he is still engaged. Mr. Kirkwood married, in 1857, Miss Ella Weed, daughter of late Jacob Weed, of Oshkosh, Wis., and lives in the same house and place also one of the oldest settlers of Wisconsin. Mr. and Mrs. Kirkwood have two children,—Ella and Arthur.

The A. Flammond Manufacturing Company was established in 1859, by John J. Flammond, under the name of J. J. Flammond & Co. It was planned to make a large number of small boxes, but it was found that the capital of the firm was less than five hundred dollars and less than ten men were employed, while the annual volume of business did not exceed $25,000. In 1869, Mr. Palmer retired from the firm and Mr. Flammond continued the business, which continued success. In 1877, an incorporated company was formed, under the title of The A. Flammond Manufacturing Company. The principal stockholders are, A. Flammond, president, and his two sons, Charles and George, superintendent and secretary, respectively. The company employs one hundred and fifty men and does an annual trade amounting to nearly $500,000. The territory covered in their trade
includes the Western and Northwestern States and Territories. Their buildings are three in number and are large and well equipped. The machinery is propelled by a fine engine of one hundred and fifty horse power and has the capacity to manufacture machine tools for four mills, grinding machines, toasters, breweries, distilleries, malt houses, paint mills, etc., and also make a specialty of shuffling, pulleys, hangers and gearing.

Ambrose Plamondon was born at Quebec, Canada, on December 31, 1828, the son of Ambrose and Caroline (Beliveau) Plamondon. At the age of sixteen, the son left home to make his own fortune, and began to learn the trade of a millwright in Oswego, N. Y. In 1856, he was sent by his employers to superintend the machinery part of the Ottawa Star paper. Finally the time this job was completed Mr. Plamondon had made up his mind to stay in the West, and, a little later, he with his family located in Oswego, which has ever since been his home. In 1861, he married Miss Jenny, daughter of Mr. Palmer, he founded the business of which he is still the head.

In this he has been for some years ably assisted by his two sons, who are young men of fine business qualifications, and whose careful training under a practical teacher has well fitted them for the places to which they now fill. Mr. Plamondon married, in 1852, Miss Cecilia Higgins, daughter of Daniel Higgins, of Oswego, N. Y. They have five children,—Emma, wife of John H. Amerberg of the firm of Amerberg & Co.; N. A., George, Jennette, and Alfred D.

Marinette Iron Works.—Great things rarely spring full-grown; everything in history is in fact—on examination—wading law of the universe. Chicago was once an insignificant village, and her growth from that to the third city in importance in the Union, has been but an aggregate of the growth and development of a number of small villages and towns. The writing academic pages of this volume could not do justice to the illustrations of the above statements; and no less striking, as an example of these truths, has been the growth of the enterprise the history of which has here given. In 1867, D. C. Prescott, Mr. Trumbull and Austin Crver, with a capital of $8,000, or $600 each, started an iron foundry and machine shops at Marinette, Wis., for the manufacture of saw-mill and mining machinery. During the first year they employed from twelve to fifteen men, and, as is found at its close the most encouraging prospects for an increasing trade. They were not disappointed, for each succeeding year has seen their business growing until today the original "plant" of $1,000 has become one of $500,000, ranking among the foremost of the most of the important manufacturing institutions of the Northwest, and furnishing employment to from one hundred and fifty to three hundred men. In 1874, an incorporated company was formed, under the present title of the Marinette Iron Works Company, of the officers of the firm:—Austin Crver, president; R. H. Trumbull, treasurer, and D. C. Prescott, secretary.

In 1877, Messrs. Crver and Trumbull opened a branch house in this city, as dealers in saw-mill machinery and mill supplies of every description, on Dearborn street, removing, in 1886, to No. 164 Lake street. Here they carry on an extensive business in the line of machinery for the Western lumbering districts, and at Marinette a large factory is in operation. This factory is doing an immense business is in the way of manufacturing the almost countless number of articles used in connection with the operating of saw-mill and mining works. Mr. Prescott has already mentioned as the secretary of the company, is also an inventor of acknowledged ability, having devised and patented not a few of the articles made at these works. He resides at Marinette, and has general charge of the business of the company's business.

Austin Crver was born in Chicago on August 11, 1838. His parents, John and Rosetta (Morse) Crver, were settlers of 1834, having come here in that year from Vermont, and, at the time of the birth of Austin, were living at the corner of North Clark and Michigan streets. Mr. Crver, senior, was a builder and contractor, and among the many houses he built in those days was the early days of the history of the city, was the family residence of H. J. Store, which is still standing on the South Side. He was also elected a member of the city council in 1843, serving one term as an alderman from the fifth ward. In 1850, Mr. Crver, with many others who had been in the village in the wonderful discovery of gold in California, started for that State to try his fortunes in the gold mines, but he had not been in the country a year, when he became ill with a fever and almost immediately died. Leaving, besides his widow, who is still living, three children:—Austin 2d, who is now in Chicago, and Adelia, now the wife of R. H. Trumbull, to whom she was married in 1860. Austin was practically reared and educated in this city, and, in 1861, the War broke out, he was among the thousands of Illinois' brave sons who at once responded to their country's call for men, to defend her. In 1861, he enlisted as a private in the 57th Illinois Infantry, and, with his regiment, was ordered to Florida, under General Benjamin Butler, under General Butler, participating in the events of the Price raid. Subsequently his regiment was under fire at the battles of Pea Ridge, Prairie Grove, Chuck Bluff, the siege of Vicksburg, the taking of Jackson, and finally participating in Red River expedition, also in the storming of the Blakely batteries at the taking of Mobile, which was the last battle of the War, having been fought after Lee had surrendered and when hostilities were supposed to have ceased. Altogether, Mr. Crver was in the service of his country for five years. In 1867, he entered upon his three years' term of enlistment, re-enlisted as a veteran to serve during the remainder of the War. He returned home in May, 1866, and in the following year, as has already been told, he, with his father, engaged in the manufacture of machinery, then largely engaged. Mr. Crver married, in 1876, Miss Caroline D. Pitkin, daughter of Wesley Pitkin, of Vermont. They have had four children,—Minnie L., deceased; Edith May, Sadie R. and Ella H. Co. of Chicago, having the only advantages of a common school education, and, when sixteen years of age, came with his parents to the West, locating in the town of Fremont, Lake Co., Ill. There the father, who was a Methodist and a farmer, beginning his career in the West, began as a teacher in the common schools, and finally taught penmanship. About 1855, he formed a partnership with Professor Hill, since the author of Hill's Manual, and established in the West, and so LaSalle as assistant to the teacher of penmanship in Bell's Commercial College of this city, and in his duties here was of course assisted by Mr. Trumbull. In the following year, however, the partnership was dissolved. Mr. Trumbull selling his interest to Mr. Hill, and Mr. Good, of the country, began teaching classes in writing, until 1862. During that year, he entered the service of his country, as first lieutenant of the 31st Illinois Voltigeurs, and with this company, he was in the army under command of General George H. He was captured rear the front, but he was taken seriously ill and sent to the general hospital, where he remained until January, 1863, when he was discharged and returned home. But his recovery seemed impossible, he was discharged from the service and went home, as his surgeon fully believed, to die; and, in fact, so near to death's door had he been brought that it was more than a year after his return, before he recovered anything like his former health and strength. In 1867, he joined his brothers with his present partners, and established the business in which they are now engaged. Mr. Trumbull married, in 1850, Miss Adelia E. Crver, daughter of John Crver, who has already been mentioned, as an early settler of Chicago. They have had five children,—Ruth Winifred, Cora K. (deceased), Rollin S., Austin C. and Ella A.

The AMERICAN SAW MILL MANUFACTURING CO. was established in 1862, by Edward G. Good, who in that year purchased Henry V. Ditman's interest in a business in which for a year prior they had been partners. The works were then located at Nos. 312-27 North Wells street, and in them were manufactured various saws and stationary engines, boilers, etc. Shortly following Mr. Good's purchase of the works, his brother, John Good, became a partner in the enterprise, the name of the firm was changed to E. G. & J. Good & Bro., and so continued until 1866, when Albert Holten was admitted to the firm, the name changing to E. G. & J. Good & Co. In the following year, the place of business was removed to No. 23 Michigan street, between Kingsbury and Market streets, remaining there until 1873, when it was changed to Nos. 303-309 South Canal, and finally, in 1876, to their present location, at No. 208 South Clinton. Mr. Holten died in 1876, since which time his surviving partners have continued the business. Among the products of these works now, may be mentioned, machines, engines, and stationary and portable mills, elevators, corn-shellers and grain-handling and wood-working machinery.

E. G. Good, the founder of these works, was born at Buffalo, N. Y., in 1832, a son of Martin Good. E. G. received a common school education, and early in life began to learn the trade of a machinist, in his native city. In 1855, he came to Chicago, and under General Butler, participating in the events of the Saltor, he was among the thousands of Illinois' brave sons who at once responded to their country's call for men, to defend her. In 1861, he enlisted as a private in the 57th Illinois Infantry, and, with his regiment, was ordered to Florida, under General Butler, under General Butler, participating in the events of the Price raid. Subsequently his regiment was under fire at the battles of Pea Ridge, Prairie Grove, Chuck Bluff, the siege of Vicksburg, the taking of Jackson, and finally participating in Red River expedition, also in the storming of the Blakely batteries...
old Revere House on North Clark Street. About a year later he admitted to partnership R. B. Ingersoll, the style of the firm then being Cary & Ingersoll, and about the same time the business was removed to 53 West Randolph Street. Here the partnership had barely attained a prosperous footing, was burned out by the great fire, losing everything they possessed except their skill and knowledge of their business, coupled with the spirit of indomitable will, which enabled them to start once again to work to recover what the fire had so suddenly swept away. Accordingly, within a few weeks, they resumed business at No. 53 West Randolph Street, and before which attention the efforts of their firm, three or four two saw them once more doing a prosperous and increasing trade. In 1875, the partnership was dissolved, Mr. Ingersoll retiring from the firm, since which time Mr. Cary has continued the business. In 1879, he removed to 1631 South Wabash Street, and in May, 1882, to Nos. 81-83 Erie Street. Here he has a finely equipped machine shop, and makes and builds all kinds of special machinery, models and metal patterns, also does gear-cutting of every description, and the designing of special machinery a specialty. Mr. Cary was born at Potsdam, N. Y., in 1824, the son of Elias and Abigail (Walker) Cary. In 1856, the parents came West, locating on a farm in Kane County, this State, and there C. W. remained, following the vocation of a farmer until he had attained his twenty-sixth year. Becoming tired of this, he determined to learn the trade of a machinist, and accordingly went to work in the city of Chicago, and there in the shops of the Michigan Central Railroad. In 1866, he came to Chicago, which has since been his home, and three years later he founded the present business. Mr. Cary married Miss Hannah Nichols, daughter of Joseph Nichols, of Detroit, Mich. They have three children—Louis J., Hamilton and Marietta.

Hamilton Cary, son of C. W. Cary, was born at Detroit, Mich., May 25, 1853, and lived in that city until his twelfth year, and then, with his parents, he came to Chicago. He attended the schools of this city for three years, when he began sailing on the lakes, following this pursuit until 1874. He then entered his father's business, and learned the trade of a machinist, and has since been connected with the business, being now foreman of the shops and general superintendent. He married, on September 16, 1880, Miss Julia A. McKee, daughter of Charles McKee, the foreman of the foundry.

G. S. WORMER & SONS.—This firm is among the oldest machinery houses in Chicago, and is located at Nos. 38-40 South Canal Street. It was established here in 1856, as a branch of the main house at Detroit, Mich. In 1855, G. S. Wormer, founder of the house now bearing his name, located in Detroit, in the manufacture of engines, boilers, wood-working and mining machinery, etc., and a few years later he conceived the idea of opening a general machinery store, and of keeping in stock all kinds of machines, supplies, etc. This he did, and, so far as is known, to him belongs the credit of establishing the first house of the kind mentioned in the city. The venture proved successful, and became popular, that others hastened to adopt it, and soon quite a revolution was effected in the manner in which goods of this class were handled. The advantages of the plan were many and obvious. Formerly the manufacturer had been compelled to make a trip to the East, where the factories and machine shops were mostly located, or else buy from a traveling agent, and trust to his representation for getting the kind of goods, and of the quality desired. Now, he can go to the dealer in machinery, and by a personal examination of his stock select that which suits him in price and is best adapted to his needs. In 1865, as has already been mentioned, Mr. Wormer established the present house in this city, placing it in the hands of his son, H. G. Wormer, who conducted its affairs until his death, which occurred some four years ago. Since then, F. F. Wormer, another brother, has taken full control, having, for some time previous to his brother's death, associated with him in the management of the business here.

F. F. WORMER, resident manager of the house here, was born at Detroit, Mich., May 25, 1853, and was largely reared and educated in Detroit, where his father still lives. In 1877, he came to Chicago to assist his brother in the management of the house, and on his death succeeded to the business as manager.

THE MARINE ENGINE WORKS.—The business conducted at these works was established, in 1857, by John Murphy, at the northwest corner of Franklin and Michigan streets. In 1862, the name was changed to Partners, and was assumed by Mr. Murphy, who advertised himself as manufacturer of marine and stationary engines to order. In 1866, Robert Tarrant was admitted to partnership, and the firm was known as Murphy & Tarrant. In 1871, their works were destroyed. Mr. Murphy decided not to engage in business, but Mr. Tarrant resolved to re-build the shops, and, having done so at the same location, soon was at work on a larger scale. When the fire came Verso, in 1875, Mr. Tarrant until recently engaged principally in the manufacture of marine engines, but he also manufactures stationary engines, propeller wheels, castings and general machinery. In 1880, he added to his lines of work the making of fine jewelers' tools, which have now a large sale in all parts of the United States. The number of persons engaged in Mr. Tarrant's shop is about one hundred, the investment about $500,000, and the annual amount of business about $750,000. The building at present occupied was erected in 1878, at a cost of about $30,000. Mr. Tarrant, in 1853, commenced making printing machinery for the Bucklin Printing Press Company.

Robert Tarrant was born in Columbia County, N. Y., on January 10, 1837. At nineteen years of age, and after spending several years in an art and scientific education, he entered on his apprenticeship to learn the trade of a machinist at Ballston Spa, N. Y. In 1856, he located in this city, taking a position in the shops of the Chicago, St. Paul & Fond du Lac Railroad, now the Chicago, Burlington & Quincy Railroad. He remained there ten years, resigning his position to enter the partnership with Mr. Murphy, in 1866. Mr. Tarrant married, in 1864, Miss Sarah Neill of Ballston, N. Y., and had three children—Cora, now the wife of F. A. Brodli; Robert, Jr., and Ross, deceased.

The ETA Iron Works is the outgrowth of the firm of John Cary & Son, who established their iron foundry, on a small scale, in the year 1850. Their blacksmith and machine shops were then located where the Cook County jail-building now stands, and that was their place of business for seventeen consecutive years. In 1868, they sold the capital stock in the business, and commenced to manufacture engines and suitable buildings. The title, "The ETA Iron Works," was then adopted, and the success of the business has been such as to make this trade a well-known trade until this century, and has since been connected with the business, being now foreman of the shops and general superintendent. He married, on September 16, 1880, Miss Julia A. McKee, daughter of Charles McKee, the foreman of the foundry.

John T. Raffen was born in the town of Cupar-Fife, Scotland, in 1836. His father, Colonel Alexander W. Raffen, was the first plumber in the City of Chicago, coming here in 1850; he was also prominent during this period, and led the sickness of the profession through the same. His wife was Ellen Thomson. The son John received his education under private tuition in Scotland, and on coming to Chicago was apprenticed to W. S. Cup, iron moulder, with whom he served his time, four years. Four months before finishing his apprenticeship he was made foreman of the foundry, and continued with his employer until 1859. He then became imbued with the Chicago fever, and started out for the West, making the journey to the Pacific coast almost entirely on foot. On reaching there he engaged in mining, and followed the fortunes of a prospector for two and a half years. He then located in San Francisco, and engaged at his trade, which he continued to 1877, and during that time amassed a considerable amount of money. With that he returned to Chicago, and, having an interest in the firm of John Cary & Son, iron workers, organized the ETA Iron Works, and has ever since been identified with the industrial interests of Chicago. During his residence in California, Mr. Raffen was married to Miss Eliza McDonald, in 1853. Her death occurred in this city on June 22, 1882. She had seven children: Nellie, Lizlie, Mary, Margarette, George, Marcella and Robert Clark. Mr. Raffen has always been prominently identified with the business interests of the city, and in social matters has always been actively interested in the same, being a member of nearly all the societies, among them the St. Andrew's Society, Curling Club and Caledonian Club. He is also a member of Cleveland Lodge, No. 211, A. F. & A. M., and of Washington Chapter, No. 43, R. A. M.

Savage Brothers.—In 1854, William M. and Richard Sav-
age and John Murphy, under the firm name of Savage Bros. & Co.,
aged Shop and foundry at Nos. 42-44 Michigan Street.
Mr. Murphy retired from the firm in 1837, since which time the
Savage & Co. have conducted their business without other
Mr. murphy, when their present three-story brick manu-

or other. Originally, they built a small frame machine and blacksmith
shop, and, in 1862, made an addition, increasing the capacity of the
works nearly threefold. In the fire of 1871 they lost about $60,000
in the machinery and building. In 1872, they endeavored to
erection in 1840. The building erected in which to re-establish
their business was a small frame one on the rear of the lot, which
was used by the Northwestern Fire Insurance Company. They were
courage, they started again, and were the first firm on the North Side

North and South Side to make a casting. The building erected in

his father was one of the sub-contractors on the Illinois & Michigan
Canal, and was engaged in that work at the time of his death in
1849. At fourteen years of age, young William was apprenticed to
Nelson Buchanan, harness maker, No. 162 Lake Street, where
he remained three years. After leaving Mr. Buchanan he began his
business on his own account at the corner of Market and Randolph
streets. In the following year, in connection with John Jennings,
he constructed and established a foundry on Randolph Street, where the
notable block now stands. The firm of Jennings & Savage con-
tinued three years, when Mr. Jennings retired and Mr. Savage
continued the business alone one year. In 1857, he became a mem-
ber of the firm of Murphy, Savage & Co., machinists, No. 424
Michigan Street, and two years later with his brother, Richard
Savage (Murphy, Savage & Co.), purchased Mr. Murphy's interest, and
the firm became Savage Bros. After the fire of 1864, and
erection of the new buildings, the firm was the first foundry in
work in the Forest district after that event. Mr. Savage, although
fifty-four years of age and despite the hardships of his business, is
standing firm, and is recognized as the trade, as a thorough-
going business man and a first-class workman.
Mr. Savage was married in July, 1871, to Miss Louise Emerson, of Chicago. They
have two children.—Catherine E. and Richard M.

The Adams and Price Machinery Company. The business
was conducted by this company, which was incorporated in
1855, is the manufacturer of the Adams automatic bolt and nut threading
machine, which has been used in all parts of the United States and Canada.
They have already raised the standard of excellence of both bolt and nut threading,
and, although the company have only been
engaged in manufacturing for some years, the demand for their products has been
very large. A decided testimonial to their excellence is found in the fact
that, from all over the United States and from foreign countries, let-
ters of inquiry have been received, the attention of manufacturers
having been drawn to this machine by the desire of their customers to
be able to thread metal, bolts and other parts, by means of these machines. These

speciality which is now manufactured by the Adams and Price Machinery Company, and which has brought their firm into such favorable prominence.

The AMERICAN MACHINERY COMPANY was organized and incorporated under its present name on February 20, 1853, by Charles Lindemann, Lewis Bush and John C. Burmeister, succeeding to the business of Herkert & Bush which was established, in 1852, by F. Herkohl and L. Bush, at No. 150 West Erie Street. At that location they had a factory building, 25 x 60 feet, and their machinery was propelled by a fifteen horse-power engine. The American Machinery Company was incorporated into a capital of $50,000, and the following officers were elected—Charles Lindemann, president; Lewis Bush, vice-president, and John C. Burmeister, secretary and treasurer. At the present time their office is at No. 373 Michigan Avenue, where they are still doing a thriving business.

The American Machinery Company built, in 1855, an adjustable all-successionless automatic saw sharpener adapted to circular saws from six inches to six feet in diameter, without regard to shape or the number of teeth contained. On this machine, cross-cut saws can also be sharpened, the teeth beveled and the edges sharpened in perfect shape ready for use without the aid of files. By removing a single bolt the operation for beveling is stopped, and the entire machine is turned over to sharpen the backs of the teeth. As has already been seen, the American Machinery Company is as yet in its infancy, but already it is doing a fine business.

LEWIS BUSH, founder of this business, was born in Clinton County, Iowa, on November 15, 1823. His father, Lewis Bush, was also a machinist, and a man of a decidedly inventive turn of mind, and from him Lewis inherited that trait of character. When only fourteen years of age, Lewis, junior, came West, landing in Chicago in 1837. Here he was employed as a laborer on Long’s construction as a construction hand on the Hannibal & St. Joe Railway, which was then being built. He remained there until the line was completed, when he was given a position on the railroad as fireman, and shortly afterward proved himself so faithful and capable that he was made an engineer, and given a regular run. A year or two later, he resigned his position there, and, returning to Chicago, began learning the cabinet trade with John Phillips, one of the pioneer manufacturers in this industry in Chicago. He remained thus employed until 1854, when he entered the regular army as a member of the First Battalion United States Engineers, and with this body he served in the Mexican and California campaigns. The work of his corps was to re-build the bridges, and other public works, restored by the Confederate forces; their field of operations covered by Sheridan’s army in its campaigns, during the last years of the Civil War. In 1864, Mr. Bush, where he has since resided, and, in 1880, bought out the inventions of which mention has already been made. The first machine he built, however, was one almost marred in its inceptions. It was intended for use in chair factories; it turns a chair round; puts a tenon on either end, and bores the holes for the reception of the cross braces, all at one operation. It saves the work of several men and turns out sixty finished pieces a minute. These machines are now in use in this and other cities, and are highly-valued adjuncts in the important industry of which they form a part. Mr. Bush married, in 1864, Miss Rose; they have had four children.—Fred, Allen, Geo. and A. E. A. DELANO.—Prominent among the men who have built up a business that is not only a credit to himself, but to the industrial interests of this city, is Mr. Delano. He was born at Fair Haven, Vt., May 6, 1846. At the age of fourteen, he left school and became a journeyman being a sea captain. E. A. was given an excellent English education in the high schools of his native town, and, at the age of seven years, he was admitted to the city grammar school. After finishing his apprenticeship, he worked as a journeyman in various parts of the city, until 1879, when he commenced the business which he now possesses. He is located at No. 13 South Jefferson Street. He has a large and respectable business, and employs a force of about one hundred men. His name is known throughout the whole city, and his work is of the highest grade. His business is the manufacture of the Phoenix Iron Works. These works, of which Mr. Delano was a founder for nearly three years, were quite extensive, comprising both machine shops and foundry, and employing from ninety-five to one hundred men. They were continued in operation until about 1876. In that year Mr. Delano started in business for himself, in a small machine shop located at No. 31 South Canal Street. There, for a number of months, he employed little or no labor, but relied almost wholly upon his skill and ability to get his work. As the business increased, so his employees increased, and now his business occupies the entire building at the corner of Washington Street and Jefferson. Three years later a second change was deemed advisable, for the reasons already stated; so, in 1883, he moved to Nos. 47-49 South Jefferson Street. There he manufactures shafting, woodworking machinery and all sorts of machinery of the highest grade, and employs a force of about seventy men, who are skilled workmen. He now has a growing and prosperous trade, and employs about one hundred and twenty men. He is engaged in manufacturing heavy machinery, and his work is known throughout the world. His name is associated with the most prominent and successful industrial concerns of the city.
STEAM-FITTING, ETC.

Weir & Craig—This firm was established in 1869, by Robert Weir and Robert Craig, under the above name and style. Their first place of business was at No. 149 Archer Avenue, where they remained until after the fire. For many years they carried on only the business of plumbing and steam-fitting, employing no workmen but themselves. But close attendance to business, coupled with untiring industry and thrift, brought an increasing volume of trade. In 1873, they removed to the premises they now occupy, where they have since built up their present extensive business. About that time, too, they began keeping plumbers', steam and gas-fitters' supplies, establishing, necessarily, a blacksmith-shop, machine-shop and brass-foundry. This branch of their business has been growing to such an extent that the firm of Weir & Craig may justly be ranked among the leading houses in their line in Chicago. In 1877–78, they began the manufacturing of special machinery, of their own designing, for packing, slaughtering and provisioning purposes. They have also been putting up their firm's patterns and tools to manufacturers of Charles Counselman & Co., at the Union Stock-Yards. The machinery gave such entire satisfaction that they have since had a large business for making these patterns and tools.

They have built out of this kind for leading packing-houses all over the United States, and have filled several special orders from prominent firms in the same line in Europe. In 1884, they established a branch house at Minneapolis, Minn., which is under the management of Edwin Cleveland. Connected with the firm, and general manager of their business here, is John A. Kley, who has lived in Chicago over twenty years, and who is a master mechanic and engineer of acknowledged ability and skill. After the great fire of 1871, the engines at the water-works having been disabled, they were repaired under the personal direction of Mr. Kley and his working crews within seven days after that event occurred. His valuable services in this respect were fully recognized by Commissioner Cregier, who, in his official report at the time, took occasion to acknowledge them in the most handsome manner.

Mr. Kley has been with the firm of Weir & Craig for many years, and has contributed his share toward the success which they have achieved.

Robert Weir was born near Houston, Renfrewshire, Scotland, on February 22, 1835. In 1850, Donald, his father, came with his family to this country, and, three years later, settled on a farm near Sug Bridge, in Palo, Cook Co., Ill. There Robert was brought up and educated, following the occupation of a farmer, after he attained his majority, until 1864. In that year he came to Chicago and engaged in the retail grocery trade for a time at No. 149 Archer Avenue. In 1867, he formed the partnership with Mr. Craig, which still exists, and, a year or two later, they sold out the grocery business and embarked in the plumbing and gas-fitting
The Iron Trade.

493

line, and, subsequently, went into the business in which they are still engaged. Mr. Weir married, in 1864, Miss Anna D. Jardine, daughter of John Jardine, of two years, Margaret, Charles and Alice. Mr. and Mrs. Jardine, their parents, are still living in Chicago, and are numbered among his oldest settlers, having both come here early.

Robert Craig was born at Port Glasgow, near Greenock, Scotland, on May 9, 1840. His father, James Craig, a cotton-spinner by trade, came to America in 1852, locating at Providence, R. I., while his brother also arrived the same year. Robert Craig went to New Haven, Conn., to learn the plumbing, steam-fitting and machinery trade, at which he served an apprenticeship of four years. He afterwards went to Chicago, where, in 1861, he conducted the business the history of which has already been briefly given. Mr. Craig married, in 1872, Miss Jane Duff, daughter of John Duff, of Scotland.

John A. Kley was born at Quincy, Ill., on June 14, 1840, and was reared and educated in that city until he had reached his seventh year. On leaving school, he learned the trade of a machinist, and, in 1865, came to Chicago, which has since been his home. Mr. Kley was married, on May 12, 1868, to Miss Margaret McDonald, daughter of John McDonald, of New York. They have one son, Percy A., born on May 5, 1869.

FIELDHOUSE, DUTCHER & Belden.—This house was established here in 1871, by Joseph Fieldhouse and George N. Dutcher, under the firm name of Fieldhouse & Dutcher, with the place of business on the northwest corner of Canal and Monroe streets. This firm was also the first to introduce the entire voyage, by boat and rail, of the style of which has been as, it now is, Fieldhouse, Dutcher & Belden. In 1879, the firm purchased their present premises, at Nos. 39-32 West Monroe Street, to which their office and salesrooms were removed. During the year, they removed their shops to South Chicago, at which point their manufacturing is now done. As illustrating the growth of their business it may be stated, that, in 1873, they employed about twenty men, and did an annual trade of from $15,000 to $20,000; now fifty hands are employed, and the firm’s yearly transactions foot $350,000. From this it is apparent that, perhaps, of all the firms in the manufacture of machinery, the business of this firm has given the highest returns, and, in charge of the work, has been a most successful one. They have three children, all of whom have been given a fair English education, but early turned their attention to manufacturing, and, when but a young man, worked as a pipe-maker in the first wrought-iron mills ever established in the world; these were located in his native town, and were not going about 1845. In 1849, he became an expert in this important industry, though it was yet in its infancy. Mr. Fieldhouse came to the United States, and located in Boston, where he took charge of the mills of Wallace & Nathan, who were the proprietors of the first factory, of any importance, of this kind in this country. He stayed in Boston three years, then went to Exeter, N. H., returning again, a few years later, to Boston, and finally came to Chicago. There, he began the Dutcher Furnace Company, and engaged in the manufacture of wrought-iron pipe until 1866. In that year he came West on a prospecting trip, and stopped for a short time in this city, where he received a proposition from an English house, who had for a short time been engaged, and with but poor success, in the manufacture of iron pipe, to take charge of their mills. The offer was so liberal that notwithstanding his first impressions of Chicago were not of the most favorable character, he accepted it, and at once assumed the management of this branch of Crane Bros.’ extensive manufacturing establishment, which he conducted with signal success until 1873, when he severed his connection there, and, in company with Mr. Dutcher, founded the present business. From what has been told, it will at once be seen that Mr. Fieldhouse is one of the oldest manufacturers of wrought-iron pipe in the United States, and that he is one of the inventors of some of the latest improved methods now employed in this industry, all of which he has in use in his firm’s mills at South Chicago. One of his most important inventions is that of a continuous pipe, and at the age of 100 years, he is the senior of the pipe-making industry, and he has the strongest portion of the pipe. Skilled in his trade, and thoroughly practical in all his ideas pertaining to the mechanixal arts, and most skillful in their application and perfection, he has deserved the success which now crowns his efforts as a partial reward for almost a whole life of earnest and well-directed labor. Mr. Fieldhouse married, in 1846, Miss Lydia Kainder, daughter of Richard Kainder, of Bromont, Quebec, Canada. They have had six children, four of whom are now living. —Laura and Sarah, Josiah and Albert; and Alfred and Elizabeth are deceased.

George W. Dutcher was born at Milford, Pike Co., Penn., on October 28, 1821, the son of William and Sarah Dutcher. George was given a common school education, and, at the age of fifteen, removed with his parents to Portsmouth, Va., where he began to learn the trade of a machinist and engineer in the U. S. Navy Yard at that place, serving an apprenticeship of nearly five years. In 1852, the family removed to Chicago, and some years later to Douglass, Mich., where the father engaged extensively in the lumber trade. George at once went to work as an engineer on the Rock Island Railroad, and later was assisting in the summer, and in the winter usually spending his time assisting his father in his lumber operations in Michigan, until 1862. In that year he entered the service of the Union as first lieutenant of Co. 'A.' in the 7th Michigan Cavalry. During the contest, his War record is as follows: Entered the service as first lieutenant August 14, 1862; was promoted captain June 13, 1863; and was subsequently given the command of a battery at Gettysburg, and again in the engagement at Brandy Station in Virginia. In consequence of the serious character of these injuries, Captain Dutcher was honorably discharged on November 2, 1863. During a portion of his term of service, he was in the assistant adjutant-general to General Kilpatrick, to whose division he belonged, and whose brigade, it will be remembered, was the first of the Union forces to enter Gettysburg. Captain Dutcher returned home in 1863, shattered of health and still suffering from his wounds, acting on the advice of his physician he went to the sea-shore to rest and recuperate his wasted energies. There he met a whaling captain bound out on a three years' cruise, and who induced Mr. Dutcher to accompany him as far as the Azores Islands, thinking a short ocean voyage would do him good, and from there he could return on an incoming vessel. The result of this was that he concluded to remain, unfortunately, as he could not return to his home. He was at once given a ship off the Island of Madagascar, were finally rescued, and, later, Mr. Dutcher shipped as a hand before the mast on a trading vessel bound for the Indies. His wanderings thus begun lasted three years, during which time he was about the globe in all parts, most every foreign country, returning at last to San Francisco in 1869, poor in purse but abundantly rich in restoration physical health and in his knowledge and experience gained. He arrived in this city in 1870, and at once engaged as superintendent of the machine department in the Crane Brothers Manufacturing Company’s works, where he remained until 1873, when he became one of the founders of the firm engaged in business, was taken into partnership, three years later, and became a railroad engineer in Chicago. Mr. Dutcher was one of the first members of the well known organization, the Brotherhood of Locomotive Engineers, which order was first instituted in 1854. In the following year he was made a member of the Illinois Commandery Military Order of the Loyal Legion of the United States. Mr. Dutcher married, in 1869, Miss Eliza Adams, daughter of Edward Adams, of Lexington, Clinton Co., O., where Miss Adams was born.

HAY & PRENTICE.—This firm are dealers in wrought-iron pipe, and steam warming and stiffening apparatus, with associated trusses, etc., was established, in 1877, by Alexander B. Hay and Leon H. Prentice. The original place of business, for three years, was at the southwest corner of Canal and Washington streets, when it was removed to the northeast corner of the same street, in the building of the Crane Brothers Manufacturing Works, Nos. 34-36 South Canal Street. Although comparatively a young firm in Chicago business circles, yet both its members are old residents here: Mr. Hay since 1876, at which time he was head of the well-known firm of Crane Bros., when they were doing business in a modest way and employing less than a dozen men; and Mr. Prentice came to this city in 1863, and with the same firm until 1877, when, in company with Mr. Hay, the present firm of Hay & Prentice was established. It is not a matter of commendation, so much as one of simple justice, to say that, from a small beginning, they have each year steadily increased their business, until now they are classed among the leading houses in the city. He is in his present position of one of the inventors of some of the latest improved methods now employed in this industry, all of which he has in use in his firm’s mills at South Chicago. One of his most important inventions is that of a continuous pipe, and at the age of 100 years, he is the senior of the pipe-making industry, and he has the strongest portion of the pipe. Skilled in his trade, and thoroughly practical in all his ideas pertaining to the mechanixal arts, and most skillful in their application and perfection, he has deserved the success which now crowns his efforts as a partial reward for almost a whole life of earnest and well-directed labor. Mr. Fieldhouse married, in 1846, Miss Lydia Kainder, daughter of Richard Kainder, of Bromont, Quebec, Canada. They have had six children, four of whom are now living. —Laura and Sarah, Josiah and Albert; and Alfred and Elizabeth are deceased.

Alexander B. Hay is a native of New York, born, in 1829, of Scotch parents. His father was John Hay, his mother Isabella Brand. He was given only the advantages of common school instruction, but at an early age he had acquired a knowledge of the trade of a machinist. In 1838-39, he started a machine shop at Cohoes, N. Y., conducting this until nearly three years latter, when he went to Chicago, where he has since been a prominent manufacturer. He has been so employed in the machine shops of Wood & Hunter, where he remained for six years. As has already been mentioned, Mr. Hay came West in 1856, and located in Chicago, engaging at once with Crane Bros., of Webster, Mass., in 1858, and following the previous year, his employers sent him to Joliet, in charge of putting in the heating apparatus for Crane Brothers. After completing this task he was employed by the commissioners as superintendant in the erection of the line from Chicago to the Illinois Central depot at Lincoln, Illinois; he then returned to Chicago and resumed his position with the Crane Brothers, with
whom he was connected until 1857, when, with Mr. Prentice, he purchased from them their steam-heating business and founded the present house. Mr. Hay married, in 1843, Miss Frances N. Bordwell, daughter of Capt. Amos L. Bordwell of Cohoes, N. Y. They have one child, a daughter, Frances Evelina.

**Leo H. Prentice** was born at Lockport, N. Y., on October 22, 1847, and is a direct descendant of Henry Prentice, who came to this country from England, in 1606, and settled at Cambridge, Mass. There he built a house which stood just opposite Harvard College, and which was only a year or so pulled down to give place to a more modern structure. At the time of its demolition this mansion house was regarded as one of the most venerable buildings in the locality, and on its walls were found inscribed the names of students who themselves attended Harvard College nearly a century ago. The family of the Prentice family is well known. It shows that the name to come to America was Valentine Prentice, who landed here in 1631, settling at Roxbury, Mass. Henry, already mentioned as having settled at Cambridge in 1640, was a brother. The parents of Leon H. were Antonio T. and Judith Prentice, who was a jeweler, smith of Lockport at an early day, and Emeline Rockwell, also of an old New England family. Leon H. was given a common school education, and received also some business training at his father's hands. In 1861, he came to Chicago and engaged with Crane Bros., remaining there until 1877, when he started in business on his own account as a member of the firm of Hay & Prentice. Mr. Prentice married Miss Elizabeth Matthews, daughter of Emanuel Hossinger, an old and well-known resident of this city. They have three daughters,—Bessie Hossinger, Lucy Clark, and Julia Leon. Their daughter, Miss Elizabeth E. Prentice, was born at Wilson, N.C., on March 6, 1885.

His father was a wholesale tea dealer, and moved to Montrose, Scotland, about forty miles from Aberdeen, when George was eight years old, and there the latter received his education. Upon returning to this country he engaged in the retail tea and coffee business, which he carried on for a number of years, but he did not find it very lucrative, so he closed his business. In the spring of 1885, Mr. Efe went into the office of the Mechanical Bakery, Chicago, where he remained until the spring of 1891, when he built another flouring-mill at St. Anthony, Minn., where he remained for about ten years, closing his engagement with them in 1894. He then took a trip to Scotland, remaining four months, and, on his return, entered into the business of Hay & Prentice, with whom he is still associated, having been admitted into partnership in 1895. In the latter part of 1895, he returned to Chicago and is now engaged in farming in Dodge County, Wis., in the fall of 1895, he made a trip to Scotland, bringing back with him, as his wife, the friend and correspondent of his boyhood, Miss Frances Lamb, daughter of Thomas McEwen, the wedding having taken place on January 14, 1896. They have had eight children,—George T., Henry W., John M., Charles, Jessie, Edward and Margaret. Mrs. Efe deceased in 1894, during the absence of Mr. Efe in Europe. In 1896, Mr. Efe was married to Miss Eliza E. Efe, of Morris, Ill.

The **National Tube Works Company** was first established in 1857 in Boston. There a large business was successfully carried on for a number of years, but owing to the increasing demand for its goods, the company found it necessary to enlarge its manufacturing facilities, and, in 1872, completed their present works at McKeesport, Pa., on the Monongahela River, about fourteen miles from Pittsburgh. Their shops there comprise some twenty-five buildings and cover an area of about fifteen acres of ground, and there they have the most complete and well-equipped works of the kind in the world. They have employed thousand men and boys. The company has completed the erection of the National Rolling-Mill, No. 1, showing all the latest improvements known in rolling-mill machinery. Among the articles manufactured by this company may be mentioned—wrought iron, steam, gas and water pipe, lap-welded; also wrought iron and steel boiler-tubes, tubing and casing for artesian wells and salt wells, boiler-tubes cast and wrought with patent protective couplings, flushed type hydraulic pipe of all diameters and thicknesses, pump columns for mines, special light pipe for light pressure line-pipe, galvanized pipe, build-up, for water and gas, pressure injectors, etc., etc. They also manufacture special light wrought-iron pipe, fitted with a patent lock joint, for the special use of gas and water works companies and compressed air. This pipe is treated with a preparation which makes it indestructible, as regards any corrosion or any destructive action by the gases which are found in the compressed air. The National Tube Works Company have houses at Chicago, Boston, New York, Pittsburgh and Bradford, Penn., and agencies in all the principal cities of the United States and Canada. Up to 1878, they had no agency in England, but the business increased so rapidly that it was necessary to establish a branch house here, which was accordingly done. This, from the first, has been under the management of Charles A. Lamb.

**Charles A. Lamb** was born at Boston, Mass., in 1846, the son of Charles C. and Sarah (Allison) Lamb. Charles, Jr., was given a fair English education in the common schools of Boston, of which he was the oldest child, and became eleventh in age, hence, he was the first child born in this house in his native city. He remained in this position for ten years, when, deciding to go into business for himself, he, in 1872, became a member of the firm of Leonard, Keedpath & Lamb, wholesale boot and shoe dealers in Boston. That firm was succeeded, three years later, by Leonard, Lamb & Crosby, and continued until 1878, when Mr. Lamb severed his connection there to come to Chicago and assume the management of the house, whose affairs he still directs. Mr. Lamb was married, in September, 1874, to Miss Martha L. Pike, daughter of John Pike, of Boston. They have two children,—Charles H. and Mabel H.

The **National Tube Works Company** was first established in May, 1884, by S. W. Adams, Robert L. Adams, and Leonard W. Adams. This enterprise was started in May, 1884, by S. W. Adams, and in December, 1884, the present stock company was formed, with a capital of $300,000. The buildings occupied consist of the spacious rooms then formerly known as the William Knowlton residence, Nos. 161-67 South Canal Street. This building, which has been fitted up especially for their purposes, is three stories in height, with a frontage of a hundred and fifty feet, with a depth of one hundred and fifty feet, thus giving nearly forty-five thousand square feet of floor space. Here they carry an immense stock of lap-welded wrought-iron pipes, boiler-tubes, gas and steam fittings, steam pumps, engines, machinery and steam goods of every description. Though a new firm in its line, this house has already filled many large and important contracts. Among them may be mentioned a most important work done for the Western Union Telegraph Company, in placing the wires of that corporation underground, in iron tubes so completely impervious to surrounding influences as to form them a perfect and lasting protection. Over sixty thousand feet of these durable conduits, with man-hole connections, were laid in less than twenty-four days, in a most thorough and workmanlike manner. In addition to this work, Mr. Adams also placed underground, from Washington Street, at the corner of LaSalle, to the new Board of Trade Building, two miles of pneumatic tubes, finished for that purpose on machines of his own invention; this being the first instance where iron tubing has been substituted for brass in this class of work.

**W. Adams** is a native of Albany, N. Y. He came to Chicago in 1837, and was for fourteen years the secretary of the Crane Brothers Manufacturing Company, where he became widely known to the trade and perfectly familiar with its wants; hence, when there was a desire on the part of the company to enter into the present business, he was eminently well qualified to conduct it to the important place it now holds among Chicago's commercial and industrial interests. Mr. Adams now has his premises of business in the Chicago Mercantile Office, and spends about one-fourth of his time in that city looking after the large interests of his company in the Eastern States.

### GALVANIZED IRON AND CORNICES.

Galvanized iron cornices were first used in Chicago in 1865. During that year, and the year following, not more than one hundred and fifty men were employed in their manufacture, and the average price per foot ranged from ten to twelve dollars. From the inception of the industry until the close of the year 1885, however, the use of cornices of this description has steadily increased, and their manufacture has proportionately grown. Indeed, not only has galvanized iron grown in favor among builders as a material for cornices, but also for purposes of general ornamentation. The gradual growth of the industry in this city may be best learned from an examination of the statistical tables, elsewhere given, relating to the manufacture of iron and steel. It will be worthy of mention, however, that the quality of the manufactured product has kept even pace, not
only with the growth in manufacture, but also with the improvement in architectural style as well as material, noticeable in the buildings erected since the great fire.

Knisely & Miller.—In 1857, Abraham Knisely started in business as a slate and metal roofer, having his shop and office in the K-ane & Van Kuren building in the Chicago market, until he moved to the business house in the newly erected State Street building. In 1859, he removed to the building near the corner of State Street and Washington Street.

James Miller was born at St. Charles, Kane Co., Ill., in 1850, and is the son of Alexander Miller, an early settler in that county, and well-known as a builder of grain elevators, having introduced in this city, as early as 1857, the cornice business, which is still followed in the construction of this class of buildings.

James Miller was reared and educated in St. Charles, and, at the age of fifteen, came to Chicago and entered as an apprentice in the employ of the firm in which he was later admitted as a partner.

Arthur N. Cooper, superintendent of the cornice department of the firm of Knisely & Miller, was born at Dayton, Ohio. He received a fair English education, and, in 1857, began to learn the cornice trade in Dayton, at the time of the introduction of galvanized iron cornices into the West. In 1872, he came to Chicago and entered the employ of the old firm of Eken & Jenks, roofer and cornice-makers, then doing business on Van Buren Street, between State Street and Wabash Avenue. In 1875, he became connected with the firm of Knisely & Co., remaining with it through its different changes until the present.

Hartman & Ertz.—The firm of Heintz & Ertz, composed of P. F. Heintz and George Ertz, manufacturers of galvanized iron cornices, and also slate and metal roofers, was established in Chicago in April, 1884, at 204 Milwaukee Avenue. This partnership continued until October, 1885, when it was terminated by the death of Mr. Heintz. From that time, until March, 1885, Mr. Ertz continued the business, which he conducted with F. R. Hartman, an old cornice-maker of Chicago, who, for several years past, has been engaged in the retail store and hardware trade. The style of the new firm is Hartman & Ertz.

Fred Hartman, senior member of the firm of Hartman & Ertz, was born in Germany, on March 12, 1827. At the age of thirteen he began to learn the trade of a workman in his native city of Germany, and became a master in the same trade. He came to America, spent a year in Canada, and located in Chicago. His place of business was on South Clark Street for twelve or fifteen years, and in addition to the business of making cornices, he carried a large stock of stoves and general hardware. At the time of the fire of 1871, his place of business was at No. 143 Madison Street and also No. 145 LaSalle Street, where he occupied two stories. The fire swept away his entire business which was valued at $35,000. He then opened a store on Newberry Avenue, and succeeded in getting on a sound basis once more. In a few years he opened a hardware store at No. 563 Lincoln Avenue, which he still owns, and is a source of considerable revenue.

In March, 1885, Mr. Hartman was associated with him in the galvanized iron business George Ertz, a former employee. Mr. Hartman was married on August 4, 1854, to Miss Caroline Boldenweck, of Chicago. They have five children: Louis, Clara, Otto, Martha and Fred, Jr., Mr. Hartman is a member of the Illinois Masonic Grand Lodge No. 277, A.F. & A.M. for the past twenty years. He was also a charter member of the Chicago Sharpshooters' Society and was president of the same for one year.

Hartman & Claussen.—This house was established here in 1858, by Fred Hartmann, a brother of one of the present proprietors. Mr. Hartmann was not in the cornice business, but conducted a jobbing iron shop, its being before the introduction of galvanized iron for cornice making. His first place of business was on South Clark Street, near the site of the Grand Pacific Hotel. He remained there until 1863, when he removed to No. 218 Lake Street, and there began the manufacture of street lamps for the city, in addition to making a specialty of fancy sign lamps of all kinds. In 1871, he was burned out by the great fire, but immediately afterward started a large cornice shop on Newberry Avenue, near Halsted and Twelfth streets. In 1876, he moved to the North side of the city, this being the year, sold his business to Adolph Hartmann and Otto Clussen, who, under the firm name already given, have since conducted it.

They have at their present location since 1878, and still carry on an extensive trade in galvanized iron cornices, tin, slate roofings and galvanized iron ice moulds, used in making ice.

Adolph Hartmann was born in Germany in 1851, but, when he was fourteen years of age, kept paces in the cornice business in this city, which has since been his home. He at once engaged as an apprentice with his brother to learn the trade of a tinsmith, and remained with him until 1877, when, with Mr. Claussen, purchased the interest and went into business on his own account. Mr. Hartmann married, in 1874, Miss Caroline Knoedler, daughter of Jacob Knoedler, of Ottawa, Ill. They have two children, Karl and Amanda.

Otto Clussen is a native of Denmark, born on March 23, 1840, and at an early age apprenticed himself to learn the trade of a tin-
HISTORY OF CHICAGO.

smith. In 1868, he came to Chicago, where he worked as a journeyman with Fred Harriman until after the fire. He then became foreman in the cornice shop of Fred Harriman, with whom he remained until in 1878, when he became one of the partners in the present firm of Harriman & Chasen. He married, on December 31, 1879, Karina Nixon, and has had six children: Jenny, Alvilda, Arline, Delgabe and Waldman.

Robert Griffith came to Chicago in 1856, and established himself in the slate-roofing business, and, about two years later, opened a cornice shop, since which time he has been engaged at this line of business ever since.

His first place of business was at No. 99 Washington Street; from this he removed shortly afterward to No. 125 Lake Street, then to No. 222 Randolph, and at last to No. 99 Washington, from there to 145 State Street, and to the Nineteenth. He formed a partnership with Watson Clark, under the name of Clark & Griffith. About the time of the great fire, as Chicago was enjoying an almost unprecedented building boom, the cornice business was of course very extensive, and Mr. Griffith employed nearly seventy men, and had contracts ahead for work amounting to hundreds of thousands of dollars. Five years ago Mr. Griffith removed his shops to their present location, and where he now does all kinds of galvanized iron work, also slate and metal roofing. He relates that the first job of cornice work he did in this city was the cornices for the Armour & Dole elevators. At that time, little or no galvanized iron cornice was made in Chicago, so in this case Mr. Griffith made his cornices of black iron, the moldings being of the plainest sort. For a number of years after, the cornices put up in this city were made in New York. Mr. Griffith was then the only person in this business in Illinois, and the first firm to manufacture slate. His father, John Griffith, was a slate-maker, and to this calling Robert was also bred. In 1852, he came to America, locating first at Castleton, Vt. A few years later he removed to Toronto, Canad", and from there back to the States, through which he traveled as a contractor, doing large jobs of slate roofing in various large cities of the East. In 1862, he came to Chicago, where he founded his present business.

J. C. McFarland, now doing business at Nos. 219-21 West Lake Street, is among the oldest manufacturers of galvanized iron cornice in the city, although he has been in that trade on his own account only since the great fire. Immediately following that event, he, in company with Isaac N. Price, now of the firm of Price & Kaufman, established themselves at No. 87 North LaSalle Street, where they remained for nearly two years. They then removed to Nos. 1-2 North Wells Street, where they opened the old Moody Church building. In 1876, Messrs. McFarland & Price removed to the South Side, locating at the corner of Michigan Avenue and Madison Street, where they remained until the termination of their partnership, some two years later. At this time Mr. McFarland, having purchased Mr. Price's interest in the business, removed to Nos. 13-15 South Jefferson Street, and a little later consolidated with J. W. Atkinson, again changing the location to No. 519 South Clinton Street. This connection existed until the death of Mr. Atkinson, in June, 1884, at which time Mr. McFarland removed to his present quarters. Here he manufactures all kinds of galvanized iron cornices, does slate heeling and raftering and a general jobbing business in all kinds of sheet metal work.

Mr. McFarland was born at Wilmington, Del., in 1856, the son of W. W. and Susan M. McFarland. His parents came west and located first in Ohio, but finally removed to Ottawa, Ill., where J. C. received the major portion of his education. In 1866, his father formed a partnership in this city with Frels J. Emery, in the galvanized iron cornice business, which was then in its infancy, but which was already rapidly growing throughout the West. This firm was known as Emery & McFarland, and their first place of business was in a small shop in the basement at the northeast corner of Randolph and Clinton streets. For the first year or two the firm did but little in the way of putting up cornices, their chief business being the manufacture of galvanized iron cornices and down-spouts, also making and selling lightning rods. The growth of the business since that time has indeed been wonderful, as scarcely any of the ordinary business building, more where in the city, can now be found, that are not furnished with this class of cornice work. The firm have always lived in Chicago, and have remained here since 1868, the time when he started in business on his own account. He is married, on April 29, 1885, to Miss Irene A. Stout, of this city.

William B. White.—This enterprise was established, in 1874, by William B. White, W. G. Warren & Co., and the business was conducted by the firm being White, Warren & Co., and the place of business on Desplaines Street, near Madison. In the fall of that year they removed to Pacific Avenue, and, in 1875, Mr. White purchased from Mr. Warren, his interest in the business, which then changed its name to W. B. White & Co. In 1876, Mr. White bought out his remaining partner, Mr. Martin, and has since conducted the business alone. From the time of the founding of this firm until Mr. White became sole proprietor, the prospects for establishing a prosperous business were far from promising, being caused, in part, by the fact that Messrs. Warren and Martin retired from the firm. Mr. White, however, was undaunted by these difficulties, he assumed the indebtedness of the firm, and by his steady and persevering industry, succeeded in succeeding in building up an extensive trade amounting to nearly $150,000 annually and ranking among the leading firms now engaged in the galvanized iron cornice business. Mr. White was born in Huron, Canada, on Oct. 25, 1832. He was a mechanic and served as a mechanical engineer for a number of years in the employ of the English government. His mother was Mary Ann Clark. William B. began to learn his present business at the age of sixteen, in Milwaukee, with his brother, who established the first cornice works ever in that city. In 1868, he came to Chicago, and worked at his trade until 1874, when he founded his present business. Among the prominent buildings in this city that at present bear testimony to Mr. White's work may be mentioned, Haverly's Theater, Cook County Hospitals, Charles B. and J. W. Farwell's residences, the Michael Reese Hospital, and many others. Mr. White was married, in Oct. 1868, to Miss Ellen Stokes, daughter of W. N. Stokes, of this city. They have two children, Gertie Florence and William B. Jr.

J. F. Townsend.—This house was established by Mr. Townsend, and the firm name changed to J. F. & J. K. Gordon, at Nos. 13-15 South Desplaines Street, the present location, in the winter of 1853. This partnership continued until January, 1858, when Mr. Gordon retired from the firm, and since then the firm name has been J. F. Townsend & Co. He is now one of the oldest workers in the cornice business in Chicago, having learned his trade in 1861, in Detroit, under Leroy J. Binn. Mr. Townsend was born Oct. 5, 1839, at Utica, N. Y. His father, John Townsend, was at that time master car-builder for the New York Central Railroad Company, and, in 1843, removed with his family to the West, locating at Adrian, Mich., where he still resides. He was also a master builder, for the Michigan State Railroad, the Lake Shore & Michigan Southern Railway Company. John P. was largely reared and educated in Adrian, but, when only nineteen years of age, enlisted in the 7th Indiana Cavalry, in which he served during the war. The firm of Townsend & Co., changed its name to Townsend, Boucher & Co., in 1872, Miss Mary Boucher, daughter of William Boucher. They have had four children,—Seward, George, Homer, and Florence.

Bryant & Meserve.—This co-partnership comprises J. H. Bryant and W. P. F. Meserve, and was incorporated in May, 1884, at Nos. 61-67 Michigan Street, where they have extensive works, employing twenty men steadily. Although a general jobbing business is done in the way of galvanizing iron and steel, yet their specialty is in steel-barb fence-wire, which they take from the mills and submit to their process, which makes it more valuable because it is rendered impervious to water or the action of the destructive gases of the furnace. The establishment now owned by Messrs. Bryant & Meserve is known as the G. O. Crowd Works, and it is no more than justice to say that it is fast becoming an important factor among Chicago's many industrial enterprisers. The firm of Bryant & Meserve has been in operation for many years, and is now one of the oldest and best-known hotel men in the city. He is at present the proprietor of the Atlantic Hotel, at the corner of Van Buren and Sherman Streets. Elsewhere in this volume, and also in the first mention of the hotels with which Mr. Meserve has been connected since his residence here, a brief sketch of his life.

William J. Meserve was born in the village of Richfield, Otsego Co., N. Y., in 1841, the son of William and Marial Meserve, II. He was given an academic education, but, at eighteen years of age, left home and apprenticed himself to learn the trade of a machinist, some three years later, and continuing there, have been nearly three years and, in 1861, engaged with the Remington Breech, the celebrated fire-arms manufacturers, at Ilion, N. Y., and while at that time were
supplying the United States Government with arms with which to carry on the War. In 1865, he severed his connection with that firm, and came to Chicago, arriving here on October 4 of that year. He obtained employment here in the shops of the North-Western Railroad Company, in 1851, employed by the Grant & Manufacturing Company, as superintendent of their pipe-mill and galvanizing works. He remained in this position until May, 1854, when, in company with Mr. Meserve, he founded the present business.

Mr. Norris, in 1856, married Almina Wibsey, daughter of Alonzo Wibsey, of Boonville, N. Y. They have had two children,—Cora and John Albert.

SAFES AND VAULTS.

A most important item of the iron interests of this city is comprehended in the safes and vaults made for the preservation of our citizens' wealth. Some sketches of prominent houses in this branch are subjoined.

DIEBOLD SAFE AND LOCK COMPANY.—The business of the present well-known Diebold Safe and Lock Company, was first established at Cincinnati, in 1850, under the name of Balmann Company. In 1872, the works were removed to Canton, Ohio, where they are still located, ranking to-day as one of the largest safe manufacturers in the country. They give employment to nearly one thousand workers, and have a capacity for turning out from fifty to sixty safes every twenty-four hours. The Chicago branch was established in 1862, with its place of business at No. 80 Washington Street. For some years, at the time of the great fire, the location was at No. 93 Dearborn Street, and here of course they were burned out, sustaining heavy losses. Immediately following that event, however, business was resumed at No. 446 State Street, where they remained until September, 1872, when they removed to the present quarters at No. 57 State Street.

In 1875, John W. Norris, vice-president of the company, removed to this city and assumed charge of the house here, and has since conducted its affairs. Under his management, the house has prospered greatly, now doing a business amounting to over $200,000 per annum, while, during the first year of the business was established in Chi- cago. Frosted glass, $50,000 per point the trade is supplied in all the Western states and territories excepting Cen- tury. Without comment, the fact is apparent that, from a small beginning, the business has grown to vast proportions, thus placing this house among the largest in its line, not only in this city, but anywhere in the country.

John W. Norris, vice-president of the company a brief history of which precedes, is a native of Massachusetts, born in Boston, on March 14, 1839. His father, Rev. Thomas F. Norris, a native of Vermont, was a journalist by profession, as well as a prominent min- ister of the Methodist Church, and for many years edited The Olive Branch, a literary weekly paper of Boston, and which was at that time one of the leading city papers. The family, with his sons and daughters, became prominent, made their debut in its columns. Rev. Mr. Norris was a distinguished member of the Masonic and the I. O. O. F. fraternal order. Mr. Norris married Sarah Ann Theriau, a native of North Carolina, and a woman possessing many excellent traits of character. The son of whom we write, when quite young, was sent to New York, where he was educated. In 1856, and when only twenty years of age, Mr. Norris came to Chicago, where he took charge of McNally's news and periodical business, located on Dearborn Street near Ran- dolph and adjoining the Young America Hotel, a cut of which, taken from an old city directory of 1856-57, appears in the second volume of this work. Some time after this, Mr. Norris formed a partner- ship with Amos M. Hyde, under the firm name of Norris & Hyde, in the same line of trade, their place of business being at the corner of Dearborn and Washington streets, in a little frame building then owned by Tuthill King. This connection continued until about 1859, when Mr. Norris retired from the firm and went to New Orleans, where he established himself in business on his own account, until 1857, when he became associated with the company of which he was afterward the vice-president and with which he is still connected.

In 1872, he went to Canton, Ohio, and, in 1875, returned to this city to take charge of his company's branch house, which has since become one of the largest and most splendid of its kind. Mr. Norris was afterward the vice-president and with which he is still connected.

In 1872, he went to Canton, Ohio, and, in 1875, returned to this city to take charge of his company's branch house, which has since become one of the largest and most splendid of its kind. Mr. Norris was afterward the vice-president and with which he is still connected.

The management of the company has been left in the hands of Mr. Norris, with whom Mr. Norris, and the latter has conducted the business with great success. The company has been left in the hands of Mr. Norris, with whom Mr. Norris, and the latter has conducted the business with great success. The company has been left in the hands of Mr. Norris, with whom Mr. Norris, and the latter has conducted the business with great success.

THE IRON TRADE.
nished by Mr. Berry. This gentleman also introduced to the trade here and elsewhere a patented invention of his own, known as the double-iron coining of two pieces of sheet iron, bolted together so as to leave a chamber between; this, it has been found, is admirably adapted as a fire-proof shutter, but experience has shown that, from its being cumbersome, it does not prevent the action of theements as well as the old-style single-shutter, and so is not now in general use. In 1875, Mr. Berry moved his place of business to Nos. 208-10 Lake Street, and about four years later to Nos. 99-91 Indiana Avenue. Here he erected a commodious brick building about fifty feet front by one hundred in depth, and three stories and a basement in height, and does an extensive trade, not only in this city but throughout the Western states and territories. The firm has fixtures corrugated and single-plate iron doors and shutters, also iron grating and wrought iron work of every description. Mr. Berry was born at Paterson, N. J., in 1835, the son of John and Catharine (Kone) Berry. After several years spent in working for his board and clothes, and getting what education he could by attending the common schools during the winter months, at the age of fifteen years, he apprenticed himself to the carpenter's trade, and, on attaining his majority, he, in 1854, died to try his fortunes in the West. Accordingly he located in Fond du Lac, Wis., where he lived, following the occupation of a contractor and builder, until fall of 1871, when he removed to the Iowa territory the following year, established the business in which he is still engaged. Mr. Berry married, in 1855, Miss Mary Caroline Young, daughter of Nicholas Young, of Fond du Lac; they have had five children and one daughter, the latter deceased. His eldest son, John, M., the eldest, is now in the iron business in Jersey City, N. J.; Sumner P. is employed with the house of Marshall Field and Company as their Eastern buyer; John H., Jr., and Arthur V., are his youngest sons, are at home, the former employed with his father in the business here, the latter attending school.

ARCHITECTURAL IRON WORK.

M. BENNER & CO., manufacturers and dealers in structural and ornamental iron work, combination fire-escape and standpipe, etc., established their house in 1879, the firm being then composed of M. Benner and J. T. Cowles, and doing business at the corner of Van Buren Street and Pacific Avenue. Two years later the company was moved to the corner of Canal and Harrison streets, and, at the same time, Messrs. Cowles and Benner, jointly owning the patents covering their fire-escape and stand-pipe, dissolved partnership, first dividing the property and each taking certain allocated States and Territories as his exclusive ground in which to control the sale of their patents. Mr. Benner continued to do business at the location last mentioned, until the summer of 1885, when he purchased the lot at Nos. 260-64 South Jefferson Street, where he immediately began the erection of a substantial brick building, covering his entire lot, and four stories and a basement in height. This was completed and occupied in the spring of last year. The fire-escapes made and sold by Mr. Benner are by far the most practical invention of the kind ever made, and are the result of twenty-five years' study of the best means to provide for escape from burning buildings. As fire marks of Chicago for five years, Mr. Benner was also given excellent opportunities to mature and perfect his inventions. Over four thousand of them are now in use, and so commonly are they found on the business buildings of this and other cities, that no description need be given here, more than to say the device consists of an iron ladder, ice proof, first attached to the walls of a building, so as to at all times afford a safe and speedy means of egress in case of fire. On moving into their present commodious quarters, the firm extended their business to the manufacture of architectural iron work, including railings, all kinds of castings, etc., in the foundry, and the other extensive business transactions of this firm, from sixty to seventy-five men are employed. A few years ago six to ten men could transact all the business of the firm.

Mathias Benner, the senior member of the firm, was born in Lanfeld, Germany, on October 6, 1838, his parents being Anton and Hannah Benner. In 1847, they came to this country and settled near Fort Washington, Wis. Removing to Chicago in 1851, young Benner found employment with John Kohn, the well-known cigar manufacturer, for which he received the nominal compensation of seventy-five cents per week. He also was employed at a trunk factory, and then went to St. Louis, where he remained continually in the cigar business until the days of the Civil War. At St. Louis, he resided continually in Chicago, making it "convenient" to attend every fire of any magnitude, and thus received a practical education in his chosen profession. A few days after having reached the age prescribed in the by-laws, when he could join the Fire Department, he became a member of that organization. This was October 10, 1856. Four days after he was eighteen years old, he was unanimously elected a member of that company, and, on April 5, 1859, joined "Enterprise" Engine Company No. 3, born, knighted, and made an officer of the department in a single day. On account of inactivity, he joined Hook and Ladder Company No. 1, and subsequently was elected foreman of the "Island Queen" Company No. 4. In April, 1861, he resigned, intending to engage in the mercantile business. Six months later, however, he could not spare him, and he was called to "caption" the "Long John" for three years. After remaining as a private until April, 1867, he accepted the position of captain of the steamer "Enterprise" Fire Company No. 4. Mr. Benner served in both the civil and military minds, rising to the rank of assistant fire marshal, and continued thus to act until March, 1872, when he became first assistant. On August 9, 1873, he was given the captaincy of this company, which he held until March 1879, when he was then made third assistant fire marshal, and continued thus to act until March, 1879, when he became first assistant. On August 9, 1879, he was made captain of the Volunteers, and on September 15, and re-appointed on August 16, 1879. He remained in this position until July, 1879, when D. J. Swenie, the present incumbent, succeeded him as acting, and subsequently as actual, fire marshal. While marshal of the department, Mr. Benner inaugurated and developed many reforms, not the least important of which was his establishment of a school of instruction for the assistant engineers, or chiefs of battalions, and the captains and lieutenants of companies, who met every alternate week. He has held many important positions in various firemen's associations, acting, at one time, as president of the Illinois State Firemen's Association. Although Mr. Benner's early education was, unfortunately, neglected (though from no fault of his own), his energy and practical insight make amends for such lack, and there are certainly few men who have taken a wiser advantage of every opportunity offered to him. To his students Mr. Benner has acquired a reputation as a mechanic, being formerly a director, and, at one time, vice-president, of the Chicago Mechanics' Institute. Since 1879 has been engaged in the manufacture of fire-escape apparatus, a history of which has been given. Mr. Benner was married, on April 23, 1861, to Miss Mary, daughter of Timothy Brusnien, of Chicago, his wife dying July 9, 1880. He has two sons and two daughters, Mr. M. D., now the wife of W. D. Kent, a member of the firm of M. Benner & Co.; Cornelia G., Frank A., Edwin G., and Florence M.

THE ELLIOTHORPE AIR-BRAKE COMPANY, manufacturers of passenger and freight elevators, and of the famous Elliottorpe air-brake, was organized in 1861, and subsequently was incorporated under the laws of this State, on July 25, 1873, with a capital stock of $100,000. The first officers of the company were: John H. Director; president, A. C. Elliottorpe, general superintendent, and A. B. Elliottorpe, secretary. The company was first located at No. 95 West Randolph Street, but shortly afterward removed to Nos. 54-64 Walsh Place, between Randolph and Washington streets. Here they carry on the manufacture of elevators, of the Elliottorpe air-brake, and of the Elliottorpe air-cushion, both of which appliances are the invention of A. C. Elliottorpe. The first air-cushion placed on an elevator in this city was in July, 1879, on the elevator in the Chamber of Commerce building. On this occasion, Mr. Elliottorpe made a public test of his invention, concerning which, the Chicago Times of July 24, 1879, contained the following notice: "As it was a clear afternoon, the large elevator in the Chamber of Commerce fell from the upper floor of the building. It contained at the time F. T. Elliottorpe, son of the inventor, and C. F. Hathaway, neither of whom was on board; they had considerable time to make their escape which was spilled. On the floor of the cab was a basket of eggs and glassware, but not an egg or a tumbler was broken. The occasion of the fall was the testing of a device, of Colonel A. C. Elliottorpe of this city, for preventing elevator accidents. After the second test the elevator was loaded with five thousand pounds of pig iron, the elevator itself weighing four thousand pounds, which was hoisted to the upper floor and again allowed to drop—the eggs lying loose upon the floor among the pigs of iron and glassware, were unbroken. It seems as if the deadly elevator had been robbed of its terror."

Of a similar test given at the Exposition Building, the Chicago Tribune made the following editorial comment: "The Elliottorpe Patent Safety Air-Cushion was tried at the Exposition yesterday afternoon in the presence of about twenty thousand people, who stumbled when the elevator fell from the top of the shaft, but cheered heartily when they saw that no eggs were broken. The device was pronounced by the newspapers, but only a few people were present, and operation until yesterday, and become thereby capable of judging of its merits. The announcement that the elevator would fall 'with a leap' attracted attention both to the building and the galleries being crowded, nearly everything else being abandoned for the time being. The only change noticeable was the height of the bottom of the shaft, extending up several feet. Along towards four o'clock the elevator dropped to the top of the shaft. In it were A. C. Elliottorpe, F. T. Elliottorpe, C. F. Hathaway, Fred. T. Adams, C. C. Coffin and John T.
Brothers, their weight and that of the elevator being about two thousand eight hundred pounds. After some little delay the temporary rope attachment was cut, and down came the elevator with a rush, but in an instant the entrance door was opened, and the five passengers and baggage left the car, the conductor and his crowd began cheering, and rushed forward to feel of the men and see if they were not rubber automata. The test was satisfactory in every particular, rendering what was said by Alexander Ellithorpe, in which he said that accidents from falling elevators can become an impossibility

The principle upon which these brakes act is compressed air, which prevents the car from falling more than a few feet, stopping it gradually, the lightest contact with the meteor, and as is precisely the same as applying the Westinghouse brake to a train of cars while under a high rate of speed. The stopping is positive, but gradual. The air-cushion is of a different character, and is intended for the purpose of gradually slowing the car in case of a collision.

The company, which is known as the First Indian Regiment, Colonel Ellithorpe, although having only a lieutenant's commission, entered active service in the General Elam's Arizona Volunteer Companies, in which Colonel Ellithorpe, with his regiment, was engaged, being Grand Saline, Old Fort Wayne, Bayou Sierra, Prairie Grove, Willow Springs, Van Buren and Kane Hill. For gallant and meritorious service in the battles of the frontier, Lieutenant-Colonel Ellithorpe was promoted to the rank of major, and, at the battle of Prairie Grove, Major Ellithorpe was wounded, and was again promoted lieutenant-colonel for gallantry on the field. At the close of the war, Colonel Ellithorpe, at the urgent request of the leaders of Kansas, assumed the editorship of the Leavenworth Conservative, which paper strongly advocated the election of General James H. Lane to the United States Senate from Kansas. After the close of this campaign, he returned to Chicago, which has since been his home and where he later brought into existence the inventions already mentioned, which are destined to live as a memorial of the value of his genius and skill, for generations to come. Colonel Ellithorpe married, in June, 1845, Miss Maria L. Sammons, daughter of Frederick Sammons, of Syracuse, N. Y.

They have had four children,

HARRY J. W. REEDY ELEVATOR MANUFACTURING COMPANY, which was chartered under the laws of Illinois, in 1855, with a capital stock of $200,000. The business which this company succeeded to started in 1857, near the corner of Michigan and Dearborn streets, and afterward moved to its present location. It was owned and operated by J. W. Reedy for manufacturing hand and steam elevators for hoisting purposes, under his patents. Business increased until he was forced to remove to larger and more commodious quarters, and, just prior to the fire of 1871, he built a large brick building on the ground occupied at present, Nos. 83-91 Illinois Street, which was swept away in that conflagration. He at once re-built, and orders were so pressing for his elevators that he commenced manufacturing in the open lot, not waiting for the completion of the building. The record of his business career is,—burned out October 9, 1871; rebuilt to December 1, 1872; and October 14, 1877; re-built December 1, 1877. The present building of Chicago after the great fire made greater pretensions toward improved elevators, and as the demand appeared, Mr. Reedy was prepared for it. He added hydraulic elevators to his manufacturing establishment, and has for the last twenty years had a factory in New York City, which is being actively operated at the present time.

JAMES W. Reedy was born at Munster, Ireland, in 1845, and came to Chicago, in 1857, when his father, William Reedy, settled in Cincinnati, Ohio, and commenced attending the public schools, and continued his studies till the age of fifteen, when he began to learn the printer's trade. He became a good compositor, but on account of failure of his sight he was forced to abandon the business. He then became interested, with an elder brother, in the machinery business, and remained in that line for about four years. In 1868, he came to Chicago, and commenced manufacturing hand and steam elevators, in which business he has continued up to the present time. When he first opened business here, elevators were comparatively unknown, and their introduction for years was very gradual, but as Chicago improved, it was, of course, a good market, and he was in a position to meet the demand. He has succeeded in building up a successful enterprise, and takes commendable pride in adding one to the many of this city's valuable industries. He was married in 1864 to Miss Adelia Kelley, whose home was formerly in Newfoundland.

C. I. MITCHELL, manufacturer of improved safety, center-lift elevators, both freight and passenger, has been identified with this now important industry in Chicago since 1875, in which year he established himself here in a small way on Market Street. Remaining at that location a short time, he then removed to No. 39 Wells Street, where he operated a small business. He then commenced a trade extending into nearly every State in the Union, there not being a city or town in the country where his goods are not known and used, even having placed one in a log store in one of the Territories. It is well known that, owing to the rapid growth of large cities, and of the consequent increase in the value of real-estate, many buildings are now erected of such height that, without elevators, they would be practically a failure. Hence they have become one of the most important adjuncts, in this respect, of the progress
HISTORY OF CHICAGO.

Owen Owens is the oldest brass founder in Chicago. Mr. Owens, when he came here in 1843, found no members of his craft in Chicago, save a German named Rinder, who was a bell-maker, but who had no shop, for the reason that in those days the jobs to be done in brass work of any kind, much less the demand for bells, were so few that a man's existence, to be derived from this source, would have been exclusively inartistic. Mr. Owens and Michael Nugent came here together from Liverpool, and began business together in the manufacture of brass and copper work. They constituted the firm of the Owens & Nugent. They also conducted a general jobbing business in all kinds of brass work, as a brass foundry and machine shop were necessary adjuncts in the manufacture of their engines. They built four of the first fire engines that were ever used by the volunteer fire force. They continued this business some five years, when their shops, then located on the corner of Washington and Market streets, were destroyed by fire, leaving both the proprietors practically penniless. The partnership was therefore dissolved, and Mr. Owens removed to Kane County, near Elgin, where he settled on a farm. In 1857, he returned to Chicago and formed a partnership with T. C. Smith & Co., at No. 10 Bast, and Mr. Owens succeeded to the business, which he has since conducted. Shortly afterward he purchased his present premises. On the front of the lot a substantial brick building stood, and Mr. Owens soon erected on the rear workshopped for his business. These buildings were destroyed in the great fire, together with his stock, causing a loss of over $60,000. Mr. Owens at once re-built his workshopped and factory on the rear portion of his lot, which he occupied until a year or so later, when his present buildings were erected. The former was the first business structure roofed and completed after the fire. Mr. Owens himself hauled the water from the river that was used in making the manufacturing vessels. Since the fire he has done a more prosperous business than ever. Mr. Owens is a native of Wales, born in 1817, the son of Robert and Margaret Davis Owens. He was given but a rudimentary education, and at the age of twelve was apprenticed to his father, a brass-founder, in Liverpool. His father dying, he came with his family, and became a manufacturer in 1854, locating at once in this city. Before he started for America, he had purchased a farm in Tennessee, which he sold all over the world, which was about $1,500 an acre; and his first payment of twenty per cent. of this price, he had paid into the hands of the American Consul at Liverpool. On his arrival in New York he was surprised to learn that it would cost him what the land was worth to get it to Tennessee. He gave up his Tennessee farm and concluded to try his fortunes in Chicago. Mr. Owens married, in 1842, Miss Ann Grant, and has four children,—Margaret, Robert, Mary, now the wife of A. Robbins, of this city, and Joseph.

The L. Wolff Manufacturing Company was established on June 17, 1855, by Ludwig Wolff and Terence McGuire, under the firm name of McCurdy & Wolff. Their first place of business was in the Tremont House alley and in the rear of No. 75 Lake street. Mr. Wolff was a copper-smith by trade, and his partner a plumber. They employed no hands but an apprentice boy, and for the first year had even the building of their new place. Their first job in the coppermaking line was to build a small still for Heilman & Wunschke, druggists, at the northwest corner of Lake and Canal streets. Mr. Wolff employed his spare time in building a working model of an alcohol still of an improved kind. This he placed on exhibition at the United States Fair held here in 1856, where it attracted considerable attention and won a diploma, which proved a great benefit to Mr. Wolff, and from thence to his business, which was largely increased and he was soon doing work, not only for customers in Chicago, but all over the West. In March, 1858, he moved to the premises forming a part of his present works, where he erected a three-story building of brick, extending throughout. In 1868, he purchased his partner's interest, and since has been sole proprietor. At the time of the great fire, although escaping directly its ravages, his losses from outstanding accounts amounted to something like $10,000, but owing to that event, there was almost a water famine in the city. Mr. Wolff had two large copper tanks on the sidewalks in front of his works, and also in his premises two huge cisterns, which he had built in order to have water with which to run his engines in case of any emergency. These, at the time mentioned, were filled with excellent water, which he put into the tanks on the sidewalks, for the benefit of the public generally, until the city water works were again in operation. In 1879, Mr. Wolff purchased the ground immediately adjoining him on the east, and, in 1881, erected a commodious five-story brick building, which now forms part of his works. In 1882, he erected his present spacious and handsome five-story office and salesroom building. The L. Wolff Manufacturing Company now has one of the largest copper and brass foundries and reservoir establishments in the West. The Company employs some three hundred hands and manufacturers of copper and brass work, including supplies and apparatus for brewers, distillers, candy-makers, and plumbers; also stoves, furnaces, and gas-fitters, materials, their stoves, furnaces, and gas-fitters, materials, their stoves, furnaces, and gas-fitters,

---

BRASS AND COPPER FOUNDERS.

Ludwig Wolff was born in Bieckenenate, Schoen, Germany, on March 11, 1836, the son of John and Christina (Severt) Wolff. He was given a good education, attending school until his fourth year, when he commenced work, and continued until the age of twenty. He then engaged in the trade of a coppersmith, serving four years; during which time he attended night schools, and further perfected himself in his studies. In 1854, his parents came to this country and located in the West. Shortly after their arrival, Mr. Wolff, leaving five children living, of whom Ludwig was the oldest, He at once obtained work from the old firm of Thomas George & Co.
THE IRON TRADE.

Mr. Wolf went to work for the firm of Nugent & Owens. During the winter of 1842-43, the times were very dull and it was difficult to obtain work. Not being willing to remain idle, Mr. Wolf went into Macosquin County, Ill., where he obtained employment from a farmer, at two dollars a week, and his board. He gladly accepted it, and worked three months. In the spring of 1854, he returned to Chicago, where a little later he formed the business he has since conducted. Mr. Wolf mar-
ried, in 1856, Miss Elizabeth Kelles, daughter of John Kelles, of Du Page County. This lady died in 1876, leaving seven children, — Maria, wife of William Bunge, of this city; John F. and Chris-
this, their father's two eldest sons; and Charles J., Gertrude, Louis and Ludwig, Jr. Mr. Wolf was married a second time, to Miss Sophie Hoelscher, of Elgin, III.; they have one son, Frederick.

The L. S. BALDWIN MANUFACTURING COMPANY was organ-
ized on January 20, 1855, under the laws of the State of Illinois, with a capital stock of $85,000. The officers are L. S. Baldwin, president, and John S. Way, secretary and treasurer. The busi-
ness consists in the manufacture and sale of a variety of bronze and brass goods; of electrical and mechanical house and elevator bells and burglar alarms; of speaking tubes, electric annunciators, and of iron and plated window sash, office rail and bank wicket. The originator of this business was D. A. Foote, one of Chicago's early settlers, who founded it about 1849, and, after carrying on the business successfully for nearly twenty years, retired in 1866, selling out to Mr. Baldwin, the present head of the firm. Mr. Foote was at this time conducted at No. 108 Randolph, but was shortly afterward removed to No. 6 Washington Street. Soon after the sale of the business to Mr. Baldwin, Mr. Baldwin associated with him Fred P. Richardson. In the following year, Mr. Richardson, having returned to the service of his former firm, Mr. Baldwin sold out to them, and they went on with the business under the name of McKnight & Richardson. Two years afterward this firm failed, and Mr. Baldwin stepped forward and bought whatever machinery and tools they had in the house, and with his skill and knowledge of the business soon re-established matters on a sound footing.

Lewis Sherman Baldwin, the president of the company, was born in Brockfield, Conn., on April 9, 1818. He is the son of a sturdy New England farmer and was raised on a farm. He made the best use he could of the limited school facilities available, attending only during winter, for in summer he was needed on the farm. At the age of fifteen, it was determined he should learn a trade. So he went to Bridgeport, in Connecticut, where he was regularly boarded out as an apprentice to the firm of Lewis, Wheeler & Kippin, to learn the trade of brass-founder and finisher and gold and silver plater. In those days the brass founders were allowed to stamp of its English origin and was very strict. Mr. Baldwin relates that he remembers particularly one clause of his indentures, a 2/3 royalty on any invention, which was preserved, in which he is to "go a courting" or "to visit saloons." On reaching the age of twenty-one, he took what was then considered a trip to the West, going to Rochester, N. Y., and travelling a greater part of the way on a packet on the Erie Canal. Arriving in that city he engaged for a year in the carriage-making establishment of Kerr, Cunningham & Co. He then went to the little town of LeRoy in the same county (Genesee, N. Y.) where he bought out a silver plating establishment. For twenty years Mr. Baldwin carried on a business in LeRoy. But on the outbreak of the Civil War he gave this up for the time being, and engaged in suttering with the Army, being chiefly at Covalescent Camp, near Alexandria, Va., where he remained until the close of the War. Returning to LeRoy, he engaged for a year in the produce business. He then moved to Niles, Mich., where, until 1866, he kept a hotel. In the spring of 1867, he moved to Chicago, and, meeting his knowledge of the iron work in his trade, he bought out the brass-founding and electro-plating establishment of one of Chicago's early settlers, D. A. Foote. This business, through various changes of partners, has been going on ever since. In the year 1866 the present company was organized, with Mr. Baldwin at its head as president. He was married on October 13, 1841, to Miss Caroline Webb, of LeRoy, N. Y. They have one son, Lewis J. Bald-

The company has been in continuous existence, either under his direction or that of L. S. Baldwin and his associates, ever since, and Mr. Tripp has been continuously identified with it as apprentice, partner, and now as the superintendent of the present stock company, having worked his way up the ladder through persistent industry during twenty years. Mr. Tripp was a member of Imperial Order of Red Men, both Chicago lodges.

The CHICAGO JOURNAL-BEARING WORKS were established in 1875, by A. V. Pitts, the business then conducted under the firm of A. V. Pitts & Co., at 24 South Jefferson Street. The works remained there until 1879, when they were removed to Nos. 7-9 on the same thoroughfare. In 1883, Mr. Pitts, who is a son of H. A. Pitts, the well-known manufacturer of threshing machines and also an early settler of Chicago, relinquished his interest in the business, to give his entire time and attention to the extensive manufacturing interests founded by his father, which at his death had fallen to his sons to continue. At that time Frank R. Cargill, who had been in the employ of A. V. Pitts for seven years, became, with others, the proprietors of the works, and shortly afterward the name was changed to its present form, that of the Chicago Journal-Bearing Works, Frank H. Cargill & Co., proprietors. These works, which were conducted, these works are devoted to the manufacture of Rabbit metals, brass and bronze castings of all kinds, and of railroad journal-bearings. In the latter line, a specialty is made of manufacture of a small device which is meeting with much favor from railroad men wherever it has been introduced. This bearing is the invention of Mr. Cargill, having been patented by him in 1883. In the manufacture of brass castings of all kinds, these works have unusual facilities, being now so well arranged and equipped in every particular, that they have the largest capacity, not only of any brass foundry in the world, but also of any in the West. To Mr. Cargill, who has been connected with these works since their founding, and who, during much of the time since, has had their management and control, is largely due the success which has attended the enterprise from the first.

F RANK R. CARGILL was born at Detroit, Mich., in 1856, the son of Oscar F. and Harriet N. Cargill. In 1861, his parents removed to this city, which has since been his home. In 1875, he entered the employ of A. V. Pitts, as office boy, remaining with the firm until 1881. He was successively promoted from one position to another, and was finally given charge of the business of which he is now one of the proprietors. In addition to the invention which we have already spoken, Mr. Cargill, in company with W. V. Kent, has lately brought into use another, as novel as it is original. This is a metallic tiling, designed for floors in private or public edifices, and to take the place of marble or other costly material. Its perfection, as an invention, is the result of years of patient and ceaseless labor, and is such that it is now a large article of commerce, and is manufactured at the Cargill works, under the trade name of "Electric Silver Floor," and is made of a composition of metal greatly resembling silver in its appearance. It is capable of taking the same polish as an ordinary marble floor, and is not only resistant to dampness or exposure to the weather. This invention has already been brought to the notice of many prominent builders, architects and owners of public buildings, who have expressed their unqualified opinion as to its very practical character and of their belief in its ultimate success.

G OETZ & BRADA.—The business now conducted by this firm was established, in 1878, by Fritz Goetz, H. Bosche and A. Ilume, under the firm name and style of Goetz, Busche & Co., the place of business then being at No. 65 Dearborn Avenue. In 1881, a removal was made to Nos. 18-20 Michigan Street, where they have erected their present fine business house, and Fritz Goetz and Ilume retired from the firm, Charles Brada succeeding to their interest in the business, which has since been conducted under the present name. This firm manufactures all kinds of copper and brass work on a large scale, however, of brewers' materials and supplies of every description.

Fritz Goetz was born at Milwaukee, Wis., in 1850, the son of John Goetz, a carpenter and builder by occupation. Mr. Goetz, in 1867, came to Milwaukee, and in 1872, as a lad of 14, he came to Chicago, where he remained until 1881, when he moved to Milwaukee, and in 1888, he moved to Chicago, where he has since resided. Fritz came to Chicago in 1869, and soon after engaged in the produce commission trade on South Water Street, as a partner in the firm of O. F. Emerson & Co., but was then associated with C. Kathol, in the manufacture of brass goods and electro-plating, and lastly conducted the business, and, in 1878, started a shop with the gentlemen already mentioned, on his own account. Mr. Goetz married, in 1876, Miss Emma Kattendidt, daughter of Jacob Kattendidt, a well-known manufacturer of copper and brass exporting metal merchants. They have four children,—Fritz, Jr., Arthur, Ada and Walter. Charles Brada is a native of Bohemia. He came to Chicago.
in 1872, and worked as foreman for C. Kattendick, copper smith, until 1881, when he became associated in his present business with Mr. Goetz.

**George P. Harris & Brother.—These works were established by George P. Harris, who in 1881, by George P. Harris, and Arthur Harris, and have already taken rank among our important industrial institutions. In addition to doing all sorts of jobbing work in copper, tin and sheet iron, they also are manufacturers of tin and sheet iron, as well as large and small dies,也有 heavy bronze and brass casings of all kinds. They employ about twenty men, and have the satisfaction of seeing their large orders put into execution, to the present time.

**George P. Harris was born at Maidstone, County of Kent, England, on March 9, 1855. He is the son of John F. and Sarah (nee Allen) Harris, who were among the early manufacturers in this line in Chicago, and he remained with Fuller & Smeeth and Edward Smeeth for thirty years. During the greater part of this time he had the complete control of the business, Mr. Harris the superintendent of Mr. Smeeth's works, and, after that gentleman's death, in January, 1886, he began to do the business alone, which he did for nearly a year. Then W. H. Preble became a partner, at the time the firm assumed its present style, E. T. Harris & Co. About twelve months later they were burned-out, losing all but a very small amount of its stock; this sum was afterwards taken over by Mr. Harris to continue the business, and he has since continued it, now and then, with the addition of a few men, but almost immediately resumed business at No. 27 North Clark Street, where the business was conducted until 1881, when it was removed to $200 West Monroe Street. It has been in operation here ever since, and has since had no connection with it. There have also been many changes in the character of the business, although it has continued to be conducted by the same firm, and has grown in its development. At first the works were confined to the manufacture of nickel store-trimmings and ornaments. In 1879, they began to do a general jobbing trade, and also to make goods for manufacturers, and they built a large factory in this business, and, in 1881, sold this hardware had been added. In the fall of 1882, a brass-foundry was put in, which has been manufactured as has been the manufacture of artistic metal work in bronze, brass and iron. In March, 1883, a stock company was formed, of which the officers are as follows: E. T. Harris, president; F. L. Brooks, secretary; E. T. Harris, treasurer, and C. E. Smith, superintendent. As illustrated by the character of the business, it is to be stated that a man and a boy were employed; now, an average of one hundred hands are required, while the yearly transactions range from $100,000 to $150,000.

**W. W. Wilcox, manufacturer of railway and hotel baggage checks, badges, steel stamps, steel dies, plates, and is also a general engraver, came to Chicago in 1872, and established himself in business, in a small way, at No. 145 West Van Buren Street. He remained at that location nearly three years, removing then to No. 88 Lake Street, and in 1881, to No. 121 on the same thoroughfare. As has already been stated, Mr. Wilcox started in a modest way, but each year his business increased, until his business was large enough to enable him to establish a large factory and to continue his business. He is now located at 500 LaSalle Avenue, and there he now resides. He was married at Valparaiso, Ind., in 1865, to Miss Emma F. Smith, and has six children,—Alice L., and Hollis B.

**The Chicago Chain Works were established here in 1873, by S. G. Taylor, the present proprietor. His location has from the first been at No. 98-100 Indiana Street. About thirty men are employed, and all kinds of chain made, and its quality is made, however, of the manufacture of metal and some chains, also of all kinds of chain and sprocket-wheel chains. Their trade is in these, as well as in all other goods turned out, is rapidly increasing, their reputation by that of the goods of any other house in this line of manufacture.

**S. G. Taylor was born at Philipsgate, Canada, in 1829.
LEAD PIPE.

J. N. RAYMOND.—Lead has long been an important factor in many of the manufacturing arts, and, as such, it becomes a commodity. In the handling of which large sums of money are invested. Many of the silver mines that come to Chicago have been worked for various purposes by builders and plumbers, and in certain branches of manufacture. There are but few houses in this city engaged in the manufacture of lead in its different forms, and of all the lead-pipe and sheet-lead works of J. N. Raymond rank among the largest in this city, and in the West. He came here in 1850, from Detroit, Mich., where he had been in the same line of business for four years previous, but having already a growing trade, and desiring to be located in a city having better advantages as a distributing center, he removed his business to Chicago. At Nos. 55-57 West Lake Street, he has extensive works, and manufactures lead in its various forms: also solder, babbitt metal, block tin pipe, and all sorts of specialties in lead. He also manufactures a patent compressed lead drainage pipe, which, although but recently introduced, has marked success in the trade and at the hands of builders wherever used. In this manufacturing department of his business Mr. Raymond employs about twenty-five men, while he also does a large wholesale trade in pig-lead, pig-tin, spelter and anodes. For a few years that he has been in Chicago he has built up a trade which extends throughout the entire West, doing some business in the Southern States. Mr. Raymond was born in New York, on October 3, 1837. He came West in 1876, and, for a number of years, in Chicago, Mich., and, in 1876, came to this city, which has since been his home, and where he established the business he has so successfully conducted.

AGRICULTURAL IMPLEMENTS.

The following figures will convey an idea of the growth of this business in Chicago during three decades:

E. S. BRISTOL & GALE.—This firm of wholesale dealers in agricultural implements was established in 1877, by E. S. Bristol and F. M. Gale, under the firm name of E. S. Bristol & Co. The place of business was then, and now, at Nos. 50-52 South Canal Street, and the style of the firm remained unchanged until 1882, when the present style, that of E. S. Bristol & Gale was adopted. When first started, this house did a large commission business, but soon adopted the plan of buying their goods direct from the large manufacturers and then selling them direct to the retail dealers. By doing this, they were enabled to buy cheaper, and thus give better and more satisfactory prices to their customers. They handle all kinds of agricultural implements and farm machinery—nothing, in short, in the way of a tool or utensil required by the farmer or market gardener that they do not carry in stock. Their trade, which has increased nearly tenfold since the establishment of their house, now extends throughout the States and Territories of the Northwest, and is each year developing both in volume and extent of territory covered. Of the men who have thus founded and built up, in so short a time, a house holding so prominent a place among others in the same line of trade, brief personal sketches can not fail to be of interest.

E. S. Bristol was born at London, England, in 1832, the son of Joseph and Mary A. (Conte) Bristol. His parents first came to this country as early as 1858, but soon went back to England, returning again to America, and this time to stay, in 1848. They located in the East, remaining there until 1854, when the family removed to the West and settled on a farm in Livingston County, this State, where they resided until their death. There E. S. was reared, passing his boyhood's days on the farm, and in winter attending the district school of his neighborhood until his nineteenth year. In 1864, Mr. Bristol enlisted as a private in Co., "A," 13th Illinois Infantry Volunteers, which regiment was assigned to the Army of the West under Generals Grant and Sherman, belonging first to the Sixty-seventh and then to the Fifteenth Army Corps. He participated in the battles of Fort Donelson, Shiloh, Corinth, and in the Atlanta Campaign and other engagements, and, with his regiment, accompanied General Sherman on his famous march to the sea. In the meantime, however, it should have been stated, that Mr. Bristol's term of service had expired, but he immediately re-enlisted and served until the close of hostilities, being mustered out in July.
The hardware trade of Chicago prior to the great fire, while reasonably active, had not assumed large proportions. From that date until the present time its growth has been extraordinary. The panic of 1873, of course, exerted a depressing influence upon this branch of trade, as well as every other, not only in this city but in all great commercial centers. As a result of the financial stringency of that year, prices of hardware in Chicago, during 1874, fell off from ten to twenty per cent; the volume of business, however, so increased that the year proved a prosperous one to dealers. Statistics of the manufacture of hardware in Chicago may be found under the heading of the iron industry; it is proposed here to give a succinct statement of the trade's progress from a purely commercial standpoint.

The sales of the regular hardware houses, during 1874, aggregated $6,500,000; and if to this sum be added the sales of houses handling specialties, the total would not greatly vary from $10,000,000. These figures were nearly doubled in 1875.\(^*\) Before the close of the latter year, the city's trade covered a territory bounded by the British possessions on the north, California on the west, and the middle of Texas on the south. In order thoroughly to appreciate the energy and perseverance on the part of Chicago dealers which brought about this result, it is necessary to bear in mind the fact that a steady shrinkage of values (or depreciation in prices) had been in progress since 1872. This depreciation is best illustrated by the subjoined comparison of quotations of some of the leading staples for the years 1872 and 1875.

<table>

</tbody>
</table>

A slight decrease in the price of all these staples occurred during 1876, and increased competition and over-production lowered quotations in every branch of the trade. The volume of business, if measured by dollars and cents, consequently fell off, sales aggregating $18,000,000 as against $20,000,000 in 1875. The amount of capital invested in the business in this city at that time was, in round numbers, about $3,000,000.

Prices continued to fall during 1877, the decline being from five to ten per cent, but the volume of business during the year so far advanced, that the aggregate

\(^*\) This statement regarding the volume of trade embraces sales of shelf, heavy, cabinet, saddlery and carriage hardware, nails, iron and other metals.
sales, even when measured by dollars and cents, showed a decided advance. The year’s sales reached nearly $22,000,000, the greater proportion of which was distributed among the leading branches of the trade, as follows: In shelf hardware, the sales amounted to $12,500,000 on a capital of $1,250,000; in cabinet and carriage hardware, the sales aggregated nearly $4,750,000 in heavy goods and iron, sales reached about $8,500,000 on a capital of about $1,850,000. In the latter department of the trade the demand was unprecedented, a considerable portion of it coming from railroad companies who found it necessary to add largely to their rolling stock, in order to accommodate the constantly increasing transportation of freight to and from the West.

The total sales for 1878 were about the same as those for the year previous, and the distribution of business among the various departments of the trade did not greatly vary. The actual amount of goods sold was increased, but the constant shrinkage of values resulted in no increase in the monetary value of the product handled.

The advance in iron, during 1879, exerted a beneficial influence on the trade. Prices of hardware advanced from twenty-five to thirty per cent., owing to the increased demand, which soon resulted in the disposition of the surplus stocks, while manufacturers found the capacity of their establishments taxed to the utmost before the close of the year. The total sales of all kinds of hardware reached nearly $24,500,000, the business being transacted on a capital of about $6,500,000. All metals augmented in value after July 1, the increase in the market value of iron has been already noted; other striking illustrations are afforded by lead and tin, the former advancing forty-six and the latter eighty per cent. during the year. It is worthy of remark, however, that the direct importations of tin to Chicago were, notwithstanding the rise in price, greater than for several previous years.

An advance in prices stimulated production, and importations were still heavier in 1880. An excess of stocks resulted in a shrinkage of values, and prices declined until they touched a point lower than had been known for many years. All the metals sympathized; pig tin, copper, lead and zinc depreciated in price, and manufactured goods sold correspondingly low. Notwithstanding these disadvantageous circumstances, however, the aggregate sales for 1880 reached nearly $25,000,000, $5,500,000 in excess of those of the preceding year.

During 1881, but little fluctuation in prices occurred, owing to the greater steadiness in the iron and steel market. No specially noteworthy features characterized the year’s business, which was only slightly in advance of that of 1880. The aggregate sales amounted, in round numbers to $31,500,000 distributed among the various branches of the trade in the following proportion:

- Nails and heavy hardware: $9,000,000
- Cabinet hardware: $1,500,000
- Saddle and harness: $1,500,000
- Stoves and hollow ware: $3,500,000
- Household utensils: $3,000,000
- Miscellaneous: $11,000,000

The sales for 1882 were somewhat less than those of 1881, but this may be attributed to a lowering of prices, consequent upon the fall in iron and steel and to a more or less general depression in business. It is worthy of remark, however, that Chicago dealers were pressing those of the East more and more closely. New markets were sought and localities were supplied from this city which, not a decade before, had supposed that there was not and never would be a depot of supplies west of New York.

The year 1883 was a fairly prosperous one in the trade, the aggregate sales reaching about $31,000,000. The consumptive demand was steady, and there was no over-production; in consequence, stocks were kept low and were pretty thoroughly disposed of during the year at remunerative rates.

During the following year (1884), however, over-production once more caused a steady decline in prices. The general feeling of disquiet and uncertainty attendant upon the Presidential election of that year caused a dullness in trade, and some manufacturers who had been steadily increasing their capacity for three years, becoming alarmed, precipitated large stocks upon the market about October 1, thus still further reducing values. The amount of goods actually handled by Chicago dealers, however, was larger than in 1883. It is worthy of note that manufacturers of carriage hardware, after conferring together, formed a pool in the fall, and succeeded in forcing up the prices of their goods, in some instances from twenty to forty per cent.

During 1885, the downward tendency of prices continued, and buyers ordered sparingly. About the same quantity of goods were sold as in 1884, but the receipts of the trade were somewhat less, and the aggregate of profits was small. Carriage hardware constituted the only special exception, the pool formed in 1884 being maintained and prices remaining about the same.

Andrew Ortmary was the head of the extensive concern of A. Ortmary & Son, born at Württemberg, Germany, on May 1, 1826. His father was a saddler, and Andrew was required to assist his parent at the trade after school hours when he was only twelve years of age. At fourteen he left school and devoted his entire time for two years to the shop. He then travelled through Germany and Austria, working at his trade in different towns and cities. In 1847, he returned home and worked with his father for a short time. But the revolutionary disturbances in his country had paralyzed business, and young Ortmary determined to emigrate to America. He landed at New York on July 5, 1850, where he remained three days, when he proceeded to Buffalo, N. Y., and found his first employment with Kohl & Kohr. He served six months with the firm at harness-making, merely for his board and nominal wages. Resolving to come to Chicago, he placed his savings among all his worldly goods, upon the way, and arrived here for this port, which broke his way through the ice in the spring of 1850, and landed at the Chicago pier at sunrise of March 28. He found immediate employment at the carriage shops of J. O. Humphrey, and continued at carriage trimming three years. In 1853, Mr. Humphrey closed out the concern. About this time Mr. Ortmary married Miss Marie Cherbon, a native of Nieder Stetten, Germany. They have four children—Daniel, Caroline, Emma, and Carl. Mr. Ortmary soon established himself, as a trimmer, in a business of his own. He continued his enterprise successfully two years, when he combined it with harness-making, and for nine years pursued the vocation most prosperously at No. 49 West Randolph Street. He sold out his business in 1863, and joined William V. Kay and W. H. Turner in purchasing the saddlery hardware concern of Turner & Sidway, who had carried on a wholesale trade for a number of years at No. 49 Lake Street. The new firm was, known as A. Ortmary & Co., Mr. Ortmary being the only active partner in the concern. In 1870, Mr. Turner sold his interest to S. H. Lewis, and the style of the firm changed to Ortmary, Lewis & Co. The consolidation of 1871 found the head of the house at Nos. 16-18 State Street, where everything the firm possessed was swept out of existence by the flames. Only twenty-five per cent. of its investments were saved. While the fire was still burning, Mr. Ortmary started a shop in an old barn on the West Side, and in a few days a store and factory on West Randolph Street. Seven months later they moved into the new building amid a pile of ruins, on State Street. The very first to return to the block. The firm paid every dollar of indebtedness promptly, and prosperity followed their efforts. In February, 1882, the interest of Mr. Lewis was transferred to C. G. Ortmary, and the firm name is now A. Ortmary & Son.

C. G. Ortmary was born in Chicago in 1856. At the age of...
sixteen he commenced his business life in the manufacture of his father, remaining with him five years. In 1877, he went into the employ of P. Hayden & Co., dealers in saddlery goods. After two years he returned to his father's employ, and, in 1881, became a member of the firm of H. M. Kelley, manufacturer of saddlery goods, on the death of Samuel M. Greenbaum, who had died in 1879. Mr. Hayden was married, on March 13, 1869, to Miss Lizzie Barker Smull, daughter of James Smull, the head of the merchant firm of Greenbaum & Smull, then and long thereafter, de- parted this life in 1875. Miss Emma How, of Chicago, became Mrs. Hayden in 1877.

KELLEY, MAU & CO.—This house was established in Chicago in 1859, by David Kelley, Fred. K. Maxwell and Charles Kelley, under the present firm name of Kelley, Maus & Co. The place of business was then at No. 164 Lake Street, where they re- mained until the spring of 1863, when they moved to 252 Lake Street. The firm of Kelley, Maus & Co., ranks among the largest in this branch of trade in Chicago, and now does a vast and increasing business, which extends over the entire West and Northwest.

David Kelley was born at Conway, N. H., in 1830. At the age of eighteen, he commenced his business life as a clerk in the wholesale grocery and market business. In 1856, he went to Calif- ornia, but engaged in the live-stock business, driving his stock to Stockton and San Francisco, and continued that on for three years. He then returned to Massachusetts, but, in 1859, came to West, Dakota, and engaged in a partnership with Mr. J. C. Kelley, in the live-stock business. In 1861, this partnership, the name of Kelley, Maus & Co., which continued up to 1865. He also purchased the hardware business of C. Washburn, at Davenport, Iowa, and carried it on as the firm of Kelley, Maus & Co. In 1867, he withdrew from this partnership, and went to Chicago and became a member of the firm of Higgins, Kelley, Maus & Co., which continued up to 1869.

Charles B. Kelley, a nephew of the senior member of the firm, has lived in Chicago for the past ten years. Since then he has been connected with the house of which he is now a member.

M. GREENEBAUM'S SONS.—This house was established in 1849, by the father and two sons of Michael Greenebaum, Sr., who came to Chicago in 1846, and for three years worked at his trade of tinner, after which he opened a small hardware store and jobbing firm, and has made numerous and important additions to his business. Michael Greenebaum, Sr., died, 1874, and the firm of M. Greenebaum and Son, immediately after his death, was taken into partnership, the name then being M. & J. Greenebaum. This two years later another brother, Isaac, was admitted to the firm, the name of which was changed to M. Greenebaum & Co. In 1856, they moved to No. 222 East Randolph. In 1861, Michael and Isaac withdrew from the partnership leaving Jacob to continue the business alone, which he did, still retaining the firm name of M. Greenebaum & Co. In 1869, he bought out his interest, and became the entire owner of the firm. Michael Greenebaum established himself in the tin-shop and plumbing business at No. 168 Clark Street, and later at No. 181 on the same thoroughfare; in 1865, removing to No. 165 Randolph Street, where he built up a prosperous trade. In 1869, he sold out his business and went abroad, remaining the greater portion of that year. On his return he became a member of the firm of Henry Greenebaum & Co., bankers. His connection with this firm lasted until the fire of 1871. In September of that year, Jacob Greenebaum died, and Michael Greenebaum, with Jacob Livingston, purchased the estate of his brother and continued the business under the firm name of Henry Greenebaum & Co. While Mr. Greenebaum and his partner were invoicing their newly purchased stock, the fire of October swept it out of existence; leaving them to collect the face value of the goods, which had turned to ashes in their hands. Immediately after the fire, they established themselves on the West Side, at No. 169 Randolph Street. In 1874, owing to the financial depression of the times and to the fact that Mr. Greenebaum, Sr., had died, they were often hard pressed for money by their brother merchants, by honoring what are known as "accommodation acceptances," he found his own business so seriously crippled that he turned it over to his creditors, by whom he was selected to continue it as best edges their interest. This loss of confidence in Mr. Greenebaum he showed himself entirely worthy of, by getting his affairs into their former prosperous condition. In 1885, concluding to retire from an active business life, he disposed of his interest to his eldest sons, Moses and Henry, who

Columbus, St. Louis, Detroit and Chicago, is a piece of his inge- nius and is one of the most striking commercial advertisements connected with the trade. Mr. Hayden is interested in each of the sixteen establishments of the P. Hayden Company, which became an incorporated firm in January, 1881, and is regarded by the public as one of the ablest business men in the West. Mr. Hayden was married, on May 13, 1869, to Miss Annie Barker Smull, daughter of James Smull, the head of the merchant firm of M. & J. Greenebaum, and has a large family. He died, at this place, January 18, 1889, after a long illness, of a disease which had troubled him for several years.

Mr. J. C. Kelley, the younger brother of the late firm, was born, in 1850, in West, Conn., and was finished in the schools of that place, being a member of the class of 1867, in the New Milford, Conn., Military Academy one year. In 1861, he entered Kenyon College, and graduated with honors as Master of Arts in the class of 1869. Immediately after his graduation, he became a member of the firm of P. Hayden & Co., of Newark, N. J., manufacturers of brass goods. The firm had in their employ a man by the name of Henson, who possessed the secret of manufacturing plated metal ware for the receptacles of hack lamps, coffin ornaments, etc., and as the firm was the only producer of these goods in America, Henson demanded, and received, an enormous salary for his work. The method of making this metal was unknown elsewhere, save in Germany, and the fact that he had this secret to learn determined Mr. Hayden to solve the mystery. All attempts to persuade Henson to divulge the pro- cess, he was discharged, and Mr. Hayden set to work on the task of discovering the method of its manufacture. His scien- tific knowledge was brought to bear upon the work, foreign books were perused over, experiment after experiment was tried, and all to the end of finding the remedy. To save the time and labor of silver and a brick of copper, so that they might be rolled out together into a long wide sheet of plated metal meant a fortune, and the world's gaining another step in the combination of metals. He was able to plate copper, occasionally producing a small quantity of ornate material, but all attempts toward wholesale lots were invariably unsuccessful. One day, while pondering over the engi- neering mechanism, which had worked in Germany for a num- ber of years in a plating establishment, accidentally came into the workrooms where Mr. Hayden was engaged, noticed the work he had before him and remarked that he had formerly been engaged in the same occupation in a German firm. The plates were made by Mr. Hayden, and in less than twelve hours the secret was known which resulted in the production of the finest plated metal in the world in desired quantities. In his degree essay before the Kenyon College Mr. Hayden stated the results of his labors. This paper attracted universal attention and made a decided stir in the metal world, giving him the prestige of an expert whose practical knowledge possesses the weight of authority. The Hayden is finer and of more commercial value than the softer German product, and is now in great demand by all manufacturers in this country and foreign establishments. Mr. Hayden, in the process of the production of the metal, invented a method to create a monopoly of the method which cost him so much labor. In May, 1877, after a stay of nine years in Newark, he came to this city and obtained the entire control of the Chicago branch of P. Hayden & Co.'s saddlery goods, and has since then been identified with our business and social interests. It was through his enterprise and encouragement that the Chicago Acad- emy of Fine Arts was founded and its present condition. With the assistance of Charles L. Hutchinson he raised $60,000 by subscription among our citizens, and tendered the amount to the Academy, thus placing it beyond the possibility of failure. The present excel- lence and fine condition of the First Regiment is due to his en- ergic action in obtaining a state subscription to secure a certain amount for expenses, and from the impetus thus given that organi- zation their present army resulted, and a future edifice, ringing with the names of the foremost citizens of our city, is now contemplated. The structure known as the Exposition building was erected solely by a subscription of nearly $90,000 secured by Mr. Hayden. He was chosen chairman of the Republican Convention which nominated the lamented President Garfield, and was also honored by being appointed, by Mayor Harrison, chairman of the finances of the memori- al monument committee appointed upon his burial. In 1891, he was nominated, by one of the largest and most powerful conventions in the country, for the position of United States Senator, by the following Ex-President: R. B. Hayes, as trustee of Kenyon College, and was re-nominated by a clear majority over several prominent gentlemen in May, 1891. He resigned this office in favor of N. G. Kendrick, of Chicago. Mr. Hayden is the originator of the tile paving material which has proved so satisfactory on several of our heavy traffic streets, and has recently introduced the fire-proof tile which bears absolute guarantee against fire in any place where used. For several years he was actively engaged in promote the welfare of the celebrated Beethoven Club, and served as a vice-president and president of that organization. The unique trade-mark of a flying black eagle carried on the front of his house at the corner of Illinois and a bit in its book, used by the P. Hayden & Son's houses at Columbus, St. Louis, Detroit and Chicago, is a piece of his inge-
MEDICAL HISTORY.

The advance of medical science has been nowhere more gratifying and encouraging, during the last fourteen years, than in this city. Established colleges and hospitals have enjoyed a satisfactory degree of prosperity, and new ones have been inaugurated on a permanent and successful basis. "The science of medicine," it has been said, "is eminently progressive; it advances on the ruins of old notions, of old beliefs."

Its history is a record of changes wrought by the hand of experience and investigation; and, while it is true that the percentage of deaths from scirrhotina, diphteria, and other zymotic diseases has been on the increase for the past few years, it is also a fact that the ratio of deaths to the population in the city, from all diseases, for the last thirteen years has been steadily diminished. It is owing to the wider dissemination of sanitary knowledge, backed by the intelligent and persistent efforts of the medical profession that our public health has been improved, noxious manufactories regulated, and better ventilation secured for our lodging-houses and dwellings.

The physician and surgeon are a continual menace to disease and accident in all their forms, and by their ministrations render possible the aim and aspiration of the heathen philosopher, "mens sana in corpore sano."

The number of physicians in Chicago, each year since 1872, as nearly as can be ascertained, was as follows: 1873, 506; 1874, 615; 1875, 650; 1876, 750; 1877, 825; 1878, 875; 1879, 900; 1880, 975; 1881, 1,025; 1882, 1,075; 1883, 1,120; 1884, 1,250; 1885, 1,375.

RUSH MEDICAL COLLEGE.—"Fire," says Professor Allen, "the good servant but bad master, like Aladdin's genius when the charm was broken, assumed its terrible supremacy, and on that fatal October night we all remember, one of our number, looking across to the sea of flame from a distant height, saw the walls and the roof lapped by fire; and then the crash came; a column of blazing gases and lurid smoke rose upward and burst forth in a single huge burst from the basement; then, that ruin and shapeless heap," of what was Rush Medical College.

Three days after the fire, several having returned, lectures re-commenced in the amphitheatre of
the old County Hospital. A temporary building was erected on the grounds of the hospital, known as the "Eighteenth-street Tabernacle," in which succeeding sessions were held until 1876. In 1875, a lot on the corner of West Harrison and Wood streets was purchased for $11,000, upon which was constructed the new building, at a cost of $13,000, nearly all contributed by members of the faculty. The building is complete in its provisions for every department of medical instruction. Being located near the Cook County Hospital, the clinical department of instruction has uncalled advantages. The anatomical and physiological departments are furnished with large rooms, supplied with all the modern conveniences and improvements.

The faculty of this college (since 1871-72) has been as follows:

- Professor of anatomy and surgery: Moses Gunn, 1866-85.
- Professor of chemistry and toxicology: Henry M. Lyman, 1871-77; Walter S. Haines, 1877-85.
- Professor of theory and practice: J. Adams Allen, 1879-85 (President of the College).
- Professor of obstetrics: DeLaskie Miller, 1889-85.
- Professor of anatomy: R. L. Ken, 1879-75; Charles T. Parkes, 1875-85.
- Professor of hygiene, etc.: Norman Bridge, 1882-85.
- Professor of physiology and diseases of the nervous system: Joseph W. Freer, 1864-77; Henry M. Lyman, 1877-85.
- Professor of materia medica and medical jurisprudence: James H. Etheridge, 1871-85 (Secretary of the College).
- Professor of gynecology: William H. Hydord, 1879-85.
- Professor of clinical medicine and diseases of the chest: Joseph P. Ross, 1868-85.
- Professor of skin and venereal diseases: James N. Hyde, 1879-85.
- Professor of pathological histology: Isaac N. Danforth, 1881-82.
- Professor of orthopedic surgery: John E. Owens, 1876-82.
- Professor of physiology, etc.: James N. Hyde, 1879-85.
- President: James H. Etheridge, 1879-85 (vice-president since 1882); Hon. Grant Goodrich, 1843 (secretary): Moses Gunn, M.D., 1871 (treasurer since 1877); Henry M. Lyman, M.D., 1871 (assistant secretary, 1876); J. Adams Allen, M.D., 1871; Edward L. Holmes, M.D., 1871; DeLaskie Miller, M.D., 1871; James H. Etheridge, M.D., 1876; Charles T. Parkes, M.D., 1871; R. C. Hamili, M.D., 1876; Hon. John C. Haines, 1877. 

The number of students and graduates each year since 1871-72, are shown in the following table:

EUGENE S. TALBOT was born on March 8, 1848, at Sharon, Mass., and received his education at the Stoughtonham Institute in that State, graduating in 1862. He then went to the machine shop at the Charlestown Navy Yard, where he remained three years learning the trade of a machinist. In 1867, he went into the locomotive works of the Philadelphia Railways at Philadelp-phia, where he remained until the latter part of 1868, when he came to Chicago, and worked at his trade three years with Crane Brothers. He then returned to Philadelphia, and attended a two years' course at the Pennsylvania Hospital College of Dental Surgery, graduating in 1873, with the degree of D.D.S. While studying there, he also attended a course of lectures on anatomy at Keen's School of Medicine in Philadelphia, receiving a diploma from that institution. He then returned to Chicago, and practiced dentistry till 1880. In 1880, he retired from practice, and attended, for two years, the lectures at Rush Medical College, Chicago, graduating therefrom in 1882, afterward returning to the practice of dentistry. Dr. Talbot is professor of dental surgery in the Woman's Medical College, also lecturer on dental surgery, and physiology at Rush Medical College. He is a member of the American Medical Association, the American Dental Association, local dental and medical societies, and honorary member of the Society for the Advancement of Oral Science in Boston. On September 17, 1876, he married Miss Flora Estey, of Chicago; they have two children,—Eugene and Florence E.

JOHN SIMPSON, M. D., son of Thomas and Mary Simpson, of Lothian, Yorkshire, England, was born on November 23, 1838, when he was seven years of age his parents came to this country and located at Springfield, Ohio, where they remained until 1849, when they settled in Appleton, Wis. While there, he attended the public schools, and passed through the high school. After one year in the printing business at Fond du Lac, he entered a four years' course in the University of Wisconsin, and was graduated at the age of twenty-one, having served several years in agricultural pursuits at Rosendale, Wis., afterward taking charge of the extensive estate of Hon. Bertine Pinkey for two years. He returned to Appleton, and, in 1861, entered the 47th Illinois Volunteer Infantry, and was appointed hospital steward, which was followed by an appointment to the position of assistant surgeon, in which capacity he served two years. Immediately after his discharge from the service, in 1866, having served a year after the close of the War, he began the study of medicine, and matriculated in Rush Medical College, from which institution he took his degree of Doctor of Medicine with the class of 1869. After graduating, he was appointed dispensary physician to Rush Medical College. He has since resided in Chicago, and is recognized by the public and profession as one of the leading physicians of the Northwest. Dr. Simpson was married on July 4, 1866, to Miss Emily Gled, of Appleton, Wis., and has four children,—Carrie E., Lulu, Effie and Bertine B.

HENRY OOLSEN, M. D., the oldest of the children of George W. and Electa Ogden, of Milton, Wis., was born on May 9, 1843. His father moved to Milton from Walton, N. Y., in 1836, and was among the pioneers who settled that portion of Wisconsin. He spent his boyhood assisting his father in farming and attending the district schools. At the age of eighteen, he entered Milton College, but before his course of study was finished, he enlisted in the 40th Wisconsin Infantry. His command was sent to Memphis, where it remained during the summer of 1864, when it was mustered out. He returned to Milton, and taught in one room, enlisting again in the 40th Wisconsin Infantry, and saw active service in the Department of Missouri, until the close of the War. Returning to the school-room, he taught two years and then entered the First National Bank of Milton, as bookkeeper, afterwards acting as assistant cashier, where he remained until 1877. At the expiration of that time he began the study of medicine, under the
was born at Driburg, Westphalia, Germany, in 1843. When he had attained a suitable age he went to Paderborn, Westphalia, and entered the gymnasium, where he remained for nine years, taking a classical course. At the close of his academic career, in 1862, he emigrated to this country, and settled in Pittsburgh, Penn. He there began a course of study of the English language in St. Michael's College. Two years later he went to St. Paul, Minn., where he secured the position of professor of languages in the Episcopal Seminary. In 1867, he relinquished his professorship, and went to Baltimore, Md., entering St. Mary's Seminary in that city, where he finished a three-years' course in philosophy. In 1870, he came to Chicago and commenced to study medicine. In 1873, he matriculated, and, in 1876, graduated from Rush Medical College. At the close of his course he was elected assistant demonstrator of anatomy in his Alma Mater, in conjunction with which he began the practice of his profession. Some time prior to his graduation he had decided upon a European tour for the purpose of enlarging his knowledge of medicine and surgery. In the latter part of 1877 he severed his connection with the college, and left for Europe. He remained a year in Berlin and a year in Vienna. In 1879, having undergone a thorough course of study in these cities, he returned to America. Locating in Chicago, he entered at once upon his duties as a physician. Dr. Venn is a gentleman of exceptional educational attainments, a scientist and a linguist. In political affairs he is a Republican. He was married in this city on January 28, 1880, to Louise Dinet, and has had three children, two sons and a daughter.

WILLIAM HENRY TAYLOR, M.D., son of Zebulon B. and Harriet W. Taylor, was born at Oshkosh, Wis., on August 18, 1856. Zebulon B. Taylor is of English descent, and comes from the Puritan stock of Massachusetts, also the native State of his wife. He came West in 1855, and located temporarily at Roseau, Ill., but removed to Oshkosh in 1856, as the prospects of that city at that time were flattering. He remained there, engaged in the broom-corn business, until 1861, when he came to this city. From 1865 to 1877, he was known as one of the heaviest dealers in broom-corn in the West. The conflagration of 1871, and the panic, three years later, bore heavily upon him, but with characteristic energy he soon recovered his losses. He moved to New Tacoma, Wash., in 1882. Dr. Taylor spent his boyhood in this city, and his first school days were in the Franklin School, from which he received a diploma in 1871. He then attended the Williston Seminary, East Hampton, Mass., where he remained three years and graduated. In 1874, he entered Yale College, graduating in 1878. In the same year he began the study of medicine with Dr. F. L. Wadsworth as preceptor, and matriculated in Rush Medical College, taking his degree as Doctor of Medicine in 1881. Before graduating, he was demonstrator of chemistry two years, and since that time has resided in this city, engaged in active practice.

THOMAS JEFFERSON SHAW, M.D., son of Daniel and Julia Shaw, of Kingsbury, Ind., was born on July 20, 1841. His parents were formerly of New York, moving West in 1839, and finally settling in LaPorte, Ind. Daniel Shaw is widely known as a contractor and builder, and is highly esteemed in the social and business circles of LaPorte. Mrs. Shaw is a lineal descendant of John Fillinton, one of the Puritan passengers of the historical "Mayflower." He spent his boyhood days with his parents, and attended school until nineteen years of age, when he spent three years assisting his father in farming. He then attended lectures at the Valparaiso (Ind.) College. Shortly after he was appointed to the warden's staff of assistants of the Northern Indiana State Prison, at Michigan City. During his stay there he began the study of medicine under the guidance of Dr. W. R. Godfrey, and became known as an assistant of the prison. In 1877, he came to this city, and after attending lectures at Rush Medical College, took his degree as Doctor of Medicine. Since 1880, he has occupied the position of assistant demonstrator of anatomy of this institution, and also is clinical assistant to the chair of gynecology. He is a doctor of the A.P. & A.M., and is also a Royal Arch Mason. Dr. Shaw was married, on September 9, 1865, to Miss Besie Donley, of LaPorte, Ind., and has two children,—Don Lee and Julia E. JOSEPH OTTO, M.D., was born at Sottrum, Hanover, Germany, on March 20, 1824, the son of 200, a well-known builder of that city, who was recognized as one of its most worthy and substantial citizens. Until he was eighteen years of age he attended the public schools of Sottrum, and then was prepared for the gymnasium, during the next four years, at Hildesheim. In 1852, he entered the University of Gottingen, where he remained two years, and came to this city in 1855. During the succeeding eight years, he was engaged in the drug business. In 1862, he matriculated in the Rush Medical College, and took his degree as Doctor of Medicine, in the class of 1865, since which time he has resided in this city, and has been in active practice. Dr. Otto was married in August, 1846, to Miss Anna Sanders, of Jerze, the Province of Brunswick, Germany, and has three children,—Julius, Emil and Anna.

BERT BERT is the son of Frederick William and Amalia (Fischer) Bert, and was born in Hamburg, Germany, on June 17, 1840. When he was in his thirteenth year, he entered the Johannenrn (high-school) of Hamburg, where he took a classical course of seven years. In 1861, he matriculated at the University of Jena, where he commenced the special studies of medicine. The following year he changed to the University of Gottingen, from which institution he graduated as a doctor of medicine on December 23, 1864. His principal teachers were Professors Herren Hasse, Baum and Schwarz, all of them connected with the Royal Hospital of Gottingen, where Dr. Bert commenced his career as a physician. In August, 1864, he finished his medical examination at Hamburg successfully, and was immediately invited to the post of a physician to the General Hospital of Hamburg, the second largest institution of its kind in Europe, for three years. He occupied this responsible position in a manner that reflected credit upon him. After practicing a short time as a private physician in his native city, he sought the shores of the New World, arriving in this country on May 11, 1869. He staid briefly in the city, and then entered at once upon his professional career. He commenced business in the medical and professional matters. Dr. Bert is a scholarly gentleman, an entertaining conversationalist, and a physician of great experience, whose opinion as a medical expert has been often sought for by the
HISTORY OF CHICAGO.

courts. He has been a member of the Chicago Medical Society since 1869. Dr. Hess was married, at Hoboken, N. J., on May 13, 1851, to Dr. Hess, of Bergen, Norway, was born on May 22, 1851. He spent his earlier years in a private academy at his birthplace, and when thirteen years of age came with his parents to this city. After attending school several years, he entered Bryant & Stratton's Business College, and received private instruction in modern languages and natural sciences. He then began the study of medicine under the direction of Dr. L. W. Case, and matriculated in Rush Medical College, in 1860. After the fire, he was appointed interne of the North Star dispensary. He graduated as M.D. in the class of 1873, and was made county visiting physician, which position he filled three years. During the small-pox epidemic of 1873, he was appointed physician of the dispensary, and since that time has been engaged in general practice. Dr. Hess was married on March 5, 1874, to Miss Emma Gilbert, of Manitowoc, Wis., who died after giving him a daughter, Flora. His present wife was Miss Emma Greenfield of Chicago, whom he married in 1882.

WILLIAM T. BELFIELD, physician and surgeon, was born at St. Louis, Mo., on June 15, 1851. While he was quite young, his family moved to Des Moines, Iowa, and when he was eight years old they came to Chicago. He attended the public schools here, and when he was seventeen years of age was the valedictorian of the graduating class at the Central High School. In 1870, he took the scientific course at the University of Michigan, and, completing that in 1872, he took a position as teacher in the Central High School of this city, where he continued for about four years. During his leisure hours he studied medicine, graduating from Rush Medical College, in 1872, with the highest honors. For a year and a half thereafter, he was resident physician to the Cook County Hospital; then, in accordance with a long cherished desire, he departed for Europe to further prosecute his medical studies. He passed some time at the universities of Vienna, Leipzig, Berlin, Paris and London, and was absent for about three years. On his return to America, he was at once placed prominently before the medical fraternity of the whole country. When he reached New York City, he was invited to deliver a course before the Alumni Association of the College of Physicians and Surgeons. The "Cartwright Lectures" are delivered only by the best representatives of the medical fraternity, and Dr. Belfield was the third American honored by an invitation. During his sojourn in Germany, he delivered a number of lectures before medical societies, and his discussions have been so well received that he is deemed an authority upon questions in which his opinion is given. In 1883, he was appointed lecturer on pathology and genito-urinary diseases. Upon his return from Europe, he was appointed professor of microscopy in the College of Dental Surgery. In this particular work, Dr. Belfield unhesitatingly stands at the head of the profession. In all the important murder trials of recent years, it has been necessary that microscopic examinations should be had, the work has been given to Dr. Belfield, who has become recognized as an expert in this debatable science, and his microscopic examinations afforded the most conclusive proof of adulteration. The Court paid him a high compliment, and recognized him as an authority on microscopy. Dr. Belfield is a frequent contributor to medical journals, and has written several of the leading medical reviews of Berlin and Vienna as well as for those in America. He was requested to furnish a volume for the Standard Library of William Wood & Co., the medical publishers of New York, and in October, 1884, his work on "Diseases of the Urinary and Male Sexual Organs," appeared. His "Cartwright Lectures," four in number, were also published in pamphlet form. Dr. Belfield is a member of the City, State and National Medical societies and of the State and National Microscopical societies; at one time he was secretary of the latter. He is at present medical director for the Metropolitan Life Insurance Company. Dr. Belfield stands prominently among the medical fraternity, and is highly esteemed by those who know him. He is a member of the Union Club and is well known in the social circles of the city.

RAYMOND LOCKWOOD LEONARD is a son of the late Rev. Joseph Heimer Leonard, who, for twenty-three years prior to his death, in 1872, was chaplain to seamen at this port, and Susannah Lockwood, who were married at Kingston, Canada, in 1830. Raymond was born on August 15, 1850, at Toronto, Canada. During 1852, his parents moved to Cleveland, Ohio, thence to Chicago, in August, 1854. His early education was obtained in the public schools, supplemented by a classical course at the Dyehurst College, which was completed after he had entered upon his medical studies. His progress was exceptionally rapid, owing to a fortunate ability to grasp and comprehend whatever struck his ears. During childhood he studied vocal and instrumental music, and at the age of twelve years presided at the organ in the
Bethel (Sailors’) Church. His life from this time forward has been a busy one, assisting his father in his missionary work among the sailors at the Bethel, on shipboard, and in the Marine Hospital. At the age of fourteen he was converted, and united with Clark Street Episcopal Church. Two years later he entered the United States Naval Academy, afterwards transferring to the United States Military Academy. He was graduated in 1853, and entered the Medical Department of the University of Michigan, where he prepared himself for the degree of M. D. on February 3, 1859, at the age of twenty-one years. The certificate given him by the faculty says, “is entitled to the diploma of the College, he shall have attained the age of twenty-one years, as specified in the requirements for graduation.” The coveted diploma was granted on January 17, 1872. After his examination he became immediately identified with the North Chicago Charitable Dispensary, then the college building, and in December, 1870, was appointed superintendent. At the time of the great fire he saved the records, and, with the assistance of the Health Department, re-opened the dispensary three days after the Newbury School Building, continuing his services as visiting physician during the winter of 1871–72, in the employ of the Chicago Relief and Aid Society. In August, 1859, he opened an office in the Mariners’ Church, where Michigan and Fulton streets met, which was burned out by the fire of 1851, re-building on the ashes of his former office during the winter, and has since continued in active practice. Dr. Leonard is a scholar of broad experience, and has been a member of the Chicago Illinois State Medical Society, and the American Medical Association. He is a charter member of Sheet-Anchor Division, No. 822, S. of T.; from 1870 to 1880 was Grand Scribe of the Grand Division, in which he devoted, under Grand Lodge of Illinois, A.F. & A.M.; is a member of Corinthian Chapter, No. 69, R. A. M., of Chicago Council, No. 4, R. S. M., St. Bernard Commandery, No. 13, and Blessed Assurance Commandery, No. 20, in which he was Chief Ruler, 1853, and became a member of the drill corps, which contested for the championship of the United States in proficiency of drill. He is also a P. G. in Union Lodge, No. 9, L.O.O.M. "Dr. Fleming, M.D., a member of an old family which has been known in Scottish history during the past nine centuries, was born in Stanley, Perthshire, Scotland, on March 10, 1826. His father, James Fleming, was a prominent clothier in the city. He spent his boyhood under the instruction of men of age in the public schools of his birthplace, and then entered the employ of Neil Reid, druggist, of Perth, with whom he remained four years. During that time he mastered the details of the drug business, and decided upon medicine as a profession. He then went to Dundee and entered the office of Dr. James McDonald, an eminent surgeon, and read under his instruction one year. Having prepared himself, he entered the University of Edinburgh, where he spent three years in the Medical Hall of that city, and attended a course of lectures at McGill College. In 1856, he came to Chicago and was engaged by F. A. Bryan, then in the drug business under the name of “Bryant & Company,” to enter the Rush Medical College. He took his degree as Doctor of Medicine from that institution with the class of 1857, and began active practice in this city. Dr. Fleming was married on December 25, 1872, to Miss Sarah M. Broome, daughter of Thomas Broome, naturalist, of Montreal, a well-known family from the North of England. The doctor is a member of Chicago Pathological Society, of the Royal Arsenum and of the Royal Order of the Scottish Clans, and also of the St. Andrew’s Society of Illinois and the Caledonia Society. He is the duly appointed surgeon for the Crane Bros. Manufacturing Company, and makes a specialty of that branch of the profession. ADIELHURST HUGG TAGERT, M.D., son of Hugh and Lucy A. Tagert, was born on October 2, 1845, in Hinesburgh, Vt. He was educated in Hinesburgh until his fourteenth year, and upon the completion of that term entered Amherst College. Two years later he was elected a common sailor, and finally entered the U.S. Navy. At the age of twenty-one, he graduated from the Burlington (Vt.) State University and, in 1866, matriculated in the Medical Department of the University of Michigan, the same year with Luther E. and George M. Wailes. In 1868 he transferred to the Rush Medical College and was graduated in 1873. He is a member of the Illinois State Medical, Chicago Pathological and American Medical Societies. Dr. Tagert married on May 5, 1876, Dr. Anna C. Butler and Hannah Jane (Aldrich) Howard, was born at Aurora, Erie Co., N. Y., on July 24, 1855. In 1874, when his ninth year, he removed with his parents to Kenoza County, Wis., where, during the ensuing eight years, he obtained a thorough medical education. In 1875, he went to Fond du Lac, Wis., for the purpose of beginning a self-sustaining career. Shortly after his advent there he secured a position as bookkeeper and in the management of the Daily Commonweath, at that time under the editorial management of Hon. H. M. Kutchin. After a short connection with that paper, he went to Providence, R. I., and engaged in a small druggist business. On the expiration of his connection, he returned, a year later, to Fond du Lac and was again associated with the Commonwealth. During his latter connection with that paper, he became interested in the study of medicine, and was appointed by the then Mayor and Common Council of Fond du Lac, his attention for one year following his retirement from the Commonwealth, in 1875. In 1877, he went to Ripon, Wis., and took a position of scientific course in the college at that place. In 1878, he came to this city for the purpose of competing for the position of interne, in which he was successful, in the United States Marine Hospital, where he remained one year. By the advice of the tutorship of Hon. W. V. Miller, he decided to seek a medical charge. In 1881, he entered Rush Medical College, taking the spring course and the regular course, and graduating in 1882. During the first course he competed with a number of students for the position of assistant to Dr. Fitch, in the dispensary of diseases of the throat and chest, and was successful. Following his graduation he went to Rochelle, Ill., and locating there, practiced his profession for two years. Prior to his departure for Rochelle he was called upon by Dr. Ingalls and suggested the advisability of establishing a hospital in this city for the treatment of throat and lung diseases. Circumstances then precluded the possibility of giving the hospital the attention it needed. Dr. Howard then returned to New York, and engaged in the practice of his profession. On his arrival in this city he associated himself with Dr. Ingalls in special work at the Central Free Dispensary. In recognition of his services in the interest of the Throat and Chest Hospital, he was appointed to the staff of visiting physicians. Dr. Howard is a gentleman of liberal ideas and an able physician. On May 3, 1882, at Chicago, he was married to Miss Ada陔 Adela Roselund, and has two children,—Alice Louise and John Gardner.

William Edward Hall, M.D., son of Captain Charles E. and Elizabeth A. Hall, of New Bedford, Mass., was born on November 19, 1853. On the maternal side his ancestry is direct from the Puritan stock of New England, and includes the Morton family of Vermont, whose scions are linked with national history. His father came West in 1847, two years later his mother joined him, and formed a home in the new town of Madison, Wis., remaining until 1861, when he went to the West Indies, to fulfill certain railway contracts in the interests of a firm, of which he was interested. His own education began in the Madison public schools but was interrupted by the War of the Rebellion, with his father, for the Indies. Upon his return in 1864, he entered Cushman Academy at Middleborough, Mass., and in the following year went to Alton, Ill., where he studied for five years, during the succeeding six years. At the expiration of that time he came to this city, and pursued special studies in the University of Chicago for two years. He entered Rush Medical College, graduating in 1873, and has been in active practice in the city. He is examining physician for the National Union and the Fraternal League. Dr. Hall was married on August 25, 1884, to Miss Mae Vincent, of Chicago.
turning to Cleveland in 1875, he consulted with Dr. W. H. Peck, a prominent physician of that city, as to the advisability of his continuing his studies. Encouraged to continue them, he purchased a few books, and then went to Iowa, where, in Sherman Township, he taught school and continued his medical studies. In 1877, he came to this city, and entered Rush Medical College, graduating in 1880, following which he commenced his practice. He is a member of the Chicago Pathological Society. On May 31, 1880, in this city, he was married to Alice C. Dickson, and has had two children, Newman and Charles Wells.

Monroe S. Leech is the son of Robert and Catharine (Carr) Leech, and was born on October 14, 1845, at Shelby, Ohio. He was educated in the public schools and the academy of that village, and later entered the medical department of the Western Reserve College, graduating at Cleveland, Ohio, in 1866. The same year he removed to Butler, Mo., near Kansas City, and commenced the practice of his profession, remaining several years. Returning to

Ohio, he entered the Eclectic Medical School, at Cincinnati, and, in 1871, graduated from that institution. In 1881, he came to Chicago and entered Rush Medical College, from which he graduated during the following year, and has since that time been engaged in general practice. Dr. Leech was married, in 1868, at Butler, Mo., to May A. Braiden, of that place. They have one child, a daughter, Anna Belle. The doctor is a member of the Medical Historical Society.

Shemera Shaw, son of Levi and Martha (Medet) Shaw, who were married in Coshocton County, Ohio, in 1831, was born in Berlin (Sweden), Mercer Co., Ill., on September 22, 1850. The ensuing twenty years of his life were passed at his native place, during which time he acquired a common school education. Between 1870 and 1873, he passed his time in travel in various parts of the United States, and, becoming discontented with his position in life, he determined to obtain a more thorough education. With this end in view, he went to Galena, and, being dissatisfied with his surroundings, he went shortly afterward to Monmouth, Ill., for the purpose of availing himself of the educational advantages there. He began a preparatory course at the academy, and one year later he became a student in the college proper, entering upon a five-years' classical course, graduating in 1879. During the academic year the idea of studying medicine first occurred to him, being advised to adopt that profession by those competent to judge of his ability. Locating in New Windsor, he placed himself under the tutelage of Dr. Frank D Rathbun, where he remained until the fall of 1880, when he entered Rush Medical College, Chicago, and shortly afterward assisted himself by working at the same time. Professor B. Strong, the demonstrator of anatomy in that college, he obtained the degree of M.D. from that institution in 1882, and remained with Dr. Strong for a time, gaining that practical knowledge he could before entering the professional field for himself. From 1882 to 1885, he was house physician of the Central Free Dispensary of West Chicago. He is a member and medical examiner of Court Physicians, No. 42, I.O.F.; medical examiner of the Chicago Life Insurancy Association, and for the Chicago branch of the Mutual Relief Society of Rochester, N. Y. Dr. Shaw is a gentleman of considerable literary ability and a conscientious physician. During his connection with the Cook County Medical Society, he has contributed to its journal in English literature, and was historian of his class. He was also one of the editors of the Monmouth College Courier, during his collegiate course, and graduated from the college with credit to himself and his Alma Mater.

Francis Adam Paul Sieber, M.D., son of Paul and Frances Sieber, of Neisse, Silesia province, of Prussia, was born on March 28, 1841. On the paternal side his family was prominently connected in a political way, many of them holding Government and suffrage positions, the maternal side being descendants of a long and highly esteemed line of merchants. His early education was derived from private instruction, and when twelve years of age he attended the gymnasium at Neisse, afterward at Breslau, from which he graduated in his twelfth year. He then entered the Breslau University, and began the study of medicine, attending lectures also at Berlin and Ilnon. In 1866, he served in the Prussian army during the war between Prussia and Austria, and in the same year, upon the cessation of hostilities, came to this country. After practicing in New York City two years, he located at Leavenworth, Kas., following the practice of his profession until 1870, during which time he was appointed surgeon of the Kansas Pacific Railway, Removing to Ellsworth, Kas., he resumed practice, continuing there ten years, and in the meantime was elected coroner and county physician, and for several years was Government examining physician. After a stay of several years in Santa Fe, N. M., he came to this city in 1883, and took his degree as M.D. from Rush Medical College. Locating in Lake View, he has an extended practice, and has recently been appointed health officer and town physician. Dr. Sieber is a member of the Kansas State Medical Society.

Chicago Medical College.—The history of this College, during the period covered by the present volume, has been one of steady growth and gratifying success, not alone in the internal work of the college, but in its charitable attendance upon Mercy Hospital and the treatment of patients at its dispensary.

The faculty, from 1871 to 1885, has been as follows:

Professor of obstetrics and diseases of women and children: William H. Byford, 1859-79; E. O. F. Roler, associate, 1870-79.

Professor of obstetrics and diseases of children: E. O. F. Roler, 1879-82; W. W. Jaggard, 1883-86.

Demonstrator of practical anatomy: Thomas S. Bond, 1869-74; Charles L. Kutter, 1874-79; Roswell Park, 1879-82; Frank Billings, 1882-85; Assistants, Frederick C. Schaefer and Robert Tilley, 1881-82.

Professor of physiology and histology: Daniel T. Nelson, 1867-79. Assistant professor: Lester Curtis, 1875-76. Adjunct professor: Lester Curtis, 1876-79. In 1879, this chair was divided into two chairs, those of physiology and histology.

Professor of physiology: Henry Grady, 1879-84; R. W. Bishop, 1884-86.

Professor of principles and practice of medicine and clinical medicine: Nathan S. Davis, 1869-85; Hosmer A. Johnson, associate, 1872-81; emeritus, 1881-85.

Professor of diseases of the respiratory and circulatory organs: Hosmer A. Johnson, 1868-75.
MEDICAL HISTORY.

1863, young Schaefer was obliged to go to work in order to help support the large family. He commenced to set type in the office of the Galena Advertiser, afterward the Gazette, and remained there two years. During this period he obtained considerable schooling, and being ambitious for a higher education, resumed his studies at the public schools with renewed vigor. At seventeen years of age he left the high school, where he had been pursuing a course on the higher mathematics, Latin, and continued his labors at the case in order to get enough money to take him through college. At eighteen years of age he established himself in business in Chicago, as printer and lithographer. After leaving the office, but, after a year or two of unfruitful labor, his health failed him and he removed to San Francisco, Cal., where he pursued his studies in the languages, philosophy and higher mathematics, under competent private tutors. While he was pursuing this course he obtained a first class certificate, and taught for two years in the public schools of Alameda County. While teaching he had also commenced the study of his profession, attended lectures in the University of the Pacific, and collected quite a respectable library.

Professor of clinical medicine: Hosmer A. Johnson, 1872-77 (Mercy Hospital), 1882-85; I. N. Danforth (St. Luke's Hospital, 1883-85.

Professor of principles and practice of surgery and subsequent to 1863 military surgery: Edmund Andrews, 1849-81; Ralph N. Isham, 1879-85; Julian S. Sherman, adjunct, 1870-76; D. A. K. Steele, assistant, 1879-80.

Professor of general anatomy and operations of surgery: Ralph N. Isham, 1859-81; J. E. Owens, 1881-85.

Professor of surgical anatomy and operations of surgery: Edmund Andrews, 1859-85; Ralph N. Isham, 1879-85; Julian S. Sherman, adjunct, 1870-76; D. A. K. Steele, assistant, 1879-80.

Professor of materia medica and therapeutics: William E. Quine, 1871-82; Walter Hay, 1882-85.

Assistant, W. E. Casselberry, 1883-84.

Professor of orthopedic surgery and diseases of the joints: Julian S. Sherman, 1876-77.

Professor of materia medica and therapeutics: William E. Quine, 1871-82; Christian Fenger, 1882-85.

Professor of surgery of genito-urinary organs: Christian Fenger, 1882-83.

Professor of orthopedic surgery and diseases of the joints: Julian S. Sherman, 1876-77.

Professor of surgical anatomy and operations of surgery: Edmund Andrews, 1859-85; Ralph N. Isham, 1879-85; Julian S. Sherman, adjunct, 1870-76; D. A. K. Steele, assistant, 1879-80.

Professor of materia medica and therapeutics: William E. Quine, 1871-82; Walter Hay, 1882-85.

Assistant, W. E. Casselberry, 1883-84.

Professor of orthopedic surgery and diseases of the joints: Julian S. Sherman, 1876-77.

Professor of materia medica and therapeutics: William E. Quine, 1871-82; Christian Fenger, 1882-85.

Professor of surgery of genito-urinary organs: Christian Fenger, 1882-83.

Professor of orthopedic surgery and diseases of the joints: Julian S. Sherman, 1876-77.

Professor of materia medica and therapeutics: William E. Quine, 1871-82; Christian Fenger, 1882-85.

Professor of surgery of genito-urinary organs: Christian Fenger, 1882-83.
ing year he taught a district school for one term, during which he devoted much of his spare time to the study of medicine. In the fall of 1874, he came to Chicago, under the instruction of Dr. Nealley, and then went to Ann Arbor, and entered the Medical Department of the University of Michigan, remaining there until the spring of 1875, when he returned to Chicago, and associated himself with his former preceptor, Dr. Nealley, also attending a course of lectures in Chicago Medical College. In January, of 1876, he purchased an interest in a drug store, and conducted that business while pursuing his studies. In the fall of 1876, he entered Rush Medical College, graduating the following spring. A few months later he went to Marengo, Ill., and established himself as a practicing physician. Six months later he returned to this city, and, disposing of his interest in the drug business, re-engaged in the practice of medicine. Dr. Thompson is a member of the West Side Pathological Society; of Hesperia Lodge, No. 411, A.F. & A.M.; Washington Chapter, No. 43, R.A.M.; Chicago Commandery, No. 19, K.T., and Chicago Consistory, S.P.R.S. 32.

On June 18, 1875, he married Sarah Jane Gibson, of this city; they have two children.

John W. Dal is the son of Jacob and Christina (Lauer) Dal, and was born on September 17, 1854, at Poughkeepsie, N. Y. When he was but little more than two years of age, his parents moved to Chicago. A short time thereafter, his father became a Methodist minister, and the rule of itinerancy which prevails in that church compelling him to make frequent changes of location, John W. Dal's early education was obtained under difficulties and during his father's wanderings through Wisconsin and Illinois. In 1868, John returned to Chicago and, in 1872, entered the Chicago University, taking a specific course a year later. In 1876, he read medicine with his father, who had abandoned the ministry for that profession, and then became a student in the Chicago Medical College, from which he graduated on March 5, 1878. Excessive study having impaired his health, shortly after his graduation he went, for the purpose of recuperation and rest, to LeSueur, Minn. As soon as advisable he entered in the active practice of his profession. After a residence of two years at LeSueur, he returned, in 1880, to this city, and located permanently. Dr. Dal is courteous and agreeable gentleman, and invites confidence as a physician. He is a member of D. C. Cregier Lodge, No. 643, A.F. & A.M.; of Washington Chapter, No. 43, R.A.M.; and of Siloam Council, No. 53, R. & S. M. Dr. Dal was married, on October 10, 1874, to Matilda, daughter of Joseph L. and Christina (Underhill) Dal, and has one child.—Matilda Independence, born on July 4, 1883.

James Herbert Stowell, M.D., second son of Elijah and Lucinda (Bristow) Stowell, was born on April 29, 1854, at Delavan, Walworth Co., Wis. His parents are from New England and number among their ancestors some who figured prominently in the Revolutionary War. His parents, in 1844, chose Wisconsin as their future home and were among the first settlers of Walworth County. He assisted his father in cultivating the farm and attended the village school during the winter months. His father could not afford to send him to college, but at the age of eighteen years, having set his mind on obtaining a higher education, he left home and made a way where none seemed open. By working evenings and holidays and boarding himself, he triumphed over poverty and gained a valuable discipline for after life. He entered Beloit College and remained until the junior year, when, owing to sickness, he was obliged to discontinue his studies and sought health in the Far West. He began the study of medicine at the Chicago Medical College, and graduated with the class of 1881. During the three years of his college study he devoted his entire time to perfecting himself in his chosen profession. The interval between the lecture courses he spent in arduous work in dispensary and dispensary practice, under the direction of skilled instructors, and thus laid the foundation for his future success. After graduation he located in this city. Dr. Stowell was married, on June 16, 1880, to Miss Frances E. Beckett, daughter of Mrs. K. C. Cregier, of Aurora, Ill. He has one daughter, Marion. He is a member of the Chicago Medical Society, the Chicago Congregational Club, and is visiting physician of the South Side Dispensary.

Joseph Lucius Gray, M.D., son of Joseph L. and Emily J. Gray, was born at Underhill, Vt., on December 12, 1859. Both parents were from old Vermont families of English stock and are excellently connected with prominent circles of the Green Mountain State. When he was five years of age, the family removed to Burlington, Vt., where young Joseph attended the public schools, but while in the high school his health failed and he was obliged to give up his studies for several years. After finishing his education, he came to Chicago in 1879, and began the study of medicine in the office of Dr. J. A. Jewell, and two years later matriculated in the Chicago Medical College, from which he graduated with honors in the class of 1885, since which date he has been associated with Dr. Jewell in general practice. Dr. Gray, besides being thoroughly posted in his profession, has found time to become an expert microscopist and is a member of the Illinois State and the Tolles Microscopical societies. He is also a member of the Chicago Medical Society and is attending physician for the department of nervous diseases of the South Side Free Dispensary.

College of Physicians and Surgeons.—This institution was organized in 1881, and the first regular session of the college began on September 26, 1882. The building is located on the northwest corner of Harrison and Honoré streets, directly opposite the entrance to the Cook County Hospital. The architect, George H. Ed- brooke, before drawing his designs, visited some of the principal medical schools in eastern cities, to avail himself of the latest improvements in structures of this kind. The style of architecture is Queen Anne. The building consists of four stories and basement, surmounted by a tower one hundred feet high. The fronts of the building are of Lemont limestone, elaborately carved, and the rear elevation is of brick. The first floor contains the
college office, the rooms of the West Side Dispensary, and other rooms handsomely furnished. The second floor contains the lecture-room, with a seating capacity for 226 persons; two professors' rooms, one large clinical operating room, and four rooms for patients. The chemical laboratory, students' library, and five private rooms are on the third floor; while the fourth floor is occupied by the amphitheatre, seating four hundred and fifty, and dissecting and other rooms. The cost of the building was about $57,000. The students of this institution have abundant opportunities for witnessing the examination and treatment of patients, not only in the college amphitheatre and West Side Dispensary, but also in the Cook County Hospital and the Illinois Charitable Eye and Ear Infirmary.

The students and graduates have been—

The Founders and Board of Directors are—

A. Reeves Jackson, M.D., president; S. A. McWilliams, M.D., vice-president; D. A. K. Steele, M.D., secretary; Leonard St. John, M.D., treasurer; Charles Warrington Earle, M.D.

The faculty of the College since its organization has been as follows:

Professor of surgical diseases of women and clinical gynecology: A. Reeves Jackson.

Professor of clinical medicine, diseases of the chest and physical diagnosis: Samuel A. McWilliams.

Professor of orthopedic surgery: Daniel A. K. Steele.

Professor of demonstrations of surgery and surgical appliances: Leonard St. John.

Professor of obstetrics: Charles Warrington Earle.

Professor of operative surgery, clinical surgery, and surgical pathology: Henry Palmer.

Professor of principles and practice of surgery and clinical surgery: R. L. Rea.

Professor of diseases of children: Frank E. Waxham.

Professor of ophthalmology and clinical diseases of the eye: John E. Harper.

Professor of practice of medicine: A. M. Carpenter, 1852-53;

W. E. Quin, 1853-54.

Professor of principles of medicine: J. J. M. Angear.

Professor of dental surgery: A. W. Harlan.

Professor of inorganic chemistry: W. A. Yohn.

Professor of descriptive anatomy: Albert E. Hoodley.

Professor of surgical anatomy: Pinckney French.

Professor of medical jurisprudence: F. B. Eisen-Bockius.

Professor of physiology: E. E. Holrood.

Professor of genito-urinary diseases: Theodore A. Keeton.

Professor of therapeutics: C. C. K. Silva.

Professor of diseases of the mind and nervous system: Oscar M. King.

Professor of State medicine and hygiene: Romaine J. Curtis.

Professor of medical chemistry: B. F. McCoy, 1852-53; W. K. Harrison, 1853-54.

Professor of surgical diseases of the genito-urinary system: J. T. Tels.

Demonstrator of anatomy: S. T. Power, 1852-53; R. N. Hall, 1853-54.

Professor of laryngology: F. O. Stockton.

Professor of dermatology: H. J. Reynolds.

Professor F. B. Eisen-Bockius, son of Joseph Rex and Marie (von Eisen, a descendant of Baron Ludwig von Eisen) Bockius, who were married in Philadelphia, Penn., was born at Galena, Ill., on March 9, 1850. Having finished the course of instruction afforded by the high school of that city, in 1864, he came to Chicago for the purpose of completing his literary education in the University of Chicago, but he played truant to his errand and, at the early age of fourteen, entered the army as pri-
lished. Dr. Boeckius is a thorough physician and gentleman, with just enough infusion of the old Von Elsen blood to render him firm and resolute, possibly sometimes aggressive, in the defense of his ideas.

Charles Washington Earle, M.D., is a native of Westford, Vt., and was born on April 2, 1834. His parents, Moses I., and Nancy Earle, were of English descent, and were among the pioneers who settled in Vermont. His father came West in 1834, settling in Lake County, Ill., where he engaged in farming, the subject of this sketch assisting him during the summer months, and attending school during the winter. In 1851, he enlisted in the 15th Illinois Volunteer Infantry, serving under General Fremont, in the Missouri campaigns, until the fall of that year, when he was discharged from the service, on account of disabilities incurred while unloading a transport on the Missouri River. In the fall of 1862, he enlisted in the 96th Illinois Volunteer Infantry; and his military record is given as follows in the history of the 96th, published by the historical society of that regiment in 1866: "He was first sergeant upon the organization of the company; promoted second lieutenant on February 16, 1863, receiving his commission a few days before he was eighteen; and promoted first lieutenant on August 12, 1864. Was a prisoner of war from September 22, 1863, to February 9, 1864; and escaped from Libby Prison, Richmond, Va., by tunnelling. Was twice wounded at Chickamauga while in command of his company, and was especially commended for bravery in the report of that battle. Commanded Company "D" for two months in the advance on Atlanta, and at the close of the campaign was given special mention for personal bravery by the commander of the regiment and chosen as aide and inspector on the staff of the brigade commander, which position he held until the close of the War. Was brevetted captain of the United States Volunteers, for gallantry, and meritorious services in the battles of Chickamauga, Resaca and Atlanta, Ga., Nashville and Franklin, Tenn., and mustered out with his regiment in 1866." After the War, he attended Beloit College for three years and matriculated in the Chicago Medical College in 1868, taking his degree of M.D. in 1870. He is a member of the local, State and national medical societies. He became a member of the faculty of the Woman's Medical College at its organization in 1870, and is the present professor of diseases of children and clinical medicine in that institution. He was one of the founders of the College of Physicians and Surgeons, and occupies the chair of obstetrics. Since 1871, he has been physician to the Washingtonian Home of Chicago. Among his contributions to medical literature are: 'Electricity in Post-partum Hemorrhage'; 'Scarlatina in Chicago'; 'Indolent papers on accidents', variously presented.

Dr. C. A. B. Peck, M.D., was born at Cincinnati, Ohio, of German parents, in 1846. Graduating at the Cincinnati High School in 1864, he spent three years following in the Miami Medical College, where he was graduated in 1877, with the degree of M.D. For a short time he served as assistant to Dr. Wilson of Cincinnati, an eminent oculist. Subsequently, for about a year and a half he was occupied in a similar way with Professor Knapp of New York, formerly one of the faculty of the University of Heidelberg, Germany. In 1879, Dr. Bettman went abroad. After about six months spent in study in the University of Vienna, he travelled extensively throughout Europe. Finally he went to the University of Heidelberg, where he became the assistant of the eye department of the University. He continued in this capacity about two years, leaving there in May, 1881. Several months were passed in Paris, visiting the hospitals and attending important clinics. He then went to London and attended the International Medical Congress of that year, an occasion of great interest, as there were some thirty thousand physicians present from all parts of the world. Returning to America he reached New York in September, 1881. In November following he came to Chicago, where he has since been actively engaged in the practice of his specialty. Dr. Bettman is the lecturer on the eye and ear at the College of Physicians and Surgeons of Chicago; is one of the surgeons at the Illinois Charitable Eye and Ear Infirmary; and is physician-in-charge of the outdoor eye and ear department of the Michael Reese Hospital. He is secretary of the Chicago Society of Ophthalmology and Otolaryngology, and is a member of the Chicago Medical Society, of the Esculapian Medical Society, and of the Illinois Microscopic Society.

Dr. John Rayner Richardson is the son of Osborn and Isabella (Cathrow) Richardson, and was born on July 10, 1843, in Canada, and obtained his early education in the high school and Laval University, where he graduated with the degree of M.A. In 1870, he entered the medical department of the University of Michigan and was graduated in 1874. After spending a year in the hospital at Vienna, he returned to New York, where he became associated with the Charity Hospital and in the capacity of house surgeon. Six months later, he returned to Montreal, and received from the faculty of McGill College the degree of M.D., C.M. Then he entered upon the active practice of his profession, in which he rapidly obtained prominence. In 1885, circumstances induced him to make Chicago his residence. He is a gentleman of scholarly attainments and literary ability, liberal in his ideas, of men and things in general, and critical in his opinions concerning his profession. Dr. Richardson was married, on April 17, 1879, at Quebec, to Matilda Levy, and has had five children, three of whom are girls.

Dr. Erasmus Harper, A.M., M.D., is the son of Robert W. and Harriet A. Harper, and was born on January 21, 1851, in Trigg County, Ky. He received his early schooling in Evansville, Ind., where he also commenced his professional studies. In 1875, he entered the office of Dr. George B. Walker, of that place; after four years of study, he entered the University of the City of New York, from which he graduated in 1879, and received the prize for the best examination in pathology. In 1879, he was elected demonstrator of anatomy and lecturer on medical jurisprudence in the Medical College of Evansville; in 1876, he was elected professor of diseases of the eye, ear and throat in the same institution, which position he held until 1882, when he resigned, in 1882, to accept the professorship of eye and ear diseases in the College of Physicians and Surgeons of Chicago.
28, 1878, Dr. Harper was married to Miss Mary E. Walker, daughter of Hon. William H. Walker, ex-mayor of Evanville. Accompanied by his wife he left on the following day for Europe, where, after a short
vacation, he pursued the studies of eye, ear and throat diseases in the
schools and hospitals of London, Paris and Vienna. Returning to Evanville, he resumed the practice of his specialty in 1880.

In 1882, with his wife and only surviving child, Robert Bunting
(the eldest, John Albert, having died in 1881), he removed to
Chicago. Besides being engaged in private practice, Dr. Raper is also surgeon-in-chief to the eye and ear department of the West Side Free Dispensary and attending surgeon to the Illinois Charitable Eye and Ear Infirmary. He is a member of the American Medical Association, the Mississippi Valley Medical Association, the Chicago Pathological Society and the Chicago Ophthalmological and Otological Society and the Chicago Medical Society. Since 1880, he has been publisher and editor of the Western Medical Reporter.

G. FRANK LYDSTON, M.D., was born at Jacksonsville,
Tuolumne Co., Cal., on March 3, 1850. Prior to the discovery
of gold in that region, his father, G. N. Lydston, was a
resident of Maine, and when the excitement over the finding
of the precious metal was at its greatest height, Mr. Lydston
was among the first to undertake the journey to the California
gold fields. He took passage from Boston on a sailing ves-

sels, and after a seven months’ voyage reached San Francisco.
From there he went to Jacksonvile, where the mines had
already become noted. While there he became acquainted with his future wife, who had also made the trip from "the
States," over the plains, a venture hazardous in the extreme,
but without accident or danger to her. The family continued
their residence at Jacksonville until 1865, when they returned
to Maine. In 1869, he and his wife moved to Chicago. In 1876, G. and
Frank Lydston having completed his preliminary studies, de-
cided to enter the medical profession. He took his first
course of instruction in the office of F. B. Norcom, M.D.,
of Chicago, and in 1877, entered the Medical College, taking
a full course of study. In the following year he went to New
York City for the purpose of prosecuting his studies in the
famous hospitals there. He spent some time in the wards of
Bellevue, St. Francis and Charity hospitals, under the tutor-
ship of Professor Joseph W. Howe of the New York Medical
University. In February, 1879, he graduated at Bellevue
Hospital Medical College, and after six months' instruction
in the hospitals under private tuition, he was appointed resi-
dent surgeon of the New York Charity and Penitentiary
hospitals on Blackwell's Island. He held this responsible position until 1881, his term of service having expired. On his retire-
ment he was immediately tendered the office of resident sur-
geon to the New York State Emigration Hospital and Refuge
by the Board of Commissioners. It was a fitting tribute to his
high standing as a physician, and an appointment which
he held until his resignation in 1887, when he resigned his
position at the Emigration Hospital, desiring to make his
home in this city, and on his arrival he immediately took
a prominent position among the medical profession of Chicago.
In his first year of residence, he was engaged in addition to his regular practice, in giving private
instruction to medical students. In 1882, he was appointed lec-
turer in otological diseases of the genito-urinary division of the
West Side Free Dispensary. He is colonel and surgeon-general of the Illinois Brigade of the Union Rank of Knights of Pythias,
medical examiner of the Knights Templars and Masons' Indemnity
Company, the New England Benefit Association, and the Knights
and Ladies of Honor. Dr. Lydston was married on November 3,
1883, to Miss Josephine Cottier, of Chicago. In addition to his large private practice, he is a member of the Medical and Surgical
department of the Western Medical Reporter, one of the most promi-

nent medical journals west of New York. He also contributes
towards the columns of other well known medical publications, and
by his personal influence, his professional opinions, and his power of description. As an instructor he stands high in the estimation of the faculty and students of
the College of Physicians and Surgeons, and is quite prominently known among the various secret societies, being a member of Oriental Con-

sorium, Chicago Commandery of Knights Templar, the order of
Nobles of the Mystic Shrine, and the Royal Arcanum. He is quite
an enthusiast in the matter of society work. The doctor is also an
active and prominent member of the Chicago Medical and the Pathological Society, and, although a young man, he has attained a distinguished position
in the medical profession, and as a lecturer and author his instruc-
tion and opinions are regarded as the very best. He is a member of
Hospers Lodge No. 414, A.F. & A.M., and of Lincoln Park
Chapter, No. 177, K.A.M.

Henry Parker Newman, son of James and Abby Parker
(Everett) Newman, was born at Washington, N. H., on Decem-
ber 2, 1853. When he was but a few months old, his parents
moved to Hillsborough, N. H., where he acquired, in the public
schools of that place, the rudiments of an English education, after
which he entered the Literary Institute at New London, N. H.,
to prepare for college. At the beginning of the year of his
connection there, he was compelled to return home, where he
remained engaged in teaching and in mercantile pursuits, and
the affairs of his studies was left in the hands of a private tutor, until he reached
his majority. Shortly after the advent of his twenty-first year, he
went to Concord, N. H., and, securing the co-operation of Dr.
George Cook, of that place, under whose instruction he con-
menced reading medicine, where he continued until 1875, when he
entered the Medical Department of Dartmouth College, where he took one course of lectures.
The following winter he was en-
gaged in teaching, and then moved to Detroit and continued the
study of his profession in the Detroit Medical College, graduating
in the spring of 1875. While a student in this college, he was
house physician in St. Luke's Hospital, Detroit, a position which
he held until after his graduation. At that time he went to Eu-

rope, visiting the hospitals at Edinburgh, London, Paris, Vienna,
and in Germany, spending two years at the leading German med-
ical schools. In 1880, he returned to America and began his
practice. He is a member of the Chicago Medical Society, Chicago Gyneco-
logical Society, Illinois State Medical Society, American Medical Society, and Illinois State Microsopical Society.
He is lecturer on obstetrics in the College of Physicians
and Surgeons, and is attending gynecologist in the West Side Free
Dispensary. On September 21, 1882, in this city, he was
married to Fanny Louise Hodges, and has had two children. Dr.
Newman is a gentleman of considerable literary ability, aside from
that associated with his profession; is affable in manner and enten-
ring in conversation.

Dr. Charles Clarence Singley was born in Fayette County,
Penn., on January 16, 1876. After studying in Belle Vernon and
Meadville colleges, he spent the year 1878 in medical study in the
College of Physicians and Surgeons, in Baltimore, and the year 1879 in similar study in the Medical Department of the University of Maryland. He then entered Jefferson Medical College, in Philadelphia, where, two years later, in March, 1881, he was graduated with the degree of M.D. In August following, Dr. Singly came to Chicago, where he has since been engaged in the practice of medicine. Since 1882, he has held the chair of lecturer on materia medica in the College of Physicians and Surgeons, but is connected with no other institution, nor is he a member of any of the societies, devoting his whole time to active practice.

**WOMAN'S MEDICAL COLLEGE.**—This institution was founded by Dr. William H. Byford, although the early and earnest efforts of Dr. Mary H. Thompson in regard to the medical education of her sex should be mentioned in connection with the organization of this enterprise. This college was designed exclusively for the medical education of women, and held its first course of lectures in the Hospital for Women and Children, No. 452 North State Street. Notwithstanding the discouragement in consequence of the fire of 1871, by which its newly-furnished apartments, at Nos. 1-3 North Clark Street, were destroyed, new rooms were secured at No. 331 West Adams Street, and subsequently at No. 598 on the same street, and the regular course of instruction was prosperously pursued. In 1872, in connection with the Hospital for Women and Children, the College occupied apartments on the corner of West Adams and Paulina streets, where it continued until 1879, when a new building was erected at Nos. 335-39 South Lincoln Street, opposite the Cook County Hospital. Commodious and well arranged, it is supplied with every convenience for successful teaching. It is two and a half stories high, with a basement, and contains two lecture-rooms, laboratories, a museum, dissecting-room, and offices and a dispensary. In 1884, the progress of this institution had been so gratifying, that it was determined to erect a new building, commensurate with its necessities and growth. This building, to cost $35,000, will be erected on the site of the old one, which has been removed a short distance on the same lot, and enlarged and re-fitted to be used until the new one is completed.

The Faculty has been as follows:

- Professor of gynecology: William H. Byford, 1870-86; T. D. Fitch, 1870-80; Marie J. Merger, 1883-86.
- Professor of diseases of children: Charles Gilman Smith, 1870-71; John Bartlett, 1874-75; Charles Warrington Earle, 1875-86.
- Professor of pathology: Norman Bridge, 1870-73; Lester Curtis, 1874-77; I. N. Danforth, 1877-86.
- Professor of pathology and renal diseases: I. N. Danforth, 1882-86.
- Professor of theory and practice of medicine: W. Golffrey Dyas, 1870-75; John Bartlett, 1875-77; William E. Quine, 1877-78; Henry M. Lyman, 1878-86.
- Professor of diseases of the nervous system: E. C. Blake, 1870-77; D. R. Brower, 1877-86.
- Professor of obstetrics: Emma Marquet, 1870-77; T. D. Fitch, 1877-75; William H. Byford, 1878-80; Sarah Hackett Stevenson, 1880-86.
- Professor of surgery: Roswell G. Bogue, 1870-77; A. H. Foster, 1877-73; John E. Owens, 1877-83; D. W. Graham, 1883-86.
- Professor of dermatology: William J. Maynard, 1886-86.
- Professor of ophthalmology and otology: Samuel Cole, 1871-73; F. C. Hotz, 1873-76; W. T. Montgomery, 1885-86.
- Professor of diseases of chest and throat: E. Fletcher Ingalls, 1886-86.
- Professor of physiology and histology: Charles Warrington Earle, 1870-77; Sarah Hackett Stephen-son, 1875-80; F. L. Walsworth, 1880-86.
- Professor of dental surgery: Eugene S. Talbot, 1881-86.
- Professor of chemistry and toxicology: M. Delatontaine, 1870-73; P. S. Hayes, 1873-83; Jerome Salisbury, 1883-86.
- Professor of anatomy: S. A. McWilliams, 1870-74; P. S. McDonal, 1874-77; D. W. Graham, 1877-83; Mary E. Bates, 1883-86.
- Professor of materia medica and therapeutics: G. C. Paoli, 1870-77; Dr. D. R. Brower, 1877-79; William Maynard, 1879-83; Marie J. Merger, 1882-85; Walter Dorland, 1883-85.
- Clinical professor of obstetrics and gynecology at Hospital for Women and Children: Mary H. Thompson, 1884-86.

**MARY HARRIET THOMPSON**

Demonstrator of anatomy: P. S. McDonald, 1879-74; D. W. Graham, 1874-78; Roswell Park, 1878-80; John O. Hobbs, 1880-86.
- Professor of hygiene and state medicine: Mary H. Thompson, 1870-77; Byron格林.
- Clinical lecturer on midwifery in charge of outdoor department: Robert S. Hall, 1882-86.
- Assistant to the chair of physiology and lecturer on histology: Emma Nichols, 1882-86.
- Lecturer on diseases of throat and chest: Homer N. Thomas.
- Professor of anatomy: E. O. Haves, 1870-73; George Scoville, 1870-74; E. J. Goospeed, 1870-72; W. Golffrey Dyas, 1870-79; T. D. Fitch, 1870-84; Mrs. W. G. Dyas, 1870-80; W. H. Byford, 1878-86; Mrs. J. McGregor Adams, 1874-76; E. W. Blatchford, 1870-75; Robert Colyer, 1870-77; W. H. Byford, 1870-77; R. G. Bogue, 1870-85; Emma Marquet, 1870-79; Mrs. T. C. Hoag,
1870-74; Gilbert Hubbard, 1870-77; J. M. Reid, 1870-73; Edward Sullivan, 1870-73; C. C. Paoli, 1871-72; Mary H. Thompson, 1872-76; J. T. Eyerson, 1873-76; T. M. Averly, 1873-76; Norman Bridge, 1873-81; Charles Warrington Earle, 1873-81; I. N. Danforth, 1880-80; John Bartlett, 1880-83; D. W. Graham, 1881-84; Daniel R. Brower, 1884-87; F. L. Wadsworth, 1884-86; E. Fletcher Ings, 1885-88.

ROBERT SAMUEL HALL, M.D., son of Samuel and Mary Hall, was born at Rowe, Mass., on May 11, 1821. His father, a lieutenant in the State militia, was a man of quick judgment and sterling integrity. Robert had the experience of a Yankee country school boy until fifteen years of age, when the family, in 1836, removed to Waterloo, Iowa, and were among the pioneers in that part of the State. Adopting the occupation of teacher, Mr. Hall continued his studies until 1852, when he enlisted in the 31st Iowa Volunteer Infantry, which formed part of the 15th Corps, Army of the Tennessee. Private Hall was at the battle of New Hayes, Arkansas Post, and carried the colors of his regiment during the siege of Vicksburg and battle of Jacksonville. Here disabled by disease, he was sent to Northern hospitals. Partially recovering, he returned to his regiment and took part in the numerous battles of the Atlanta campaign. He was honorably discharged in 1865. Upon his return to Iowa, he entered the Iowa State University, where he continued three years. He then began the study of medicine under the instruction of Dr. A. Middleditch, of Waterloo, Iowa. After having attended lectures in Iowa City and New York City, he came to Chicago and matriculated in the Rush Medical College, and graduated with the class of 1872: was appointed to the State interne to Cook County Hospital, and took a post-graduate course at the Chicago Medical College. He was appointed physician to the Relief and Aid Society for the years 1872-73, and was physician to the Central Dispensary during the entire ten years, giving his attention principally to the diseases of children; and has, during this time, been actively engaged in general practice. He is now physician to Lincoln-street Dispensary, and for several years has filled the chair of clinical lecturer on obstetrics, at the Woman's Medical College. He is a member of the Chicago Medical Society, and has been four times elected secretary of the Chicago Pathological Society. Dr. Hall was first married on September 12, 1851, to Miss Jennie A. Fisk, of Waterbury, Conn., by whom he had five children.—Willie R., Jennie I., May S., Robert S., and Charlotte Aristine. On November 7, 1883, he married Miss Florence Goff, daughter of Murray Goff, of Petersburgh, Ill. They have one child, Florence Ethel. Dr. Hall is a member of the K. of P., and was the first chancellor of Madison Lodge, No. 134; a member of the Grand Lodge of Illinois; and for 1883-84, surgeon of the 15th Illinois, Uniform Rank, Knights of Pythias. He is also a member and surgeon of U. S. Grant Post, No. 28, G. A. R., and surgeon of the Union Veteran Club of this city for 1883.

JACOB STEVENSON, well-known as a physician and litterateur, was born at Buffalo Grove, Ogle Co., Ill., and is the daughter of John D. and Sarah (Hackett) Stevenson. Her grandfather was one of the earliest settlers of Ogle County, and laid out and owned the town site of Buffalo Grove. Her ancestry traces back on her father's side to Scotch-Irish blood, her grandmother being a "Blue Presbyterian" and a prominent figure in the Irish Rebellion. She is a lineal descendant on her mother's side from Sir Hugh de Hacket, who participated with the renowned Richard Coeur de Lion of England in the Crusades. It was at her parents' home that Dr. Stevenson was reared, and her education was attained at the State University in Bloomington, from which she graduated in 1872. The years 1872-73, she developed a taste for the study of science and literature, her time while abroad was chiefly given to studying at the South Kensington Science Schools. On her return to America, she entered the Woman's Medical College of Chicago, and subsequently the State Hospital for Women. Dr. Stevenson has by her own efforts won a reputation as a physician of which scores of practitioners of the other sex might well feel proud. She has the honor of being the first woman physician elected a member of the American Medical Association at Philadelphia, in 1876, being sent thither as a delegate by the Illinois State Medical Society. She has been elected to the staff of the Cook County Hospital, the Hospital for Women and Children, and the State Hospital for Women. Dr. Stevenson was one of the chief promoters of the Home for Incorruptible and the Training School for Nurses, and to her untiring energy and zeal much of the success of these institutions is due. During her ten years' residence here, she has built up a very large practice, and outside of her duties as physician to the various hospitals above named, her time is entirely taken up in responding to the demands for her services. Notwithstanding her busy life, she has found time to prepare for publication a couple of volumes on Biology and one on Pathology, and is a frequent contributor to the columns of the press of the country. Dr. Stevenson is a lover of the West, and the vigor and energy she displays in advancing the interests of her profession; she has attained a splendid reputation as a physician, while her virtues of mind and heart have won for her the friendship and esteem of a large circle of acquaintances.

THE CHICAGO HOSPITAL FOR WOMEN AND CHILDREN.—During the fire which followed the fire, the Chicago Hospital for Women and Children was taken under the direction of the Chicago Relief and Aid Society. So much good was accomplished, that this society, in order to assist in making the hospital a permanent institution, donated for its use $25,000, on condition that it should always care for twenty-five patients free of charge. With this fund, the lot and dwelling on the corner of Paulina and Adams streets were purchased and fitted up. It has managed, by contributions, the revenue derived from pay-patients, and occasional entertainments, not only to keep out of debt, but to have a balance in the treasury. Out of the work of this hospital grew the Woman's Medical College, and the two institutions were mostly managed together from 1870 to 1879.

Patients admitted are women for confinement, and women and children with any disease not incurable or contagious. Those unable to pay are admitted on permits from the Relief and Aid Society, or from one of the Board of Counselors.

A large number of women have been trained and educated as nurses in this hospital, and are doing acceptable service. Almost the entire work of the institution is performed by women; and the success and prosperous management of the hospital have been largely due to the earnest interest and untiring labors of Dr. Mary H. Thompson.

In 1883, in order to meet the greatly increasing demands upon the accommodations of the institution, it was decided to erect a new hospital-building, which was completed and occupied in December, 1885. It faces Paulina Street, and is a four-story brick structure, with basement and Mansard roof. It can accommodate eighty patients, and its cost was $63,000. Nearly the entire sum needed for this outlay has been contributed, leaving but a small balance yet to be raised.

The following is a list of officers, trustees, and medical staff—most of whom have served since 1873:

Counselors: Mrs. J. C. Hilton, president; Mrs. I. McGregor Adams, and Mrs. J. N. Camp, of Chicago; Dr. Francis Wilkinson, secretary; Mrs. Henry Wilkinson, treasurer; Mesdames W. G. Dyne, Otto H. Matz, A. D. Price, George M. Pullman, J. R. Hall, E. S. Pike, C. M. Henderson, S. H. Knapp, W. W. Kimball, John H.

**Honorary Members:** Mesdames George Hall, W. J. Doane, L. D. Parkes, E. W. Blatchford.

**Trustees:** Dr. W. H. Ryder, president; Professor F. W. Fisk, vice-president; Mrs. L. E. Hilton, secretary; H. H. Nash, treasurer; Dr. Mary H. Thompson, J. B. Peabody, William H. Wells, George Oberne, Mrs. J. McGregor Adams, Mrs. W. G. Dyas, Dr. W. H. Byford, George Tapper, C. H. S. Miker, C. B. Sawyer, S. N. Brooks.

**Medical Staff:** Mary H. Thompson, head physician and surgeon; Sarah H. Stevenson, attending physician to medical ward. House physicians: Mrs. C. A. Sanders, Kate Mason, Mrs. Brewer and A. Burnet.

**Dispensary Staff:** Mary H. Thompson, Annette S. Dobins, Emma Baldwin, Eliza H. Root, Mary A. Mixer.

**Miss Emma Frances Gaston,** physician, was born on her father's farm near Oberlin, Ohio, on December 11, 1845. Her parents were Alonso and Amanda Elizabeth (Stratton) Gaston, her mother being a sister of H. D. Stratton, of Bryant & Stratton College fame. Miss Gaston's girlhood was passed in the vicinity of her native place, and her literary studies were pursued at Oberlin College. She was graduated at that institution in 1871, and then accepted the position of principal of the ladies' department of Tabor College, in Fremont County, Iowa. She then returned to Oberlin, where she went to Philadelphia and commenced her medical studies in the Woman's Medical College of Pennsylvania. In 1873, she was graduated and was conferred the degree of M.D. She then accepted the position of intern in the Philadelphia Hospital for Women and Children, an adjunct of the Woman's College, and held the position for six months, resigning in order to accept a similar office in the New England Hospital for Women and Children, at Boston, Mass. Dr. Gaston was there engaged for six months, and at the end of that time, in the fall of 1877, she came to Chicago to commence the regular practice of her profession. She has remained actively engaged in her work up to the present time, excepting a slight intermission in 1885, occasioned by the sickness and death of her mother. Shortly after her arrival here, Dr. Gaston became connected with the Woman's Christian Association, with which she remained identified until the fall of 1883. In the spring of 1878, she was appointed clinical physician in the Chicago Hospital for Women and Children, and so continued up to the fall of 1884. In the spring of 1880, she was elected lecturer on physiology and assistant to the gynecological clinic in the spring courses of the Woman's Medical College of this city. Those offices she maintained until the spring courses were abandoned by the college in 1884. From 1880 to 1884, Dr. Gaston was attending physician to the Erring Woman's Refuge, and for one year, from the spring of 1882, served in a like capacity to the Martha Washington Home for Inebriate Women. She was assistant secretary of the Chicago Flouting Hospital from 1879 to 1885, and corresponding secretary of the Woman's Physiological Institute from 1880 to 1884. Dr. Gaston possesses rare qualities of grace and refinement; is a thoroughly read and close student of her profession. She is a member of the Chicago, Cook County and Illinois State Medical Societies, and also of the American Medical Association, which organization has among its members but very few lady physicians. This discloses the fact that Dr. Gaston has won a reputation abroad as well as at home, and that she is recognized as a physician of rare skill and ability by her ablest compeers in the profession.

**The Woman's Hospital of Chicago.—**This hospital was first organized as the Woman's Hospital of the State of Illinois, on August 29, 1871, and was formally opened to receive patients on January 4, 1872. It was located on the South Side, and has occupied buildings on Vincennes, Calumet and Cottage Grove avenues and at No. 183 Thirty-fifth Street. The intention of the originators of this charity was to make it free; and this, so far as possible, has been carried out. It is especially designed for the treatment of diseases and accidents peculiar to women.

As first organized, it has a board of lady supervisors, a board
of managers, a board of governors, a medical board, and an inspecting committee. It was re-organized in 1879, with a board of lady managers, a board of trustees and a medical staff. In November, 1882, it was re-chartered under the general law of the State, and once more re-organized, the name of the institution being changed to The Woman's Hospital of Chicago.

The following is a list of the board of managers and officers of the institution, many of whom have been connected with it from the beginning:

end of the name indicating the termination of official service:

Medical Board: John E. Owens, G. M. Chamberlain, M. O. Heydock (1882), I. N. Danforth, S. J. Jones, H. A. Johnson.

Directors: Misses M. M. Shelton (1882), Mrs. H. E. Sargent, Mrs. James Parsons (1850), Mrs. H. D. Oakley, Mrs. Orson Smith, Mrs. M. Andrews, Mrs. W. W. Watkins, Mrs. James Ryerson (1850), Mrs. N. K. Fairbank, Mrs. Edward Simmonds (1852), Mrs. Evans Walker, Mrs. S. M. Banks, Mrs. W. M. Judl, Mrs. C. H. Rixby (1852), Mrs. C. E. Crandall, Mrs. H. K. Whiton (secretary), Mrs. N. F. Judl (1880), Mrs. H. O. Stone, Mrs. I. K. Edall, Mrs. T. L. Forrest (1852), Mrs. A. Brooks (1852), Miss F. Sherburn (1850), Miss G. English (1853), Miss Eliza Shipman (1884), Miss L. Blackwell.

Superintendent at the hospital, O. E. Harden.

The reports from 1872 to 1875 cannot be obtained, except that the number admitted during those three years averaged 282, and the number remaining in the Hospital averaged 28.

Of the five hundred and eighty cases treated in 1885, two hundred and twenty-seven were medical, two hundred and sixteen surgical, forty-five gynecological, six obstetric, eleven eye and ear, and twenty others; one hundred and ninety-one were Roman Catholics, ninety-six Episcopals, sixty-five Lutherans, fifty-seven Methodists, thirty-seven Presbyterians, fifteen Baptists, thirty Universalists, four Jews, two Unitarians, and twenty-three unknown; two hundred and sixty-three were natives of the United States, and three hundred and seventeen foreigners.

The Presbyterian Hospital.—A number of philanthropic citizens having become satisfied that there was great need for more hospital accommodations in the city, especially among its Protestant population, obtained a charter from the Secretary of State for the organization of the Presbyterian Hospital in Chicago, on July 28, 1883. The first meeting of the managers was held at the Grand Pacific Hotel, on December 13, when the organization was effected, and it was resolved to take the necessary steps to secure a hospital-building. At a subsequent meeting, a proposition from Rush Medical College was accepted, to deed ground to the managers, on which a building was erected at an expense of $25,000. Plans for a modern and improved hospital were adopted. Not having sufficient funds to erect the entire hospital-building, the managers finished the building which fronts on South Wood Street, and will constitute the rear of the main structure, which will front on West Congress Street. The present building contains eighty beds, but these are entirely inadequate for the needs of the hospital. The main hospital will soon be erected.

Medical superintendent and financial secretary: H. B. Stehman, M.D.

Medical Board.—Attending physicians: Joseph P. Ross, H. M. Lyman, Norman Bridge, E. F. Davis, W. G. Clarke.

Attending ophthalmic and aural surgeons: E. L. Holmes, Lyman Ware.
Attending gynecologists: James H. Etheridge, Philip Adolphus, H. P. Merriman.

First detailed report, to March 31, 1885.

WARD GREENE CLARKE is the son of Ethan Ray and Mary Elizabeth (Millford) Clarke, and was born at Stafford, Genesee Co., N. Y., on January 3, 1859, where he resided up to 1861. At that time his parents removed to Clarence, and remained there until 1863. At the breaking out of the Civil War, his father entered the Union army as chaplin, which necessitated the removal of the family to Buffalo, N. Y., where Dr. Clarke attended school for three years. Hudson City, N. Y., was the next place of residence, where a stay of twelve months was made. He then went to Ox-
This F. Schaller, Patients accommodating twenty substitute. This not medical New lead Miss Burmeister, In John Truman Arrangements the native the Henning, 1873, however, the double Augustana published Central ber he entered the City of New York, where he remained until he had entered upon his senior year. The resolve to commence the study of medicine terminated, somewhat abruptly, his connection with that institution before he had completed his full collegiate course. In the fall of 1879, under the preceptorship of Dr. E. W. Pyle, of Jersey City, he began the study of medicine, which he continued until the close of the year. In May, 1880, he came to Chicago, matriculated at Rush Medical College in Oc-to-

board of that year, and graduated on February 22, 1882. In the following July, he was appointed visiting physician for the north-west district of Chicago, having acted in the capacity of substitute for several months prior. About the same time he was elected to the position of clinical assistant in the department of gynecology in the Central Free Dispensary. On January 1, 1883, he resigned both offices, to accept the position of interne to Cook County Hospital, completing his term of office on April 1, 1884. Directly thereafter, he entered upon a general practice. In August, he was appointed to a position on the medical staff of the Presbyterian Hospital. Dr. Clarke is a well-end gentlemen, engaging in manner and in conversation.

Augustana Hospital and Deaconess Institute. — This is a general hospital, which was established in May, 1884, at No. 151 Lincoln Avenue, by the Swedish Evangelical Lutheran Church. It is under the auspices and control of the Illinois Conference of the Augustana Synod, of that denomination, which is a very wealthy and influential body. It occupies at present a double three-story and basement house, having a capacity of twenty beds. Arrangements are being made, however, which will doubtless be consummated, for the erection of a fine hospital building on the ground now occupied, capable of accommodating one hundred patients. The training school for nurses, following the plan of the noted hospital in Stockholm, will be a marked feature of this one also.

Michael Reese Hospital.

Medical Staff: Truman W. Miller, surgeon-in-chief; John H. Chew and P. M. Woodworth, attending physicians.

The German Hospital. — The German Hospital was incorporated on December 17, 1873, and was opened for the admission of patients on August 5, 1874. It is located at No. 242 Lincoln Avenue, the use of the building being given by F. F. Henning free of charge. It is intended exclusively for Germans. Twelve patients can be accommodated at one time. One hundred and twenty-five were admitted and treated during the last year. Patients not able to pay are treated as well as those who can pay. This hospital starts out with such encouraging prospects as to warrant the beginning of a fund to purchase a lot and erect a building of its own.

Officers and Directors.—F. F. Henning, president; Henry Metzger, vice-president; John C. Bumacister, secretary; John Koenig; Charles G. Meyer, Max Eberhardt, directors.

Medical Staff.—Dr. George J. Schaller, house-physician and surgeon; Drs. S. F. Fenger, S. L. Jacobson, J. Schaller, consulting physicians; B. Bettmann, oculist and aurist; Miss Louisa Schmidt, matron.

George John Schaller, M. D., son of Dr. John Schaller of Chicago (a sketch of whose life appears in the second volume of this work), was born on August 15, 1859. His father is a native of Flomborn, Hesse-Darmstadt, and was one of the first German physicians who located in this city, and his family is noted as producing a long line of surgeons and physicians. He spent his boyhood days at home, and received private instruction until twelve years old, and after four years in the public schools, attended the Dyburenthous Business College two years, in the meantime pursuing a special course in modern languages under Professor Funk. He also received private lectures in Latin under Dr. Lowy. He then engaged in the drug business with E. T. Schlotzer one year. Being prepared for a medical course, he matriculated in the Rush Medical College, and attended the three years' course. He then attended lectures and engaged in the hospital service of that institution nearly two years, and passed the State Board medical examination, at Springfield, and upon his return took his degree as Doctor of Medicine at Rush College, in 1881. After a few months' practice in this city, he went to Europe, where he attended lectures.
at the Heidelberg University. At Berlin he took a special course of lectures from the celebrated Professor Langenbeck, and worked under the direction of Dr. Virchow, the prominent pathologist. In Vienna, he attended clinical lectures one term, and returned to Chicago, where he has since been engaged in active practice. The doctor was appointed, in 1883, house physician to the Chicago German Hospital, and still holds that position.

The Michael Reese Hospital.—The United Hebrew Relief Association, whose hospital was destroyed by the fire of 1871, was not prepared to re-build until 1880, when, having received a generous bequest from the late Michael Reese of $97,000, the fund was used for this purpose. Michael Reese lived many years in California, where he accumulated millions. He died in Europe, leaving many relatives in Chicago.

In connection with the hospital there is a free dispensary for the benefit of the poor.

Officers and Executive Board for 1885-86 (nearly all of whom have been in service since 1882): Isaac Greensfelder, president; Charles H. Schwab, vice-president; Herman Schaffner, treasurer; Joseph Pollak, financial secretary; Charles W. Holzheufer, recording secretary; Henry L. Frank, Max M. Gersley, Herman F. Hahn, Abraham Hart, B. Kuppenheimer, Nathan Mayer, Jacob Newman, Jacob Rosenberg, Joseph Schaffner, Joseph Spiegel, trustees; F. Kess, superintendent.

The annual reports of this hospital are complete and satisfactory. They are as follows:

Mercy Hospital.—This is the oldest, as well as the largest, private or denominational hospital in Chicago. Its building, constructed on the best sanitary principles, is arranged to accommodate comfortably over two hundred patients. It is located on the corner of Calumet Avenue and Twenty-sixth Street, on the same block with the Chicago Medical College, in connection with which there is a fine dispensary. The thirty-four Sisters of Mercy who conduct this institution constitute a benevolent society, composed of graduates from St. Xavier's Academy. They perform all the duties of nurses and management.

The Medical Department is in charge of the following physicians:

Alexian Brothers' Hospital.—The Alexian Hospital was entirely consumed by the fire of 1871. This, with the loss of furniture and bedding, with no hope of insurance money, was discouraging; but the Brothers resolved to erect a new building, on the site of the old one, at once. Funds were collected from various sources, the Chicago Relief and Aid Society contributing $18,000. In 1873, the new building was completed. It is of brick, two stories in height, with large basement, of cut-stone, and mansard roof. It is conveniently arranged, with all the modern improvements, and has room for over one hundred patients.

The order of Alexian Brothers is German, belonging to the Roman Catholic Church. They devote their lives to the nursing of the sick, caring for lunatics, and the burial of the dead.

Patients are admitted to this hospital without reference to nationality or creed,—the poor always free of charge. No women are admitted. In the dispensary, however, both men and women are treated. No salaries whatever are paid to any one connected with the institution. For this reason the average daily cost of each patient, last year, was only fifty-eight cents.

Arrangements have been made for the erection of a wing on the south end of the main building in 1886.
MEDICAL HISTORY.

It is expected to cost about $40,000, and will increase the capacity of the hospital to one hundred and fifty patients.

The following is a list of the trustees, officers and medical staff, the most of whom have been connected with the hospital for several years:

Trustees: Stanislaus Schwiperich, president; Ignatius Mengenb, vice-president; Aloysius Schyna, secretary; Anthony Dold, treasurer.

Bro. Stanislaus Schwiperich

Officers: Philip Krainer, rector; Iodocus Schiffer, assistant rector; Martin Hienering, chief warden; Anthony Dold, doctor; Aeliscus Oonski, Joseph Marx, Ambrosius Nussbaum, solicitors; Alphonos Reis, dragman; Camillus Woelfel, bookkeeper; P. Kiefer, H. Nasher, F. Mehring, M. Mehring, night clerks and engineers.

Medical Staff: Rud. Seifert, M. Mammelinde, attending physicians; Ernst Schmidt, consulting physician; A. J. Baxter,

St. Joseph's Hospital.—Since the completion of this hospital building in 1871, and its occupancy in 1872, many improvements have been made. The situation, on Garfield Avenue, near Lincoln Park and Lake Michigan, is admirable from a sanitary point of view, as well as for being easy of access. Both males and females are received as patients, about one hundred of which can be accommodated. The private rooms are frescoed and comfortably furnished, and the entire building is heated with steam. To the Sisters, who have the care and management of this institution, the increasing measure of its success and recognition is very gratifying and encouraging.

The annual report shows the following results:

John James Thometz, M. D., son of Michael and Mary (Scheffer) Thometz, was born in this city, on January 1, 1860. His early education was obtained at St. Francis School, where he remained six years. At the close of his studies there, he entered the Jesuit College in the classical course, remaining for six years, graduating in 1878. After graduation he accepted the position as assistant to the professor in the scientific department of his Alma Mater. From the days of his boyhood his desire was to become a professional man. As he grew older, he inclined to the study of medicine, and eventually concluded that as soon as circumstances would permit, he would prepare himself for that profession. Following this, he entered Rush Medical College, from whence he graduated on February 21, 1882. Immediately he became associated, in the capacity of house physician, with the Alexian Brother's Hospital, a position he held for eighteen months. He then resigned and opened an office, engaged in the practice of his calling, in which he has been successful. Dr. Thometz is essentially a practical man, well read and liberal in his ideas. On November 24, 1884, at Chicago, he was married to Lizzie Blickhan.

Mary, Penn, where he remained for two years, afterward removing to Bellefonte, Penn. In the following year he went to Cincinnati, where he continued in school two years, when he was sent to St. Hyacinth, Canada. After the expiration of one year, he came to this city, and entered the public schools. Having gone through the high school, he determined to adopt the profession of medicine. Matriculating in Rush Medical College in 1883, he took his degree of Doctor of Medicine in 1886. After six years' experience as house physician of the St. Joseph's Hospital, he engaged in general practice, and with the exception of a few months' stay in Otoe, Ind., immediately after the great fire in 1871, has resided in this city. Dr. Scheppers was married, on April 5, 1877, to Miss Valentine DePelgrom of Chicago, daughter of a prominent Belgian lawyer, by whom he has two sons, Paul and Carlito. The doctor takes pride in being a pupil of Dr. Daniel Brainard, one of our earliest and most noted physicians. He is a member of the Chicago Medical Society and several Catholic societies.

The Chicago Floating Hospital.—At the foot of
North Avenue, in Lincoln Park, a wooden pier runs out from the shore about four hundred feet into the lake, and, turning at right angles, is continued some three hundred feet north. In 1876, the use of this pier was given to the Floating Hospital Association, then organized. It has for its object the sanitary improvement of women and children, especially the latter, by providing fresh-air excursions from the southern part of the city to this point. The pier is well protected by strong railings; a shelter-house has been erected; hammocks and cots, and medical attendance, nurses and refreshments provided. The attendance has been, each year, since 1876, from eight thousand to sixteen thousand. The association is supported by voluntary contributions. It is an important factor in restoring the health and preserving the lives of thousands every year. The boat runs daily, making three round trips each day, except Saturdays and Sundays, during the months of July and August.

Officers: Hon. R. P. Derickson, now deceased, was the first president; Hon. F. H. Winston was his successor; upon his resignation, General Joseph Stockton was elected president, and so continues. Dr. John E. Owens was the first secretary, who, in 1877, was succeeded by Dr. C. L. Rutter, and he still occupies that position.

The operations of the institution since 1872 are shown in the following table:

|       | 1872  | 1873  | 1874  | 1875  | 1876  | 1877  | 1878  | 1879  | 1880  | 1881  | 1882  | 1883  | 1884  | 1885  |

*For two years. ¹Current expenses, not including improvements or furniture.

The dispensary is opened daily, and its work is largely increasing. To obtain admission and free treatment, applicants are required to make specific applications, under oath, that they are "in indigent circumstances, and without means to defray expenses of board and medical or surgical treatment," which affidavit must be accompanied by the certificate of the supervisor of his county, or, in case of a minor, to the parent of the applicant, that the applicant's statement is true. No pay-patients have been boarded in the infirmary since 1883.

JOSEPH ELLIOTT COLBURN, son of Alfred Reeves and Mary Maria (Elliot) Colburn, who were married at Bombay, Franklin Co., N. Y., in 1850, was born at Massena, St. Lawrence Co., N. Y., in 1855. He began his education in the public schools of Massena, graduating from the high school, after which he associated himself with the school as assistant teacher. He subsequently taught a district school for a time, abandoning that vocation eventually to prepare himself for college. After a course of preparatory study, he relinquished the idea of a college course, in lieu of which he began, under the preceptorship of Dr. O. McFadden, of Massena, N. Y., the study of medicine. A year later, in 1873, he went to Albany, N. Y., and entered the medical department of Union University. After taking one course of lectures in that institution, he associated himself, in the capacity of assistant, with Dr. C. B. Fisher, at Colton, N. Y., where he remained until he returned to Massena and re-entering Union University, graduated in 1877. Returning to Colton, he practiced there for a while. At Canton, St. Lawrence Co., N. Y., he next resided some three years, during which time he filled the position of coroner. A too close application to his professional duties had impaired his health, and he temporarily retired from active practice, and under the instruction of Dr. Peck devoted his time to the study of diseases of the eye and ear, which he pursued during the winter of 1881-82. In the spring
of 1883, he came to Chicago on a visit. After a short stay he went home, but returned to Chicago, which he has since made his permanent location. He is associated in a professional capacity with the Illinois Charitable Eye and Ear Infirmary as assistant surgeon, and with the Eye and Ear Department of the Central Free Dispensary as surgeon. He is a member of the Society of Otoology and Ophthalmology and assistant medical director of the Northwestern Masonic Aid Association. Dr. Colburn is a gentleman of exceptional educational gifts, and a thorough physician, devoted to the practice of his specialty. He is a great lover of art, and quite an artist as well. On September 4, 1877, at Colton, N. Y., he was married to Lettie M. Ellis; they have had two children, both boys.

Charles B. Sinclair, Ph. B. M. D., son of David and Sarah (Bryan) Sinclair, of Kingston, Ont., was born on July 7, 1851. He is of Scotch lineage and is descended, on the paternal side, from the old and powerful family of that name in Caithness, Scotland, and on the maternal, from the Rorisons of Dundee, a family equally well known in Scotland. His boyhood days were spent in Buffalo, N. Y. At the age of thirteen, he came to this city and was engaged in mercantile life for several years. In 1871, he began his preparation for the legal ministry. In 1873, he entered Harvard University, graduating in the class of 1877, with the degree of Ph. B. His stay in the ministry, however, was of brief duration. In 1878, he again entered Harvard University and devoted himself to the study of medical science, receiving his degree of Doctor of Medicine in 1881. He then went abroad, spending two years in the hospitals of Paris, London, Vienna and Berlin, giving his time wholly to the study of his chosen specialty, the eye and the ear. During this time, Dr. Sinclair visited the clinics and studied under the direction of many of the celebrated surgeons of Europe, but especially under the preceptorship of Professors Ferdinand von Arlt and Adam Politzer, of Vienna, the first the most celebrated ophthalmic surgeon in Europe, and the latter the greatest authority in matters pertaining to the eye. In 1884, Dr. Sinclair returned to this city and began the practice of his profession. He confines himself strictly to the treatment of diseases of the eye and ear, and is one of the most successful practitioners in the West. He is a member of the Chicago Medical Association, of the Ophthalmological and Otological Society of Chicago, and also is surgeon to the Illinois Eye and Ear Infirmary.

George Fuller Hawley, M. D., son of Dr. George Benjamin and Sarah Hawley, was born in Hartford, Conn., on February 15, 1844. His father was the original projector and founder of the Hartford Hospital, also of the Old People's Home, and was a distinguished physician of that city. His grandfather, Dr. Silas W. Fuller, during the latter years of his life, was superintendent of the Hartford Insane Asylum. Dr. Hawley spent his school-boy days in his native city until he arrived at the age of about seventeen, when he entered Yale College. Upon leaving that institution, he matriculated in the New York College of Physicians and Surgeons, and took his degree as Doctor of Medicine in 1868. He then spent two years in the London and German hospitals, where he finished his medical education, and returned home. In 1873, he was appointed surgeon to the Hartford Hospital. Shortly afterward he determined to limit his practice to the diseases of the throat, ear and nose. In order to perfect himself in this branch of his profession, he re-visited London and Germany, and became the private assistant of Dr. Morell Mackenzie, the celebrated English throat specialist. He was appointed interne of the Throat and Chest Hospital in London, and for nearly two years was the assistant to Dr. E. Woakes, professor of otology at the London Hospital. In 1883, he came to Chicago, where he has since been actively engaged in the practice of his specialty, diseases of the throat, nose and ear. Dr. Hawley has become quite well known in connection with the Chicago Throat and Chest Hospital and the Illinois Charitable Eye and Ear Infirmary. Among other posts of distinction, he is well known as the editor of the Department of Laryngology in the Western Medical Reporter.

The Maurice Porter Memorial Hospital for Children.—This hospital was established in May, 1882, by Mrs. Julia F. Porter, in memory of her son, who died at twelve years of age. At first a dwelling was occupied, having a capacity for only eight beds, but ample grounds have since been purchased, and a building erected, at a cost of over $20,000, with a capacity for twenty beds. Mrs. Porter not only furnished the funds for this purpose, but also pays the yearly expenses of the institution. It is dedicated exclusively to the free care and treatment of children between the ages of three and thirteen. Those having incurable or contagious diseases are not admitted. Children suffering from chronic diseases, injuries of long standing, or deformities, may be admitted if there is a prospect of permanent benefit, on the certificate of the surgeon. The hospital is located at No. 606 Fullerton Avenue.

Officers: Truman W. Miller, surgeon; F. D. Porter, assistant surgeon; Genevieve Gilmore, superintendent.

The Chicago Medical Society.—This society is a prominent feature in the medical history of Chicago. Its members and the interest in its meetings have been increasing every year since 1872. Its officers, from that time to the present, have been as follows:

1872-73—G. C. Paoli, president; V. L. Harlbut, vice-president; W. E. Quine, secretary; S. C. Blake, treasurer.
1873-74—W. G. Dynas, president; V. L. Harlbut, vice-president; W. E. Quine, secretary; C. W. Earle, treasurer.
1874-75—W. E. Quine, president; G. C. Paoli, vice-president; James H. Hutchinson, secretary; C. W. Earle, treasurer.
1875-76—W. E. Clarke, president; T. D. Fitch, vice-president; D. W. Graham, secretary; C. W. Earle, treasurer.
1876-77—E. Ingals, president; H. M. Lyman, vice-president; C. W. Earle, treasurer.
1879-80—E. Andrews, president; R. G. Bogue, vice-president; D. W. Graham, secretary; F. H. Davis, treasurer.

1880-81—R. G. Bogue, president; D. W. Graham, vice-president; Liston H. Montgomery, secretary (who has been elected every year since); F. H. Davis, treasurer.

1881-82—E. Ingals, president; Mary H. Thompson, vice-president; E. F. Ingals, treasurer (re-elected in 1883 and 1884).

1882-83—J. H. Hollister, president; D. W. Graham, vice-president.

1883-84—D. W. Graham, president; R. G. Bogue, vice-president.

1884-85—A. K. Steele, president; C. W. Purdy and C. F. Fenn, first and second vice-presidents.

Liston Homer Montgomery, A.M., M.D., is a lineal descendant of General Richard Montgomery, who was born in 1736, and fell before Quebec, during the Revolutionary War, in 1775, and is the son of John Montgomery and Miss Harriet Newell Willard, who were married on May 19, 1846. He was born in McCutcheonville, Wyandotte Co., Ohio, on August 21, 1848. When he was six years of age, the family removed to Adrian, Ohio, where he remained until he was ten years of age. Until 1861, he attended the public schools and the M. Coliad High School, and then spent two years at Heidelberg College, at Tiffin, Ohio. Early in 1864, he enlisted in Co. "G," 41st Ohio Volunteer Infantry, and served active service in the Army of the Potomac, receiving an honorable discharge at the close of the War. Returning home, he taught school and was connected with the Pittsburgh & Fort Wayne and the Pennsylvania railways until 1869, when he turned his entire attention to the study of medicine, and, in September of that year, matriculated in the Chicago Medical College, from which he graduated, with honors, on March 14, 1871. After serving as house-surgeon and senior resident physician one year at the Mercy Hospital, he began general practice in this city. Dr. Montgomery is a member of the American Medical Association, Illinois State, Chicago Medical, and Chicago Medico-Historical societies, of which two latter organizations he is secretary and diarist respectively, and has so served for several years. He is also an active member of the American Public Health Association, and of the Sanitary Council of the Mississippi Valley. Besides attending to his professional duties, he has contributed largely to various domestic and foreign medical journals, and fills the office of medical inspector of the northwest division of the city, to which he was appointed early in 1885. He is also a member of George H. Thomas Post, No. 5, G.A.R. Dr. Montgomery was married to Mrs. Libbie Lyke Gregor, daughter of Hon. John L. Gregor, on January 25, 1883. They have two children,—Enola Junia and Esther Harriet.

Ransom Dexter, A.M., M.D., L.L.D., was born at Toronto, Ont., on May 18, 1837, and is the son of Rev. Ransom and Lydia (Wilder) Dexter. His parents were natives of the United States, and his grandparents were both commissioned officers in the American Army during the Revolutionary War. His paternal great-grandfather was French Huguenot, who settled with a small colony of that order on this continent about 1640. His paternal side were Welsh, and emigrated to this country about the same time. He attended the public schools until he was fourteen years of age, and then received several years of tuition from the eminent Canadian scholar, Edmund Shepherd, taking special interest in chemistry, physiology, anatomy, and kindred sciences, frequently passing the greater part of the night in reading the treatises of the best authors upon those subjects. When he arrived at the age of twenty, he travelled through the United States. During his travels he had with him a good set of medical books, and as soon as located would begin the pursuit of his professional studies under the instruction of a regular physician. At times he was a prescription clerk in a drug store, at other times would teach. He passed examinations in both city and country, and never failed to receive a certificate of qualifications. In addition to the common school branches, he taught Latin, Greek, chemistry, physiology, philosophy, surveying, the higher mathematics, etc. Thus, having fully prepared himself for a collegiate course, he entered the University of Michigan, and graduated as a Doctor of Medicine, in 1862. He then located at Berrien Springs, Mich., where he remained but a short time, and then moved to Elkhart, Ind., and there stayed until 1865, when he came to Chicago. In this city, Dr. Dexter has become widely known for his contributions to medical and scientific literature. The influence of his pen has been felt in the cause of several good works, notably in establishing statutory laws for the Illinois State Board of Health, which he regards as resulting in more good than any other single act of his life. He is the author of a standard work, which is used as a reference book in the public schools, entitled "The Kingdoms of Nature." This work demonstrates the "following of matter and force into vital and organic organization, and organization into the various types of being, culminating in Man," and dispenses with those technical terms that render most scientific works a "lucus a non lucendo" to the average reader. It is most highly indorsed by the Chicago journals and scientific and educational authorities, and has stamped Dr. Dexter as an author of the very highest order. The Chicago Tribune, in its review of Dr. Dexter's book, after commending it most highly says: "The last chapter, treating of the 'facial angle,' is in fact, if not in words, the most eloquent and existing exposition of the relation between form and function through the whole range of the vertebrate division of the animal kingdom." He is the founder,
curator, and patron of the museum of the University of Chicago, and to him is due the fine collection that institution at present possesses. His private cabinet (one of the largest in versatility of typical specimens in the West) has been carefully preserved, the collection having been conceded as long as the University is in condition to need it.

He is a physician, surgeon and scientist of national reputation, an active and honored member of the Chicago Academy of Sciences, of the State Medical Society of the United States, and of the American Medical Association; he was, also, a member of the Chicago Medico-Historical Society and of the Chicago Philosophical Society. In 1851, he was chosen a member of the University of Chicago.

In 1857, Dr. D. X. C. was appointed lecturer on comparative anatomy in the University of Chicago, retaining that chair one year, when he was elected professor of zoology, comparative and human anatomy and physiology, in the same institution. This chair he filled acceptably to the trustees, pupils, and friends of the University until 1852, when he resigned, in consequence of the constantly increasing demands upon his time, resulting from the growth of his medical practice. Dr. D. X. C. is frequently called upon to consult with physicians and surgeons, sometimes at long distances from Chicago. Within the last twelve years he has twice been employed to go to New York City, to consult with eminent physicians, and has once gone to the interior of the State of Nebraska for the same purpose. He has declined to accept professorships in several different medical colleges. Dr. D. X. C. was married, in 1859, to Miss Lucretia Webster, and has one child, Lydia Aurelia, who graduated, with honors, in the classical course, from the University of Chicago, in June, 1882.

Rev. Thomas A. and J. N. Lilly were born in Wilson County, Ky., in the year 1837 and 1840 respectively. They are descended from an old and well-known family, distinguished in the early history of Kentucky and Maryland, from which latter State the forefathers of the present Lilly emigrated. Dr. Thomas A. Lilly graduated at the Medical School of Louisville, in 1862, and Dr. J. N. Lilly at the Kentucky School of Medicine, in 1865. Both established themselves in Chicago early in the "sixties," and engaged in the practice of medicine. They have continued together ever since, and have attained to wide and lucrative practice, being regarded as among the ablest and most successful physicians and gentlemen of high character.

John Faulkner Hopkins, son of General Timothy Soverell and Mary Ann (Keen) Hopkins, was born in Erie County, N. Y., on December 4, 1828, and is a descendant of an old and prominent English family on the Puritan extraction. His early and subsequent education was obtained in New York State. In 1849, he graduated from the State Normal School at Albany; he was there a school teacher for several years. His lines not having been cast in places sufficiently pleasant to meet with his unqualified approval, he decided, if possible, to better his lot. After due deliberation as to what means to employ to consummate his purpose, he concluded to give the subject of medicine his attention, confident that the labors attendant upon that profession were more in consonance with his ambitious temperament. He came to this city in 1858, and placed himself under the instruction of Professor N. S. Davis. Previous to that, however, he had already prepared himself for his chosen profession by attending two courses at other colleges. He entered the Chicago Medical College, from which institution he graduated in the winter of 1859-60. As soon thereafter as circumstances would permit, he entered upon the practice of his profession here, which he successfully continued until the latter part of 1862, at which time he was induced to locate at Oconomowoc, Wis. In a measure the change proved beneficial. He immediately succeeded in establishing himself in the confidence of the citizens at that place, and obtained a large and lucrative practice. In 1852, he returned to this city, since which time he has been engaged in the active and successful practice of his profession in Chicago. Dr. Hopkins is a gentleman of education, a man of broad and charitable views, liberally supplied with that necessary adjunct, common sense. He is entertaining in conversation and a professional man of experience. He is a member of the Congregational Medical Association. On June 21, 1865, at Chicago, he was married to Elizabeth M. Woodcock, a native of Maine. They have had four children—Edwin, Mary E., Elizabeth (deceased) and Allan H. Their pastor and family are members of the Congregational Church.

Daniel Gove Moore, son of Oliver H. P. and Catherine (Agay) Moore, was born in Illinois City, Ill., on January 9, 1844. Up to his eighteenth year he resided and obtained his early education in his native place. In 1862, he enlisted in the Army and was assigned to Co. "B," 126th Illinois Infantry, and followed the fortunes of his command until the close of the War, being at the siege of Vicksburg, the battles of Clarendon, Little Rock, Jackson, Tenn., and Vicksburg, Ark. On August 12, 1865, he was mustered out of the service at Springfield, Ill. Returning to Illinois City, he entered a select school, where he pursued his studies for one year. Having obtained an average education, he assumed the role of teacher, which he followed for seven years in the immediate vicinity of his home. When he was in his seventeenth year he began the study of medicine. During the term of service in the army and throughout the period of his position as school teacher, he continued his studies with the view of entering upon a course of medical instruction as soon as his limited circumstances would permit. In 1880, he attended the Illinois Soldiers' College at Fulton, and graduated from the literary department. On April 25, 1881, he came to this city and entered the insane asylum at Jefferson, as an attendant, where he remained continuously for three years. In 1876, he matriculated in Rush Medical College, graduating in the winter of 1875, after which he entered at once upon the duties of his profession, in which he has been most successful. He is a member of Union Lodge, No. 9, I. O. O. F.; Court Industry, No. 22, I. O. F., and high medical examiner of that body; he is also a member of D. C. Cregier Lodge, No. 622, A. F. & A. M. On October 8, 1884, at Clarendon, Wis., he was married to Mary E. Radell.

Rufus B. Bartlett was born at Morris, Ill., in 1835, and, until seventeen years of age, he lived the life of a farmer. In 1872, he entered the Morris Classical Institute, and later finished his literary studies at Rock River Seminary. In 1879, he came to Chicago, and accepted a position as clerk in A. C. Bell's drug store, where he earned the money with which to pursue the study of medicine at Rush Medical College, where he graduated, with honors, in the spring of 1879, and began at once the practice of his profession. In July, 1880, Dr. Bartlett was elected by the executive committee of the Central Free Dispensary to be visiting physician for the West Division, and during the following nine months he visited and treated nearly two thousand of Chicago's sick poor, earning for himself such a reputation as won him, at once, the large and paying practice which justly entitles him to stand in the front ranks with the city's best physicians. Dr. Bartlett is a member of the Chicago Medical Society.
HISTORY OF CHICAGO

Medical Society, and is medical examiner for the Royal Arcanum, Alpha Council of the Royal League, and Crescent Council of the Hibernian Order. His influence is not felt in his chosen profession, but he has, also, for years worked for the interest and success of the First Regiment Illinois National Guards, and was commissioned by Governor Cullom as lieutenant of Co. "D," and again honorably and unanimously elected examining surgeon of the Third Regiment Illinois National Guards, in which position he served with credit to himself and the regiment.

HONORÉ PATRICK CRONIN, M.D., son of Antoine and Sophie Cronin, was born on February 23, 1858. His parents moved to Ely, Shefford Co., in 1859, where he attended the public schools, both English and French, until eleven years of age. He then attended the St. Mary's College of Marie ville, N.Y., graduating in 1875. Shortly after graduation he went to Enoshag Falls, Franklin Co., where he began the study of medicine under the guidance of Dr. W. W. Hutchison, member of the Vermont Legislature, with whom he remained three years. In 1875, he matriculated in the medical department of the University of Vermont, at Burlington, taking his degree as Doctor of Medicine in 1879. He then took a post-graduate course, which he finished in the following year, and, in July, located in this city, where he has since remained. He was married on November 25, 1880, to Miss Florestine David, of Montreal, who died in February, 1881. On November 4, 1885, he was married to Miss Winifred McQuaid, to whom he has one daughter, Eulalia, and a son, Honoré W. Dr. Cronin is a member of the American Medical Association, also of the Chicago Medical, Pathological, and Surgical Society of Illinois, Microscopical and the Society for Psychical Research. For several years past he has been engaged in preparing a manuscript for a "Manual of Biology, Practical and Transcendental."  

MATHEW MARIA LOUIS HUTCHISON, son of James and Mariah (Broome) Hutchison, who were married in Ireland, was born at New Ross, Wexford Co., Ireland. When old enough to begin his education, he was sent to Dublin, where he entered The French College, Black Rock, and obtained a thorough classical education during the five years of study there. A born scientist, his thoughts naturally took a scientific turn at an early age, at which time he conceived the idea of adopting the profession of medicine. Accordingly, at the conclusion of his college career at Dublin, he entered the Catholic University at that place, where he matriculated the first year, and was later accepted as a student. In the second year he went to the Royal College of Surgeons, and in the following year he graduated, with degree of Surgeon, in 1881. Immediately thereafter he entered the King's College of Physicians at London, and graduated with the degree of Bachelor of Medicine, and, after also expert in midwifery, from that institute of learning, in the college year of 1882-83. Shortly after his latter graduation, he practiced in the capacity of Government officer, in the district of Scotland, Kilkeel, and, the following year, he was elected an examiner in the Dublin College of Surgeons. During the ensuing year. Desirous of benefiting by the observation and study that a sojourn in London, Eng., and Paris, France, would afford him, he, in 1893, visited the places named and devoted the short time of his holidays to the purposes that had dictated the visit. In the latter part of 1883, he emigrated to this country, coming directly to Chicago, where he began the practice of his profession. Dr. Hutchison's scholarly general, and artistic attainments, both as regards his profession and knowledge in general, have, since his leaving England, he was elected a member of the British Medical Association. He is a member of the Chicago Medical Association, of the Academy of Sciences, of the Union Club, of the American Medical Association, of the American Philosophical Society, and of the American Association of Physicians and Surgeons. In 1886, with his parents he emigrated to this country, locating in Albert Lea, Minn., there he obtained a further education under the instructions of his private school-master. Winnebego, Minn., was his next residence, where he remained a year or more from thence he went to Florid Grove, Parhual Co., Minn. After a short residence there he returned to Albert Lea, and entered a drug store as an apprentice, in which capacity he served until 1877, when he went to Ann Arbor, Mich., and entered the Pharmacetical Department of the University of Michigan, from which institution he received the degree of B.C. in 1879. He then returned to Albert Lea, and, engaging in the drug business, began, in conjunction with that vocation, the study of medicine. Eight months later he returned to Ann Arbor and entered the Medical Department of the University, graduating in 1882, with the degree of M.D. He located in Albert Lea, and began the practice of his profession. The manifold duties attendant upon the lot of a country physician proving too severe, he determined upon a change of location, and, in the fall of 1885, he moved to Leavenworth, Kans. After the winter of that year he moved to St. Louis, Mo., where he engaged in the drug business and taught school, a dual occupation which he followed until 1896, when he located at Springfield, Ill., and, taught school during the winter of that year. In the following spring he accepted a position at Titusville, Penn. In 1896, thinking to better his condition, he went to Cleary, and, securing a position in a general store, remained there until 1898. The spring of that year found him in St. Louis, where he had gone for the purpose of devoting a portion of his time and attention to the study of medicine. Shortly after, he located in St. Louis, he engaged in the drug business and began his medical studies. In 1874, he entered the St. Louis College of Pharmacy and the Missouri Medical College, graduating from the latter institution in 1876. The next day after his graduation, he was appointed United States Commissioner to the Paris Exposition. The ensuing twelve months were passed abroad. The numerous medical colleges and hospitals at Dublin, Glasgow, Geneva, and Rome were visited, where he gathered much valuable information appertaining to his profession. While in Rome, he had the distinguished honor of a private interview with Pope Leo XIII. After returning to New York, he went to Philadelphia, where he visited the drug stores, and, in his interest in the drug business, to accept the professorship of materia medica and therapeutics in the St. Louis College of Physicians and Surgeons. In 1880-81, he pursued his studies in the schools of the United States, and was licensed to practice the healing art in Missouri. In 1883, he came to Chicago, where he engaged in the study of diseases of the ear, throat, and chest. In 1882, during a visit to this city, Dr. Cronin was influenced by friends and a desire for a change of location to make Chicago his home. In November of the same year, he became a resident of the Cook County Hospital. In the latter part of 1883, he was one of the five physicians interested in the inception and establishment of the St. Louis Free Dispensary, which was given to him a position as medical examiner of diseases of the ear, throat, and chest. In 1884, during a visit to this city, Dr. Cronin was influenced by friends and a desire for a change of location to make Chicago his home. In November of the same year, he became a resident of the Cook County Hospital. The following spring he was elected State medical examiner for the Ancient Order of Hibernians, and surgeon of the 1st Regiment Hibernian Rifles. He is commander of the Knights of St. John of Chicago. 

PHILIP PATRICK HENRY CRONIN, Ph. B., A.M., M.D., is the son and youngest of fifteen children of John Gregg and Margaret Kepple Cronin, and was born near the town of Mallow, County Cork, Ireland, in 1846. One year later, his parents emigrated to this country, and directly after their arrival at New York they went to Baltimore, Md. Shortly after a return was made to New York City, where Philip remained until in his tenth year, attending White's School, a private institution. In 1856, he went to St. Catharines, Ont., making that his place of residence during the ensuing seven years, during which time he took the degree of A.B. in the Christian Brothers' Academy. In 1863, he went to study in the Oil City, Penn., where he engaged in the drug business and taught school, a dual occupation which he followed until 1868, when he located at Petrolia City, Penn., and taught school during the winter of that year. In the following spring he accepted a position at Titusville, Penn. In 1866, thinking to better his condition, he went to Clearfield, and, securing a position in a general store, remained there until 1868. The last year of that year found him in St. Louis, where he had gone for the purpose of devoting a portion of his time and attention to the study of medicine. Shortly after, he located in St. Louis, he engaged in the drug business and began his medical studies. In 1874, he entered the St. Louis College of Pharmacy and the Missouri Medical College, graduating from the latter institution in 1875. The next day after his graduation, he was appointed United States Commissioner to the Paris Exposition. The ensuing twelve months were passed abroad. The numerous medical colleges and hospitals at Dublin, Glasgow, Geneva, and Rome were visited, where he gathered much valuable information appertaining to his profession. While in Rome, he had the distinguished honor of a private interview with Pope Leo XIII. After returning to New York, he went to Philadelphia, where he visited the drug stores, and, in his interest in the drug business, to accept the professorship of materia medica and therapeutics in the St. Louis College of Physicians and Surgeons. In 1880-81, he pursued his studies in the schools of the United States, and was licensed to practice the healing art in Missouri. In 1883, he came to Chicago, where he engaged in the study of diseases of the ear, throat, and chest. In 1882, during a visit to this city, Dr. Cronin was influenced by friends and a desire for a change of location to make Chicago his home. In November of the same year, he became a resident of the Cook County Hospital. The following spring he was elected State medical examiner for the Ancient Order of Hibernians, and surgeon of the 1st Regiment Hibernian Rifles. He is commander of the Knights of St. John of Chicago.
of school teacher, a vocation which he pursued until 1875. The study of medicine having attracted his attention some time previously, he entered, in the spring of 1871, the medical department of Trinity University. He graduated in 1873, and was elected to the degree of M.D. the same year. The following year he was made the recipient of the degree of M.D. and C.M. Directly after his graduation, he commenced the practice of his profession in the Province of Ontario, Canada, in which he continued until the spring of 1875, when he returned to Chicago and established himself as a practitioner of medicine. He is a member of Prince Albert Lodge, No. 183, A.F. & A.M., of Port Perry, Ont., and of the Canadian-American Society of Chicago.

assisted him in his practice, more especially in attending the poor, as Dr. Mason was the county physician. He then matriculated in the Bellevue Medical College, New York, and at the same time studied under the tuition of Dr. J. W. Howe, and, in 1850, took his degree as Doctor of Medicine. In a competitive examination given by the University, he secured the appointment and diploma, and was admitted to the medical faculty of Blackwell's Island, and filled that position nearly two years. In the fall of 1851, he came to this city and has since been engaged in active practice. His marriage was solemnized on January 23, 1858, to Miss Hattie, daughter of Charles L. Bigelow, and granddaughter of the late H. W. Bigelow, who was prominent connected with the interests of Chicago since 1858, and was one of her most respected citizens. He was a member of the Chicago Pathological Society. He is also a member of the K. of H. and of the United Workmens, and is medical examiner to the order.

Charles Frederick North is the son of Henry and Mary Elizabeth North, and was born at New Britain, Conn., on April 24, 1854. The greater portion of his early life was spent at his birthplace, where he attended school and prepared for a college course at Yale, which he had decided upon. In 1874, a combination of circumstances led him to leave Yale, and he made a trip to Europe, where he passed two years on the continent, visiting places of historic interest. Returning in 1876, he spent a short time at his native place, and then went to St. Louis, where he remained two years. During his residence at St. Louis, he conceived the idea of studying medicine. Believing that Europe offered better facilities for the study of the science than could be obtained at home, he sailed for Germany, where he entered the Kaiser Wilhelm University at Strasbourg, and pursued his studies during the winter of 1875-76. Leaving Strasbourg, he went to Leipsic, and became a student in the University at that place, where he remained nearly four years. On the expiration of his term he was subsequently graduated at the University of Greifswald; following which, he returned to the University of Leipsic and completed his studies in three terms, graduating in 1879.

Immediately after his graduation, he entered the German University at Prague, taking a course of lectures. In the summer of 1884, he sailed for America. After a short visit to his former home, he came to Chicago, and began the practice of the profession, to the study of which he had devoted five years in foreign schools. Though one of the youngest of the medical practitioners in Chicago, he ranks high in his profession, in addition to which he is a scholar of more than ordinary attainments.

Denis Collins is the son of Timothy and Julia (O'Sullivan) Collins, and was born at Derichal, in County Cork, Ireland, on October 17, 1852. His early education was obtained from a private tutor. In 1870, he went to Cork, and entered Queen's College, where he pursued his studies for two years. Returning to Derichal, he taught school for eight years, and in 1877, he emigrated to this country. Locating in the East, he entered the University of the city of New York, and began a course of medical studies, graduating in 1880. Directly thereafter he entered the Charity Hospital, where he remained employed for eight months. Near the close of that period, he became associated with the Lunatic Asylum on Blackwell's Island. After a service of nine months, he was transferred to the Insane Asylum on Hart's Island. In 1884, he severed his connection with the institution, which he had served so well, and came to Chicago. Dr. Collins is sociable in manner, an interesting conversationalist, and a careful and conscientious practitioner. He married Mary Catherine L'Hour, to whom he was married on February 26, 1884, in the City of New York, died in Chicago on April 27, 1885.
Among the number of graduates in 1885, there were seventeen women.

The faculty since 1871 has been as follows:

Professor of theory and practice of medicine: A. E. Small, 1881-86; T. S. Hoyne, 1882-86; H. B. Fellows, 1882-86.

Professor of materia medica and therapeutics: Temple S. Hoyne, 1883-85; W. J. Hawkes, 1885.

Professor of obstetrics and diseases of women and children: R. Lludieu (dean of the faculty), 1861-86; S. Leavitt, 1879-86.

Professor of chemistry and toxicology: R. Weleth, 1874-79; C. Gilmore, 1886-87; D. S. King, 1888-85.

Professor of general and descriptive anatomy: S. P. Hedges, 1874-87; H. P. Cole, 1878-79; C. E. Laning, 1879-86.

Professor of physiology, histology, and sanitary science: W. J. Hawkes, 1876-79; E. S. Bailey, 1879-86.

Professor of the principles and practice of surgery: Willis Danforth, 1874-76; G. A. Hall, 1876-86; G. F. Shailer, 1885-86.

Emeritus professor of materia medica and therapeutics: David S. Smith, 1875-86.

Registrar of the Faculty: J. E. Gilman, 1883-86.

George Alexander Hall, M. D., was born in Sheridan, Chautauqua Co., N. Y., on June 5, 1834. His earlier education was received in the common district school. At the age of fourteen, he entered the Western University at Fredonia, N. Y., where he remained two years. He then entered Western Academy, at Westfield, N. Y., from which he graduated at the age of sixteen. He was then graduated from Yale College, but his inclinations turned towards the medical profession, and, in the fall of 1856, he began the study of medicine with Dr. L. M. Kenyon, at Westfield, N. Y., being desirous of working his own way, he engaged in school-teaching, which vocation he followed wintered this during his necessary means to prosecute his studies. In the fall of 1858, he attended medical lectures at the Berkshire Medical College, Pittsfield, Mass. In August, 1858, he went to Philadelphia, where he remained until the following April. He took the long clinical course at the Jefferson College and Blockley Hospital and the regular course at the Pennsylvania Homeopathic College, where he graduated in the spring of 1859. Returning to Westfield, he took the practice of his preceptor, Dr. L. M. Kenyon, who removed to Buffalo. The following year he was married to Miss Frances S. Sherman. Dr. Hall built up a large and popular practice at Westfield. Fluttering inducements being offered, he removed to Chicago in May, 1872, where he has a large practice and is recognized as the most prominent surgeon of the Homeopathic school in the North. In the fall of 1873, he was elected to the faculty of Hahnemann Medical College. The first year he filled the chair of surgical pathology and surgical anatomy. The following year he was elected professor of obstetrics and diseases of children, which chair he has filled until the fall of 1887, when he was elected professor of clinical and operative surgery, which professorship he still holds.

He has been surgeon-in-chief of Hahnemann Hospital since July, 1876, and general surgeon of the Chicago Surgical Institute, which he founded on March 1, 1884.

Nicholas B. DeLamater is the son of Ira Marsh and Elizabeth (Hilbig) DeLamater, and was born in Guilford Center, Albany Co., N. Y., on February 21, 1839. In 1840, his family moved to Albany, N. Y. At that place he received his education and grew to manhood. His patriotic nature prompted him to enlist in his country's service, in 1862, when he was commissioned second lieutenant and served in the 135th Infantry, U. S. Army, under command of that of major, to which rank he was promoted, and went to Richmond, Ind., where he engaged in the wholesale dry goods business. Circumstances compelled him to abandon this enterprise, in 1869, and he then went to the Northwest, McHenry Co., Ill., where he entered the drug business. Dr. DeLamater comes of a family of physicians that for eight generations have been in the practice of medicine. When but twelve years of age he began his studies, not so much from choice as from the force of inheritance; that others found difficult to conquer he had but little difficulty in mastering. His advancement was rapid under the preceptorship of his father, and his future was easily predicted.

In 1866, he entered the physicians and Surgeons, where he continued one term. In the winter of 1871, he came to Chicago and began a course at Hahnemann Medical College, graduating in the spring of 1875, since which time he has resided in Chicago.

Dr. DeLamater is a scholarly gentleman whose abilities have, on many occasions, been acknowledged and honored. As a physician he occupies an enviable position. He is a member of the Chicago Academy of Homeopathic Physicians and Surgeons, the Illinois Homeopathic Medical Association, the Chicago College of Homeopathy, the Western State Homeopathic Association and the Union League Club of Chicago. In 1874, he was lecturer on medical botany, pharmacology and proverbs in Hahnemann Medical College; in 1875-77, he was appointed clinical lecturer on mental and nervous diseases, in the Chicago Homeopathic College; in 1880, he was elected manager of the College; in 1885, he was re-elected manager of mental and nervous diseases; and in 1882-83, he was again elected manager. He now occupies the chair of mental and nervous diseases. On November 3, 1871, at Woodstock, Ill., he was married to Miss Eliza Julieta Link.
Gillman was made secretary of this Society during the winter, and in the spring, deeming his services of more value, went to work under the Society's auspices as visiting physician of the Herrick Free Dispensary, in Chicago. He has since continued in active prac
tice, and has won the esteem of thousands, who hold him in high regard for his charitable work in the dark days of 1871. He was
elected to the chair of Sanitary Science in Hahnemann College in 1883, and is a member of the advisory council of the Board of
Health of Chicago. He belongs to the National, State and County medical and clinical societies. Dr. Gillman was married at Adrian,
Mich., on July 26, 1860, to Miss Mary D. Johnson, of Westboro', Mass. They have one son, William T., who is connected with
the firm of Jones & Laughlin.

ALEXANDER KING CRAWFORD, M.D., was born in Glasgow, Scotland, on Feb. 13, 1853. His parents emigrated to Canada and settled in Hamilton, Ont. His early education was received in the
grammar and high schools of that city. In 1869, he went to Petrolia, Ont., where he was engaged with his father in the oil biz
ness nearly four years. His health demanding a change of living,
he spent two years sailing on the lakes and Atlantic sea-board.
On leaving that sailor life he connected himself with the Hamilton Times, with which he remained for four years. During this time
he began his medical studies under Dr. G. E. Husland. In 1885,
he came to Chicago and matriculated in the Hahnemann Medical College, graduating in 1889. He was elected demonstrator of
anatomy of his Alma Mater in 1881, but severe illness obliged him to give up his position. While recruiting his health he visited
hospitals of New York, Glasgow, Edinburgh and other European
cities. Upon his return, he entered upon active practice in this
city in conjunction with Dr. Reuben Lucas, and in the fall of the
year 1889 was elected secretary of the Clinical Society of the Hahnemann Hospital, which position he still retains. Soon thereafter he received the appointment of the clinical professorship of physical diagnosis in the Hahnemann Medical College. He has contributed largely to a
valuable work, entitled "A System of Medicine," which is the most recent and extensive work on Homeopathic practice, the pro-
duct of the leading homeopathic physicians of the United States,
and whose papers to societies and journals are quite numerous.

HAHNEMANN HOSPITAL.—This hospital, which is located on
Groveland Park Avenue, on a lot (originally donated for the purpose by Hon. J. Young Scammon) directly east of Hahnemann College, on Cottage Grove Avenue, is the largest homeopathic hospital in the Northwest. It is a charitable institution, under the control of a board of trustees. It was in operation at the time of the great fire; and, instead of sharing with so many other institutions the losses of that destructive event, was really benefited by it. By a pro rata distribution of the funds remaining in the hands of the Relief and Aid Committee, a year after the fire, when its work was ac
complished, the amount of $15,000, which, according to the terms of the donation, was expended in adding a wing to the old building. The institution has not, however, escaped losses by fire. The valuable addition, including a spacious amphitheatre, which had been built and paid for in 1881, was, in October, 1883, greatly damaged by fire, the amphitheatre and several rooms having been entirely destroyed. These have been replaced by new ones, which are even an improvement, for convenience and adaptability, upon the portion consumed. The rooms have been also remodeled, new sub-clinic rooms having been provided, and the old wards thoroughly renovated, so that now the hospital is in a better condition than it ever was before. The clinical instruction in this hospital is exclusively given by the teachers in Hahnemann College.

Hospital Faculty.—Professor of medical and surgical diseases
of women: R. Ludlam.
Professor of medical and skin diseases: T. S. Hoyne.
Professors of clinical surgery: George A. Hall and George F.
Shears.
Professor of medicine: W. J. Hawkes.
Professor of eye and ear diseases: C. H. Vilas.
Professor of diseases of the nervous system: H. C. Fellows.
Professor of diseases of children: C. E. Loring.
Professor of clinical midwifery: S. Leavitt.
Professor of physical diagnosis: H. B. Fellows and A. K.
Crawford.

Microscopist: E. S. Bailey.
Home physician: G. E. Bushnell.
Home surgeon: H. F. Stevens.

In addition to the treatment of patients in the Hospital, there is also a dispensary in which more than fifteen thousand prescriptions are annually made, all medicine and advice being furnished free.

The hospital is sustained by receipts from patients, and contributions, the faculty of Hahnemann College having contributed $4,000 yearly from its earnings.

Reports can only be given for the years 1883 to 1885, for the reason that the records were destroyed by the fire of 1883:

MILTON DAVID ODSON, M.D., was born in Canada, near
Toronto, on April 10, 1836. His boyhood years were spent at home and in attendance upon the public schools at Toronto. At the age of
year he entered the Medico, N. Y., where he took a classical course of two years. He then returned to Toronto and took up the study of medicine. Pursuing his professional studies at nights and during the day continuing the study of the classics, at the end of two years he prepared himself to enter and matriculated in the Victoria Medical College, Toronto. His health failing, he
went to Fonda du Lac, Wis., where he resumed his medical studies in the office of Dr. Pitchen. After a brief stay he came to this city and matriculated in Hahnemann Medical College, and took his degree as Doctor of Medicine. Returning to Fonda du Lac, he began practice, and shortly afterward was appointed physician to the Wisconsin State Prison at Waukon. Resigning his position, he removed to Rockford, Ill., where he remained three years, practic-
ing his profession with marked success, and then located in this city. He was married on December 31, 1864, to Miss Belle Hor-
man, a descendant of one of the oldest families of that city. The
doctor has one daughter, Belle.

BERNARD GUSTAVUS HAHNEMANN MESSLER, M.D., practicing
as Dr. G. Messler, was born in 1826, at Eichenbuch, Silisia, Prus-
sia. He was educated at the minor schools till he entered the Uni-
versity of Leipzig, in Saxony, to prepare for the ministry. In 1851, he
graduated from the theological department of that University,
was ordained and sent as a missionary by the Evangelical Lutheran Missionary Society of Leipzig, to the Indians, at a station known as Bethany, in Grant Co., Mich. He afterward lived in Isabell County, Mich., in the same State. During the eighteen years of his life, he had many escapes, only being spared by reason of his recog-
nized kindness and consideration for the natives. In 1869, he took
charge of a parochial school at Saginaw City, Mich., where he worked for two years. In 1871, he came to Chicago and soon after entered
Hahnemann Medical College of this city, where he graduated in 1873, practicing in this city since then. Dr. Messler has been mar-
ried three times, and is now a widower. He has three sons living, one, aged twenty-seven, is also a doctor, the next, aged twenty-four, is a
minister, and the youngest, aged fifteen, is at school. Dr. Messler
has assisted at the compiling of an Indian Dictionary, and has trans-
muted several works from English into German. He is an ac-
tive member of the Illinois State Homeopathic Society and also of the
Homeopathic Clinical Society of Chicago.

WILLIAM MATHEW WILKE is the son of Jacob and Margaret
(Stubbs) Wilke, who were natives of Germany, and came to
America. The home of these ancestors was in Hesse-Nassau, near
Frankfort, and they were of poor condition. Dr. Wilke was born in May 21, 1837. Two years later the family emigrated to America, making Philadelphia their temporary resi-
dence. In 1841, they removed to Pittsburgh, Pa., and there
Dr. Wilke was educated. He attended a school and a private
academy, acquiring much of his education, until 1858, when he went to St. Louis and commenced life on his own account, in the capacity of clerk, where he studied medicine under a prominent physician, and attended the
Humboldt Medical College of that place. At the breaking out of the
War, in 1861, he abandoned his medical studies, and was immedi-
ately called as assistant army surgeon and assigned to the
Missouri, in which capacity he served until 1865.
to St Louis, he remained there a short time, and then left for Den- 
ver, Colo., where a stay of one year was made; then followed a second
at his former home, where he resided until he was ad-
gaged in the practice of medicine. In the latter part of that year
in 1883, he attended the Hahnemann Homeo-
pathic Medical College and passed a year in that insti-
tution. Dis-
continuing his studies there, he entered the Chicago Medical College,
graduating in 1875. With his family in Chicago, he
entered the Albion,
In 1883, they came to Chicago, and began practicing and the study of medicine. In 1876, he attended the Hahnemann Homeo-
pathic Medical College and passed a year in that institution. Dis-
continuing his studies there, he entered the Chicago Medical College,
graduating in 1875. With his family in Chicago, he

Chicago Homeopathic College is said to be the finest and largest edifice devoted to the teaching of this school of medicine. It has an amphitheatre capable of seating five hundred students, well lighted and ventilated. It has also two large lecture-rooms, with a smaller one for sub-classes. These are four large clinical rooms, with separate waiting-rooms for each; and two spacious dissecting-rooms. The chemical and microscopic laboratories are large and well equipped, besides containing an extensive anatomical museum, reading-room, library, reception and cloak rooms and offices. The building has a fine appearance and is furnished in excellent style. It cost, with the lot on which it is situated, about $45,000.

The following physicians compose the faculty:

Professor of clinical medicine and diseases of the throat and chest: J. S. Mitchell, 1876-77.
Professor of institutes and practice of medicine: S. P. Hedges, 1876-77; J. S. Mitchell, 1877-89.
Professor of operative surgery: Albert G. Beebe, 1882-86.
Professor of principles and practice of surgery and clinical surgery: Albert G. Beebe, 1870-82; Charles Adams, 1876-82; E. H. Pratt, 1882-86.
Professor of gynecological surgery: Willis Dunforth, 1876-82.
Professor of diseases of women and children: John W. Streeter, 1876-86; George F. Roberts, 1882-86.
Professor of obstetrics: R. N. Foster, 1876-86.
Professor of ophthalmology and otorhinology: W. H. Woodyatt, 1876-80; J. H. Buffum, 1880-86.
Professor of materia medica and therapeutics: E. M. Hale, 1876-82; A. W. Woodward, 1876-77; H. N. Hobart, 1882-86.
Professor of anatomy: E. H. Pratt, 1876-82.
Professor of anatomy and principles and practice of surgery: E. H. Pratt, 1882-86.
Professor of dermatology and medical jurisprudence: John R. Kippax, 1876-79.
Professor of principles and practice of medicine and medical jurisprudence: John R. Kippax, 1879-86.
Professor of physiology: R. N. Tooker, 1876-81.
Professor of diseases of children: R. N. Tooker, 1881-86.
Professor of chemistry and technology: Kornyn Hitchcock, 1876-77; Clifford Mitchell, 1884-82.
Professor of analytical and comparative materia medica: A. W. Woodward, 1872-81.
Professor of materia medica and clinical professor of therapeutics: A. W. Woodward, 1881-86.
Professor of mental and nervous diseases: N. B. Delamater, 1878-86.
Professor of physiology and histology: W. F. Knoll, 1883-86.
Professor of sanitary science: L. C. Grosvenor, 1883-86.
Professor of general and descriptive anatomy: Curtis M. Beebe, 1884-86.
Demonstrator of anatomy: A. W. Blunt, 1875-79; C. F. Ely, 1879-80; Sumner Davis, 1881-85; Howard Crichton, 1885-86.
Lecturer and demonstrator of histology and microscopy: F. K. Day, 1884-85; R. K. Langston, 1885-86.
Demonstrator of physiology: O. C. Snyder, 1884-85.
Vice-presidents: R. N. Foster, 1876-86; W. H. Buffum, 1876-86.
Vice-presidents: R. N. Foster, 1876-86; W. H. Buffum, 1876-86.

Chicago Homeopathic College.

Harvey, 1876-82; O. W. Potter, 1876-84; E. H. Pratt, 1876-86; C. H. Buffum, 1876-82; W. H. Buffum, 1876-86; D. B. Woodrow, 1876-86; M. D. Adams, 1876-82; E. W. Woodward, 1876-86.

The Central Homeopathic Hospital and Free Dis-
Hartley Pratt was born at Towanda, Penn., in 1840, and is a son of Dr. Leonard Pratt, who is noted as, perhaps, one of the most eminent physicians in Illinois. In 1852, his father removed to Carroll County, Ill., where Edwin received his early education. At the age of sixteen, he went to the Mount Carroll Seminary and remained one year. At the end of that time his father removed to Wheaton, Ill., in order to afford his son the advantages of a collegiate education; Edwin, at that time, being entered as a student at Wheaton College. After being there for a year, and while winning for himself a high place in his class, together with the esteem and respect of both students and professors, an episode occurred which resulted in his leaving college. This was the discovery by Dr. Blanchard, the president of the college, that Edwin

college; when, therefore, the chair of anatomy became vacant he was elected to fill it. In order to more thoroughly prepare himself to fill this important chair, he spent several months in special work and study in the anatomical departments of some of the Eastern medical colleges. This chair in Hahnemann College was filled by Dr. Pratt, with great acceptability for three years, and he achieved the prominent success which is very remarkable in so young a man. As a lecturer, he is clear and forcible and conveys to his listeners an intimate knowledge of the subject. Being among the finest anatomists and surgeons of the city, it only requires the capacity to clothe that knowledge in instructive phraseology. Outside of his college work Dr. Pratt has a very large private practice, and in his treatment of disease he has attained a distinction which places him in the front rank of the professional men of Chicago. His latest discovery of papillae and pockets—and the central thought, relative to the orifices of the body, thereby demonstrated—has distinguished him as one of the most eminent surgeons of his age and country. He is a member of the State and National Medical associations; has received the degree of Master of Arts, and is a valued contributor to various medical journals. He married Miss Isla M. Bailey, of New York. They have one child, named Edwin Bailey. They have lost a daughter named Isabelle, three years older than the boy.

Mary Weeks Burnett, M.D., eldest daughter of George J. W. and Elizabeth (Powell) Burnett, was born in Canasvier, Knox Co., Ohio, on October 14, 1842. It is tersely observed that "the poet is born"; it may be aptly said, with reference to Dr. Burnett, that the physician is also born, as she inherited her fondness for the life of a medical practitioner from her grandfather, Dr. John Powell, whose constant companion she was from childhood up to her twenty-first year. In 1861, she became the wife of John O. Weeks, a man of exceptional mental attainments who, at that time was studying for the ministry, and by whom she has three children, two of whom, Netta E. and George H. Weeks, are living. Ten years later, in 1874, she became a widow. The first step in the direction of a medical education was taken in 1874, when she attended the New York Medical College, at which place she received the benefit of a year's course of medical lectures. In the spring of 1877, she came to Chicago, and entered the Chicago Homeopathic College, where a year was passed in acquiring a further knowledge of the science the inclination for which had manifested itself in the years of her childhood. She devoted another year to study in Hahnemann Medical College, graduating in the spring of 1879. A few weeks later she opened an office at her present location, Central Music Hall. Dr. Burnett has been remarkably successful in the treatment of the cases that have come under her care. She is not a general practitioner; her entire time is devoted to nervous and mental diseases, in the treatment of which she has acquired an extended reputation. In 1872, Dr. Burnett was the prime mover in the organization of the Chicago Red Cross Society, of which she is vice-president. She is the national superintendent of the department of heredity of the Woman's Christian Temperance Union, and president of the National Temperance Hospital and Medical College Association. The college and hospital is located on Cottage Grove Avenue, opposite the Chicago University. Dr. Burnett is medical examiner for several insurance companies, and is also the editor of "The Journal of Heredity," a popular scientific quarterly, a valuable magazine not only for the medical profession but for all students of science. Her life, almost from girlhood, has been a busy one and worthy of the success that has crowned it. Her marriage to her present husband Robert A. Burnett, took place in Chicago on October 15, 1881.

Lemuel Conant Grosvenor, M.D., was born at Paxton, Mass., in 1833, and is the eldest son of Deacon Nils N. and Mary A. Grosvenor. He entered Williston Seminary, East Hampton, Mass., when quite young, and later the high school in Winchester, where he remained four years. He then pursued a course of normal studies under private tutors, and entered the profession of teaching, in which he attained distinction, being for nearly seven years master of the old Mother School in Winthrop and of Boston. During these years the leisure moments were improved in laying broad and deep the foundations of his chosen profession and life-work. To his cherished plans, he yielded the desk of the school-room for the duties of a physician's office. He entered with characteristic diligence and enthusiasm upon the curriculum of studies necessary to the completion of his medical course, and, in due time, graduated with honor from the
Cleveland Homeopathic Medical College, in 1864. The year following, he married Miss Ellen M. Frouty, of Dorchester, Mass., who is remembered for her pious and affectionate nature, and her devoted care of the education and Christian culture have since been so helpful to him in realizing some of his cherished plans. The doctor is the father of eight children, five of whom are now living. He first settled in Peoria, Ill., where he remained till the age of Wilton, N. Y., in 1865, and thence to Chicago, in 1870. In the great fire he was the only physician left on the North Side whose home was not destroyed, the fire coming within three doors of his residence. After taking up and nursing several sick and wounded soldiers in his professional work with the sick and crippled in the churches, schools-houses, police-stations and open prairie.

Dr. Grenville is professor of sanitary science in the Chicago Homeopathic College, and was formerly lecturer on anatomy and morbid anatomy in Hahnemann Medical College. He is president of the Chicago Academy of Homeopathic Physicians and Surgeons, president of the American Peculiodical Society, and member of the American Institute of Homoeopathy. He is a member of the Lincoln Park Congregational Church, and was formerly president of its Board of Trustees. He is also member of the Congregational Club of this city. As a writer the doctor is clear and concise, is contributor to medical and educational journals, and author of "Infant Hygiene" and "How to Dress our Babies." He is an easy, graceful speaker, a fluent inspirer, and a genial companion in family life and in the society of his many friends. He very properly popular lectures on "Our Boys," "Our Girls," "Home Sanitation," etc., etc., have been well received, and are accomplishing great good.

CHARLES GORDON FULLER, M.D., F.R.M.S., was born at Jamestown, N. Y., on April 9, 1856. He comes of a well known New England family, his father, Frederick A., being a direct descendant of Samuel Fuller of Providence, R. I., and member of the Royal Society of London, England. Coming to Chicago, he undertook the study of medicine and surgery, in the Chicago Homeopathic Medical College, from which he took his degree of M.D., and I. M. in 1879. He is at present instructor in the Central Free Dispensary. Being elected demonstrator of histology and microscopy in the faculty of the college, he lectured in that department, at the same time continuing the pursuit of the special diseases of the eye and ear, under the private instruction of the late Dr. W. H. Woodyatt of this city, with whom as student and assistant he remained three years. At Dr. Woodyatt's death he left Chicago, and returned to New York, to continue his special studies. There he attended lectures at Belden and the College of Physicians and Surgeons, taking special courses at the Ophthalmic and Aural Institute, Manhattan Eye and Ear Infirmary, and the New York Ophthalmic Hospital. At the latter institution, he received the special degree of O. et A. Chir., and afterward an appointment to its surgical staff, in which capacity he served until his death in 1883, when he now practices, making a specialty of diseases of the eye and ear, and the position of eye and ear surgeon to the Chicago Avenue Free Dispensary and the South Side Bethesda Medical Mission. On June 30, 1882, he married Miss Nellie M. Parson, a daughter of the late Hon. John W. White, of New York City. Dr. Fuller is a fellow of the Royal Microscopical Society of England, member of the American Association for the Advancement of Science, fellow of the American Pathological and Microscopical Societies, member of the American Academy of Sciences; member of the Illinois State Microscopical Society; fellow of the Chicago Academy of Sciences; member of the American Institute of Homoeopathy; the American Homeopathic Ophthalmological Society; the Illinois Homeopathic Medical Society; the Medical Science Club; and the Academy of Homoeopathic Physicians and Surgeons of this city; and the following:

CLIFFORD MITCHELL, M.D., was born in 1854, on Nantonuck Island, Mass., and is the son of Francis M. and Ellen Mitchell, his mother's maiden name being Mitchell also. Dr. Mitchell is a descendant on his mother's side from the family of the Rev. Mr. Franklin, and on his father's side is related to Maria Mitchell, the astronomer, being her nephew. He came with his parents to Chil

...
Cook County Hospital. Dr. Newman is a member of the Illinois State Institute of the Academy of Physicians and Surgeons, and is assistant surgeon of the Ist Regiment Illinois Infantry.

Dr. DONALD N. AUDISI, son of John and Magdelena (Rapp) Schneider, was born on October 25, 1856, at Muscatine, Iowa. When he was three years of age his parents moved to this State. His father being an evangelical minister, the son lived somewhere near him until his thirteenth year, when his education was acquired in different sections of the State. While in his seventeenth year, he entered upon a college course at Naper
ville, Ill., and in 1876 graduated in the Northwestern College, at Evanston, Ill., for three months he pursued his studies, and successfully terminated them in 1877. When but a boy of ten he evinced a marked inclination for the study of medicine; as he grew older the desire for a knowledge of medical science became stronger. At the close of his undergraduate course he saw his way clear to effect the consumption of those early matured plans; quitting Naperville a short time after, he came to Chicago and entered the Chicago Homeopathic Medical College, in which he took a three years' course, graduating in March, 1881. He then decided to begin here the practice of his profession, in which he has met with deserved success. Dr. Schneider gives promise of attaining eminence in the profession of which he is one of the youngest members of the local body. He is a member of the Chicago Academy of Homeopathic Physicians and Surgeons and the Illinois State Society of Homeopathic Physicians. Following his graduation he lectured during three terms, in the Chicago Homeopathic College, on histology and microscopy. On April 25, 1885, in this city, he was married to Miss Carrie Isabel Tucker. S. A. G., M.D., was born January 5, 1855, in New York City. He received his preliminary education at the public schools, then attended the College of the City of New York. In 1872, he joined the Bellevue Hospital and also the College of Physicians and Surgeons of New York City, devoting two years in attendance on the medical institutions contemporaneously. In 1874, he entered the New York Homeopathic Medical College, where he graduated in the class of 1876-77. During the following year he was one of the visiting physicians and interne inspectors of the New York City. In 1878, he came to Chicago, where he has been practicing to the present time. For the three years ending with 1881, he was an assistant in the Chicago Medical College as lecturer on pathological anatomy, demonstrator of psycho-anatomy, and assistant to the chair of surgery. He is a member of the American Institute of Homeopathy and the Illinois State Medical Association, and is medical examining officer of the National Board of Health. He was joint author with the late Dr. Cooke, of Chicago, of "Antiseptic Medication." Dr. Ely was married in September, 1886, to Mrs. Elizabeth A. Barrell, of Chicago.

Chicago Academy of Homeopathic Physicians and Surgeons. This society is the successor of the Cook County Homeopathic Medical Society, from which it was re-organized in 1875-76.

It is in a flourishing condition, and its meetings, which are held monthly at the Grand Pacific Hotel, are well attended and of growing interest to the profession.

Officers, 1887-88.—L. C. Groswenor, president; F. H. Gardner, vice-president; R. W. Comant, secretary and treasurer.

FREDDIE SCHUEMANN, son of Jacob and Catherina (Ressler) Schuemann, who were natives of, and were married at, Worms, Germany, is the youngest of fourteen children, and was born in the city of Ham, Germany, on February 15, 1841, the age of five he moved with his parents to Wiesau, a short distance from the city of Ham, where he resided until his sixteenth year, and where he received much of his early education. Wiesau attracted his attention, and thither he went, making that famous watering place his home for two years. Being of a nomadic disposition, an inherent trait of character, he found it inconvenient to remain in any one place. Eins was next visited for a few months. A visit to Cologne, Dusseldorf, Elberfeld, where he lived a year, and Hamburg followed. Concluding the idea that America offered better advantages than did his native country, he sailed from Hamburg for these shores. Arriving in this country his first stopping place was Newark, N. J., where, in the capacity of clerk, he resided for two years. Prior to this period in 1874, he came to Chicago and procured a situation as clerk. While in Chicago he employed his spare time to the reading of medical books, which so impressed him that he determined to make himself familiar with the work of the leading medical men of the day. In 1872 he entered the Chicago Homeopathic Medical College. For four years he gave his entire attention to the study of medicine. In the spring of 1879, he graduated, and left, shortly after, for Omaha, Neb., where he began the practice of his profession. Returning to Chicago a year later, he settled here permanently, since which time he has established quite a large practice. On September 27, 1875, in Chicago, he was married to Catherine Mikes.

Dr. COURTESY L. CANFIELD, son of John and Magdelena (Rapp) Schneider, was born at Kalamazoo, Mich., on February 2, 1856, where thirty years of his life were spent. When about fifteen years of age he worked with his father, who was a cabinet-maker, of which trade he became a thorough master. He was then determined upon studying medicine, and commenced by devoting his spare time thereto under the instruction of Dr. A. B. Cornell. So pleasantly did he become interested in the profession that he officiated at all accidents that occurred in his father's factory. Finding that a residence in Kalamazoo limited the acquiring of the medical education he desired, he came to Chicago in the fall of 1880, and took a course of study in the Chicago Homeopathic Medical College, graduating in 1882, the fourth student in his class. He entered at once upon his duties as a physician, laboring faithfully to obtain the position that he felt himself worthy of in the medical fraternity and which he has made great progress in attaining. He is a member of the Illinois State Society of Homeopathic Physicians and medical examiner for the Order of Chosen Friends Benevolent and Protective Society. He was married on July 8, 1875, at Fitchburg, Mass., to Miss Lillie M. Grant, of that place, who died, in 1877, leaving one child. He again married on April 15, 1880, at South Bend, Ind., Miss Lizzie B. Roberts, by whom he has one child. Dr. Canfield is an amateur artist and sculptor of great promise, and his ability, talents which he avers are of inestimable value to him in his practice, especially to that portion appertaining to surgery.

The Woman's Homeopathic Medical Society was organized on April 17, 1879. It holds monthly meetings, and has as its object "the development of high professional attainments, mutual encouragement, and the assistance of women in the profession in every direction." The society is steadily increasing in membership, and the interest in the meetings is kept up by the reading of valuable papers and discussions.

Officers.—Presidents: 1879, Julia Holmes Smith; 1880, Leila G. Beedell; 1881-82, Caroline E. Manning; 1883, Jennie E. Smith; 1884-85, Julia Holmes Smith. Vice-presidents: 1879, Rachel Speckman; 1880, Emily Spork; 1881-82, F. B. Wilkins; 1883, Caroline E. Manning; 1884, Jennie E. Smith; 1885, Anna M. Parker. Secretaries and treasurers: 1879, Leila G. Beedell; 1880, Caroline E. Manning; 1881-82, R. Abbey Underwood; 1883, Helen Heffron; 1884, Corsetta T. Carnell; 1885, C. E. McAllister.
About that time she began an attendance at the Homoeopathic Medical College for Women, an institution that had been opened for the purpose of promoting the study of medicine, a privilege that the Homoeopathic Hospital College at that time considered a branch of education united for women. Her progress was rapid. In order to defray the expenses of her course she became the assistant of Mr. C. K. Merrick, a prominent practitioner of Cleveland. So, between laborious study and exacting practice, she worked incessantly for success. In February, 1871, she graduated at the head of her class, of which she was valedictorian. At the banquet which followed the graduating exercises, the professor of materia medica presented her with a special certificate in recognition of her ability; this was followed a little later by her election as professor of anatomy. Four months were then passed in the pursuit of her profession, in the dissecting-room, with the privilege of dissecting the bodies of several hundred that were destroyed for the medical profession.

In 1879, having become the assistant of the professor in anatomy, she entered a medical practice at Port Wayne, Ind. In the autumn of 1872, the Homoeopathic Hospital College and the Women's College became one and the same, of which institution Dr. Canfield was appointed to the chair of demonstrator of anatomy, and graduated for a second time. In the fall of 1872, Titusville, Penn., became her home, where, in the course of her stay of ten years, she became an influential member of the profession and established an extensive practice. The reduction of the population compelled her removal, and Indianapolis, Ind., was visited, where a stay of seven months was made. On account of failing health, in 1882, she came to Chicago, where she still resides, and where she has met with much of the success she attained in other localities. Dr. Canfield was the first woman who was elected and served as an officer in the American Institute of Homoeopathy, the oldest medical body in the United States. She is also a member of the Illinois State Medical Society, the Women's Homoeopathic Medical Society, and the Hahnemann Clinical Society.

**ECLECTICS.**

**Bennett Medical College.**—Since the fire of 1871, which destroyed the building then used for collegiate purposes, the growth of this institution has been satisfactory to its trustees. In 1873, a college edifice was erected at North 111-13 State Street, at a cost of about $65,000. It contains four lecture-halls, capable of seating three hundred and fifty students. One of these, built in the amphitheatre style, is used for surgical and anatomical lectures and demonstrations. It has a dissecting-room, which accommodates one hundred and twenty-five students; the museum and chemical rooms are fully supplied with specimens and apparatus. It contains, also, a library, reading-room, and offices.

The Bennett Hospital, situated upon the college grounds, it is connected with it by covered ways.

The Free Dispensary, connected with this college, is conducted wholly at the expense of the faculty, for the benefit of the students. Clinics are held daily during the entire year. From twenty-five hundred to three thousand are treated each year.

This college was named in honor of Professor John Hughes Bennett, the great medical reformer of Europe.

The faculty since 1871 has been as follows:

- Professor of the principles and practice of surgery: Milton Jay, dean of the faculty, 1873-86.
- Professor of obstetrics and diseases of women: Anson L. Clark, 1871-86.
- Professor of therapeutics, materia medica, and clinical medicine: J. F. Cook, 1871-76; Wilson H. Davis, 1876-86.
- Professor of surgical anatomy and orthopedic surgery: A. H. Hitl, 1876-79; S. W. Wetmore, 1883-84; E. F. Buecking, 1880-82, and 1884-86.
- Professor of chemistry, pharmacy and toxicology: H. D. Garrison, 1871-78; W. K. Harrison, 1878-83; Finley Ellington, 1884-86.
- Professor of principles and practice of medicine: Henry K. Whiford, 1871-86.
- Professor of pathology, hygiene and electro-therapeutics: Milton Jay, 1871-73; H. M. Crawford, 1873-76; E. Reading, 1876-80; E. M. Reading, 1882-86.
- Professor of diseases of children: N. P. Pearson, 1876-81; John Tascher, 1881-86.
- Professor of general and descriptive anatomy: H. N. Young, 1873-77; E. F. Buecking, 1877-78; A. L. Willard, 1878-79; John Tascher, 1879-81; H. S. Tucker, 1881-86.
- Professor of clinical ophthalmology and otology: Henry Olin, 1871-84; D. A. Cashman, 1884-86.
- Professor of dermatology and venereal diseases: E. F. Rush, 1879-86.
- Professor of medical jurisprudence: George C. Christian, 1871-86.
- Professor of dental pathology and surgery: G. W. Nichols, 1880-83; E. L. Guffin, 1883-86.
- Professor of obstetrics and gynecology: A. W. Harrison, 1877-79; H. S. Tucker, 1879-83; M. G. Hart, 1883-86.
- Assistant to chair of surgery: W. LeRoy Whistler, 1883-86.
- Assistant to chair of obstetrics and gynecology: J. B. McFadden, 1884-86.

Since (and including) 1872, this college has graduated seven hundred and sixty-six students, an average of nearly fifty-five per annum. In the list are found the names of a number of women who are admitted to the privileges of the institution the same as men.

**Henry Olin, M.D.,** one of the most distinguished oculists and aurists in the country, was born at Concord, Erie Co., N. Y., on August 18, 1835, and is the son of William and Marie Olin. His father, who was of the Vermont Olin family which had supplied so much brilliancy and renown to the Albany, New York, legal bar, was an enterprising farmer, with an active intellect and an abounding store of general information. The childhood of young Olin was spent in Springfield and Boston, where he studied anatomy and in these places he enjoyed excellent educational advantages. His taste for the medical profession developed quite early in life, and we find him when a young man apprenticed to a druggist, and devoting himself to the study of the brain. He was from the beginning of his connection with the drug business, an intelligent and laborious medical student and Investigator, showing that deep interest in the details of medical science and that conscientious discharge of duty which has always distinguished him. In the course of time he entered regularly upon the study of medicine, which he pursued at Buffalo, New York, and Philadelphia, thoroughly fitting himself for his profession. Having completed his collegiate medical education, he was once entered into practice, with greater success than usually attends the beginning of a professional career. For three or four years from 1860, Dr. Olin conducted a drug store in connection with his practice, but finding that the claims of his profession demanded his attention, he abandoned the drug business and has since confined himself exclusively to his practice, with the exception of attending to localities as lecturer on diseases of the brain and ear in Bennett Medical College. He has greatly added to the high character of this college, of which he is also a teacher. For fifteen years Professor Olin has made the treatise of this class of diseases a specialty and heretofore an authority in the branch of medical science in the world. In 1870, he made a most important discovery in the physiology of the ear, which revolutionized a long accepted theory. He found, while examining a patient, that there was a congenital absence of the tympanic membrane, and yet normal hearing existed. Upon further inquiry and investigation he found many other cases where the tympanic membrane was wanting, from idiopathic and traumatic causes, but still the persons had normal hearing. Further investigation resulted in demonstrating that this membrane is inelastic fibrous tissue, not vibrating on the undulating motion of the atmosphere as had previously been supposed. Professor Olin's discovery has been recently corroborated by the work of Helmholtz, of Germany, who has experimented with like results. In the fall of 1870, Professor Olin removed to Chicago, where he has since resided. He has exerted himself to found in Chicago a College of Ophthalmology and Otology, of which he is the director, and incorporated in 1875. The institution supplies a much needed want, and will be an appropriate monument to the energy, judgment and even humanity of its founder. Professor Olin is prominently connected with several medical societies, among them the American Medical and Eclectic Medical Association, the Illinois Eclectic Medical Society, the Wisconsin Medical Society, and the Chicago Eclectic Medical Society. In 1874, he was married to Miss Mikes, a lady of superior excellence of heart and mind. It is a matter of astonishment to all who are familiar with Professor Olin's habits of industry, that he can withstand the drain of such an active life. His endurance borders on what may be laughingly termed less nervous system. In such delicate operations as the practice of the oculist and aurist necessitates, perfectly steady nerves are the only
guaranty of safety to the patient and, necessarily, of success to the practitioner. To the extraordinary development noticeable in all of the professions of medicine, Bennett contributed much indebtedness for an ability to perform a prodigious amount of labor as he is for a large measure of his professional success. Yet a young man, many additional and even still more brilliant achievements may reasonably be expected to mark his professional career.

SERENO WRIGHT INGRAHAM was born at Fredonia, Licking Co., Ohio, on August 15, 1835. He entered a district school at the age of six and continued in it until the age of seventeen, when he became a student at Gray's Academy, which he attended during a summer, and taught during the winter months in the country, up to 1857, when he entered the law office of Chief-Justice T. W. Badger, of Ohio. He was the son of Doctor T. H. Ingraham, of Marion, Ohio, who studied medicine, which he continued for eighteen months, when the War of the Rebellion came on and for a time he was lost in trade and speculation. He resumed the study of medicine again in 1866, and began practicing in this city in 1872. He graduated from the Medical College in 1877, and for a considerable period thereafter occupied the chair of diseases of the respiratory and circulatory organs in the same college. For a period of nearly nine years, Dr. Ingraham has been physician-in-charge of the Newsboys' Home of Chicago, also physician for the Letter-Carriers' Relief and Fund Association, City Medical Examiner for the Covenant Mutual Benefit Life Association of America and other life companies, and surgeon for the Singer & Talcott Stone Company, together with numerous other surgical connections of very great value to him. He is a member of the National Eclectic Medical Association, the Illinois Eclectic Medical Society, of the Chicago Eclectic Medical and Surgical Society, and has been president of the alumni of the Chicago Medical College. He is a member of a Cleveland, Ohio, Knights of Pythias, No. 22, Wooster, Ohio, before coming to this city. Dr. Ingraham was married to Miss Mary E. Rogers, on June 2, 1855, at Worthington, Ohio, where they have had residence, Mr. Charles and John M. The Dr. is spoken of by Frank Glossop, the publisher, as follows: "Compliments of one who knows where he makes his bed, W. W. Ingraham, M.D., Chicago. Possessing the noblest traits of man; intelligence, industry, honesty—enrolled with a kind heart, generous, willing and skillful hands."

WILLIAM L. DAVIS, one of Chicago's most active medical practitioners, was born at Richmond, Wayne Co., Ind., in 1843, and resided there until he nearly attained his majority. At the age of sixteen he attended the academy at Marion, Ind., remaining there two years. He finished his collegiate education at Earlham College, a Quaker school, located at Richmond, Ind. He then went to Cincinnati, entered the Eclectic Medical Institute, and took his degree in February, 1864. After his graduation, he connected himself with the city hospital of Cincinnati for about two years. He came to Chicago in 1867, and entered to build up a practice, which has proved highly successful in every way. Dr. Davis is a gentleman of rare attainments; his professional skill and his attractive social qualities combine to make him well-known in professional and private life among the very best of Chicago's citizens. He was one of the founders of Bennett Medical College in 1869, and was one of the first lecturers. Since 1873, he has been professor of materia medica, therapeutics and clinical medicine at Bennett College, and is one of the most noted teachers of the faculty. In 1868, the Chicago Medical Times was established, and Dr. Davis became its editor-in-chief, which position he still occupies. His editorial and other writings upon medical and scientific subjects receive marked attention, not only in the United States, but also in Europe. He is an active member of the National Eclectic Medical Association, is president of every Stote Eclectic Medical Association in the Union. At the age of twenty-one, Dr. Davis became an Old Fellow, and he has been prominent in the advancement of that noble order for several years. He was for some years president officer in Excelsior Lodge, No. 22, I.O.O. He has been often honored with the chairmanship of many important committees in the Grand Lodge. At the time of the great fire, Dr. Davis was an active workman, and did much to promote the good work of charity conducted by the order of Odd fellows. He was also a member of the A.O.U.W., and was the first master workman of the lodge, No. 139, of Chicago, and has rendered valuable services in promoting the interests of the order. Notwithstanding his many duties, Dr. Davis finds time to deliver lectures, especially pertaining to his profession, scientific subjects, and addresses on Odd Fellowship subjects; time being granted by societies, lodges, clubs and associations. He is now engaged upon a work on materia medica and therapeutics. Dr. Davis has written and issued, on December 6, 1852, to Miss Hattie L. George, of Waukegan, Ill., an accomplished lady, noted for her musical talent and social qualities.

ANSON LUMAN CLARK, physician and surgeon, was born on October 12, 1826, at Clarksville, Mass., the village being named in honor of his father, Dr. Thomas S. Clark and his mother's maiden name was Almeda Ketchum. They moved to Palatine, Cook Co., Ill., in 1841. His father was a farmer and mechanic, and under rather adverse circumstances the son obtained his education. He attended the village schools, No. II., but while at college spent his winters in teaching. Having determined to make medicine his profession, he devoted much attention to the study of such works as would aid him preparatory to entering the medical college. He attended the Eclectic Medical College in 1858, and went at once to the Cincinnati Eclectic Medical Institute, from which he graduated in 1861, with highest honors, and the highest grade in the class. He was conferred his degree of Doctor of Medicine. Upon leaving the college, he entered the 127th Illinois Infantry Volunteers as first assistant-surgeon. During the War and while on detached duty, he organized and took charge of Hospital No. 2, at Camp Lookout, Tenn., where he remained three deaths. He married in 1859, and his family was located at Palatine when he went into the Army. Before his return they made their home in Elgin, and when the War closed he went to Elgin and commenced the regular practice of medicine, in which city he has since always resided. Dr. Clark has an enviable reputation as a physician and surgeon and has built up a very large and remunerative practice. In 1868, when Dr. Garrison wrote to him regarding the establishment of an eclectic medical college, Dr. Clark at once enthuastically heartily into the establishment of a school here. Upon the opening of Bennett Medical College, he was elected to the chair of obstetrics and for several years held that position with great ability and to the satisfaction of the students. He has also been president of that institution, and enjoys the satisfaction of seeing the little medical school which started with eight or nine graduates grow into an institution known and famous throughout the west and far into the south. In 1870 he was elected president of the Bennett Medical College; frequent contributions are made by him on medical questions to the leading journals of the country, and "Common Diseases of Women" is a volume recently issued, of which he is the author. He was president of the National Eclectic Medical Association for 1883, and corresponding secretary of the Illinois State Medical Society for 1885. He has been a member of the State Board of Health ever since the organization of the same. Dr. Clark is a staunch republican in politics, but has never been a seeker for office. The people of Kane County, recognizing his abilities, elected him as their representative to the XXVIIth General Assembly in 1870. He was also a director of the Board of Education in Elgin in 1875. Dr. Clark was married on August 20, 1859, to Miss Phoebe J. Lemon, of Metamora, Ill., but her death occurred in 1868, and they lost two sons, Otis A., who died in 1879, and Percy L., who is at present a solicitor for the state. In 1862 he married Miss Mary F. Danton, daughter of Hiram P. and Beldina H. Danton, of Spencer, Mass.

WILLIAM LE ROY WILSON, physician and surgeon, was born in Allegany County, N. Y., on November 13, 1839. In 1871, he moved to Grand Rapids, Mich., where he lived until he was twenty-one years of age. Wilson there engaged in the practice of medicine, and in 1873 he was elected a member of the State Medical Society of Illinois, and in 1875, he was elected a member of the American Medical Association. He was married on November 10, 1864, to Miss Clara A. Pickett, of the village of Galesburg, Ill., and they have one child, Hazel Lee. Dr. Wilson resides at Irving Park, and is a member of the Reformed Church and other societies of the village. He is a member of the Royal Arcanum and of the Order of Foresters.

MARTIN G. HART, physician and demonstrator of descriptive and pathological anatomy in Bennett Medical College, was born near Milton, Wis., on April 4, 1838, and was reared in a farm near Milton until the age of nine his parents removed to Oskaloosa, Iowa, and after receiving the common school studies, he entered Penn College at Oskaloosa, taking the literary course. He did not graduate, but
practically completed his literary education, after which he went to Nebraska and Kansas, where he spent a year in recreation. On his return to his home, he took up his professional studies in the office of Dr. G. H. Wiley, with whom he read medicine for about one year. In the spring of 1881, he came to Chicago and entered Bennett Medical College, and devoted himself particularly to the science of anatomy, which he studied at the Medical College of Illinois. In 1883, Dr. Patterson was awarded the degree of Bachelor of Science, and in 1885, he received the degree of Doctor of Medicine from the same institution. From 1881 to 1885, he practiced medicine, under the guidance of Dr. Teegarden of LaPorte.

At the expiration of four years he matriculated in the Eclectic Medical College of Cincinnati, and took his degree as Doctor of Medicine in the class of 1888. Shortly after his graduation he located at Janesville, Wis., where he remained in successful practice twenty-three years and, since 1871, has been in active practice in this city. During his stay in Janesville, the Berkshire Medical School, of Massachusetts, conferred upon him an honorary degree. In appreciation of his worth as a citizen and a man of unblemished character, he was elected to the majority of Janesville in 1860 and served for fourteen years had charge of the Institute for the Blind, in that city, and also served as its president. Dr. Treat was married on October 20, 1847, to Orrilla J. Hubbell, of LaPorte, Ind., and has one son, Leslie R.

WILLIAM JAMES CASHMAN, M.D., was born in Huron County, Ohio, on November 9, 1824, where he lived during his boyhood. He is descended from the French branch of the family. He attended the Norwalk Academy during his youth, and at the age of twenty-six commenced his professional studies, entering the Eclectic Medical College of Cincinnati, from which he graduated in 1882. He returned to his home in Huron County and practiced there for about fifteen years. He then settled at Kenton, Wis., and was connected with Professor Butterick of the Saint Louis Medical College, as his assistant a number of years. In 1879, he came to Chicago, and has since made his home. Dr. Clay is a gentleman, modest and retiring, and though at various times offered professorships through which he could have distinguished himself, he has held aloof from all positions of this nature. Dr. Clay was married December 31, 1854, to Miss Adaline S. Bennett, at Monroeville, Ohio, the residence of the bride, however, being at Tiffin, Ohio. They have one daughter, Cora C. Mrs. Clay's family have been noted for their connection with education, one of her ancestors being the founder of Princeton College.

WILLIAM ELISHA STRATFORD, M.D., was born at TerreVille, Conn., on June 23, 1850, and is the son of John and Mary (Smith) Ryan. When the senior Ryan was but a lad he came to America and located at TerreVille, engaging in business, where he remained until 1885. His son entered the Rensselaer Military Institute, and he afterward attended the TerreVille High School, and made the best of his opportunities. In 1885, his parents removed to Davenport, Iowa, and he continued his studies in that city, attending the high school, from which he graduated with honors in the class of 1894, at the age of fifteen. Travelling, he entered the TerreVille College, engaged in farming in Carroll County, Ill., which he continued five years. Becoming interested in the studies of medicine, he prepared himself for matriculation in the Physio-Medical College of Cincinnati, in 1899, and, after a full course, took his degree as Doctor of Medicine from that institution with the class of February, 1878. Located in Haldane, Ogle Co., Ill., he remained there nearly two years and then removed to Polo. In 1881, he came to this city, where he has since been engaged in attending to a lucrative practice. He is secretary and demonstrator of anatomy of the Physio-Medical College of this city, and was president of the Illinois Physio-Medical Association two years, and was elected vice-president of the National Physio-Medical Society for 1894-95. Dr. Snyder was married on October 25, 1872, to Miss Elizabeth A. Pulley, of Pleasant Valley, Jo Davises Co., Ill., on April 8, 1860, leaving two children: Robert F. N. and his wife, Miss Mina E. McMurrin, of Anamosa, Jones Co., Iowa, occurred on September 28, 1882.

THE CHICAGO ECTECIC MEDICAL SOCIETY.—This society was organized on May 13, 1879, and holds its meetings once a month at the Grand Pacific Hotel. The officers since its inception have been as follows:

embody his thoughts on various medical questions into articles for magazines, and he is a frequent contributor thereto. Dr. Ryan has already issued his prospectus for a medical journal, to be edited by himself, and called the Electro-Therapeutical Gazette. Dr. Ryan has many years before him, and, with a successful past for his health and encouragement, there are only the requisites of life and health to insure him a brilliant future.

H. FLOYD BAXTON, M.D., was born in Oneida County, N. Y., on April 3, 1848, where he lived on the farm at the home of his parents, and attended school at Hamilton. After he graduated from the high school, he returned to work on the farm with his father, but the young lad not only obtained an education and acquired a man of his energy, ability and ambition. He concluded to study medicine. He is a rapid reader, has a very retentive memory and great individual things. In 1875, he went to Philippa and studied at the Eclectic Medical College, graduating on May 10, 1877, with the degree of M.D. Immediately following his graduation, he returned to Hamilton, where he began general practice and specially gained the confidence of the citizens; but the place not being of sufficient size to enable him to increase his opportunities, after a year he moved to Cleveland, Ohio, where for three years he was located, and from which city he came to Chicago. He has contributed to medical journals and for public distribution. He is practically a self-educated man, having had an inclination for the study of medicine since his childhood.

REUBEN J. KANE, A. M., was born in Massachusetts, on May 17, 1834, and lived at Cummington, Hampshire County, until he was eleven years of age. He then moved with his parents to Faribault, Minn., and at a proper age entered the Bishop University and completed his medical studies. When the War broke he resigned his degree of Dr. Benis, then only seventeen years of age, enlisted in Co. "G," 1st Minnesota Infantry, and, in 1862, was transferred to the 6th U. S. Calvary. He served for three years and three months in the field as private and assistant-surgeon in the hospitals and on the field, but, owing to his not being old enough, did not receive his commission as surgeon. In 1864, he went to Burlington, Vt., and took a regular course in medicine, and from where he went to New York and graduated the year following from the College of Physicians and Surgeons of that city. Returning to Faribault, he practiced his profession for a number of years. In November, 1882, he came to Chicago, and took a course in Bennett Medical College, where he received a diploma from that institution in 1883. In 1876, Dr. Benis went to the Black Hills during the gold excitement, and had charge of the military there. When the Indian troubles arose, the people elected Dr. Benis mayor of the Black Hills district, and he successfully managed affairs through a time when the Indians endangered life and property. Dr. Benis is at present vice-president of the Chicago Medical Society and is a prominent member of the Independent Order of Odd Fellows, having been at one time a grand officer of the State of Minnesota. He is a member of the Masonic fraternity, the National Union Association and the Royal Arcanum. He married, in Chicago, on June 8, 1864, to Miss Mary A. Evans, of Watertown, N. Y. They have three children: Marvin M., George W. and Alia E.

JOHN H. HASSE, son of Jacob and Margaretta (Eckel) Hasse, natives of Neustadt-on-the-Haardt, in Bavaria, was born at Germersheim, on the Rhine, on July 19, 1844, where he lived until 1862, acquiring a common-school education. He attended college in 1859, at Speyer, from which institution he graduated in 1864, having obtained a thorough classical education and a preparatory knowledge of materia medica, a science to which he intended to devote the labor of his life. Immediately following his graduation at Speyer, he went to Munich and entered the Polytechnicum, where he remained two years, pursuing a course in chemistry and mathematics. In 1866, he emigrated to this country. Shortly after his arrival in New York, he secured a position as clerk in a drug store, a capacity in which he served for five years. In 1871, he entered Bellevue Hospital College, where he prosecuted his studies until the following spring, when he went to Mount Sinai Hospital as assistant to the intern physician. After that he entered the New York College of Physicians and Surgeons, leaving that institution in 1873. Directly thereafter, he returned to his former occupation as drug clerk, shortly after which he established a business of his own. In 1878, he commenced his present occupation as clerk in the store of Dr. Kossovski; six months later he purchased the establishment, in conjunction with which he continued his medical studies. Graduating Bennett Medical College in 1881, he graduated in 1883. Placing his business work in the hands of a manager, he devoted his entire time to the practice of medicine. Dr. Hasse is a gentleman of scholarly attainments, literary tastes, and a physician, and a physician of great experience. He is a member of the Knights and Ladies of Honor, and the Deutsche Erche, a German benevolent association. He was married, on January 10, 1868, in New York City, to Miss Catharine Von Noster, and has one child, a son named Willie.

ELECTRIC.

CHESTER I. THACHER, M.D., consulting physician of the Chicago Magnetic Shield Company, was born at Almond, Allegany Co., N. Y., on April 6, 1843. He was educated at the University of Michigan and graduated in medicine in 1867. Practicing and giving encouragement, there are only the requisites of life and health to insure him a brilliant future.

Dr. Thacher has resided in Chicago for the past three years, and has given his personal attention to the manufacture and disposition of the various garments whose therapeutic value has been so popularly demonstrated.

DENTISTS.

CHICAGO COLLEGE OF DENTAL SURGERY. - The Chicago Dental Infirmary was incorporated, under the general law of the State of Illinois, on February 20, 1883. Its primary object was to furnish instruction in dental surgery to those who had previously received a medical education. It was conducted on this plan for two years, when it was deemed advisable to convert the infirmary into a regular dental college, to be known as the Chicago College of Dental Surgery. There were twenty-five students in 1883-84 and three graduates. The prospects of this institution are very flattering, and, sustained as it is by many leading physicians of the city, its permanent success is assured.

Board of Directors.—James A. Swasey, president; A. W. Harlan, vice-president; T. W. Brophy, corresponding secretary; Edgar D. Swain, secretary and treasurer; N. B. Delamater, W. H. Byford, A. Reeves Jackson, Milton Jay, W. W. Allport, Norman Bridge, J. N. Crouse, G. W. Nichols; Frank H. Gardiner, chairman executive committee.

Faculty—G. V. B. Sutkings, professor of pathology; W. L. Copeland, professor of anatomy; W. T. Belfield, professor of physiology and microscopy; Lewis L. McArthur, professor of chemistry and metalurgy; L. P. Haskell, professor of prosthetic dentistry; Truman W. Brophy, professor of oral surgery; Edmund Noyes, professor of operative dentistry; A. W. Harlan, professor of materia medica and therapeutics; P. J. Kester, professor of special chemistry; C. S. Caudle-Smith, superintendent of the infirmary.

Demonstrators.—J. W. W. Walsall, demonstrator of anatomy and lecturer on regional anatomy; B. D. Wifok, demonstrator of operative dentistry; H. A. Armitage, demonstrator of prosthetic dentistry; L. L. Davis, demonstrator of microscopy; J. E. Hinkins, demonstrator of chemistry.

The courses are held semi-annually, commencing in April and October respectively.

TRUMAN W. BROPHY, dean of the Chicago College of Dental Surgery, was born in Washington, on April 12, 1845. He was brought up in the county of Kanawha, and attended the common schools, afterward studying in the Elgin Academy for several years. He began his professional studies in Chicago in 1866, afterward entered the Pennsylvania College of Dental Surgery, from which he graduated in 1872. Dr. Brophy passed considerable time among the medical colleges and hospitals of the East, and then came to Chicago to engage in the practice of his profession, which has hitherto been successful. Meeting many cases in his practice requiring in their treatment a more extended knowledge of medicine and surgery than was taught in the College of Dental Surgery, in 1876 he commenced...
MEDICAL HISTORY.

543

Dr. Brophy was an energetic, ambitious worker, and another of the results of his splendid exertions was the movement, which he inaugurated, that established a section of oral surgery in the American Medical Association, of which organization he has been a member since its foundation. He was secretary of the association the first three years, and president of the section of oral surgery for one year. Dr. Brophy was married on May 8, 1853, to Miss Emma Jean Mason, daughter of Carville Mason of this city. They have three children,—Eugenia M., Florence Amelia and Truman W., Jr. Dr. Brophy is a member of the Union League Club and of the National, State, and various local medical and dental societies. He has always led a most active life, has written for most of the leading medical and dental periodicals, and stands high in the profession of dental surgery. He is an honorary member of many dental associations; is president of the Odontological Society of Chicago; ex-president of the Chicago Dental Society.

James ATWOOD SWASEY, president of the Chicago College of Dental Surgery, which position he has held for the past three successive terms, is also one of the instructors at that institution. He is also a member of the American Dental Association, the Illinois State Society, and the City Dental Society. He has a large private practice, to which he has been attending for the past ten years. Dr. Swasey was born at North Danville, Caledonia Co., N. Y., on March 12, 1853, where he attended the district school until the age of seventeen, when he entered the New York Dental College at Danville, Vt. He then went to Michigan City, joined a party of friends on a hunting and fishing tour, remained with them about eighteen months and returned to his native place, where he resided one year. He then went to Beverly, Mass., where, in the office of O. S. Swasey, M.D., he first commenced the study of dental surgery. In the latter part of 1858, he went to Ipswich, Mass., and opened an office, where he practiced five years. From there he went to Gloucester, Mass., practiced four years, and then retired from business for one year, coming to Chicago in 1869. He first opened his office in the Shepard Block, corner of Monroe and Dearborn streets, and was burned out in the greater fire of 1871. Dr. Swasey has invented some very useful as well as practical apparatus for dentists' use, and is an expert dentist. On May 1, 1862, he was married to Miss Tuck, of Beverly, Mass. They have had three children; two of whom died in infancy; the other son, Joseph Atwood, is completing his education.

Loomis F. Haskell, the well known dentist, was born at Bangor, Maine, on April 26, 1826, where he went to school until he was twelve years of age. In 1838, he moved with his parents to Salem, Mass., where he attended school two years. In 1841, he went to Boston and entered the printing office of William S. Dunorell, remaining five years. In his nineteenth year, he began the study of dental surgery in Boston, in the office of Dr. M. P. Hamsen, where he remained three years. In 1848, he first opened his office as a dentist in Boston, where he practiced eight years. He then moved to Milwaukee, Wisconsin, with a view of settling permanently, but, only remained one year, when he came to Chicago and, in 1857, associated himself with the well known and highly respected dentist, W. W. Allport, which connection lasted eleven years. Since 1868, however, he has been in practice for himself. During the thirty-seven years of the doctor's practice, he has made a specialty of prosthetic dentistry, and is recognized as an expert and high authority among the fraternity. He is likewise the professor of prosthetics at the Chicago College of Dental Surgery, as well as one of the clinical instructors at the Baltimore College. Dr. Haskell is a well known writer for various dental journals, having the power to express his own ideas as well as the ability to conceive them. In 1848, Dr. Haskell was married to Miss Sarah F. Vasson, of Chasen, Mass. They have had six children, all of whom are living.

THE NORTHWESTERN COLLEGE OF DENTAL SURGERY.—This college is incorporated under the general law of the State, and was organized in September, 1885. The directors, in their first announcement, say: "The hearty co-operation which the founders have met with from the leading practitioners in dentistry and medicine throughout the Northwest, is an earnest of confidence in the future of the institution, which their best efforts will be put forward to deserve." Thirteen students have already been entered for matriculation. The college is located on the corner of Wabash Avenue and Twelfth Street.

Directors.—Dr. I. Clendenen, president; Dr. H. C. Magnuson, treasurer; F. H. H. McBeth, secretary.

Faculty.—G. C. Paoli, emeritus professor of materia medica; N. F. Pearson, emeritus professor of pathology; J. F. Austin, professor of operative dentistry; Elyon D. Palmer, professor of prosthetic dentistry; Eugene Vigneron, professor of dental pathology; J. D. Spearling, professor of clinical dentistry; Dr. C. B. G. Swasey, professor of anatomy; J. E. Hequeinbourg, professor of chemistry; J. E. H. Glunt, professor of physiology; F. C. Caldwell, professor of materia medica; F. C. Tipton, professor of principles and practice of general surgery; N. W. Johnson, professor of chemistry; D. H. E. Glunt, professor of physiology; F. C. Tipton, surgeon and physician to the oral clinic, and dean to the faculty; A. D. Wyman, professor of pathology.

Ex-Directors.—F. C. Marshall, demonstrator of anatomy; T. S. Huffaker, demonstrator of anatomy; T. C. Rivera, demonstrator of physiology and materia medica.

CHICAGO DENTAL SOCIETY.—Officers since 1871:

Presidents.—J. N. Crouse, 1871; M. J. Dean, 1872; E. D. Swain, 1873; C. E. Koch, 1874; D. B. Freeman, 1875; G. H. Cushing, 1881; T. W. Brophy, 1882; E. S. Talbot, 1883; C. F. Frye, 1884; A. W. Harlan, 1885.
HISTORY OF CHICAGO.

Recording secretary — E. D. Swain, 1873-74; D. B. Freeman, 1875-76; E. Noyes, 1877-78; C. F. Prayne, 1879-80; D. M. Cattell, 1881; E. S. Talbot, 1882; R. W. Kimball, 1883-84; J. G. Reid, 1885.

Treasurer — C. R. E. Koch, 1873; J. F. Thompson, 1874; G. H. Cushing, 1875; M. S. Dean, 1876; E. D. Swain, 1877-78; Officers, 1878-80, H. F. Matteson, president; G. H. Cushing, first vice-president; W. A. Stevens, second vice-president; A. H. Lott, recording secretary; P. J. Kester, corresponding secretary; E. D. Swain, treasurer; J. H. Woolley, librarian; J. S. Marshall, editor; W. N. Freeman, distributor; J. W. Wassall, G. A. Christmann, R. H. Kimball, board of censors.

The Odontological Society of Chicago.—This society was organized on November 19, 1853, and has for its object the investigation of subjects included in the science of medicine, surgery, chemistry and dental surgery; and to elevate and sustain the professional character of dental surgeons, and to stimulate them to the acquirement of scientific knowledge.

Officers and censors — T. W. Brophy, president; E. Noyes, vice-president; P. J. Kester, secretary and treasurer; W. B. Ames, editor; E. D. Swain, curator.

Joseph Deschauer, dentist, son of Matthias and Martha Deschauer, of Eger, Austria, was born on February 18, 1852. On the paternal side his ancestors for many years have been engaged in the manufacture of cloth and leather, and are respected as prominent citizens. A notable exception to the family's vocation occurs with his father's brother, Sebastian Deschauer, who is surgeon-general of the Austrian army. His early years, until he reached the age of fifteen, were spent in the public schools of Eger, and after passing through the high school, he entered the Polytechnic University, from which he graduated in his seventeenth year. He then began the study of dentistry under the direction of Dr. Carnelli, of Vienna, with whom he remained three years. After spending several years in travel through Germany and Switzerland, perfecting himself in his profession, he returned to Vienna, and was associated with Dr. Carnelli until the agitation incident upon the revolution in 1848 compelled him to leave that city. Returning home, he practiced until 1856, when he came to Chicago, where he has since resided. Dr. Deschauer was married on November 22, 1856, to Miss Barbara Haarich, of Prague, Bohemia, and has one daughter, Mary, who was married in July, 1878, to Dr. George A. Christmann, a graduate of Missouri Dental College, who is now in co-operation with Dr. Deschauer. Dr. Christmann has two children, Arthur and Walter. The doctors are both members of the Chicago and Illinois State Dental societies.

Emmanuel Honsinger.—In connection with the history of the dental profession it is but just to mention some of the adjuncts to the practice of the science which have been invented by this gentleman. He commenced practice as a dentist in 1852, and about April, 1853, invented an automatic sign, by which a set of false teeth is caused to perform a most necessary motion for twenty-four days without re-winding the machinery. He also invented an adjustable file-carrier, rotating spittoon, and other instruments and contrivances, some of which he patented, freely allowing the profession to adopt such improvements. For twenty years, Honsinger has never used other than crystal gold in crown-filling, and is, therefore, known as "the crystal gold man" who would not recognize him by his proper cognomen.

Hannawiah W. Hemingway was born at Dryden, Tompkins Co., N. Y., on March 20, 1841. His early education was received in the old log school-house at his native town. He came to Chicago in 1855, arriving here on his seventeenth birthday. He commenced his business career as a student in dental surgery, in the office of Dr. Honsinger, where he remained three years. In 1861, he entered the "G" 2d Illinois Light Artillery, remaining in the service three years, when he was honorably discharged. He returned to Chicago in the early part of 1865, and re-commenced practice on the North Side, where he remained until burned out in their first fire. He then went to the South Side, where he remained until January, 1873, when he moved on the South Side to the Bryant Block, corner of Randolph and Dearborn streets. He remained for four years at the Bryant Block, and then removed to his present location. Dr. Hemingway is a member of Covenant Lodge, No. 256, A. F. & A. M. In June, 1867, he was married to Miss Jane C. Thompson, of Orion, Ill. They have had two children, one boy and one girl, the boy died in infancy; their daughter, Martha Maselia, is still living.

George A. Sherwood was born in Morristown, N. Y., on February 11, 1840, and came to Chicago with his parents in 1844. They remained until 1850, when they returned to Naperville, and moved to Naperville, Illinois. In 1851, he moved to Donner's Grove, remaining until 1854, and then he went to Ottawa, Ill.

Charles H. Thygar, one of the leading dentists of this city, was born at Franklin, Mass., on December 24, 1801. He received his education at Providence, R. I., at a private Quaker academy on Westminster Street. In 1834, he joined the 1st Rhode Island Infantry, and was present at the battle of Bull Run. He then joined the 1st (Rhode Island) Cavalry as second lieutenant on charge on March 17, 1863, at the engagement at Kelley's Ford, where he was wounded and taken a prisoner of war. He was sent temporarily to the hospital six months, and afterwards to hospital at Libby Prison, Richmond, Va., where he remained three months. Then being exchanged, he joined his regiment, and was with it at the battles of Winchester, Fisher's Hill, and all through the Shenandoah Valley campaign under command of General Sheridan. For meritorious conduct he was promoted to captain, and was mustered out of the service on December 31, 1864. Selecting the profession of dentistry, he went to Baltimore, Md., in 1866, as a student in the Baltimore College of Dental Surgery, and graduated with his diploma of D.D.S., in 1869. He came to Chicago in 1870, first opening his office on the corner of Madison and State streets, where he remained until out in the great fire of 1871. He then opened an office on the corner of Washington and Twenty-second Street, where he remained until 1883, when he moved to his present location. Dr. Thygar is a very genial gentleman with a pleasant and genial manner and is a member of Home Lodge, No. 508, A. F. & A. M. In 1871, he was married to Miss Juliet E. Read, now deceased, who left him one daughter, Alice.

Edward H. Hamilton was born in London, England, on January 11, 1857, in which city he attended school until the age of twelve. He then came to America, and locating at Erie, Penn., entered the high school there, and graduated. During his boyhood he became familiar in dental offices with the practical workings of dentistry. In 1875, he came to Chicago and started in the office of Dr. E. M. S. Fernandez, studying the specialty of crown-work. He remained there eleven months, then removed to and opened a laboratory at No. 70 State Street, but only remained there a short time. Then he removed to No. 126 State Street. His long familiarity with dentistry enabled him to do first-class work in that line to-day. He is a gentleman physician and maintains his own private office and the offices of several other gentlemen dentists, and has always been one of the most prominent practitioners in Chicago, having already completed a year's course. He is a member of the Chicago Dental Society, and his abilities to become a leading dental practitioner of this city. Chicago, on December 12, 1882, he married Miss Elizabeth I. of Fairfield, Wis.; they have two children,—Martha and Edward Charles.

Philip A. Palmer was born in Bradford County, Penn., on June 13, 1831. He attended the district school and went to work at fifteen years old, then winters only during school age. He followed farming until July, 1851, when he enlisted as a private in an independent cavalry regiment, and mustered into the service in August, 1861. This regiment was the first cavalry
regiment in the United States that enlisted for three years, or during the War, and was first named Harlan's Cavalry. When the States demanded credit from the General Government for the number of troops that had been mustered into service the war, Pennsylvania, ot the number that was claimed for the service of the Pennsylvania war, was credited to the regiment of Harlan's Harlan's Cavalry. This regiment was then numbered 17th Pennsylvania Cavalry. He served with this regiment for the remainder of the War, being a youth so well placed in the life of the War, was a youth so well placed in the life of the War, and was the first man in the company put in the guard house. He was under the command, at different times, of the following generals: McDowell, Howard, Wool, Barnsise, McClellan, and many others. The Penninsular campaign was under General Stone- man, and later served under Generals Kilpatrick, Wilson, Mansfield, Getty, Weitzel, Butler, and last under General Grant. He was com- missioned second lieutenant of Co. "F," 17th Pennsylvania Cavalry on May 15, 1861, and was mustered into an Army of the United States, April 2, 1862; and was first lieutenant on June 30, 1864. He was honorably discharged on July 23, 1864. He was obliged to give up farming on account of poor health, and studied dentistry two years under preceptors in the City of New York. Conformed the practice of dentistry in Youngstown, Ohio; practiced there and in Marietta, Ohio, until 1850, when he came to Chicago; has practiced here since. He was a member of the Ohio State Board of Dental Examiners in 1856. He has two dental patents, one for saving all natural teeth and roots, and one for inserting teeth artificially without the use of plates. The Doctor is a member of the dental college of the old University of the United States, called American Union, No. 1, constituted on February 20, 1776. General George Washington was the first master. General Israel Putnam and others who constituted the first set of Ohio, brought and started a charter and began the work in the early 1800's in Ohio, where the lodge is now located. The doctor is also an Odd Fellow. His great paternal grandmother was a sister of Ethan Allen, the hero of Ticonderoga.

Dr. K. E. Fossati was born in Grossbruchte, Thuringia, Germany, on October 16, 1850, where he attended school until he was fourteen years of age. He then went to Gandersheim, Brunswick, Germany, where he remained five years, to study music, his favorite instrument being the violin. He then joined, in 1866, the 79th Infantry German regiment as cornet player, and was with them in the field through the entire campaign of the late Franco-Prussian War. After the conclusion of that, he came to Chicago. He first began here with his music, playing in the various orchestras of the theaters until 1875, when he secured the permanent position of cornet soloist in the orchestra of McVicker's Theatre. He attended the courses of study at the Chicago Medical College, where he remained five years. During that period he began the study of dentistry with Dr. N. R. Philips, with whom he was a student three years. In 1880, he left Chicago and attended for two years the Philadelphia College of Dental Surgery, graduating in 1884, with his diploma of D.D.S. Dr. Possel has received the S. S. White prize of a dental engine for the best evidence of skill in dental laboratory processes, also honorable mention for the invention of a new operation. In April, 1882, he returned to Chi- cago, and opened an office. On July 23, 1882, he married Miss Mary Streich, of Hildesheim; they have four children,—Arthur, Mary, Johanna and Albert.

Dr. J. C. Hinde was born in Stockholm, Sweden, on March 6, 1855, where he attended the public schools until he was eighteen years of age. On leaving school he entered the den- tist's trade, attending the dental office of Dr. Forberg, in Stockholm, who was one of the leading dentists of that city, and studied dentistry under this preceptor four years. In 1877, he began practicing for himself in the smaller cities of Sweden. In 1880, he went to Germany, then France, visiting the dental colleges with the view of taking further tuition, and to better perfect himself in his profession; but, not being satis- fied, he came to America, in 1881, and entered the Philadelphia Dental College. Owing to his previous knowledge, it was only requisite to take a one year's course there, and in 1882 he gradu- ated. He then came direct to Chicago and opened an office at his present location.

Dr. W. H. Taggart was born in Cincinnati, Ohio, on May 3, 1856, where he resided until his fifteenth year, when he entered the public schools of his city, and is a graduate of the high school. In 1878, he went to Freeport, Ill., and there, under the preceptorship of Dr. W. H. Taggart, he studied dental surgery for thirteen months. He then went to Philadelphia as a student at the Philadelphia University of Dental Surgery where he remained two years, graduating with his diploma of D.D.S. He came to Chicago in 1885, and located at his present address, where he is building up a fine practice through the efficient and exquisitely trained assistant of Dr. Fossati, who is a man of great skill, and, in constant business up to the present day, has had the duty of attending to the office of Dr. Fossati. At the same time he attended the lectures and course at the Chi- cago Medical College. He afterward moved to Thornton, Ill., where, up to 1867, he practiced his profession. In the latter part of that year, he returned to Chicago, re-entered the same college. and, in March, 1868, graduated with his degree of M.D. He then became a practice here in the county of Allen, in the State of Ohio. In 1882, when he began the study of dentistry at the Dental College, graduating in March, 1885, with his diploma of D.D.S., he was first located as a dentist in the Congress District, on Butterfield streets, whence he moved to No. 3057 State Street. Dr. Johnson is a member of one of the pioneer families of Chicago. He is a member of the Illinois Dental Society, No. 23, F. A. D. & A.M., and of the Masonic Order of the United States, No. 184, in 1875, he was appointed to the post of Miss Laura J. Wright, of Chicago. They had four children, one deceased, three boys living.—William Henry, John Albert and Thomas Wright.

ECLECTIC DENTISTRY.

J. E. LOW.—In the list of distinguished men, made notice- able by their achievements, we find those that have attracted the most public attention have had not only superior natural endowments, but they are those who have found that not alone the most arduous and exhausting application is necessary, but they also, if ever to traverse the rugged path in life's desperate conflict to reach the acme of success. For a young man to be thrown into an ocean of natural, intellectual gians, and, through his own frugal resources. Above the level, is an untold wealth, especially in the professions of today. The subject of our sketch, Dr. J. E. Low, was born in Osego County, N. Y., in 1857, and is the son of K. (Howard) Wright. He was brought up in a family of poor, industrious farmers, and, in all the conditions and occupations known to life, was devoid of the educational advantages that surround the majority of American boys, as the death of his father (when he was six years of age) compelled him to assist in the maintenance of the large family. He was ten years of age when he entered the public schools, when he went to Osego Central School. In 1869, he was graduated in the Medical College of New York. After leaving college, he entered the State Medical College of New York, where he became a member of the Illinois Dental Society. But the principal cause for special mention in the narration of the progress of dental science in this city, is the successful development of his innovations in that science, by the insertion of teeth by what he terms the no-plate method; known in the profession as bridge and crown-work. This consists in attaching the artificial tooth to the natural teeth or gums, and forming a tooth or teeth as exactly as the natural ones, the use of dental plates being entirely abandoned. The various methods employed to accomplish this desirable condition are too long to describe here, in detail, but the desideratum is achieved, the unsightly and inconvenient plate dispensed with, the great advantage of natural teeth being restored. The artificial tooth is always well solid, and the wearer enabled to keep them as clean and free from the insidious tartar as though they were natural. It took Dr. Low a long time to overcome prejudice and bigoted opposition, but by the same apparently inextricable determination that has made his life's labors a success, he has overcome all obstacles. A company representing a large capital has been established, with headquarters in New York and Chicago, where instruction in the various methods used will be given. The doctor is giving his life's labors to perfecting the principles by which all may preserve their teeth and natural conditions of the mouth, as, after his long experience, he considers that to lose one's teeth is to become an invalid. The doctor's orig- inative and inventive genius could more fully be understood and appreciated, had we space to incorporate here a description in detail of his dental discoveries, but it seems to be, indeed, the crowning success of his life's ambition. To prevent the extraction of teeth has been his study for years, the custom of which the doctor claims is ancient and barbarous, origin- ally, which has been of a great help in the progress of man, and civilized age. This late effort, a peerless tooth-crown, does away utterly with the sacrifice of decayed and broken roots. By the use of this crown all roots firm in the jaw can be restored to their natural usefulness and beauty. The doctor's accomplishments has all the strength of the natural tooth for mastication—a condi- tion long sought for and a boon to humanity at large, for it has been systematized to such simplicity that it is within the reach of all. The use of this crown is being rapidly adopted by all the leading men of the profession, and is declared to be superior to anything of its kind ever before introduced. Besides his wide prac- tice in Chicago with a large number of assistants, much of the doc-
HISTORY OF CHICAGO.

DRUGGISTS.

Wholesale.—While the drug trade of Chicago does not form one of the city's leading branches of commerce, it has kept pace with the city's growth and is not an unimportant factor in its commercial prosperity. The volume of wholesale business has gradually increased, until the sales of 1859 are estimated at about $8,000,000, the capital invested not greatly varying from $2,000,000. The wholesale trade is mainly controlled (1866) by eight firms; the number of retailers is legion.

Since 1876, the manufacture of drugs and chemicals in Chicago has advanced with rapid strides, as appears from the following statement, showing the manufacture of drugs, patent medicines, druggists' materials and baking and yeast powders in Chicago, in 1870 and 1880:

The Fuller & Fuller Company was established in this city by O. F. Fuller in 1851, at which time Mr. Fuller was connected with M. P. Roberts under the firm name of Fuller & Roberts. In 1855, the firm was composed of Mr. Fuller, E. B. Finch and Charles Perkins, and, in 1858, was known as Fuller & Finch. The style of the firm was Fuller, Finch & Fuller in 1862, and since 1871 has been Fuller & Fuller. The present company was incorporated on June 15, 1855, of which O. F. Fuller is president, Joseph G. Peters and W. H. Rockwood, vice-presidents; J. Walker Scobold, secretary and Jacob M. Shipley treasurer. They occupy a six-story business block, at the corner of Randolph and Franklin streets. Their establishment is the largest wholesale drug-house west of New York. It is well and favorably known throughout the Middle and Western States.

Oliver Frank Fuller, president of the Fuller & Fuller Company, druggists and importers, son of Revillo and Caroline F. Fuller, was born at Sherman, Conn., on October 10, 1820. His early education was obtained in the district schools of his neighborhood, and at the age of fourteen years he began business life in the retail drug trade in the employ of Dr. James Breuer, of Peckskill, N.Y., with whom he remained five years. At the end of that time, in connection with Nathaniel Dain, he established himself as a druggist in Peckskill, under the firm name of Dain & Fuller. In the following year he purchased his partner's interest and conducted the business personally one year, when his health failed. He sold out to Dr. Breuer and came to this city in 1851. Forming a partnership with Myron P. Roberts, under the firm name of Fuller & Roberts, he operated the wholesale and retail drug trade at No. 195 Lake Street, and shortly afterward purchased the business which he conducted until 1857, when he associated himself with E. B. Finch and Charles Perkins, the firm being known as O. F. Fuller & Co. In 1857, Mr. Perkins retired. During 1857, the firm moved to No. 244 Lake Street; in the fall of the next year, removed to Nos. 44 and 46 Franklin Street, where they were burned out within thirty days. After occupying their former quarters on Lake Street a short time, they leased the building at 22 Market Street, where the firm became Fuller & Finch, by the retirement of Mr. Perkins.

In 1862, the style was changed to Fuller, Finch & Fuller, through the accession of H. W. Fuller, and continued such until 1871, when O. F. Fuller purchased the interest of Mr. Finch. The firm of Fuller & Fuller removed to their present establishment in the spring of 1882, and remained unchanged until June, 1885, when H. W. Fuller retired and the present company became an incorporation. Mr. Fuller was married on November 9, 1857, to Miss Phoebe A. Shipley. They have three children, Henry M. Frank R. and Charlie.

LORD, OWEN & CO.—The history of this leading wholesale drug establishment in Chicago. In 1836, J. M. Boyce was engaged in this business at No. 121 Lake Street. He was ranked among the prominent merchants of those days, until his death by cholera in 1849. Then Edwin R. Bayard and John Sears, Jr., who had been clerks in his employ, succeeded to the business, conducting it at No. 113 Lake Street until in 1852, when Mr. Bay and William A. Baldwin formed a partnership over the head of Bay & Baldwin, at No. 139 Lake, Mr. Sears continuing alone at the old stand until in 1856. In 1857, Thomas Lord, the founder and present head of the firm of Lord, Owen & Co., came to Chicago, and purchased the business of Bay & Baldwin. Two years later, Dr. Lafaytette H. Smith became a partner, the firm name and style then becoming Lord & Smith. The place of business in 1857, was at No. 139 Lake Street, then at No. 43, where they stayed five years; then at 23, where they remained until, in 1868, they removed to No. 86 Wabash Avenue. Here they had erected a handsome five-story stone-front building. In that year, G. W. Stoughton was admitted as a partner, and the firm name was then changed to Lord & Smith & Co. About the time this fire this firm was burned out, sustaining net losses on building and stock amounting to $150,000. Notwithstanding the immense loss...
54 Lake Street, are amply commodious, and consist of a large five-story brick building, with a frontage of thirty-five by one hundred and forty-five feet in depth, with one floor in an adjoining building, thus giving thirty thousand square feet of floor space, all of which is utilized in the prosecution of their business. The departments are numerous and embrace every article pertaining to their trade. They have also a large store, occupying a large building, and situated on South Canal Street.

J. W. Plummer was born at Richmond, Ind., in March, 1836. When twenty years of age he began business life in the retail drug trade, and in 1854, he married his parents' youngest child, and he formed a partnership with Robert Morrison, his present partner. In 1875, he came to Chicago and entered the employ of E. Burnham, Son & Co., where he remained until he and his present partner, Mr. Plummer, purchased and operated the business of that house. They have six children. — Mary W., Elizabeth, Joseph, John T., Fanny K. and Addison.

CHICAGO COLLEGE OF PHARMACY. — The object of this college is to provide a sound theoretical and practical education for pharmacists. It suffered severely by the great fire, and was not able to resume the regular course of instruction until 1873. At this period it was largely indebted for assistance obtained from Great Britain, where an appeal was made in its behalf, which resulted in donations amounting in value to $10,000. It was variously located until 1853, when it permanently occupied its new building at Nos. 465-67 State Street. This was erected by Hon. J. H. Clough expressly for the purposes of the pharmaceutical education, and a long-time lease of the same secured to this institution. Attfield Hall, named after the celebrated English chemist and pharmacist, its lecture theater, is three stories in height, and will seat six hundred persons. The laboratories are unequalled in capacity and equipment by those of any other similar college. They afford accommodations for three hundred and eighty-four students, one hundred and seventy-six of whom can work together at one time. It contains also a valuable library, and furnishes an ample outfit of apparatus and models for the purposes of instruction.

The Illinois State Board of Pharmacy refers, in its annual reports, to this college and its increasing growth, in highly commendatory terms. There were two hundred and eighteen students in 1885, and the average number for the last five years was one hundred and fifty-five, being an increase over the previous five years of over fifty per cent. The number of graduates, each year since 1872, has been as follows:

The members of the faculty have been as follows:

Professor of physics and chemistry: David Tremble, 1871-74; H. D. Garrison, 1874-86.
Professor of botany, materia medica and microscopy: J. H. Babcock, 1871-76; E. S. Kestin, 1877-80.
Professor of pharmacy and director of the laboratory: Oscar Oldberg, 1885-86.
Professor of analytical chemistry: J. H. Blaney, 1875-80; Pymont Hayes, 1880-84; John H. Long, 1885-86.

Charles Heymann, the oldest German druggist doing business in Chicago, was born at Atona, Holstein, Germany, on December 20, 1817, the son of Fredrick and Anna (Lein Pein) Heymann. He was educated in the schools of his native town, and afterward attended the University at Kiel Holstein, from which he graduated in 1835. He determined upon the study of pharmacy, and in 1835-36 was an apprentice to the drug business. In 1838, he came to America, and first engaged in farming in Wisconsin, after which, in the fall of 1850, he came to Chicago, and, in 1851, entered the drug business on his own account, and has since been identified with the trade. At the old settlers' picnic in 1854, he was awarded a gold medal as the oldest German druggist in the city. In 1848, he was appointed to return to Europe, and there married Miss Angelina Weidner, of Berlin, in Rheinprovinz. It may be mentioned in connection with this gentleman, that many of the prominent druggists now in business in our city began, with him, and from him learned the art which they have successfully practiced.

Charles Billings Allen, son of Nelson and Jane P. Allen, was born at Oswego, N.Y., on May 10, 1834. Eighteen months after his birth his parents moved to Kenosha, Wis., where he was reared and educated. Returning to Kenosha, in 1852, he engaged in business until 1854. In the latter part of that year he visited Minnesota; with no definite idea of the business he would follow, but with the determination to succeed, he located at Chatfield. While there he acted in the capacity of clerk and surveyor, and became interested in the sale of land warrants. Having acquired something of success, he decided, in 1859, to come to Chicago and establish a business of his own. Arriving at a city, he secured a position as clerk for one year. In 1860, he became the proprietor of an establishment of his own, which he maintained until the beginning of hostilities between the North and the South. Disposing of his business, which required necessary, he removed to a small establishment in a wholesale drug house. Two years later, he entered the employ of the American Express Company, continuing with that corporation for two years, after which he removed to the wholesale drug house of Tallman & King, he became connected with this firm, a connection that continued until 1880. On September 15, of that year, he again established a business of his own, at his present location. On April 25, 1881, at Grafton, Wis., Mr. Allen was married to Lacetia Godfrey.

Charles Christian Friedigke, druggist, was born at Cassel, Germany, on March 14, 1839, and is the son of Michael and Dorothea (Von Linck) Friedigke. He received his education at his native place, and after finishing his studies, served an apprenticeship to the drug business for about three and a half years. On August 11, 1857, he came to Chicago with his parents, where his father opened a boot and shoe store, employing Charles as salesman for two years. At the expiration of that time, he commenced to act as drug clerk in various stores in the city, and on May 1, 1862, he and his brother went into the drug business on their own account. On July 14, 1874, their establishment was destroyed by fire, but shortly afterward Mr. Friedigke resumed business at his present location. He was married at Chicago, in 1876, to Miss Marie Clotilda Hesse, who also came from Cassel.

Judson Shardlow Jacobson, son of David and Eliza (Mason) Jacobson, natives of the State of New York, was born September 20, 1847, at Chicago. His early education was acquired at the Washington School. In 1863, he entered the Chicago YMCA, remaining in that institution two years. At the close of his university course, he determined to become self-supporting. In accordance with that resolution he secured employment with a wholesale druggist, and entered upon an apprenticeship. During the ensuing six years, he applied himself faithfully to the business he had decided upon following. He next secured a clerking position with T. C. Brown, remaining with that gentleman until 1874, when he again associated himself with his former employer, continuing in his service until the following year. Inducements being offered him to establish a business of his own, he became proprietor of an establishment on the South Side, where he conducted business until the fall of 1875, when he moved to the quarters at present occupied by him. Mr. Jacobson is a representative Chicagoan, having been a resident of this city for the past thirty-eight years and eleven months, his interests since 1875 being largely confined to Miss W. Kate Curry and has two children living. — Milton Paul and Percy Arthur.

Lucian Prentiss Cheaney, son of Dr. Lucian Prentiss and Mary Louis (Stone) Cheaney, who were married in Addison County, Vt., in 1837, was born in Fort Henry, N.Y., on September 25, 1848. When he was but a little less than three years of age, his parents moved to this city and entered into the Christian and American schools. Several years later he passed examination for admission into the high school, and remained in that institution until he entered Bryant & Stratton's Commercial College, where he obtained a business education which he was enabled to lay the foundation upon which to build his future business career, he secured a situation in the wholesale drug house of J. H. Reed & Co., and on June 1, 1865, he entered the employ of that firm, a business connection that remained unbroken for fifteen years. During his continuance with
HISTORY OF CHICAGO.

the house, he became one of the trusted employees of the firm. Having strict principles of integrity and the stamp of German thrifty business, he was able to secure something of a competence during the years of his service with the firm that first employed him. In 1818, he established a business of his own at the location now occupied by him and his associates, who was a year or two younger. He lived in Great Britain and in Germany, and in 1823 he died in this city in 1864. His mother, who is still living, is a resident of Chicago. On April 15, 1876, Mr. Cheney married Miss Marion L. Egan of Chicago.

BECKGARDEN was born in Berlin, Prussia, on May 6, 1841, and is the son of Frederick and Frederica (Ohenorge) Wofersdorf. He received his education at his native place and terminated in 1852, after which he served an apprenticeship to the drug business and emigrated with his parents to this country in 1860 and settled in Chicago. He immediately obtained a situation as drug clerk, which he retained until 1864, when he entered into his present business, which he has continued ever since, with the exception of a short period of time in 1871, when he was employed in the U.S. Government. During this time he resided in Tennessee, his home state, and he is now a resident of Chicago. Upon his return he entered the Government service. He was commissioned as special engineer, with headquarters at Nashville, Tenn., and was detailed to go through the Southern States, particularly in Tennessee, and construct machinery of all kinds for the use of the Government. While engaged in his work in the Southern States, toward the close of the War, Mr. Whiteford was attacked by a fever and returned to Chicago. After his recovery from this illness, he went into the drug business at No. 231 West Randolph Street. This store he still owns. In 1871, just after the great fire, Mr. Whiteford started on a tour around the world, visiting many countries. In Scotland he discovered a nephew, whom he took with him and visited New Zealand, St. Helena, Africa, Europe and then came to America. The nephew, Mr. Kelton, remained here, learned the plumbing business and after going to the West, is now a prominent business man of San Francisco. Mr. Whiteford was never married. When leaving Scotland in September, 1873, he brought a child to Chicago in a box of ten years of age, who is now married to Mr. McMillan of this city. In April, 1884, Mr. Whiteford bought the drug store at No. 152 North Clark Street, which he still owns. A few years ago he went into business with Mr. McMillan, who is his partner, and Mr. W. G. McMillan & Co. are proprietors of a large general store on North Clark Street, David Whiteford, plumber, at No. 346 West Randolph Street, is his brother.

HISTORY OF CHICAGO.

JOHN AUGUST ERNST FRANK was born in Hamburg, Germany, on December 5, 1827, and received his education at his native place. In October, 1846, he came to Chicago, and after a short stay here went to Jackson ville, where he continued for three years he devoted himself to acquiring a practical knowledge of the drug business. In 1850, he went to St. Louis, and there entered the College of Pharmacists, which he graduated in 1853, when he returned to Chicago and became, successively, clerk for J. W. Eheman and Henry Bith, druggists. In 1872, he entered into business as a druggist on his own account, in which he has since continued. In 1873, he was married to Miss Mary Hock of Joliet.

HISTORY OF CHICAGO.

JUNIUS J. SMITH, member of the drug firm of Junius J. Smith & Co., was born at Glasgow, Ky., on November 3, 1847, where he lived during the greater part of his youth, and attended the common schools, subsequent to which he was employed in W. M. Johnson's drugstore at Glasgow. After his school days were over, he entered a drug store, but remained only a few months—long enough, however, to make up his mind that he wanted to follow that line of business. In 1868, he went to Chicago and was engaged for T. N. Turner & Co., wholesale druggists. He was with that firm for three years and then took a position with E. Burnham, Son & Co., wholesale druggists. While here he served an apprenticeship to the drug business and emigrated with his parents to this country in 1860 and settled in Chicago. He immediately obtained a situation as drug clerk, which he retained until 1864, when he entered into his present business, which he has continued ever since, with the exception of a short period of time in 1871, when he was employed in the U.S. Government. During this time he resided in Tennessee, his home state, and he is now a resident of Chicago. Upon his return he entered the Government service. He was commissioned as special engineer, with headquarters at Nashville, Tenn., and was detailed to go through the Southern States, particularly in Tennessee, and construct machinery of all kinds for the use of the Government. While engaged in his work in the Southern States, toward the close of the War, Mr. Whiteford was attacked by a fever and returned to Chicago. After his recovery from this illness, he went into the drug business at No. 231 West Randolph Street. This store he still owns. In 1871, just after the great fire, Mr. Whiteford started on a tour around the world, visiting many countries. In Scotland he discovered a nephew, whom he took with him and visited New Zealand, St. Helena, Africa, Europe and then came to America. The nephew, Mr. Kelton, remained here, learned the plumbing business and after going to the West, is now a prominent business man of San Francisco. Mr. Whiteford was never married. When leaving Scotland in September, 1873, he brought a child to Chicago in a box of ten years of age, who is now married to Mr. McMillan of this city. In April, 1884, Mr. Whiteford bought the drug store at No. 152 North Clark Street, which he still owns. A few years ago he went into business with Mr. McMillan, who is his partner, and Mr. W. G. McMillan & Co. are proprietors of a large general store on North Clark Street, David Whiteford, plumber, at No. 346 West Randolph Street, is his brother.

HISTORY OF CHICAGO.

JOHN AUGUST ERNST FRANK was born in Hamburg, Germany, on February 24, 1835, and is the son of Albert August Gerhard and Lisette Wilhelmina (Cave) Frank. He received his education at the usual public and private schools. He entered the drug business in that city, where he studied for five years. He then became engaged in commerce at Hamburg, in which he continued until 1866, when he came to this city, and, after occupying the position of bookkeeper for several druggists, he went into business for himself at his present location, on April 1, 1868. His commercial integrity and industry have never been questioned, and he now ranks among the leading druggists of this city. He was married on November 16, 1868, to Miss Sarah Justrow. He is a member of Robert Blum Lodge No. 49, A.O.U.W.; Goethe Lodge, No. 26, Sons of Hermann Columbus Building Association; Scherr Murr Association; Eintracht Liederkranz; Alle Naem Bowling Club; and is one of the leading Temperance workers of this city.

HISTORY OF CHICAGO.
and Van Buren streets, where he remained until his business was burned in the great fire. He lost everything, and at the time was in debt. He took courage, and re-opened in a small way on College Avenue, near Jefferson Street. His business prospered, and in 1875 he moved to No. 168 South Halsted Street, where he is now located. In November, 1883, he took into partnership Mr. Murphy, his clerk, and they opened another store on Western Avenue. In 1884, Mr. Garbersheim returned to his practice of pharmacy, and in April, of the same year, established another clerk in business at No. 109 Blue Island Avenue, under the firm name of Reuter & Wernicke. Mr. Garbersheim was married in Miss Bertha Koch, of Peoria, on February 11, 1884. Their oldest son, Louis H., is a graduate of the Chicago College of Pharmacy, and is now chief clerk in the South Halsted Street store. The other children are Miss Carrie, William and Bertha.

JAMES JAY HARRINGTON, son of James and Anna Harrington, was born at Kingston, Canada, on August 18, 1848, at which place he acquired his education, attending, in 1859, the Regisopolis College, graduating in 1860. At that period he began the contemplation of the method by which he should make his future life a success and a self-sustaining one. After mature deliberation he came to this city. Shortly thereafter he entered the service of J. H. Hooper, a business relation that remained unbroken for forty years. In 1860, he established a business of his own. He was burned out in the great fire and lost all he had, and then located at the corner of Raymond and Van Buren streets, where he remained for four years, meantime opening a branch store at the corner of Rush and Michigan streets. He afterward returned to the corner of State Street and Michigan Avenue, which establishment he subsequently sold out, and in 1874, he, with his brother-in-law, Mr. H. F. Smith, of Chicago, established a business on Van Buren Street, which business he conducted until 1875, and in April of the same year, returned to the corner of State Street and Michigan Avenue, which he continued to conduct until 1880. In that year he sold his interest in his stores, and returned to the corner of State and Van Buren streets, which partnership was dissolved in 1883. He then resumed business at No. 570 Sedgwick Street, removing to his present location in 1884. Dr. Fischer was married on May 27, 1851, to Miss Susan A. Johnson, his second wife. The children of his first marriage were: Anna, married to Dr. W. K. Wilson; Carrie, married to Mr. C. M. Wilson; and Miss Emma. He is a member of the United States American Pharmaceutical Association, the Illinois State Pharmaceutical Association, and the Chicago College of Pharmacy.

CLION BRUCE WILSON, son of David W. and Elizabeth H. Wilson, was born at Fairmount, Va., on September 25, 1844. In a private school, at his native place, he obtained the rudiments of English education, and prepared himself for the college course, which he entered upon in Monongalia Academy, in 1858, where he remained until the latter part of April, 1861. He then returned to Fairmount. Having acquired a knowledge of telegraphy and business, he was engaged in military service of W. H. Horner & Co., wholesale notions and sundries. In 1870, after a residence of two years in the interior of Illinois, where he devoted himself to the drug trade, he came to Chicago and established a business of his own. Mr. Wilson is a gentleman of exceptional educational abilities and business qualifications. He stands high in the estimation of those with whom he is brought into contact both in social and business circles. He has renewed the old-time man of strict integrity and good judgment. He is a member of Hesperia Lodge, No. 411, A. F. & A. M.; York Chapter, No. 143, R. A. M.; Chicago Commandery, No. 10, K.T.; Oriental Consistory, No. 2, S. P. S. M.; of the Knights of Rome and the Red Cross of Constantine, E. J.; of Oriental Lodge, No. 97, A. O. U. W., and of Home Council, No. 400, Royal Arcanum. On October 12, 1876, at Morgantown, Va., he was married to Frances Xavier Chadbourn Carr. He has one child, Agnes.

H. W. BUCHANAN, druggist, at the corner of Twenty-fourth Street and Indiana Avenue, although a young man, has been a resident of Chicago for thirty-one years. He was born at Syracuse, N. Y., on March 30, 1853, and when but a year old came to this city with his parents. He attended the public schools until May 25, 1870, when he engaged in the drug trade, working for A. E. Ebert, Thomas Whitefield and other well known druggists. During his leisure hours he attended the Chicago College of Pharmacy, and graduated from that institution in 1874, when he engaged in the drug business on his own account. He married on November 21, 1881, Miss Lizzie Schubel, and has one child, a boy named W. N. B. On May 20, 1884, he was married to Miss Annie Steuer, of Toledo, Ohio, who has borne him a daughter, Mr. Buchanan commenced life without a dollar and no aid except his integrity and good judgment, and is a member of Masonic Lodge, No. 739, A. F. & A. M.; Fairview Chapter, No. 161, R. A. M.; st. Bernard Commandery, No. 35, K. T.; and Oriental Consistory, S. P. S. M., 2°.

Ben W. TEMPLE was born in Chelsea, England, in 1839. He was brought up, attended the schools, and was apprenticed to a druggist there, and thoroughly learned his profession before coming to America in 1856. In 1872, he located in Borooyd, N. Y., and remained there for five years, going to Baltimore at the end of that time. In 1872, he came to Chicago, and was engaged as pharmacist in several of the prominent stores of this city. Immediately after the great fire of 1871, Mr. Israel erected and opened

Mr.
married in New York City, on August 13, 1879, to Miss Mamie A. Mertage. They have one child, Sarah Irene, who was born on April 28, 1881.

WILLIAM HENRY THORN was born at Burlington, Iowa, on June 22, 1855, but when a child his parents removed to Kalamosco, Mich., where he attended the public schools, until 1871, when he went to Ottawa, III., and entered the drug store of W. C. Smith & Co., to learn the trade, remaining about three years. In 1874, he went to the corner drug store and remained four years; then took charge of Dr. Clarkson Cuthbert's drug house, at Edinburg, where he lived for ten years. He then went to the Chicago College of Pharmacists, where he came to Chicago, and went to the Chicago College of Pharmacy, where he spent his entire time in study, and in 1879, he opened a store of his own, in which he engaged in the drug business, and was superintendent of the pharmacy, and was in charge of the college, and was the best prescription manufacturers in the drug trade.

CHARLES FERDINAND HARTWIG, son of G. J. and Amelia (Woolenius) Hartwig, was born in the province of Brandenburg, Germany, was born at Oconomowoc, Wis., on April 2, 1853, where he resided up to his twelfth year, attending the public schools of that place. After his education, he went to Watertown, Wis., where he resided for two years in attendance at school. He then went to Mayville, Wis., and apprenticed himself to the drug business. Three years later he moved to Milwaukee, Wis., and took one course in the Spenserian Business College in that city, during which time he acted as bookkeeper for a cigar manufacturer for four months and as a druggist's clerk for six months. He returned to Oconomowoc, and, in the latter part of 1880, he went to Baraboo, Wis., and, securing a position as druggist in the spring of 1875, he returned to Milwaukee, Wis., where he remained for a year. In 1876, he opened a store at his present location, shortly after which he disposed of his interest in the business he had established in 1874, and went to Chicago. In 1879, he became a member of the American Pharmaceutical Association and the American Pharmaceutical Association, in 1880, was married, to Miss Mamie Meyer.

MILLET N. PORTER, a member of the firm of M. N. Porter & Co., dealers in drugs, medicines, etc., was born in Maine, in 1853. He was educated in the public schools of his native county. After completing his business education, he entered Bowdoin Medical College, from which he graduated in 1879. In that year he located in Chicago, although a physician by education, Mr. Porter has always been identified with pharmacy, and when he came to this city in 1879, he entered the drug business at No. 258 N. Water St., and the business he established at that time had already been established for eight or nine years. Mr. Porter's brother became acquainted with him at this time and, subsequently, opened another pharmacy at the corner of Thirty-fourth Street and Indiana Avenue, at which Mr. Porter was superintendent of the College of Pharmacists, and he was the best prescription manufacturer in the drug trade. They carry at both stores a very large stock of fine druggists' goods and have been very successful in their business. Mr. Porter is a member of the Pharmaceutical Association of the State Board of Pharmacy, and is a member of the American Pharmaceutical Association. Dr. Porter was married on April 17, 1882, to Miss Nellie Durfee, daughter of Dr. Durfee, of this city.

FRANK L. PORTER, pharmacist and member of the firm of M. N. Porter & Co., druggists, was born at South Parish, Maine, on June 29, 1855. He attended the schools in his native place until he was eighteen years of age, and then he attended the college at Boston, where he finished his collegiate education. He then located in Chicago. Deciding upon the medical profession as his future vocation, he entered the Chicago College of Physicians, and ultimately graduated therefrom with high honors. In 1879, he, with his brother formed a new partnership and went into business for themselves. He became a member of the American Pharmaceutical Association and the American Pharmaceutical Association. Mr. Porter is thoroughly acquainted with his business, and enjoys the patronage and esteem of a fine class of customers. Mr. Porter was married on September 1, 1876, to Miss Edith Gilmore, of Adams, Ill.

EDWIN J. PAINTER, druggist, was born in Morgan County, Ind., November 10, 1856, in May 1876, he attended the schools in his native place until he was eighteen years of age. Then he, with his parents, moved to Iowa, where he lived for ten years. In 1876, he commenced to learn the drug trade, and a few years later was granted a license as a druggist by the State Board of Pharmacy. In 1879, he married a daughter of Dr. Dayton Painter, and they established another pharmacy which the latter gentleman had established twelve years before. Edwin J. Painter has closely applied himself to his interests and has returned an old student of college as well as a son of doubt, which was married to Miss Nellie Gilmore, of Chicago, on April 22, 1885.
Henry C. Pilgrim, druggist, was born in this city, on June 29, 1857, and is the son of Henry Pilgrim, one of the oldest residents of Chicago, having located here in 1848. He received his education at St. Charles College, from which he graduated at an early age. Upon the completion of his business studies, he entered the Chicago College of Pharmacy, and while pursuing his studies there, he was engaged in the drug store of F. M. Goodman, with whom he remained for a short time. Subsequently, he traveled extensively in the pharmaceutical field, and, while engaged in his professional work, he was called upon to assist in the establishment of a drug store at the corner of Wells and Ohio streets, and the next year he opened another store at No. 573 South Halsted Street. The firm prospered, and a year or two later opened another store at No. 573 Blue Island Avenue. In 1884, the brothers divided their interests, and Martin M. Prince assumed control of the last named place of business. Prince is one of the finest druggists on the West Side, employs two first-class clerks, and has an excellent trade. His success is due to his energy and business ability, but the chief reason for his prosperity is his splendid location at the corner of Wells and Ohio streets.

His success is due to his energy and business ability, but the chief reason for his prosperity is his splendid location at the corner of Wells and Ohio streets.

Bernard L. King, Jr., pharmacist and chemist, was born in 1858 in Iowa. His parents came to America, locating in Chicago in 1857. Bernard attended the first German High School during the first three years of his residence, and when fourteen entered the drug store of J. H. Wilson to learn the business. He was employed there and at one other store for some time, and then entered the College of Pharmacy to complete his studies, and graduated with honors in 1878. From 1878 to 1881, he was employed as a druggist, and in 1881 started in business for himself. He first opened a shop at the corner of Wells and Ohio streets, and the next year he opened another store at No. 1 Lincoln Avenue. Six months later he discontinued business at his first stand and continued his business at the Lincoln Avenue Place. Here he has a splendid location, being at the entrance to Lincoln Park, and at the head of one of the best streets of the city, with a business of high standing in all lines of drugs and drugstores, and in 1888, he opened another store at No. 573 South Halsted Street. The firm prospered, and a year or two later opened another store at No. 573 Blue Island Avenue. In 1884, the brothers divided their interests, and Martin M. Prince assumed control of the last named place of business. Prince is one of the finest druggists on the West Side, employs two first-class clerks, and has an excellent trade. His success is due to his energy and business ability, but the chief reason for his prosperity is his splendid location at the corner of Wells and Ohio streets.

John Albert Mayer was born in New York City, on June 15, 1847. When he was still in his infancy his parents moved to Milwaukee, Wis. When he was sixteen years old, having acquired a common-school education, he determined to learn a trade. Accordingly he apprenticed himself to Albert Loehr, druggist, where he remained five years. He continued in the drug business until 1862, but, finding the hard struggle against poverty and privation his lot, he entered the employ of Dr. A. H. Stockwell, with whom he remained one year. At the end of that time, he established a business of his own, which he has successfully conducted. While associated with Dr. Stockwell, he gave considerable attention to the study of medicine. In 1874, he entered the Chicago Medical College, graduating therefrom in 1876. Dr. Mayer is a gentleman of more than ordinary intellectual capabilities and professional education. He has devoted his entire attention to his business, officiating as a practitioner of medicine only when necessity requires such service.

Joseph E. Rhode, druggist and pharmacist, was born in Friedland, Germany, on December 6, 1845. His parents came to America, locating in his native town and received his education at the Gymnasium of that place. When fifteen years old, he came to America with his parents, and they located in Chicago. A few years later he entered the Chicago College of Pharmacy, and in 1879, graduated with high honors. Mr. Rhode has been employed in some of the largest and finest houses in this city, and has always been held in high esteem for his fine qualities as a gentleman and for his ability and worth as a pharmacist. He was first employed as prescription clerk by Mr. Wotersdorf; then with Arend, the well-known chemist; and afterward by Moesch & Reinhold. By his industry and economy, he succeeded to open a very successful business, which he possesses at present, of one of the finest pharmacies, with the best patronage of any retail house in Chicago. His store is located at No. 504 North Clark Street; and though he has only been in business about eighteen months he commands a membership of three thousand, among whom is a young man of sterling qualities, and his future bids fair to be most successful. He is a member of the Chicago College of Pharmacy and the State Association, of which he is a prominent member of the German Club.

James Robert Cozine, M.D., son of Samuel and Elizabeth (Holloway) Cozine, who were married in the State of Indiana in 1845, was born in 1857, in Johnson County, Iowa, at which place he obtained his early schooling. In the fall of 1875, he went to Iowa City and entered the Medical Department of the State University, having previously read medicine under a preceptor, graduating in the spring of 1881. Shortly afterward, he came to this city and secured a position as druggist under J. K. Waldron, druggist. At the end of ten months he returned to Iowa and began the practice of medicine, a profession to which he had devoted his time. Nine months later, he located for the second time in Chicago. Prior to his return to this city he conducted a medical practice in his home town. Upon his return, he commenced a practice of medicine, and gave his attention to a pharmaceutical education. Immediately after his arrival here, he entered the Chicago College of Pharmacy, graduating in 1883, and prosecuted his studies during one school year. At the termination of the course, he reenrolled for several months at his home in Englewood, Ill. In October, 1883, he began preparations for the establishment of a business of his own, which he located at his present quarters. Dr. Cozine has retired from the practice of medicine; occasionally in a case of emergency, he officiates in his former capacity of physician. His entire attention he devotes to his business as a druggist. On June 2, 1883, at Morse, Iowa, he was married to Miss Lydia Morse.

John M. Baker, member of the firm of Gale & Blackie, druggists, was born at Cleveland, Ohio, on June 8, 1848. He attended the schools in that city, and when he had finished the common-school education, he determined to learn a trade. Accordingly he apprenticed himself to Albert Loehr, druggist, where he remained five years. He continued in the drug business until 1862, but, finding the hard struggle against poverty and privation his lot, he entered the employ of Dr. A. H. Stockwell, with whom he remained one year. At the end of that time, he established a business of his own, which he has successfully conducted. While associated with Dr. Stockwell, he gave considerable attention to the study of medicine. In 1874, he entered the Chicago Medical College, graduating therefrom in 1876. Dr. Mayer is a gentleman of more than ordinary intellectual capabilities and professional education. He has devoted his entire attention to his business, officiating as a practitioner of medicine only when necessity requires such service.
studied there he entered Oberlin University, where at that time received ample for instruction in the higher scientific and classical courses. Mr. Baker paid particular attention to the study of chemistry and botany, and found his practical as well as theoretical education in these branches to be a great aid in the profession which he afterward adopted. He opened his store in Cleveland, and entered Gaylord's wholesale and retail drug house, and devoted his time and study to pharmacy. He went there in 1854, or 1856, and served a regular apprenticeship, upon the expiration of which he came to Chicago, and took charge of the prescription department in Gale & Blocki's drug store. He remained in that capacity for about ten years, and, in 1878, he was admitted as a partner. Mr. Baker is very active in the management of the business of the house, and has a thorough education and long experience as a pharmacist places him among the best druggists of Chicago. Mr. Baker was married on July 24, 1873, to Miss Mary E. Britton, in this city. The lady's former home, however, was at Boston, Erie Co., N. Y.

MEDICAL HISTOR.

William H. Montgomery was born at Rochester, N. Y., in 1830, and was educated in the common schools of that place. Previous to engaging in his present business, he had been employed for years as a joiner, pattern-maker, and a builder of railroad passenger coaches for the Rochester & Buffalo Railroad Company. On account of his skill shown in working wood, he was induced by Dr. Douglas Bly, the great artificial limb manufacturer of Rochester, to enter his employ. After working for fourteen months in this manufactury, he was placed at the head of Dr. Bly's next largest factory at Cincinnati, and afterward went South to fill contracts made by different States to supply limbs to the wounded soldiers. After an engagement of six years with his employers, Mr. Foster employed him to take charge of his Detroit office for nearly three years; then sent him to Chicago, in March, 1876, to manage his interests here. Mr. Foster died in July, 1881, and Mr. Montgomery succeeded him in business, and is now making the Foster Patent Union Limbs. His experience, he says, has taught him to simplify the construction of limbs, and a great deal of laboriously constructed artificial machinery has been abandoned in his new work. The main object at present to be attained, seems to be symmetry and, at the same time, mechanism sufficiently strong to answer the demand of severe every-day use; and this Mr. Montgomery seems able to furnish to the unfortunate losers of limbs, and he has many testimonials that bear evidence of his superior skill as a manufacturer. He is at present located in the same quarters formerly occupied by his predecessor. He was married at Rochester, N. Y., in 1855, to Miss Mary J. Neill, who died in Cincinnati, in 1886, leaving two children, — Milton W. and William H.

Druggists' Scales.

Lawrence Ambs was born on August 15, 1855, in Baden, Germany, and is a son of C. G. Ambs and Anna (Brinkner) Ambs, natives of Baden. His father died there on December 23, 1870, and his father is still living in Baden. Mr. Ambs was educated in Germany, and learned the trade of a locksmith and milliner. He then went to his uncle's farm in Iowa and remained there for six years. He then went to the West Indies and returning to Germany. In 1877, he came to Chicago, and worked two years at Grand Crossing. He then formed a partnership with Louis Flory in the manufacture of drug and military supplies, and, on January 31, 1885, bought the interest of Mr. Flory, the firm being now Lawrence Ambs & Co. On December 23, 1887, he married Miss Katie, daughter of Jacob and Christina (Gross) Enderlin, natives of Baden, where they now live.
MEDICAL WORKS.

W. T. Keener was born on February 21, 1843, at Jacksonville, Ill., where he lived with his parents until eight years old, when the family moved to Peoria. There Mr. Keener was educated and employed until 1862. At this time he enlisted in Co. "11," 56th Illinois Volunteer Infantry. His military service was in the South and Southwest. He was with General Sheridan at the battle of Resaca, Ky., also in the battles of Chickamauga and Kennesaw Mountain. In this last battle, he received a flesh wound in his leg which necessitated his going to the hospital. He was discharged from the service in July, 1865, when he came to this city, where he has lived ever since. His first engagement in this city was with Clark, Whitehouse & Co., with whom he remained four years as a clerk. In 1869, he commenced the business of selling books by subscription, and, in 1874, he established his present house, where he carries on a large subscription-book business in medical works, and also deals largely with the general trade. He has published the following medical works: "Gland Bacteria and the Germ Theory of Disease"; the "Chicago Medical Directory," published annually; and "Lyman's Insomnia and Other Disorders of Sleep." He also represents the publishing house of William Wood & Co., of New York. He was married on October 15, 1871, to Miss Lizzie Warner, at Dixon, Ill. She was born in Wilkesbarre, Penn., on March 26, 1843. They have three children.—Alice E., Charles E. and Mary E.

FEDERAL INSTITUTIONS.

After many years' experience with the vexations of cramped quarters, the various officials of the Federal service in Chicago finally, on Monday, May 3, 1886, reached a haven of rest in the new Custom House and Post-office. The interior of the building was not completed until three months later. The total amount expended on the building was $4,125,000, and to this should be added the $1,250,000 paid for the site. The building is a sample of many put up for the Government during this period. The foundations were laid insecurely, the stone of which the walls were constructed of a poor quality, and the workmanship was indifferent. In 1875, it was reported that the foundations were settling and that it would be unsafe to proceed with the erection of the building. Mayor Colvin appointed a committee of five architects to examine the building. They pronounced the foundations safe, and the Government proceeded with the construction. A dispute arose between the City and the Government over the payment of these experts for their services.

In 1879, another commission of local experts examined into the condition of the walls of the building, and they reported that the stone, besides being badly chipped and cracked almost all over the building, was of an inferior character and would ultimately disintegrate in our rigorous climate. The frosts of recurring winters have continued the work of disfiguration of the building. Wide seams and fissures have appeared in the inside as well as in the outside walls, and the building is settling badly, the southeast corner being several inches below the level of the rest of the structure. Supervising Architect Bell, in the summer of 1885, said there was no way of strengthening and repairing the building permanently, and that it was only a question of time when the whole structure would have to be torn down. The site has appreciated in value since its purchase by the Government over fifty per cent.

In this volume, there is no necessity of specifying in detail the especial importance of each Federal Department, as was done in Vol. 11, but an effort will be made to present the more important working features briefly, and to condense into facts and figures whatever is necessary to show the gradual increase of the service, in all branches, to its present magnitude.

THE POST-OFFICE.

In 1871, the Chicago Post-office became the second in the United States in respect to the volume of business transacted. In 1879, the business showed an increase of nearly twenty-five per cent, over that of the preceding year, and as the average yearly increase is nearly as great, it is fair to presume, now that extra working facilities have been perfected and the force of clerks and carriers is larger than ever before, that the Chicago Post-office will keep steadily on the progressive march until it outstrips its only rival, New York.

When the great fire of 1871 occurred, Colonel Frank A. Eastman was postmaster, and he served until December 20, 1875, when General John McArthur succeeded him.

The removal of the Post-office, after the fire of 1871, to Burlington Hall, and thence to the Wabash-avenue Methodist Church, have already been chronicled. The Post-office has passed through more ordeals by fire than any other of the Federal Departments. It was burned out in the July fire of 1874, and the business was removed to the West-side Station, at the corner of Halsted and Washington streets, where it remained forty days. On August 23, 1874, it was established in new quarters in the basement of the Honoré Building, at the corner of Dearborn and Adams streets. On January 4, 1879, it was again burned out, and working quarters were then secured in the basement of the Singer Building, now Marshall Field & Co.'s retail store, at the corner of State and Washington streets. There was but one entrance to the basement, and the quarters were cramped, unhealthful, and inadequate for the needs of the service. On April 12, 1879, it was removed to the basement floor of the new Government building, which had hastily been put in readiness. Here the Post-office enjoyed the comparatively long rest from its travels of eighteen months, when its belongings were transferred up stairs to the main floor of the building, and it formally took possession of the present quarters which had been provided for in the original plans of the building. During the period of the Honoré Block fire and the subsequent removals, Frank W. Palmer was postmaster, he having succeeded General McArthur on February 26, 1877.

The business of the office for 1871, was quite phenomenal. There were 1,113,113 foreign letters received and 2,321,896 foreign letters sent, and over 500,000 newspapers were received and quite as many sent. The total number of letters delivered and collected by car-
The Postal Record of January, 1872, had the following regarding the business of the Chicago Post-office during the preceding year:

"The Chicago Post-office now ranks second, upon the books of the Department at Washington, in regard to business transacted. By this is meant the business which shows a revenue—but there are, more work is done at the Chicago office at this time than at any other Post-office on this continent. Chicago is a point that catches mails from every point of the compass. For the East, West, North and South a great portion touches here and is handled by this office. During the past few months, on several occasions a hundred tons of mail matter have been handled a day in this city. Nearly twenty large wagons are required to transport these great mails between the Post-office and the various depots."

The perfecting of the Railway Mail service greatly lessened the volume of business and labor in the general office after this date. In 1872, after the ravages of the fire which had been repaired, the number of post-boxes in use was 375; number of mail letters delivered during the year, 137,175,135; number of city letters delivered, 2,012,587; number of newspapers delivered, 2,653,523; number of letters collected by carriers, 15,092,507; number of newspapers collected, 2,979,438; total revenue collected from city matter alone, $57,658.72. Postal cards were introduced on May 1, 1873, and they immediately sprang into such popularity as to greatly increase the work of the post-office. Postmaster McArthur created somewhat of a breeze among the business houses by prohibiting the depositing of circulars and newspapers in the street letter-boxes and requiring them all to be mailed at the general office. The order was overruled by the Postmaster-General, and became a dead letter.

The first sub-stations were established as follows: West Division station, West Washington and Halsted streets, on April 23, 1873; North Division station, Clark-street Turner Hall, on December 13, 1873; South Division station, State and Thirty-second streets, on December 15, 1873. Postmaster McArthur tried the experiment of placing permanent collection boxes on the cross-town cars, and a collector was stationed at the Clark-street terminus to receive the contents. There was no appropriation for this, and General McArthur defrayed the expense himself. The innovation was a failure and was soon abandoned.

The salary of the postmaster at this time was $4,000 per annum and the bond required was $50,000. Postmaster McArthur deposited the funds of the Post-office in the Cook County National Bank. There were about $30,000 of the funds in the bank when it failed. A special agent was sent out from Washington to inquire into rumors of a shortage in the accounts of the postmaster. It was charged that Postmaster McArthur had no right to deposit in the Cook County Bank, but he showed that it had been the regular Post-office depository and that he had instructions to make deposits therein. The special agent reported a shortage of $52,000, and suit was brought against General McArthur's bondsmen, John Allston and James Steele, to recover the amount of the shortage, and proceedings were brought against General McArthur in the United States District Court. He retired from the office and C. L. Squiers, for many years assistant postmaster, conducted the office for the bondsmen, with the consent of the Post-office Department. General McArthur was paroled on bail, and was pardoned by President Hayes, and subsequently settled up his indebtedness to the Government dollar for dollar. Only about $18,000 was recovered from the defunct Cook County National Bank. Postmaster McArthur's misfortunes were mainly attributed to his generous impulses and liberality.

The volume and importance of the business transacted in 1874, will be shown by the following table, which will serve also as a basis for comparison for subsequent years:

**STAMP DEPARTMENT.**

Received for the sale of stamps...$579,351 47
Received for the sale of stamped envelopes...311,125 01

Number of transient newspapers collected and deposited in this office, being insufficiently prepaid were delivered and notes for the amount was received from the party...32,300
Number of newspapers delivered and paid less than one full rate, which were sent to the Dead Letter Office...18,574
Number of letters collected and delivered at this and attached post-office...2,135,040
Number of letters returned to writers...4,816
Postmaster Palmer introduced many improvements in the manner of handling the mails and facilitating their delivery. He caused the van-system of delivery and collection to and from sub-stations to be adopted, and established new sub-stations in important districts. These were the Union Stock-Yards Station; the Northwest Station, at Milwaukee and Chicago avenues; the Cottage Grove Station, Cottage Grove Avenue and Twenty-seventh Street; the Southwest Station, at Blue Island Avenue and Eighteenth Street; and the West Madison Street Station, at the corner of West Madison and Robey streets. The force of office-clerks and carriers was increased until there are now (1883) eight hundred and ninety-three employed. The clerical force in the general office has been increased by the addition of from two to five or more clerks as their services were needed. During 1884, the interior working force was increased by the employment of fifty-two new clerks. The largest number of carriers employed at once was on October 1, 1881, twelve; on September 1, 1882, twenty-five; on November 5, 1883, twenty-five; on September 16, 1884, forty. There is a substitute force of carriers and clerks numbering sixty-five men. The clerks properly number four hundred and eighty-two and the carriers force hundred and twenty-one. Thirty-five vans are employed in carrying the mails to and from the various railway depots.

The salary of the postmaster was increased to $6,000 per annum in 1883. At the beginning of 1885, the number of Chicago publications alone sent through the office under the second-class rate was three hundred and ninety-five.

The following statement, made by Postmaster Palmer upon his retirement, shows the postal receipts for each fiscal year and the parts of years from July 1, 1877, to June 1, 1885:

COLLINS S. SQUIRES, assistant postmaster, was born at Lebanon, Madison Co., N. Y., on May 30, 1832, and is a son of Ira and Lucy (Frink) Squires. He was brought up on his father's farm during his boyhood, and attended school at Hamilton, in the same county. After completing his studies he secured a position as clerk in the Hamilton post-office, in May, 1849. This was during Mr. Pierce's administration as president, and young Squires continued in the post-office during his term and the succeeding one, until June, 1856, when he became employed in a books store at Hamilton. He was occupied until the spring of 1857, when he decided to come West, which he accordingly did, locating in Chicago. During 1857-58 he was employed in the Engineer's Department of the city, which was then under the charge of N. S. Bouton, superintendent of public works. Mr. Squires continued there until April 1, 1861, when he took a position with Chapin &

</table>
Fox, bridge and dock contractors. Within a month after, he was gratified by receiving a notice of appointment to a position in the Chicago post-office, and being desirous of returning to his first love—a work for which he had a natural aptitude and considerable experience— he resigned his position, and on April 24, 1846, took the position of clerk in the nailing department. In 1846, Mr. Squiers was appointed superintendent of the stamp division, and in 1852 the duties were increased by the work of the cashier devolving upon him. He was resigning, in part, 1850, he was appointed general chief of the post-office, and in October, 1867, General Frank T. Sherman made him assistant postmaster. Mr. Squiers continued in the office under the administration of Mr. J. S. Scripps, postmaster, and continued an employé through the terms of Samuel Howard, Robert A. Gilmore, Frank T. Sherman, F. A. Bascom, John McNair, F. W. Palmer, and, on the advent of S. Corning Judd, he was retained in that position which he filled for the past nineteen years. During this long term of service, Mr. Squiers has been the postmaster de facto, and he has conducted the Government's postal affairs in such a businesslike manner that he has earned for him the good-will and support of every business man in Chicago. No one is better posted regarding the details of a post-office than he; and were he to be changed from his present position, the postmaster-in-chief would have a difficulty in finding a suitable person to fill the office of assistant. Mr. Squiers is a member of Blair Lodge, No. 993, A.F. & A.M., Lafayette Chapter, No. 2, R.A.M., and Apollo Commandery, No. 1, K.T. He was a member of the firm of E. P. Tinkham, until February 10, 1851, and E. P. Tinkham, of Earlville, Madison Co., N.Y. They have two daughters, Ella Louise, now the wife of E. T. Kingman, of Chicago, and Clara M., who resides in West of Rockford.

John H. Rea, auditor of the post-office, was born at Rockville, Parke Co., Ind., in 1828. His parents were Wallace and Eliza (Huntington) Rea, and his father was the first clerk of Parke County, holding the office continuously, and he was reappointed when the death of the senior Rea occurred, the family removed to New York State, the old home, and an academy in Otsego County. John H. Rea finished his education. After completing his common school studies, he commenced reading law, and in 1846, he went to Rochester, N.Y., and entered a lawyer's office, where he studied for another year. In 1848, he decided to return West, and in alliance he was appointed to a position in the United States clerk's office. He continued as deputy clerk for Mr. Bassett until 1853, when, owing to the age and infirmity of Mr. Bassett, he received the appointment of clerk of the United States District Court, and also performed the clerical work of the Circuit Court for Mr. Bassett. Mr. Rea was about that time admitted to the bar and practiced before the courts. In 1860, his chief, Mr. Bassett, died, and Judge McLean appointed him clerk of the Circuit Court also. From about 1855, Mr. Rea held the appointment of United States commissioner for Indiana and also of master in chancery of the Circuit Court. With all these various offices, he has been active and efficient, and that Mr. Rea performed a vast amount of hard work. In the winter of 1859-60, he was a member of committee in finance of the State Legislature selected Mr. Rea as their representative to go to New York and examine into the accounts of the United States, a work which required about three months of constant labor, owing to the mixed condition of things. In 1862, Mr. Rea was superseded in his position as clerk of the District Court by the appointment of a son of the judge then on the bench, and two years later resigned the same office in the Circuit Court, much against the desire of the Bench and Bar. His resignation was not accepted until nine months after giving the court formal notice. Prior to resigning the clerkship, Mr. Rea had become largely interested in coal lands near Springfield, III., and on leaving the Circuit Court of Indiana, he located at Springfield. He continued as secretary at that point for a period of two years, when he disposed of his interests and located in Chicago in the spring of 1867. He became identified with the commercial trade, in which he remained for two years, and then turned his attention to real estate. In 1869, when Charles Kern became sheriff, Mr. Rea was offered the position of deputy, but declined; he, however, was made charge of the grand jury during the term of Sheriff Kern. During these years he was one of the originators and became largely interested in the Brighton Cotton Mills, near this city, but owing to the fire and the panic of 1857 it was run for some time at a loss, and did not prove to be remunerative to its promoters, Mr. Rea bearing heavy losses. During Mayor Harrison's second term, Mr. Rea was appointed 3rd circuit judge of the new division in the Waubash department of the city, and he filled that place until in May, 1887, at which time he received a note requesting him to call on the new postmaster, S. Corning Judd. This proved to be a tender of the position of auditor of the post-office to Mr. Rea; which he accepted, and entered upon his new duties on June 1, 1887. The office was wholly unsolicited and it was the highest compliment to Mr. Rea, whose integrity and uprightness have never been impeached.

Mr. Rea has been a staunch democrat all his life, and is prominently known as an able advocate of the principles of his party. He was married on May 15, 1861, to Miss Julia Ridgely, of Springfield, Ill. They have five children,—Kildely, now with the house of Markley, Aliing & Co.; Lillie, Mary, Wallace and Eliza. Lawrence, on the staff of the Post-Office Department, and is a favorite among the employees. Courteous, agreeable, and at all times energetic in the
discharge of his duties, he has won his present office through strict devotion to business. He is a member of the National Union Society. He was married, on November 13, 1879, to Miss Elizabeth C. Thauer, of Waukesha, Wis. They have two children,—Laura Elizabeth and Edwin John.

Henry F. Donovan, general superintendent of free postal delivery, is one of the youngest men who has made a decided public record in Chicago. He is a native of Canada, the son of Christopher F. and Mary L. Donovan, having been born at Whitby, Ontario, on August 8, 1858, and came to this city with his parents when an infant. He received his primary education in the public schools, but when only thirteen years of age began connected with the Chicago Evening Journal. For ten years he remained with that newspaper, making numerous friends and winning many laurels in his profession. He was one of the organizers of the Chicago Press Club in 1880, serving for two years on the Board of Directors. Mr. Donovan was also one of the originators of the Irish-American Second Regiment. In 1892, he was unanimously elected a member of the Board of Education and, in 1883, was chosen president of that body. So well did he discharge the duties of this office, that he was re-elected to the presidency in 1884. In October, 1884, Mr. Donovan was nominated by acclamation in the Democratic County Convention for clerk of the Superior Court, but, although he ran far ahead of his ticket, the tide which swamped his party in the county carried him with it. In June, 1885, he was appointed to his present position, and in September of the same year he was elected president of the Young Democracy of Cook County, a political organization ten thousand strong. In the same month he was also re-elected to the Board of Education for three years. He is secretary of the local board of civil-service examiners, and upon all occasions has shown wonderful executive ability and a commendable public spirit. Mr. Donovan was married, in September, 1876, to Miss Cornelia E. Casselman, daughter of Christian Casselman, one of the oldest and best known citizens of Chicago. Several children have been born to them, of whom Michael J. and Mary Frances survive.

ELECTUS BACUS WARD, superintendent of the mail-bag repair department of the post-office was born on Governor's Island, New York Harbor, on December 25, 1856. His grandfather, Colonel Electus Backus, U. S. A., whose honor he was named, was then officer in charge of Governor's Island, and Captain James N. Ward, U. S. A., the father, was aide to the commanding officer. Young Ward was reared and received his preliminary education in Detroit. He was a pupil in and graduated from the Patterson Grammar School. He then became a pupil of Professor Isaac M. Wellington, civil engineer, of Detroit, under whom he took a thorough course in civil engineering. In 1873, after completing his studies under Professor Wellington, he went to Europe, where he passed a year in perfecting his professional education. On returning to America he made up his mind to adopt the profession of medicine, and accordingly entered the Long Island Medical College, Brooklyn, N. Y., where he took a four years' course of study; graduating in 1878, he carried off the highest honors of his class. He was then appointed assistant to the chair of the practice of medicine at the Long Island Medical College; and began in connection with his regular practice for a period of two years. Dr. Ward then located at Grand Rapids, Mich., where he established a country seat, one of the most beautiful retreats imaginable. His property consists of three hundred acres of land, beautifully situated, and his vacations and leisure days are passed at this beautiful home. In 1882, he abandoned the practice of medicine, and engaged in the wholesale and retail hardware trade at Fargo, Dakota. He continued there with splendid success; but a favorable opportunity occurring for closing out his interests, he sold out and came to Chicago in the fall of 1885. On November 1 of that year, he received the appointment of superintendent of the mail-bag repair department of the Chicago post-office, and he entered upon his duties. Dr. Ward was married on December 26, 1876, at Detroit, Mich., to Miss Mary Louise Armor, daughter of Professor Samuel G. Armor, LL. D., dean of the Long Island Medical College. They have two children,—Hugh Armor and Wilmer Holcomb.

John Howard Jones, superintendent of the West Division Post Station, was born in Pike County, Ill., on December 23, 1837, and resided in that vicinity until he attained manhood's year. During his youth he attended the common schools and afterward studied at Shurtleff College. After completing his education, he engaged in business in Pike County, continuing there until 1862, when he disposed of his mercantile interests and removed to Illinois. There he took a position in the office of Alexander Starne, state treasurer, with whom he remained two years. While at the capital Mr. Jones engaged in the wholesale hardware business and practiced its lucrative and necessary duties to the utmost of his ability. After leaving Starne's office, he was engaged as agent for the Western and California Press Association, fulfilling its duties in such manner as to win the confidence of the public. In 1868, he was tendered the position of agent for the Northwestern Associated Press in Chicago, and he resigned his post in the treasurer's office the same year. For seven years he was agent of Western Associated Press here, and during a greater part of that time he also acted as agent for the Western and California Press Association, fulfilling his duties in such a manner as to win the confidence and respect of the public. When the fire of 1871 occurred, Mr. Jones was conspicuous in the eyes of the press of America for the prompt and accurate reports he made concerning the great conflagration, and during that famous and the few days following, he worked almost incessantly, and, notwithstanding the great confusion and many disadvantages, he succeeded in giving to the world the most authentic description of the ravages of the flames. In 1875, he resigned his office, owing to the then too burdensome duties of the office, and took the position of chief clerk to the chief grain inspector of Illinois, where he continued until July, 1885, when he received his appointment to the office of superintendent of the West Division Post Station. Mr. Jones has been twice married, and the children of his first wife are Harry F., now with the house of Armstrong & Co., and Frank W. Mr. Jones was married, December 25, 1875, to Miss D. C. Higgins, of Griggsville, Ill. They have one daughter, Mary.

The Railway Mail Service.—The history of the Sixth, or Chicago, Division of the Railway Mail Service, it would seem, might properly come under the head of post-office business, but the Railway post-office business is so distinct and important in itself as to demand separate mention. Considering the magnitude which this service has reached, it is but fair to place on record all claims to the credit of its original originator. The Post-Office Department show that from reports made to the Department antecedent to 1860, by Messrs. Pitt
and Hobbie the matter of travelling post-offices was no
new thing in 1862, when William A. Davis, of St. Joseph,
Mr. Armstrong suggested to the Department, and attempted
in a small way to distribute the California overland mails on the Hannibal & Saint Joseph Railroad; and
certainly not in 1864, when Mr. Armstrong made
his first suggestions. In the report of Postmaster-General
Hatton, made to Congress in January, 1853, based
on records, documents, and letters compiled by John
Jameson, general superintendent of Railway Mail service,
the following summary is given, based upon data in
the possession of the Department:

"For years previous to 1856, there had been some distribution
of mails on railways, but the handling of through-mail on the cars,
without turning it into distributing offices, began, as has been shown,
in a small way with respect to the overland mails only, under the
superintendence of William A. Davis, in July, 1862. It was urged
upon the Department, and elaborated into a more general scheme
by Mr. Armstrong in 1864. It was conducted at first as a doubtful,
and afterward a successful, experiment, under the double superin-
tendence of Mr. Park from 1865 to 1869. It widened into greater
usefulness under Mr. Armstrong from 1869 to 1871, and made
many new and valuable improvements under Mr. Bangs from 1871
to 1876.

It seems reasonably certain that if Colonel Arm-
strong was not the real founder, his services were of
such character as to have warranted the erection of
his honor of the monumental bust that now stands
within the Post-office enclosure in Chicago. At any
rate, since its inception the Chicago Division has grown
to be the greatest in the service. This service has
made it possible to expedite mails, do away with a large
number of distributing offices, dispense with the services
of hundreds of office-clerks, and save to the Post-office
Department something like $3,000,000 per annum. In
none of these divisions was the development of business
more rapid than in this. Colonel George S. Bangs, who succeeded
Colonel Armstrong as superintendent after the latter's death, had been postmaster at
Aurora, III., but he developed a wonderful capacity to
manage the work, and systematized and expedited it as
rapidly as it increased.

The Toledo and Chicago night line was commenced on Janu-
ary 23, 1871; the Buffalo and Toledo on June 18, 1871; the old
Quincy and Saint Joseph route was changed to the Quincy
and Kansas City, on November 15, 1871; Burlington and Council Bluffs
commenced on October 10, 1871; Milwaukee and LaCrosse on
January, 1872; Freeport and Bloomington and Bloomington and
Cairo were consolidated on August 7, 1872; Chicago and
Cincinnati commenced on August 1, 1874; on October 1, 1876, Chicago
and Portage established, soon after changed to Chicago and Sparta;
Chicago, Forrester and Dubuque, on February 1, 1877.

New routes followed quickly, until, at this writing
their name is legion. Captain James E. White, who
had been gradually promoted in the service in the
West, succeeded Colonel Bangs as superintendent of
the Chicago division in November, 1871, and he has
ably continued the improvements begun by his pre-
decessors. At the beginning of 1885, there were 201
railway post-office lines in operation in this division;
526 crews of men; 770 railway postal clerks at work on the
lines, or a whole number of 827, including extra
men; the number of miles run by clerks from register
to register was 29,262 and they ran over 26,913 miles
of railroad, each man averaging 21,186 miles of travel
per annum; and the annual pay for transportation
of railway mails in this division was $3,235,612.65.

JAMES E. WHITE, superintendent of the railway mail service
of the Western Division, was born in New Scotland, Albany Co.,
N. Y., on April 11, 1842, and is a son of David and Catharine
White. When he was eleven years he went, with an
uncle, to Iowa, and located at Davenport, and soon in
the Vinton, where he was educated in the common school. When the
War broke out, he enlisted in Co. "I" of the 3d Iowa Infantry on
May 20, 1861. His company was engaged in the southern campaign
at first, and on September 17, 1862, he was wounded in an engage-
ment near Blue Mills, Mr. H. H. White of the 15th
Iowa, on January 1, 1862; promoted from the ranks to fourth
sergeant on April 10, 1862; third sergeant on April 30, 1862;
first sergeant on May 1, 1863; and commissioned second lieutenant
on April 29, 1865. At the battle of Atlanta, he was wounded on
July 21, 1864. On October 5, following, he was made first
lieutenant, and on January 1, 1865, he was commissioned captain
of his company. He was mustered out at Louisville, Ky., on
July 21, 1865. On returning home he reentered school, and commenced
the study of law. In March, 1866, he was appointed postal clerk,
and entered the railway mail service. He first ran between
Council Bluffs and Boone, Iowa; then was transferred to the
route between Chicago and Cedar Rapids; afterward between
Chicago and Iowa City; and, after about five years' service
as route agent, he was promoted to the position of chief clerk of
the railway mail service west of the Missouri River, with head-
quarters at Omaha. He continued in that capacity for about
two years, and on November 21, 1871, was elevated to the office
of superintendent of the railway mail service for the Western Division,
with headquarters in this city. The railway mail service has made
wonderful progress since Captain White became superintendent,
and his work in this department has been such as to redeem
greatly to his credit as an enterprising, energetic official. He has
worked earnestly to secure the greatestrapidity in delivery of the
mails, and the splendid service now enjoyed by the western people
is due in a great measure to his zeal and energy. Captain White
was a member of Post Number 89, G.A.R., of the Veteran
League, Veteran Club, and Englewood Lodge, A.F. & A.M. He
has been married twice, his last marriage occurring on April 11,
1872, to Mrs. George B. Armstrong, of Englewood. He has two
children,—Marion C. and Thaddeas B.

THE CUSTOM HOUSE.

An account of the business and operations of the
Chicago Custom House involves, to a great extent,
a history of the port of Chicago. The Custom House is
undoubtedly the most important of all the Federal
institutions, on account of its direct connection with
the commercial interests of the city. While the
Government obtains a greater net revenue through the internal
revenue collectorship, the collectorship of the port
returns the next largest revenue, and is the machine
through which the National tariff is levied upon impor-
tations made by the great mercantile houses which have
gone far toward making Chicago the Metropolis of the
West.

The history of the Custom House in the preced-
ing volume is a fair record of the growth of the com-
pany of Chicago from the time the city was declared
a port of entry up to 1872. Of the earlier clerks
were: William B. Snowhock, Jacob Fry, Luther Haven,
Bolton F. Strother, Jacob Russell, and Norman B. Judd
died in Chicago. The only survivors of the earlier
collectors are Philip Conley and General Julius White. J.
E. McLean, who was collector in 1869, and prior to that
a partner of Orville Grant, brother of General Grant, in
the leather business, now resides at Shippensburg, Penn.
Thomas J. Kirnella, still a resident of Chicago, was
deputy collector of the port from 1853 to 1866; and
Charles M. Pullman, a brother of George M. Pullman,
was deputy collector under Judge W. H. Scates in 1868.
John Hitt, the present deputy collector, has held the
position for over eighteen years. Collector J. E. Mc-
Lean, who succeeded Judge Scates in July, 1869, served
until July, 1872, when Norman B. Judd assumed charge.
Mr. Judd held the office until October, 1875, when J.
Russell Jones succeeded him. Mr. Jones resigned in
October, 1878, to accept the position to Brussels, Bel-
gium, and William Hatton, Jr., was appointed his suc-
cessor. When Mr. Smith's term expired, November, 1881, a lively party contest ensued for the succession.
Mr. Smith was a candidate for re-appointment, with
Deputy-Collector Hitt a good second. Daniel Shephard, secretary of the Republican State Central Committee, and William Penn Nixon, editor of the Inter Ocean, were also candidates for the office. Chester A. Arthur had succeeded to the presidency, and he settled the contest by appointing Jesse Spalding, whose chances had not entered into the calculations of the rival claimants. Mr. Spalding conducted the office very acceptably to the commercial interests. He was succeeded by A. F. Seeberger on October 1, 1885, who was appointed by President Cleveland on September 24.

During the year ending June 30, 1871, the number of employees in the Custom House was forty-seven, and their compensation aggregated $54,431.66. The collector's compensation at this time, including fees, amounted to $4,648.79. The collections for the year amounted to upwards of $1,590,000, and the fines, penalties, and forfeitures collected, to $1,159.80. In 1880, the working force had increased to fifty-five men, and the aggregate expense of collecting, including rents and contingent expenses, was $80,000 a year.

For the year ending June 30, 1885, the employees numbered ninety-five, and the expenses of collection amounted to $144,000. In 1883, the compensation of the collector was increased to $7,000 salary, and the system of bookkeeping was done away with.

For fifteen years the collector has had charge of all of the buildings and property in the district, built and controlled by the Treasury Department. The collector's district extends from Michigan City to Waukegan, and includes the ports of these places, as well as Calumet harbor and the port of Chicago proper. There is an assistant custodian of the Chicago Government building under the collector. The United States Marine Hospital was taken from his control, in 1881, and placed in the custodianship of the superintendent in charge of the hospital. The appraiser's office, which is an annex of the Custom House, is in charge of Charles Ham, who has served continuously since 1871, with the exception of two years. This department has been located, since 1871, in a part of Wadsworth's bonded warehouse, at the corner of Market and Jackson streets, for which the Government pays a rental of $3,500 a year. In the winter of 1884 Congress passed an appropriation of $29,000 for a new appraiser's store-building at Chicago. Another important adjunct of the Custom House is the barges office, located at the west side of the south approach to Rush-street bridge. Here all vessels that arrive or clear are supposed to be stopped and boarded by inspectors, the same as is done at ocean ports, but this custom has never been literally followed. Every vessel, however, that passes in or out is registered, with the hour of entry and clearance, and a manifest of cargo is made out. Before 1871, the merchants and shippers of the city sustained the barge office, but after the great fire the Government built and equipped a substantial building on the present site for the purpose for which it is sustained. This building was destroyed in the fall of 1884 by a cave-in of the river bank, caused by the excavations made by the city for a new bridge abutment. A new three-story brick structure was erected by the Government at a cost of $8,995, which was turned over to the collector on August 7, 1885. Quarters were provided in the new building for the barge office inspectors, and also for the inspectors of steam boilers and the Marine Hospital dispensary for transient patients.

The business of the Custom House constantly increased in volume. During the month of May, 1885, there were 9,028,313 pounds of merchandise weighed, divided as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Salt, 940,439 pounds: tin plate, 5,574,577 pounds; tobacco, 22,930 pounds; miscellanea, 2,191,350 pounds. The quantity of spirits gauged was 21,300 gallons, and of cigars received 2,556 boxes. Two vessels were measured, five discharged, and over 250 given clearance papers. The discharged vessels contained 51,149 packages. The number of cars consigned on the railroads was 160, containing 17,015 packages, and the number of cars inspected for export was 195, containing 25,805 packages. There were 456 cars discharged at depots, containing 46,993 packages, which were delivered as follows: To consignors, 40,107; to appraiser, $10; to warehouse, 5,920. The total number of consignments was 460, and the total number of packages handled was 164,316. Since 1877, the value of exports by the lake to Canada has been as follows:</td>

The growth of Chicago as a port of entry is certainly marvelous. The amended Act of Congress, passed on June 10, 1886, making this city a final port of entry did much to stimulate imports, as will be seen by the preceding statement. The new law relieved our importers from giving bonds at New York, and they gladly availed themselves of a privilege long unjustly denied them.

The following is a comparative statement of arrivals, clearances and tonnage at the port of Chicago since 1871:

During the year, four vessels were built in Chicago, having a gross tonnage of 197.95.

There were 5,878,512 bushels of grain shipped by lake, in transit and export, during the year, to Canadian ports. Of this, the wheat in transit amounted to 42,212 bushels; export, 764,591; total, 870,863. Corn in transit, 2,569,027; export, 2,158,893; total, 4,727,955. Oats in transit, 292,454; export, 369,300; total, 322,754 bushels.

JOHN HITT, special deputy collector of customs, was born at Madison, Ind., on October 18, 1832. His family removed to Mount Morris, Ogle Co., Ill., in 1837, and it was there that his early boyhood was passed. He attended the common schools for a few years, and after finishing his preliminary studies he entered Greenscide (Ind.) Asbury University, from which he graduated in 1855. After residing at home for a few years, Mr. Hitt came to Chicago and, in 1859, entered the law office of Sears, McAllister, Jefferson & Peabody, with whom he read law for about three years, being admitted to the Bar in 1861. He devoted himself to general practice until January 10, 1869, when he was called to the law department of the Illinois Central Railroad Company, and as assistant to Vice-President Douglas, who afterward became president of the corporation. Mr. Hitt continued his identification with the Illinois Central until June 1, 1867, when Judge Scates, his old friend and former preceptor, tendered him a position in his new office, that of collector of customs for this port. Mr. Hitt entered into the service of the department, in whose history he has been closely identified for eighteen years. He first assumed the duties of chief entry clerk, and in July, 1869, was promoted to the office of deputy collector and entry clerk with an increase of salary. After the great fire, he was retained in the office at a still larger salary and, on November 1, 1872, he was made general and special deputy collector. He so continued until the advent of Jesse Spalding to the collector’s office, in March, 1882, when he was promoted in salary, still retaining the office of first deputy to the collector. Mr. Hitt has served under seven different administrations—those of Judge Scates, J. E. McLean, Norman B. Judell, Judge Russell Jones, William Henry Smith, Jesse Spalding and A. F. Seeberger—and upon the advent of each he has been promoted either in rank or salary, until he now holds an office of high rank and receives a salary commensurate with the difficult and responsible duties devolving upon him. His law education, combined with his natural ability, keen perception, and energy, together with his many years of experience, have served to make him an officer thoroughly acquainted with every detail of the customs department. His services are naturally very requisite to incoming collectors, and it is probable that Mr. Hitt will continue in his office for some time to come. Mr. Hitt is a member of the Oriental Lodge, No. 33, A.F. & A.M., Lafayette Chapter, No. 2, R.A.M., and Apollo Commandery, No. 1, K.T., of Chicago. He was married on June 24, 1868, to Miss Harriet S. Robe, of Chicago.

JAMES R. B. VANCLAVE, confidential secretary to the collector of customs, was born at Knoxvile, Ill., on October 9, 1853. He there attended the public schools of his boyhood, afterward enrolling Knox College, at Galesburg, Ill., where he completed his education. In 1874, he secured a position as Southern correspondent of the New York Herald. He remained with that journal for about two years, during that time establishing a news bureau at Havana, Cuba, and the City of Mexico. In 1876, he terminated his engagement with the Herald and came to Chicago, entering the law office of Plummer & Bradford, with whom he read law for about four years. In 1879, he became identified with politics, and in the Garfield campaign was a conspicuous figure in local and State work. He was secretary of the Central Garfield-Arthur Club, and was very active in the field until the election occurred. In January, 1881, he went to the State capital, and served through two sessions as enrolling and engrossing clerk of the Senate, in addition to his duties as confidential secretary to the collector of customs, William Henry Smith, by whom he was appointed on July 1, 1881. During the session of the Legislature in 1883-84, he was clerk of the Congressional and Senatorial Appropriation committee, and rendered valuable service in the work performed by that body. He is gifted with a bright, intelligent mind, is vigorous and energetic in whatever work he undertakes, and these qualities, together with his genial nature, serve to make him esteemed and popular with all who know him. He is a member of the Kiwilling Lodge, No. 311, A.F. & A.M.; Corinthian Chapter, No. 69, R.A.M.; and Apollo Commandery, No. 1, T.T. For several years he was W.M. of Kiwilling Lodge, and takes a hearty interest in almost all Masonic work. He belongs to the Union League Club. Mr. Vanclave was married on November 12, 1882, to Miss Josephine Helen Sheehy of Richmond, Va. They have one child, who was named Helen Farwell by Mr. Vanclave’s friend, Hon. Charles B. Farwell.

WILLIAM J. JEWELL, deputy collector of customs, is among the oldest employees in the custom house service, having entered
William T. Hughes, chief entry clerk of the custom house, was born in Zanesville, Ohio, on August 31, 1858. It was in that city that he was reared, given a thorough common-school education, and taken into his father's store to learn the mercantile business. At the age of twenty he went to Philadelphia, where he became a salesman in the house of Tingley, Burton & Co., one of the leading dry goods stores, for two years. During the following season he went to Cape May, and took charge of Congress Hall, then the leading caravansary of the famous summer resort. In 1860, Mr. Hughes left Cape Peoria, Ill., engaged in the maritime service, and was also largely interested in a contractor in building the railroad which now runs east and west through that city. In 1860, he came to Chicago and opened the Sherman & Co., under the style of McCabe & Hughes, packers and provision dealers. Their houses were located at the corner of Grove Street and Archer Avenue. The business was not quite suitably to Mr. Hughes, and he withdrew from the firm in 1863. Shortly after, he commenced, in connection with B. Gregg and W. T. Hughes, commenced business as commission merchants, dealing in highwines, provisions, grain and flour. Their office was first at 10, La Salle Street, but was afterwards removed to the Union Bank Building, where they were burned out in the fire of 1871. From 1863, the house was considered the largest of the kind in the entire West, its sales in highwines alone sometimes amounting to two and a half million dollars a year. Just prior to the great fire, the Bigelow House, which stood on the ground now known as Government Square, was about completed and ready for occupancy. To this Mr. Hughes owes the exclusive lease, and was to enter the premises on the 1st day of that fateful month. After the fire he became quite largely interested in the building of the Chicago & Pacific Railroad, and was secretary of that corporation. He was actively engaged in the line for a number of years, upon the completion of which he travelled extensively over the western country, returning to Chicago in 1879. On May 1, 1852, he was married to the position of clerical attendant in the Custom house by Collector Spalding, which he accepted and has retained up to the present time. Mr. Hughes was married on July 15, 1861, to Annie E. Stratton, of Chicago. They have three daughters,—Mary C., Carrie A. and Ella J. The firm of Hughes & Co. is the recognized leader in its line, and is the acknowledged standard for its goods.

Peter Kielbasa, license clerk and assistant to the deputy inspector in the marine department of the custom house, is of Polish parentage, and was born at Schwedien, Upper Silesia, Prussia, on October 13, 1858. He was there reared and educated, studying at the Gymnasia until sixteen years old, and attaining a proficiency in leading studies. His family emigrated to America in 1855, and settled in Texas, at the time of the first settlement in this country. He studied at one of our commercial schools for a year, and taught school in the village of Fana Maria for some time. When the Civil War came on, he and two brothers came North, and engaged in the Government steamer "C. D.," of the 16th Illinois Cavalry, which was mustered in at Camp Butler. He went in as a private, ten days after was created a corporal, and ten days thereafter was made first sergeant. When the close of the war came, he was left as second lieutenant, and shortly thereafter, in recognition of his valiant and faithful services, he was elevated to a captaincy and placed in command of Co. "E," of the 6th U. S. Colored Cavalry. He remained there until the war had ceased, being mustered out on April 19, 1866. He then returned to Chicago and engaged in the grocery business; but finding it too inactive work for him, and disengaging himself in 1867, he went into the service of the city as a member of the Police Department. He only served as a patrolman six months, when he
was given charge of one of the stations, and within a short time his abilities and efficiency were recognized by Chief Elmer Washburn and he was called to police headquarters, where he served Mr. Washburn as chief clerk for some time. In 1875, the captain was elected to a seat in the marine drawing board of the shipyard, and as a member of that assembly he represented the people of his district in a most able and competent manner. He served on several important committees and was acting chairman of the committee on the enrollment and provisioning of the fleet. When he completed his sentence he returned to the customs department, then under the administration of J. Russell Jones, and was made assistant to the deputy collector and license clerk of the marine division, which positions he held with complete satisfaction to his superiors and the people of Chicago.

Charles H. Ham, appraiser of customs for the port of Chicago, was born at Canterbury, N. H., on January 22, 1831. He was reared in the Granite State, and during his youth he was afforded only such advantages of education as the common schools could provide. He accomplished a well-grounded basis for the frequent acquisition of knowledge; and the habit of close application as a student which has characterized Mr. Ham throughout his life was formed during this early period, that the liberal culture he has maintained a mental growth which more liberal advantages could not have enabled him to exceed. While employed as a clerk at Concord, Mr. Ham pursued the study of law, but before completing the necessary course he was removed, in 1861, to Chicago, where he held the position in the K. K. Swift's banking house. When the panic of 1857 occurred, that institution was compelled to close its doors. Mr. Ham then resumed the study of law in the office of Smutzy, Waite & Towne, and, in 1866, was admitted to practice on the bar. Afterward he formed a business connection with Hon. Melville W. Fuller, and this introduced him into an active participation in the business of the profession. In 1868, he was elected to a seat in the mercantile life, and by a few years he withdrew from the enterprise. It was at this time that the Inter Ocean was founded, and Mr. Ham then became connected with that paper as a leading editorial writer, which position he continued to hold up to about 1876, when he became connected with the Tribune as an editorial writer on special subjects, which connection lasted till 1882. He then ceased his editorial labors in order to devote his leisure hours to a work, the particulars of which are mentioned hereinafter. Mr. Ham has always taken an active interest in politics and won a high reputation in that regard, using the word in its better sense. He has devoted a considerable portion of his life to the advocacy of the principles of the republican party, but he has not been so successful as to make personal advancement a matter of concern. On March 1, 1871, he was appointed by President Grant to the appraisership of customs at this port. He was removed in August, 1875, by President Hayes, who commanded the then secretary of the treasury, Mr. Bristow, whose policy he antagonized in the Inter Ocean, but was re-appointed by General Grant in February, 1877, since which time he has held the office uninterruptedly. It has been during his administration that the customs department in this city has made its greatest progress, and the labors of Mr. Ham during his first year of service were as nothing compared to the work now required. The aggregate duty on customs in 1871 amounted to only a few hundred thousands a year, whereas it now figures into millions of dollars annually. Appraiser Ham has kept steady pace with the development of his work, and he has performed his duties in such a manner as to win the highest regard and esteem of the several executives of the Government since the administration of General Grant. Mr. Ham is eminently social, and his fine conversational powers render him an attractive companion among men. During all his busy life he has been greatly absorbed in literary pursuits, and a well selected library at his office gives evidence of his love for this diversion. For four or five years, since retiring from editorial work on the Inter Ocean, Mr. Ham has devoted himself to the preparation of a volume about to be issued from the press of Harper & Bros. Since the establishment of the Chicago Manual Training School, he has taken a lively interest in its development, his pen has often encouraged such institutions over the country, and he has been an ardent champion of this now popular mode of educating the young. He first took our interest in its promotion, his pen has been frequently given to the cause of "Manual Training," which school was the first to make the degree of the scope of the new book of the same title so soon to be issued by the Harpers. He has handled the subject in a masterly manner, and no doubt he will prove of great good. Mr. Ham was married on December 17, 1857, to Miss Emeline A. Hines, of Le Roy, N. Y. They have only one child, a daughter, named Alice. From the fact that Mr. Ham is in the very prime of his manhood, and it is only within a few years that he has obtained the opportunity of giving free scope to his talents, it may be fairly presumed that he has entered upon the threshold of a brilliant career, and that his friends may yet witness greater successes in the literary field, in which he will certainly always remain a distinctive figure.

THE INTERNAL REVENUE DEPARTMENT.

The Internal Revenue Bureau is probably the source of a larger revenue to the Government than any other Federal Department in Chicago, and more taxes on distilled spirits are collected in the First, or Chicago, District, than in any other district except one in the United States. For the fiscal year ending on June 30, 1871, the assessments amounted to $5,246,606.63, and the collections, $7,269,582.65. The total cost of assessing the revenue for the same period was $68,122.96, and of collecting it, $39,165.74. In the fall of 1872, the assessor's and collector's offices were consolidated, and in July, 1873, assessors and assistant assessors ceased to exist. Collector Samuel A. Irwin, who succeeded Collector Hermann Raster in May, 1872, served until his death in October, 1874. The remainder of his term, until November 30, 1874, was assigned to I. F. Hoyt, who was then succeeded by Philip Wadsworth, who in turn served until June, 1875, when Joseph D. Webster became collector. The latter served until March 12, 1876, when the office again became vacant by his death, and the remaining one month of his term was filled by F. H. Battershall. Joel D. Harvey was appointed collector in March, 1876, and served continuously for nine years. He was succeeded by Rensselaer Stone on October 1, 1885. The abolition of the income tax was primarily the cause of the doing away with the office of assessor, and since then gaugers and store-keepers in charge of the various distilleries keep track of the amount of spirits produced. The distillers are required to pay all taxes on liquor before it is withdrawn from the distillery. The law allows them to keep it in bond for three years, and taxes may not be paid until it is withdrawn from bond. The officers in charge are required to keep a correct record of all liquor in bond.

During the time the tax on whiskey was two dollars a gallon, the rules and regulations governing its collections were decidedly lax, and great frauds upon the revenue were practiced all over the country. In Illinois the frauds were mainly committed in the First, Chicago, and the Sixth, Springfield, Districts. Special agents Tutton, Matthews and Soumerville were sent on from Washington to investigate the frauds in Chicago. The first seizures were made in the spring of 1875, and those implicated were known as the "first batch." The distilleries seized in the first batch were those of R. C. Merseran, the Union Copper Distilling Company, the Lake Shore Distilling Company, Gholson G. Russell & Co., William Cooper & Co., and B. M. Ford & Co., rectifiers. Among the prominent people implicated were Roswell C. Merseran, William S. Golson, Francis A. Eastman, Patrick R. Mason, Gholson G. Russell, B. M. Ford, William Oliver and George (Bum- mel) Mueller. The "first batch" engaged Leonard Swett for counsel and proposed to fight the Government, but finding that the grant of the trust was in a fair way of being completely broken up, they proposed that if the Government would grant them immunity they would turn State's evidence on their co-conspirators, known subsequently as the "second batch." At this time Jasper D. Ward was district attorney, he having
succeeded Judge J. O. Glover in the spring of 1875. Mr. Ward was removed in December following and was one of the officials indicted. Judge Mark Bangs was appointed district attorney on December 15, 1875, and the first matter he had to consider was whether the Government would be justified in granting immunity to the "first batch" in return for their evidence. Their proposition was finally accepted, and the prosecutions then commenced. Aside from the "first batch" distilleries, in which cases were confiscated, there were the Black Hawk Distillery, the Chicago Alcohol Works, the South Branch Distilling Company, Dickinson, Leach & Co., Singer & Co., and in fact every distillery in the city except H. Shufeldt's, besides a great many rectifying houses. All of the whisky in the country produced by these distilleries was also seized and confiscated. Among the more prominent "second batch" members who were apprehended and placed in the Cook County Jail were A. C. H. Long, Jake Rehm, O. E. Dickinson, H. B. (Buffalo) Miller, Dr. Rush, George Burroughs and "Old man" Powell. The supervisors, gaugers and other officials, as well as employees of the distilleries, who were indicted were legion. Collector Philip Wadsworth, Deputy Collector Chester L. Root, District Attorney Jasper D. Ward, William Minty, stamp clerk, supervisor Dan Munn, gaugers Cullerton, Hildreth, "Bum mel" Mueller, and others equally well known were indicted. Some of the indicted went to Canada, and after the trials were closed, returned and compromised with the Government by paying light fines. Stamp Clerk Minty was the only one who escaped entirely. He went to Scotland and has never been heard of since. Dan Munn, who had Robert G. Ingersoll for his attorney, was tried before a jury and acquitted. It was charged that Spite entered largely into his prosecution. Collector S. A. Irwin died of paralysis, brought on in a great measure, his friends claimed, by the worry and excitement attending the exposures. General J. D. Webster, who was universally esteemed to be an honorable man, retained Chester L. Root as his deputy, and the exposure of Root's connection with the frauds is said to have hastened General Webster's death. The distillers had been on each other's bonds, and the Government brought suit against them to recover damages. A. C. Hesing did not settle the judgment thus obtained against him until 1883, when he finally effected a compromise. Another celebrated case growing out of frauds upon the revenue, was the "Straw bond" conspiracy in 1877. The Government allowed manufacturers of matches to have practically unlimited credit for revenue stamps upon the filing of a sufficient indemnifying bond, James Baxter, a real-estate broker, organized a conspiracy, and by means of filing worthless bonds defrauded the Government out of nearly $150,000, with which he escaped to Canada.

J. D. Webster was the last assessor, he having been appointed on April 9, 1869, and his term expiring on May 25, 1872. The following is the list of collectors since 1871, with the date of their appointment and of the expiration of their terms of service:

Total: $114,601,935.02

The grand total of collections since the establishment of the district in 1862 is $163,157,723.03.

The falling off of nearly a million dollars in the collections of 1885, as compared with 1884, is accounted for by the fact that one of the largest distilleries, the Phoenix, which paid the Government $500,000 annually, was destroyed by fire in August; and another, the Garden City, was inactive during the winter of the year, under the regulations of the whiskey pool.

Rensselaer Stone, collector of internal revenue, was born in Oneida county, N. Y., on August 14, 1809. His father, George Stone, was for many years superintendent of the New York and Erie Canal, and now living, at the age of eighty-six years, in the City of Jamesville, N. Y. He was married to Miss Himman before marriage, and came with the original Van Rensselaer colony to America. Mr. Stone received his early education at the country school near his home, but when a boy assisted his father in his business. At an early age he launched out into business on his own account, and bought and sold butter and cheese in small amounts, until his capital had increased. He continued in the same business on a more extended scale in the interior of New York, and his efforts were so successful that he removed to New York City, where he engaged in the regular produce commission trade. In 1858, Mr. Stone deemed it a wise course to remove to the West, and in 1859, located in Chicago. He opened up in the produce commission trade, and became a member of the Board of Trade. He continued in the produce trade until the great fire of 1867, after which he went into the shipping business, and entered upon the Board of Directors, being a member of the Board of Directors of the Board of Trade, and since 1859, has retained his membership in that association. Mr. Stone has been a democrat "from the cradle" and has always taken a hearty interest in local and national politics. In 1871 and 1875, he was alderman from the old Fourth (now Third) Ward, and in local matters has been conspicuous as an advocate of democratic nominees for official honors. For years he was a member of the South Town, City and Congressional Democratic Central Committees, and in the fall of 1885 resigned the chairmanship of the several committees, which position he had occupied for several years. In September, 1885, President Cleveland tendered him the office of collector of internal revenue for this district, and on October 1, Mr. Stone entered upon his duties. Mr. Stone was married to Miss Zenas H. Jolin, of New York, who died on January 28, 1885, leaving a loving, devoted husband and three children to mourn her death. The eldest son, George N., is a leading young attorney of the city, and Carrie C., the eldest daughter, is the wife of Byron L. Smith, of the Merchants' Bank and the Equitable Company. The youngest daughter, Fannie E., resides at her father's palatial home in the South Division. Mr. Stone, though not prominent in Masonry, has held the office of Worshipful Master of Rensselaus Lodge, No. 160, A.F. & A.M., of which he has been a member for many years.

Milton C. Springer, chief deputy collector of internal revenue, has held his present position for the past eight years, being appointed thereto by Collector Joel D. Harvey, and his retention in the service and in this particular capacity has been due to his perfect knowledge and thorough acquaintance with all the details of the work in the revenue department. Mr. Springer was
William Rush Kerney, United States ganger, was born at West Alexandria, Washington Co., Penn., on June 15, 1830. He was reared in his native town and attended West Alexandria grammar school until his sixteenth year. His family being in Ohio, he then entered the academy of the Western Reserve, where he studied for a year. He then engaged as a clerk in a general store, but soon went to New York City, where he pursued a course of study until 1859. He then became a recruiting agent for the United States Volunteers in the Civil War, and afterwards engaged in the wholesale provision business, but, owing to the depression in business, he found the trade dull and uninviting. He had become somewhat identified with politics, and this led to his being appointed deputy collector in charge of the North Division of the city by Collector Wadsworth. For such work Captain Springer seemed particularly well qualified, and after filling the office two and a half years he was promoted to general deputy, having in charge all outside deputies of the receivers, in this district. He served there one year and five months, when Collector Harvey, recognizing his splendid abilities and the efficiency of his past services, called him into his office as chief deputy collector. The office Mr. Springer has held up to the present time, performing his duties in a manner most creditable to himself and highly gratifying to his superior officers. He is a member of the G.A.R., an ex-Veteran Club, of Evanston Lodge, A.F. & A.M., Evanston Chapter, R.A.M., and another Commandery, No. 1, and Oriented Consistory, S.P.R.S. 32°, of this city. He also belongs to the Order of the Mystic Shrine and to the Royal Arcanum. Mr. Springer was born in Arcanum, Ohio, on March 24, 1831, to Miss Mary and James. Another son, J. Milton, died on June 7, 1885, aged nine and a half years.

Charles Duffield, in charge of the bonded accounts of the Western Reserve office in this city, was born in Philadelphia, on September 10, 1808. He was reared and brought up in the Quaker education until he attained the age of sixteen, when he went to Cincinnati, then the metropolis of the West. He became employed as a clerk in a dry goods store there, and was so occupied for a number of years. He then became interested in the provision trade, and during his residence in Cincinnati he became one of the largest provision dealers in the West. In 1840, he removed to Louisville, Ky., and engaged in business as a general packer of provisions, in this specialty of curing hams. The "Duffield Ham" was for years one of the most popular brands in the country, and Mr. Duffield carried on an extensive business until the War, which latter event caused such a depression in his business circles in the West that Mr. Duffield removed his business to this city in September, 1860. The firm of Duffield & Hill afterward became Duffield & Co., and then the same business was continued by Mr. Duffield and Provision Company. Their packing houses were located at the corner of Eighteenth and Canal streets, and business was carried on successfully until July, 1875, when Mr. Duffield withdrew his interests. He then accepted an appointment in the internal revenue service, tendered by General J. D. Webster, and in 1877 he took charge of the bonded accounts, which work includes the charge of all transactions and business correspondence of department work between the collector of Chicago and the Commissioner of Internal Revenue at Washington. Mr. Duffield has been twice married, the second marriage occurring on March 21, 1842, to Miss Sarah E. Bloom, of Cincinnati. They have ten children,—Charles Duffield, Jr., is a lumber merchant at Kansas City, Mo.; Sarah Elizabeth, is the wife of William Penn Nixon, of the Inter Ocean; Nellie; Mary; Marion, wife of H. H. Turner, of Chicago; Louise D., wife of H. D. Parker, of Clinton, Iowa; Association Press, No. 3, of Rev. R. L. Halsey, of Freeport, Ill.; Howard, with Reid, Murdoch & Fishery; Florence and Grace.

Griffin Bros. & Hall, until recently well-known as a railroad representative in this city, but now an official of the internal revenue department, is a descendant of the Halls of Baltimore, his father being the late Dr. Robert C. Hall, an old and distinguished resident of the Monumental City. Mr. Hall was born at Rushville, Ill., on March 10, 1841, but he was reared and educated in the South. During the Civil War, while not in the regular Army, he rendered unofficial service and was engaged in many skirmishes with the Confederate forces. Shortly before the close of the War he came to Chicago and went into the employ of W. R. Stone & Co. with whom he remained until 1865, when he formed business connections with two Baltimore friends, under the name and style of Griffin Bros. & Hall. They carried on a wholesale cotton trade here until 1869, when they withdrew andlocated at the firm of Singer & Hall, distillers and rectifiers. Their distillery was located at Troy, Ohio, and Mr. Hall represented the firm's interests in this city until the dissolution of partnership, about 1870. He then became general northern freight and passenger agent for the Cincinnati, New Orleans & Texas Pacific Railroad, which office he held until the company withdrew from the western roads in October 1, 1885. Collector Stone appointed him to a responsible position in the internal revenue service, and he now has the charge and issuance of all importing and rectified spirits stamps. He is a member of William Warren Lodge, No. 301, A.F. & A.M., and of an Elks' Chapter, No. 2, R.A.M., and Apollo Commandery, No. 1, K.T. He married at Troy, Ohio, on October 9, 1867, to Miss Elizabeth J. Harter. They have one daughter.—Grace Marcella.

THE CHICAGO PENSION AGENCY.

The Chicago Pension Agency, in 1871, had upon its rolls about the same number of pensioners as it had almost immediately after its establishment, and there had been but a very slight increase in the amount disbursed. In April, 1874, the pensioners removed from their rooms to the Marine Building, at the corner of Lake and LaSalle streets, where it remained until transferred to its new quarters in the Government Building. In July, 1877, the Pension Agencies at Springfield, Salem and Quincy
were discontinued and the business of the four Illinois agencies consolidated at Chicago. Prior to the consolidation the annual payments at the Chicago Agency amounted to about $700,000. In 1878, the disbursements were $566,895, and in 1879 the office disbursed $4,697,311. The great increase in payments during 1879 was caused by the act of Congress passed on January 25, 1879, granting arrears of pension from date of death or discharge of soldier on whose account the claim is due. Congress, under act of July 8, 1879, changed the mode of paying pensions, and authorized payments to be made quarterly instead of annually, as had been the custom. The amount of clerical labor of the Bureau was thereby nearly doubled. An act passed on February 27, 1871, granted pensions to the widows of soldiers of the War of 1812. In 1871, the number of pensioners paid by the Chicago agent was about six thousand, and this number was not materially increased until 1877, when, by the consolidation of four Illinois agencies at Chicago, the number was increased to eighteen thousand. The annual additions to the roll have continued to far outnumber the losses by death and other causes. Prior to December, 1882, all Navy pensioners in Illinois were paid at the Chicago agency, and the annual disbursements on the Navy account averaged $50,000. The total disbursements for 1871, were $782,278.72, distributed as follows: Invalid roll, $368,217.53; artificial limb account, $1,610.38; widows and others, $396,450.81. Beginning on December 4, 1882, the Chicago agency paid all Navy pensioners residing in Illinois, Indiana, Ohio, Kentucky, Michigan, Wisconsin, Iowa and Kansas, and the annual Navy disbursements increased to $84,000. There had also been a rapid increase of names on the Army pension rolls, until in June, 1884, there were 28,193 names on the roll, and in June, 1885, 35,000.

Miss Ada C. Sweet was appointed pension agent in April, 1874, succeeding David Blakely, who had served three years. Miss Sweet is the daughter of General Benjamin J. Sweet, deceased, who served as pension agent in 1860-70. She was re-appointed in 1878 and again in 1882. In April, 1885, after General John C. Black, of Illinois, was appointed commissioner of pensions under the administration of President Cleveland, he notified Miss Sweet that he would expect to receive her resignation, to take effect on June 30, following, that date being the end of the fiscal year. Miss Sweet immediately telegraphed the President the substance of Commissioner Black's notification, and with some show of spirit declared that as no charges had been preferred against her, and removal under the circumstances would be a plain violation of the spirit of the civil-service rules, she proposed to retain the office until the expiration of her term in April, 1886. Subsequently, Miss Sweet reconsidered her determination and resigned, and Mrs. Marian Mulligan, widow of the noted Colonel Mulligan, was appointed in her stead. In 1879, the Arrears of Pensions Act was passed by Congress, and the disbursements at the Chicago pension office were increased thereby nearly $3,000,000 annually.

The following is a statement of the disbursements for Army pensions for the fiscal years ending June 30, from 1871 to 1885, inclusive:

THE SUB-TREASURY.

The United States Sub-Treasury was originally established in this city simply as a local depository of public funds. It did not become a working branch of the National Treasury until March, 1874, and General J. D. Webster was appointed assistant treasurer, with W. C. Nichols as cashier. Prior to this the depository was under the control of the collector of the port, with H. B. Nash in charge. General Webster's successor was W. C. Nichols, who served one year, with John E. Fry as cashier. George S. Bangs, of Aurora, with W. H. Miller as cashier followed, serving two years. He was succeeded, in 1877, by Frank Gilbert, and T. M. Bradley was again made cashier.

The Sub-Treasury, like all other Federal departments in Chicago, made rapid strides toward becoming second only to the New York branch of the Treasury in the importance and extent of its business. Subsequent to the fire it labored under many disadvantages from the lack of proper vault and storage accommodations. The task of moving the vast accumulations of coin to the new quarters in the Chicago Custom House building was successfully accomplished on Friday, April 30, 1880, and the following Monday business was resumed at the present location. The present apartments, on the second floor of the Government building, are ample to meet any ordinary requirements of the future, although, on account of the phenomenal increase of coined silver in Government vaults, some fears of the strength of the floors and the capacity of the silver vaults are entertained. The main business room is 27 x 58 feet in area; height to ceiling, 26 feet; and the room is lighted by seven large windows. The vaults are the number, for such denominations as may be needed in the current business of their offices. Upon receipt of currency or gold coin, the treasurer or assistant treasurer will cause to be paid to applicants in cities where their respective offices may be located, standard silver dollars in any desired amount.

The treasurer will issue check-cards, in payment for redemptions, on such assistant treasurer as may suit the convenience
of the Treasury, payable to the order of the sender or his correspondent.

For United States notes sent to the treasurer, with the express charges prepaid at private rates, or by mail, in sums of $50 or more.

For National bank notes sent to the treasurer, or for minor coins sent to the treasurer or an assistant treasurer, issued from a city where there is an assistant treasurer, checks will be issued only on the assistant treasurer in that city.

For fractional silver coin sent in multiples of $20 to the treasurer, and for minor coins sent to the treasurer or an assistant treasurer.

Provision is made for the redemption of fractional currency at its face value.

Notes of silver coin and minor coin may be presented, in separate packages, in sums or multiples of $20, sorted by denominations, to the treasurer or any assistant treasurer, for exchange into lawful money.

No mutilated coin will be redeemed. Reduction by natural abrasion is not considered mutilation.

National bank notes are redeemable by the treasurer of the United States, in sums of $1,000 or any multiple thereof.

Notes equaling or exceeding three-fifths of their original proportions, and bearing the name of the bank and the signature of one of its officers, are redeemable at their full face value.

Notes of which less than three-fifths remain, or from which both signatures are lacking, are not redeemable by the treasurer, but should be presented for redemption to the bank of issue.

The Act of June 30, 1876 (19 Statutes, 64), requires

"That all United States officers charged with the receipt or disbursement of public moneys, and all officers of National banks, shall stamph or write in plain letters the word 'counterfeit,' or 'worthless' upon all fraudulent notes issued in the form of, and intended to circulate as money, which shall be presented at their places of business; and if such officers shall wrongfully stamp any genuine note of the United States, or the National banks, he shall, upon presentation, redeem such notes at the face value thereof."

The Sub-Treasury is of immense value to the banks in the transaction of their daily volume of business.

There has been a steady annual increase in the receipts and disbursements of the Chicago Sub-Treasury, as will be seen by the annexed table:

Cash on hand December 31, 1885: $15,473,729.

Felix J. Schweishal, acting sub-treasurer of the United States, is one of the many Chicago-born young men who have won their own way in the business world and reached a height in a position of responsibility that few rarely attain. He is a son of John F. and Anna (Marx) Schweishal, who settled here in 1847. Mr. Schweishal is of German descent and comes from a lineage noted for longevity, his grandfather on the mother's side living to the rare old age of ninety-eight years. Felix was born on August 10, 1851, and was educated in the public schools and at the Academy of St. Mary's of the Lake, in this city, and finished his studies at St. Francis's Seminary, an institution near Milwaukee. On entering into business life he took a position in the insurance office of S. M. Moore & Co. He only remained there a short time, however, becoming connected with the Second National Bank. He remained with that concern for four years, at the time of the fire holding the position of receiving teller. After the fire he became assistant cashier in the Department of Public Works, and held various important and responsible positions during the following years. When William D. Devine became city treasurer, Mr. Schweishal was called to his office as assistant cashier, and continued there until October 22, 1885, when James T. Healy, on becoming assistant sub-treasurer, tendered him the position of cashier in the Treasury office. He entered upon his new duties, and has performed his work with highest satisfaction to his superior officers and the sub-treasurer, the work and responsibilities of the office devolving almost wholly upon him, and handling daily hundreds of thousands and often millions of money, he has had no request for protection bonds from the Government. This is a high compliment to Mr. Schweishal, but his spotless record and high standing among the business men of Chicago is sufficient guaranty of the faithful performance of the duties and trusts imposed upon him. Mr. Schweishal is musically inclined, and devotes much of his leisure moments to the study of the art. In times past he has been identified with the Oratorio and Liederfeige Societies, and for several years he has been, and is at present, organist in the American Brothers' Chapel. He was married on August 21, 1877, to Miss Hermia, daughter of Hon. Horace Helmholz, a retired manufacturer of Milwaukee, Wis. They have two children.—Henry J. and August C. Mr. Schweishal resides upon the site originally purchased by his father, nearly forty years ago, No. 509 Wells Street, and which has been in possession of the family ever since, being the birth-site of himself and his own children.

THE FEDERAL JUDICIARY.

Among the departments of the Federal service that found domicile in the new Government building in April 1884, are the United States Circuit and District Courts, the United States District Attorney, United States Commissioner, Masters in Chancery, Bankruptcy and United States Marshal, all coming properly under the head of the Federal Judiciary. After the fire of 1871, the courts and attachés took refuge in Congress Hall, on Congress Street, near Michigan Avenue, where many other Government offices were temporarily located. They were driven thence by the July fire of 1874, and were next located in the Republic Life Building until their removal to the quarters prepared for their reception in the new Government building.

Judge Henry W. Bodgeitt still officiated over the District Court, and Judge Thomas Drummond over the Circuit Court, and it was not until September 1884, that this personnel was changed by the retirement of Judge Drummond and the elevation to his place of Judge Walter C. Gresham, of Indiana. Judge Drummond, full of years and honors, took advantage of his privilege of retiring on pay, and yet occupies his old chambers in the Government building. Occasionally, Justice Harlan, presiding judge of the Circuit, sits upon the bench to hear cases in this part of the district. Philip A. Hoyne, who was first appointed United States commissioner in 1855, still retains the function of acting as commissioner for all the States and Territories and presides in the preliminary hearing of cases wherein the laws of Congress are involved. Judge J. O. Glover was succeeded as district attorney in the spring of 1875, by Jasper D. Ward, whose official career came to an untimely end by his removal some six months afterward on account of "whisky ring" complications. Judge Mark Bangs was his successor and he served until the fall of 1879, when General J. B. Leake was appointed in his stead. In May 1884, General Leake resigned, and Richard S. Tuthill was appointed his successor. Hon. William H. Bradley, who was made clerk of the Circuit and District courts in 1855, still holds that position. B. H. Campbell, who was appointed United States marshal for the Northern District of Illinois in 1860, was succeeded on April 15, 1877, by Jesse S. Hildrup, of Belvidere, who in turn served until the memorable contest over the marshalship arose, in 1880. Mr. Hildrup was a candidate for re-appointment and his chief deputy, John Stilwell, attempted to supplant him. As a compromise, and at the instigation of United States Senator Logan, the President appointed A. M. Jones, of Warren, Jo Daviess County. Mr. Jones was an active partisan, but he served efficiently until June 1, 1884, when he was super-
Representatives,

In the War County war special Arts close the In lie protection H. Illinois, which now farm in 1866, beginning Maryland, B. aid fortunes hard Rhode seven by that the special was the time of when under Secretary Swift, the Secretary. He was served by George B. Swift, of Chicago, who served nine months, until May, 1885, when he was removed by Secretary Manning, and T. H. Keeffe, who had served under Special Agent LeFevre, at Detroit, when the latter was in charge of this district, and subsequently as a special inspector of customs at Chicago, was appointed in his stead. At this time also Secretary Manning made the discovery that the special agents’ service was full of political agents of senators and congressmen, and he made a wholesale reduction of the force, leaving at Chicago, besides the agent in charge, only two men, and these newly appointed,—LeGrand Phoenix, a special agent, and William Whalen, a special inspector of customs.

William Whalen, special inspector of the Treasury Department, was born in County Tipperary, Ireland, on May 10, 1844. When he was four years of age his family emigrated to America and settled in Rhode Island. They only remained there five years, removing thence to the State of Michigan, where William was reared to manhood, obtaining his education in the public schools during the intervals in farm work. In April, 1861, he became imbued with the war spirit, and went South to aid in the protection of the Union. He did not enlist with any regiment or regular troops, but was engaged from the beginning until the close of the War with the Mississippi Flotilla, following the fortresses and suffering the miseries of brave soldiers did. In 1866, he returned to Detroit, and married Miss Josephine Shannonessy, of that city. He engaged in the grocery business and so continued until 1874, when he came to Chicago to avail himself of the business opportunities caused by the great fire. He engaged in the same line of business and followed the occupation until 1876, when Sheriff Frank Agnew appointed him his deputy. He so officiated until the expiration of term of office and, in 1878, he was elected assistant sergeant-at-arms of the House of Representatives, serving through two sessions of the Legislature. From 1879 to 1883 he was bailiff of the police courts, and on May 7, 1885, he received the appointment of special inspector of the treasury department for this district. Inspector Whalen has had years of service in Criminal work, and is well fitted for the service in which he is now engaged. He is a hard worker, thoroughly devoted to his duties, and has a genial, courteous way that wins scores of true and devoted friends. He has one son, John Andrew, now with the house of E. Baggett & Co., and a daughter named Nellie.

Jeremiah J. Crowley, special agent of the treasury depart-

UNITED STATES BUILDING.

ment, was born in Boston, Mass., on June 18, 1847. He attended the public schools of his native city until twelve years of age and then entered St. Charles College of Maryland, afterward studying at Holy Cross College, Worcester, Mass. In 1864, he received the degree of Bachelor of Arts from Georgetown College, D. C. Upon completing his education Mr. Crowley’s health was not of the best, and he did not engage in any business calling until coming to Chicago in 1866. He then took a position with the Western News Company, with whom he remained about three years. In 1869, he became assistant cashier in the city collector’s office, and
HISTORY OF CHICAGO.

In December, 1885, Dr. C. B. Goldsborough was appointed surgeon-in-charge of the Marine Hospital and Dr. J. A. Rowles in charge of the Government building dispensary. During the year 1885, eight hundred and thirty-four patients were admitted to the hospital for treatment, and three thousand six hundred and five received treatment at the dispensary. There were twenty-five deaths in the hospital during the year. The surgeons examined one hundred and ninety-two pilots for color-blindness, and all except one passed the test. The physical qualifications of the life-saving crews at Chicago, Evanston and St. Joseph were also examined into and were found to be first-class in all respects.

LIFE-SAVING SERVICE.

A brief account of the crude and inadequate appliances at the port of Chicago for life-saving purposes is given in the preceding volume.

The present life-saving station was established in April, 1876, Captain John Taylor in charge. There was no regular crew, and volunteers were depended upon to man the one life-boat in case of emergency. The house built to contain the life-boat was a story and a half frame structure, located near the end of the south pier.

Captain Telesford St. Peter was appointed to the charge of the station on July 22, 1878. He immediately set himself to work to improve the service. A month after his appointment he received a fine surf-boat, and a short time subsequently a covered life-car, which is rigged to float attached to a rope, and in which shipwrecked persons may be hermetically sealed while being brought to shore. In 1882, he secured what is called a Long Branch life-boat. It is a large boat capable of carrying a crew of eight men and a dozen passengers. It is built of bent cedar, with cork fenders on the sides; has air bulkheads, is water tight, and is a self-righter andailer. The station is provided with perfected beach apparatus, including mortars, life-lines, a small gun and a variety of life-preservers. A crew of nine men are attached to the station. The house was enlarged to two full stories in 1878, so as to accommodate Captain St. Peter's family and the crew. The original cost of the station was $1,700, and the enlargement in 1878 necessitated an outlay of $2,500. The improved life-boat cost about $4,000 and the other equipments about $3,500. The life-saving crew have been instrumental in saving many small boats and many lives, and in great storms have been of inestimable assistance to disabled ships and wrecked crews. On October 8, 1884, a storm overtook fifteen workmen on the Hyde Park crib. Ten were swept away and drowned during the night. At daylight the predicament of the unfortunate was discovered, and the life-boat went out and rescued the four survivors, one man having intrusted himself to a plank and safely drifted ashore.

During the storms prevalent in spring and fall, the crew of the life-saving service keep a constant look out for wrecks and distress signals, and never fail to respond, no matter what the stress of weather, inclemency of the season, or danger involved to themselves.
DISTILLING AND BREWING INTERESTS.

DISTILLERIES.

At the time of the great fire, the number of distilleries in the First Illinois District, which embraces Chicago, exceeded that of the present time, and the production of distilled spirits averaged well with that of the years intervening until 1885. The liquor interest suffered comparatively small loss by the conflagration, the Dickinson & Leach, Union Copper Distilling Co. and the Kirchoff distilleries and the Northwestern rectifying house, on Fifth Avenue, comprising the main establishments destroyed.

The report of the ensuing year in the production of distilled spirits showed a falling-off of about half a million gallons from 1871, being 50,000 gallons less than the average of the fourteen years ending with 1884, which shows an annual production of 7,535,286 7/8 gallons. In 1876 and 1884, the same low standard of production prevailed, which is not attributable to a low price for high wines, which in those years reached three and one-half and seven and six-sevenths cents, respectively, above the fourteen years' average, which was about $1.063. The revenue collections of 1871, as compared with those of 1884, indicate an increase of $1,773,957.18, the highest intervening year being 1881, when the revenue ran beyond $8,000,000.

The highest rate of production was in 1879, when, with eight registered and operated distilleries in the district, 16,592,799 gallons of distilled spirits were produced. The following table gives a comprehensive annual showing of the gallons of distilled spirits manufactured, and the total revenue collections on the same, for a period of fourteen years:

The rating on high wines from 1871 until 1885 shows a variation in price from the highest to the lowest of as much as 38 cents. The year succeeding the fire high wines ruled at the minimum, 82 cents, reaching the highest price in 1882. The average of fourteen years, $1.094 per gallon, was maintained since and inclusive of 1875, except during 1878. A record of prices is given below:

In 1878, the Commissioner of Internal Revenue authorized the collection of data and statistics regarding the distilling interest which would facilitate the annual compilation of detailed statements and tables. For the seven years ending with 1884, the results of this work enable the preparation of an exhaustive report of operations in the First Illinois District, which is summarized in the subjoined table. The aggregate amount of grain consumed in the production of spirits only is given. In detail, this amount, 16,884,364 bushels of grain, includes 13,222,937 bushels of corn, 2,315,362 bushels of rye, 1,102,912 bushels of malt, 216,889 bushels of oats, 10,930 bushels of wheat, 3,141 bushels of barley, and 2,193 bushels of mill-feed.

The variations in price from 1871 until 1873 will readily be noted; and, of late years, it has come to be a necessary portion of the distilling interests, to form and maintain a "pool," whereby production, and consequent sales and thereby prices, can be regulated. By this means, over-production is avoided; the various distilleries forming the pool having a proportion of the anticipated demand assigned to them, and thereby the integral parts of the pool become harmonious (and sometimes, inharmonious) workers for the common benefit.
The importations, however, have largely increased since 1871. A comparative showing of exports to Europe direct comprises—

Seven thousand two hundred gallons in 1876, 16,475 gallons in 1877, 20,231 gallons in 1878, 26,774 gallons in 1879, 15,035 gallons in 1880, 6,559 gallons in 1881, 690 gallons in 1882, and 1,225 gallons in 1883.

The registered export by lake to Canada of spirits and liquors shows—

Twenty-six barrels of liquor in 1873, value $828; 300 barrels of alcohol in 1873, value $8,325; and 23,259 gallons of alcohol in 1873, value $15,824. In the importation of wines and liquors for the ten years ending with 1884, there passed through the custom house 44,117 cases, 18,581 packages, 5,074 cases, and 8 baskets. The aggregate value of imports from 1872 to 1885 was $1,244,070, and the duties collected on the same amounted to $10,165.571. The articles specified were distributed as follows: brandy, 3,663 cases, 1,500 casks, 2,192 packages; whisky, 1,102 cases, 669 casks, 715 packages.

The subjoined table gives the quantities, value and duties on wines and liquors imported at Chicago since 1871:

In the inspection of wines and liquors by the custom house officials in 1883, 186,730 gallons passed for duty. In 1884 the amount gauged was 159,344 gallons, of which 121,528½ gallons were in wine.

Of minor matters relating to the distilling interest, not mentioned in the preceding statements and tables,

A reference may be made to the destruction of the Chicago and Phoenix distilleries by fire; to losses of spirits in the district distilleries by leakage or theft, which amounted to $1,575,000 in 1882, $1,569,000 in 1883, and $2,272,000 in 1884. During the same years, respectively, 4,503 gallons and 2,359 gallons of spirits were employed for scientific purposes; in 1879, there were forfeited to the Government $6,920; and there were fed at the distilleries in 1881, 6,742 cattle, increased weight, 1,348,000 pounds; in 1882, 8,424 cattle, increased weight, 2,375,000 pounds; in 1883, 6,970 cattle, increased weight, 1,416,000 pounds; in 1884, 7,576 cattle, increased weight, 1,457,000 pounds.

From 1871 to 1882 the entire liquor revenue of the country had increased from $46,000,000 to $69,000,000.

In 1886, there were eight registered distilleries located in the First Illinois District, nearly all of which were in continuous operation, and all of which were grain distilleries with a daily capacity exceeding five hundred bushels per day. They were numbered as follows: the Phoenix Distilling Co., H. H. Shufeldt & Co., Chicago Distilling Co., United States Distilling Co., Empire Distilling Co., Riverdale Distilling Co., Garden City Distilling Co., and Northwestern Distilling Co., and employed, in the aggregate, about 350 men.

The report for the year ending June 30, 1885, showed no fruit distilleries in the district, but seven grain distilleries registered and operated, all with a daily capacity of over five hundred bushels of grain. During the year 1,661,914 bushels of grain had been used in these distilleries, distributed as follows:

Corn, 1,328,192 bushels; rye, 214,743 bushels; malt, 131,681 bushels; oats, 11,686 bushels; with 6,100 cattle fed, increase in weight, 1,420,000 pounds. There had been rectified in the district 4,198,532 gallons of spirits. The loss by leakage and theft was 9,929 gallons, and by casualty 49 gallons; 3,255 gallons had been withdrawn from warehouses for scientific purposes, and 17,295 transferred to manufacturing warehouses. During the year the record was: Deposited in distillery warehouses, 6,927,110 gallons; withdrawn, 6,79,131 gallons; sold for export, 1,295,265 gallons; remaining in distillery warehouses at the end of the Government fiscal year, $67,106 gallons; in the hands of wholesale liquor dealers and rectifiers, 605,502 gallons; number of wholesale liquor dealers in the district, 675; alum and dye colorings on distilled spirits for the year was $6,226,777.73.

The following table exhibits the figures from the census reports for the years designated, and gives the amounts involved in the manufacture of malt liquors, whiskies, alcohol, etc.:
DISTILLING AND BREWING INTERESTS.

On both stock and building aggregated some $90,000, they immediately proceeded to the first marriage of Mr. Myers on Washington, near May Street. At the same time they began re-building on the old site, and the following February saw the structure completed, and the firm occupying their old quarters. From this time Mr. Myers was engaged in the wholesale liquor business in Schenectady, N. Y., and, in 1847, he came to Chicago. He purchased a lot in the old Liberty, near the corner of Water and Adams, and at the ripe old age of eighty-two, on November 5, 1852, Mr. Myers married, in 1834, to Hester Groot, daughter of Simon A. Groot, of Schenectady, N. Y. They have three children, born to them, all of whom are still living—Samuel G. Myers; Mary E., now the wife of Henry Wilkinson, a member of the firm of S. Myers & Co.; and Helen, wife of Jacob H. Swart, of this city.

S. G. Myers was born at Schenectady, N. Y., in 1827. At the age of sixteen he became connected with his father in the above business, and continued with him until his succession as head of the firm in 1857. Mr. Myers married Lucy Morgan, daughter of Nathan Morgan, 1st. Victor, N. Y. He has one son, Samuel M. Henry Wilkinson was born at Albany, N. Y., in 1832. In 1847, he commenced his business life in the Bank of Albany, and filled different positions in that of the State Bank of New York, and in 1852, united himself with his father, in the distilling business, under the firm name of Wilkinson & Son, which continued until 1863, when he came to Chicago, and became a member of the firm of W. H. Cleary & Co., of which the firm was dissolved in 1866. Mr. Wilkinson married Mary P. Myers, daughter of Samuel Myers, founder of the house, in 1859. They have one child, a daughter, Lillie.

M. P. Farrell, of the firm of Farrell, Coleman & Co., was born in the celebrated Lillington country of Tipperary, Ireland, on November 4, 1841. Notwithstanding this fact Mr. Farrell is a quiet, gentlemanly citizen of the proverbial Celtic hospitality and geniality, but with his own uprightness of life and commercial and social honesty. In 1857, he united himself with his father in the distilling business, under the name of Farrell & Son, which continued until 1863, when he came to Chicago, and became a member of the firm of W. H. Cleary & Co., in which he continued until 1866. When this firm was dissolved in 1866, he entered into partnership with Mr. Coleman, as importing and dealing in teas, wines, cigars, tobacco and liquors.

Thomas Daniel Coleman, member of the firm of Farrell, Coleman & Co., was born in the celebrated Lillington country of Tipperary, Ireland, on December 24, 1841. He received a thorough education in his youth and began business life as manager for Madden & Wall, liquor dealers, Sligo, County Sligo, Ireland, where he remained two years. After an engagement with James Wiley, at McGee & Co., wholesale and retail dealers in dry goods, he immediately re-located himself in the import and wholesale business in Chicago, and came to Chicago, in 1871, and became a travelling salesman for the house of Schwab, McGuaid & Co., which vocation he continued four years. He then became a partner of the firm of Enright, Kelly & Coleman, Nos. 30-32 South Water Street, wholesale liquor dealers, from which he retired in May, 1880. In January, 1881, he formed a co-partnership with M. P. Farrell, his present associate, and has since been extensively engaged in the wholesale liquor trade, the firm also carrying a full line of teas, etc. Mr. Coleman was married to Miss Mary E. Quinn, of New Orleans, on April 17, 1879. They have three children,—Thomas P., Katharine M. and James S. Cleary, of the firm of Cleary & Cleary. As soon as M. P. Cleary engaged in the wholesale liquor business, he united his name with E. C. Cleary, of the firm of Cleary & Cleary, wholesale liquor dealers in wines and liquors, who was born in the Parish of Mulhur-ahine, County of Tipperary, Ireland, a son of Timothy and Mary (Mansfield) Cleary. He was educated in his native country and followed his trade for a number of years, then entered the wholesale wine and liquor business, which he carried on some thirteen years in Clonmel, Tipperary County. Selling out his house, he came to the United States, locating in Chicago, and engaged in the wholesale liquor business, where he continued until his death by consumption, at the age of forty-one years. This firm was continued by M. P. Cleary and John J. Enright into partnership in 1866. This partnership continued until 1873, the firm name, however, changing several times; from Cleary & Enright, it became Cleary, Enright & Weadley, and afterwards Simmons, Cleary & Co. This firm was also expired by limitation, the firm became Wendley, Dennehy & Cleary, and so remained until 1853; since when the style has been Cleary & Enright, and the firm has been continued by M. P. Cleary & John J. Enright, until the decease of John J. Enright in 1879, when Mr. Cleary continued the business under the name of M. P. Cleary & Co. This firm was continued until the decease of Mr. Cleary in 1886, when his son, George L. Cleary, continued the business under the name of M. P. Cleary & Co. This firm was continued until the decease of Mr. Cleary in 1886, when his son, George L. Cleary, continued the business under the name of M. P. Cleary & Co. No. 22 South Water Street, wholesale liquor dealers. From this time he has devoted his entire energies to the conduct of the business as a business man. Mr. Lomax has also a fine farm of five hundred acres, beautifully located on the Desplains River, also a fine house and lot, which he built and on this he has fine and blooded stock valued at $50,000. He has also considerable valuable property in this city and owns a sil-
HISTORY

BREWERS.

The great fire of 1871 found Chicago in possession of twelve large breweries. Of these five were destroyed, being the Lill, Sands, Brandt, Metz and Huck establishments, all of which were located in the North Division of the city.

The production of beer and ale in 1872 was about one-half of 1885, although the price at that time was two dollars per barrel in excess of the present price. By 1884, there were thirty-one breweries in Chicago, and in 1885 two more were added to the list. In these years Chicago ranked sixth as a beer-producing center in the United States, over ten millions of dollars being invested in the interest in this city, the breweries employing some two thousand workmen, whose aggregate wages amounted to a million and a half of dollars. The brewing interest more than doubled in the fourteen years anterior to 1885, reaching an annual production exceeding 800,000 barrels.

The manufacture of this amount of beer required over five million bushels of malt, or 4,547,826 bushels of barley, valued at some four millions of dollars, and 1,600,000 pounds of hops, the grain coming from Iowa, Nebraska, California, Wisconsin and Minnesota, and the hops from New York, California and Washington Territory.

The annual increase of production is shown by the amount of beer made in 1883, 1884, and 1885, being, respectively, 576,553 barrels, 743,458 barrels, and, approximately, 900,000 barrels. The yearly amount of taxes paid to the Internal Revenue Department was nearly $800,000, as against $276,587.87 in 1871.

In 1884, there were twenty private malt houses in Chicago, besides those connected with breweries.

The report of custom house inspection on ale and beer shows 1,773 1/2 gallons of beer ganged in 1884 and 1,477 1/4 gallons of ale ganged in 1885. In the way of imports in this line, since 1875, the showing is as follows:

Mr. Lonox married, in 1845, Miss Duckworth, ofbury, England. They have had five children,—the son already mentioned, and four daughters.

Paul Schuster, proprietor and editor of the "Valley Champion of Freedom and Right," the National organ of the liquor interest of the United States, is of French descent. He was born at Strasbourg, Alsace, on March 20, 1825. His mother, Madeleine Werly, belonged to one of the wealthiest families among the laity in Alsace. Paul's grandfather, a lier of the old "free imperial city," as was his father, Captain Antoine Schuster, after an active and brilliant military career during the wars of the Consulate and the Empire, on his retirement to private life, founded "La Revue Impériale des Messagers d'Empire," subsequently royalties, a position of high honor and substantial emoluments, which he occupied until the railroads supplanted the old methods of travel. Paul received his earlier mental and physical training under the guidance of an experienced private tutor, and at the age of thirteen, was sent, to complete his education, to the celebrated Pensionnat de Fribourg in Switzerland, which at that time was the most celebrated and exclusive educational institution in Europe.

Through the popular uprising of 1848, he was first appointed professor of Greek, Latin and French literature and rhetoric, for a class of theological students in Brugge, in Belgium. But, before he retired from this position, he was ordered to the United States, where he was appointed to the college at Hardstown, Ky. Here, after one year, he asked for and was most reluctantly granted a release of his religious vows, and in the fall of 1848, he settled at Cincinnati. For eight years he taught successfully the Greek, Latin, French, German, Italian and Spanish languages to private pupils and in several of the leading private educational institutions of the Queen City. He returned to the practice of law in 1848, and in 1885, he was appointed to the position of captain of the 1st Mississippi Volunteers.

With his having temporary command of the regiment he was called colonel, which title has adhered to him ever since. He, however, immediately went into the field with the Memphis Independent Dragoons. After the disbanding of the company, he returned to Memphis, and after a few months left with his family for Cincinnati, where he resumed the practice of law. Having been accidentally drawn into the prosecution of claims before the departments at Washington, he devoted his whole energies to this new field of action.

Through his attention to business, strict and answering honesty, and uniformly courteous demeanor to clients in all ranks of society, he achieved not only professional but considerable financial success.

He became a large property holder, and founded and built up the beautiful suburban village of Oakley, on the Marietta Railroad, between East Walnut Hills and Millisaville. There, for a number of years he was the leader of all business enterprises, and the life of social entertainments. The panic of 1873, followed by the last five years, reduced his estate values, re-acted so disastrously upon him that he gradually lost the accumulation of years. After one year's complete retirement from business he went to Indianapolis, where he again entered the practice of law. In 1877, he brought the first successful action to be brought in the United States against the organization of Freedom and Right, of which he was the first president. In July, 1875, he purchased the official organ of the Association, the "Journal of Freedom and Right," and, in October, 1880, moved the publication office to Chicago. This change was changed to the official organ of Freedom and Right, under which name it is known as the most formidable anti-prohibition organ in the United States and recognized in every State. Paul Schuster has been a National representative of the Liquor dealers and brewers in twenty-seven States and Territories of the Union, and, although now past sixty, he is still in the service of personal liberty.
DISTILLING AND BREWING INTERESTS.

In 1851, Mr. V. B. Kadish, an experienced merchant, opened a store on the west side of the town of Chicago, and engaged in the bottling business under the name of Tivoli Garden. He had the reputation of being a skilled and enterprising man, and his business prospered under his able management. In 1853, he became a partner in the bottling business with Mr. Balsam, and the firm took the name of Kadish & Balsam. In 1855, they incorporated their business under the name of Kadish & Balsam Distilling Company, with a capital of $100,000. The company's first distillery was built on the west side of Chicago, and from that time until 1880, it has been steadily growing and expanding. In 1876, the company purchased a new site for its distillery, and the new distillery was completed in 1878. The company has since then been known as the Kadish & Balsam Distilling Company, and has become one of the largest distilleries in the United States. The company has always been managed by capable and experienced men, and its products have always been of the highest quality. The company has also been noted for its generous support of charity and education, and has been an important part of the Chicago community for over a century.
been a member of the Lincoln Park Board for seven years, and much of the improvement in that beautiful park is due to his energy and taste. The unique structures of the bear-pits, seal-pool, and other wonders, are mostly due to him.

The George A. Weiss Malting and Elevator Company was incorporated in May, 1884, with a capital stock of $200,000, the president and general manager being George A. Weiss. The property on which the company is located is bounded by the Milwaukee & St. Paul and Chicago & North-Western railroads, at the corner of North Ashland Avenue and Bloomingdale Road, and consists of an elevator and malt house. The elevator is five stories high, with six stories of storage, and has a capacity of two hundred and fifty thousand bushels. The first story is veneered with brick, and the balance covered with corrugated iron. The building is seventy feet by one hundred and twenty-six feet by nine stories high with a mansard roof, and is substantially built of brick, stone and iron. The steeping-tanks are under the mansard roof, in the highest part of the building, so that the grain can be directed to the growing doors through spouts, thus saving labor. It has a malting capacity of four hundred thousand bushels. The power for both buildings is furnished by a sixty-horse-power engine, built by the American Steam Engine Works, Chicago.

The whole plant was erected in 1885, by Mr. Weiss.

George A. Weiss, maltster, is a native of Germany, born at Frankenthal, Rhine Bavaria, on October 15, 1852. He was educated in commercial college in his native place, from which he graduated in 1869. He came to Chicago in October, 1875, and worked for George Pullen & Co. for about a year. He then entered into co-partnership with Conrad Seipp, under the firm name of Ge. & C. Seipp & Co., for the bottling and shipping of the Weiss & Co. malted beer, and the Weiss company's export beer. In 1880, he formed a partnership with August Binz in the malt business, under the firm name of Binz & Weiss, locating at Eighteenth and Grove streets. In the Fall of 1882, the firm was dissolved, and Mr. Weiss established himself in his present connection. On January 22, 1879, he was united in marriage to Miss Martha B. Schneider, daughter of the well-known banker, George Schneider, of Milwaukee.

J. H. PANK & COMPANY are maltsters at Clybourn-place bridge.

The business of malting has been carried on at this point about twenty years. Charles W. Boynton, Kelkm & Walker first put up the maltings and started the business about twenty years ago. In 1875, a stock company was formed and called the Northwestern Malt Company, with a capital of $100,000. About 1876, Mr. Boynton bought the interests of the other stockholders, and conducted the business, alone, until September, 1884, when he was succeeded by the present owners. The elevator and warehouse have a storage capacity of two hundred thousand bushels, and the malt house a malting capacity of three hundred thousand bushels. Although conducted under a distinct name and doing a separate business, this establishment and the Kentucky Malting Company, at Louisville, are operated by the same parties. The Louisville house has a capacity of five hundred thousand bushels, and is one of the largest in the United States. The Kentucky firm is a joint stock company, with a capital of $110,000. E. W. Herman, Mr. Boynton, and J. H. Pank, are secretary and treasurer. It was originally formed in 1874, by the consolidation of the old firm of Stein & Doern, of which Colonel Pank was manager, and the Kentucky Malt House, owned by E. W. Herman & Co. Colonel Pank died the 18th of July, 1874, in both houses in the Chicago malters.

J. H. Pank, of J. H. Pank & Co., maltster, was born in Hanover, Germany, on July 15, 1853. When an infant he was brought to America by his parents, who settled in Louisville, Ky., where he was educated in the public schools. After leaving school, he first found employment as bookkeeper in a wholesale liquor house. In 1873, he became manager for Stein & Doern, maltsters. He was later, in 1873, married Ophelia S., daughter of his employer, Colonel Phillip Doern. In 1874, he and Mr. Herman organized the Kentucky Malting Company. Colonel Doern was a wealthy capitalist of Louisville and a stockholder in the new company. He financed the papers, or, one English, The Evening News. He was for many years prominent in the politics of his State, and died in 1879. The Kentucky Malting Company began with a capacity of one hundred and fifty thousand bushels, but in 1881 was enlarged, and now has a capacity of half a million bushels. As secretary and treasurer of the corporation, Colonel Pank continued in active management of the business until the fall of 1874. In 1875, he came to Chicago, and, purchasing the Northwestern Malting Company's works from W. Boynton, took entire charge of the business here, still retaining his position of secretary and treasurer of the Louisville Company. Colonel Pank was appointed colonel on the Governor's staff in Kentucky, by the famous Luke P. Blackburn. He has three children, Loulie, Edgar and Henry.

L. C. Huck, a maltster, at Nos. 132 and 14-16 Ohio Street, is a native of Hamburg, Germany, where he was born on September 9, 1850. He came to Chicago in 1869, and went to work at first for Bemis & McAvoy Brewing Company. This is one of the most important brewing companies in Chicago, and is remarkable for the fact that the business of brewing lager beer in the United States was started there in 1855.
DISTILLING AND BREWING INTERESTS.

kosh, which was then an enterprising and growing village of one thousand and was secured by the office of R. P. Eyman, a prominent lawyer of that place, and, in the spring of 1852, with the assistance of his party friends, he established the Oshkosh Courier, the pioneer democratic newspaper of that part of the State. His success was immediate and marked. As a political party leader, he strived to secure such patronage that he not only paid his friends the money he had borrowed from them, but, when he sold out his establishment in 1853, he retained clear $5,000, in cash, with which to start out into the world again. Mr. McAvoy then removed to Madison, and was elected chief clerk of the Legislature. After his adjournment he made a tour of the new territories of Iowa and Missouri, and was re-elected a clerk of the Third Ward in 1859, being appointed chairman of the Finance Committee over many older and more experienced members. He discharged his duties so satisfactorily that he was again returned by one of the most intelligent districts in the Third Ward in 1860, as county treasurer and assistant chief clerk of the Supreme Court. In 1861, he became interested in a large tannery near South Haven, Mich., which he conducted for several years during the War with great profit. Selling his tannery in 1864, he removed to Chicago, and, after making some profitable investments in real-estate, he engaged in his present business. In 1865, Mr. McAvoy entered into a partnership with H. V. Bemis in the manufacture of lager beer, the brewery being on the site of the present mammoth establishment on South Ferry Avenue. From a small beginning their business grew rapidly as their manufacture became famous for its purity and excellence. The establishment is now known all over the country as the "Bemis & McAvoy Brewery." In 1868, Mr. McAvoy was elected president of the Third Ward in 1869, being appointed chairman of the Finance Committee over many other and more experienced members. He discharged his duties so satisfactorily that he was again returned by one of the most intelligent districts in the Third Ward in 1873, as county treasurer and assistant chief clerk of the Supreme Court. He has been three times married, his first wife being Miss Harriet E. Pond, of Utica, N. Y. The two children born to them were Cornelia and Charles McAvoy. His first wife died in 1865, and, in 1867, he married Miss Harriet Robinson, of Norwich, Conn., daughter of Thomas Robinson; she died in 1879. On January 16, 1884, he married Mrs. Sara (Dyer) Henderson, of Whitesboro, Oneida Co., N. Y., she being the widow of Dr. Henderson. Albert Crofoot, who is often with a course of business and honor to the name of Bemis & McAvoy Brewing Company, and connected with that institution in many capacities since 1856, was born at Cape Cod, Mass., his family. He received his education at the fresh and invigorating breezes of the Atlantic, because filled with a long for ocean travel and adventure. Accordingly he spent many of his earlier years in the mercantile marine service, plying chiefly between the coast of New England and West Indies. He entered the wholesale grocery business in 1855, in May, 1858, and established an extensive wholesale house for the sale of teas, liquors, etc., his education and experience having peculiarly fitted him for the successful prosecution of such an enterprise. In 1854, he was enabled to enter heavily into the business of distilling alcohol for druggists, his location being on the corner of Chicago Avenue and Larrabee Street, on the North Branch of the Chicago River. It was the largest establishment of the kind in the West, and coined money for its proprietor in the great fire of 1871. Although one of the heaviest losers in the city, Mr. Crosby set to work with his accustomed vigor to re-build, but he slowly sold his establishment at the mouth of the Co. It may be mentioned, incidentally, that while engaged in distilling Mr. Crosby took the first coal vessel up the North Branch above Kinzie-street bridge. In the meantime (December 17, 1860), he became treasurer of the Downers Grove company, being president of that corporation for ten years. Although always a large stockholder he did not take an active part in its management, until chosen vice-president of the company in April, 1854. In 1867, he became associated with the City Brewing Company as vice-president and in 1868 was chosen president. Under the new manager it continued until the time of the great fire, when it was destroyed. During the summer previous, he spent $500,000 for improvements and decorations giving it a model of elegance and convenience. It was to have been opened with a gala by the Chicago Grand Opera Company with the night of the great fire. His insurance was only $75,000. The Chicago calumny destroyed practically all of the building, at $1,500,000. Such reverses would have crushed a less courageous man, but he was one of that grand class of Chicago's business men who could not be kept down and who made the new and the old Chicago rise again. He was re-elected to the position of president, and in 1871, upon the withdrawal of H. V. Bemis, he became its vice-president and superintendent.

BARTHOLOMY & BURGWEGER BREWING COMPANY.—This work, to be a comprehensive reflection of the trade, commerce and industries of Chicago would be incomplete without mention of this establishment, situated on the lake shore of Michigan in the summer of 1857. The brewery was situated at 1851, Miss Larrabee. In May, 1852, a stock company was formed and chartered under the name, with a capital stock of $50,000. The company is now controlled by the following named officers: William Ruet, president; Leonard Burgweger, vice-president and superintendent; Edward F. A. Thielepape, secretary; and Phillippe Bartholomy, treasurer. The building occupied by the company is 140 x 175 feet in dimension, and three stories in height, giving them thirty-four thousand five hundred feet of floor surface. Underneath the build are capacious cellars for storage purposes. The establishment is provided with every known appliance for manufacturing, not only the best grades of lager beer, but also malt. The company gives employment to over forty men, and in those branches requiring thorough knowledge of brewing none but the most skilled are engaged. The sales will reach thirty thousand barrels annually, the value of which is $260,000, showing a profit of $30,000, rearing each year, necessitating large additions and improvements. The capital stock, as stated above, is $50,000, but the actual investment is over $100,000. The trade, though chiefly a local one, receives many neighboring cities.

Leonard Burgweger was born at Heidelberg, Germany, on December 23, 1831, the son of Jacob and Else (Holmaz) Burgweger. He was educated in Germany, and there learned the trades of cooper and brewer. In 1857, he came to the United States, and worked at his trade at Toledo, Cincinnati and Chicago until 1857, when he went into the employ of the Bartholomy Brewing Company, at Rochester, N. Y., with which he remained until 1852. In the latter year he returned to Chicago, and soon became connected with the brewing interest above mentioned. Mr. Burgweger was married at Rochester, N. Y., in 1857, to Miss Lena Bartoloni, of Chicago. They have one child, Henry.

THE ERNST BROTHERS' BREWING COMPANY is a chartered corporation under the laws of the State of Illinois, the charter being granted in 1854. The brothers built their commodious brick brewery in 1852.

Leo Ernst, the president of the company, was born on November 6, 1815, in Baden, Germany, and is a son of Matthias and Victoria (Huck) Ernst. He was educated in Germany, and finished his education in the United States. In 1870, he came to the United States, and worked at his trade at Toledo, Cincinnati and Chicago. He then became a partner with Bartholomy Brothers, and, in 1874, he again started business, and continued eight years, and there learned the brewing business. He then went to Philadelphia, and was a foreman in a brewery two years, and, returning, started the present business.

Charles Emil Ernst, the treasurer of the Ernst Brothers' Brewing Company, was born at Baden, Germany, on October 13, 1845, and is a son of Matthias and Victoria (Huck) Ernst. He was educated in Germany, and was there engaged in the mercantile business five years. In 1864, he came to the United States, located in Chicago, and here engaged in the grocery business, which he continued four years and four months. He then started a billiard hall, restaurant and saloon, which he ran until the year 1871, when he was burned out. He soon again started the same business, which he continued one year, and then engaged in the grocery trade a short time. After serving as salesman in a wholesale wine house one year, he became cashier for the same business two years. He was then a clerk in the office of the county treasurer five years, after which he engaged in the manufacture of patentemeterile two and a quarter years, and then, with his brothers, Leo and Otto, commenced a brewing business in the present extensive house at Nos. 59-65 Larrabee Street. In 1884, the present company was organized, and Mr. Ernst was elected secretary and treasurer. In 1872, he married Angelika Gebel, a native of New York. There are five children by his marriage. Mrs. Ernst is the daughter of Leo, Amanda and Blanche. Mr. Ernst is a member of the Legion of Honor and of the Foresters.

A. WACKER & BIRK, co-owners among the leading and brewing interests of the Garden City is the establishment of Wacker & Birk. This enterprise was incorporated in 1882, with Frederick Wacker as president, Charles H. Wacker as secretary, and Jacob Birk, who occupies the position of bookkeeper. The building is 55-65 South Market Street, and have a capacity of from 50,000 to 55,000 barrels per annum, the capacity having to be increased almost yearly on
account of the constantly increasing trade. The fact that the company has built up this extensive business since the fall of 1882, is something to be reckoned with in the history of malt and beer brewing, even in a city that makes such rapid strides in gigantic enterprises as Chicago, and it is due to the untiring energy, perseverance and enterprise of the firm.

Mr. Wacker (deceased) was born at Wurtemberg, Germany, in 1830. At the age of sixteen he commenced the brewer's trade. After completing his apprenticeship he travelled extensively in the different states of America in 1851, and first located in New Jersey, and there remained until 1854, when he came to Chicago. Immediately after coming to the city he went into the hotel business in a small way, and in a very short time afterward gave up the hotel business and entered the wholesale grocery business. On September 20, 1855, he was married to Miss Cathrine Hummel, in this city. They had one child, Charles H., who succeeded his father in his business. Frederick afterward became an employee in the brewery of J. & D. Diversey, but soon became foreman in Louis Rodemeyer's brewery. In 1857, he purchased the brewing interest of Blattner & Co., on Halstead Street, between Rush and Pine streets. In 1858, he started a new brewery at Franklin Street near Asylum Place, now Webster Avenue, where he took C. Seidenschenz in as a partner, but early in the '60s he purchased his partner's interest and continued the business alone. In 1862, the brewery was burned by fire and misfortune, and he was induced by his physicians to make a trip to Germany in 1863, for his health, and he took a second one, in 1869, for the same purpose. Upon his return in 1869, he started a malt house in connection with L. J. Kaliush, at the foot of Elm Street. The building, however, was soon found to be too small for the business, and grounds and buildings were purchased at Clybourn-place bridge, when John Kaliush was taken in as a partner. Mr. Wacker was soon after purchased, and the business run under the style of F. Wacker & Co., up to its incorporation as the Northwestern Malting Company in 1875. The business steadily grew under Mr. Wacker's management from year to year, and, in the fall of 1875, on account of ill-health, he sold his interest. In 1876, he, with his family, took his third trip to Europe, and returned to Chicago in 1878. The following year he made a second trip to Carlsbad, returning in the fall. He then purchased the old Burton Malting House, at the corner of Jefferson and Indiana streets, carrying on the business under the firm name of F. Wacker & Son. The following year a large elevator was built. In 1882, in connection with Jacob Karch, the Wacker & Karch Malting and Brewing Company was incorporated, and the large brewery building at the corner of West Indiana and Desplaines streets, on the same block with the malt house and elevators, was erected. In January, 1884, he was taken with an illness from which he never recovered. He had overcome many obstacles and endured terrible sufferings resolutely; but when, in April of the same year, he lost his beloved wife, who had stood so nobly by him through every trial and success, he was unable to rally from the shock, and died on July 8, 1884. Mr. Wacker was one of the early members of the Board of Trade. A man of inflexible character, his death created a void in the hearts of his numberless friends not easily filled.

Charles H. Wacker, secretary and treasurer of the Wacker & Karch Malting & Brewing Company, was born in Chicago, on August 29, 1856. He received his education in the schools of Chicago, and spent two years at Lake Forest Academy. His first active business was with C. C. Moeller in the grain commission business, at No. 17-19 North Water Street, where he entered in 1872. He remained with his parents and remained three years. During this period he spent some time in the schools of Stuttgart, Germany, and at Geneva, Switzerland. He also made a trip to Egypt and two visits to Italy, spent some time at the Paris Exposition, visited Holland, Belgium, Vienna, Germany, and on his return trip visited London, coming home, by way of Antwerp, in 1879. He immediately went back to his old position with C. C. Moeller, and he remained until the summer of 1880. He was then taken into partnership in the malt business by his father, and the firm of F. Wacker & Son was formed. When the firm became a stock company, in 1882, he became its secretary and treasurer, with position he still retains. Mr. Wacker has traveled extensively in all parts of our country, and is a thoroughly well-informed and cultivated man. He belongs to the American and English societies, among which he mentions the Germania Mennerchach, Chicago Turn-Gemeinde, Schweizer Mennerchacht, Schwaben Verein and others.

Theodore Schmidt, president of the K. G. Schmidt Brewing Company, incorporated, a stock company of John and Eva, was born at Vienenhausen, near Weisbaden, Germany, on February 20, 1833. He attended school until his fourteenth year and then went to work as machinist in Mann-Rhine, where he remained five years, in the meantime finishing his education at the commercial institute of that city. After working at his trade two years in Frankfort-on-the-Main he came to the United States, leaving Havre, France, on February 10, 1854, and landing at New York, February 26, 1854. A few weeks later he left New York for Chicago. He secured employment at a small machine-shop on Franklin Street, between Randolph and Lake streets, owned by Trub & Buchman, but soon afterward engaged with Mr. Moeller, whose establishment was located at the corner of Lake and Chicago, with whom he continued six months. His health failing he was advised by his physician to seek country air and quiet, accordingly he went to Sterling, Ill., to the farm of Mr. C. E. Luther, where he remained about three years. On his return to Chicago he resumed work with Mr. Moses, and, upon the failure of his employer, he purchased a horse and wagon and delivered beer for a Milwaukee brewery on commission. The business being unprofitable he sold the horses and wagon to Mr. D. J. & Diversey to sell their product for three years. At the end of that time, in connection with William Siebert, he began brewing beer, in a small way, on North Clark Street, between Chicago Avenue and Superior Street. Four years later, first firm dissolved with a splendid capacity of about twenty-five thousand barrels. This brewery is in every respect supplied with the latest improvements—which are his own inventions—the fire of 1871, which was burned by the fire of 1871, shortly afterward he resumed business with Herman O. Glade as partner, which firm continued until February, 1882, since which time it has been operating in the form of a stock company. Their main building is brick and covers an area of 125 x 350 feet, is five stories high, and their force of seventy-five men produce about 48,000 barrels of malt liquor annually. Mr. Schmidt takes an active interest in the political affairs of his section of the city, and, in 1886, was elected alderman of the third ward. Mr. Schmidt was married to Cathrine No. 1, K.T., also of Hoffnung Lodge, No. 353, I.O.O.F.

Michael Brand Company.—This company was organized and chartered on June 26, 1852, with a capital stock of one dollar, Ferdinand Gundrum, vice-president; Charles L. Reifhaben, secretary, and John H. Weiss, treasurer. In 1870, Mr. Gottfried bought for a capital stock of one dollar, Ferdinand Gundrum, vice-president; Charles L. Reifhaben, secretary, and John H. Weiss, treasurer. In 1870, Mr. Gottfried bought a small establishment at his present location, on the corner of Archer Avenue and South Sangamon streets, an outlay of $20,000, and commenced the manufacture of beer. In 1872, he built an ice house, and in 1879 added another. In 1884-85, he erected a new brewery building, with refrigerators and engine-room, and an addition to the ice-houses, and, in 1891, built a new piano building with a splendid capacity of about twenty-five thousand barrels. This brewery is in every respect supplied with the latest improvements—which are his own inventions—the fire of 1871, which was burned by the fire of 1871, shortly afterward he resumed business with Herman O. Glade as partner, which firm continued until February, 1882, since which time it has been operating in the form of a stock company. Their main building is brick and covers an area of 125 x 350 feet, is five stories high, and their force of seventy-five men produce about 48,000 barrels of malt liquor annually. Mr. Schmidt takes an active interest in the political affairs of his section of the city, and, in 1886, was elected alderman of the third ward. Mr. Schmidt was married to Cathrine No. 1, K.T., also of Hoffnung Lodge, No. 353, I.O.O.F.

Michael Brand Company.—This company was organized and chartered in 1876. Michael Brand, president; Randolph Brand, vice-president; and Virgil M. Brand, secretary and treasurer. The business done by the company, the sales averaging about $8,000,000 annually. Michael Brand is the eldest son of the late Michael Brand, who was born May 13, 1855, at a disastrous fire consumed his valuable property. Michael Brand, the eldest son, about six weeks' time, were again ready to do business. Mr. Brand is the oldest of the firm.
brower now doing business in the city, and is a large land owner at Branchville, Howell Co., Mo., where he has a flourishing mill, sawmill and store on his farm of eighteen thousand acres.

Michael Brand was in Germany, near Hesse Darmstadt, on March 26, 1838. He was the son of Johann Christian Sebilla (Hanover), and was educated by a private tutor, and then learned the brewing business. He established himself in that line and conducted it for several years. In the rebellion of 1848 he commanded a company and was made commandant of the city. He then returns to his native land and in 1852, he left his native land, and after a short stay in Toledo, Ohio, came to Chicago. In 1856, he married Philippa Darmstatler, a native of Germany, at Detroit, Mich. Mr. Brand and his family are the parents of three living children, - Virgil, Horace and Armin.

Rudolph Brand was born at Odenheim, near Mainz-on-the-Rhine, Germany, on April 10, 1854. He received his education at Darmstadt and also learned the brewing trade there. He came to this country in 1868, coming direct to Chicago, where he became connected with the present brewery, situated on Cedar Street, where he remained until 1874. He then bought a brewery at Blue Island, continuing there until 1878. He afterward sold it and became a partner with his uncle in this brewery and has the management of the interests here as vice-president and superintendent. He has an interest in the brewery of Brand & Holman, at South Chicago, until 1858, Mr. Brand married Miss Clara Uhlich, of this city, daughter of Ernest Uhlich, one of Chicago's early settlers. They have three children. -Edwin, Philip Rudolph and Alfred.

The treasurer of the company, F. Borchert & Co., was born at Blue Island, Ill., on January 16, 1862. He is the son of the senior member of that corporation, and was brought up in this city. During the winter of 1873-74, he went to Hamilton, Ont., as the secretary of a company and finished his education at Racine (Wis.) College, in 1877. After a six months' tour through Germany and Switzerland Mr. Brand returned to Chicago, and entered into the business of Brand & Co. in 1879. In the summer of 1881, he was elected treasurer of the company and has since held that responsible position. He is a member of Court Weidler, No. 39, Order of Foresters, and of Lakeview Lodge, No. 228, of United Workmen.

William Besley, president of the Besley Waykegan Brewing Company, is one of the pioneer brewers of the West. He followed the business for several years and was afterward a miller, and then became proprietor of the City Hotel, at Abbington, England. In 1835, he came to Oakland County, Mich., and, in company with others, conducted a flouring-mill, hotel, store, distillery and farm. In 1851, he bought his brother's brewery near Pontiac, Mich., and remained there till 1853, when he moved to Wankegan, Ill., which is now known as Besley, buying the business and starting again when he sold his stock and made a trip to Germany with the intention of remaining there. In 1851, however, he returned to Chicago and built the brewery which he now so successfully manages. In 1856, Mr. Besley, with Mr. Borchert, built a distillery, the first in the city, where he has since been, working at it until he came to the United States in 1865. He worked one year in New York City at his trade, and then came to Chicago and was employed four years as a journeyman brewer. In 1870, he commenced business for himself, near the lake, on Elm Street, and was burned out by the fire of 1871. After the fire he commenced business at No. 301 Rush Street, and remained there nine years. He then sold out and built his present commodious twenty-story and basement brewery at Nos. 562-64 North Halsted Street, where he manufactures the celebrated Weiss beer, which contains only about one-quarter the amount of alcohol that is in lager beer. The capacity of the brewery is about ten thousand barrels. In 1871, Mr. Besley married Ulrike J. Giese, a native of Germany. By this marriage there are six children, - Lena, Minna, Clara, Henrietta, Joseph and Alma.

E. D. Besley was born in Oakland County, Mich., on July 1, 1838, and is a son of William and Mary W. (Windale) Besley. He graduated in Michigan College, graduating in the latter place from Bryant & Stratton's Commer-

1856, he formed a partnership with his father and brother, W. Bryant Besley, in the brewery at Wankegan, and the firm was known as William Besley & Sons until the present company was chartered. W. Bryant Besley is still with the firm as an officer. In 1867, E. D. Besley came to this city. Under his able management the sales of the Chicago establishment average ten thousand barrels annually.

Valentine Blatz is a manufacturer of lager beer at Milwaukee, Wis., and has an aggregate of fifty thousand dollars, of 1860. After leaving the army, in 1860 he came to Chicago and engaged in the wholesale liquor business, in partnership with Hago C. Stansbury, which he continued six years. He then disposed of his interests and soon thereafter became manager for Mr. Blatz's Chicago house for the sale of his popular lager beer. When the Blatz company were about fourteen thousand barrels, but by his industry and energy the sales now reach three times that amount. In 1853, Mr. Leeb organized a stock company under the laws of the State, and established the Union Brewing Academy on North Clark Street, between State and Goethe streets. Mr. Leeb was united in marriage with Laura Koch, of Gothenburg, Sweden, a sister of Christine Nilsson. Mr. Leeb is a member of Accords Lodge, No. 277, A.F. & A.M.

Robert Schmidt was born in Mecklenburg, Germany, on February 24, 1816, and is a son of Albert and Augusta (Kulow) Schmidt, natives of Germany, who came to Milwaukee in 1821. Robert was educated in Germany, graduating from the University of his native place in 1827. He came to Milwaukee in 1837, and engaged in the cigar trade, which he continued seven years, and then learned the brewing business. He came to Chicago in 1853, and took charge of the agency of Jung & Borchert. In December, 1852, he married Lena Bach, a native of Milwaukee. They have two children, Herbert and Elsa. Mr. Schmidt is a member of the Insurance Company of Milwaukee. Mary Miller's flouring-mill, Mecklenburg, their 1864.

Chicago. Francis 1868, 1848 brewer, Detroit, MiSSi, then Company, and of children,—Virgil, Horace and Armin.
TOBACCO MANUFACTURES.

This interest suffered very heavily in the general conflagration of 1871, but was speedily revived during the period of re-building of the city. Just previous to the fire there were engaged in every branch of cigars and tobacco, including snuff and cigar-box manufacture, 115 establishments, employing 1,001 men, involving a capital of $1,428,950, wages paid $242,845, material consumed $1,157,817, and products $2,187,986. Ten years later the industry in many particulars showed a growth of one hundred per cent, and the figures in Chicago were—Establishments, 352; employers, 2,088; capital employed, $891,350; wages paid, $817,941; value of materials consumed, $2,382,218; value of products, $3,806,393. The subjoined table enables a ready comparison of the census figures on this industry, for the years of 1870 and 1880:

In addition to this, there were five establishments engaged in the manufacture of tobacco pipes, employing five workmen, $6,700 capital, $3,025 wages, $3,025 materials consumed, $1,220 value of products. In 1882, the board number of cigars and tobacco establishments was 476; employers, 3,295; capital invested, $1,860,000; wages paid, $1,640,000 and value of products, $7,665,000.

The total internal revenue collections on cigars and tobacco* since the time of the fire is given by years in the following table:

* Includes tobacco, cigars and snuff.

In the manufacture of tobacco, as in innumerable other branches of trade and commerce, Chicago enterprise has developed the possibilities and augmented the natural resources, until this Northern city successfully competes with some of the oldest manufacturing cities in that business in the South. The figures given in the various tables testify to this material progress, and are thus an indisputable testimony to the victory achieved by energy and ability over local disadvantages.

The imports of tobacco and cigars, as to value and duties imposed since 1871, have been as follows:

Minor items of interest in this line show some large shipments of tobacco direct to Europe, notably in 1881, 128,937 pounds; in 1882, 317,415 pounds; and in 1884, 283,334 pounds. From 1873 to 1885, the imports of clay pipes were quite an item, embracing 20,387 boxes and 9,990 cases. The number of packages of imported articles since 1873 was 14,071, as noted at the Chicago Custom House.

BEST, RUSSELL & CO., wholesale tobacco merchants and importers of Havana cigars, rank as one of the largest houses in the West in this branch of trade, and is among the oldest in Chicago. It was founded here in 1854 by John C. Partridge and John H. Russell, backed by Lorin Palmer, a wealthy New York merchant. The style of the firm was John C. Partridge & Co. and the place of business at No. 57 Randolph Street. At the time of the fire they were located at No. 43 and 45 State Street, which had burned out but in less than two weeks thereafter they resumed business on the Lake front, and a little later removed to Nos. 48-50 Lake Street. The year following they occupied their present quarters at No. 57 Lake and No. 41 State Street. In 1857, Mr. Partridge died, at which time, William Bst and W. H. Russell, who were until then junior, or interest, partners in the firm, succeeded to the business, under the firm name of Best, Russell & Co., Mr. Palmer, who had already been mentioned as having been a partner in the house from the first, still retaining his interest. In 1857, the total sales of the house amounted to $2,000,000 and it must be remembered that these were good figures for those days—while now the total amount of business done will not fall short of $1,500,000 per annum. The territory covered by their trade extends to California on the West, including a goodly portion of the Northwest, and also embracing Texas, Missouri and the Southwest. An idea of the extent and volume of the Best, Russell & Co. trade may also be gleaned from the fact, that they are the Western agents of the large manufacturing firm of Stralton & Storm of New York, whom alone they pay $500,000 annually for their goods. Of the individual members of the firm, it may be said that they are old residents here, and that they stand high both in the social and business walks of life.

R. W. Tansill is a type of the active American whose faith in himself and what he undertakes enables him to surmount difficulties. He is one of Chicago's successful business men, and the only representative of the firm of R. W. Tansill & Co., manufacturers of the "Tansill's Punch" cigar, the sales of which are made all over the United States without the aid of travelling salesmen, some or the superiority of the goods. Mr. Tansill was born in Prince William County, Va., on August 20, 1841, and is the only child of Robert and Fannie (Weems) Tansill. On her mother's side
he is a direct descendant of Mason Locke Weems, the well-known historian of the Revolution, and an Episcopalian clergyman at Po Hick Creek, near Mt. Vernon, where George Washington used to worship. He was the author of Weems’s “Washington,” “Franklin,” and “Washington, the Father of his Country.” It is said, it is in the family of the “Hatchet” story, and several other literary articles. Mr. Tansill’s father served in the Seminole War in Florida and in the Mexican War, where he was brevetted captain for bravery. He afterward accompanied Commodore Perry on his Chinese expedition, and was the first American officer to drill American soldiers on Chinese soil. R. W. Tansill was educated in Georgetown College, at Washington, D.C., and at Alexandria, Va. In the spring of 1861, he accompanied his grandparents Weems to Illinois and remained there. On January 16, 1867, he married Mary E. Mottet, of Clayton, Ill., where he engaged in the manufacture of confectionery and jobbing of cigars. J. H. Tansill, his brother, was engaged in the cigar and confectionery business until the fire of 1871 swept away his capital, but his energy soon caused him to re-establish himself, having paid all his liabilities in full, this time in the cigar trade exclusively, and for a number of years he operated one of the largest cigar factories in the city. He now has his manufacturing done in New York, and his sales are made from both points, which now average over one million cigars a month. Mr. Tansill’s Punch brand alone. Mr. Tansill has built an elegant house on Dearborn Avenue, near Oak Street, which is one of the most artistic in design in the city.

Mr. Tansill established his business in October 1852, at No. 76 Wabash Avenue. Mr. Emerich was born in Perry County, Penn., on November 9, 1840, and is a son of Jacob and Elizabeth Emerich. The Emerich family came from Germany in 1746, located in Montgomery County, Penn., and have lived in this city ever since. The son of whom we write was educated in Millersville, Penn. He commenced business in the same town by establishing a store, which he continued three years, and then selling out, became a traveling salesman in the tobacco trade, from Philadelphia for four years. In January, 1875, he located in Chicago and became a manager of the cigar and tobacco business of the wholesale house of Springmeier & Co., which position he continued for eight years. He then established his present business. In 1880, he married Miss Mary A. Rhinchart, a native of Pennsylvania, who died in 1870, leaving three children, George Edgar, Kirk Haines and Anna Elizabeth. In 1891, Mr. Emerich married Miss Offie Sawyer, a native of New York. His wife is possessed of a decided artistic taste, which she has utilized, for some years past, in the painting of gums in oil and on canvas designed for house decoration. One of her productions on china, “The Three Connoisseurs,” was placed at exhibition at the New Orleans Exposition, and elicited most favorable comments from the press. “The Old Monk,” a painting in oil, is also a notably provocative and shows strong lines. Mrs. Emerich’s largest piece, and one for which there is the greatest family affection, is a reproduction on canvas of a remarkable carpet which was built and furnished so as to represent the surroundings among which Mr. Emerich’s first saw the light. There is his cradle, in which he was rocked as an infant, and the generous trousseau of his old Pennsylvania home. During the War, Mr. Emerich was a member of the Pennsylvania State Militia, and was first orderly sergeant of Co. “B,” 46th Regiment, which he assisted in organizing, doing his part in the battle of Gettysburg. He is a member of Thompson Lodge, A.F. & A.M., and Apollo Commandery, No. 1, of Chicago.

Gustav Fuchs, cigar broker, is the general agent for the United States for McCoy & Co., of New York City, and has held that position for the past eight years, his commissions on sales of this house yielding him an income equal to the salary formerly received by the president of the United States. He is one of the comparatively few successful cigar brokers in the city. He is a respected patron of the art of music in Chicago, and, in 1883, presented Arrigo Boto, the Italian poet and composer, whose famous opera of Mélissofè has been sung the world over, with a magnificent story of the jeweler’s skill. The gift was a large inlaid, composed of gold and silver, designed symbolizing the art and music. The artist acknowledged the compliment by sending to Mr. Fuchs one of the three palm leaves conferred upon him by the king of Padua as a mark of honor for having set Goethe’s Faust to music. The leaves were taken from a tree in the Botanical Garden of Padua by the author of Faust, himself, which was afterward offered for $500. George Palm Tree.” Mr. Fuchs was born in Berlin, Germany, on January 22, 1840, and is a son of Siegmund and (Frédrica) Fuchs. He was educated in Austria and Germany, graduating in 1860. Having finished his studies, he went to New York where he entered the employ of a silk-importing house, with whom he remained eight years. In 1868 he came to New York City, where he became a travelling salesman for the cigar house of L. Hirschhorn & Co. He then took the general agency for McCoy & Co., and opened an office in Chicago. While still retaining this agency, he present represents several other eastern houses.

James F. Dywer, dealer in foreign and domestic cigars, engaged in the cigar trade in New York City in 1876, and took his present firm of Miss Betty Lock, or Albusen, Hesse, Germany. Mr. Fuchs is a member of Dirigo Lodge, No. 30, A.F. & A.M., of New York.

MILITARY HISTORY.

MILITARY DIVISION OF THE MISSOURI.

The headquarters of the Military Division of the Missouri, since their establishment in Chicago, have, from fire and other causes, been subject to frequent changes of location. In the latter part of 1873, they were removed to the Union Building, corner of LaSalle and Washington streets. In 1878, the Government leased an entire floor in the Honore Building, and the rooms were fitted up for permanent headquarters. They were burned out in January, 1879, and for the succeeding six months the headquarters were in the Palmer House, pending the restoration of the Honore Block. No provision was made for military headquarters in the new Government Building, and the Department continued to occupy the Honore Block until May, 1884, when they moved to the Pullman Building, at the corner of Michigan Avenue and Adams Street. From the time of General Sheridan's arrival and the establishment of the headquarters in Chicago, the adjutant-generals assigned to the Military Division of the Missouri were:

Colonel W. A. Nichols, A.A.G., April 9, 1863.* From April 13, 1869, to July 1, 1871, Lieutenant-Colonel George L. Hartshoff, A.A.G.; from July 24, 1871, to November 25, 1873, Lieutenant-Colonel James B. Fry, A.A.G.; from November 25, 1873, to May 1, 1875, Colonel Richard C. Drum, A.A.G.; from May 1, 1875, to October 7, 1881, Lieutenant-Colonel William D. Whipple, A.A.G.; from October 7, 1881, to date, Colonel Robert Williams, A.A.G.

On November 1, 1883, General Sheridan became commander-in-chief of the United States Army, and Major-General J. M. Schofield succeeded to the command of the Division of the Missouri, being succeeded early in 1886 by Major-General Alfred H. Terry. The division at this date comprises four military departments, viz.:

Dakota, embracing the State of Minnesota and territories of Montana and Dakota; the Platte, embracing the States of Iowa and Nebraska, the territories of Wyoming and Utah, and so much of Idaho as lies east of the 114th meridian; the Missouri, embracing the States of Illinois, Missouri, Kansas and Colorado, the territory of New Mexico, and Fort Bliss, Texas; the Indian Territory and Fort Elliott, Texas; and Texas, embracing the State of Texas, excluding Forts Elliott and Bliss.

The list of staff officers at Division Headquarters is as follows:

Personal.—Captain William M. Wherry, 6th Infantry, aide-de-camp; Captain Joseph P. Sanger, 1st Artillery, aide-de-camp; First Lieutenant Charles D. Schofield, 2d Cavalry, aide-de-camp.
Division.—Colonel Robert Williams, assistant adjutant-general; Major Henry C. Corbin, assistant adjutant-general; Colonel Absalom Baird, inspector-general, Lieutenant-Colonel J. W. Forsyth, 1st Cavalry, inspector of cavalry, and in temporary charge of inspector-general's office to Colonel Charles H. Tompkins, chief quartermaster; Colonel Marcus D. L. Simpson, chief commissary of subsistence; Major Thomas H. Handleby, chief engineer; Lieutenant-Colonel Charles G. Bartlett, 1st Infantry, inspector of ordnance practice; Lieutenant-Colonel Amos Bedworth, purchasing and depot commissary of subsistence, St. Louis, Mo.; Major George W. Candee, paymaster, Chicago, Ill.; Major John W. Barriger, purchasing and depot commissary of subsistence, Chicago, Ill.; Major William H. Forwood, attending surgeon, Chicago, Ill.; Captain John V. Furey, purchasing and disbursing quartermaster, Chicago, Ill.; Captain George E. Pond, purchasing quartermaster in connection with Board inspecting and receiving cavalry and artillery horses for the Division; station, Chicago, Ill.

The general service detachment consists of one sergeant, two corporals, eleven privates and one hospital-steward.

Major-General John McAllister Schofield was born on November 29, 1831, in Chautauqua County, N. Y. His father, Rev. James Schofield, is a minister of the Baptist Church. In 1843, the Schofield family removed to Bristol, Kendall Co., Ill., and resided there until 1845, when they removed to Freeport, Ill., and, in July, 1849, J. M. Schofield entered the Military Academy, and was graduated on July 1, 1853, in the class with James H. McPherson, Craighill, Sill, P. H. Sheridan, of the Union Army, and with Hood and Bowren, who joined in the Rebellion. Upon graduating, he was appointed, and commissioned, Brevet Second Lieutenant of Artillery in the United States Army; and, on August 31, 1853, was promoted to be second lieutenant, 1st U. S. Artillery; and served in Fort Montrie, Charleston Harbor, S. C., and in Florida, until November, 1855, when he was assigned to duty at West Point as assistant professor of Natural and Experimental Philosophy. He was promoted to be first lieutenant, 1st Artillery, on August 31, 1855, and was principal assistant professor of Philosophy at West Point until August 28, 1856. On the outbreak of the Civil War, Lieutenant Schofield was appointed mustering officer for the State of Missouri, on April 20, 1861, and served in that capacity until May 20, 1861. Meanwhile, April 26, he was elected major of the 1st Missouri Volunteer Infantry, raised and commanded by Colonel (afterward Major-General) Frank P. Blair, which, in August, 1861, was converted into an artillery regiment. On May 14, 1862, he was offered a captaincy in the 14th U. S. Infantry,—one of the new regular regiments organized by Act of Congress,—but declined it, being promoted to be captain in his own regiment, the 1st U. S. Artillery, of the same date. Major Schofield participated in the capture of Camp Jackson on May 10, 1861; and on May 25, was appointed assistant adjutant-general and chief-of-staff to General Lyon; taking part in the affairs at Dug Spring, August 2, and Curran Post-office, August 7-9, and the battle of Wilson's Creek, August 10, where he greatly distinguished himself for coolness, bravery and wise counsel. He accompanied the army on its retreat to Rolla; and, until October, was engaged at St. Louis in re-organizing his regiment, the 1st Missouri, as an artillery regiment. In October, a large force of the Confederates, under Jeff. Thompson, assembled about Fredericktown, Mo., and Major Schofield hastily put upon the cars a battery of artillery, and joined the forces opposed to Thompson. He organized his command after reaching its destination, and with raw recruits, untrained horses, and untried material of war, fought the battle of Fredericktown, on October 21, in which Thompson's forces were routed. He was made a brigadier-general of volunteers on November 21, 1861; and by the Governor of Missouri, was appointed brigadier-general of Missouri militia of same date; and under these commissions organized and commanded the militia of Missouri from November 27, 1861, and the District of St. Louis, Mo., from February 15, 1862, to September 26, 1862. While on this duty he was detailed, as a member of the Army and Navy Board, to examine the condition and fitness of the Mississippi gun and mortar-boat flotilla, on December 9-31, 1861. He also commanded the District of Missouri from June 5 to September 1862.
26, 1862. In September, 1862, General Schofield organized the Army of the Frontier in Southwestern Missouri and Northwestern Arkansas, with which he drove the Confederates, under General E. J. Johnston, who was pursuing the Federal forces from the north. The Army of the Frontier having been broken up, to furnish reinforcements to the Army under General Grant in front of Vicksburg, General Schofield was, at his own request, relieved from command on June 25, 1863, and ordered to the Department of the Missouri. While in this command, General Schofield's division, the Third, of the Fourteenth Army Corps, consisted of General G. H. Thomas, who was retained as General Sherman's major-general of volunteers, with rank from November 29, 1862, and assigned him to command of the Department of the Missouri.

This command he held until January 31, 1864, during which time he engaged in a pursuit in Arkansas, far south as Little Rock, and cleared the State of Missouri of armed bands of partisans and guerrillas. From January 31, 1864, to January 29, 1865, General Schofield commanded the Department and Army of the Ohio—taking the left wing of General W. T. Sherman's Army—and opposing General Joseph E. Johnston. During the long and brilliant campaign that followed, terminating in the capture of Atlanta, General Schofield was a trusted advisor of General W. T. Sherman, and possessed his utmost confidence. He participated with his command, and was personally conspicuous, in all the operations, movements, and battles of the Atlanta campaign, including the operations on the railroad from East Point, May 29-31; battle of Resaca, May 14-15; battle of Dallas, May 25-28; movement against Lost Mountain, with numerous severe engagements, May 29-31; and July 1-2; battle of Kennesaw Mountain, June 27 to July 2; battle of the Chattahoochee, July 2; operations and battles in front of Atlanta, July 19-22; and siege of Atlanta, July 22 to September 2, 1864. When General Sherman decided to move his march from Atlanta to the sea-board, he left General Schofield to help General Thomas "take care of Hood," and in October, 1864, he reported with his command, the Twenty-third Corps, to General Thomas at Nashville, and immediately thereafter joined the Fourth Corps and some cavalry under General J. M. Logan, and assumed the command of all troops there in the field. About November 15, Hood crossed the Tennessee River with his army, and advanced toward Nashville, where General Schofield, with a greatly inferior force, retarded his advance by skillful manipulation of his cavalry and constant interference, including the affairs at Columbia, November 24-29, Spring Hill, November 29, and the battle of Franklin, on November 30, which resulted in the repulse of Hood with a loss of 1,750 killed, 5,000 wounded, and about 700 prisoners; while General Schofield's tire loss was 2,300 men. On December 15-16, General Schofield commanded his corps in the Battle of Nashville, and in the subsequent pursuit of the shattered Confederate Army, under General Hood, which lasted until January 14, 1865. At his own suggestion, believing the war at the West virtually ended with the destruction of Hood's army, and that all that remained to be done was to crush the Rebellion was to destroy Lee's Army in Virginia, his corps was transferred to the Atlantic seaboard. The Twenty-third Army Corps, increased from 3,500 men in February, 1863, to 17,000 men in January, 1864, and numbering the largest for the duration of the war, was sent to the South, and was ordered to the front at the end of the Civil War. The Twenty-third Corps under Major-General J. D. Cox, the Tenth Corps under Major-General Alfred H. Terry, and a small body of cavalry, were at once begun, resulting in the capture of Fort Anderson, February 19, and Wilmington, February 22; the Battle of Kings Mountain, March 8-10; and march to Goldsborough, N. C., where he united with General Sherman, March 22. He was present with General Schofield in his second interview with the Confederate leader, General Joseph E. Johnston, when he surrendered at Durham Station, N. C., on April 26, 1865; and was intrusted with the duty of preparing the military commission of capitulation. He then commanded the Department of North Carolina until June, 1865, when he undertook a delicate and secret mission to France, which terminated in the peaceful evacuation of Mexico by the French. He then represented the United States at the Paris Exposition, on August 16, 1866, to Richmond, Va., to command the Department of the Potomac, where he remained until June 1, 1868, when he was called to Washington and appointed Secretary of War in Mr. Johnson's Cabinet. This appointment he held until March 2, 1869.

He was made a brigadier-general, U. S. Army, early in 1869, for his services in the battles of Franklin, in November, and at Pocahontas, Virginia, and was brevetted major-general, U. S. Army on March 12, 1865, for gallant and meritorious services in the same battle. When General Grant became president, thus promoting Lieutenant-General Sherman and Major-General Sheridan, Brigadier-General Schofield was appointed major-general, U. S. Army, with rank from March 4, 1869, and was assigned to the command of the Department of the Missouri. This he retained until May 3, 1870, when he became commander of the Military Division of the Pacific, with headquarters at San Francisco, California. He was placed on a special mission to the Hawaiian Islands, which occupied him from December 30, 1872, to April, 1873. In 1876, the Government created a new department called the Department of the Pacific, and General Schofield was appointed superintendent of the Military Academy and Commander of the Department of West Point. This position he held from March 2, 1877, until January 21, 1881. It was while on this duty that General Schofield was detailed as president of a Board of Officers, consisting of himself, Brigadier-General A. H. Terry, and Brevet Major-General George W. Getty, colonel 34th U. S. Artillery, to examine into the merits of the famous Fitz-John Porter case. The proceedings lasted nearly a year, the sessions of the Board being held part of the time at West Point and part of the time at Fort Monroe, Governor's Island, New York Harbor. The deliberations of the Board ended in a complete vindication of General Porter, the report of the Board closing as follows: "We believe that not one among the gallant and loyal men who command the attention of the public were ever so grossly misrepresented on that bloody field as General Porter, as has been alleged by his accusers." On January 21, 1881, Major-General Schofield was relieved from duty at West Point and ordered to command the Military Division of the Gulf, where he served until that Division was discontinued on May 9, 1881, when he spent about a year in travel in Europe. On his returning he was placed in command of the Military Division of the Pacific, which he commanded from December 15, 1882, until November 1, 1883, when he succeeded Lieutenant-General Sheridan in the command of the Military Division of the Missouri, with headquarters at Chicago. In 1887, General (then Lieutenant) Schofield married Miss Bartlett, the daughter of Professor W. H. C. Bartlett, professor of Natural and Experimental Philosophy at the Military Academy at West Point, and one of the early graduates of that institution.

STATE MILITIA.

Illinois State Guard.—After the close of the Civil War, a spirit of apathy pervaded military matters in Chicago and throughout the State. The State had no adequate militia, and the Legislature did not pass the law creating such system until 1876. A few independent militia organizations, however, were kept up in this city, which, in 1874, had dwindled down to the Clan-na-Gael and Emmet Guards, the Mulligan and Ellsworth Zouaves, and the Alpine Hunters, an Italian company.

First Regiment, I. S. G.—In August, 1874, a regimental organization was first successfully thought of, by Charles S. Diehl, now lieutenant-colonel in the staff of the First Brigade, being its prime suggester and promoter. The first meeting was held on August 28, 1874, at the Grand Pacific Hotel, when the following names were placed upon the list of charter members:

At the next meeting, held on September 8, one hundred and fifty men were enrolled, and were divided into
companies "A," "B" and "C." Within three months six companies had been formed, and a permanent organization was effected by the election of Frank T. Sherman (who had been a brigadier-general in the volunteer army) as major. The officers of the three original companies were as follows:

Co. "A"—Graeme Stewart, captain; Julius T. Goodrich, first lieutenant; Charles S. Diehl, second lieutenant.

The upper halls of Nos. 77-79 State Street were engaged as armory and drill-rooms. There was no law on the statute-books of Illinois authorizing the enrollment of militia, beyond a clause in the Constitution permitting the organization of a State military force. Application was made, however, to the State Adjutant-General for guns to equip the command, when it was ascertained that there were no military stores, equipments, or arms available. The governor dispatched Adjutant-General E. L. Higgins to make a personal inspection of the battalion; a committee of the Citizens' Association, composed of General A. L. Chet- lain, Walter Kimball, C. B. Nelson, General Alexander C. McClurg and R. P. Derrickson, was also present by request. The adjutant-general found six companies, aggregating three hundred men, in civilian dress, on the floor of the armory, and promised to procure from the Federal Government, if possible, a supply of Spring- field breech-loading rifles. This he succeeded in accomplishing under the provisions of an old law, which enacted that each State should receive a certain quota of arms each year, and the regiment shortly afterward received three hundred stand of arms.

The regiment, which had adopted the name of First Regiment, Illinois State Guard, appealed to the community for money with which to procure uniforms, the fund to be expended by a committee named by the Citizens' Association. Nearly $17,000 was subscribed, $5,000 being contributed by members of the regiment, which the Citizens' Association placed in the hands of General McClurg, on his consenting to take command of the army, a gray dress uniform purchased, very similar to that worn by the New York 7th Regiment, and also a service-dress, consisting of gray trousers, blue blouse, and gray forage-cap, for working drill.

Early in December, 1874, the regiment moved into a new armory at Nos. 112-16 Lake Street. About this time, also, two new companies (Ellsworth Zouaves) "G" and "H" being added, entitling the regiment to a colonel, General A. C. McClurg was elected to that position; Gurdon S. Hubbard, Jr., becoming lieutenant-colonel (in place of Lieutenant-Colonel Sherman, resigned) and Edward B. Knox major.

In March, 1875, the regiment was called to arms for the first time, through fears of an attack by the Socialists upon the office of the Chicago Relief and Aid Society. It services, however, were not brought into requisition, and it was under arms only two nights.

On May 14, 1875, the regiment made its first appearance upon the streets of Chicago, four hundred strong, the occasion being a reunion of the veteran soldiers of the War, and was presented with a stand of colors by the ladies of the city, the late General J. D. Webster delivering the presentation speech.

In January, 1876, Colonel McClurg resigning on account of personal business, George R. Davis was elected to the colonelcy. During its existence it had the following field officers:

Colonels—Alexander C. McClurg, George R. Davis.
Lieutenant-Colonels—Frank T. Sherman, Gurdon S. Hubbard, Jr., Samuel B. Sherrill.
Majors—Frank T. Sherman, Gurdon S. Hubbard, Jr., Samuel B. Sherrill, Edward B. Knox.

Shortly after the passage of the Illinois National Guard Act this regiment disbanded.

SECOND REGIMENT, J. S. G.—In early 1875, the military enthusiasm created by the successful organization of the First Regiment led to the getting up of a Second Regiment the following Irish companies forming the nucleus: Irish Rifles, Mulligan Zouaves, Montgomery Guards, Clan-na-Gael Guards, and the Irish Legion. A battalion of six companies was organized, and James Quirk, who had served during the War as lieutenant-colonel of the 23d Illinois Infantry, was elected major. The company officers were as follows:

Co. "A"—E. J. Conine, captain; J. Heaney, first lieutenant; D. Toley, second lieutenant.
Co. "C"—John Murphy, captain; Thomas Meany, first lieutenant; John McCaffery, second lieutenant.
Co. "E"—Daniel Quirk, captain; John Lanigan, first lieutenant; J. E. Bourke, second lieutenant.
Co. "F"—D. Ryan, captain.

Considerable difficulty was experienced in obtaining from the State an allotment of arms; but after much delay they were finally procured. The greatest embarrassment arose, however, when the question of providing the command with uniforms and equipments had to be met, and only for the public-spirited action of several gentlemen who had been largely necessary to its organization, it is doubtful whether the regiment could have been held together for any considerable period. William J. Onahan assumed personal responsibility for the payment of the debt incurred for uniforms and equipments, aggregating some $15,000, besides the rent of the large building leased as an Armory, on West Jackson Street, known as the Market Building.

In consequence largely of the embarrassments arising from this heavy debt, and the apathy and lack of support manifested by citizens generally, the progress of the regiment for several years was rendered difficult. At the outset, however, considerable enthusiasm was manifested; and on the occasion of the formal opening of the Second Regiment Armory, many leading citizens took part in the exercises. An introductory address by Mr. Onahan was followed by speeches from General John A. Logan, Hon. Thomas Hayne, Colonel A. C. McClurg and Rev. Dr. Butler, chaplain of the 23d Illinois Infantry during the War. A notable feature of the occasion was the reading of a poem, written for the dedication by John Boyle O'Reilly.

The management of the non-military affairs of the regiment was now vested in a board of civil administration, consisting of twenty-one citizens, and of which William J. Onahan was made president and treasurer. Early in 1878, and about the time of the consolidation with the Sixth Battalion, Mr. Onahan, then regimental quartermaster, resigned. On the occasion of his retirement, a general order from Governor Callom, as commander-in-chief of the Illinois National Guard, highly complimentary of Mr. Onahan's services as a civilian and officer, was read at the head of the regiment.

About the time the Illinois National Guard Act of 1876 took effect, the regiment had been increased to eight companies, and a re-organization of the field and staff officers was effected as follows:
Lieutenant-Colonel, James Quirk; Major, John Murphy; Adjutant, John Lang; Quartermaster, William J. Onahan; Chaplain, Rev. Thomas F. Cashman; Surgeon, W. P. Dunne, M.D.; Sergeant-major, Henry F. Donovan.

**ILLINOIS NATIONAL GUARD.**—In the winter of 1876, the State Legislature adopted a code providing for the enrollment and arming of militia, and for an annual appropriation of $75,000 for the rental of armories and the expenses of annual encampments.

This military code, which went into effect on July 1, 1876, fixed the term of service at five years, and compelled members to take the oath of allegiance. By general orders issued the same month, Major-General A. C. Duane was named commander-in-chief of the Illinois National Guard, as the new organization was styled. The companies which had, from time to time, been organized throughout the State were consolidated into seventeen regiments and battalions of infantry and four batteries of artillery, grouped into three brigades, under command of Brigadier-Generals Joseph T. Torrence, Jasper N. Reece and C. W. Pavey, with headquarters at Chicago, Springfield and Mount Vernon, respectively.

The division organization was abolished in 1878, by the Legislature, and the number of troops re-enrolled was restricted to five thousand men. Under an order of Governor Cullom, commander-in-chief, the Third Brigade was abolished in 1886, and the State forces were consolidated into eight regiments of infantry, one regiment of cavalry, and three batteries of artillery, forming two brigades. In 1885, one of the batteries of artillery was disbanded.

By enactment of the Legislature of 1885-86, the number of troops was reduced to four thousand men, and an appropriation of $80,000 in addition to the regular annual appropriation of $70,000, was voted to uniform the troops and provide for a permanent camp-ground and rifle ranges. The uniforms issued in consequence of this action are similar to the fatigue uniforms worn in the regular army.

**FIRST BRIGADE, ILLINOIS NATIONAL GUARD.**—As now organized this brigade is officered as follows:

Brigadier-General, Charles Fitz Simons commanding; 1st Infantry, Colonel Edward D. Knox; 2d Infantry, Colonel Harris A. Wheeler; 3d Infantry, Colonel C. M. Brazeet; 4th Infantry, Colonel Fred Bennett; 1st Cavalry, Lieutenant-Colonel William V. Jacobs; Battery "D," Major Edgar F. Tebey.

**FIRST REGIMENT, I. N. G.**—This regiment was in progress of organization, but had enlisted only one hundred and twenty men, at the time of the breaking out of the labor riots of 1877. When, however, a call for troops was made, over six hundred men responded, and, with scarcely an exception, every active member of the old organization enlisted, and bore arms during the troubles. Colonel McClurg was in Europe at the time, and the command devolved upon Lieutenant-Colonel Samuel B. Sherer. The regiment was stationed on Twelfth Street and in the lumber district. Several of the companies were stoned by the rioters and three men were badly hurt by the flying missiles, but the troops behaved with coolness and good sense, and not a shot was returned. After its duty here, the regiment was ordered to Braidwood, Will Co., Ill., for two days' service, thus making its entire time under arms about two weeks. Immediately after, and as a salutary result of the riots, Cos. "H," "I" and "K" were recruited, thus making full ten companies. Colonel McClurg retained the colonelcy until in December, 1877, when he resigned.

A degree of more than usual prosperity seems to have followed this regiment since its organization in 1877. Most of its officers and men are young in years, but are enthusiastic, under strict discipline, and well drilled; make a creditable display in peace, and, under the lead and control of the regiment's veteran leaders, would make a good showing in a time of difficulty and danger. The present armory of this regiment is at Nos. 22-26 Jackson Street, in a building especially erected for its uses by the Union Mutual Life Insurance Company of Maine, and occupied under a ten-year lease. Although Cos. "H" and "K" have been disbanded, the regiment feels cramped for room, and is making vigorous efforts to secure more commodious quarters.

Since its organization, in 1877, its field officers have been as follows:

The present field and staff-officers are—

Colonel, Edward B. Knox; Lieutenant-Colonel, Frank B. Davis; Major, (vacant); Surgeons, Charles Adams and Frank H. Newman; Chaplain, Rev. H. W. Thomas; Adjutant, She Smith; Inspector of Rifle Practice, H. T. Lockwood; Quartermaster, A. L. Bell.

Shea Smith, senior partner of the well-known blank-book and printing firm of Shea Smith & Co., was born at Sandusky, Ohio, on July 26, 1859. His family removed to Canada when he was quite young, and resided there until 1863, when they came to Chicago. Mr. Smith attended the common schools during his boy-
hood, but early in life he began an apprenticeship to the printing business, in which he continued as a journeyman until 1871, when the firm of Shea-Smith & Co., was formed, which was founded at an opportune time, has kept pace with the growth and progress of Chicago, and now ranks as one of the leading blank-book and printing establishments in the city. Mr. Smith has always taken a lively interest in military affairs in Chicago, and in point of service he is one of the oldest members of the First Regiment. He entered the regiment as a private in Co. "E," in September, 1871, and, in January, 1876, he became a corporal, but left the company the next year. He organized a company in 1877, that was to have been Co. "I," but on the disbanding of Co. "E," his organization went into the service, taking the latter's letter in the regimental roster. During the riots of 1877, he served as second lieutenant attached to Cos. "H" and "B." He was commissioned second lieutenant of Co. "E" on June 27, 1877, and first lieutenant on September 4. He was promoted to the captaincy of the company on February 14, 1879, and while under his command Co. "E" won many a laurel. Captain Smith is thoroughly grounded in discipline and brought his company up to an enviable state of excellence, his work in that company bringing him into such prominence in the regiment that he was elected major on October 4, 1884. He resigned in June, 1885, but after a few months' absence, on the invitation of Colonel Knox, he returned on December 7, and became adjutant of the regiment, with the rank of captain. He was married, on September 17, 1874, to Miss Eunice M. Clark, daughter of Jonathan Clark, a well-known and old resident of Chicago. Mr. and Mrs. Smith have two children.—Arthur Clark and Eunice Gwendolen.

CAPTAIN ARTHUR H. SCHARFF, although a recent acquisition to the militia of Chicago, has had long experience in military matters. He was born at Newark, N. J., on October 22, 1859, and resided there until eight years of age. His family then removed to Baltimore, where they remained three years, thence returning to Newark. He was educated in the private schools of those cities, and for a time attended a select school at Norwalk, Conn., with the intention of entering West Point, but his designs in that direction were frustrated by the removal of himself and family to this city. His identification with the militia dates from 1876, when he entered the ranks of Co. "C," 1st Infantry, N.S.G., of New Jersey. He was promoted to color-sergeant of the regiment and afterward elected second lieutenant of Co. "B," of the same regiment. During the labor riots of 1877, he served on the staff of Major-General Sewall, at Phillipsburg, N. J. On December 3, 1883, he joined Co. "B," of the First Regiment of this city, and was elected second lieutenant. He was promoted to the captaincy of the company on February 14, 1879, and while under his command Co. "E" won many a laurel. Captain Scharff is undoubtedly the tallest man in the Illinois National Guards, standing six feet, four and one-half inches in height. He is a "straight as an arrow," of splendid proportion, and in every way the beau-ideal of a soldier. With officers and men he is a favorite, and his early promotion to a high position and his subsequent elevation to a still higher position in military office. He is a member of Commercial Council of the National Union.

GORDON H. QUINN, general western agent of the Detroit Steel and Spring Works, is one of the veteran members of the First Regiment of this city, and is present captain of Co. "D." Captain Quinn was born at Prescott, Canada, on March 6, 1850, and was brought up in the Dominion until eighteen years of age. His education was obtained in the schools of Canada, and on coming to Chicago in 1868, he entered into the dry goods business with J. B. Shaw, as clerk. He was engaged there until January 1, 1872, when he was elected a member of the Illinois Palace Car Company, as bookkeeper in the storekeeper's office. Mr. Quinn remained in that position for about a year, and was then made secretary to the second vice-president of the company, which position he held for ten consecutive years. On August 1, 1883, he was tendered the position of general western agent of the Detroit Steel and Spring Works, which he accepted. This corporation is one of the largest of its kind in the West, and it has an able and worthy representative in the person of Mr. Quinn. His military career dates back to November 10, 1874, when he became a private in Co. "C," of the First Regiment. He was promoted to corporal on March 15, 1875, and served for four months. When his company attended the prize-drill competition at St. Louis in 1878, he was acting sergeant and chief of platoon, and had the pleasure of seeing his company carry off the first prize. He was elected second lieutenant on October 17, 1878, and made first lieutenant on July 10, of the following year. He held that office until October, 1878, when he tendered his resignation. The regiment could ill afford the loss of such an efficient and hard-working officer as Lieutenant Quinn, and his resignation was not accepted, but he was promoted to acting adjutant of the regiment. He filled that position until February 6, 1880, when his resignation was finally accepted. One week later, he was chosen first lieutenant of Co. "E," and on July 10, he was elected captain of Co. "K," and served as such until July 16, 1884. In June, he resigned his command and withdrew from the regiment, but when, on March 24, 1885, he was elected to the command of Co. "D," he returned to the service, and has since been actively identified with the regiment. Captain Quinn has been one of the most faithful, hard-working officers in the city, and has taken great pride in promoting the interests at work for the success of every company with which he has been identified. He was married on April 26, 1853, to Miss Jennie W. Harris, of Chicago.

SECOND REGIMENT, I. N. G.—This regiment came over in almost its entirety (eight companies) from the State Guard. The steadiness and faithful services of the Second Regiment during the riots of 1877, were the theme of general comment at the time. The men were on duty nine days and nights, and a short time in the open street at Halsted-street viaduct, or in the railway depot. It was thought that the services of the regiment in this crisis would be remembered by the wealthy citizens and business men of Chicago, so that the incumbrance of the regimental debt would no longer remain as a burden. But the responses to appeals for subscriptions were far from being general.

Under the command of Colonel James Quirk, the Second Regiment attained a high degree of efficiency in drill and discipline. Its appearance on every public occasion was invariably creditable, but as the rank and file was drawn chiefly from young men employed in shops and factories, who had no bank account to draw on, it was difficult to keep up the life and spirits of the
organization. To maintain a position in the volunteer military organization, costs money, and the men of the Second could find considerable funds on both time and pocket. In consequence of this, and other causes not necessary to mention, the membership fell away, so that the command was greatly reduced, and, finally, the regiment was consolidated with the Sixth Battalion, consisting of four companies, which had been raised on the South Side immediately after the riots of 1877, and placed under the command of Major Powell, but which at the time of the consolidation was commanded by Major W. H. Thompson. The roster of the old Second Regiment, at this period, was:

James Quirk, colonel; P. J. Hennessy, lieutenant-colonel; John E. Doyle, major; John McKeough, adjutant; William Martin, M.D., surgeon; Thomas H. Keefe, quartermaster; Rev. Thomas F. Cashman, chaplain.

There was a long struggle to secure the colonelcy of the re-organized regiment. The officers of the old Second Regiment were anxious to place their commander at its head, while those who had belonged to the Sixth Battalion were equally zealous in the advocacy of theirs. After a spirited contest, Major Thompson was elected by a majority of one vote. On account of the excited and bitter feeling engendered by this election there was but little cordiality in the command, and, by the fall of 1883, the Irish companies had dropped out, leaving the old Sixth Battalion and a portion of the enlistments made subsequent to the consolidation.

In 1884, Colonel Thompson resigned, and on July 11, 1884, Harris A. Wheeler, who had had a colonelcy on the Governor's staff since July 1, 1881, was commissioned as colonel. Since Colonel Wheeler has been in command, the Second has made wonderful and commendable progress. Quite recently the regiment has been made more compact by disbanding the South Chicago and Pullman companies, and now consists of seven companies, which have been re-lettered "A" to "G," inclusive.

The exigent demand of this "crack corps" is a new armory. Its first quarters after the riots of 1877 were in an abandoned church-building on Indiana Avenue, near Thirty-fifth Street, and, since 1878, have been in rough barracks, Nos. 179-181 Randolph Street, which will without doubt, soon abandon for a more suitable home.

The present field and staff officers of the Second Regiment are as follows:

Colonel, Harris A. Wheeler; Lieutenant-Colonel, Warren G. Purdy; Majors, George M. Moulton and Edward A. Blodgett; Surgeon, James F. Todd, M.D.; Chaplain, Rt. Rev. Charles E. Chestey; Adjutant, Samuel M. Henderson; Quartermaster, James Hitchcock.

It may be here stated, as a remarkable and noteworthy fact, that all of the Second's field and staff are connected with the Masonic fraternity. Colonel Wheeler is eminently commander of Apollo Commandery, Lieutenant-Colonel Purdy is past commander of Montjoie Commandery, Major Moulton is past commander of St. Bernard Commandery, Adjutant Henderson is recorder of Apollo Commandery, and Quartermaster Hitchcock has served Apollo Commandery in the same capacity for the past six years.

EDWARD AUGUSTUS BLODGETT, major of the Second Regiment, L.N.G., was born in DuPage County, Ill., on September 1, 1835. His education, in addition to that of the common schools, was obtained at Wheaton College. Upon the breaking out of the War, he entered the service as quartermaster-surgeon of the 57th Illinois Volunteers on August 1, 1861. He continued in the service in that capacity, doing faithful work until after the battle of Pea Ridge, and was then, on August 13, 1862, commissioned first lieutenant and adjutant, and transferred to the 74th Illinois Volunteer Infantry. In the following September, he was transferred to the 60th Illinois Regiment, with which he remained until the close of the War. He was engaged in all the battles of the Army of the Cumberland. At the last battle of Lookout Mountain he did brave and efficient work, and received special mention in the report of the brigade commander. He was mustered out on June 10, 1865, and was commissioned, during that month, a brevet captain for faithful and meritorious services. Upon the close of the War he located in Johnson County, Mo., where he became engaged in the agricultural implement business and also in the drug trade. He continued his residence there until 1883, when he removed to Chicago and went into the employ of the West Division Railway Company. He became the purchasing agent of that corporation, and has kept the position up to the present time. In September, 1885, he became identified with militia matters in this city, and was elected major of the Second Regiment. Mr. Blodgett is personally a genial, whole-minded gentleman, popular with his comrades and acquaintances, and has taken a hearty interest in the welfare of his regiment. He is a demoted member of Warrensburg Lodge, No. 135, A. F. & A. M., of Missouri; is a member of Washington Chapter, No. 43, R. A. M., of this city, and was king during 1885. He belongs to Chi Kings Commanders, No. K. E. F., of Chicago, Geo. H. Thomas Post, No. 5, G. A. R., and a member of the Royal Legion of Illinois. He was married, on July 20, 1865, to Miss Julia E. Wyant, of Chicago. They have four daughters,—Helen, Caroline, Mary and Nellie.

FIRST CAVALRY, I. N. G.—During the riots of 1877, Lieutenant-Colonel Samuel B. Sherer, of the First Regiment, who was also at the head of the cavalry arm of the State Militia, hastily called together a number of old cavalrmen, and placed them on duty under the command of Colonel Montgomery T. Agramonte, an ex-officer of the French army, and the late Lieutenant-Colonel Dominick Welter. Their services during these local troubles were invaluable. Quite promptly after the riots, four companies were organized. Colonel Agramonte accepted acceptance of the right, and subsequently removed to Salt Lake City, and Dominick Welter was elected major. A fifth company was added in 1879, and Major Welter became lieutenant-colonel. Colonel Welter died in 1885, and Captain William V. Jacobs was elected to succeed him.

An armory was fitted up in the building known as Reed's Temple of Music, at the corner of Van Buren Street and Third Avenue. In 1882, through the efforts of Colonel Welter, Captains Jacobs and as other officers of the regiment, and others, the privilege of erecting an armory on the Lake Front, near Madison Street. This building cost $40,000, of which $35,000 is in the shape of six per cent. bonds, which were sold to citizens. In it is a drill-room 135 x 150 feet.

In uniforms (service) and arms the regiment is well supplied, but it is deficient as to horses, horse-equipment, and dress uniforms. A promise has been made, however, that if the command will provide the horses no small undertaking the State will promptly supply the equipments. Great care is taken in enlistments, every recruit being compelled to pass as rigid a physical examination as if he were joining the regular army.

The present field and staff-officers of the First Cavalry are as follows:

Lieutenant-Colonel, William V. Jacobs; Major, Henry B. Maxwell; Assistant Surgeon, Arthur H. Hoosner, M.D.; Chaplain, Rev. E. H. Wiltbert; Adjutant, C. P. Wickersham; Corps of Rifle Practice, B. F. Nourse; Quartermaster, Charles S. Cleaver; Commissary, George O. Clinton.

William V. Jacobs is the son of Thomas B. and Mary (Elliott) Jacobs, and was born at West Chester, Chester Co., Penn., on June 29, 1853. His father's ancestors were English Quakers, and one of them, Samuel Jacobs, came to Pennsylvania, and then to Penn., who preceded his brother William to that colony. His grandfather, Samuel Jacobs, was a large owner of iron works in Lancaster County, Penn., which he operated, and which subsequently came
into the possession of his son, Thomas B. Jacobs, the father of William, who presented him with a comfortable fortune and ample income during his life. His mother, Mary Elliott, was the daughter of Commodore Jesse Duncan Elliott, of the United States Navy. His father, also Jesse Duncan Elliott, the great-grandfather of the present quartet, was adjutant-general of the state of Washington, at Valley Forge, and was killed by the Indians. When sixteen years old, William V. was attending school at the West Chester Military Academy, with a view to entering the U.S. Navy, but the death of his father broke up the household, and at the age of eighteen he became teller in the bank of Kirk, MacVeagh & Co. at West Chester. Hon. Wayne MacVeagh of that firm afterward became adjutant-general, under President Garfield. On Friday the 13th and one-half years later, the bank was changed to the State Bank of Brandywine, and changed hands somewhat, so that Mr. Jacobs closed his connection with it and came to Chicago on April 5, 1857. He then went into the mortgage loan business, and has since handled large sums of money for eastern and home capitalists. He represents the Provident Life and Trust Company, of Philadelphia, Penn., in its Chicago loans. He was also agent for a couple of years of the Penn Mutual Life Insurance Company of Philadelphia, Penn. He is a member of St. James's Episcopal Church; was treasurer of the Union League Club of Pennsylvania, and a member of the Washington, Belle- leston Shooting and Fishing Club. He is at present lieutenant-colonel and commands the First Regiment of Cavalry, I.N.G., and has been connected with that military organization for seven years; and C. H. Wickersham, of the First Regiment of Cavalry, I.N.G., was born, reared and educated at Pittsburgh, Penn. When but a young man, he entered the wholesale notion trade as a buyer for a large Philadelphia house. Upon the breaking out of the Civil War, he tendered a commission as major of the 7th Virginia Regiment, but he declined this, and enlisted as a private in the 8th Pennsylvania Cavalry, then commanded by Colonel D. McL. Gregg, afterward major-general of cavalry. In January, 1862, Wickersham was assigned to duty in the 3rd Cavalry, and on March 1, following, he was made a captain, and, at his own request, was relieved from duty with the signal corps, and joined his regiment, taking command of a battery. He saw some hard fighting in the battles of Fair Oaks and the "seven days" engagement, his command forming a part of the rear guard of the Army of the Potomac on its march to the Peninsula. His command joined the Army of the Potomac at Chancellorsville. In May, 1863, C. H. Wickersham participated in the desperate engagement at Chancellorsville. His cavalry regiment and the 6th New York Cavalry, both being in the advance, successfully received the attack of the enemy while it was forming for defense. On the following day, when Stonewall Jackson's corps turned the right flank of the Federal Army, driving in the Eleventh Corps, Wickersham was ordered to advance in charge, captured three guns of the enemy, and Wickersham being in command of the second battalion. The orders were promptly obeyed, and that famous charge was spoken of by Generals Pleasonton and Sickles as one of the most brilliant cavalry charges made in the War, and military historians give due and just credit to Captain Wickersham for his bravery and loyalty in leading his command to victory. He afterward fought in the battles of Gettysburg, Boomsero, Hagerstown, Williamsport, and, near Falling Waters, he was wounded quite seriously. He was in the engagement at Shepherdstown before giving up, and then went to the hospital at Frederick City. On again reporting for duty, he was assigned by General Stonean, chief of cavalry, as inspector-general of Cavalry Division, Department of Washington, and remained on duty there until August, 1864, when he was appointed assistant adjutant-general by President Lincoln, and re-as- signed by him as inspector of cavalry, to take charge of the following November. He was then ordered to Fairfax Court House as adjutant-general and chief-of-staff of a command numbering over 6,000 men, composed of cavalry and artillery regiments. In May, 1865, he was assigned to duty in Wilmington, N. C., where he raised perspicuous in command of the Southern District. He was mustered out and honorably discharged in January, 1867, with the rank of major, having been offered a commission as a general of the state of North Carolina. Since the War, he has been identified with mining, steel manufacturing and railway enterprises, and is at present the Western representative of the Dickson Locomotive Company and the Pennsylvania Steel Company, being the purchasing agent for two railroads operating in the Northwest. The wife of the War, he has always taken a lively interest, being at one time adjutant-general of the 6th Pennsylvania Brigade F.N.G. He held the position one year. In 1875, he was captain in the First Regiment at Philadelphia, but by reason of his health, had to resign. He served thirteen days in 1877, a regiment of ex-soldiers was formed in Philadelphia, and of this he was captain, doing service for about two months. He came to Chicago in 1861, but not until September, 1885, did he become interested in the city, at which time he was appointed adjutant of the First Regiment, I.N.G. Major Wickersham is one of the original members of the military order of the Loyal Legion, being the twenty-first man enrolled in the membership. This is indicative in itself of his standing as a soldier, and no one is more enthusiastically interested in the operations of the militia than he. Courteous, agreeable, of a dignified bearing, he has hosts of warm friends all over the country by whom he is held in the highest esteem.

BATTERY "D," I. N. G.—At the time of the riots of 1877, the city owned two four-pounders, and at the request of Mayor Heath, Edgar P. Tobey, who had been senior second lieutenant of old Battery "A" during the War, took command of them. As there were many veteran artillerymen residing in the city, the guns were soon manned. Though active use was, fortunately, not needed, the artillery had a dismaying effect upon the rioters, and thus sufficed to put them down. After the riots, the Citizens' Association purchased four twelve-pound Napoleon's and one Gatling gun, and the taste of their former life at the front inspired the veterans to enter upon quasi-military service, and one hundred men were soon enlisted. The battery continued as an independent organization and was known as Tobey's Battery until the passage of the Illinois National Guard Act, when it was mustered into State service, and became Battery D, I. N. G. In 1868, Battery "D" was garrisoned on the Lake Front, at the corner of Monroe Street, mainly through Major Tobey's liberality and unaided efforts. It is a commodious structure, and has often been used for the benefit of the amusement-loving public. There are now seventy men in the battery, and its armament consists of four twelve-pound Napoleon's, two six-pounders, and a Gatling gun. It is officered as follows:

FRANK S. ALLEN, lieutenant of Battery "D," was born at Providence, R. I., on April 4, 1856, and received his education in the high school of that city. In October, 1876, he came to Chicago, and was subsequently appointed adjutant of Battery "D," of the 2nd United States Light Artillery. At Vicksburg, Major Allen was detached from regular service to act as provost-marshal of the city, and he continued in that and other capacities till after the War closed, being mustered out on December 28, 1865. He then returned to Chicago. In April, 1867, he enlisted in Co. "H" of Barker's Dragons, a cavalry regiment, and after the three months' term of service was completed, he resigned and enlisted in Battery "A," of the Chicago Light Artillery. He served in that famous battery for about two and a half years, and was then promoted to lieutenant. He again resigned, and with Captain M. Pratt, organized a company of colored light artillery, which was mustered into service as Battery "D," of the 2nd United States Light Artillery. At Vicksburg, Major Allen was detached from regular service to act as provost-marshal of the city, and he continued in that and other capacities till after the War closed, being mustered out on December 28, 1865. He then returned to Chicago, and became interested in the Chicago Scale Company, of which he has been treasurer ever since. In 1859, Lieutenant Allen, in company with Major E. P. Tobey, organized what was known as the "Police Battery," which rendered very effective service in quelling the railroad riots during the summer of that year. Upon the permanent organization of Battery "D," Major Allen was elected its captain, and has held that office ever since, greatly to the satisfaction of the members of the organization. Lieutenant Allen is a member and past master of Ashlar Lodge, No. 308, A.F. & A.M.; Justice Chapter, No. 2, R.A.M.; Grand Chapter of Illinois, No. 1, R.A.M.; and Oriental Consistory, S.P.K.S., No. 32. He also belongs to Medinah Temple, A.A.O.N.M.S.; the Veteran Club, Union Veteran League, and U. S. Grant Post, No. 28, G.A.R.
HISTORY

GRAND ARMY OF THE REPUBLIC.

At the close of the War, upward of 1,500,000 soldiers resumed the vocations of peace. It was natural that they who had fought together on so many fields should desire to renew, in social life, the associations of war. This was Major Stephenson's primary object in establishing the Grand Army of the Republic. Its cardinal principles were — "Fraternity to our comrades; Charity to our fellowmen; and Loyalty to our country." General John A. Logan, in his National Encampment address in 1871, thus expressed the objects and purposes of the Grand Army:

"It was to keep constantly before the mind the cost of Liberty, the price paid for the suppression of rebellion, and the preservation of a free and independent government; to keep forever green the hallowed memory of the heroic dead, who had fallen to save their country from disunion and dishonor; and as far as possible to bring comfort and relief to the bereaved families they left behind them."

Illinois enjoys the distinction of being the birthplace of the Grand Army of the Republic. In December, 1865, Major G. F. Stephenson, of Springfield, handed the manuscript of an address, asking for admission to a secret society, to Dr. Allen, of the Surgeon-General's staff, and to Dr. Hamilton, ex-surgeon of the 17th Illinois Volunteers. The organization of the Grand Army of the Republic had its inception in this. Lieutenant John Phelps, of this city, quartermaster of the 32d Illinois Volunteers during the War, was requested by Major Stephenson to frame a ritual for the new organization. With the assistance of the ritual of the Soldiers' and Sailors' League of St. Louis, Lieutenant Phelps framed a ritual which is substantially used by the National organization to-day. Colonel J. R. Flood, of the Veteran Reserve Corps, Lieutenant-Colonel Prince, of the 7th Illinois Cavalry, Colonel John M. Snyder, of Ogle'sby's staff, and the gentlemen already mentioned, took the oath, but did not organize themselves into a Post. The difficulty of setting out upon the actual work of organization, from the fact that the ritual was not printed, disappeared when it was discovered that the editor, proprietor and composers of the Decatur Tribune were ex-soldiers. Lieutenant Phelps was immediately dispatched to Decatur, and having administered the oath to the entire staff and corps of composers of the Tribune, had four hundred copies of the ritual struck off. On April 6, 1866, was established, at Decatur, the first Post of the Grand Army of the Republic.

Lieutenant Phelps at once engaged actively in organization, establishing posts at Carlinville, Bunker Hill, Hillsboro', Pana, Jerseyville, Carrollton, and Whitehall. At the same time, Major Stephenson and Colonel Snyder came to Chicago and organized Ransom and Sheridan Posts, the charters of which were subsequently surrendered.

For years, the inadequacy of the quarters in the Adjutant-General's Department at Springfield, in which the flags, war relics and trophies of the Illinois regiments were stored, had been matter of public comment. Touching this subject, at the Encampment of 1880, a resolution was adopted providing for the appointment of a committee to present the matter properly to the Legislature. The Commanders appointed Comrades H. Hilliard, E. B. Sherman and J. N. Reece, and their efforts resulted in an appropriation of $18,000 for the erection of a Memorial Hall, in which the flags, relics and trophies were deposed in 1883.

For some years the ex-soldiers and sailors were patriotic to the interests of the Grand Army in this city, but this has been surmounted, and the Posts now in existence are in a flourishing condition. A list of the Chicago Posts, with particulars concerning them, is appended.

Geo. H. Thomas Post, No. 5, was established in 1873. H. C. Cook was the first commander, and his successors, in order, were Allen D. Fields, E. H. Thompson, H. P. Thompson, and W. H. Chenevot, C. F. Matteson, Freeman Conner.

Private Whittier Post, No. 7, founded in November, 1873, was the only Post named after a private. Private Whittier, of Battery "A," 1st Illinois Artillery, was shot through the body, while on horseback, at the siege of Vicksburg. In his fall he was caught by Lewis J. Jacobs, who screened the bullet with his body. It is now mounted in gold, and held in the beak of an eagle which surmounts the rostrum of the Post. L. S. Hudson was the first commander of this Post, and he was succeeded by C. R. E. Koch, F. L. W. Juss, M. A. Mathayer, J. K. Van Slyke, H. H. Compson, E. H. Howard, D. L. Carmichael, W. C. Arnot, and F. A. Macdonald. This Post was subsequently merged in Post No. 91.

Troy Post, No. 9, was established in April, 1874. Arthur Erbe was the commander. Felix Laflame, Anthony O. Ayen, William H. Schwartz and James Donohue are the only members who have since occupied the position.

U. S. Grant Post, No. 28, the banner Post of the West, was founded in November, 1875, with Stephen F. Brown as commander, E. W. Chamberlain, W. E. Pierce, Robert W. Smith, J. L. Bennett, W. A. Gray, S. M. Randolph and A. J. Mikesch have been its successors.

George A. Custer Post, No. 40, was established in June, 1875, the first commander being C. F. Vierling, and his successors L. S. Hudson, George L. Reservce, James I. Danenhower, D. B. Kendall, J. A. Cole and F. A. Schipp.

John Brown Post, No. 50, was organized in April, 1879, it surrendered its charter in September, 1880, but a few months afterward reorganized. Its members are all colored. The first commander was William H. Smith, and his successors Moffit Hallitt, Enos Bond, M. Gibson, and T. M. Read.

Abraham Lincoln Post, No. 91, rose from the ashes of Whittier Post in March, 1881, and claims to be the best uniformed Post in the city. Commanders, in order of succession, have been E. B. Howard, A. W. Alllyn, W. H. Reyburn, C. E. Vaughan. Colonel James A. Mulligan Post, No. 306, was organized on July 7, 1885, the first commander being Thomas Casey, who was succeeded by John Moran in 1883, and H. R. Sandes in 1885. The membership on January 1, 1885, was seven hundred and thirty.

Bleeker Post, No. 376, was organized on December 10, 1883, Marcus Schaeck and D. Ackerman have been commanders, Godfrey Weitez Post, No. 425, was instituted on March 29, 1884. Its commanders have been O. M. Brady and John L. Taylor, its membership is five hundred and seventy.

The numerical growth of the order in the United States can be perceived from the following figures:

Chicago, in 1885, had 1,950 members on the roster of its Posts.

VETERAN UNION LEAGUE.

The Veteran Union League is an organization of a social and political character. It is social, so far as cultivating and strengthening the soldiery and brotherly instincts which bound together comrades of the Army and Navy during the late War are concerned; and political, inasmuch as its members believe in, and agree, by their constitution, to uphold, aid and defend the principles of the Republican party. As its constitution rehearse, the League was formed to encourage the spirit of universal liberty, equal rights, and justice to all men, regardless of nationality or color, and to aid in the enforcement of all laws enacted to preserve the purity of the ballot-box.

The League was organized in the summer of 1880, the charter members being:

* These dates are up to and inclusive of March 31.
† From this year the dates commence December 31.

The officers elected for the first term of one year were —

L. W. Perce, president; A. L. Chetlain, W. S. Scribner, vice-presidents; Seth F. Hanchett, treasurer; William H. Coulston, secretary; James A. Sexton, marshal; Bishop Samuel Fallows, chaplain.

Mr. Perce was elected president during two terms following, and was succeeded in the chair, in 1883, by Wiley S. Scribner, who gave place to Robert W. Smith in 1884.

The League held its meetings for the first year of its existence at the Grand Pacific Hotel. The second floor at No. 185 South Clark Street was then rented, and fitted up both for business meetings and use as a social club. No person is considered eligible to membership unless possessed of a perfect War-record as well as in good standing, at home, which facts were required to be carefully certified to before an executive committee. The League was never organized as a marching or uniformed body, and never participated in that manner in political contests, preferring to exercise its influence through individual members, supplemented by organized action as deemed expedient in the various campaigns through which they have passed. The social feature, however, predominates. The present active membership in this city is about one hundred and seventy-five. The acting officers (who are elected in August of each year) are —

John J. Healy, president; Robert F. Wilson, vice-president; A. J. Barkert, secretary; William H. King, treasurer; Nelson Patterson, marshal.

THE CHICAGO UNION VETERAN CLUB.

The basis of organization of the Union Veteran Club, the largest society of veterans in the city, was Company "A" of the Boys in Blue, a marching society, formed largely of ex-soldiers, for service during the presidential campaign of the centennial year. On September 21-23, 1876, Company "A" attended in a body the grand re-union of ex-soldiers held at Indianapolis. This was a very large and enthusiastic gathering, and one of its results was a strong feeling in the ranks of the Chicago company for the organization of a permanent veterans' club at home. In order to obtain the full expression of the members, a meeting was held on September 26, 1877, the results of which was the organization of the Chicago Veteran Club, with L. F. Jacobs as temporary presiding officer and J. G. Smith as secretary. While yet a temporary organization, this club was selected to act as escort to Hon. Robert G. Ingersoll and Hon. James G. Blaine, then in the city.

On December 21, a meeting was held in the clubroom of the Grand Pacific Hotel, and the committee on constitution and by-laws submitted their report, which was adopted. The title of the organization was made the Chicago Union Veteran Club, instead of Union Veterans' Benevolent Association, as at first proposed. A motion was unanimously carried, admitting as members all whose names were enrolled in the roster of Company "A," Boys in Blue. At an adjourned meeting on January 2, 1877, officers for the first year were elected as follows:

Martin Beem, president; Joseph Stockton, C. R. E. Koch, vice-presidents; W. H. Lower, recording secretary; John E. Vreeland, corresponding secretary; Lyman Bridges, treasurer; Owen Stuwart, marshal.

The original members numbered nearly three hundred, and by January 2, 1878, the membership had increased to four hundred and three.

On December 17, 1880, the association received its charter from the Secretary of State. To this document are affixed more than four hundred signatures, among them being those of Generals U. S. Grant and John A. Logan.

The objects of the organization, as set forth in the charter, are:

"First. The upholding of the principles of the Republican party, based upon a paramount respect for and fidelity to the National constitution and by-laws."

"Second. The procuring of employment for unemployed ex-Union soldiers."

"Third. The cultivation and strengthening of the social ties which have their origin in the common privations of the camp, the battle-field, and the prison-pen."

The Board of Directors for the first year of incorporation was composed of:

The officers of the Club from the original organization have been as follows:

1878.—Martin Beem, president; A. L. Chetlain, Owen Stuart, vice-presidents; J. S. Curtiss, recording secretary; J. T. Pratt, corresponding secretary; William H. Bolton, treasurer; James A. Sexton, marshal.

1879.—A. L. Chetlain, president; W. S. Scribner, L. F. Jacob, vice-presidents; J. S. Curtiss, recording secretary; W. C. Carroll, corresponding secretary; George W. Cook, treasurer; James J. Healy, marshal.

1880—Martin Beem, president; James A. Sexton, L. F. Jacobs, vice-presidents; J. S. Curtiss, recording secretary; John C. Barker, corresponding secretary; George W. Cook, treasurer; James J. Healy, marshal.

1881—Wiley S. Scribner, president; L. F. Jacobs, James H. Weaver, vice-presidents; J. S. Curtiss, recording secretary; H. S. Vail, corresponding secretary; William H. Bolton, treasurer; Robert W. Cross, marshal.

1882—James A. Sexton, president; L. F. Jacobs, M. J. McGrath, vice-presidents; John L. Manning, recording secretary; William H. Reed, corresponding secretary; William H. Bolton, treasurer; Leander Baeder, marshal.

1883—James A. Sexton, president; Charles A. Dibble, John J. Healy, vice-presidents; John L. Manning, secretary (the duties of corresponding and recording secretary were at this election merged); William H. Bolton, treasurer; John A. Cleghorn, marshal.

1884—James A. Sexton, president; Charles A. Dibble, J. S. Curtiss, vice-presidents; John L. Manning, secretary; William H. Bolton, treasurer; Daniel D. Tompkins, marshal.

1885.—Julius White, president; Charles A. Dibble, J. S. Curtiss, vice-presidents; John L. Manning, secretary; William H. Bolton, treasurer; Daniel D. Tompkins, marshal.

When General Grant passed through Chicago in 1879, on his tour around the world, the Veteran Club, as was fitting, took charge of all military demonstrations.

The organization has manned, by its members to the number of nearly one hundred, all inside house positions during the last two National Conventions of the Republican party held in Chicago, Comrade James A. Sexton, the president of the club, acting as sergeant-at-arms, during the Convention of 1884.

The roster now exhibits a membership of two thousand veterans, one thousand six hundred of whom were reported in good standing at the last annual meeting on January 2, 1885.

THE MEXICAN VETERAN ASSOCIATION OF CHICAGO.

This association is composed of surviving soldiers of the Mexican War, who organized themselves under this name in 1868, having for their object mutual aid, the
keeping alive of fraternal feeling, and promoting interests in common. Meetings have been held quarterly through the seventeen years the Association has existed, at which old-time army reminiscences are revived. The society has from time to time interested itself in movements looking to a governmental recognition of the veterans of the Mexican War, in the shape of pensions, which acknowledgment has just been accorded them. The Chicago society to-day numbers sixteen veterans of the Army and Navy, and its officers are—Parnema T. Turnley, president; John F. Corgan, vice-president; James R. Hugunin, secretary; John L. Kimberly, treasurer. The association has rarely participated in celebrations as a body, but every member volunteered to march in society organization on the occasion of the obsequies of General Grant.

THE UNION PRISONERS-OF-WAR ASSOCIATION.

This association was organized as a National assembly in Chicago, in 1873, and has for its object the strengthening of ties of fellowship and sympathy formed by companionship in the Federal army during the War of the Rebellion, and by joint action of its members, in any direction, to secure justice to their living comrades and honor to the dead. The membership embraces only such Federal soldiers as were incarcerated in Southern military prisons. The State organization was chartered by the National Association in 1873, and its present officers are—

F. A. Cleveland, president; L. B. Gesner, secretary; C. D. Ramsey, first vice-president; O. D. Noble, second vice-president; D. W. Howe, treasurer; of all of Chicago.

The Chicago association, chartered by the State society in 1874, is officered as follows:

J. W. Artley, president; C. D. Ramsey, vice-president; F. A. Cleveland, secretary; O. D. Noble, treasurer; J. R. Hewlett, chaplain.

The society holds business meetings twice each month, and is represented perpetually by its secretary as acting. The government at Washington furnishes the association with blank record cards of prisoners-of-war, which are filled out and transmitted to the Pension Office, as the basis for an official Government enrollment, with a view to probable future benefits which Congress is likely to bestow upon them.

THE LOYAL LEGION.

The Military Order of the Loyal Legion of the United States is a society composed of commissioned officers of the Army and Navy, both regular and volunteer, who served during the War, constituting the first class; the eldest sons of the members of the first class, on attaining their majority, constituting the second class; and the third class being composed of citizens who distinguished themselves especially for loyalty during the War, for every thirty-three members of the first class.

The Loyal Legion was founded by a number of officers of the Pennsylvania Cavalry, United States Volunteers, during the winter of 1864-65, the first commandery being established at Philadelphia, on April 15, 1865, with a roll of ten members. There are now fourteen commanderies, or State organizations.

The Illinois Commandery was instituted in May, 1879, Captain Richard Robins, then of the Massachusetts Commandery, being the main mover. The charter members are the following:

The past officers of the Illinois Commandery are the following:

The Commandery now has a membership of about two hundred and fifty. Meetings are held on the first Wednesday of each month, at the Grand Pacific Hotel. After the transaction of routine business a paper is read, by a member, on some battle, campaign or incident of the War.

The main objects of the Order are to strengthen the ties of fraternal fellowship and sympathy formed by companionship in arms; to enforce unqualified allegiance to the General Government; to protect the rights and liberties of American citizenship; and to maintain national honor, union and independence.

The present officers of the Commandery are—

ELECTRIC TELEGRAPH, TELEPHONE AND LIGHTS.

The electric telegraph, since its introduction in Chicago in 1848, has kept pace with every other important commercial interest of the city. That this has been the case is testified by the magnificent Western Union Building, at the southwest corner of LaSalle and Washington streets, the many convenient sub-stations throughout the city, and the vast network of wires stretching away on poles to every point of the compass. Early in the history of telegraphy, Chicago became the second city in the United States in point of business transacted. The volume of the Western Union business at this point now exceeds one million messages a year, and the total of messages handled exceeds one million five hundred thousand per annum.

Among other companies established here since 1874, were the Mutual Union and the Baltimore & Ohio, in 1882; the Traders', in 1882; the Chicago and Milwaukee, the Board of Trade, the Bankers' and Merchants', and the Postal Telegraph Company, in 1883. These companies all continue to do business, with the exception of the Mutual Union, which was absorbed by the Western Union in 1883, and the Bankers' and Merchants', which failed in July, 1885. The Mutual Union offices have always been kept distinct from the Western Union, however, and that corporation has the advantage of maintaining two distinct trunk lines.

A great part of the time of the City Council for the past five years has been taken up with questions of telegraph rights and franchises, and the "underground" problem. The fight in the Council against the mutual Union was prolonged and bitter, and the Baltimore & Ohio met with similar opposition. In its annual message to the Council, on May 10, 1880, Mayor Harrison directed attention to the fact, that the City Fire Department was hampered in its efforts to use ladders in reaching fires in high buildings by the masses of telegraph wires strung along the streets on poles, and he recommended that the nuisance be abated by requiring the telegraph companies to place their wires underground. The Council subsequently passed an underground ordinance, yet few of the companies showed any inclination to comply with its provisions—notably, the Mutual Union, which was operating under only a temporary-pole ordinance. The city made a determined fight to compel the companies to observe the ordinance, and proceeded to arrest all employees of the companies found stringing wires. The Baltimore & Ohio Company was the first to see the inevitable, and, in April, 1884, asked for and received a permit to place its wires underground. In May, 1884, the Mutual Union took out a permit to lay its wires underground. On January 23, 1885, Superintendent Barrett of the City Telegraph, reported to the corporation counsel that all of the various companies were willing to put their wires underground, and were doing so as fast as possible.

The following figures approximate the miles of wires already placed beneath the streets and alleys of the city:

<table>
<thead>
<tr>
<th>Company</th>
<th>Miles</th>

<td>25</td>
</tr>
<tr>
<td>Western Indiana Railroad Co.</td>
<td>50</td>
</tr>
<tr>
<td>City Fire-Alarm Telegraph</td>
<td>60</td>
</tr>
</tbody>
</table>

In addition to these, preparations are being made by which, as soon as possible, there will be placed by the Western Union Telegraph Company five hundred miles, and by the Baltimore & Ohio Telegraph Company two hundred and fifty miles, respectively.

The Chicago Underground Conduct Company has been of material assistance in furthering the general underground system. The incorporators, Henry Corwith, W. C. Grant, E. S. Dreyer, W. H. Bradley and Edward Koch, were granted a franchise by the City Council on July 31, 1882. They were given the right to construct and maintain in the streets, alleys and tunnels of the city an underground conduit for the transmission of electricity and gas, lighting, heat and power, and for the transmission of sound.

Elisha Gray.—Among those who have achieved prominence as men of marked genius and substantial worth in Chicago, Professor Elisha Gray, inventor, occupies an enviable position. He is of Quaker origin, and in his person bears the distinguishing evidences of his descent in a certain placidity and directness of manner indicative of his temperament and character. He was born at Barnesville, Belmont Co., Ohio, on August 2, 1835. In early life he was a carpenter's apprentice, and it was then said of him that he was somewhat of a social nuisance because of his prolixity to acids and laboratory stuffs. At the age of twenty-one he entered Oberlin College, where he studied diligently for five years. His mental bent then was strongest in the study of natural philosophy, and to this he devoted all his spare hours. After finishing his collegiate education his health became very poor, so that it was not until he reached his thirty-first year that his attention was wholly devoted to electrical mechanism. This science fascinated him and monopolized his time, and he began to invent, his first attempt being to seek, by internal mechanism, a relief to the difficulties then embarrassing all telegraph lines arising from defective insulation. He constructed a self-adjusting relay, and it was a success. It was not largely used, however, as there was no necessity for the demand. In 1870, he invented (and two years later perfected the patent) the needle annunciator for hotels, which has since been so largely used. The electrical annunciator for elevators was also invented by him about the same time. His next invention was an instrument for private telegraph lines, so constructed that any person who could read and spell was enabled to transmit messages upon it, by merely fingering keys similar to those on the typewriter machine of to-day. During the years 1873-75, Professor Gray's attention was devoted to developing a system of "Electric Harmonic Telegraphy" for the transmission of sounds over the wires of a telegraph. He finally succeeded in sending over a wire of five hundred miles in length, nine different messages at the same moment, each message having a distinctive note, and each capable of being taken off at any number of intermediate points by simply tuning the receiver to the key-note on which each was transmitted. Theoretically, the number of messages that can be sent over a single wire may be increased to as many notes and semi-tones as the range of the gamut will permit. Professor Gray was led to these investigations by a domestic incident, and among the earliest discoveries in connection with the experiments was the fact that not only simple but compound tones could be sent through the wire and received, either on a metal plate or a magnet. By his method, different messages may be sent simultaneously, and a tune, with all its parts, may be sent hundreds of miles, and be distinctly audible at the receiving end. This discovery underlies the whole system of telephones now in use, and is a splendid proof of Professor Gray's right to priority of the invention. On February 14, 1876, Professor Bell filed a patent, and described his new invention in general terms as "new
and useful improvements in telegraphy." In it he nowhere claims as an invention that it will transmit articulate vocal sounds or words. On the same day Elisha Gray filed a caveat describing his invention as "an art of transmitting vocal sounds telegraphically."

That was the earliest application of the kind on the earth. Mr. Gray thus specified his invention: "It is the object of my invention to transmit the tones of the human voice through a telegraphic circuit and reproduce them at the receiving end of the line, so that actual conversation can be carried on by persons at long distances apart." Mr. Bell secured this information, and the Department of Patents afterward improperly issued him a patent to which he was in no manner entitled. Mr. Gray brought the matter to the attention of the Interior Department, and the United States brought suit against Mr. Bell to vacate his telephone patent. The case is still in the superior courts, but there is no question but that right and justice will eventually prevail. Mr. Gray in full possession of the privileges and benefits of his invention. In 1869, Mr. Gray formed the firm of Gray & Barton, at Cleveland, Ohio, dealing in electrical supplies. They removed to Chicago soon after, and continued their business until shortly after the great fire of 1871. The firm was then consolidated in the corporation known as the Western Electric Manufacturing Company. Mr. Gray held the official position of general superintendent and electrician with the company until 1874, when he withdrew, in order to devote his whole time to the protection of his patents on the telephone. He has made several improvements on the telephone, and when the great controversy is settled, and Mr. Gray secures his just rights, he will doubtless give to the public an instrument vastly superior to that now in general use. Mr. Gray is president of the Chicago Electric Undergrade Company, but pays almost undivided attention to the litigation now in the United States Courts. Mr. Gray's characteristic as an inventor is in avoiding mere mechanical devices to accomplish results. Intricacy, in his mind, is a failure. He seeks to make electricity do his work direct, and therefore endeavors in his devices to train and harness it for that purpose. In 1878, he received the grand prize at the Paris Exhibition and was conferred the degree of Chevalier and the decorations of the Legion of Honor by the French Government. At the Electrical Exhibition at Paris in 1881, he was again honored with the gold medal for his inventions. Professor Gray was conferred the degree of Ph.D. at Rensselaer Polytechnic Institute, and is professor of electrical science in those institutions at the present time. He was also conferred the degree of Sc.D. and from Blackman University, and is a member of the American Philosophical Society, the Society of Electrical Engineers of England, and the Society of Telegraph Engineers of London. He belongs to the Calumet and Union League clubs of this city. He is a frequent contributor to the press, and has prepared several pamphlets, essays, etc., and issued a small volume entitled "Electrical Researches." Professor Gray was married on January 1, 1862, to Miss Delia M. Shepherd, of Oberlin, Ohio. They have four children,—Minnie, Annie, Edward and David.

Dwight K. Tripp, attorney-at-law and vice-president of the Chicago Sections Electric Underground Company, was born at Sheboygan, Wis., on June 27, 1849, and is a son of Ezekiel and Eliza J. (Ella) Tripp. His family removed to Chicago in 1857, and the father embarked in the mercantile trade. In December, 1855, Mr. Tripp and Daniel H. Hale became proprietors of the Sherman House, and continued in its management until May, 1861. Dwight K. Tripp passed his boyhood in this city, attending the common schools until his eighteenth year, when he went to Berlin, Germany, and entered the famous university of that city. He took the laws course, and spent three years studying law, political economy, the science of government, history and literature. At the breaking out of the War between France and Prussia, he became war correspondent for the Chicago Republican and San Francisco Call, attaching himself to the newspaper corps attending the operations between France and Germany. He continued in this vocation until the siege of Metz, and then sailed for home. He at once located in San Francisco and commenced the practice of law. He was highly successful and rapidly came to be regarded as one of the foremost lawyers of the Golden State. He achieved considerable reputation in the celebrated case of Edith O'Gorman, the escaped nun, and also in the civil suit, yet pending, between the State of California and the City of San Francisco et al. Mr. Tripp has achieved no little reputation over the United States in the case of fraud which involved Surveyor-General Rollins and several other Government and State officials. Mr. Tripp is a firm believer in the principles of republicanism, but when men commit acts of fraud under the guise of staunch and honest republicans, his convictions are decided. To him is due the credit of bringing before the Interior Department, evidence of the corruption of Surveyor-General Rollins and others, which resulted in the dismissal of Rollins from the Government's service and the complete overthrow of the corrupt republican ring in California. Mr. Tripp, while in California, confined his legal practice to such cases as came before the United States Courts and the Interior Department. In 1879, he came to this city and made his home, although practicing his profession in the City of Washington, as well as retaining legal connections in San Francisco. He was, in 1885, appointed by President Arthur one of the commissioners to examine the sections of the Atlantic & Pacific Railroad, and approve of the land grants made to that corporation. Upon the organization of the Chicago Sectional Electric Underground Company, Mr. Tripp was named vice-president, Elisha Gray becoming president. These gentlemen have been associated for a number of years, their intimate relations having brought about Mr. Tripp's remarkable discovery of the rights of Elisha Gray as inventor of the telephone. To Mr. Tripp is undoubtedly due the whole credit for this important discovery, and in aiding Mr. Gray in the recovery of his rights to that wonderful invention he has already displayed ability that marks him as a most learned and aggressive lawyer. He is devoting the whole attention to the case, which involves not only a great financial consideration, but the credit and honor of the inventor. Mr. Tripp was married on January 20, 1881, to Miss Eliza Williams, daughter of General J. A. Williams, United States land commissioner under Presidents Grant and Hayes, and now general solicitor of the Atchison, Topeka & Santa Fe and Atlantic & Pacific railroads. Mr. Tripp is a member of the Union League and Chicago clubs, and of Chevalier Bavard Commandery, No. 52, K.T.

**Western Union.**—At the time of the fire the offices of the Western Union Telegraph Company were located at the corner of Washington and LaSalle streets, and on Monday, October 13, 1871, its force was re-organized, headquarters made at Burling Hall, on State street, and half its wires replaced. Great difficulty in the delivery of messages was experienced for some time, but within two weeks offices were established at the
hotels and depots, and the routine of the service was restored, with main office at the corner of Washington and Canal streets and at No. 554 Wabash Avenue. Later the offices were consolidated at the Central Hotel, corner Washington and Market streets, in the spring of 1872, and removed to the Union Building in May, 1873, the present quarters of the company. There the service continued until September, 1883, when a fire, involving a loss of $29,000, and the removal to the Mutual Union office occurred. The offices were then enlarged, and two thousand instruments put in, thirty-five bookkeepers employed, and one thousand eight hundred and sixty-eight miles of wire in the new system, one hundred and seventy-five offices and two hundred miles of wires in Chicago and suburbs were in use.

The Western Union has absorbed the Pacific & Atlantic, Atlantic & Pacific, American Union and Mutual Union Telegraph companies.

In 1871, Anson Stager was the general superintendent of this division, and in 1879 was made vice-president of the company: later succeeded by R. C. Clowry. This division now embraces all the territory west of Pennsylvania, north of the Ohio River, and west of the Mississippi River, to the Pacific Ocean. Mr. Clowry is now vice-president of the company and general superintendent of this territory, and F. H. Tubbs is superintendent of this district, succeeding J. J. S. Wilson, who was manager of the Caton line and, in the consolidation of that line with the Western Union, managed its interests.

ROBERT C. CLOWRY.—The old Illinois and Mississippi Telegraph Company developed many men who have given character to the telegraphic administration of the country. Colonel Robert C. Clowry, now vice-president, was general superintendent of the Western Union Telegraph Company, entered the service of the Illinois and Mississippi Telegraph Company at Joliet, Ill., on April 4, 1852, under an arrangement with the manager of the office at that place to give him six months' free service as messenger to deliver telegrams, in return for the manager's services in teaching him telegraphy. He was fourteen years old then, and prior to entering on his new life had resided on his mother's farm near Joliet and attended school. So rapidly did he become proficient in the art of telegraphy, that in October, 1852, he was made manager of the office of the same company at Lockport, Ill., and in December, 1853, he was transferred to the head office as acting manager of that office, and in November, 1854, he was transferred to St. Louis as chief operator of the company. In March, 1859, he was appointed superintendent of the St. Louis & Illinois Telegraph Company's headquarters at Independence, Mo., and in August, 1860, he was appointed assistant superintendent of United States military telegraph lines, with headquarters at St. Louis, Mo. In October, 1863, he was commissioned by President Abraham Lincoln as captain and assistant quartermaster in the United States Army, on the recommendation of General John M. Schofield, commanding the Department of the Missouri, and he was assigned to duty by the Quartermaster-General in charge of the United States military telegraph lines, in the Department of Arkansas, with headquarters at Little Rock, Ark. One year later the United States military telegraph lines in the departments of Missouri and Kansas were added to his charge, with headquarters at St. Louis. On March 13, 1865, brevet commissions as major and lieutenant-colonel, were issued to him by President Andrew Johnson, for "meritorious services and devoted application to duty." At his own request, Colonel Clowry was mustered out of the service on May 12, 1866, and was immediately appointed superintendent of the Central Office of the Western Union Telegraph Company in the Southwest, with headquarters at St. Louis. In January, 1875, he was promoted to the office of assistant general superintendent, with a large increase of territory from that date he rapidly worked up to the highest active position in the company's service. In December, 1875, he was appointed assistant general superintendent of the Central Division of the Company, and in 1883, his division engrossed the territory west of Buffalo and Pittsburgh and east of the Sierra Nevada Mountains, of which General Anson Stager was then general superintendent. In May, 1880, Colonel Clowry was appointed general superintendent, vice General Stager, who had resigned the position to accept the office of vice-president. In July, 1881, the telegraphic territory under the charge of Colonel Clowry embraced the country west of Pennsylvania to the Pacific Ocean, and from the British possessions to the Mississippi rivers, in the north, and west of the Mississippi rivers. In October, 1883, he was elected a director, member of the executive committee and vice-president of the Western Union Company, retaining the position of general superintendent of the territory mentioned. Such is the career of a truly self-made man. From the lowest round of the ladder he has worked upward, until he is now within a step of the chief office of one of the greatest corporations of America. No one familiar with the electric spirit of the telegraph would ever claim to have attended success which has attended Colonel Clowry's efforts. He has for years stood at the very head of the telegraphic forces of the country, and in commercial and financial circles he is respected and honored.

Mr. Clowry was married on August 29, 1855, to Miss Augusta Estabrook, of Omaha, Neb., daughter of Hon. Experience Estabrook, a prominent lawyer of that city, who was formerly attorney-general of Wisconsin and United States attorney for Nebraska.

The Mutual Union Telegraph Company was brought to Chicago in 1880, and for three years was operated as an independent company, with offices at the corner of Washington and LaSalle streets. Its general superintendent in this city was E. R. Chapman, now of New York, who filled that position until the company was consolidated with the Western Union. In August, 1885, John McRobie, the present superintendent, assumed charge, and is now the company's manager at this point. Originally the company had seventy-five operators at the Chicago office. Up to 1883, the Mutual Union was an independent corporation, but in that year it was merged with the Western Union, although it still retains a distinctive organization.

There are two principal offices in Chicago,—at the corner of Washington and LaSalle streets and at the Grand Pacific Hotel. The company has about fifty points of direct telegraphic communication and twelve branch offices in Chicago.

JOHN McROBIE, general superintendent at Chicago of the Mutual Union Telegraph Company, has been identified with the telegraphic interests of the United States and Canada for over eighteen years, and a resident of Chicago since 1874. Mr. McRobie is a representative of the great Scotch family of McRobie, or Robertson, and was born at Montreal, Canada, on February 14, 1856, the son of John and Catherine McRobie. He received his early education in his native city, and the rest of his life has been spent in his business life as general utility boy in the office of the Montreal Telegraph Company, where he remained for four years, during that time having become an operator. He then went to Toronto, and became an operator for a short time in the Toronto Union Telegraph Company; the following year came to the United States. He located first at Grand Rapids, Mich., where, for eight months, he was operator for the Western Union Telegraph Company, and, later, at Detroit, in a similar capacity. In March, 1874, Mr. McRobie came to Chicago and was two months in the Western Union and eight months in the Atlantic & Pacific offices. He then returned to the employ of the Western Union, with which company and the Mutual Union he has since been connected. In 1880, he was sent to Peoria, Ill., as manager of the Western Union office at that place, a position he filled for three years; previous to which time he was chief operator of the company's Chicago office. In 1883, Mr. McRobie returned to this city, and entered the general offices of the company as cashier and money-order agent, which position he filled for eighteen months. In August, 1885, he was given charge of the Mutual Union, and became superintendent of that company. In the varied offices of responsibility and trust he has filled, Mr. McRobie has evinced fine executive ability, intelligence and integrity. He was married, in 1880, to Miss Susan L. Musgrove, of Chicago. They have four children,—Isabel, Bessie, Susan and John.

The Postal Telegraph and Cable Company opened business in Chicago on August 1, 1883, at No. 94 LaSalle Street, its present office, L. D. Parker being manager and general superintendent of the Western Division. This company was the first in the city to establish cheap and uniform tariff rates to different points,
giving about double the word allowance that had previously prevailed. The lines of the company were constructed of large copper wires, and its equipment was among the finest in America. In June, 1884, the Bankers' and Merchants' Telegraph Company opened at No. 144 Madison Street. It went into a receiver's hands, was re-organized as the United Lines Telegraph Company, and is now being operated by the Postal Company at its offices. Among the owners of stock in the United Lines Company are various wealthy capitalists, who control the Commercial Cable Company, with which the Postal has direct connection. The Postal has five branch offices in Chicago. Its present superintendent is Leander D. Parker, its assistant superintendent is Edgar S. Patten, and its cashier is William H. McMillan.

Leander D. Parker, general superintendent of the Postal Telegraph Cable Company, has been prominently identified with the telegraphic interests of the country for over a quarter of a century, and in all its varied branches has filled many positions of importance and responsibility during that time. Mr. Parker was born at Montreal, Canada, in 1837. When he was two years old his parents moved to Medina County, Ohio. In 1846, the family located at Ashland, in that State. There he received a common-school education and became a student of telegraphy on the old Wade line, which was connected with the Western Union. In 1850, he began a service with the latter company which was continuous for nearly thirty years. In January, 1862, Mr. Parker removed to Quincy, Ill., and for seven years was manager at that place for the Western Union. He was also in the military telegraph service connected with the Army of the Tennessee, for some time, and in 1869, came to Chicago where he was engaged in the general office of the Western Union. Here he filled various lines of service, being promoted to the assistant superintendency in 1880. In 1881, he left this position, and for a year was assistant general superintendent of the Mutual Union. In 1882, he went to New York, where he was connected with the Western Union for its inception, and built the western end of the line in the fall of 1882. After that completion, he was made general superintendent of the Western Division, not only of the original line but of all lines since incorporated into the system. His long experience in the field, practically and in a managerial capacity, has entitled him to distinction in the service, and at his present post of duty he is regarded as a progressive representative of its interests.

The Gold and Stock Telegraph Company, of New York, was organized in that city with $10,000,000 capital. In the summer of 1871, a branch office was established in Chicago, and the necessary instruments of the line for furnishing printed, instead of tissue-paper written reports were brought here about the time of the great fire. These were saved from the general conflagration, being stored in the vaults of the Merchants' Insurance Building on LaSalle Street. The line was re-built immediately after the fire, and an office opened at the corner of Washington and Canal streets. In 1872, the offices were removed to the Central Hotel on Market Street, where they were located for a year, when they were removed to the present quarters of the company, in the Union National Bank Building. Since 1882, the wires of the company have been controlled by the Western Union and are now considered a department of that system. There are one hundred and seventy-three instruments in the circuit, which employ eleven people and furnishes two branches of reports,—the quotations of the Chicago grain markets and those of the produce of the country, and the reports of the New York Stock Exchange.
quite a large fortune. In 1863, Mr. Wood sold out his business, deposited the bulk of his means with Ward Bros.' bank in Rochester, and went to Iowa to invest in lands. On the eve of purchasing, and after making a $1,000 deposit on some real estate, a telegram from his brother in the East informed him that he was a pauper, the bank at Rochester having failed totally. He immediately came to Chicago, and, undaunted by his financial losses, went to work for the Western Union, entering a service which has lasted twenty-three years, during which time he has never missed a day's work. He was first put on line work, and in 1881 was made agent of the God and Stock Telegraph Company, as inspector Receiver of lines and all work from the inception of the enterprise, being the first agent appointed who devoted his time exclusively to the office of the company. Mr. Wood is regarded as a man of high personal integrity. His name came to this city by the marriage in Winning County, N. Y., in 1861, his wife dying in 1871. He was married again, in 1874, to Miss Annie E. Thoresen, of Racine, Wis.

**TELEPHONE.**—In April, 1881, the Chicago Telephone Company bought out the Bell Telephone Company of Illinois and the American District Telegraph Company, and consolidated the Bell and Edison systems in one. The business was started in July or August, 1885, by the Bell Telephone Company of Boston, Massachusetts, of which H. H. Eldred was the agent. About the same date, the American District Telegraph Company began to put out telephones under the Edison patents. General Anson Stager was president and L. B. Firman the general manager of this company. On January, 1879, the Bell Telephone Company of Illinois was organized to buy the business created by the Boston company.

The first president of the Chicago Telephone Company was General Anson Stager, the first vice-president Norman Williams, and the general manager C. N. Fay. At the present time, April, 1886, there are about five thousand telephones in operation on exchange lines, private lines and municipal lines. The Bell, Edison, Blake and Berliner patents are used. The president, General Anson Stager, died in 1885, and the officers for 1886 were Norman Williams, first vice-president; C. N. Fay, second vice-president and general manager; and R. C. Wetmore, treasurer.

**The Inter-State Telephone Company.**—The Inter-State Telephone Company was organized in Chicago in 1881 by Charles Whitlock, under the patent of George M. Hopkins, of Brooklyn, N. Y. Messrs. Blake, Edison, Bell and others, have invented and perfected instruments which have, to some extent, been commercially successful, but the full measure of public expectancy has been fully realized by Mr. Hopkins's invention, as it is a loud speaker and is capable of transmitting speech over as great distances as the telegraph instrument. The Bell patent describes an apparatus, the object of which is the transmission, simultaneously, of two or more musical notes or telegraphic signals, along a single wire, in either or both directions, with a single main battery for the whole circuit, by means of an undulatory current of electricity, in contradistinction to an intermittent or pulsatory current. This theory has been exploded by Mr. Hopkins's patent, which conclusively proves that articulate speech can be transmitted by intermittent and pulsatory currents, and that clearer and better enunciation can be obtained without the serious annoyances of induction. The Hopkins instrument is vastly superior to all others now in use, and the practical demonstration of its effectiveness has done away with all controversy. Its simplicity of construction, superior advantages in being adapted to long or short distances, small number of calls to overcome induction, sensitiveness, extreme cheapness, perfection in switching and general effectiveness, place the Inter-State Telephone Company beyond all rivals, and makes it one of the best systems in the world.

**CHARLES WHITLOCK,** general manager of the Inter-State Telephone Company, son of Salmond and Sarah G. Whitlock, was born at Plymouth, Conn., November 12, 1826. He received a liberal education in the schools of his birthplace and remained at home assisting his father in the manufacture of agricultural implements and machinery until he reached his majority. He then entered the service of the government during the Rebellion, and, as inspector Receiver of lines and all work from the inception of the enterprise, being the first agent appointed who devoted his time exclusively to the office of the company, being the first agent appointed who devoted his time exclusively to the office of the company, being the first agent appointed who devoted his time exclusively to the office of the company. Mr. Wood is regarded as a man of high personal integrity. His name came to this city by the marriage in Winning County, N. Y., in 1861, his wife dying in 1871. He was married again, in 1874, to Miss Annie E. Thoresen, of Racine, Wis.

**F. K. GODINE MOSS,** secretary of the Inter-State Telephone Company, was born in Chicago, Ill., in 1853. He passed through the public schools of his birthplace, afterward finishing by a collegiate course. He then engaged in the hardware business, subsequently entering the employ of Carter, Quinlan & Co., dry goods, with which he remained, until the end of that time he went on Wall Street, but in the following year (1862) came to this city and engaged with Hart, Aston & Co., as manufacturers, which firm afterward became Hart, Bradley & Co., with whom he continued twenty-four years. His connection with that firm was at first in the capacity of assistant bookkeeper, from which position he was advanced to the responsible duties of chief bookkeeper. In 1885, he became secretary of the Inter-State Telephone Company, and since has been identified with its interests. He is well known in financial and business circles, is regarded as a thoroughly reliable business man in every respect, and is especially fitted for his present position. Mr. Moss was married on May 12, 1865, to Miss Laura Hazlelet, daughter of Robert M. Hazlelet, of Philadelphia; she has since deceased, leaving him a son, Frank H. His marriage to Miss Cora F., a daughter of Marvin C. Sherman, one of the old outside settlers of Chicago, occurred on June 14, 1871. They have four children.—Emma B., Marvin S., Grace D. and May Belle J.

**Electric Lights.**—Since the application of electricity for illuminating purposes and the successful operation of the electric light, many companies have been formed in Chicago to introduce the electric lighting system under various patents. The first electric lights introduced were of the Edison patent, and were put in use in 1880, by Willoughby, Hill & Co., Potter Palmer and John B. Drake; in 1881, by J. A. Hamlin; and since that time the principles of the business have been adopted by many companies and public institutions have adopted electric lights, The County Court House and City Hall were fitted up with electric light plants in 1885.

One of the first local companies to apply for a charter and permission to extend their wires through the city was the Brush Light Company, using the Brush patents. The entrance of electric light companies was opposed by the old gas light companies, and it was charged that the electric light wires were dangerous to human life, property, besides, a fruitful source of crime. The Council finally granted the Brush Light Company, the chief promoters of which were Jesse Spalding and Robert Law, the right to suspend their wires from buildings. This privilege was afterward withdrawn, and the company directed to place its wires underground. About this time the Western Edison Electric Light Company applied to the Council and received a charter to introduce its system. Charges of bribery in connection with the action of the Council in reference to electric light and telegraph franchises were made, and much ill-feeling between rival companies was created. The Brush Light Company has not been able to date
(January, 1880) to secure a franchise under which they could operate, and while the company is still in existence it has not carried on business. The parent Brush Light Company of Cleveland has a branch here, Alexander Kemp being the manager.

The Van Depoele Electric Light Company was organized in 1886, and in 1884 was re-organized, becoming the Van Depoele Electric Manufacturing Company. The officers are John J. Sleeper, president; W. J. Durham, secretary; Aaron K. Stiles, manager; Charles J. Van Depoele, electrician. There are about five hundred arc-lights of the Van Depoele system in operation in Chicago, and upward of one thousand in other towns, principally in the West.

On the evening of December 31, 1885, the tower of the new Board of Trade was illuminated by one of the most powerful lights ever devised. The corona, or circle, to which the lamps are attached is twenty-nine feet in diameter; there are twenty lamps, each of 2,000-candle power, giving the light a total intensity of 40,000-candle power and a radiating center of over thirty feet, at a height of three hundred feet above the earth. The lights are of the double carbon pattern, and burn for fifteen hours. The electric current is supplied by a twenty-five ampere of twenty-nine amperes, which requires for its motor about one-third of the sixty-horse power Board of Trade engine, which gives a speed to the dynamo of 725 revolutions a minute. This great light illuminates a large area of the city, and can be seen at a distance of sixty miles. The light is the conception of Elmer A. Sprey, and is of the Sperry pattern. Its erection and maintenance was the joint project of Mr. Sprey, George J. Brine, Edmond Norton, and E. Nelson Blake, of the Board of Trade Directory, and R. W. Worthington, then secretary of the Real-Estate Board.

The Sperry Electric Light and Motor Company furnish the light, the Board of Trade the power, and the balance of the cost of maintenance is made up by contributions from surrounding property-owners.

The Western Edison Light Company of Chicago was incorporated on June 1, 1882, under the laws of Illinois, with a paid-up capital stock of half a million dollars. The president of the company, until his death in 1885, was General Anson Stager. The other officers were John M. Clark, vice-president; S. F. Gorton, treasurer; D. H. Loudonback, secretary; George H. Bliss, general superintendent; and P. D. Johnston, engineer. The organization owns territorial rights in the States of Illinois, Wisconsin and Iowa, under the various Edison patents for electric lighting. The business, which is extensive and increasing, consists in building plants and establishing local companies to furnish electric lights. Among others, prominent central station plants have been introduced in Des Moines, Iowa, Appleton, Wis., and Elgin, Ill. Of isolated plants some twenty-five thousand lights have been placed since the organization of the company; among those in Chicago, may be mentioned the retail stores of Marshall Field & Co., and Mandel Bros., the First National Bank, Columbia Theater, Pullman Building, McVicker's Theater, the County Hospital and the New Board of Trade. In Milwaukee, Wis., isolated plants have been established at Best's brewery, the Plankinton House, the Milwaukee & St. Paul Railway shops, and Sanderson's flouring mills. At Elgin, Ill., a similar lighting system has been provided at the Asylum for the Insane, also at the Penitentiary at Anamosa, Iowa, and at the Iowa State Agricultural College.

Also three large Pillsbury flouring mills, at Minneapolis, Minn., have been provided for.

George Harrison Bliss, general superintendent of the Western Edison Light Company of Chicago, was born at Worcester, Mass., on May 12, 1849. In early youth he attended the Western schools. Coming to Chicago in 1868, he entered the public schools, finally entering the high school, where he pursued his studies until the spring of 1868, when, a few months before the date he should have graduated, he was taken sick and compelled to enter the hospital. After a few months of sickness and during that year and the two following he pursued this vocation at Dixon and Aurora, Ill., and at Muscatine, Iowa. In 1862, he returned to Chicago to engage in a telegraph office, the Illinois & Mississippi Telegraph Company. Here he remained some six months, when he entered the office of the general superintendent of the Chicago & North-Western Railway. He remained in this service, and jointly in that of the Western Union and North-Western Telegraph companies, until the spring of 1873, acting most of the time as the superintendent of all the telegraph lines on the Chicago & North-Western Railway, and as superintendent of the North-Western Telegraph Company's line in Lake Superior. In the meantime he had established the firm of Bliss, Tillottson & Co., for the manufacture and sale of electric goods and apparatus in Chicago, the first important establishment of the kind in the city. In 1873 he resigned his position in connection with the railroad and telegraph companies, in order to look more closely after his private interests, and for several years following was connected with the firm of George H. Bliss & Co., the Western Electric Manufacturing Company, and with the manufacture and sale of the various inventions made by Thomas A. Edison. In 1879, having left the city, he went to Florida, and during the winter months, in the fall of 1880, he was in the western agent of the Edison Electric Light Company; and when the Western Edison Light Company was organized in 1882, he became the general superintendent, continuing in such office ever since. Mr. Bliss was married on December 19, 1864, at Worcester, Mass., to Miss Mary M. Gilbert, of that city. They have four children,—Grace Ethel, Julian Perrin, Gilbert Ames, and George Edison. Mr. Bliss is a member and deacon of the Plymouth Church and superintendent of the Home Sunday-School.

P. D. Johnston, chief engineer of the Western Edison Light Company, was born at Alexandria, Va., on July 3, 1855, and is a member of the Reuben and Mary (Lodwick) Johnston family. His mother was a daughter of Colonel LeGrand of the United States Army. He attended school at Alexandria and received his technical education under a special tutor, devoting most of his study to scientific engineering. In order to perfect himself in the mechanical department of his studies, he spent three and one-half years in a railway repair-shop, in a blacksmith shop and in the pattern department of a foundry, thus acquiring a practical knowledge of the theories to which he had given a large amount of application, and in leaving the machine shops, he sailed on the steamship "Georgia," one of the vessels of the Clyde line, as officer and assistant, and served in that capacity for six months, when his ability received substantial recognition from the company, and he was appointed assistant superintendent of the boats of this company. They at that time possessed seventeen ships in the fleet. He occupied the position of assistant engineer for five years. He then left the employment of the Yale Lock and Manufacturing Company, and was employed in the drafting department, making plans of their heavy hoisting machinery, remaining with them for fifteen months. He then joined George H. Mallory, consulting engineer of New York City, and assisted him in the construction and erection of the large grain elevator in Brooklyn, the largest in the world, and which is known as Dow's Stores. After the completion of this work, he joined the Edison Company, and as agent of the New York company was associated with Mr. Bliss; shortly after that, the present company was formed, and he accepted his present position. Mr. Johnston was married on November 20, 1883, to Miss Jessie Elliott, of New York City, a daughter of Dr. A. G. Elliott.

The Western Electric Light Company has made an enviable reputation by the excellence of its manufactures and the superiority of the light generated by its machines. Its business is augmenting year by year, and its output creates a satisfactory advertisement for the company wherever it is introduced.

John Ross Gunn, of the Western Electric Light Company, Nos. 227-231 South Clinton Street, Chicago, was born at Bradford, Ont., on September 4, 1857. His parents, Alexander J. and Jane (Sutherland) Gunn, were of Scotch descent, his father having been born in Helmsdale, Caithness, and although his mother was a
native of Bradford, Ont., her ancestors were of Scotch origin. Mr. Gunn's grandparents on his mother's side came through the territory of Michigan, with the celebrated "Selkirk Expedition" in 1812, and crossing Lake Superior in open boats, with an Indian for guide, ultimately settled in Canada. His grandfather Sutherland died at Bradford on November 23, 1883, at the remarkable age of one hundred and one years. Mr. Gunn's grandfather on his father's side came direct from Scotland, and settled in West Williamsburg, near Bradford, with only five sovereigns in his pocket and his memory of his father, but, by perseverance, he became quite wealthy. He died in August, 1883, at the age of eighty-seven years. Mr. Gunn in his youthful days attended the public schools of Toronto, Canada, receiving an ordinary education. After leaving school, he went to Michigan, and engaged in the steam-fitting business for two years. He then went to Buffalo, N. Y., where he resumed the steam-fitting trade for three years. He came to Chicago in September, 1880, and engaged with the firm of Barker & Co., steam-fitters on Jackson Street, with whom he remained for two years. In September, 1883, he entered the employ of the Western Electric Light Company, where he is now engaged in the manufacture of electric light armatures. Mr. Gunn was married, in 1882, at Geneva, Ill., to Miss Ella Imogene Vandeventer, of New Jersey. Mrs. Gunn is of Holland extraction, her ancestors springing from noble lineage. Her grandparents took a very prominent part in this country in the Revolutionary War. Mr. and Mrs. Gunn have one son, Bruce, named after Robert Bruce of Scotch renown. Mr. Gunn devotes all his spare time to the pursuit of scientific works, and is possessed of scientific tastes. Although not long resident of the city, he still intends to identify himself with all its interests and improvements, and by his courteous and liberal disposition, is rapidly securing many warm friends and acquaintances.

The Chicago branch was established on January 1, 1885, and is located at No. 53 Wabash Avenue, in charge of W. C. Temple. There are other branches in Minneapolis, Detroit, Cincinnati, St. Louis, and New York, all under the direct control of the Milwaukee house. The company make recording voltmeters, current regulators, telethermoscopes, electro-plating machines and other electrical supplies. Their specialty is the manufacture of an electro-pneumatic valve, the invention of Professor W. S. Johnson. This device has numerous applications, the most important of which is in regulating the modern steam-heating apparatus. It is also applicable to heating systems by hot water and hot air, and for the regulation of ice machines. By its use, dry-kilns may be kept at any desired temperature; steam whistles may be blown at any distance, by touching a press button; inaccessible windows, ventilators and traps opened and closed at will; tank pumps arranged so that the pump will either slow or stop when the tank is full, and start when the water subsides a few inches; and many other applications where it is undesirable to leave the regulation of valves to the volition of any one. The force required to operate a valve is received from the stored energy of compressed air Operating directly upon a piston or its equivalent. The electricity employed has only the duty of admitting or releasing the compressed air from the chamber that operates the piston. The compressed-air storage tank is re-charged by a small air-pump working automatically by water pressure. Having determined the degree of temperature required, it is only necessary to set to a corresponding figure a little wall instrument known as the thermostat. When the apartment reaches this temperature, the electric current passing through the thermostat is closed, and the electro-pneumatic valve allows the compressed air to enter the diaphragm valve, and shut off the steam, hot air, circulation of hot water, or whatever may be the source of heat. The temperature begins to fall, and by the time it has gone down less than one degree Fahrenheit, the electric circuit is broken and the valve opens.

William Chase Temple, the manager of the Chicago branch of the Milwaukee Electric Manufacturing Company, was born at Starke, Fl., on December 28, 1850. He received his education in the Delaware State Normal School at Wilmington, where he was graduated in 1878. From school he went to Milwaukee, Wisc., where, for a short time, he was employed in the packing house of Plankinton & Armour. Thence, he went into Michiel's Bank of that city, remaining there as assistant bookkeeper until 1881, when he returned to Florida, and in the town of Temple, founded by his family, engaged in general merchandise business on his own account. In 1883, his place of business and stock were destroyed by fire. He then became manager for the extensive Florida estates of Alexander Mitchell of Milwaukee, with his offices at Jacksonville. When the Milwaukee Electric Manufacturing Company, late in 1883, decided to open a branch in Chicago, Mr. Temple was invited to assume its management, and in January, 1885, he came to Chicago for that purpose. Mr. Temple was married, on April 13, 1885, to Miss Carrie Lee Wood, of Chicago. He is a member of Bradford Lodge, No. 42, A.F. & A.M., of May Lodge, No. 10, I.0. of O.F., of Oseola Tribe, I.O.R.M., all of Florida, and of Washington Camp, No. 1, P.O.S. of A., also of Florida,—being the first president of the first camp of that order established south of Mason and Dixon's line.

The Electric Supply Company of Ansonia, Conn., has an extensive branch establishment at Nos 175 and 177 Lake Street. The company was incorporated under the laws of Connecticut, on April 5, 1886, the original officers being Thomas Wallace president, and J. B. Wallace secretary and treasurer, the original capital stock being only $5,000. This was soon increased to $58,000, and Thomas Wallace, Jr., became general agent and Thomas W. Bryant superintendent, the works and main office being at Ansonia. Although a stock company, the concern possesses the advantage of being practically a branch of the extensive house of Wallace & Sons, of Ansonia, Conn., manufacturers of brass and copper goods. Hence, the company are able to carry a larger stock of goods and do a larger business than the real capital stock of the company would warrant. They make and sell all sorts of electrical supplies, both for telephonic and telegraphic purposes, together with all the electric appliances for business and domestic purposes. The Chicago branch was established, on January 1, 1885, in charge of Franklin S. Terry as manager. There is also a branch at No. 17 Dey Street, New York.

Franklin Silas Terry, the manager of the Chicago branch of the Electric Supply Company of Ansonia, Conn., was born in that place on May 5, 1862. He received his education in the graded schools and the high school of his native city, where he was graduated in 1880. He at once entered the service of the Electric Supply Company. When it was determined to open a branch in Chicago to supply the western market, Mr. Terry, although a young man, had made himself so valuable to the company in his four years' service, that he was selected for this responsible position.

The Electro-Magnetic Company, of Chicago, was organized in 1879, under the corporate laws of the State of Illinois, with a capital stock of $10,000. The officers are W. G. Foster, president, and J. C. Cushman, secretary, treasurer and general manager. The company's main office is at No. 205 Clark Street, and its factory at Evanston. They make a peculiar variety of electro-magnetic pads and plasters for curative purposes. The electro-magnetic action claimed is said to be due, not as is usual, to any arrangement of metallic discs, but to a certain metallic compound forming the body of the pad in which the electric action is set up, the formula for which is not made public. These appliances, it is claimed, possess valuable remediial properties, and have a large sale. The company has

John Clark Cushman, secretary, treasurer and general manager of the Electro-Magnetic Company of Chicago, was born at Fort Covington, N. Y., Oct. 16, 1833. He is the son of Robert N. Cushman of that town, and grandson of Silas Cushman, who settled in Northern New York in 1790. Mr. Cushman is a fine descendant of Rev. Robert Cushman, one of the pilgrims of the Mayflower. On his mother's side he is the grandson of Dr. Clark, an eminent surgeon in the English navy. As a youth he went to the school and academy in his native town, and at the age of sixteen went to work in a country store. At nineteen he went to Oswego, N. Y., and commenced business for himself in the book and newspaper trade. After a year he sold out and entered in the "Yankee notion" line in Oswego, until 1855, when he removed to Chicago and entered the service of the Galena & Chicago Union Railroad. At the end of the year he was induced to go to Tyner City, Ind., when he entered into a copartnership with his uncle in the lumber business. This proved a good move, and Mr. Cushman continued in the business until 1857, when, having been elected clerk of the Circuit Court of Marshall County, he moved to Plymouth, the county seat, and held the office until 1871. In the meantime, in 1856, he had been elected secretary and director of the Plymouth, Kankakee & Pacific Railroad, a position he held until 1873, when the road went into receiver's hands. In 1857, Mr. Cushman purchased the road at market's sale, as trustee for the bond-holders. It was afterward reorganized as the Indiana, Illinois & Iowa Railroad, and Mr. Cushman was secretary of that company until 1853, when the office of the company was removed to New York. He is now secretary of the Illinois, Iowa & Western Railroad. In 1851, just after the fire, he entered into partnership with Cameron, Amberg & Co., stationers of Chicago. This partnership expired in 1852. In 1875, Mr. Cushman found his Chicago interests necessitated his presence here, so he removed his family to Highland Park, which has since been their home. He is one of the directors and stockholders of the Chicago Anderson Pressed Brick Company. He is also a director in the Chicago Underground Sectional Telegraph Company, of which Professor Elisha Gray is president. Mr. Cushman was married, in 1856, to Miss Ellen S. Rissel, of Franklin County, Mass. They have one child, Lilian S. He is a member of A. O. F. Lodge, No. 676, A. H. A. O. O. D., Highland Park, and has been master of the lodge for five years. He belongs to Evans Chapter, R.A.M., of Evanston; was Prelate of Apollo Commandry, K.T.; and is Ill. G. Prior of Oriental Consistory, S.P.M.S., 32°.

EXPRESS.

AMERICAN EXPRESS COMPANY.—At the time of the great fire, the American had its headquarters at the corner of Lake and Dearborn streets. Charles Fargo was at that time vice-president and general manager of the Western Department, and Oliver W. Barrett was its Chicago Agent. The building destroyed was rebuilt for the company, but was not suited to its augmented requirements. After the fire, temporary quarters were secured at Twenty-second Street and Wabash Avenue, and a little later at the corner of the latter thoroughfare and Harmon Court. In 1877, the company occupied a portion of the new building at the corner of Washington and Clark streets, and the ensuing year moved into the elegant and commodious structure they have since occupied, at Nos. 72-78 Monroe Street. This edifice is of stone, is the finest of its class in the West, and cost over half a million of dollars. In 1885, the company erected a new freight warehouse, at the corner of Van Buren and Market streets.

The official ensemble of the Chicago branch of the enterprise is now the same as in 1871, the Western manager being Charles Fargo, and the Chicago manager is Oliver W. Barrett. The company controls and operates seventeen branch offices in Chicago.

Charles Fargo, vice-president of the American Express Company and general manager of all its business west of Buffalo, N. Y., is a member of the celebrated Fargo family of Orendaga County, N. Y., which has given to the country three of its representative business men, William G., James C., and Charles Fargo, whose labors and successes in the field of express transit read like a romance, and yet were prolific of the most abundant practical results of profit and benefit to the community. In the days, through the War, business disasters, panic and competitive opposition, each member of the family has in turn arisen from the ranks to the proudest position. Mr. William C. Fargo, and his son entered the offices of the American Express Company, inaugurated a service of nearly half a century's duration. In 1851, he was sent to Detroit, Mich., remaining there two years, removed to New Orleans, La., where he was president of some small city, and in 1856 returned to Detroit, where his ability was recognized by his being made superintendent of the offices in that district. In this capacity Mr. Fargo proved so faithful and so capable that his experience and progress is comphratic with the history of the State. Personally he established the Lake Superior Express, an enterprise which reached an isolated district, and, in behalf of the company, he represented the firm at all places on which Wells, Fargo & Co. have done for California.—encouraged producers to ship at reduced rates; employed railroad, marine and stage-coach facilities to reach all available points; and so economically and advantageously furthered the business that it has succeeded so far to carry its freight to any part of the United States at a lower rate than can be offered by any other company. He superintended the Western Division, and later the Eastern and, in 1885, assumed the Eastern general superintendentship of the business of the company. Mr. Fargo here manifested the same energy and activity which had signalized him in every one of his undertakings. When James C. Fargo succeeded his brother, William G. Fargo, as president of the company, Charles Fargo was made vice-president and general western manager of all business west of Buffalo. Mr. Fargo, in the prime of a useful and honorable career, enjoys the respect and esteem of his business associates and a large circle of friends. He was married at Cooperstown, Otsego Co., N. Y., in 1856, to Miss Mary J. Bradford. They have one son, Livingston W., and three daughters, Florence and Fanny. Oliver W. Barrett, agent of the American Express Company at Chicago, has been connected with this corporation in an important and progressive capacity for nearly a quarter of a century, during which time he has been in the discharge of his duty with the same zeal and fidelity that have characterized the business of the company. He had signalized himself by his success in the business of the express company, and when James C. Fargo succeeded his brother, William G. Fargo, as president of the company, Charles Fargo was made vice-president and general western manager of all business west of Buffalo. Mr. Barrett has been the first to introduce new facilities on what Wells, Fargo & Co. have done for California,—encouraged producers to ship at reduced rates; employed railroad, marine and stage-coach facilities to reach all available points; and so economically and advantageously furthered the business that it has succeeded so far to carry its freight to any part of the United States at a lower rate than can be offered by any other company. He superintended the Western Division, and later the Eastern and, in 1885, assumed the Eastern general superintendentship of the Illinois Division. Two years later he was made agent at Chicago for the company, a position he filled for nine years. In 1852, he became incidentally acquainted with E. D. Lathrop, a prominent merchant and manufacturer of Conway, Mass., Mr. Lathrop was the commercial counsel of the company. Mr. Barrett evidenced a rare degree of intelligence and ability, and engaged him to aid him in his business enterprise in New England. With him he remained for one year, and then, at Beloit, Wis., entered the employ of the American Express Company on behalf of E. D. Murray, the agent at that place. Shortly afterward, John A. Mott, superintendent of the company, becoming impressed with his business talents, transferred him to the Chicago office, under the general superintendent of James C. Fargo. In the spring of 1854, Mr. Barrett began a service in the local interests of the company which continued for eighteen years. He was clerk in the main office, but in 1861, was appointed superintendent of the Illinois Division. Two years later he was made agent at Chicago for the company, a position he filled for nine years. In 1852, he engaged in the wholesale grocery business at the corner of Wabash Avenue and Lake Street, operating the firm of F. W. Farraggott & Co., his partner being William F. Kellogg, of this city. In March, 1852, he abandoned commercial life, and returned to the service of the express company. Here he at once made his enterprise conspicuous by being connected with the money-market of the city in the West. In January, 1854, he was made general agent of the company, which position he still holds. Mr. Barrett was married in 1855, to Miss Osborn, daughter of Hon. S. S. Osborn, of Painesville, Ohio. Mr. Barrett is well known in this city, and has been a representative resident for so many years, and where he is highly esteemed for his business integrity and his social characteristics. A veteran, as the service of the company shows, in which he is the manager at this place, its remarkable growth and marvellous development of the city's resources have been contributed by his individual effort, cultivating in a position of rare loyalty and responsibility.
Company at Chicago, is one of the pioneers in western newspaper and express business in the city, having come almost at its foundation.

He was born at Stone Ridge, Ulster Co., N. Y., in 1836. In June, 1849, he came West with his parents, who located on a farm near Hinsdale, Cook Co., Ill. In the ensuing year, the family moved to California, and thence back to Illinois, settling in Chicago, November, 1850, and in 1854, the family took up a permanent residence in Chicago, the son completing his education here. In 1855, Mr. Wygant entered the employ of the American Express Company, as mail deliverer. In those early days of the express business, money packages were delivered from a bag carried by the messenger from store to store, and for eight years Mr. Wygant performed this service. In 1862, he was advanced to the position of money-delivery clerk in the office of the company. Later he became an employee of the Western Union Telegraph Company and the Merchants' Union Express Company. In 1870, the same company consolidated with the latter, and Mr. Wygant returned to his old post of duty. In 1884, he was made assistant agent of the company, a position he now fills. This record of long service is shared by but few employes of the company, and Mr. Wygant's experience in the express business has entitled him for the important position he now holds. Although a young man, he is a veteran in the service of the American, like the Fargos themselves. He is esteemed as a most valuable and reliable business man by his associates, and may be taken as an example of the reliable and pleasant social attainments. Mr. Wygant was married, in 1863, to Miss Apphla B. Frost, of this city. They have one child, named...

JOHN R. FLOYD, cashier of the American Express Company, has occupied an important and responsible position in the employ of that company since 1864, and has been a resident of Chicago for over twenty years. For a long time he was a member of the same firm and the original company's Penny Post he probably did more to suggest a valuable collection auxiliary to the postal service than any man of his time. Mr. Floyd was born on December 3, 1837, near Pittsburgh, Penn., where he received the rudiments of a practical education. Then he went to work, as the family called it, to develop a plan he had formed for the cheap delivery of letters on a new stamp system. The scheme involved the prompt delivery of all letters intrusted to the care of his critics, in any part of the city, for one cent, and was a popular and convenient means of mail transmission at that time. In 1841, Mr. Floyd sold out the enterprise, to enter the Army. He was a member of the famous Ellsworth United States Zouave Cadets, being one of the first nine to join the company, which consisted of seventy-five members, and was commanded by the heroic Colonel Ellmer Ellsworth, of Chicago. Mr. Floyd was killed at Alexandria, Va., while attempting to raise a Confederate flag at that place. Of the original company, only twenty-two members are now living. Mr. Floyd continued in the service of the company until it was disbanded and merged into the regular army service. He was then employed in the State, and sent to Camp Butler, near Springfield, Ill., which was then the rendezvous of organization for all State regiments. There he was engaged in drilling infantry troops, but being anxious for the field of the war broke out. He was first stationed in the field of the war, and began a military career which was continuous until the fall of 1864. He was with both the Army of the Potomac and of the West, and was captured at Harper's Ferry in 1862, placed on parole for four months, and then exchanged. He returned to the service in the Army of the Ohio, and went through the Atlanta campaign with General Sherman. He entered the service as lieutenant, and when mustered out was captain of Co. E. After the close of the War, Captain Floyd returned to Chicago, and in December, 1864, entered the service of the American Express Company as corresponding clerk. On January 1, 1865, he was appointed assistant post of duty of Chicago, Ill., and in 1867, to Miss Nettie Kelly, of this city. They have one child, a daughter, named Laura. Mr. Floyd is a man of high personal integrity and business qualifications, and enjoys the confidence and esteming of his employers and associates, as of the community, and he has been a useful and representative citizen.

ADAMS EXPRESS COMPANY.—The Chicago department of this company has no history as an incorporated branch of the express service anterior to 1878. At that time, Anson Gorton was general agent of the Western division, with headquarters at Columbus, Ohio, controlling business over the Pittsburgh & Fort Wayne Railroad. Chicago was in his district, and on March 1, 1870, he appointed John L. Hopkins as the first manager of the company in Chicago. In 1872, Mr. Hopkins resigned, and, by special request, Mr. Gorton assumed charge of the office for a short time. In 1873 he was absent from the office for eleven years, resigning on September 1, 1883, and being succeeded by Francis X. Donahue. In 1884, William W. Chandler, Jr., was appointed agent of the company, the business increasing materially under his supervision. At the time of the fire of 1871, the Adams had its office on Dearborn, near Randolph Street, and immediately after that event secured the building No. 57 West Washington Street, at an annual rental of $7,000. Fourteen months later the offices were transferred to No. 131 Dearborn Street. In 1878, a removal was made to Madison Street, five years later to Fifth Avenue and Madison Street, and in 1884 to the old Dearborn Street location. In July, 1885, the present building, No. 189 Dearborn Street, was ready for occupancy, and the Adams offices of the company are now there located.

WILLIAM W. CHANDLER, Jr., agent of the Adams Express Company, in this city, has been identified with Chicago since 1868. He is the youngest representative of the express companies filling so important a position. Mr. Chandler possesses rare executive ability and an ability that has been sought for instead of seeking. He is the son of William W. and Lydia De Kelb (Pease) Chandler, and was born on November 21, 1856, at Cleveland, Ohio, whence his parents removed six years after his birth to this city, permanently locating here in 1862. The son received his initial education in a seminary at Hyde Park and at other schools there and at Riverside, at which school town the family resided at various times, and for a period he attended the University of Chicago. His first venture in business was at the age of thirteen years, when he entered the employ of the Star Union Line as clerk, an enterprise of which his father was general manager. The first three years of his service he attended school a portion of the time, but later devoted his attention solely to the duties of the clerkship until 1878. He then entered the service of the Baltimore & Ohio Express Company as express messenger, in charge of a car running from Chicago to the junction, Ohio, a position he filled for one year. In 1880, at the solicitation of H. M. Kinsley, he became the buyer for that gentleman's catering establishment, but its endless details of management made the business distasteful to him, and Mr. Chandler went West, prospecting a year in the Rocky Mountains. Returning to Chicago, he assumed the travelling agency of the Baltimore & Ohio Express Company, taking charge of a route he had filled as express messenger, and for some months was acting agent of the company at that point. Being sent for by Mr. Zimmerman, his old superintendence of the Baltimore & Ohio, and then occupying the same position with the Adams Company, Mr. Chandler discharged his services to the latter company, in September, 1883, acting in the same capacity as with the Baltimore & Ohio Company. In October, 1884, he was appointed acting agent of the Adams at Chicago, a trust made permanent in March of the following year, and an appointment which met with the warm approval of the business men of the city. Mr. Chandler was married, on December 3, 1885, to Mrs. Marianne Bishop Kedington, of this city. Their only child, a boy, died on October 2, 1884. Mr. Chandler for five years was sergeant of Co. "C," 1st Regiment, I.N.G., of which he is still an honorary member. He comes of a family long known to the city, and his brother, Frederick B. Chandler, is private secretary for Lloyd Tevis, president for Wells, Fargo & Co., in California.

JOHN A. ROBERTS, cashier of the Adams Express Company, Chicago, has been with the company through all its twenty-one years, and has filled many important positions in its service during that time. Mr. Roberts was born at Waynesville, Warren Co., Ohio, on April 19, 1841. There he received a practical common school education and in 1862 enlisted in the 186th Ohio Zouaves. For a time he was in the Kanawha Valley with General Crook, and later in the Shenandoah Valley under General Sheridan. Most of the time Mr. Roberts was on detached service in the West, and was in the offices of the company at different two years. He was mustered out of service in 1865, and located at Cincinnati. In July of that year, he entered the employ of the Adams Express Company in that city, in which capacity of more than twenty years' experience in the Cincinnati office, he was transferred to Pueblo, Colorado, where for nearly a year he was the company's agent.
HISTORY OF CHICAGO.

In 1851, he returned to Cincinnati and took the cashier's desk. In October, 1851, he resigned that position, and engaged in farming, but in September, 1855, returned to the service of the company, becoming again postmaster. In 1856, he returned to Cincinnati, in 1869, to Miss Helen A. Kinney, of that city. He had four children.—Marion, Hannah, Harry and Oliver. Mr. Roberts is esteemed as a representative man in his line of official service, and an honorable record in the Express interest and as a citizen of high integrity in the community where he resides.

Andrew J. Mitchell, depot agent of the Adams Express Company, a native of New Jersey, born on December 25, 1831. There he received his early education, and when only thirteen years of age entered the employ of the Adams Express Company in various places in the state. His intelligence, as his abilities, recommended themselves to his superiors, in 1859 he was given full management of the freight department of the company in New York City. Mr. Mitchell then organized the department arrangements at Jersey City that gave to the company an entire rail-connection with the South and West, business previous to that having been conducted by both boat and rail. When the Rebellion broke out, he was detailed by the company to effect arrangements, recruiting promotion to a high and honorable position in the Army, and for about a year and a half he was with General McClellan's command, in the Army of the Potomac. The closing of all other routes on the South except the way of Cincinnati and Louisville, made the former point the great express center during the war, and there Mr. Mitchell was finally stationed, being placed in charge of the freight business of the company. The War was the beginning of a railway connection from the South to the west, and he was assigned to duty in this city, and appointed depot agent, in charge of all affairs pertaining to that important position. Mr. Mitchell's career in the express service has been remarkable for the steady, progressive ability he has displayed, and in the exhibition of important trusts he has evinced a high degree of intelligence, judgment and integrity. He was married, in Jersey City, in 1862, to Ann A. Archibald. They have four children, and Andrew J., James E., Jean A. and John H. One son is engaged in the service of the Adams Express Company.

United States Express Company.—In 1871, this company had its offices at the corner of Lake and Clark streets, and immediately after that event found quarters at No. 61 Washington Street. H. D. Colvin was at that time the Chicago agent, in position here in fifteen years. On December 28, 1872, the offices were removed to the building erected by the company on Washington, near Clark Street. Since then the business of the company has largely increased, and it has six important branches in this city. On September 1, 1885, Mr. Colvin retired from the office he had filled for over a quarter of a century, and became superintendent, Alonzo Wygant becoming the Chicago agent of the company.

Alonzo Wygant, agent of the United States Express Company at Chicago, has been in the continuous employ of that company for almost a quarter of a century, and a resident of this city since it was scarcely more than a village. His long and varied business career has earned him a high and honorable position of trust and responsibility at an early age, and his close association with progressive express interests, so far as form a portion of important express industry and development and history that a brief sketch of his life is interesting. Mr. Wygant is the son of Mr. and Mrs. Wygant, who was born at Ridge, Ulster Co., N.Y., on July 31, 1816. When he was three years of age, his parents removed to Hinsdale, Cook Co., Ill., and in 1840, his father went to California where he died in November of the same year. In 1854, the family removed to Chicago, and here the son received his early education, for many years being a student at the old Washington School, whence he went to the high school in 1861. In 1863, Mr. Wygant entered the employ of the United States Express Company. His first position was that of money controller, from which he was advanced to the desk of chief clerk in 1867. After four years' service in this capacity, he was made assistant cashier in 1871, and immediately after the great fire was given charge of the office of the company at the corner of Washington and Randolph Streets, an office that continued in his charge until in 1872. Mr. Wygant returned to his original duties as assistant cashier at the time of the fire, and in 1873, was made cashier of the company. Eight years later he was appointed assistant agent of the United States and Pacific Express companies. In September, 1875, Hon. Harvey D. Colvin became general superintendent of the company at this point, and Mr. Wygant succeeded him as agent, his long experience and faithful service entitling him to a promotion which was a high token of appreciation of his abilities and integrity. Mr. Wygant is regarded in the community where he has resided for so many years as a progressive and representative citizen. He was married, in 1860, to Miss Caroline S. Aspinwall, of this city. They have one child, a daughter, Elsie Amy.

Benjamin J. Jerome, cashier of the United States Express Company at Chicago, was born at Phelps, Ontario Co., N.V., in 1845. There he lived until he was four years of age, and for the succeeding thirteen years resided and received his early education there. When he was fourteen, his parents moved to Hinsdale, Ill., and several years being stationed in Wyoming Territory and Utah. In August, he returned to Chicago, and, in October, entered the service of the United Pacific Railway Express, at operations at that time being largely conducted there, and for several months being stationed in Wyoming Territory and Utah. In August, he returned to Chicago, and, in 1875, entered the employ of the United States Express Company, first as way-bill clerk, then as extra clerk, later as assistant cashier, and, in July, 1885, as cashier of the company. Mr. Jerome's long and varied experience has made him authority in express matters, and he is esteemed a valuable man in his especial line of duty. He was married in Chicago, in 1879, to Miss Helen M. Johnson, daughter of C. R. Johnson, formerly superintendent of the United States Express Company, and now assistant general superintendent of the Merchants' Union Express Company.

Baltimore & Ohio Express.—This express is a very valuable auxiliary of the Baltimore and Ohio Railroad, and its Chicago agency was one of the first established after the enterprise was organized, and being the western terminus of the line is one of the most important offices of the road. The first agent of the company in this city was John L. Cherry, who opened its offices in the summer of 1877, at No. 83 Clark Street. In the spring of 1882, a removal was made to No. 83 Washington Street, the present offices of the company. John Sloan was the second agent, and was succeeded by J. W. Daniels. In the summer of 1883, Mr. Cherry was re-appointed, and was succeeded by H. E. Witherspoon, who, on January 23, 1884, gave way to Anson Gorton, the present manager, and one of the oldest express agents in Chicago.

Star Union Freight Line.—William W. Chandler, general agent of the Star Union Freight Line, was born at Randolph, Orange Co., Vt., on January 7, 1821. He is one of a family of over twenty, and the success of some of these in the world of business is indeed noteworthy. Hon. J. A. Chandler is general agent of the Chicago, Milwaukee & St. Paul Railway at St. Paul; Albert B. is prominently connected with the Bennett-Mackay Cable Company in New York; Frank H. is a language teacher in music and musical instruments in Brooklyn; and Henry H. is a country merchant in the old homestead in Vermont, where the entire family was born. William W. Chandler was educated at the Norwich Military Academy, succeeding the institution as progressive and representative citizen. He faced the winter. Away back in the "forties," he was offered a position as advance agent for a concert troupe of the Baker family. He declined the offer, however, and took an exacting of the entreaties of his friends, who feared that the results of his venture might prove of little advantage to his moral nature. He started out, and continued at the business for eight consecutive years with different companies in early days, the temperance movement was a greater force than in the other cities, but Mr. Chandler proved himself to his heritage and never once
lost his own respect, while everywhere he went he proved Napoleon in the conquest of the friendship of men. As early as 1859, he visited Chicago, and advertised the Baker Concert Troupe, which appeared in Tremont Hall on January 2, 1851. In 1853, he left "the road," and located at Cleveland, Ohio, where, on the 15th of March, he became fourth clerk in the freight office of the Cleveland, Pittsburgh & Wheeling Railroad, which then had but one hundred miles of road in operation. Within three months he held the position of first clerk, and at the end of two and a half years he was made general freight agent of the company, which then operated two hundred and forty miles of road. Mr. Chandler held the position until June, 1864, when he came to Chicago as general agent of the Star Union Freight Line, the pioneer through-freight business as now carried on. Shortly after coming here Mr. Chandler secured permission from the Pennsylvania Company (which established the new freight auxiliary) to prepare the plan of his own, which was very valuable in the shipment of butter, cheese, eggs and other perishable goods. He called these cars "ice-houses on wheels," and he is unquestionably the pioneer of the refrigerator-car system. Mr. Chandler had not the foresight to patent his idea, which was at once eagerly seized upon by others. Since 1864, Mr. Chandler has been continuously in the service of the Pennsylvania Company as its representative of their Star Union Line, and has charge of the "high-class freight" business between Chicago and Eastern cities in both directions. He is a man of untiring energy, in whom is felt an interest at first sight; in his office the soul of method; listens to the dictate of the millionaire or the complaint of the humblest of his constituents with equal respect and sensitivity, always giving answers with a frankness that commands respect from all. He is thoroughly conscientious, and during his long career has ever maintained an honorable and spotless record. Mr. Chandler has been married three times, the last marriage occurring on August 18, 1881, to Miss Lavinia B. Pendleton, of Boston. He has two sons by his second wife,—William W., Jr., agent of the Adams Express Company of this city, and Fred R., secretary of the Wells-Fargo Company, at San Francisco.

Edward K. Allen, the originator of Allen's City Despatch, came to Chicago on July 12, 1851, and on the first day of October of the same year, established an original enterprise, known as Allen's City Despatch. This recent business venture, as it now exists, consists of the delivery to all parts of the city, by carrier, of printed matter. As it was originally established, it included all mail matter, the charges being one cent for each piece of mail. When introducing into Chicago this expedient and highly beneficial system, Mr. Allen issued a private postage stamp, which was affixed to each piece of mail before it was deposited in a convenient mail box, and all mail and packages bearing this stamp were collected and delivered by carriers to any part of the city. The value of each stamp was one cent, and the revenue of the business consisted in selling these stamps to patrons, who, upon the purchase of a number of them were included among the subscribers to the enterprise, and were charged only one cent per day. Scarcely had the business been started when bankers and merchants saw the advantage of a delivery which was in advance of the United States mail fully twelve hours in distant parts of the city, and which was done for one-half the price charged by the Government. Mr. Allen continued the business until February 5, 1882, when he received official notice from Postmaster-General Howe, declaring his business wholly illegal, and citing the statute which made the carrying of mail over established post routes, a direct violation of the Federal law. As it was not the intention of Mr. Allen to violate the law in any manner, he discontinued the carrying of mail, and was engaged by the Chicago Telephone Company as manager of the circular delivery service of the A.D.T. department, and was with them until January 1, 1885, a short time afterward establishing what was known as Allen's Circular Delivery, continuing until May 1, 1886, when, upon the removal of the office to the Chicago Opera House block, he took the original name of the enterprise, Allen's City Despatch, ensuing the business exclusively to the carrying of printed matter. Mr. Allen was born at North Adams, Mass., on October 24, 1845. His father, John E. Allen, was a cotton manufacturer, and came to Chicago in 1876, where he died on May 10, 1885. Mr. Allen received his early education in the common schools, afterward attending the academy. At the age of nineteen he went to Potsdam, N. Y., where he entered Eastman's Business College, graduating from that institution in the spring of 1865. After leaving college, he engaged in the manufacturing of woolen goods and flaxen articles, and in the following year was forced to close out his business, owing to the depression in trade incident to the ending of the Civil War. He then went to East Saginaw, Mich., and engaged in the lumber business in the employ of his father, who was one of the firm of Mr. C. Hitchcock & Co. Later on, he went to Jackson and became chief clerk of the Maron House, working in that capacity until the house burned, in 1879. For some months afterward he was employed by the Lake Shore & Michigan Southern Railroad, leaving his position with that company to take the management of the Benson House, at Jonesville, Mich. After some years of diversified business undertakings, he went to Philadelphia, and started in the manufacture of dress trimmings, selling out two years later to establish a similar business in New York City. While there he received a patent upon a hose-supporter. A company was formed, of which he was a prominent stockholder, for the sale of the patented article, and he left New York City to travel and establish general agents to handle the same throughout the United States. While working in that capacity he came to Chicago, partly on business and partly to visit his parents who were residents of this city. Finding them in very poor health, he was obliged to remain here for over three months, and during this stay established his City Despatch, which has grown under his careful management to be the largest of any in the country.

BENEVOLENT INSTITUTIONS.

Organized society, in forbidding the strong man to take from the weak that which他 needs to supply his necessities, assumes the obligation of caring for him when accident renders him unable to provide for himself. In pursuance of this trust, the State furnishes reformatory, asylums and almshouses, and the varied machinery by which the vicious and the unfortunate are cared for. Among the tenets of the brotherhood in which it is neither practical nor desirable that a popular Government should interfere, and at this point systematized private benevolence steps in and supplements the State. As is natural, the societies established for this purpose cluster about that institution which teaches the common brotherhood of man; and we find the Church, or its tenets, the center of organized charities. The numberless aid societies, orphan asylums, homes and what not, are direct outgrowths of Church work; and its principles are everywhere diffused by the spread of church brotherhoods which in misfortune or distress watch with a careful solicitude over their members. Of such societies Chicago has a large number, both as adjuncts to the ordinary work of her churches, as independent organizations having for their object the alleviation of the woes of the general poor, and as societies whose specific design is to help the needy of some particular class or nationality.

Of a kindred nature are the mutual aid societies, and the insurance orders which have had such a marvelous extension in the past decade. They stand in the sturdy assertions of independence and self-help which repel the idea of interference by any authorities, and are fostered by the careful economy which seeks to provide in health for the inevitable misfortunes of sickness and death. These organizations have an especially strong hold among the foreign population, who, in a long struggle with an ever-haunting poverty, have learned the most prudent husbanding of their resources. Almost every Church, every class, has its society, which for small annual dues provides protection against illness and death; besides binding its members in a closer union. The insurance orders, too, while by no means confined to the foreign population, find among them their widest extension; the plan of operations according more closely with the
habits of this class. These institutions, while beneficial in their result, are not "benevolent" within the meaning of the term as employed in this article; and to follow their ramifications is beyond the scope of this work, as would be a dissertation on each benevolent enterprise; hence, only some typical organizations are referred to.

Of the benevolent institutions of Chicago, the more prominent are noted in the following pages. By the magnitude of its operations, and its especial connection with the decade immediately succeeding the fire, the Chicago Relief and Aid Society is naturally entitled to the first consideration, and its distribution of this immense trust committed to its care are fully chronicled.

THE CHICAGO RELIEF AND AID SOCIETY.

On October 13, 1871, by proclamation of Mayor R. B. Mason, the relief work at the time of the great fire was transferred from the general relief committee to the Chicago Relief and Aid Society; and on the same day the latter organization took full charge of the work, to which it was thus assigned. In meeting the great question of relief, the Society found a valuable and indispensable auxiliary in the tide of contributions of money, clothing, and other supplies that flowed in from every quarter. The Relief and Aid Society was thoroughly organized, the executive committee taking full charge and direction, and every department of its work was systematized. The general headquarters were at Standard Hall, corner of Michigan Avenue and Thirteenth Street. The city was divided into six districts, made as nearly equal as possible with regard to population, which were again divided into subdistricts. Each general district was in charge of a superintendent, the whole being under the direction of O. C. Gibbs, general superintendent. The district superintendents were—L. T. Chamberlain, F. M. Rockwell, E. F. Williams, T. T. Prosser, T. C. Hill and C. G. Pushbeck. These gentlemen were aided by volunteers, each superintendent having from seventy to ninety men and women assisting him.

Depots for distribution were located in each district, where applications for relief were received, and supplies issued. The subjoined table is a summary of the work of the six districts and four barracks, for the weeks ending November 11, 18 and 25, and will indicate about the average number of families upon the books of the Society, at any one date during the time of the largest distribution of supplies.

</table>

The total number of families aided by the Chicago Relief and Aid Society from October 18, 1871, to May 1, 1873, was thirty-nine thousand two hundred and forty-two; and, placing the average number of persons in each family at four, aid was given to one hundred and fifty-six thousand nine hundred and sixty-eight persons. The nationalities of the families aided during the above period were as follows:

- Irish, 11,623
- German, 14,816
- American, 4,828
- English, 1,366
- Scandinavian, 3,624
- French, 382
- Canadian, 323
- Scotch, 526
- Italian, 207
- Welsh, 35
- Polish, 143
- Swiss, 55
- Holland, 60
- Bohemian, 565
- Negro, 600
- Belgian, 54

The following ration for a family of six two adults and three children was found to be sufficient for one week, and was so dealt out by the supply department:

- 3 pounds of pork at 5½ cents = $0.165
- 6 pounds of beef at 5 cents = $0.30
- 14 pounds of flour at 35 cents = $0.42
- 14 pecks of potatoes at 20 cents = $0.25
- 4 pounds of tea at 80 cents = $0.20
- 15 pounds of rice at 8 cents (or 3½ lbs. beans at 3½ cents) = $0.12
- 15 pounds of sugar at 15 cents = $0.15
- 15 pounds of soap at 7 cents = $0.09
- 15 pounds of dried apples at 8 cents = $0.12
- 3 pounds of fresh beef at 5 cents = $0.15

Total = $1.58

To the weekly ration of food was added the allowance of a quarter of a ton of coal a week, which cost $0.12½. The total expense for sustaining a family of five persons for one week was thus $2.10½. The demand for clothing was very great, as the larger proportion of the sufferers had lost all their wearing apparel in the fire. Of the clothing supplies sent in from abroad much was of light summer goods, and proved inadequate for the demand. Piece-goods were given out in quantities, to be made up by the applicants, and great assistance in this work was given by associations of ladies. The Ladies' Relief and Aid Society, the Ladies' Industrial Aid Society of St. John's Church, the Ladies' Christian Union, the Ladies' Society of Park-avenue Church, and the Ladies' Society of the Home of the Friendless, gave work to a large number of sewing women who had been thrown out of employment, in making up garments, bedding, etc., from piece-goods supplied by the society. Of the actual quantity of clothing received by gift from abroad it would be impossible to make a statement, as much was given out in the early days to all or any who asked.

The distribution of several articles of prime necessity, for the week ending November 25, and the number previously reported is shown in the following table:

Previously reported = 8,666, 20,724, 2,131, 3,758

Total = 10,737, 25,339, 4,653, 4,459

The above table does not include the stones and mattresses given out by the Shelter Committee, who furnished both articles to a large proportion of their houses and the barracks, nor the goods given out by the Special Relief Committee. Neither does it include furniture and crockery for both large items of expenditure.

The following table will show the aggregate distribution of supplies during the period when the greatest
aid was given, and from May 1, 1872, to April 20, 1873, upon which latter date the Society closed its "October Fire-Relief Report," it having been occupied up to that date principally in giving aid to sufferers by the great fire:

Thousands of dollars’ worth of such goods as meat and vegetables perished, owing to the impossibility of properly caring for them. General P. H. Sheridan, in charge of the military, was occupying the warehouse of Tobey & Booth, and had not the means to care for the food. The store was a full complement of workmen and guards, he turned over to the committee on receiving and storing supplies. Shortly afterward the skating-rink, on the West Side, a store-room at No. 48 West Randolph Street, another large building, Nos. 50-52 Canal Street, and the church of the Messiah, in the South Side, were converted into store-houses and made places of distribution. These were finally reduced to two—the skating-rink and the church continuing in the use of the Society. A large first-floor building, for the storage of vegetables, was erected, and two large cellars were also used for the same purpose.

SHELTER FOR THE HOMELESS.—The first necessities of the people, food and clothing, having been provided, the next requirement was shelter. The churches and school-houses were at first thrown open to those who had no better place of refuge, and a few rude structures were put up; but these only answered for immediate protection. The larger proportion of those who suffered by the fire were mechanics and laborers. They were poor, laboring people, thrifty, domestic and respectable, whose skill and labor were indispensable in rebuilding the city, and most of whom had accumulated enough means to become owners of their own homes, either as proprietors or lessees of the lots. To restore them to these homes would be to raise them above mere depression and anxiety—to hope and renewed energy and comparative prosperity. The Society then placed in the barracks already erected the minimum number, who could not otherwise be cared for, and set about to provide houses for the rest. The larger proportion—who had families and who had owned the homes where they had previously resided—were put at the head of a shelter committee. The committee used fully thirty-five million feet of lumber, which cost about six hundred thousand dollars. The majority of the applicants were mechanics, who, after receiving the material, put up the houses themselves; but for the large class of widows, orphans or other helpless persons, the houses were built and put in complete readiness for the tenants by the committee. The houses were of two sizes: one, of 20 x 16 feet, for families of more than three persons; the other, of 15 x 16 feet, for families of three only. Each house was provided with a cook stove and utensils, several chairs, table, bedstead, bedding and crockery. The total cost of the house thus built and furnished was one hundred and twenty-five dollars. The shelter committee began its work on October 18, and on November 17 they had finished and given to applicants five thousand two hundred and twenty-six houses. This provided, at an estimate of five to a family, comfortable houses for from twenty-five to twenty-seven thousand persons. There were also four barracks, which the shelter committee suitably arranged, and which provided for about one thousand more families. These were mainly of the class who had hitherto lived in houses of their own, but in rooms in tenement buildings. Each family in the barracks had two rooms. Only one thousand two hundred and fifty people were gathered in one community; and these being under medical and police supervision, their moral and sanitary condition was carefully guarded. Only one death occurred in the barracks during the first month.

SPECIAL RELIEF COMMITTEE.—A suitable agency soon became necessary for relieving the wants and

During the weeks following the fire the committee, which was under the superintendency of Colonel C. G. Hammond, had an enormous work upon its hands, and the expenditure was very heavy. Thousands of persons wished to leave Chicago, but had not the means to do so. From October 13 to December 30, inclusive, three thousand and twenty-seven passes were issued, which carried six thousand four hundred and forty-five persons out of town.

RECEIPT AND STORAGE OF GOODS.—Up to October 16, three hundred and thirty cars of "relief" goods of all kinds were received over the various lines of railroad. These came without way-bills or invoices, and filed on locations, and on their arrival, owing to the destruction of the principal railroad depots by fire, had to be unloaded from side-tracks at remote points. The packages were at once opened, and their contents disposed of, or sent without record or count wherever most needed.
giving employment to those sufferers by the fire whose needs could not be properly met by the District Relief Department. The Society, with the aid of the pastors of the various churches and representatives of several charitable institutions, organized a Special Relief Committee to attend to the needs of the classes just named, and this committee's work began on November 6, 1871.

A large proportion of this special work consisted in affording aid to destitute sewing-women toward getting new machines. Money was granted in various amounts to assist applicants in re-establishing some kind of business, and mechanics, tradesmen and professional men were supplied with tools and instruments of their respective callings. The following figures will show the disbursements on this account from November 6, 1871, to May 1, 1873:

The total number of persons who applied for aid from the special committee, between November 6, 1871, and May 1, 1873, was sixteen thousand two hundred and ninety-nine, of which nine thousand nine hundred and sixty-two applications were approved. The committee paid, in full, for twelve thousand three hundred and fifty-two machines; paid twenty dollars each on two thousand five hundred and sixty-five machines; and paid the balance due on seven hundred and eighty-one machines. The total number of machine orders was five thousand nine hundred and ninety-nine.

**Bureau of Employment.**—As soon as the general relief work was systematized, the Society inaugurated an employment bureau. N. K. Fairbank was chairman of the committee, and headquarters were established in a temporary building in the Court-house yard. This bureau only undertook to find work for men, the women being provided for by another organization. The number given employment by the committee from October 16, 1871, to May 1, 1873, together with the occupations, are given below:

From November 1, 1871, to March 1, 1872, the total amount expended for tools given out by the employment bureau was $819,734.

**Sick, Sanitary and Hospital Measures.**—When the Society took charge of the general relief work it assigned to Dr. H. A. Johnson the special duty of organizing and directing the medical department, with authority to associate with himself such members of the profession as he thought best. The committee managed their work by districts and sub-districts, medical superintendents, and visiting physicians. Every applicant for medical aid was visited at home, if necessary, and was examined and provided for at the hospitals, or dispensaries which were established. The reports of the committee, on patients at the hospitals, persons treated at the dispensaries, and patients visited and treated at their homes, during the period between October 17, 1871, and May 1, 1873, are given below:

The results of the entire work may be summarized as follows:

- Patients treated: 9724
- Prescriptions filled: 76,060
- Vaccinations performed: 60,000
- Visits made: 51,275
- Deaths: 519
- Per cent. of deaths to patients: 0.5%

Committee on Charitable Institutions.—The support which had hitherto been given to the prominent charitable institutions had been swallowed up in the greater calamity, and on October 20, 1871, the Relief and Aid Society appointed a committee to attend to their requirements. The various institutions were promptly given temporary aid, but the committee early took steps to place all upon a permanent basis. They were visited and examined by the committee, who recommended the following disbursements and appropriations, which were ultimately made:

Chicago Nursery and Half-Orphan Asylum: $9,400 00
St. Joseph's Hospital: 31,735 93
St. Luke's Hospital: 28,000 00
Chicago Protestant Orphan Asylum: 16,000 00
Mercy Hospital: 40,000 00
House of the Good Shepherd: 16,046 56
Seamans' Hospital: 15,000 00
Western Seamen's Friend Society: 5,000 00
Alexian Brothers' Hospital: 18,200 00
St. Joseph’s Orphan Asylum: 33,228 14
Newboys' and Bootblacks' Home: 1,935 04
Newboys' and Bootblacks' Home (appropriated): 12,000 00
Home for the Friendless: 36,400 00
Home for the Friendless (appropriated): 1,200 00
Deaconess Hospital: 25,000 00
Chicago Foundlings' Home: 10,000 00
Eye and Ear Infirmary: 20,000 00
Women's and Children's Hospital: 25,500 00
Western Seamen's Bethel Union: 15,000 00
Ulrich Orphan Asylum: 20,575 00
Old People's Home: 50,000 00
Protestant Orphan Asylum: 2,400 00
Foundlings' Home: 900 00
Old Ladies' Home: 1,050 00

Total cash and appropriations: $172,670 67

Together with the above appropriations, the sum of $36,247.50 was paid out for temporary supplies given to the charitable institutions during the period immediately following the fire. The total cash disbursements of this committee, from May 1, 1873, to May 1, 1874, the time during which most of the cash payments of appropriations were made, was $366,316.76.

The A. T. Stewart Fund.—Among the largest individual donations was that of $50,000 by the late A. T. Stewart, of New York. It was desired by Mr. Stewart that the fund should be wholly under the charge of Mayor Mason, Messrs. Field & Leiter, and John V. Farwell. To these were added the names of Henry W. King and N. S. Bouton, and these gentlemen constituted the “A. T. Stewart Fund Committee.” It was also further expressed by the donor that the fund be mainly used for the relief and aid of women who were dependent for support upon their own exertions, and also widows and children without means or protection.

This wish was carried out by Mr. Bouton, who distributed the fund. In March, 1872, the Relief and Aid Society directed the continuance of the disbursement to these classes, and added $15,100 to the fund. The following abstract shows the disbursement of these funds:

The total cash received was $4,647,050.46, of which $1,517,495.98 was for the relief of the sufferers from the fire.
The Officers of the Society.—The board of directors at the time of the fire was composed of the following:

On November 7, 1871, Joseph Medill was elected mayor of the city and became a member ex officio, ex-Mayor Mason continuing as a director also. On January 1, 1873, George M. Pullman, E. C. Larned, John V. Farwell, H. E. Sargent and R. B. Mason had withdrawn from the board of directors, and their places were filled by Rev. Robert Laird Collier, J. Mason Loomis, F. B. McCagg and Abijah Keith.

The Executive Committee, during the latter part of 1871, was composed of Wirt Dexter, chairman; George M. Pullman, treasurer; Charles L. Allen, secretary; C. G. Hammond, Henry W. King, T. M. Avery, T. W. Harvey, N. K. Fairbank, Dr. H. A. Johnson, E. C. Larned, N. S. Bonton, George M. Pullman and J. McGregor Adams.

Number and Nationalities of Families Aided from January 1, 1873, to October 31, 1884.
### BENEVOLENT INSTITUTIONS.

The officers of the Society have been as follows:

- **President**—1873, Henry W. King; 1874-75, C. G. Hammond; 1876-77, Wirt Dexter; 1878-81, E. B. McCagg; 1882, H. A. Johnson; 1883, William H. Bradley; 1884, T. W. Harvey.
- **Treasurer**—1873, George M. Fullman; 1874-84, Henry W. King.
- **Chairman of Executive Committee**—1873-75, Wirt Dexter; 1876-77, E. B. McCagg; 1878-80, E. C. Larned; 1881, O. W. Potter; 1882-83, A. Keith.

**Auditor**—1873, J. Mason Loomis.
**Auditor of Executive Committee**—1873-84, John Rainier; 1873-76, Charles L. Allen; 1882-83, C. G. Trussell; 1884, W. C. Larned.

In July and August, 1874, the Society’s work was largely increased, owing to the destructive fire of July 14, which threw thousands of the poorer classes out of employment, and left them without food and shelter. The aid given was of short duration, owing to the season, and the help thus given is not reflected in the later work for the latter period. In 1874, after the July fire occurred, the Society decided to give no aid to any able-bodied single men or women, and only the sick, aged, infirm, or widows with families, were thereafter considered as proper subjects for assistance. The large fund contributed after the great fire of 1871, is now practically exhausted.

In 1872, the Society having found it necessary to secure permanent quarters, decided to put up a structure of its own. A lot was purchased at No. 51 LaSalle Street, and a building erected, 30 x 70 feet, five stories in height, built of brick and stone. The Society occupies a considerable portion of the building and receives a large revenue from the rental of offices.

The Society is still able to render extensive and valuable aid, through the medium of the hospitals and charitable institutions which it has aided. It is at liberty to send applicants for relief to the Chicago Home for the Friendless, the Old People’s Home, the Bethel Home, the Chicago Orphan Asylum, the Ulich Orphan Asylum, the Carydown and Halley Orphan Asylum, the St. Joseph Orphan Asylum, the Women’s and Children’s Hospital, the Alexian Brothers’ Hospital, St. Joseph’s Hospital, St. Luke’s Hospital, Mercy Hospital and Hahnemann Hospital. By contract with each hospital that has been aided by the Society, it has the right, at all times, to call upon such hospital to care for one person for each fifteen hundred dollars given to it. The Relief and Aid Society has granted money to hospitals and kindred institutions and associations, to the amount of $667,500.22 since the great fire to the present time.

From October, 1871, to October 31, 1884, the Society received $5,368,795.17, and disbursed the whole amount in various ways, with the exception of a balance of cash now on hand amounting to between eight thousand and nine thousand dollars. Besides this cash expenditure it has performed an amount of incidental service to applicants for aid which can not be represented by figures. A few of the articles issued by the Society up to the present time may be thus enumerated:

- Pieces of men’s wear
- Pieces of women’s and children’s wear
- Pairs of blankets
- Comforts
- Shoes and boots
- Railroads tickets issued
- Intemperance

Yards of wool and cotton flannel: 21,000
Yards of muslin: 180,000
Yards of dress goods: 180,000
Yards of calico: 210,000
Loggins for single men: 75,000
Meals for single men: 35,000

On March 25, 1869, the Illinois Society for the Prevention of Cruelty to Animals, was incorporated by the State Legislature. The original incorporators were George C. Walker, Thomas B. Bryan, John S. Rumsey, Belden F. Culver, S. N. Wilcox and T. D. Brown. The first law for the prevention of cruelty to animals was passed March 31, 1869, and the first case prosecuted under this law was handled on behalf of the Society by...
Albert W. Landon, in the following May. Mr. Landon was afterward secretary of the society, a position which he held during consecutive years. He has continued a member of the board of directors up to the present year, and is the publisher of the Humane Journal, the organ of the association. The first meeting to perfect an organization and elect officers was held in March, 1870, at which were present

The officers elected were as follows:

Edwin Lee Brown, president; Perkins Bass and R. P. Derrickson, vice-presidents; S. T. Atwater, treasurer; William H. Sharp, secretary. The officers were re-elected at the first regular annual meeting to a term of one year. John C. Dore then became the chief executive officer for two years, followed by R. P. Derrickson for a like term. In 1876, John G. Shortall was elected president, and has continued in office since.

The present officers are

John G. Shortall, president; Ferdinand W. Peck and Thomas E. Hill, vice-presidents; George Schneider, treasurer; Henry W. Clarke, secretary; I. Dudley, chief agent; Joseph Wright, attorney. The executive committee comprises John G. Shortall, John C. Dore, Edwin Lee Brown, B. P. Moulton, Fred. W. Peck, Henry H. Hart, J. J. Glessner, Thomas E. Hill and George Schneider; who, with twenty-one others, make up the board of directors.

In the latter part of 1881, the society, which had up to this time existed as the Society for the Prevention of Cruelty to Animals, was called upon to investigate several cases of cruelty to children, the perpetrators of which were prosecuted and brought to justice. The publicity given to these cases so increased the number of complaints of this character, that a meeting of directors was held May 20, 1882, at which a resolution was adopted extending the scope of the work to the protection of children, and recommending a change in the name of the association to the Illinois Humane Society. A petition was filed with the Secretary of State, and the name of the incorporation legally changed to that which it now bears.

The following is a detailed statement of the work done by the society during the three years past, ending on April 30 of the years named:

The society has, since beginning its work, investigated some twenty-five thousand cases.

The workings of the society include an educational department, through which bands of mercy have been organized during the past two years in all of the public-schools of the city, and in many of the private and Sabbath-schools. These bands now number one thousand and sixty-five, with a total membership of sixty-seven thousand one hundred and twenty. It has erected numerous drinking fountains in our public streets and parks, and is annually adding to their number. Membership fees to the society are $10, life membership $100. The association has thus far been maintained entirely by voluntary contributions. The last Legislature, however, enacted a law by which all fines imposed through the agency of any Humane Society in the State, and paid in money, revert to the treasury of such society. As but about twenty per cent. of these fines are paid in money, the revenue from this source is not expected to add much to its treasury. Two objects sought were accomplished by the act; first, the commitment of the State to the protection of its children and animals from unnecessary cruelty; second, the stimulus thereby given to the founding of branch societies, which it is hoped will be instituted in every county of the State by the present society.

The society has at present a permanent fund of $16,000, the gifts of Nancy H. Foster ($10,000) and Mary A. Talcott ($6,000).

THE CHARITY ORGANIZATION SOCIETY.

This society was started in this city in November, 1883, with the object of promoting the co-operation of all charitable activities, giving to each the knowledge of others, preventing imposture, and making sure that relief was adapted to lift the worthy into self-support. It soon became known for the practical importance of its wise and orderly charities, and it includes a large number of the most influential members of the community. Among its original founders, Messrs. Gurteen, Rogers, Sherwood, Mercer, Paxton and Mrs. Stone are prominently known. The establishing of the Provident Wood-yard, to furnish employment to the idle and unfortunate, was a move on the part of the society which won popular recognition and encouragement. A partial report of the organization gives the following details as showing the result of the operations of the main and branch offices:

Number of applications, 2,673; employment given, 1,555; assisted, 701; homes for children, 12; families made self-supporting, 41. The Provident Wood-yard, up to January, 1885, employed 9,961 men, and found work outside of the yard for 1,307, and furnished 5,607 meals and 3,424 lodgings.

The society operates on a basis of contributions amounting annually to $5,000. The officers of the organization are

HOME FOR THE FRIENDLESS.

The Home for the Friendless was not destroyed by the fire of 1871, and was one of the first charitable institutions to offer its hospitality to those who suffered in the great conflagration. For three weeks the Home was thrown open to the shelterless, and large numbers were received and fed until permanent relief had been provided for them. The institution was a loser in the fire, however,—a block of stores on Randolph Street, from which it had received quite a large income, being destroyed. For some time after the disaster, employment was given at the Home to sewing girls and women, under the auspices of the Relief and Aid Society. At the time of the issuing of the thirteenth annual report (January 8, 1872), the affairs of the institution had resumed their wonted system. There were one hundred and three inmates at the beginning of that year, some fifty-seven churches were represented in the work of the Home, and the Burr Industrial School and Free Mission were in full operation, with an average
school-room attendance of forty-eight, and in the industrial department twenty-five girls were employed. The corporators selected the following officers for 1872:

President, F. D. Gray; Vice-president, Mancel Talcott; Secretary, E. M. Boring; Recording Secretary, Mrs. F. D. Gray; Treasurer, U. B. Kidder; Matron, Mrs. J. Grant.

During 1872, the average family included one hundred and thirty-two persons, besides which three hundred and eighty meals were given to applicants. The sum of $15,000.25 was set apart to pay the principal and interest of the indebtedness on the Home; and the Home Industrial School progressed satisfactorily, $18,810 having been received from the Jonathan Burr fund, for that purpose, to date,—the total fund for the school and the Free Mission being $37,620. The stores on Randolph Street were re-built during the year, the disbursements for 1872 exceeding the receipts by only few dollars. From 1872 to 1885, the financial progress of the institution was most satisfactory, in 1874 the last Home mortgage ($10,000) being liquidated.

Following is a table showing the deaths, admissions, dismissals, receipts and disbursements of the Home for a period of thirteen years, the year 1880 not being obtainable:

OFFICERS.—In 1881, Mr. Hammond was again elected, holding the office until 1884, with Mrs. F. W. Wheeler as matron and superintendent in 1881. Mrs. Louisa C. Holman, in 1882, and Mrs. M. H. Moulty in 1883. In 1884, Henry Field was elected president and Mrs. Moulty re-appointed, the remaining officers of the institution being F. D. Gray, vice-president; Mrs. W. S. Smith, secretary; Mrs. Thomas A. Hill, corresponding secretary; W. C. Nichols, treasurer; and Miss Dell D. Moulty, assistant matron and superintendent.

Twelve managers from the city at large were appointed. Twelve denominations were practically represented by committees from twenty city and suburban churches. At the end of its twenty-sixth year (January 1, 1885), the Home had one hundred and sixty-eight inmates, fifty-six of whom were adults and one hundred and twelve children, the number of admissions for the previous year being three hundred and thirty-seven in excess of 1883.

FOUNDLINGS' HOME.

The Foundlings' Home was first opened, on January 30, 1871, as a private charity, by Dr. George E. Shipman, at No. 54 Green Street, with only his own indefatigable zeal and less than $200 in contributions to support it. From that date, through fifteen years of hardship, discouragement and earnest labor, the founder of the noble institution has lived a record that for per-
persons, the receipts were $5,951.36. In 1885, the record was one hundred and sixty-four infants with, and eighty-four received without, mothers, the year's receipts being about $5,100.

The trustees of the Home, for 1885, were

OLD PEOPLE'S HOME.

In 1873, an agreement was entered into between the Old Ladies' Home and the Chicago Relief and Aid Society, by which the latter, in consideration of certain assistance, should have a voice in the management of the Home's affairs. The name was to be changed to that of the Old People's Home, and its functions enlarged so that, when deemed feasible, aged and needy men should be admitted as well as women. The control of the Home was to be placed in the hands of business men, who should be approved of by the Relief Society; and for every $2,500 paid by the latter society, one inmate, to be designated by it, should be maintained at the Home. Under this agreement the Relief Society advanced $50,000. A new site was purchased, on the northwest corner of Indiana Avenue and Thirty-ninth Street, and a commodious building erected, which was ready for occupancy on November 25, 1874, when the nineteen inmates were removed to it. The lot cost $17,500; the building, complete, cost $51,007.25; furniture and carpets, $1,950.66. From March to October, 1874, the Relief Society contributed $45,765.31, and the donations amounted to $10,257.60. The building contains eighty single rooms for inmates, and is amply supplied with large public rooms. At present (1885) there are about seventy inmates. As soon as the finances of the Home will permit, it is intended to erect a similar building for the accommodation of men, who have not yet been admitted to the institution.

The cost of maintaining the Home during 1884 was $15,206.13. The assets were:

Lot and buildings occupied by the Home, including furniture: $70,000.00
House and lot on Harrison Street: $5,000.00
Money in banks, mortgages, etc.: $57,000.00
Cash in treasury: $600.18

Total: $122,606.18

CHICAGO NURSERY AND HALF-ORPHAN ASYLUM.

The new building on Halsted and Burling streets, near Center Street, had, in the latter part of September, 1871, so far approached completion that the managers hoped to have it ready for occupancy within a few weeks, and the ladies were busy in collecting bedding and furniture with which to equip the house. Their old home was destroyed in the great fire, and they were compelled to take refuge in the unfinished building, which was still without doors, only partially glazed, and without any means of heating. Here they not only cared for their own family of eighty children, but, in addition, over fifty children, who had become separated from their friends during the confusion of the fire, were brought to them, all but one of whom were subsequently restored to their friends. They also provided temporary shelter and food to over forty needy adults. Since then there has been a steady increase in members, the number averaging during 1884 one hundred and thirty-eight children, one hundred and six of whom were old enough to attend the school. The cost of maintaining the institution is now about $1,000 a month. In 1884, Mrs. Manuel Talcott added to her previous gifts, which had been constant and generous, $1,500 for the purpose of constructing an addition to the building, which was completed during the year.

The present officers are—

George L. Dunlap, president; Henry W. King, vice-president; Joseph II, Stockton, secretary; F. B. Peabody, treasurer; assisted by a board of ten directors. The officers of the Ladies' Board of Managers are—Mrs. W. C. Conley, president; Mrs. Simeon H. Crane, vice-president; Miss Ellen Rogers, second vice-president; Mrs. Edwin Blackman, treasurer; Mrs. F. H. Beckwith, secretary; Mrs. Richard Robbins, assistant secretary; the Board numbering twenty-eight.

CRÈCHES.

The Crèches, or Day Nurseries, of Chicago are institutions of recent date in this city; but, since the establishment of the first nursery on State Street, they have become noted for their practical charity and usefulness. The work has enabled working mothers to leave their babies during the day with the certainty that they will have the best of care. The Crèches are under the charge of kind, motherly matrons, are airy and comfortable, and have a regular medical attendant; each child is bathed and provided daily with clean clothing and suitable food, and the mothers, returning to their children at night, find them clean, sweet and happy. The Crèche is an institution that has been eminently successful in other cities, and the three in operation in Chicago, on Adams, State and Twenty-fifth streets, are conveniently located as to the divisions of districts. The last named, at No. 222 East Twenty-fifth Street,
is the largest in its scope, and was established on South
Clark Street on August 3, 1885, under the auspices of a
committee from the Charity Organization Society. It
depends on voluntary contributions for support, al-
though a small fee is charged for the care of infants.
Parents of all denominations are admitted to the privi-
leges of the institution. The Crèche named cares for
an average of fifteen to eighteen children daily, in
summer, and about ten in winter. Mrs. A. C. Redman,
the matron in charge, has done much to insure the
success of the enterprise.

The officers of the Crèche committee are
Mrs. Leander Stone, president; Mrs. Charles G. Thomas,
vice-president; Mrs. E. I. Galvin, treasurer; and Mrs. S. A.
Moody, secretary.

It is designed to operate a free kindergarten in con-
junction with the Crèche.

FLOWER MISSION.

This Mission was first established in 1873. The
primary object of the association, composed of the
leading ladies of the city, was to place flowers at the
sick-beds of hospital patients and in the rooms of in-
mates of various charitable and reformatory institu-
tions. Its scope of operations, however, was enlarged
as the years went by, and various kindred projects
were added to the distribution of flowers, such as the
donation of fruit and reading-matter to the sick and
worthy, and the providing of a fund to give long and
pleasant carriage-drives to needy invalids. By 1888,
after a successful establishment of seven years’ duration,
the Mission had secured an active membership of one
hundred and forty-three persons, mostly ladies, with
average annual donations, besides flowers and books,
amounting to $115. The organization had become
known throughout the West, and generous donations
of flowers in their season were regularly received from
this State, Wisconsin, Iowa, Indiana, Michigan and
Ohio, over fifty cities and towns being represented.

In the year named, and during 1881, Miss C. P. Titlon,
who was secretary and one of the original founders of the
enterprise, held the presidency, being succeeded in
1882 by Mrs. O. D. Randall, in 1883 by Mrs. I. W.
Tyler, and in 1884 by Miss May Buckingham. In
1884, there was a membership of one hundred and one
persons, with yearly receipts amounting to $60.01.
From May 14 to October 15, there were distributed
eleven thousand eight hundred bouquets, besides baskets
of loose flowers and vased bouquets.

The Mission includes in its visitsations the following
institutions:

Cook County Hospital, St. Luke’s Hospital, Newboys’
Home, Rehoboth Home, Home for Incorruptibles, Maurice
Tieror Hospital, Marine Hospital, Women’s and Children’s Hospital,
Alexan Hospital, St. Joseph’s Hospital, Eye and Ear Infirmary,
Unity Industrial School, Sheltering Arms, Furr Mission School,
Little Sisters of the Poor, and Home for the Friendless.

During the past few years the work of the Mission
has been divided, a new society, known as the South
End Flower Mission, being organized at the South
Congregational Church, with large donations from the
South Park. This organization distributes nearly five
thousand bouquets annually, its special field of labor
including the Protestant Orphan Asylum, Mercy Hos-
pital, Old Ladies’ Home, Erring Women’s Refuge, and
Hahnemann Hospital. The benefit and pleasure con-
ferrable by these joint charities are incalculable. The
officers of the main Mission, for 1885, were:

Miss May Buckingham, president; Mrs. J. K. Edsall, vice-

ST. GEORGE’S BENEVOLENT ASSOCIATION.—At the
time of the great fire of 1871, the St. George’s Benevo-
leent Association of Chicago had been in existence fourteen
years as an incorporated body. The society was
in a very flourishing condition, having a membership of
some four hundred and twenty-five persons. The fire
swept away the beautiful lodge-rooms in the Lombard
Building, entailing a loss in regalias and other property of
$2,000. St. George’s was one of the few benevolent
associations of the city which did not apply for, or
receive, relief from the general relief fund, and the
disbursements made to the nationality it represented
were made from the society fund or personally by char-
itably disposed members. The officers at that time
were James John, president; W. W. Street, Dr. Snow-
den, vice-presidents; C. J. Burroughs, recording sec-
retary. For the years following, up to the present time,
the presidents have been

1872, Richard Barnard; 1873, A. Booth; 1874-77, George E.
Gooch; 1878, Alexander Cook; 1879-80, George E. Gooch; 1881,
C. J. Burroughs; 1882, Joseph E. Wright; 1883, William Bang-
worth.

During the past fourteen years the society has be-
stowed its benefits liberally, over $2,000 a year being
distributed, derived mainly from dues, picnics and ban-
quets. The society has a burial lot at Rosehill Ceme-
tery, in which some one hundred interments have been
made. Aside from its relief fund, the society has a
reserve or permanent building fund amounting to
$6,000, with which it is designed to build a hall. On
August 20, 1884, a three-days’ session or convention
of representative lodges of the Order was held in this
city, at which delegates were present from the various large
cities of the United States and Canada. The present
membership roll of the society includes about three
hundred persons, and the officers are as follows:

John Dunn, president; James Pittaway, vice-president; John
Berry, treasurer; David Roberts, financial secretary; Charles P.
Currie, recording secretary; Messrs. Lansdey, Morgan and Childs,
visiting committee; Messrs. Gooch, Cardew and Wright, trustees;
Rev. Canon Street, chaplain.

THE ILLINOIS ST. ANREW’S SOCIETY, at the time of
the fire, lost its entire records and lodge-room prop-
erty, including a large edition of the constitution and
by-laws and several historic pictures, to re-produce
which efforts have since been made. The enrolment
lists prior to 1871 were also destroyed, but by Novem-
ber 14, 1872, a movement was on foot to restore the
same, and the society had a list of two hundred and
seventy-one regular members. The organization was then
twenty-seven years old, although it was not incorpo-
rated until 1853. The officers at the time of the fire
were — John M’Arthur, president; William Stewart,
Alexander M. Thomson, vice-presidents; William M.
Dale, secretary; John Stewart, treasurer. The society had
numerous applications for relief from Scotch-
American citizens, rendered homeless by the great fire,
and, through the recommendation of the managers, the
Relief and Aid Society and the Chicago Christian
Union donated $1,585 to the society, besides which
$5,000, or a total of $7,585.08, was disbursed by the
relief committee of the organization. A new burial-lot
at Rosehill Cemetery was purchased, comprising five
thousand square feet, at a cost of $1,750. The society,
from its banquets, entertainments, dues and donations,
made a prosperous financial showing for succeeding

BENEVOLENT INSTITUTIONS.

NATIONAL ASSOCIATIONS.

613
years. In 1873, the receipts were $3,870.79; disbursements, $2,355.39; and the annual receipts averaged about $3,000, and disbursements $1,800, up to 1880, when the membership was two hundred and ninety-four. The disbursements in 1880 were $1,191.30; receipts $3,192.22. In 1884, the membership was three hundred, and one hundred and three persons had been buried in the society's lots at Rosehill Cemetery.

The presidents, from the fire to the present time, have been as follows:

John McArthur, Robert Clark, Robert Hervey, Godfrey MacDonald, Daniel R. Cameron, Alexander Kirkland and Robert Clark.

The present officers of the society are—

Robert Clark, president; William M. Dale, treasurer, an office he has filled for eleven years; and John Berry, secretary.

St. Patrick's Society.—Following the great fire, no effort seems to have been made to revive this society until 1878. In October of that year, a meeting of the old members was called in the Tremont House, and so great was the interest aroused by the re-union that it was decided to reorganize the society. The following officers were chosen under the reorganization:

The society takes a lively interest in the question of Irish colonization and in caring for the Irish immigrant; and it took the lead in the important colonization movement which was set on foot during the winter of 1878-79. And a call for a national conference of representative Irishmen was issued by the society in the early part of 1879. The call specified St. Patrick's Day, March 17, as the time, and the Grand Pacific Hotel, Chicago, as the place of meeting. A number of delegates, mainly from the West and South, assembled. Among those in attendance were Right Rev. Bishop Ireland, St. Paul; Right Rev. Bishop O'Connor, Omaha; Right Rev. Bishop Spalding, Peoria; General Lawler, Wisconsin; John A. Creighton, John Fitzgerald, Nebraska; P. H. Kelly, Michael Doran, St. Paul. The result of the conference was the establishment of the Irish Catholic Colonization Association of the United States.

On May 28, 1879, the centennial of the poet Moore, the society gave a notable musical and literary celebration in honor of the event at Hershey Music Hall. The president, Mr. Onahan, delivered an address on the "poetry and genius of Moore."

The first money raised in Chicago in aid of the Irish famine sufferers was forwarded by the St. Patrick's Society, and was transmitted to Archbishop McHale. Members of the society were likewise active and prominent in the public demonstration held in Chicago to express sympathy with the Irish people in their efforts to secure a change in the land laws and a wider measure of home rule for that country. The controlling influence in the society being more conservative on Irish national questions than suited the more enthusiastic elements led to the formation of a new and independent society, known as the Irish-American Club, which rapidly sprang into prominence.

The memorable temperance demonstration in Central Music Hall, January 17, 1853, at which Bishop Ireland delivered his great appeal in behalf of temperance, was the result of the initiative taken by the St. Patrick's Society. The eloquent and convincing argument by Bishop Ireland on that occasion was widely commented on by the press of the city, and attracted general attention throughout the country. The reunions given by the St. Patrick's Society, on St. Patrick's Day, have been uniformly brilliant and notable gatherings, while the literary character and ability displayed in the post-prandial addresses never fail to command public attention.

The present officers are—

William J. Onahan, president; W. P. Rend, first vice-president; John Naghten, second vice-president; P. E. Healy, treasurer; M. W. Kelly, recording secretary; and John Gaynor, the corresponding secretary.

The Société Française de Bienfaisance de l'Illinois, which has been in existence for a quarter of a century, was organized and incorporated in Chicago, February 23, 1863. The original charter members of the society, who were among the most prominent French residents of the city, were—

The object of the association was to help French-speaking residents of the State when in distress; and its officers have relieved numerous cases of extreme suffering, and supplied a large number of persons with transportation to friends. After the fire, some three thousand dollars of contributions passed through the society's hands, and was distributed to sufferers by the configuration. The average membership of the organization is about one hundred; and from their dues, and entertainments given from time to time, is derived the revenue for a relief fund. The presidents, since the organization of the society, have been as follows:

The present officers are—

W. B. Laparle, president; A. Marguerat, G. Sunret, F. X. Lambert, vice-presidents; Theofilius Gueroult, secretary and financial agent; Leon Dupuy, treasurer; and six directors.

The United Hebrew Relief Association, of Chicago, was organized in 1859, the first regular meeting of its executive board taking place November 20 of that year, and its first report being dated October 4, 1860. The organization had its inception in a convention of delegations from different Jewish lodges, congregations and benevolent societies, called by Rambah Lodge, B'nai B'rith, for the purpose of forming one common Jewish charity society. Previous to that time there had been indiscriminate and duplicated almshiving. Henry Greenbaum was elected president; and the general good-will of the Jewish population, and the action of circonstant and practical officers, soon placed the association on a basis of beneficial operation. The society maintains an established relief department and a well-appointed hospital. The providing of an asylum for indigent Jewish widows and orphans is now contemplated, Mrs. Elisée Frank having already contributed $30,000 for that purpose.

In 1884, there were three thousand eight hundred and sixty applications, and one thousand two hundred and twenty-five persons provided for; $9,466.68 being expended, a large amount of which was contributed by the congregations of Jewish churches. The sum of $1,050 was contributed toward the maintenance of the employment bureau, a notable feature of the society. The hospital branch of the work, operating the Michael Reese Hospital, provided for four hundred and sixty-
four patients, of whom two hundred and sixty-four were admitted free, and two hundred and sixty-five were not of the Jewish faith. The hospital income from paying patients was $8,556, while the entire hospital expenditures amounted to $25,319.98. The report of the society shows relief work done embracing one thousand visits, one thousand five hundred letters written, one thousand one hundred and sixteen families assisted, and one hundred and fifty-seven persons provided with employment. The receipts for the relief fund were $13,442.88; hospital fund, $29,288.05; hospital sinking fund, $847.85; employment bureau fund, $1,050; library fund, $207.02. The investments for the hospital sinking fund amount to $52,300, and for the relief sinking fund, $5,500. The ladies' sewing societies connected with the association disbursed, during 1884, $2,914.44, while the Young Ladies' Aid Society, an auxiliary association, did much good work in providing flowers for the hospital. The executive board of the association is composed of Isaac Greensfelder, president; Abraham Hart, vice-president; Herman Schaffner, treasurer; Joseph Pollak, financial secretary; Charles W. Holzheimer, recording secretary; Herman Felsenthal, Henry L. Frank, Max M. Geselvey, Herman F. Hahn, Nathan Marks, Jacob Newman, Jacob Rosenblum, Julius Rosenblum, Joseph Schaffner, Charles H. Schwab, trustees; F. Kiss, superintendent.

The Societá Cristoforo Colombo, the largest Italian benevolent association in Chicago, was organized on October 12, 1875, and incorporated on March 25, 1886, with the object of extending financial help and benefits to members. Aside from the provision for death and sickness to those connected with the society, relief has been extended to the few Italians who have appealed for help. The society has a membership of ninety-eight at the end of the first year, which in 1885 had increased to two hundred and fifty. The original founders and first officers of the society were G. R. Ratto, president; G. D. Razzo, vice-president; G. Lavazzì, secretary; G. L. Pieroni, treasurer; M. DeGilio, V. Califì, V. Gali, D. Lagomarsino, directors; G. R. Ratto, G. Lavazzì, G. D. Raggio, G. L. Pieroni and M. DeGilio, committee on rules. G. R. Ratto was the first president of the society, and was reelected in 1881, 1882, and 1884. G. Lavazzì was president in 1883.

The officers elected in 1885 were Charles Ginocchio, president; G. D. Raggio, vice-president; E. G. Meli, secretary; G. R. Ratto, treasurer; G. M. Lavazzì, financial secretary; A. Borrell, A. Andreascetti, L. Bartoli and G. Arata, directors.

The receipts of the society have amounted to over $4,100 and the disbursements to $370 in a single year.

The Società Italiana di Unione e Fratellanza was organized May 8, 1866, the original founders being A. Querolli, G. Ribon and G. Raggio. Its primary object was of a benevolent character, and its charities have been large outside of membership awards. A certain exclusiveness has been observed in its formation, no one being admitted as a member until he is known in a business and social sense. At the end of 1866, the society had a membership of one hundred and five persons. The first officers were as follows: A. Querolli, president; G. Ribon, secretary; and G. Raggio, treasurer. The presidents since then have been: G. Ribon, B. Borretti, A. Molinelli, R. Valentine, A. Caproni, A. Arata and G. Cella.

On July 18, 1873, the society was incorporated by A. Molinelli, A. Caproni and A. Arata. In the fire of 1871, the entire building of the society was destroyed, with a loss in real property and other property amounting to $1,800. To those who were rendered homeless by the conflagration a similar amount was donated by the society. Since that time the organization has increased its benefits, and now operates on an average annual income of $2,500, of which $2,000 is disbursed to the various benevolent funds, $150 being awarded for funeral expenses to members, and smaller amounts to the sick and unemployed. The society made liberal donations to the yellow-fever sufferers of the South, and to those injured and employed in the coal mines. The society, one of the oldest and most prominent Italian association in Chicago, was represented at the National conventions of the Order; in 1870, at Philadelphia; in 1871, at New York; and in 1873, at St. Louis.

The present membership of the society is two hundred. Its officers are:

The German Mutual Benefit Association was organized August 16, 1875, and duly incorporated, for the purpose of providing for the heirs of its members. The original founders were mainly members of the German Methodist and Evangelical churches, and the society's scope of operations embraced the entire State of Illinois. The first list of executive officers included Rev. C. A. Loebner, president; W. W. Lecher, vice-president; S. Wuest, secretary; Henry Rieke, treasurer. The record of the association for ten years shows a membership of two thousand five hundred and four persons, representing three thousand and twenty-two certificates, and seventy-three deaths. The amount of insurance granted a member averages $1,500, and since the formation of the society, $84,854.40 has been disbursed. The total membership up to 1885 exceeded three thousand. The present list of officers is as follows:

The Mutual Benefit and Aid Society of Chicago was organized as a charter association in 1874, and is the outgrowth of the Bismarck Bund and the Tentonna Life Insurance Company, many members of which associations were founders of the present society. The object of the organization is to provide immediate relief for the families of its members in case of sickness and death, and it restricts its life policies to $250, seeking mainly to provide for funeral expenses. Of this amount $100 is paid the day of death to the family of the deceased. Its first president was Ernst I. Knobelsdorff, and its present secretary, J. H. Kraemer, was one of the original charter members. The present officers are:

The society operates outside of the city, although the majority of its members are residents of Chicago. Since January 1, 1875, the annual disbursements have been as follows:

1875, $10,039.12; 1876, $20,977.15; 1877, $1,969.14; 1878, $1,244.99; 1879, $720.17; 1880, $1,780.40; 1881, $2,236.86; 1882, $1,600.65; 1883, $1,654.97; 1884, $2,222.32; 1885, $2,459.66; a total of $29,320.50.
MASONIC FRATERNITY.

By the fire of 1874, eighteen lodges, two chapters, one council, two commanderies and the four co-ordinate bodies of the A. & A. Scottish Rite suffered a total loss of their charters, records, jewels and paraphernalia, and were deprived of their places of meeting. Eight Masonic Halls, with all their accessories, were reduced to ashes, and the former occupants compelled to seek temporary quarters.

That the practical lesson of ready charity taught by the spontaneous outpouring of gifts from sister lodges all over the land has not been forgotten by the Masonic bodies of Chicago, has since been repeatedly demon-

strated. When the great fire of 1871 occurred in Bos-
tom; during the yellow fever epidemics of 1873 and 1879 in the South; after the floods on the Ohio River and its tributaries in February, 1883, and on many other occasions, the lodges of Chicago have freely reciprocated the fraternal bounty extended to them in their hour of need.

A. F. & A. M.

ORIENTAL LODGE, No. 33.—After the loss of its fine hall in the fire of 1871, oriental found a temporary home in the West Side Masonic Temple, corner of Halsted and Halsted streets. Since February 1, 1873, the lodge has met in its new hall, rebuilt upon the old site, and so that date dedicated by Past Grand Master J. C. Crepe. The masters of Oriental Lodge, since 1871, have been: Edwin Powell, 1872-73; Peter Miller, 1876; W. E. McHenry, 1877-78; William Gardner, 1880; Fred C. Brehm, 1881; Robert W. Smith, 1882; R. H. Bennett, 1883; J. J. Norton, 1884; A. J. Verneaux, 1885.

ORIENTAL LOIRE, No. 141.—The lodge, when first from Oriental Lodge, occupied quarters first in the hall of the Temple, on South Wabash Avenue, and afterward with Eastern Lodge, on North Water Street, until the latter hall was burned. When it re-occupied its old location in the re-built Oriental Hall, the master since the fire have been: George McWilliams, 1874-75; B. F. Holcomb, 1877-78; James John, 1878; Alfred Ross, 1879-80; E. A. Alworth, 1881-82; T. K. Taming, 1883-84; George McWilliams, 1885. The lodge has attained to a large membership and has enjoyed uniform prosperity.

WABANNA LODGE, No. 146.—For a time Wabunna held its meetings after the fire in Pleasant Hall, on Twelfth Street, where it went to the hall of Apollo Lodge, near the corner of Clark and Calumet Avenue. It held its meetings in American Masonic Building, returning to Oriental Hall, its present home, in the fall of 1864. Wabunna Lodge counts among its members many of the prominent citizens of Chicago, and has well maintained its reputation for benevolence. When the Boston fire of 1872 occurred, master of the shore Lodge, R. J. Timlin, Mr. Thomas, has responded to the call for aid. It sent substantial relief to the families of the Masons during the severe flood epidemics of 1873 and 1879, to Members and Shriner sport. The masters, since 1871, have been: J. G. Church, 1872; A. C. Howells, 1875-76; T. J. Thistle, 1877-78; E. W. St. John, 1879; J. A. Readish, 1878; F. W. Porter, 1879; T. J. Tustin, 1880; John C. Barker, 1881; W. C. B. Young, 1882; George O'Neil, 1883.

GERMANIA LODGE, No. 182.—This lodge, after the fire, held its meetings in the hall of Levering Lodge, E. L. Further, and the latter hall was burned, its members having been disposed of by the action of the Association towards the new building. The following have been the masters: W. H. Henley, 1872-76; A. C. Howells, 1877-78; F. W. Porter, 1879; Fred Meyers, 1890; J. H. Runyan, 1891-92; John W. DeWald, 1892; W. L. Groom, 1893; Donald Peng, 1894.

WILLIAM B. WARREN LODGE, No. 209.—The members of this lodge, after the fire, held their meetings at the home of the late George Warren, near the corner of Randolph and Halsted streets, and, in 1883, returned to Wabunna Hall. The masters, since 1871, have been:

A. F. A. M.

ORIENTAL LODGE, No. 33.—After the loss of its fine hall in the fire of 1871, oriental found a temporary home in the West Side Masonic Temple, corner of Halsted and Halsted streets. Since February 1, 1873, the lodge has met in its new hall, rebuilt upon the old site, and so that date dedicated by Past Grand Master J. C. Crepe. The masters of Oriental Lodge, since 1871, have been: Edwin Powell, 1872-73; Peter Miller, 1876; W. E. McHenry, 1877-78; William Gardner, 1880; Fred C. Brehm, 1881; Robert W. Smith, 1882; R. H. Bennett, 1883; J. J. Norton, 1884; A. J. Verneaux, 1885.

ORIENTAL LODGE, No. 141.—The lodge, when first from Oriental Lodge, occupied quarters first in the hall of the Temple, on South Wabash Avenue, and afterward with Eastern Lodge, on North Water Street, until the latter hall was burned. GERMANIA LODGE, No. 182.—This lodge, after the fire, held its meetings in the hall of Levering Lodge, E. L. Further, and the latter hall was burned, its members having been disposed of by the action of the Association towards the new building. The following have been the masters: W. H. Henley, 1872-76; A. C. Howells, 1877-78; F. W. Porter, 1879; Fred Meyers, 1890; J. H. Runyan, 1891-92; John W. DeWald, 1892; W. L. Groom, 1893; Donald Peng, 1894.

WILLIAM B. WARREN LODGE, No. 209.—The members of this lodge, after the fire, held their meetings at the home of the late George Warren, near the corner of Randolph and Halsted streets, and, in 1883, returned to Wabunna Hall. The masters, since 1871, have been:
ASHLAR LODGE, NO. 308.—After the fire Ashlar Lodge met for a time at the Hotel and later in the West Side Masonic Temple, remaining there until 1873, when it removed to Masonic Hall in the American Express Building, 1876, and finally to Grand Union Hall, where it met until 1877. The masters have been: E. N. Brown, 1873-74; Frank R. Allen, 1875-78; William Heron, 1878-80; William H. Fillmore, 1881; Charles L. Hardy, 1882-83; Edgar L. Smith, 1884; C. E. Kreyzel, 1885.

BAILEY LODGE, NO. 310.—The first temporary home of this lodge after the fire was in the hall of Cashill Lodge, corner of Robey and Madison streets. Then it met in the West Side Masonic Temple. On the completion of the lodge-rooms in the American Express Building, it met there until the present quarters were secured at No. 147 Fourth Street. Its masters have been: H. S. Tobey, 1872-73; C. R. Moody, 1874; W. K. Forsyth, 1875; John Sattler, 1876-77; W. K. Forsyth, 1878-79; C. F. Stoddard, 1880; W. H. Forsyth, 1881; R. G. Griffith, 1882-83; John F. Richards, 1884-85.

BRAINERD LODGE, NO. 311.—When burned out in 1871, this lodge met in the West Side Masonic Temple until the completion of Corinthian Hall at No. 187 East Kinzie Street, in 1874, when it has since remained. Its masters have been: A. H. Thompson, 1872-73; E. P. Catfield, 1874; A. H. Robinson, 1875-76; J. P. Schmitt, 1877; J. P. Schmitt, 1878-79; Thomas Middleton, 1881-82; Thomas Ryan, 1883; Giles A. Stanley, 1884; Giles A. Stanley, 1885.

BLAIR LODGE, NO. 313.—After the fire Blair Lodge met in the West Side Masonic Temple until 1874, when it occupied the lodge-rooms in the

CHICAGO LODGE, NO. 487.—After the fire this lodge met in the hall of Apollo Lodge, at the corner of Madison and Clark streets, until 1873, when it removed to Arcoidea Hall, at No. 114 Randolph Street. In the following year it moved to Oriental Hall, where it continued until 1877, when it was burned. Its masters have been: Joseph Spiegel, 1872-73; Adolph Sidle, 1874-77; Charles Oaken, 1878-80; Edward Bolles, 1881-83; W. H. Forsyth, 1883-85; Charles Oaken, 1885-87; Adolph Sidle, 1887-89; George W. Mackenzie, 1889-91; William Baxter, 1891; Charles A. Oaken, 1892-93; F. Falco, 1893; F. M. French, 1894; E. W. Osborn, 1895.

COVENANT LODGE, NO. 526.—When driven from its North Side home by the fire, this lodge first met in the hall of Union Park Lodge on West Lake Street. In February, 1874, this hall was burned and the lodge re-established at 4917 St. James Avenue, with W. C. Paine as master; in 1875 it moved to 911 S. Oriental Avenue, where it met many years, and in 1883 to 477 S. Dearborn Street, in the building known as the Grand Hotel, about 150 members being enrolled. Its masters have been: William Keane, 1876-79; William McLean, 1879-80; R. J. Ahrens, 1880-82; F. Falco, 1882-83; E. W. Osborn, 1883-84; William Baxter, 1884; Charles A. Oaken, 1885.

CUBAN LODE, NO. 569.—1884.

DEARBORN LODGE, NO. 308.—This lodge has enjoyed a steady growth, and from its first was constantly maintaining a membership of a hundred and more members, living in the North Side. It has a commodious hall on Twenty-fourth Street. Its masters have been: James敦, 1881-83; John H. Babcock, 1884-85; John J. Brennan, 1886-87; J. S. Beck, 1888; J. H. Babcock, 1889-90; William J. Hamilton, 1890; W. H. Holmes, 1890-91; R. F. Creutz, 1892; J. S. Beck, 1893; J. H. Babcock, 1894; W. J. Hamilton, 1895; W. J. Hamilton, 1896.

HERDER LODGE, NO. 966.—This lodge has had a fair prosperity. The masters have been: H. J. B. Britton, 1873-74; E. J. Bedell, 1875; W. D. Brown, 1876-77; Paul Zorner, 1878-79; D. W. Brown, 1880; Frank Zorner, 1881; E. Middleton, 1882.

WALDECK LODGE, NO. 974.—This lodge is located at the corner of South Pearl and State streets, when it was first received, was made of bow-flooring. maples, C. H. Liebmann, 1879; Henry Blocher, 1880; J. L. Goodall, 1881; Henry Wink, 1882; E. Schmitz, 1883-84; C. E. Meehl, 1885.

GARFIELD LODGE, NO. 655.—This lodge is organized on a similar basis to that of the Grand Lodge of the Grand Army of the Republic, for the benefit of the widow of the late President Garfield. The master has been: J. H. Honey, 1900-01; H. E. Sanger, 1902.

SCOTLAND, NO. 300.—This lodge was organized by Grand Master D. Crocker, Grand Master, on the first three degrees, and is styled "The Scottish Rite Lodge," and its first officers were: W. D. Brown, master; W. J. Hamilton, warden; and W. P. Paine, treasurers. On March 1, 1874, at a meeting held at No. 147 East Kinzie Street, the lodge was organized and chartered by the Grand Lodge of Illinois. Its masters have been: D. Crocker, 1874-76; J. H. Babcock, 1877; W. J. Hamilton, 1878; A. B. Stoney, 1879; W. J. Hamilton, 1880; W. J. Hamilton, 1881; A. B. Stoney, 1882; J. H. Babcock, 1883; W. J. Hamilton, 1884; J. S. Beck, 1885; W. J. Hamilton, 1886; W. J. Hamilton, 1887-88; H. J. B. Britton, 1889; W. J. Hamilton, 1890; W. J. Hamilton, 1891.

WASHINGTON CHAPTER, NO. 43.—This chapter has the largest membership, with chapters in the states of Wisconsin, Minnesota, and Illinois. It has an active membership and is well represented in the various lodges throughout the state. The chapter is located in the heart of the state and has a strong presence in the business community.

HERMAN SIGMUND was born in Wittenberg, Germany, on February 4, 1839, and is a son of John and Magdalena (Lederer) Sigmund. When he was fourteen years of age he learned the cabin-maker's trade in his native town, where he worked until 1866, when he came to America. He went to Chicago and worked at cabinet-making until 1876, when he engaged in the business of a contractor with Peter Mueller, under the firm name of Sigmund & Mueller. They continued together five years when the firm was dissolved. Since then Mr. Sigmund has carried on the business on his own account. He has a lively stable which he manages in connection with the undertaking business. He was married on October 14, 1851, to Miss Lizzie Schell, of Chicago; they have four children.—Anson, Herman, Lizzie and Clara. Mr. Sigmund is a Mason and a member of D. C. Greger Lodge, No. 645, A.F. & A.M., and of Washington Chap-
BENEVOLENT INSTITUTIONS.

A.M., corner of Roleroy and Madison streets, where it has since remained.

Siland Council, No. 53—In February, 1873, a dispensation was issued by the M.O.G.M. of the Grand Council of E. J. Prinkey as T.I.M.G.M. John Willby as H.I.G.M. and A. H. Atkins as P. C. of W. to form a council

The following is a list of some of the officers of the council: R. H. S. Eventer, 1872; E. V. G. Goodrich, 1873; E. V. G. Goodrich, 1874; W. O. Hill, 1875; J. H. Schenkel, 1876; W. O. Hill, 1877; J. H. Schenkel, 1878; W. O. Hill, 1879; J. H. Schenkel, 1880; W. O. Hill, 1881; J. H. Schenkel, 1882; W. O. Hill, 1883; J. H. Schenkel, 1884; W. O. Hill, 1885. The membership of the council was 50 in 1885.

Palestine Council, No. 66—On August 9, 1885, a dispensation was issued for the formation of this council, in the Asylum of Apollo Commandery, K. T. The first T.I.M.G.M. was William E. Poitson, the first H.I.G.M. William F. Forsyth, and the first P. C. of W., W. H. A. Hammond. The council granted a chapter on October 24, 1885, and the council was duly constituted, as follows: John E. Poitson, T.I.M.G.M.; W. J. Haye, Rec., 1885-86; A. H. Poitson, T.I.G.M.; E. W., B. Rec., 1885-86; L. A. Poitson, T.I.G.M.; G. M., B. Rec., 1885-86. The membership was 60 in 1885.

MEETINGS OF THE GRAND COUNCIL. In Chicago from 1872 to 1877 inclusive, and from 1883 to 1885, the Grand Council surrendered its privileges to the Grand Chapter, R. A. M., in the years between 1877 and 1883.

K. T.

The history of this order of Christian Masonry in Chicago since 1871, has been characterized by many events of more than ordinary importance to the craft. The one conspicuous event in Tempelarism in this city, during the last decade, was the Triennial Convocation of the Grand Encampment of the United States, which was held in 1886. The commandery of the city resolved to commence the preparations for the entertainment of the army of Sir Knights which it was expected would attend, more than two years before the time for the meeting of the Convocation. The committee of arrangements, consisting of five members from each of the three commanderies, was appointed in the spring of 1878, from which various sub-committees were appointed from time to time. An executive committee of seven was chosen, consisting of Norman T. Gassette and Warren F. T. Uydoc of the Chicago Commandery, Lester L. Bond and Malcolm McDonald of the Chicago Commandery, and John A. Crawford, William H. Thompson and George M. Moulton of the St. Bernard Commandery. Of this committee, Norman T. Gassette was made chairman and George M. Moulton vice-chairman.

The amount of labor required to raise the necessary funds and to provide for the quartering and entertainment of the vast body of Knights and their companions, was enormous, but was successfully performed by the committee. The citizens of Chicago, outside the ranks of the fraternity, responded liberally to the call for money, over $30,000 being raised by the general committee. Of this amount over $31,000

The following table exhibits the membership of the chapters during each of the fourteen years from 1872 to 1885, inclusive:

BENEVOLENT INSTITUTIONS.

CHICAGO COMMANDERY, NO. 19.—This commandery has long been noted for the excellent management of its finances and its loyalty to the reg-
nular forms of Freemasonry. It has long stood on the roll of com-
manderies having more than one hundred members since 1837. Its members are among the most prominent and influential citizens of Chicago. The commandery is an active one and has had a large attendance at its different conclaves and elections. Its charities and public service work are of the highest character. Its funds are well invested and are used for the benefit of worthy causes. The commandery is also known for its public exhibitions and its participation in Masonic functions throughout the year.

The members of the commandery since 1837 have been:

The records have been: John Whitley, 1872; George V. Sheldon, 1872-74; George A. Williams, 1875; J. Trowbridge, 1876; James K. Matson, 1877; William G. White, 1878; L. F. Day, 1879-80; C. G. Higginbotham, 1881-82; George A. Williams, 1883-84.

For a time after the fire of 1877, St. Bernard accepted the invitation tendered by Chicago Commandery for the time being to occupy the Masonic Temple, west side Masonic Temple, and continued to hold its meetings there until the present hall was burned out in February, 1878, when it again accepted the hospitality of Grand Commandery. The hall now occupied was moved to permanent quarters in its new home At 180 East Kinzie Street. On that occasion the asylum was received into the Masonic Order. The grand officers and the fraternal related bodies, participated in a reception and a social occasion.

The Chicago Commandery held its first meeting in the new hall on June 25, 1878, and on the next day the great hall of the Masonic Temple was opened for public entertainment. The meeting was attended by many visitors from out of town, particularly from the eastern states.

The meeting was held in the Chicago commandery's new hall, which was the largest and most elegant building in the city. The hall was beautifully furnished and decorated with flowers, and was filled to capacity with a large number of dignitaries and guests. The grand officers were met by the members of the commandery and conducted to their seats.

The meeting was called to order by the chairman, who welcomed the members and guests, and introduced the grand officers of the commandery. The grand officers were then instructed to proceed to the Grand Commandery, which was held in the same hall. The meeting was adjourned until the next day, when the grand officers proceeded to the Grand Commandery.

William Harbourn Turner, of the firm of Turner & Kay, wholesale leather dealers, is the son of William and Maria (Morris) Turner, and was born at Cincinnati, O., on October 2, 1825. His parents were both of English descent, and his father, who was a merchant in Cincinnati in its earliest days, died in 1832. The son resided with his mother in his native town until he attained the age of thirteen, when he removed to St. Louis. Upon arriving there, Mr. Turner found employment in the leather house of H. C. Stilin & Co., and by his faithfulness and efficiency won the esteem and confidence of his employers. About 1841, Mr. Turner went to Alton, Ill., and commenced business as a leather merchant, being aided in his start by his former employers, who formed the company of William H. Turner & Co. During his residence in Alton he was held in high esteem for his business qualifications, and not less on account of his upright character and many social virtues. Having become very prosperous in his business there, he decided to locate in a city which presented better prospects for future greatness than Alton. Accordingly, in 1859, he came to Chicago and embarked in business with Leavitt & Nichols in the leather trade, under the firm name of Turner & Sidway, and his connection with that gentlemen continued for many years. Mr. Turner was at one time a member of three different firms—Turner, Leavitt & Co., Turner, Sidway & Ormayer & Co., and Turner & Sidway Leather Company, tanners. Consolidations and withdrawals have since occurred, and he is now only connected with the business of Turner & Kay Co. During his residence in business here, Mr. Turner has been successful, as might be expected from the energy, promptness and good judgment that have ever been his characteristics. Mr. Turner was initiated into Freemasonry on June 23, 1841, in the Lodge, No. 1, of Alton, Ill., and made a Master Mason on July 17, 1841. He was J. W. of that Lodge in 1852, S. W. in 1854, and W. M. in 1855. In 1856, he deputed from Illinois Lodge and appointed W. M. of Alton Lodge, U.D., which received its charter as No. 283; on December 8, 1859, he deputed from Alton Lodge, and joined Oriental Lodge, No. 33, on March 16, 1860. He was J. G. W. of the Chicago Lodge of Illinois in 1855. He was made a R.A.C. on December 12, 1851, in Alton Chapter, No. 8, and was king thereof in 1854 and 1855, and high priest in 1856; he deputed therefrom on October 21, 1859, with a Grand Affiliate to Illinois Lodge, No. 2, on February 27, 1860. He was R.A.C. of the Grand Chapter of Illinois in 1855. He received the Council degrees in Alton Council, No. 3, and in D. I. G. M. of that Council in 1853, T. I. G. M. in 1854, when he was Senior Warden of the Grand Council of Illinois. Of the Grand Council of Illinois he was G. P. C. of W. in 1853, and G. T. I. in 1855. He was made a K.T. in St. Louis Encampment, No. 1, in February 7, 1855, and then became a charter member of Belvidere Commandery, No. 2, Alton, Ill., and held offices therein as follows: Appointed junior warden at date of dispensation on March 25, 1855; elected generalissimo on November 14, 1855; E.C., 1855; recorder, 1856; and junior warden, 1857 and 1858. He deputed therefrom on January 9, 1860, and affiliated with Apollo Commandery, No. 1, on April 17, 1860. He assisted in the organization of the State Grand Commandery in 1857, and was grand recorder for 1857, 1858 and 1859; grand captain-general for 1860; grand generalissimo for 1861; deputy grand commander for 1862; and grand commander for 1863. In 1865, he was elected to the Grand Lodge of Illinois, and on April 9, 1864, the 33rd was conferred at the session of the Supreme Council for the Northern Jurisdiction, held in Boston on May 14, 1865. He was grand master of the State Grand Commandery in 1865, and first lieutenant commander in 1852; and was president of the Council of Deliberation of Illinois in 1856. A beautiful portrait of Mr. Turner adorns the volumes of "History of Masonry of the State of Illinois," published in 1866. "He has been prominent in advancing every interest of the institution of Masonry and has gained the confidence and respect of those with whom he has been associated in the order. Mr. Turner was married to Miss Honora Wheaton, daughter of the late Hon. Horace Wheaton, ex-Congressman from New York. Two children have been born to them; Honora Wheaton Turner, who died at the age of 44 years and ten months on January 13, 1868; and Turner, ten years of age. Mr. Turner is a member of the Union League Club; has been vice-president of the Western Manufactu-
turers' Mutual Insurance Company, since its organization in 1880; and is at present vice-president and auditor of the Rosehill Cemetery Association.

Mr. William A. Almini, ex-sheriff of Cook County, was born in Hesse Darmstadt on February 19, 1835. His boyhood was passed upon his father's farm, and during his youth he became an apprentice to the blacksmithing trade which he followed until his departure for America. He left for this country in 1857, and is said to have been one of the first to go to Chicago and make this city his home, where he has ever since resided. He followed his trade here until 1858, when he opened a shop of his own at Blue Island. He continued in business at that place for many years, and was one of the first to organize and make his home in the city. He has always been active in all public affairs, and is the recognized leader of his city. He is a member of the following Masonic bodies: Kilwinning Blue Lodge, Corinthian Chapter, Apollo Commandery, Oriental Sovereign Consistory, Medina Mystic Shrine. He was married in Chicago to Miss Josephine Brandin, who died without leaving one child. He married again, in 1866, Miss Mary VonAme, of Chicago.

---

The text provided appears to be a correction of the previously downloaded document. It contains the name William Almini, who became a prominent figure in Chicago. The text mentions his background, career, and family. It also includes historical facts about Chicago, such as the resignations of various figures, and the establishment of the city as a metropolis. The text also highlights the role of the Freemasons and their various lodges and chapters. The information is well-organized and presented in a clear manner, allowing a modern reader to understand the historical context and the significance of the events described.
JOHN W. BROWN was born in Warren County, Ohio, on August 12, 1832. Completing his education in 1853, he became a teacher in the public schools in his native State, and in 1854, removed to Quincy, III., where he established himself in the watch and jewelry business, in which he continued nearly eighteen years. There he was superintendent of schools for three years, and was also for a much longer time secretary of the Board of Education of that city. It should also be noted, that, through his untiring efforts, the educational interests of the city prospered and flourished as they never had before; he secured an increased rate of taxation for educational purposes, and under his administration was built up the Franklin High School, which has since ranked as the best school in that portion of the State. It was at Quincy, too, that Mr. Brown was made a Mason in Luce Lodge, No. 459, A.F. & A.M., on February 13, 1868, and later became its master. In 1873, he removed to Chicago, and, purchasing the magazine he still holds—The Mason, he became the first officer in January, 1874. Mr. Brown is now a member of Golden Rule Lodge, No. 726, Chicago, and its Master under dispensation, and of Quincy Chapter, No. 5, R.A.M., of Quincy Council, No. 15, R. & S.M., Beaufort Commandery, No. 11, K.T., and of Quincy Consistory, S.F.R.S., No. 32. He married in 1854, Miss Phoebe Jane Young, daughter of Moses Young, of Butler County, Ohio. They have five children, three sons and two daughters, all living.

ILLINOIS MASONIC ORPHANS' HOME.

For a number of years the question of establishing a Home for the widows and orphans of Masons in Illinois who might need the care of such an institution, has been agitated and plans partially perfected more than once looking to this end. In March, 1885, a number of well-known Masons perfected a preliminary organization for the purpose named, and, on March 17, obtained a charter from the State for the Illinois Masonic Orphans' Home, under which the following permanent organization was effected:

At a general meeting, called for the purpose at the Asylum of Apollo Commandery on April 17, 1885, the above action was discussed, together with the plans projected as provided in the constitution and by-laws of the organization, and received a hearty endorsement. The object of the Home, as expressed in the articles of organization, is—

"to provide and maintain, at or near the City of Chicago, a Home for the maternal and intellectual, moral and physical welfare of indigent children of deceased or indigent Masons, and to provide a home and asylum for sick or indigent widows of such deceased Freemasons."

Provision is made for annual membership on the payment of one dollar, and for life-membership on the payment of fifty dollars, with the usual provisions for bequests and donations. A large number of memberships, both annual and life, have been obtained throughout the State, and a beginning will be made in the erection of buildings as soon as a location shall have been decided on.

ORDER OF THE EASTERN STAR.

MASONIC OF ADOPTION is the title given to a series of degrees for women, arranged in France about 1765. On October 6, 1866, D. W. Thompson conferred the Eastern Star degrees upon about thirty persons, at the residence of Mrs. Cynthia Leonard, in this city, for the purpose of organization, which was done—

"MIRIAM FAMILY, No. 111."—The first officers were: D. W. Thompson, Chief Master Mason; Miss Maria B. Bradwell, patroness; J. H. Varnell, conductor; Mrs. Amos H. Bradwell, patroness; Lorraine J. Pitkin, conductor; Walter A. Stevens, treasurer; Mrs. J. H. Varnell, secretary; Mrs. Cynthia Leonard, Junior Warden; James H. Bradwell, warden; Mrs. Charles T. Will, A. W., John Porter Ferier, T. W.

At the first regular election of officers in January, 1867, Walter A. Stevens was elected patron; Mrs. Maria B. Bradwell, patroness; George W. Harney, conductor; Mrs. Lorraine J. Pitkin, conductor; on March 4, 1869, the charter issued to Miriam Family, No. 111 was surrendered, and a charter issued to Miriam Chapter, No. 1, by the Supreme Grand Patron of New York, was procured, and the Chapter of Miriam was chartered in the State of New York by the fire of October 9, 1871, and was restored on January 14, 1872, by the Supreme Grand Patron of New York, to the Grand Chapter of Iowa, and chartered under the name of "Miriam Chapter No. 1854, under dispensation of the Grand Chapter of Missouri on September 6, 1875. Under a resolution adopted at that time, Miriam Chapter was induced to continue its existence as a chapter, and a new charter issued by the same body on September 20, 1877. The charter was made:

Mr. Charles T. Will, H. M.; Mr. John H. Varnell, W. M.; Miss Charles T. Will, A. W.; Mr. W. B. McWilliams, T. M.; Mr. Charles T. Will, S. M.; Mr. W. B. McWilliams, J. W.

At the first meeting, January 14, 1877, the membership was as follows:

Mrs. Charles T. Will, H. M.; Mrs. John H. Varnell, W. M.; Mrs. W. B. McWilliams, A. W.; Mrs. W. B. McWilliams, S. M.; Mrs. W. B. McWilliams, J. W.

ODD FELLOWSHIP.

The institution of Odd-Fellowship is a wonderfully progressive in character; and, while it retains certain fundamental characteristics as essential to its life and
individuality, it admits of innovation in others. Changes which, taken as a whole, are considerable in degree, have been made in the work of the Order since 1871, the year which closes the period treated of in the second volume of this work. Business meetings are now held in the highest, or Scarlet, degree, instead of the lowest as formerly. The Order has returned to its cardinal, in the number of degrees, having dropped two, which were of American origin. It has also added a parade degree, characterized by a uniform and a special drill.

Odd-Fellowship has been much extended in European and South American countries during the past decade, and has broadened and strengthened at home. In Chicago it has grown greatly, as the details will show. In 1871, official statistics give the total membership in Illinois, at about the beginning of the year, at 37,775, or in nineteen years of 14,155, an increase of very nearly double. In 1884, the Order in the United States paid out in relief $2,111,926.80, an increase over the year before of $96,094.34. Its revenues for the former year amounted to $5,757,307.89. In Illinois the local Grand Lodge took the important step of codifying its law, in order to have a fixed basis for future legislation. The code was prepared by Dr. Samuel Willard, Past Grand Secretary.

Chicagoland has been honored by the selection of several of its citizens to places of high authority in the State and National organizations. E. B. Sherman has been grand master and grand representative; William H. Crooker, grand patriarch and grand representative; M. C. Eames, grand treasurer; and John C. Smith (present Lieutenant-Governor), grand scribe and grand representative during the whole period covered in the present volume.

The honorary part borne by the Order in the relief work at the time of the great fire, gave it prestige as well as strength.

The following lodges have all been opened in Chicago since December 1, 1871:

1871—Palm, No. 467; instituted on December 7, 1871, by John Corson Smith, G. M.

1872—Chicago Olympian, No. 477; instituted on February 9, 1872, by P. T. Tiedemann, P. G. of No. 329, First Swedish, No. 479; instituted on February 22, 1872, by E. B. Sherman, P. G. of No. 329, First Swedish.

1873—II. Eames, No. 529; instituted on December 12, 1872, by K. B. Sherman, G. M. This was the first French lodge, and is the only one. It was formed under a charter given by Henry Veyne and others of the French brethren present at the time. Northern Light, No. 544; instituted on March 18, 1873, by Peter P. Burtis, P. G. of No. 329, First Swedish. No. 556; instituted on October 1, 1873, by Augustus R. Spade, P. G. of No. 388, New P. N. P. No. 551; instituted on December 5, 1873, by E. B. Sherman, G. M.

1875—Perseverance, No. 587; instituted on September 14, 1875, by John C. Smith, G. M.

1876—Rebekah, No. 591; instituted on October 29, 1876, by J. Ward Ellis, P. G. M. This lodge received its dispensation in 1876, by the Right Honorable Sir Isambard Kingdom, Bt., M. P., for the City and County of London, England.

The lodge was at first very popular, and membership increased very rapidly. In 1876, the membership was about 170. In 1878, the lodge was in its third year, and the membership was about 400. It was one of the most active lodges in the city, and was known for its influence and strength.

1877—Daughters of Martha, No. 599; instituted on March 31, 1877, by A. H. G. Burtis, P. G. M. This lodge received its dispensation in 1877, by the Right Honorable Sir Isambard Kingdom, Bt., M. P., for the City and County of London, England.

The lodge was at first very popular, and membership increased very rapidly. In 1878, the membership was about 170. It was one of the most active lodges in the city, and was known for its influence and strength.

1878—Daughters of Relief, No. 600; instituted on September 10, 1878, by Alfred Stanley, G. M. This lodge was the first lodge organized in the city, and was known for its influence and strength.

1879—Little Egypt, No. 606; instituted on February 18, 1879, by J. Ward Ellis, P. G. M. This lodge received its dispensation in 1879, by the Right Honorable Sir Isambard Kingdom, Bt., M. P., for the City and County of London, England.

The lodge was at first very popular, and membership increased very rapidly. In 1878, the membership was about 170. It was one of the most active lodges in the city, and was known for its influence and strength.

1880—Daughters of Relief, No. 607; instituted on February 18, 1880, by J. Ward Ellis, P. G. M. This lodge received its dispensation in 1880, by the Right Honorable Sir Isambard Kingdom, Bt., M. P., for the City and County of London, England.

The lodge was at first very popular, and membership increased very rapidly. In 1878, the membership was about 170. It was one of the most active lodges in the city, and was known for its influence and strength.

1881—Daughters of Relief, No. 608; instituted on February 18, 1881, by J. Ward Ellis, P. G. M. This lodge received its dispensation in 1881, by the Right Honorable Sir Isambard Kingdom, Bt., M. P., for the City and County of London, England.

The lodge was at first very popular, and membership increased very rapidly. In 1878, the membership was about 170. It was one of the most active lodges in the city, and was known for its influence and strength.

1882—Daughters of Relief, No. 609; instituted on February 18, 1882, by J. Ward Ellis, P. G. M. This lodge received its dispensation in 1882, by the Right Honorable Sir Isambard Kingdom, Bt., M. P., for the City and County of London, England.

The lodge was at first very popular, and membership increased very rapidly. In 1878, the membership was about 170. It was one of the most active lodges in the city, and was known for its influence and strength.
Lodge, A.F & A.M., and they jointly erected Parker Hall, on the northeast corner of Clark and Madison streets. On February 21, 1870, the new hall was opened to the public. In 1872, the lodge was merged with the Grand Master J. Ward Ellis, and the name was changed to the Western Star Lodge.

On February 14, 1871, the lodge met in a hall over Biddle & Co., and the following officers were elected: Master J. H. Winters, Jr.; W. J. N. Goldring, R. Sec.; W. McParland, treasurer; P. N. Jamison, P. Sec.; W. J. N. Goldring, W. Sec.; and Charles Kennedy, W. Sec.

The Grand Lodge of Illinois, under the leadership of Grand Master Thomas F. Mitchell, opened the session with an address. The Grand Secretary's report showed a total of four hundred and ninety-two State lodges at work; the membership of all male orders on June 30, preceding, being 24,660. A gain of five hundred and fifty-three members in the Grand Lodge was reported, and the total membership of 1,824. At this session of the Grand Lodge a law was passed providing that no new charter should be granted in any city where ten or more lodges exist, on the petition of less than twenty persons, or without the approval of at least one-fourth of the working lodges in the city. The number of representatives to the Grand Lodge present at this session was four hundred and forty-three; of Grand officers, twelve; about one thousand Grand and representatives were in attendance during the session. P. G. R. Dr. Samuel Willard, of Chicago, gave the oration, and presented a plan for the future, which he still fills. E. R. Sierman, of Chicago, was elected Grand Master by an unanimous vote.

After a lapse of more than eight years, the Grand Lodge again met in Chicago, at McCormick Hall, on November 21, 1882. The session continued through four days, and much important business was transacted. Alonzo Elwood, G. M., of Sycamore, was the presiding officer. M. C. Eames, of Fort Dearborn Lodge, Chicago, who was appointed just previous to the convening of the Grand Lodge, acted as Grand Treasurer. The Grand Lodge at this session elected thirty-five lodge members and ninety-five representatives and twelve officers.

The report of the Grand Secretary showed an acquisition to the Order, throughout the State, of 5,827, making the total membership, on June 30, 1882, 32,048. The relief report showed that the total disbursements during the year were $73,105.27. The officers elected this session were as follows:

- EXCERSORS NO. 2.—The Grand Encampment of Illinois, as of Chicago Encampents presents a steady progress, although the growth of membership in this degree, as compared with the others, is small.

- ILLINOIS, NO. 3.—In the early days of Odd-Fellowship in the State, the Grand Lodge was an encampment in camp, which had but a brief existence. It was revived on June 13, 1873, by J. Ward Ellis, P. G. S. M. Sam M. H. Cook was the first charter member surviving to the present time.

- CHICAGO, NO. 10, was instituted in this city on September 21, 1848. The lodge was incorporated as a corporation in 1850, a State Grand Encampment was organized, and N. 10 then came under its jurisdiction.

- APOLLO, NO. 165. This was a German Encampment, was instituted on June 8, 1853, by John F. Groser, W. Sec., Fr. B. Scott, Sec.

- CHosen Friends. The title of Chosen Friends, No. 2, one of the original encampments of Illinois, was changed from Chosen Friends to the Encampment of Illinois, in 1853. It continued to function as an encampment in camp, in the early forties, which became defunct through the organization of a voluntary Baptists Church Company in Chicago.

- EXCERSORS NO. 2. —The Grand Encampment of Illinois, as of Chicago Encampents presents a steady progress, although the growth of membership in this degree, as compared with the others, is small.

- ILLINOIS, NO. 3. —In the early days of Odd-Fellowship in the State, the Grand Lodge was an encampment in camp, which had but a brief existence. It was revived on June 13, 1873, by J. Ward Ellis, P. G. S. M. Sam M. H. Cook was the first charter member surviving to the present time.

- CHICAGO, NO. 10. —This lodge was incorporated as a corporation in 1850, a State Grand Encampment was organized, and N. 10 then came under its jurisdiction.

- Sons of Veterans: 1
- United Ancient Order of Druids: 17
- Order of the Golden Chain: 1
- Order of Chaldeans: 1
- Temperance Societies: 10

MUSIC AND THE DRAMA

MUSIC.

In a higher sense, the musical activities of Chicago can be said to have begun since the fire. The unexampled rapidity of re-building was a concrete expression of a fever which permeated every part of the commercial and political life. Men’s hands were active because their minds were awake and teeming with thoughts of renewed opportunity. All sorts of philanthropic effort found congenial soil. The calamity touched so many that it quickened the feeling of human brotherhood beyond all previous experience. No longer did the average man seek to live and to die for himself alone; he recognized the great axiom of social order, that “We are members one with another.” The old Chicago was destroyed; a new one was to be erected in its place having something of the meaning of an ideal. The air was full of schemes for re-distincting the city, re-arranging the streets, collecting libraries and works of art. It was inevitable that Music and the Drama should experience the full force of so great a mental movement. Probably Music first felt the impetus, and this, mainly, from the accidental circumstance of the destruction of all the theaters. The concerts and lectures of the winter of 1871-72 were given in churches. Another incidental advantage of after-fire conditions was the division of the city into two great segments, the West Side and the South Side, separated from each other by a stretch of several miles of burned-over territory. Hence, there became two centers of local activity, the Union Park Congregational Church, on Ashland Avenue, and the Michigan Avenue Baptist Church, near Twenty-second Street. In these two places were given the Thomas concerts and all other public concerts of that memorable winter. Here also began a local activity of a musical kind, as will appear later in the history of the choral societies.

CHORAL SOCIETIES.—At the head of the musical activities of the city, in point of influence, must be placed the local societies for the study of choral music. Nothing can be done by a travelling company, or by any number of them, so educative in a wide sense as the work of these societies. When a hundred, or a hundred and fifty, singers, from all parts of the city, come together one evening of the week during several seasons, for the study of musical works of the highest class, it is safe to say that they themselves learn to appreciate the works they study in a manner wholly different from any idea of them that they could acquire from occasional hearings merely. Even the term “occasional hearings” is misleading; for, as the tables hereto appended will show, the performances of any great masterwork, excepting Handel’s “Messiah” (which it is the fashion now to give every year at Christmas) are so infrequent as well nigh to lose the cumulative effect of repeated hearings, even with the select few who make it a point to hear all of them; for the public at large, they afford scarcely a taste—each performance being over before the public, as such, has discovered that it was to have taken place. Next after the active members of these societies, their escorts and friends, receive educational impulses, for it is their rather dreary lot to spend many hours in waiting for rehearsals to be finished. In default of something better to do with their minds, the escorts listen to the music, watch the conductor, learn to appreciate the fine points, and in time become as fully en rapport with the works studied as the singers themselves.

Next after these two classes come the associated members and the more ardent music-lovers of the general public, who are drawn into the current. Whatever the motive that may first have influenced them, in the end they learn to share in all parts of the complex advantage offered by concerts of this class. Among these peculiar advantages are the following: First, a continuous work, always selected for good cause; second, and in consequence of the preceding, a musical atmosphere, music,
and not show, being the active motive of the performance; Third, competent solo artists in selections making important demands upon their powers. In the end these all unite into a complex educational unit. The serious work, the musical atmosphere, and the compe-
tent performance, make each other better appreciated. Thus, the tendency is to improve the taste of a constantly increasing number throughout a continually widening circle.

THE ORATORIO SOCIETY.—The leading American society of this kind before the fire was the Oratorio Society, led by Hans Balatka. The fire destroyed the library and scattered the members. Mr. Balatka removed to Milwaukee. The Oratorio Society was re-
vived soon after the great fire by its managers, O. Blackman and A. R. Sabin. The Handel and Haydn Society of Boston came to their aid with a donation of books, including sets of "The Messiah," "Israel in Egypt," "David," and a number of miscellaneous selections. J. A. Butterfield was elected conductor and W. S. B. Mathews organist. Rehearsals were held in the lecture-rooms of churches. The first performance under this régime was that of Handel's "Messiah" in the Union Park Congregational Church, on May 16, 1872. The solo artists were—Mrs. Clara Huck and Mrs. George B. Carpenter, sopranos; S. C. Campbell and James Gill, basses; and J. W. Bischoff, tenor. The orchestra numbered about twenty-two. The chorus sang more than creditably, the membership reaching about one hundred and fifty voices. The same programme was repeated a little later in the Michigan-avenue Baptist Church. This was about the last of the Oratorio Society. In the autumn of 1873 the rehearsals were resumed, and after some months of feeble effort a miscellaneous programme was prepared in the First Congregational Church, on a Thursday evening in January, 1873, but the building took fire and was burned to the ground about an hour before the concert was to have begun. By this new calamity the society again lost its library and the opportunity of pecuniary support. Several efforts were made later to revive it, and for some months Orlando Blackman conducted its rehearsals, but the membership was small, and presently it ceased to evince the slightest pretense of life.

First on the list of local societies since the fire, must be placed the name of the Apollo Musical Club, for this is the largest, the longest-lived, the most highly appreciated, and the most deserving musical organization which has ever had an existence in the city.

APOLLO MUSICAL CLUB.—In the summer of 1872, at the suggestion of S. G. Pratt, a number of gentlemen met at Lyon & Healy's music store, situated at that time on the corner of Sixteenth Street and Wabash Avenue, for the purpose of forming a musical association to be composed entirely of male voices, on the Mennonchhor basis, and for the practice and study of male choruses and part-songs. They organized by adopting the name and constitution of the Apollo Club of Boston, and during the time previous to giving their first concert, in January, 1873, they had collected the following named gentlemen composing the chorus:

The officers for 1873 were as follows:

G. P. Upton, president; William Sprague, vice-president; F. A. Bowen, treasurer; C. C. Curtis, secretary; W. C. Coffin, librarian; Fritz Foltz, S. E. Cleveland, P. A. Otis, musical committee; A. W. Dohn, conductor.

After a few weeks, S. G. Pratt resigned the directorship, and A. W. Dohn, formerly conductor of the Mendelssohn Society, was elected to fill the vacancy. Under Mr. Dohn's careful drilling, the Club labored faithfully and arduously, and with a degree of enthusiasm hitherto unknown to any musical society ever organized here.

The Club had a double object in view, first to attain a high degree of excellence in singing, and second to combine with this an equally high degree of social enjoyment. The concerts of the Club were only given to associate members, the number of whom, at one time, reached one thousand five hundred. The first concert of the Club took place at Standard Hall, on January 21, 1873, when the following principal choral numbers were produced:

The second concert of the Club was given at Standard Hall, on February 25, 1873, the hall being filled to overflowing "with one of the most elegant audiences ever assembled in Chicago."
HISTORY OF CHICAGO.

From the Tribune of February 17, 1874:

"The first of the series of concerts by the Theodore Thomas Orchestra and the Apollo Club of this city, at the People's Palace, was given Monday evening, and brought out a large and brilliant audience. The vocal numbers, being from Schubert, Schumann and Beethoven, were, of course, admirably selected. In the first, the "Omnipotent" chorus from the "Apollo," composed by the Germanian Maxmarchor, the whole chorus numbering about eighty male voices, which brought out its majestic rhythm in a very massive and solid style. The other two numbers were Schumann's "Paradise and the Peri" was produced. The soloists were

Miss Clara Doris, Myron W. Whitney, Mrs. O. K. Johnson, Mrs. O. L. Fox, Miss Elia A. White, Mrs. T. F. Stacey, Miss studies were made under the careful personal direction of George (now Sir George) Macfarren, president of the Royal Academy of Music, and of E. Silas, the composer. He was also a pupil of the Tenor Sol Fa college and became a member of the governing board of the age of twenty-two. As the commencement inspector and examiner of music teachers in the public schools, his department being that of theory and harmonic playing, with an eye to traverse the current of the great majority of musical subjects lower than his own. This brief record is conclusive upon at least three points: First, that he had an unusually rich and active musical endowment; second, that the faculty of command itself showed itself in him at a very early, almost a phenomenon-early age; and, third, that he must even then have evinced exceptional force and solidity of character, otherwise the conservative English educators would never have devised so important responsibilities upon one so young. Mr. Tombkins came to New York at the age of twenty-five, in January, 1870. There he was as organist, conductor, and private teacher of the voice, in the rather make-shift and unsatisfactory ways which are the only ones open to a young conductor before he has acquired local prestige. During this period his uncalled mastery of that little understood instrument, the harmonium or reed-organ, attracted the attention of many distinguished manufacturers. Messrs. Mason & Hamlin, then just constructing a masterpiece of reed work, containing seven full sets of vibrato, and all facilities practicable for the imitation of orchestral effects. This instrument Mr. Tombkins, alone among American organists, mastered and became able to play through most ravishing effects. His playing combined the intensity of a first-rate violinist with the depth and solidity of the organ, and the brilliancy, and almost the variety, of an orchestra. Hence, he was open to the advantage of all the assistance of a concert company. His playing excited general interest everywhere. It was in this capacity that he first came to Chicago. He was with the Chicagoans to one concert company. Mr. Tombkins' skill as a vocal leader soon made itself felt, and he became practically the artistic genius of the troupe, securing for its singing the fine qualities of
sympathetic finish which so much distinguished its work. His visit to Chicago happened to fall upon a time when the incapacity of the director of the Apollo Club was too obvious for dispute. By a lucky stroke of genius, or perhaps of inspiration, he was engaged as leader of the Club. This was in 1875, his first concert as leader of the Club having been given on November 17, of that year. It vital with emotion. He possesses an ear of great delicacy and fineness of discrimination for everything that belongs to musical effect. He has an analytic habit of mind, and is able to transmute his material through the leisurely operation of educational processes (such as he is an adept at devising) until he reaches the desired quality. This makes him a consummate drill-master. And, not least important, he is able to inspire confidence and carry off success with the aggressiveness of a born leader. He is full of fancy, is of great natural sweetness of disposition and of delicate feelment and the most agreeable companions imaginable. He was married in 1878, and has three children.

At the end of the Club's third season, the Tribune thus reviewed its progress:

The third season of this Club is now closed, and it is therefore a favorable opportunity to examine what has been accomplished. It gave its first concert on January 21, 1873, at Standard Hall, and since that time has given them several concerts in the nature of receptions to its associate members. In addition to these thirteen concerts, it has given three concerts to the public at large. The repertoire of Moennch's music is necessarily limited, but the Club has made up for this deficiency by calling in eminent solo talent, both vocal and instrumental, and in the thirteen regular receptions has produced some notable works, among them Schumann's "Dreamy Lake," Stoeck's "Husati Song," the Lebergrin Sextette, Rubinstein's "Vivace Hungarian," Hiller's Quintette, "The Night Song," Liszt's second "Cavalry Song," the Robert duet from "Studetta," Mendelssohn's "Standing Song," and "Rhine Wine Song," the double chorus from Mendelssohn's "Antigone," the Sextette from Mozart's "Costa Fau Tutti," the scena from Max Bruch's "Fridhjof," Hiller's "Wanderer's Rest," "Neukomm's "Er Innerste," Est," a Mozart instrumental Quintette, Kuechler's Quintette and Solo "Die Thal, Shallot," Liszt's "Walk at Midnight," Goldbeck's instrumental Quintette, Schumann's Variations for two pianos, Smart's "Hosanna's Daughter," Liszt's "Midsummer Night's Dream," Storch's "Serenade," and a Quintette from "The Magic Flute," Mendelssohn's Cantata, "The Sons of Art," Rhapsodie Hongroise, No. 2, of Liszt, Schumann's Novellette, op. 90, the Sextette, the Rubinstein Sonata for violin and piano, Liszt's arrangement of "Tamänzen," Tausig's arrangement of Weber's "Invitation to the Dance," and Trio from "The Night in Greta.

The extra concerts were three in number, the first inaugurating McCormick's Music Hall, November 13, 1873, and the second and third in February, 1874, in connection with the Thomas Orchestra, the important works produced being Schubert's "Die Almacht," Schumann's "Gipsy Life," the chorus from Beethoven's "Rains of Athens," and Schumann's "Paradise and the Peri." During its three seasons the Club has brought out a good many works, some of them the following: Schumann—Mrs. T. F. Stacey, Miss Clara Doria, Mrs. Elm Hare, Mrs. J. A. Farwell, Mrs. O. I. Fox, Miss Jessica Haskell, Miss Fanny Root, Mrs. L. B. Starkweather, Mrs. Fannie Goodnow, Mrs. L. Glow Evans, Mrs. J. C. Wenham, Alls—Mrs. O. K. Johnson, Mrs. W. S. Watrous and Miss Ella White. Twene—Alexander Bitchoff, E. W. Riehling, Henry Gates, L. A. Root, A. R. Sabatier, E. Schubert, Bardenf—Fritz Foltz and Thomas Goodwillie. Bass—Myron W. Whitney and Messrs. Sprague, Hubbard, Sloan, Bergstein and Bowen. Pianists—Miss Julia Rivo, Mrs. L. H. Watson, Messrs. Robert Goldbeck, Ledochowski, S. B. Mills, Emil Kuhling and T. Fuchs. Violinists—William Lewis and Hennen Allen. Cellini—Mr. Fleckhaus.

The officers for 1875 were as follows:

At the fourth concert, held on November 17, 1875, the following numbers were presented:

The solosists were Madame Alice Decevee and Miss Julia Rivo, and this concert was the first held under the
moved most delightfully, with all the freshness and elasticity of the best part-singing, and with the refined musical expression so often missed in performances of Handel's music.

Among the great works introduced by this society, and performed by them more than once, have been the following: Hoffman's "Cinderella," Bruch's "Frithjof," Rubinstein's "Tower of Babel," Berlioz's "Darnation of Faust," Gade's "Crusaders," part of "Judas Maccaabaeus," Mackenzie's "Rose of Sharon," and, in April, 1886, Dvorak's "Spectre's Bride."

Among the older works often given by them, with an excellence of finish previously unknown here, may be named Rossini's "Stabat Mater," "The Messiah," "The Creation," "Elijah," "Hymn of Praise," "Oh, come, let us sing," etc.

It will not have escaped notice that the Apollo Club has been of great use to concert singers, both local and foreign, by inciting them to learn new works, and afford- ing them a congenial audience, not to mention the important circumstance of profitable engagement—for it has always been the custom of the Club to pay well for services of this kind. An examination of the concert list will give an idea of what has been done in this direction.

CONCERTS OF THE APOLO CLUB.

1.—January 21, 1873. Standard Hall. Miss Haskell, Messrs. Goldbeck, Foltz and Bowen.
2.—February 25, 1873. Miss Anna Melhig, Mrs. Johnson, Mrs. Fox, Mr. Foltz.
3.—April 18, 1873. Miss Root, Napoleon Ledochowski, Bishop, etc.
4.—June 3, 1873. Miss White, Messrs. Emil Liebling and Foltz.
5.—September 30, 1873. Kingsbury's new Music Hall, Mrs. Huck, Mrs. Farwell, Mrs. Johnson, Messrs. Goldbeck, Lewis and Eichstein.
7.—November 13, 1873. Dedication of McCormick Hall, Apollo Club, Weniowski, Kinkel Bros.
9.—January 13, 1874. McCormick Hall. Mrs. Fox, Messrs. Rauhing, Foltz and Bowen.
14.—December 10, 1874. Methodists' Church Block. Miss Julia River, Mrs. Stacey, Messrs. Bergstein and Corby.
15.—February 3, 1875. McCormick Hall. Messersmes, Stacey, Starkevitch, Watons, Messers. N. Ledochowski, Holbrook and Bemstein.
17.—May 10, 1875. Farwell Hall. Mrs. L. H. Watson, Mrs. Welton, Quaker City Quartette, Messrs. Barnes and Bergstein.
19.—January 27, 1876. McCormick Hall. Mrs. Regina Watson, Mr. Smith, Mr. Lewis, Quaker City Quartette.
MUSIC AND THE DRAMA.

31—February 14, 1878. Part-songs, male chorus, music, etc. Miss Beebe, Mr. Ruff.

32—December 5, 1879. "Acis and Galatea," first part of "St. Paul." Miss Fanny Kellogg, Miss Abby Clark, M. W. Whitney, Mr. T. Barnes, Mr. Fesqodan.

33—February 13, 1879. "Frithjof," part-songs. Apollo, and Arion Club, of Milwaukee, Mr. Remmert, Mrs. Thurston.

34—April 21, 1879. Ladies' chorus. Request programme. Miss Fanny Whitney.

37—April 2, 1880. Bruck's "Frithjof." Apollo and Arion, Franz Remmert, Mrs. A. N. Elliott.

41—December 28, 1880. "Messiah." Miss Norton, Miss Cranch, Mr. Hill.

44—May 26, 1881. Central Music Hall. Mennerchor Concert. Mr. T. E. Butler, Mr. Knorr.

47—March 2, 1882. Central Music Hall. Miss Winant, Mme. Carreño, Male voices.

51—December 23, 1882. "Messiah." Miss Dutton, Miss Foresman, Dr. Barnes, Mr. Clark.

60—February 20, 1885. Central Music Hall. Bruch's "Frithjof," Prize Songs. Apollo and Arion, Mme. Hastreiter, Mr. Remmert.

62—December 25, 1885. Central Music Hall. "Messiah." Mme. Drasdlill, Miss Phoenix-Cameron, Mr. Knorr, and D. M. Babcock (his first appearance).

WILLIAM C. E. SEEBEOCK, pianist and instructor, son of William and Amelia Seeboeck, was born at Vienna, Austria, on August 21, 1829. After passing through the public schools of Vienna, he entered the Theresianum, from which he graduated, in December, during which time he was a classmate of the late King of Spain, Alfonso. At the age of nine years he displayed a remarkable fondness for music, and, as a boy, found his chief recreation and amusement in reproducing melodies upon various instruments. He became a pupil of Herman Gnesdner, of Vienna, in the study of the piano and harmony, and, after completing his course with him, studied under Johannes Brahms, and entered the Conservatory. His next instructor was the celebrated Rubinstein, with whom he remained nearly two years at St. Petersburg, Russia, and upon the expiration of that time he returned to Vienna. His concert work and public recitals in Vienna were received by the public and the press with enthusiasm, and Mr. Seeboeck took his justly merited position in the musical world as a virtuoso. The rare intelligence of his interpretations, brilliant technique, delicacy and vivishness of expression places him in the front rank of the orchestra field represented by the United States. Induced him to cross the Atlantic, and he selected Chicago as his future home. His talents and musical condition were recognized at once and his popularity as a pianist and instructor has spread throughout the West. He has been a member of and the pianist of the Apollo Club five years and has given the greatest number of concerts and recitals of any musician in the State. Mr. Seeboeck has composed several sonatinas, and as a pianist, composer and instructor his position is an enviable one in the musical world.

THE BEETHOVEN SOCIETY.—A second, and most important, element in the musical activity of Chicago during this period was the Beethoven Society; a musical organization of active members, male and female, for producing choral works, and a body of associate members for hearing and appreciating the same.

The Beethoven Society was the direct result of the visit of Carl Wolfssohn to Chicago in the winter of 1874. Mr. Wolfssohn, a ripe and enormously extended musical scholarship, united an unbounded enthusiasm for music as an art, and no small measure of personal magnetism, which attracted towards him all in like manner susceptible who came within his influence. The key-note of the Beethoven Society was enthusiasm for music. The list of concerts, elsewhere given, will show that, during the ten years of its existence, the Society produced a large number of important choral works, of which many were given by them for the first time in the city. Besides its three choral concerts a year, the Beethoven Society had a series of monthly reunions, for the performance of chamber music and for social intercourse. As these occasions, in the aggregate, were very numerous, possibly reaching as high as three hundred or more, hardly one of which lacked at least a single important work, it is easy to see that their effect upon the members could only have been stimulating and educational in a high degree. One of the first season's works was Mr. Wolfssohn's stupendous undertaking of playing the entire thirty-three sonatas of Beethoven for piano solo, as he had already done in New York and Philadelphia with such distinguished success. This plan he carried out in the spring of 1874, April 11 to June 13. The ten recitals of this series were given in Standard Hall, at the corner of Michigan Avenue and Thirteenth Street. They were attended by large and highly appreciative audiences, and they afforded the first public performances of very many of the later sonatas, and, in
HISTORY OF CHICAGO.

fact, the only public performance several of them have had in this city to this day. The great "Sonata for Hammerclavier," op. 106, has never been given here except by Mr. Wolfsohn.

During the following season the enthusiastic artist did a similar work in behalf of Schumann, whose piano forte compositions at that time were practically unknown here. This series of ten recitals began on March 13, 1875, at the Beethoven Society rooms, Nos. 108-70 State street, and closed on May 15. Incidentally, as a relief for the piano pieces, no less than forty-four songs of Schumann were sung at these recitals, many of them for the first time in the city. It would be impossible to measure the influence of such a series of recitals devoted to a great master like Schumann. In the following year, 1876, a series of Chopin recitals, of similarly imposing magnitude, was begun and carried through. These were somewhat less successful, by reason of the greater burdens which Chopin lays upon the pianist.

The standard of piano-playing had been very much elevated by Mr. Wolfsohn's recitals, and by the visits of several noted virtuosos during the years 1874 to 1876. In the following year (1877), Mr. Wolfsohn began, but did not complete, an enormous series of twenty-four historical piano recitals, covering the whole range of piano-forte literature. These fell victims of the necessary dryness of the earlier recitals, dealing with music of various periods and schools; but such were the methods of Bach and Handel, and their predecessors. The selections proved too monotonous for the hearers. During all this time, as well as throughout the history of the Society, there were monthly reunions devoted to sociability and chamber-music. There are no longer to be found any complete files of these programmes.

During the period when the Beethoven chorus was bravely measuring its well-meaning technique against the finest and most difficult choral works that happened to strike its fancy, only to perform them in a ragged and hit-or-miss manner, the rival society was diligently undergoing a process of education in the art of choral singing. As in doing this they brought out more and more artistic selections, and sung them better and better, the result was that the old-style chorus singing of the Beethoven Society was sharply criticised. Many of the singers left in order to sing where satisfactory vocal results could be obtained. These causes worked so powerfully, after a few years of choral growth, that not of wholly satisfactory existence, the Beethoven Society gave up the ghost, and was counted among the good things that had been.

LYON & HEALY.—Among the many well known music houses of the West none stand higher in the estimation of the public than that of Lyon & Healy. The house was established here on October 16, 1854, by George W. Lyon and Patrick J. Healy, who had for years been identified with the trade in the East. They first located at the corner of Clark and Washington streets, where now stands the New Opera House. Their entire clerical force at that time consisted of a cashier, porter and errand boy, all other duties being performed by the members of the firm, who could be found at their posts at early morning until late in the night. Their business gradually increased until, on January 1, 1870, they were obliged to move to larger quarters. They went to the Drake Building, at the corner of Washington and Madison Street. While located there they were completely burned out on September 11, 1870. Soon after they re-opened at Nos. 150-52 Clark Street. They again suffered a complete loss of stock in the memorable fire of 1871. Undaunted by these disastrous conflagrations, they again opened their doors at No. 150-52 West Madison Street, whence they soon removed to the frame church at the corner of Washington and Sixteenth Street. They remained there until October 9, 1872, when they located at the corner of State and Madison streets, where they now are in their present place of business. Here they have splendid quarters. The handsome building is 50 x 120 feet in size, four floors and basement in height. They deal not only in pianos, organs and music, but in every conceivable article known to the music trade. Their first floor is divided into two apartments, one devoted to sheet music and the other to retail pianos and organs; the second floor is the wholesale piano and organ department; the third is devoted exclusively to the display of imported pianos, harpsichords and the fourth floor for the sale of goods and repairing rooms. In the basement is the wholesale sheet-music department and packing rooms. Messrs. Lyon & Healy have recently commenced the manufacture of several kinds of music stands, and their factory occupies three floors in the building at the corner of Michigan Avenue and Madison Street. It is intended in the course of time to make their factory business as large as their wholesale trade has become, and with their characteristic energy and determination they will doubtless, within the next few years, have a manufactury which will be a pride to the city. On the first of January, 1883, Messrs. R. B. Gregory and Charles N. Post, who have heretofore been identified with the house, resided the past eighteen years, were admitted into partnership, and will, as heretofore, take an active interest in the affairs of this prosperous house. The operations of Lyon & Healy extend throughout the United States and Territories, and into the British Possessions, Mexico and South America. Their business is constantly increasing and their volume of trade amounts to over a million of dollars annually.

George W. Lyon, of the firm of Lyon & Healy, was born in Northbury, Mass., on January 15, 1833. He is of Huguenot descent and inherited the sturdy principles of character with which his ancestry was endowed. At the age of fifteen he left his native town and went to Boston, where for a little time he studied law. But finding himself not fitted for the profession and being a close musical student, on his arrival there he immediately entered into the music store of Charles H. Keith. At that time the repairing of all the musical instruments was a part of the pianoforte dealer's vocation, and it was there that young Lyon's mechanical as well as musical genius early attracted attention. Having a natural talent for the musical art, and having studied the use of the violin and harp, he appeared during his youth quite frequently in public entertainments. He was very skillful on the violin and harp, and as the latter was his favorite instrument he was more often heard upon it than on the violin. The attention of several of the most successful music publishers, Oliver Ditson, was early attracted toward Mr. Lyon, and the latter was for many years connected with Mr. Ditson in his business. He afterward was with the house of Henry Tolman & Co., of Boston, and it was while he was with them that he and Mr. Healy decided to come into the wholesale music business. In July, 1864, these two gentlemen located in this city, and a few months later opened up their music store. For many years Mr. Lyon has devoted his attention to improvements on musical instruments, principally pianos and hand instruments; and the records of the patent office at Washington show that no individual connected with the general music trade is so frequently successful in obtaining letters-patent as he. Mr. Lyon has always been interested in everything that pertained to the advancement of the musical art in this city, and his name and person are familiar to nearly everyone professional musician. He was married at Pine Lake, New York, January 15, 1855, to Miss Emily Sands. They have two children,—Mary and George.

Patrick J. Healy, of the firm of Lyon & Healy, was born in Ireland, on March 16, 1830. At the age of ten, with his family, he was emigrated to the United States, and was located in the City of Boston. When he was fourteen years old he obtained a position as an errand boy with the music house of Henry Tolman & Co., of Boston. Industrious and ambitious always, he was rapidly promoted and when he attained his majority he was practically the business manager of the firm. Thus his life was passed until, with George W. Lyon, he founded the well known music house of Lyon & Healy in this city. During his connection with Tolman & Co., Mr. Lyon was also employed in that concern. For the past thirty-two years these two gentlemen have been steadfast friends and almost inseparable companions, and many were the air-castles constructed together previous to July, 1864, the month and year in which they came West and united to make their fortune. In the following year, Lyon & Healy opened for business, and since that time Mr. Healy has had charge of the business management, and to his forethought and keen executive ability is greatly due the success of this now well known house. Mr. Healy was married, October 31, 1853, at Boston, Mass., to Miss Mary A. Griffith. From this union were born James, Raymond and Paul. Mr. Healy was again married, December, 1882, to Miss Anna Hannah, who, it is stated, have two children,—Marianette and Vincent. Mr. Healy's eldest son, James, is at present employed in the house of Lyon & Healy.

LOUIS FALK, one of the leading organists and musicians of this country, son of John A. and Wilhelmina Falk, was born at Union, O., December 14, 1848. When he was two years of age his parents came to this country and located in Pittsburgh, Penn., where they remained three years, afterward settling in Rochester, N. Y. It was there, at the age of seven
years, that he began his musical studies on the violin with Professor A. Baar, a violinist of more than local reputation. A. Baar began the study of the piano-forte under the guidance of his father, who was a professor of foreign languages and mathematics in a select school, and with an accomplished organist. At the age of eleven, young Louis accepted the position as organist of the first of the Street Lutheran Church, which position he held until 1869, when he came, with his parents, to this city. Here he remained a pupil in his father's private school, and was organist of the Church of the Holy Name, until 1865. He then went abroad, to complete his musical studies, and became a pupil of the celebrated composer and organ virtuoso, Dr. William Vockmar, in Homberg, Hesse Cassel, with whom he remained two years. The following two years were spent in the celebrated Leipzig Conservatory of Music under the tuition of such masters as Ignatz Moscheles (piano), Dr. Pepperitz (organ), E. F. Richter and Moritz Hauptman (Theory of Music), and has filled the position of soprano soloist in the Choir of the Messiah and Land and Luther Church in this city, and filled several organist positions in the past ten years. They have one child,—Corina Francesca, born in 1881.

Mrs. H. Huefner-Harken was born at Jever, Oldenburg, Germany, on July 27, 1845, the daughter of Albert Hauptman and Helene Catharine (Diesendofen) Harken. She was educated at Jever, and also studied music there during her school years. At the age of fourteen she went to Berlin, and there took a musical course at the Sternshe Conservatory for three years, also taking lessons of Professor Richard Wuerst, during that time. At the termination of these studies she was advised, by several Capellmeisters, to study for the Opera. She remained a pupil of the Conservatory of Music in Paris, and was engaged by the Grand Opera, also at the Opéra Comique, during the seasons of 1874, and 1875.

Miss H. Hauptman was born in Jever, Oldenburg, Germany, on July 27, 1845, the daughter of Albert Hauptman and Helene Catharine (Diesendofen) Harken. She was educated at Jever, and also studied music there during her school years. At the age of fourteen she went to Berlin, and there took a musical course at the Sternshe Conservatory for three years, also taking lessons of Professor Richard Wuerst, during that time. At the termination of these studies she was advised, by several Capellmeisters, to study for the Opera. She remained a pupil of the Conservatory of Music in Paris, and was engaged by the Grand Opera, also at the Opéra Comique, during the seasons of 1874, and 1875.

Mrs. Huefner-Harken was born at Jever, Oldenburg, Germany, on July 27, 1845, the daughter of Albert Hauptman and Helene Catharine (Diesendofen) Harken. She was educated at Jever, and also studied music there during her school years. At the age of fourteen she went to Berlin, and there took a musical course at the Sternshe Conservatory for three years, also taking lessons of Professor Richard Wuerst, during that time. At the termination of these studies she was advised, by several Capellmeisters, to study for the Opera. She remained a pupil of the Conservatory of Music in Paris, and was engaged by the Grand Opera, also at the Opéra Comique, during the seasons of 1874, and 1875.

This name means "Rearner of the son of a Bear," in the Skandinavian tongue.
great poet and dramatist. At an early age she became a pupil of the eminent composer and song-writer, Halffdan Kjerulf, and later of Ernest Haberbiir. The result of this instruction, allied to her natural ability, made her a prominent pianist and instructor in her own country. In 1871, she came to this country, and during the following four or five years performed at concerts in most of the cities in the West and Northwest. In 1875, she was married to Mr. Brittan, at the establishment of the Hershey Music school she became a prominent member of the faculty as a teacher of the piano, remaining with that school for two seasons. Her reputation and proficiency as an instructor soon won recognition from the first musicians of this country, and her time became so largely occupied that for the past eight years she has devoted herself entirely to teaching. Her successes and recitals have been among the most brilliant and successful given in this city, while her influence toward higher art in music, and her ability in her demonstration, places her among the most prominent musicians in the West.

CHARLES H. BRITTAN, vocal instructor, is a son of Joseph and Mary Brittan, and was born at New York City, on December 23, 1836. He received his education in Boston and New York, and from boyhood has devoted his attention to music. In the spring of 1877, he came to this city and established a school in Crosby's Opera House, and inaugurated a series of concerts which gave him an enviable prestige in musical circles. He was one of the projectors of the well-known Apollo Club, and was one of the original members of the Beethoven Club. Mr. Brittan pays special attention to cultivating the voice for opera, and for the past seven years has been accredited with unusual success in the department of vocal training. During 1881, he was director of the Cottage Music School of Chicago, a conservatory, at St. Louis, the oldest institution of that city. Besides his duties as an instructor he is the author of many of the finer critiques appearing in the daily press of Chicago. Mr. Brittan's instruction is held in high esteem by a large number of pupils, and the profession extends warm praise for his theoretical and practical methods. Mr. Brittan was married, on August 11, 1851, to Miss Jessie L. Fawcett, of Chicago. They have one child, Walter.

CHAMBER-MUSIC.—The cultivation of chamber-music may be regarded as a fair measure of the progress of a community in true musical taste. In the olden time, when musical students universally learned to play upon the violin and other instruments, as well as the piano-forte and organ, chamber-music was an ordinary household incident, just as piano-playing now is, with this difference, that the association of several friends for an evening of chamber-music betokened a love of music for music's own sake, as distinguished from personal display, and a taste, moreover, for such coloring as the combination of several instruments made possible. Moreover, the violin is, as Berlioz calls it, "the woman's voice of the orchestra." It thrives and the melody with an intensity and heart-felt expression which neither the piano-forte nor the organ can do more than weakly imitate, at a long distance behind. Mozart, Haydn, Schubert, Spohr, and all the lesser masters, wrote copiously for combinations of this kind, always expecting their music to be played by performers of no great ability,—in short, by amateurs. Such music is comparatively unknown in America as yet, partly because so little chamber-music is known, partly because much of this music is without the intensity of expression and contrast demanded by high-strung modern ears, and partly, as already specified, because the unadventured music-lovers, who would properly enjoy this music, have not as yet acquired the habit of making chamber-music.

To speak quite plainly, there is a great deal of the chamber-music of such masters, even, as Mozart and Schubert, which is hardly worth while performing at all. During 1882, much chamber-music has been known works of this class may be mentioned the Beethoven sonatas for piano and violin, in C minor, the Kreutzer sonata, the trio, opus 70, the later string quartet, the Schumann quintette, and many later works by Rubinstein, Saint Saens, and others. Works of this magnitude demand artistic players and a homogeneous ensemble; they also have to be heard many times before the casual listener is able to discern their beauty amid the amplitude of details. They need, therefore, a conjuction of artistic players with cultivated and earnest hearers—a concert combination rare the world over, except in a few musical centers and under the inspiration of some artist or artists of commanding fame.

Nothing like this has as yet come to pass in Chicago, although the signs give promise of it within a comparatively short period. Already before the fire, William Lewis, the violinist, had begun to be prominent in the musical evenings given under the auspices of the great music-sellers, Root & Cady. Very soon after the fire he resumed his activity in this direction as opportunity served, making many personal sacrifices for the sake of assisting in this class of music. As soon as Mr. Wolfsohn came here, he found in Mr. Lewis an active coadjutor. Eichheim, the cellist, came soon after, and these three played a vast amount of chamber-music at the re-unions of the Beethoven Society and elsewhere, throughout the career of the Chicago Musical Association. The opening of the Hershey Music School, in 1876, led to the production of much music of this class by Messrs. Lewis and Eichheim and Clarence Eddy.

Much was done for chamber-music, also, during this period, by Hans Balatka, who had associated with him Mr. Troll, the violinist, his own son, Chr. Balatka, as pianist. Edward Heimenah, also, formerly one of Thomas's violins, and later with a Boston Quintette Club, resided in Chicago for several years, and was associated at different times with Wolfsohn, Liebling, Seebrock, and Miss Amy Fay in the production of chamber-music. All of these efforts, excepting those of Mr. Wolfsohn and the Beethoven Society, were spasmodic in character, rarely lasting beyond a single season, poorly attended and therefore not very useful; for it is evident that no cultivation of public taste is to be effected by concerts which the public will not attend. Mr. Rosenbecker, the conductor and violinist, has assisted in the production of many important works, but his career as conductor has been so much more important and persistent that it casts his efforts in this department into the shade.

During the seasons of 1879, 1880, 1881 and a part of 1882, the Liesegang String Quartette gave chamber-concerts in Brand's Hall and elsewhere, in which a large number of interesting works were presented in a creditable manner. Unfortunately the programmes of these concerts have not been preserved.

Emil Liebling has, also, been an important factor in the cultivation of chamber-music since 1882, his regular series of piano recitals everywhere, and a piano recital from 1876. Among the principal chamber works produced by Mr. Liebling were the following:

1880-81, Hummell, septet, op. 74; Rubinstein, octette, op. 9, and quintette, op. 99; Mozart, quartette in G minor. 1881-82, Kaff, sonata for piano and violin, op. 78; Rubinstein, trio, op. 52. In 1884, three sonata recitals from Durante and other writers; Grieg, sonata, for piano and violin; Beethoven's quartette for piano and strings; and many important works by other writers, as well as a number of other representatives of Chicago composition.

CLARENCE EDNY, organist and musical instructor, was born at Greenfield, Mass., on June 23, 1851. From early childhood he evinced a marvelous fondness for music, and with years of maturity it became a passion with him. He soon learned to reproduce melodies he heard, and improvisation became his greatest pleasure. At

HISTORY OF CHICAGO.
MUSIC AND THE DRAMA.

637

The age of eleven years he was provided with a careful teacher in Miss Eliza Bennett, whose pupils have adorned the musical world, and have become distinguished on the operatic stage. Among those whose names are familiar to the public may be mentioned Miss Grace Hitz, Mrs. May Phoenix-Cameron, J. L. Johnston, three of the members of the Chicago Lady Quartette, whose combination of their voices has been recognized as one of the finest in the world. Mrs. Hershey-Eddy was married on July 1, 1879, to Clarence Eddy.

Jessie Bartlett-Davis.—During the past few years America has become quite noted for its production of famous singers, and the Western World has contributed to the beauty of music a number of pupils, some of whom are already known to the public. Miss Jessie Bartlett-Davis, the daughter of a famous conductor, whose residence is in this city, is the daughter of the late Mr. Eddy, who was an acknowledged favorite in her immediate neighborhood, and who made her name known in the operatic world. She was born on September 9, 1875, at Brooklyn, New York, and was reared in the musical schools of the city, where she received a thorough musical education. At the age of twenty-one she married a celebrated conductor, who conducted the Chicago Symphony Orchestra, and who was one of the most successful conductors in the world. She was a pupil of the late Mr. Eddy, and was one of his most successful pupils. She has been heard in all the principal cities of the country, and has been received with such enthusiastic applause that her name is now known throughout the world.

Mrs. Sara Hershey-Eddy, musician, pianist and vocal instructor, was born in Lancaster County, Pennsylvania, and is the daughter of Phineas Hershey, a prominent citizen of that county. She was educated in the public schools of that city, and was graduated from the University of Pennsylvania. She was married to Mr. Eddy, a prominent conductor and choirmaster, who was one of the most successful conductors in the world. She was a pupil of the late Mr. Eddy, and was one of his most successful pupils. She has been heard in all the principal cities of the country, and has been received with such enthusiastic applause that her name is now known throughout the world.

LYN, N. V., where he received his education. In his boyhood he displayed a natural aptitude for music, and at the early age of seven years he sang in concerts at the Academy of Music, Brooklyn. Later he became a pupil of George William Warren, with whom he studied; at the same time he was a member of Mr. Warren's choir, and during his stay in that city sang with Madame Faustina Hodges in Grace Church, also in St. Luke's and other choirs of equal note. In 1859, while Thomas to sing in New York, from which he subsequently went abroad to finish his vocal education. After a short stay in Paris, he went to Florence, Italy, and remained two years under the instruction of Vincenzo Bellini, for the same time taking lessons from Salviati. At Milan he studied with Felice Varesi, and while there devoted considerable attention to the character of "Rigoletto," in the opera of that name, which rôle Felice Varesi created and made famous. Mr. Sweet made his début in the part of "Forza del Destino," at Ancona, Italy, and received an ovation of applause from the public and was warmly praised by the press.

From Ancona he went to Berlin, where he sang three seasons; afterward sang in the King's Theater, Athens, in Italian opera. After an engagement at Reggio nell'Emilia, he sang in Florence, Italy, and at Barcelona, Spain, and other musical centers, and returned to America with Madame Grétry in 1858-52. He taught in Boston, also singing in opera there and in New York, until the close of 1853, when he came to Chicago and devoted his attention to instruction.

In the fall of 1855, he accepted an engagement with a piano firm working in New York, from which he returned in December. Mr. Sweet's voice is an exceptionally fine natural baritone, and, with the training obtained from the best instructors in the world, is recognized by critics and the public as being one of the finest voices in the United States at present known by the musical worlds of both Europe and America. Mr. Sweet was married, on July 22, 1880, to Miss Elvira Bariotti, of Milan, Italy, and their two gifted children, George and Alfred.

CHICAGO QUINETTE CLUB. The most important and long-continued organization of this kind has been the Chicago Quinette Club, composed of Miss Agnes Ingersoll, William Lewis, M. Eichhorn, Heenan Allen, and Mr. Pelflage. The combination had its origin in the enthusiasm of the pianist, Miss Agnes Ingersoll, who for some years had been in the habit of playing duos and trios with Lewis and others. Mr. Lewis entered heartily into the scheme, and both artists made many and long-continued sacrifices before they succeeded in establishing their concerts upon a paying basis. From the beginning, January 6, 1879, to January 1, 1886, the Club has given fifty-one concerts.

They have given, for the first time in Chicago,—

Kohnbeiner, trio in B flat, op. 124; trio in D, op. 31; quintette, op. 114; and quartette for strings, op. 89. Rubinstein, sonata, op. 13; sonata, op. 39; quartette, op. 66. Brahms, trio, op. 8; quintette, op. 35. Kiel, trio, op. 31; Scherwenka, trio, op. 1; quartette, op. 31. Chopin, Schubert & C., trio, op. 1; quartette, for strings, op. 193, No. 2; quartette, op. 202, No. 2; trio, No. 3, op. 88; Isolde, quartette, op. 76; trio, op. 59. Reinecke, quartette, No. 3; Saint Saens, trio, op. 18; sonata for piano and 'cello.

At the present time the Quinette Club appears to be thoroughly established. Its standard of playing is continually being improved, and the audiences are large and constantly increasing.

MISS AGNES INGERSOLL, musician and piano instructor, daughter of Frederick and Susan Ingersoll, was born at Vernon, Oneida Co., N. Y. Her musical talents are inherited from her father, who, although not a theoretical musician, possessed gifts of no mean order, and did excellent work in the church choirs of Vernon and vicinity. She received most of her education in Milan, Ohio, and at he at the Conservatoire of Campanulique, where she graduated with honors in the class of 1867. Her first musical experiences and early years, and her inclination was carefully cultivated by an elder sister, who was a pupil of the famous Joub Zundel. Later, she studied piano playing with Gustave Pacquier, of Campanulique, and subsequently under S. R. Mills, of New York. In 1875, Miss Ingersoll went to this city and continued her studies with Robert Goldbeck. Afterward, began her work as an instructor. Miss Ingersoll has been always connected, with the view of propagating herself in the work of her profession, with her literature, and received instruction from Reinecke, of the Leipzig Conservatory, also of Jadassohn, of the same city, and, with thorough work in both Berlin and Paris, has accomplished the task of becoming a thoroughly educated musician. In connection with William Lewis, she was the prospector and organizer of the well-known Quintette Club, of this city, and has always been a leader in concerts and similar entertainments in musical circles of the city and Hyde Park. Her work has been of the practical and meritorious character, which has given her a thorough knowledge of musical education which enables them to appear to an advantage wherever placed, either in public or private. Her long and successful career as instructor, and the number of her pupils who have acquired a brilliant reputation in New York, and have made a lasting comment upon her teachings. She devotes her entire attention to large classes in the city and at Hyde Park.

MISS LEWIS is one of the most musical people of Chicago who have won considerable reputation at home as well as abroad is William Lewis, violinist, and a member of the Chicago Musical Company. He is an Englishman by birth, having been born at Devonshire, in 1837. Frederick Cady, one of the founders of the company, was an older brother of William C. Cady, formerly of the firm of Root & Cady, held a musical convention at Monroeville, O., and his attention was attracted to Mr. Lewis, on his appearance there with an offer of his services as a violinist. Mr. Cady engaged him as a violinist, and he was placed under the tuition of Colonel J. H. Wood, afterward well-known in this city, to play at a concert given by the "Black Swan" in Cleveland. This was the first time Mr. Lewis received any considerable remuneration for his services, the contract calling for $35.

The following year Mr. Lewis's father died, and he then made an engagement with the Continental Vocalists, with whom he was connected for seven years for his services. However, he accumulated a small amount of money, and went to Europe, living there for some time by opening a grocery. The business proved a failure, and he then took a position in the music house of Root & Cady, and also attended to his professional work, for he was then a violinist of recognized ability and a great favorite in the Philharmonic Society. Messrs. Root & Cady sent him to Europe, in 1870, upon a business errand, and the following year they promised he should have an interest in the business. Root & Cady lost almost all in the fire of 1871 and in their attempt to pay their debts in full. The financial panic of 1873 further disturbed the struggling firm, and they dissolved. Then Mr. Lewis formed the firm of Root & Lewis, in company with E. W. Lewis, and later he became associated with Mr. Cady, and also resumed his professional work. In 1875, the combination which originated the Root & Sons Music Company absorbed the firm of Root & Cady, along with those of George F. Root & Sons and Lewis, and Root & Lewis, with whom Mr. Lewis entered into a firm with E. G. Newell formed the Chicago Music Company. In this firm are also interested William A. Pond, the well-known publisher of Music, and C. A. Zoobisch, of the same city, a heavy dealer in musical merchandise. In 1876, Mr. Lewis was taken into partnership with Messrs. Lewis and Newell, and to the general music trade of the Chicago Music Company was added the sale of pianos. As a violinist, Mr. Lewis is one of the very first, and a musical expert speaks of him "as the possessor of natural genius for the violin, which, patiently and laboriously cultivated, has made him an acknowledged artist in his line. He is modest, amiable and generous, ever willing to give his services in the interest of art, and endowed with a wholesome contempt for all charlatanism and pretense in the profession." Mr. Lewis was married, in 1860, to Elizabeth G., a daughter of Edward Gibs, a merchant of Milan, Ohio. They have five children, of whom Frederick C. Lewis. The daughter, now a young lady, studied for five years under tutors in this city, and then finished her instruction with a pupil of J. B. Wallack, of New York. Miss Lewis is now playing professionally, and has already distinguished herself as a pianist and conductor.

LEWIS A. PHILIPS, tenor and vocal teacher, son of L. C. and C. C. Phillips, was born at Burlington, Vt. During his childhood his parents came west, and he was educated in Grinnell, Iowa, where he received his early education in the college at that place. He possessed remarkable musical talents at an extremely early age, his parents encouraged him and eventually sending him to Chicago, where he studied until he reached the age of 18, and then went abroad to finish his musical education. He became a pupil of Adolph Schenon, of the Leipzig Conservatory of Music, going later to study in Italy, where, at Milan, he studied for four years under the celebrated Sig. Lamperti, and in Florence finished his study of the
Italian method with Sig. Vannucchi, after two years of close appre-
thecit of his Italian despotic Sassovigno, in 1872, with signal success, which he supplemented by appearing at Pavia in "Traviata," where he received the highest commendation. After completing an engagement with Mme. Carlotta Pati, in whose concert at Baveno, where he enrolled at the academy, frequently he would be graduated in the sixteenth year. During his boyhood he evinced a remarkable fondness for music, and early showed that he possessed a fine ear for vocal melody. He began voice culture in 1872, in Berlin, under L. W. Wheeler, and became a member of the choir of Dr. Pettnam's, where Barnabée had charge of the music. After teaching for some time in Montpelier, Vt., he went to Burlington and resumed teaching, and was highly successful with large classes. At the end of four years he removed to Montpelier, where he appeared in concerts, and was popular as an instructor. In the fall of 1879, he came West, and located at St. Louis as teacher, remaining three years, during which time he charge of the music in the First Church. Late in 1882, he was induced to come to Chicago, and has since been engaged in his profession in this city. His natural talents, highly cultivated by years of steady, persevering training, together with the gift of being able to impart his extensive knowledge of voice culture, places him in the foremost rank of instructors. His popularity in vocal circles and the recognition of his abilities as a teacher by the profession has since led him to the impressive position of which he devotes his entire attention. He is tenor and director of music in Trinity Episcopal church. Mr. Phillips was married on August 21, 1872, to Miss Alice Reidfield, daughter of Judge Timothy F. Reidfield, of the Supreme Court, Montpelier, Vt. They have two children; Helen R. and Timothy R.

PIANO-FORTE AND VIOLIN VIRTUOSO.—In one department of musical activity the record of Chicago has been very brilliant since the fire; namely, in that of the piano-forte. Almost every year has added a great name to the list of first-rate artists who have been heard here. In 1872, Teresa Carreno and Rubinstein made their first appearances here. The former appeared at the Michigan-avenue Baptist Church, in a lecture-course concert, in connection with her husband, Emil Sauret, the violinist. Rubinstein appeared at Aiken's theatre, on December 12, Wieniejaw, the violinist, also made his Chicago début at the same time. It would be impossible to reproduce the impression made by this colossal genius. Rubinstein's enormous power, his wonderful tenderness, and his human passion made a fervent style of playing which touched the listeners, in spite of their natural indifference to piano-forte music.

In 1874, Miss Julia Rivé made her first Chicago appearance, at a concert of the Apollo Club. Her playing was a great surprise, and she may fairly be said to have introduced a new era in purely brilliant piano-playing. In 1875, Mme. Madelaine Schiller was heard in concert with the Thomas orchestra. In 1876, came that prince of classical pianists, the eccentric and masterful Von Biilow, the apostle of the correct and the intelligent. The charming Mme. Eisspoff made her début at the new Chicago theatre, on January 8, the representative of a style of playing as graceful and elegant as need be. William H. Sherwood made his Chicago début at the opening of Hershey Hall, January 23, 1877. The breadth, intelligence and poetic quality of his playing were immediately perceived, and his influence has been extended every year since. In 1879, Rafael Josephy came, the paragon of dainty neatness and purely pleasing performers. Franz Rummell, in 1880, made but little effect, Josephy's delicacy having turned the current of popular appreciation in a direction to one side of Rummell's good qualities. Boscowitz, the genre pianist, appeared the same year. Since 1880, no new pianist of any great importance had been here until December 31, 1885, when Mme. Helen Hope- kirk made her début. In the interim, however, public taste in this class of music has been considerably advanced, in consequence of repeated recitals by Schlesinger, Neupert, Louis Mass, Mme. Carreno, and Mme. Rivé-King. These artists, the peers of any pianists in the world, have been heard so often and in so great a variety of music that there are few cities where a great artist will find more appreciative hearing than in Chicago.

The principal débuts of violinists have been the following: In 1872, as already noted, Wieniejaw was heard for the first and only time. Emil Sauret was heard in the same year. Rubinstein was heard for the first time, in McCormick Hall, December 12, 1878. Lichtenberg had been here a few months earlier. Wilhelmsj's playing may be regarded as having set the standard for criticism of violin-playing, just as Rubinstein had done before for piano-playing. Only a few months later, February 4, 1879, Edward Rumenyi, the Hungarian violinist, made his Chicago début at McCormick Hall. After this there was no great violinist here until Ovide Musin appeared.

NAPOLÉON LEDOCHOWSKI, pianist and teacher, is a son of Constantin and Louise (daughter of Baron de Meneval, secretary to Napoleon I.), was born at Paris, France, in April, 1849. His early education was received from private tutors, and finished at the Sorbonne University, from which he graduated at the age of twenty. He then began the study of law, but afterwards entered upon the study of music, and received his diploma three years later. During this time he had assiduously cultivated his musical talents, studying for several years under the instruction of Chopin's pupils. In 1879, he came to this city and began teaching; shortly afterward associated himself with Robert Goldbeck, as a teacher in the Conservatory of Music, then located at the corner of Indiana Avenue and Twentieth Street. Mr. Goldbeck subsequently went to St. Louis, and he assumed the entire charge and direction of the Conservatory. Later he confined himself entirely to private instruction at his rooms over Kimball's piano store, where he remained for several years, and then removed to the Weber Music Hall, his present location. Mr. Ledochowski's playing, from a technical standpoint, is of an exceptional character, and may be fairly said to be that of a virtuoso, his finger work being perfection, and his interpretations of both old and new compositions being possessed of the intelligence of a master. His success as a teacher is second to none in Chicago, and the surprising progress of his pupils, many of whom have become popular soloists, is a sufficient guaranty of the perfection of his methods.

ANGELO DEPROSSE, son of Jean Batist and Anna DeProsse, one of the most prominent pianists and musicians of Chicago, was born at Munich, Bavaria, June 11, 1843. His illustrious descent, replete with eminent opera singers, and many musical stars owes their ability to his enthusiastic assistance. His mother was a brilliant pianist, and an elder brother, Anton DeProsse, has immortalized himself in songs belonging to music of the future, which are destined to become popular in the musical world; he wrote the cantatas of David's Anointing as well as several operas. Although of French descent, Mr. DeProsse received his education in Germany, and at an early age showed remarkable talent for music. He became a pupil of the Royal Academy of Music, Munich, and a private pupil of Mortier de Fontaine. Upon receiving his diploma he was appointed director of the opera at Bamberg, which position, with others, he filled until his departure for America, in 1865, as a concert pianist. He has since occupied the position of teacher in a number of leading institutions, and was the founder of the Norwich Choral Union, Norwich County, Conn., of which he was director for seven years. In Columbus, O., Mennench called him to be his director, and his popularity re-elected him three times. In 1873, he came to this city where he has since been engaged in teaching. During the past five years has had charge of the musical department of Ferry Hall, Lake Forest. As a pianist he combines intelligence of interpretation and marvelous beauty of expression, and possesses the remarkable faculty of being possessed of the correct method, which, with his power of phrasing renders him, it is safe to say, a virtuoso. He has been organist and director of the choir in Sinai Temple for two years, and now holds that position. As a composer he enjoys a remarkable reputation, having written varied and broad, ranging from church music and fugue to the easy and tasteful compositions for beginners. His success as a teacher is shown by the large number of pupils he has under instruction, and
their popularity with the public as players. Mr. DeProse was married February 7, 1859, to Mrs. Emma Briggs, of New York, a vocalist in the company, she was charge of the vocal and ecclesiastical departments of Ferry Hall.

FREDERICK BOSCOVITZ, pianist and instructor, is a son of Joseph and Katinka Boscovitz, and was born at Pesth, Hungary, on June 12, 1838. At an early age he was given an extraordinary predilection for music, and when only six years old began to study the piano-forte under Professor Merkel, a pupil of Beethoven. He soon discovered fine aptitude and memory. In 1843, his parents were induced to send him to Chopin in Paris. Chopin was greatly pleased by his Bach-playing, and took great interest in his progress. He remained with Chopin until the death of that great musician in 1849. Frederick was then introduced to Liszt, who, delighted with his playing, invited him to Weimar, where he continued five years, during which time he was much in the company of Tausig, Ratté Bendel, and others of equal note, and appeared in public at Vienna, playing the Chopin minor concerto of Beethoven with great success. He gave a series of concerts at the Imperial Academy of Music, subsequently made an extended concert-tour from Russia, Germany, Holland and Belgium, visiting the principal cities. He became a great favorite in literary and musical circles and a habitué at Rossini's and Gounod's. In 1866, the King of Portugal, Dom Luiz, invited him to visit Lisbon, where he remained three months and performed in the capital and other cities, subsequently engaging at the Paris Exhibition, in 1867, where he was the first to introduce the Adagio from the Cello Concerto to America. He then visited Egypt, and on his return appeared before a London audience with the celebrated Niblo, and travelled twice through the principal cities of England, Ireland and Scotland. When in Dublin, he was a guest of the Viceregal Lord Carlisle, at his residencia in the Forty Steps. The War caused him to leave France in 1870, and, for a concert tour with the late Adeline Phillips, and, after an engagement with the late Bignoni, he became the director of the piano department of the Boston Conservatory. He was introduced in New York by Theodore Thomas in 1872, afterwards appearing in Boston, Philadelphia and the larger Eastern cities. During 1875, he visited Paris, where he received universal recognition and the most flattering predictions. In his extraordinary talents as a musician, he possesses a polished education, speaking and reading no less than eight modern languages, and is a gentleman of the most refined character and disposition. Mr. Boscovitz was married, on August 16th, 1872, to Miss Henrietta Armand-Vasse, of Paris, France.

JOHN MOLTER was born on April 4, 1832, at Treves (Trier), Rhein Prussia, where he received his earlier musical education in the Musical School of the Catholic Church, under the direction of Dr. M. Schneider. There, in the large Cathedral choir, he was for five years the leading sopranino of sixty boys. After preparing for several years, entered, in 1849, the School Teachers' Seminary at Bruchel, near Cologne, where he secured himself, particularly in church music, as organist and musical director, under the tuition of Professors M. Toeppler and A. Richter. The musical training in the Rhenish schools was very thoroughly pursued, in connection with a complete knowledge of harmonious composition and musical composition; in fact, a severe, regular, classical, musical education. After graduating from this school, John Molter was appointed by the Prussian Government principal of a public school, in connection with the customary leadership of the church music, in a smaller country place in Germany. In the pursuit of his favorite branch, music, and after writing a number of masses, school songs, and liturgical church music, he emigrated to this country in 1856, to have a better field to improve and use his abilities, as there was too little chance for promotion by the slow method of advancement in the Government service of his own country. After spending a year in Canada in teaching singing schools giving concerts and organ recitals, John Molter arrived in Chicago in the spring of 1857, and was engaged as organist by the First Unitarian Church. Besides being engaged teaching vocal and instrumental music, he was musical director of several German singing societies, viz., the Chicago Liederkranz, Freie Sangerbund, Arbeiterverein, and twice of the Germania Maennerchor, the leading German society of this city, in 1858 and 1866, when he opened his home in 640, and has one son and one daughter, both living. During the War he established a music school, with the profits of which he lost in the great fire of 1871. During his career as a music teacher and director, he gained the reputation of introducing classical and beautiful music, and took an influential part in the elevation of the art in this city. When the Philharmonic Society was started in 1861, Mr. Molter, as a member, volunteered as violinist, together with worthy amateurs at that time, like Dr. Smith, Dr. Mahla, Professor Dyhrerfurth, Dr. Fessel, and others, to be his favorite instrument, the church organ, induced him to

hold a position as organist in the leading churches and synagogues of the city during his long residence here. He was organist for twelve years in the Sinai Congregation, now Dr. Hirsch's Synagogue; five years in the First Baptist Church, during the time of Dr. Everett's pastorate; Dr. Collier's Unitarian Church; and lately, for nearly six years, in the Jefferson Park Presbyterian Church. Mr. Molter retired from mercantile life in 1872, and returned to the musical profession. He is now organist of the B'nai Sholom Synagogue on Michigan Avenue, and a successful teacher of the voice, organ and piano. The musical compositions of John Molter, published during the earlier years of his career in Chicago, by Messrs. Root & Cady and H. M. Higgins, comprise, among some piano-forte pieces of moderate difficulty, much vocal music, among them the Patriotic Glee Book published during the War. A large number of psalms and sacred music pieces, with English, German and Hebrew text, mostly written for the use of quartet choirs, are in manuscript, and will be published some time in the future.

Orchestral Music and Symphony.—The advent of Theodore Thomas and his orchestra, in 1869, killed the local efforts of the city, in the direction of orchestral concerts, by establishing a standard of excellence impossible for any local orchestra, as yet, to reach. The fire scattered the local players, many of them removing to Cincinnati, St. Louis, Milwaukee, and other cities where regular work could be had in the theaters. The first orchestral concerts after the fire (by a home orchestra) were those at Turner Hall, given on Sunday afternoons. These were revived soon after the fire in Twelfth-street Turner Hall, under Mr. Balata's direction.

The ambitious composer, Silas G. Pratt, made several efforts to establish symphony concerts, in different times. So long ago as 1874, he gave a concert for bringing out his first symphony. In 1879, he gave three symphony concerts in Central Music Hall, with an orchestra of sixty. At these concerts, besides his own "Prodigal Son" symphony, he brought out his fifth, Schubert's unfinished, and Mendelssohn's Italian symphonies, for the first time in the city.

In 1880–81, Adolph Liesegang gave a series of interesting orchestral concerts in Brandt's Hall, with a band numbering about thirty-two players. The time was Sunday afternoon, when theatrical players were free from engagements. In the course of three concerts, Mr. Liesegang not only brought out a wide selection of classical and modern works, but also afforded a hearing to many local composers, such as Frederic Grant Gleason, Silas G. Pratt, Adolph Koelling, Edward Heinemdel, and others.

Adolph Rosenbecker, under the management of Dr. F. Aegi, of the Musical College, undertook a series of symphony concerts in the McCormick Hall, during the season of 1878–79. The sensational features of the series were the appearances of Augustus Wilhelmj and Rafael Joseffy. Mr. Rosenbecker's failure to secure adequate support in this enterprise was particularly significant, in view of the fact that he held the confidence of the musicians as no previous local conductor ever has, being at that time, and ever since, conductor of the Sunday-afternoon concerts in Turner Hall. These concerts, although mainly of a popular order, present a great variety of good music, in a quite satisfactory style.

The main and almost the only dependence for orchestral music of a high order, in Chicago, after the War, has been upon Theodore Thomas and his band. It has already been recorded that Mr. Thomas was to have opened the renovated Crosby Opera House on Monday evening of the fire. Of this and several subsequent seasons in Chicago, George P. Upton gives the following account:

"The Opera House had been brilliantly decorated and renovated throughout until it had no equal for beauty and richness in the country, and Mr. Thomas was to dedicate it anew. It was lit
MUSIC AND THE DRAMA.

up for the first time on the evening of October 8, and two or three hours later it was in ashes. Mr. Thomas and his orchestra reached the street depot just as the great fire began, and immediately made his arrangements to go South, and that night rested in Joliet. This fire cost us, among other losses, Schubert's quartette in D minor, Schumann's first and fourth symphonies, Beethoven's 'Eroica' at third, as well as a number of other concerts by Rubinstein, Mendelssohn, Beethoven, Littolf, Weber, Chopin and Liszt.

"He did not return again until things had become comparatively settled. On October 7, 1872, he opened the new Athenaeum Theater, giving eight concerts, assisted by George L. Osgood, the tenor singer. The most important works in this season were Schumann's first symphony, op. 35, and Beethoven's seventh; but in addition to this, he brought out such numbers as 'Les Preludes,' by Liszt, the Beethoven quartette, op. 18, for string orchestra, two movements from Rubinstein's 'Ocean Symphony,' Liszt's 'Mephisto Waltz,' and a large amount of music by Kaff, Berlioz, Liszt and Wagner, not known here before.

"Messrs. Carpenter & Sheldon next effected an arrangement with him to give more variety and detail to their lecture course, and secured five concerts, which were given, commencing February 17, 1873, with great success at the Michigan-avenue Baptist and Units Park Congregational churches, which were at that time the only available concert places. Both Miss Melhig and Mr. Osgood accompanied them, and the concerts were musically brilliant and successful. A week later, under the same management, he gave two more concerts, the second of which was devoted exclusively to Wagner, and drew a select audience of the disciples of the music of the Ring.

"On the 17th of March following, still under Messrs. Carpenter & Sheldon's management, he commenced a series of three concerts in conjunction with Rubinstein, the great pianist, which were greeted with crowded houses. It was a feast of music we may never have again. The lovers of the classical fervently revelled in their favorite music, for they never before had such an opportunity of hearing concerts, for instance, interpreted by such a combination.

"It was not until October 6, 1873, that Mr. Thomas came again, and this time he dedicated the Kingsbury Hall, giving a series of eight concerts, assisted by M. W. Whitney. The eminent bassadore was very brilliant. At the fifth concert the programme was a Beethoven one, including the eighth symphony and the four overtures to 'Fidelio.' The eighth concert was given in connection with the Apollo Club.

"Mr. Thomas's next season was in February, 1874, and embrace four concerts, organized by the Apollo Club. The most noticeable feature of these concerts were two movements from Kaff's 'Lenore' symphony, Beethoven's fifth symphony, and Schumann's 'Paradise and the Peri.'

For five weeks, during five different summers, Mr. Thomas gave summer-night concerts at the Exposition Building, with an orchestra of from forty-eight to fifty-five or sixty members. The répertoire of the summer concerts of 1885 will give a good idea of the artistic value of these performances. It is published in full in the Tribune of August 9, 1885.

If the question be asked, Why can not a local orches-
tra of symphonic quality be maintained in a city so large as Chicago? the answer would bring in review a certain anomaly which still characterizes our stage of musical culture. Orchestral players are almost wholly German, but very little, the violin, flute and cornet excepted. Orchestral players are obliged to eke out a living by playing in theaters, giving lessons, etc., engagements absorbing so much of their time that they have little leisure for practice, and can not be engaged in symphony or other transient concerts, except at such an advance upon their regular wages as to leave them a profit after paying a substitute. Incident to the small attention (12,000 instrumental players) of the public to music by students is the consequence that music-lovers do not appreciate and demand orchestral music with the avidity which would be expected of persons of equal attainments in some of the other departments of musical taste. The establishment of financially successful symphony concerts has been accomplished, as yet, only in New York. In Boston, and in Baltimore, private munificence has maintained concerts of this kind through several seasons. As yet nothing of the sort appears likely to happen in this city. Nevertheless, the right time and the right way will undoubtedly present themselves sooner or later; but until there is a supply of American players, orchestral concerts, both as to personnel and répertoire, must be and remain exotic, and consequently expensive in comparison with domestic points of congratulation. The first is, that the theater orchestras are continually improving; the second, that, in spite of our lack of a leading local orchestra, music-lovers in Chicago have been able to keep up fairly well with the newest and best in this line of music, as the list of Mr. Thomas's summer-night concerts abundantly testifies.

NOYES BILLINGS MINER, director of the vocal department of the Chicago Musical College, son of Erastus P. and Lucretia Miner, was born at Norwich, Conn., on January 5, 1845. He graduated from the public schools of his birthplace and finished his education in the Academv at Norwich. During his boyhood he was especially fond of vocal music, and at the age of eighteen began voice culture under the guidance of Charles R. Hayden, with whom he remained several years. In 1874, he went to England and studied with George Henschel, at London, afterward became a pupil of Signor Vannucchi of Florence, Italy, with whom he continued several years. He subsequently finished his studies in the studio of Signor Biscaccianti and Signor Rotoli. Upon his return to the United States, in 1883, he came to Chicago and commenced teaching singing, assuming the directorship of the Chicago Musical College. Mr. Miner's thorough acquaintance with the Old Italian method of singing, with an extended practical experience in adapting European ideas to American needs, together with years of study of musical literature, renders him one of the most intelligent and accomplished vocal instructors of the West. Signor Vannucchi expressed his opinion that Mr. Miner is one of the few who thoroughly understood the Italian method, with the exceptional faculty of imparting his knowledge successfully to pupils. He pays the greatest possible attention to the general character of the voice and to the sympathetic quality of tone, and the cultivation of a refined and expressive style. He is equally at home in all the schools of vocal music, and teaches with the most gratifying success in the Italian, French, German and English languages, and prepares pupils for the concert or operatic stage, also for church and oratorio singing. His ability is recognized by the profession as that of a master, and the unusually large number of pupils in his particular department is sufficient comment upon his popularity and success as an instructor. Many of his pupils have not only gained prestige as fine amateurs, but have received flattering commendation from both the public and the critics.

FREDERIC GRANT GLEASON, instructor of the piano, organ and composition, son of Frederick L. and Martha W. Gleason, was born at Middletown, Conn., on December 17, 1848. He inherits his talent, as both of his parents displayed it in music; and while a mere child evinced a remarkable inclination for melodies, and their reproduction was his greatest delight. The emphatic opinion of Dudley Buck, to the effect that he possessed great natural musical gifts, induced his father to provide him with proper musical instruction. Upon the departure of Mr. Buck for Chicago, young Frederic went to Leipzig, Germany, where he studied piano-playing in the Conservatory under Moscheles and Pappertz, and harmonizing with Krieger, at the same time taking private instruction from Louis Fladl, and composition from J. C. Lobe. It was the latter master who gave Mr. Gleason that practical initiation into composition which has since culminated in his remarkable success. In 1874 he was engaged in the hands of Professor Lobe, to whom he was introduced by the late Prof. Lobe, and who instructed him in theory and composition. During his stay in Leipzig he received theoretical studies under Carl Friedrich Weitzmann, Court Musician to the Emperor of Russia, a pupil of Spohr and Moscheles, and had also the honor of studying with Oscar Raif, one of Tausig's favorite pupils. During his stay in Berlin he pursued theoretical studies under Carl Friedrich Weitzmann, Court Musician to the Emperor of Russia, a pupil of Spohr and Moscheles, and had also the honor of studying with Oscar Raif, one of Tausig's favorite pupils. During his stay in Berlin he prepared his popular work known as "Gleason's Motette Collection." Returning to this country he located in Hartford, Connecticut, where he accepted pupils as instructor, and afterward was organist at South Church, New Britain, Conn. Mr. Gleason's compositions are numerous, and are repre-
with glimpses of marvellous talent, is contained in a study with which M. B. Wilcher, a notable European master. Amongst them may be mentioned Opus 1, 3 songs (soprano), 2 organ sonatas, 3 harcarola (piano), 4 Episcopal Church music, 5 songs (alto), 6 Episcopal Church music, 7 Grand Romantic Chamber Variations, Visseuil (three movements), 8, 9 Trios (minor, violin and violoncello), 10 Quartette for female voices, 11 Overture Triumphant (organ), 12 Cantata, "God, Our Deliverer" (solo, men's choir, 13, 14 Trios in D minor (organ and violoncello). 15, 16, Cantata, "The Culprit Fay" (solo, choruses and orchestral), 16, Cantata, "Prague-Song to Harmony" (solo, male choir, and orchestra, Miss Mary Mantle, one of the most accomplished and brilliant pianists of New York, with whom he studied for five years; subsequently he became a pupil of Madame Klukinska, remaining her pupil two years. After several years of further study he began his career as a pianist, which he continued until 1873, when he was engaged as pianist for the Old Bull concert company two years. Upon finishing an engagement with them in 1875, he came to Chicago and associated himself two years with George Sweet, of this city. As a teacher of vocal music Mr. Kowalski stands high in his profession and his work has met with the most gratifying success. His entire attention is devoted to his pupils, whose thorough and comprehensive knowledge of musical literature is a sufficient comment upon his ability as an instructor. Many of them are pronounced by critics and the public as the most thorough and cultivated amateurs in the city. Mr. Kowalski was married, on September 6, 1877, to Miss Catharine McBride of Trenton, N. J.

David Walton Perkins, pianist and instructor, son of David W. and Amariah Perkins, was born at Orange, N. Y., on November 8, 1847. When he was eleven years old his parents came to this city, where he received his education by private instruction. At the tender age of seven years, he evinced musical talents of a remarkable order, and his inclinations were solicited for by his parents. He was placed under the instruction of Pacuski, one of the most accomplished and brilliant pianists of New York, with whom he studied for five years; subsequently he became a pupil of Madame Klukinska, remaining her pupil two years. After several years of further study he began his career as a pianist, which he continued until 1873, when he was engaged as pianist for the Old Bull concert company two years. Upon finishing an engagement with them in 1875, he came to Chicago and associated himself two years with George Sweet, of this city. As a teacher of vocal music Mr. Kowalski stands high in his profession and his work has met with the most gratifying success. is correct to a certain extent, but not wholly so. In the nature of the case the personnel of a company can not be phenomenally above the average level of the operatic talent available. Besides, it even may happen, and in fact frequently does, that, by reason of the rapid extension of amusement territory Westward, the demand for artists exceeds the visible supply of competent material. Hence, results the elevation of performers of meagre abilities into positions for which they are not qualified. This occasions a retrogression, or at least a pause, in the public taste.

On the other hand, however, the status and quality of travelling companies are always determined by the manager's idea of the demands of the public to which he intends to appeal for patronage. The progress of a few leading cities, therefore, makes it necessary for the companies intending to play there, to be competent to meet the new demands. The increased efficiency can not be dropped in the interim between one city and another, but has to be carried along, whereby the smaller towns have their ideas raised in turn.

In the larger cities there are always a few connoisseurs who recognize and deplore the weaknesses of the early companies. Occasionally their voices are heard in the Press, only to be met by the emphatic assurances of the managers that the then present scale, imperfect as it may be, is fully up to the highest practicable standard of efficiency consistent with profit. Presently, however, there comes along a manager who discerns for himself no other way than to bring out a company built upon the model of the "Deacon's wonderful one-hoss shay,"—complete in every part. These enterprises are necessarily expensive, and in the end usually come to financial grief. Nevertheless they serve as epochs in the progress, both assisting the public taste to rise to higher demands, and serving as standards for judging the companies that come later. The epochs of this kind in the history of Chicago are now to be considered.

The only operatic event of the winter after the fire was the début of the famous German tenor, Theodore Wachtel, which was made at the Globe Theater, on Desplaines Street, on February 12, 1872, in "Trovatore." Only three representations were given, "The Postilion of Lonjumeau" being one of them. This appears to have been the only operatic season after the fire until January 6, 1873, when an English company opened at the Academy of Music (see forty-second season, in operatic schedule). The first epoch of this period was the appearance of Pauline Lucca at McVicker's, on February 3, 1873. The principal novelty of the season was "Mignon," given then for the first time here, Mme. Lucca and Clara Louise Kellogg both appearing. In January, 1874, Christine Nilsson appeared in opera, also at McVicker's, supported by Miss Cary, Campanini, Del Puente and several other well-known names. The novelty was Verdi's "Aida," put upon the stage with considerable splendor. The strong features of the season were Nilsson's Marguerite in "Faust," and her Mignon, both well known the world over. The Italian season of 1875, brought Mme. Albanì as prima donna, and was made memorable by the first Chicago production of Wagner's "Lohengrin" on January 21. The principals of the cast were as follows: Elsa, Mme. Albanì; Ortrud, Miss Cary; Lohengrin, Carpi; Frederico, Del Puente.

Another important epoch in the operatic history of the city was marked by the German season given by Mme. Fappenheim and Charles R. Adams, at Hooley's, November 12-24, 1877. The company certainly was not large, nor was the mise en scène particularly magnificent. Nevertheless they gave Wagner's "Flying Dutchman," "Tannhäuser," and "Lohengrin," Beethoven's "Fidelio," and Meyerbeer's "Huguenots" and "Robert the Devil."

The Strakosch season of Italian opera, two weeks annually, during 1876, 77, and 78, brought nothing of especial consequence. At that time the companies carried very little material, the orchestra was always small and almost always badly trained, the chorus small and crude, and the minor rôles assigned to anybody capable of pretending to recite the lines.

The first season of Colonel J. H. Mapleson's Italian company from Her Majesty's Theater, London, changed all this. Mapleson's first season in Chicago was given in Haverly's Theater, January 13 to February 1, 1879. The troupe was nearly double the size of any of its predecessors, the orchestra numbered fifty-seven, many of them Mr. Thomas's men. The chorus numbered about
forty. The list of principals included such names as\nKetrika Gerster (the sensation of that, and one season\nsucceeding), Campanini, Del Puente, Galassi, Mine\nLablache, etc. The list of opera is given in the next\nplace (see sixty-third season). The theater was very\ncapacious, the two galleries holding about twelve thousand\npeople, and the whole house more than three thousand\nwhen crowded. Upon several of the nights the crush\nwas enormous, particularly when "I Puritani" was\nproduced. The receipts of the two weeks were stated at\n$35,000, the largest at that time ever known for a similar\nperiod of opera in Chicago. The Mapleson season of\n1886 was not so fortunate. The first was Haverly, Miss\nMarimon, although a charming singer, lacked the\nmagical something necessary for creating a furore. In\n1881 the success was better, Gerster being again the\nleading singer. In 1882 he brought Minnie Hauk,\nPaulina Rossini, Marie Vachet, and Emma Juch as so-
pranos. The success was only moderate. This season\nwas given in Haverty's new theater, now known as the\nColumbia.

The Mapleson season of 1885 opened on January 15, at McVicker's, Mme. Adalina Patti being the bright\npersonal star. Once a more brilliant success attended\nColonel Mapleson's efforts, but it is not likely that the\ndemands of the prima donna left much money upon the\nright side of the manager's ledger. The company was\nsmall, the orchestra numbering only twenty-four and the\nchorus about twenty. The manager was also unfortu-
unate in the matter of tenors, so that the main ups\npersonations of the season were in the lighter works. Still, such\nimpressions as Mme. Patti's Valentine in the "Hugue-
nots," and Violetta in "La Traviata," are of themselves\nENOUGH to render a season memorable.

The year 1884 was also signalized by the appearance\nhere, for two weeks, of the famous Abbey Company,\norganized for the opening season of the New York\nMetropolitan Opera House. The personnel of the\ncompany is given in another place (see one hun-
dred and sixty-ninth season). As will be seen, the\ncompany was phenomenally rich in fine artists. The\nmanager's intentions in regard to the scale of pre-
sentation were unfortunately interfered with by want\nof room in the theater. He brought with him an or-
chestra of eighty, and a chorus of like number, but it\nwas found impracticable to make room for more than\nfifty in each dress circle. After all these drawbacks,\nthe operas given were brought out upon a scale of\ncompleteness never before seen in the city. The Abbey\nCompany had a great advantage over even the best of\nMapleson's in its freedom from hangers-on—old favor-
ites kept in place by a kind-hearted manager, after their\ntime of usefulness had passed. The season introduced\nonly one new work, namely, Ponchielli's "Gioconda,"\nMme. Nilsson in the title rôle. As the work was given\nonly once, it made but a passing impression.

In 1885, the Damrosch German Opera Company,\nfrom the Metropolitan Opera House, gave a season of\nthree weeks at the Columbia, worthy in all respects of\nmaking an epoch in the history of Chicago. The\nrepresentations of this company suffered, like those of\nthe one just mentioned, from the cramped space availa-
bale for chorus and orchestra. The distinguished fea-
ture of the Damrosch season was the presentation of\nseveral of the larger operas of the German répertoire\nupon a scale of completeness never before seen here.
This was true of Meyerbeer's "Prophète," Halevy's\n"Jewess," and Wagner's "Tannhäuser" and "Lohen-
grin." The season was crowned by three highly suc-
cessful performances of Wagner's "Die Walküre," with

a superb cast, the opera having never before been given\nhere. The cast contained Fraulein Anna Slach as "Sieg-nunga," Frau Meyer as "Brunnhilde," Fraulein\nMarianna Brandt, as "Fricka," Herr Anton Schott as\n"Siegfried," Staudigl as "Wotan," and Koege as "Hunding." This cast was superior to those of the\n4

famous so-called "ideal" casts of the same opera at the\nRoyal Opera House, in Munich. All of these performances\nwere given under the direction of Walter Dmap-
rosch, Dr. Leopold Damrosch having died just before.

The only additional feature of prominence in the\noperatic history of the city was the first Opera Festival,\ngiven in April, 1885. The Donnana, Miss Marie\nMaterna, with the same personnel, was a success, and\nled to a second season, which was equally consid-
erable. The conductors were still Damrosch and\nKoege. In the department of light opera the register shows\n4

a constantly increasing activity, although the list is far\nfrom complete, the omission being of the long runs at\nthe Chicago Museum, Baum's Pavilion, Grenier's Gar-
den, the Princess Opera House, and other minor resorts\nrendering a low grade of attraction. At the Chicago\nMuseum alone, upward of three hundred operatic per-
fomances were given during 1885. While operatic\nentertainments were thus multiplying at the outside\nplaces, the standard of completeness has constantly\nadvanced at the downtown resorts, so that many of the\nrepresentations of light opera in recent years have been\ngiven with better resources than were formerly thought\nsufficient for the fashionable presentation of first-rate\nmaster works. Among the companies that most fully\njustify these observations may be mentioned the Boston\nIdeal and Emma Abbott companies, of 1885, the Ger-
man Company from the Thalia Theater, New York, the\nGeistering Company, Colonel John A. McCaull's "Black\nHussar," Company, Duft's "Mikado," in company, etc.
HISTORY OF CHICAGO.

One hundred and nineteenth Season.—McVicker's Theater, January 22, 1882, for one night. Colmer & Eisenstein's German Opera Company in Der See Cadet (Royal Middy). Artists: Miss Schonherr, Miss Von Windmack, Mr. Witte Wild (dubt).

One hundred and twentieth Season.—Grand Opera House, February 13, 1882, for two weeks. Hess Acme Opera Company in Mascotte (3), Olivieta (5), Chimes of Normandy (4), Fra Diavolo (3), The Widow (3). Leading artists: Adelaide Randall, Emma Elliott, Freda Vare, Mr. Banner, Mr. Wilkins.

One hundred and twenty-first Season.—Heller's Theater, March 20, 1882, for one week. Strakosch Italian Opera Company in La Traviata, Faust, La Sonnambula, I Trovatore. Artists: Mme. Etelka Gerster, Mme. Lancaster, Mme. Marie Leslino, Miss Abbe Carrington, Mlle. Marie Pressino (first appearance), Miss Kate Van Arnhem, Sig. Francesco Gianini (first appearance), Robert Mancini, Augusto Carbono, Pasquale Lazzarini, Mossemo Clapini, Giovanni Perugini, George Sweet (first appearance of the last four named), Mr. G. F. Hall, Sig. Marna, Mlle. Bertha Kiecz.

One hundred and twenty-second Season.—McVicker's Theater, April 3, 1882, for one week. Strakosch Italian Opera Company in Luchia, Mignon, Faust, Aida, Hamlet, Il Barbiere di Siviglia, Hecuba.

One hundred and twenty-third Season.—McVicker's Theater, April 16, 1882, for one night. Planquet's Bells of Corneville by the German Company.

One hundred and twenty-fourth Season.—Grand Opera House, April 17, 1882, for two weeks. Boston Idols in Fatimatta (2), Patience (3), Mascotte (1), Bells of Corneville (2), Museskteteers (3), Pirates of Penzance (1), Finifore (1), Olivieta (1). Same artists.

One hundred and twenty-sixth Season.—McVicker's Theater, May 8, 1882, for two weeks. Ford's Comic Opera Company in Mendoza (6), Patience (2), Mascotte (3), Bille Taylor (3).

One hundred and twenty-eighth Season.—Kink Opera House, June 6, 1882, for one week. Haverly's Opera Company in La Mas- cotte. Leading artists part in Chicago Church Choir Company.

One hundred and thirty-first Season.—Baum's Pavilion, June 24, 1882, for two weeks. Misses Comic Opera Company in Boccacio, La Mascotte. Leading artist, Amy Goarain.

One hundred and thirty-second Season.—Kink Opera House, June 12, 1882, for two weeks. Chicago Church Choir Company in Finifore (10), Patience (7), Italian Opera Company: Ada Somers McWade, Jessic Bartlett-Davis, John E. McWade.

One hundred and thirty-third Season.—Haverly's Theater, June 12, 1882, for one week. Comley & Barton's Company in Mme. Favart (4), Olivieta, Patience and Manuela. Leading artists: Laura Joyce and Digi Bell.

One hundred and thirty-fourth Season.—Baum's Pavilion, July 16, 1882, for two weeks. Trial by Jury (7), Box and Cox (2), Mascotte. Leading artist, Hattie Starr.

One hundred and thirty-fifth Season.—Baum's Pavilion, July 31, 1882, for two weeks. Bells of Corneville, Maribin's Opera Company. Leading artists: Amy Gordon, leading lady.

One hundred and thirty-sixth Season.—Grand Opera House, August 7, 1882, for two weeks. Hess Acme Opera Company in Chimes of Normandy, Maribin, Bohemian Girl (2), Olivieta, Fra Diavolo, Rise Friquet, The Widow, Mascotte. Leading artist, Miss Quinlin.

One hundred and thirty-seventh Season.—Grand Opera House, September 24, 1882, for two weeks. Hess Acme Opera Company in Fra Diavolo (2), Mascotte, Olivieta, Rinaldin, The Widow, Miss Lewis, Miss Beckett, Miss Keaugh, Mr. Kirk, Mr. Lube, Mr. Wilkins.

One hundred and thirty-eighth Season.—Grand Opera House, No.
MUSIC AND THE DRAMA.

One hundred and forty-fourth Season.—Grand House Opera. January 29, 1883, for one week. Barton Opera Company in Iolanthe.

One hundred and forty-fifth Season.—Haverly’s Theater, February 4, 1883, for two weeks. Anberg Opera Company (German) in Trompette (1), Giunia, The Bat (2), Boccaccio (2), Fatinitza (2), Grande Duchesse, La Belle Galatee, Parisian Life (2), Three Pair Shoe. Leading artist, Marie Gesselinger.

One hundred and forty-sixth Season.—Grand Opera House, February 12, 1883, for one week. Hess Ame Opera Company in Mascotte, Maritana, Oliveira, Martha, Chimes of Normandy, Fantasia. Leading artist, Marie Gesselinger. The cast included: Abbie Carrington and James G. Perkins.

One hundred and forty-eighth Season.—Academy of Music, Chicago, February 19, 1883, for two weeks. Barton Opera Company in Iolanthe.

One hundred and forty-ninth Season.—Grand Opera House, March 12, 1883, for one week. McCaull Opera Company in Heart and Hand.

One hundred and fiftieth Season.—Grand Opera House, March 29, 1883, for one week. McCaull Opera Company in the Sorcerer (first presentation in Chicago). Artists: John Howson, James J. Campbell, George A. Schiller, Digby Bell, George A. W. Malin, Laura Joyce, Emie Wehrbey, Mrs. Harvey.

One hundred and fifty-first Season.—McVicker’s Theater, March 26, 1883, for one week, under direction of composer, S. G. Pratt, Zenobia. Artists: Miss Dora Hennings, Miss Hattie Schiller (in Chicago), Charles H. Clark, Vivian Kent, W. H. Clark, W. M. Pense.

One hundred and fifty-second Season.—Haverly’s Theater, April 2, 1883, for one week. Standard Opera Company, under management of John Duff, in Heart and Hand. Leading artists: J. H. Kyley, Miss Marie Conron.

One hundred and fifty-third Season.—Grand Opera House, April 16, 1883, for two weeks. Boston Ideals in Fra Diavolo (2), Patience (2), Oliveira (2), Musketiers (2), Fatinitza, Marriage of Figaro, Mascotte, Chimes of Normandy, Bohemian Girl, Pirates of Penzance.

One hundred and fifty-fourth Season.—Grand Opera House, April 29, 1883, for one week. Standard Opera Company, J. C. Duff, manager, in Heart and Hand.

One hundred and fifty-fifth Season.—Hooley’s Theater, April 30, 1883, for one week. Hess Ame Opera Company in Iolanthe (2), Chimes of Normandy (3), Faust, Bohemian Girl (with Grace Hitt, of Chicago, as Arline).

One hundred and fifty-sixth Season.—Hooley’s Theater, May 20, 1883, for three weeks. Catherine Lewis Opera Company in Oliveira (7), Prince Conti (7).

One hundred and fifty-seventh Season.—Haverly’s Theater, May 20, 1883, for two weeks. McCaull Opera Company in Queen’s Lace Handkerchief (3), Patience (3), Pinafore (3), Marriage of Figaro (3), Iolanthe (3), Patience, Bolero of Cornville, Pirates of Penzance, and Faust.

One hundred and sixtieth Season.—Shelby’s Academy of Music, July 9, 1883, for two weeks. Ideal Opera Company in Iolanthe, Sorcerer, Patience, Box and Cox, Pinafore.

One hundred and sixty-first Season.—Grand Opera House, September 23, 1883, for one week. J. C. Duff Opera Company in Faust (3), Heart and Hand (4), Patience (2). Artists: Miss Sarah Bartlett, Marie Hunter, George Post.

One hundred and sixty-second Season.—Grand Opera House, October 22, 1883, for three weeks. English Opera Company in Martha, La Fille de Madame Angot, La Sonnambula, Mignon King for a Day. Artists: Emma Abbott, Julia Budden, Zelda Seguin, Sig. Tagliaferri, Sig. Fabrin, William Castle.

One hundred and sixty-third Season.—Shelby’s Academy of Music, November 11, 1883. Pay Templeton Opera Company in Girofla-Girofle.

One hundred and sixty-fourth Season.—Grand Opera House, November 12, 1883, for three weeks. Boston Ideals in Fra Diavolo, Musketiers (2), Bells of Cornville, La Mascotte (2), Girofla-Girofle (7).

One hundred and sixty-fifth Season.—Haverly’s Theater, November 18, 1883, for one night. Maurice Grant’s French Opera Company in La Fille de Madame Angot (2), La Princesse de Canaries, La Mascotte, Boccaccio (2), La Jolie Farceuse (2), Oliveira. Artists: Mlle. Marie Alnce, Mlle. Fonquet, Mlle. Augereau.

One hundred and sixty-sixth Season.—McVicker’s Theater, November 25, 1883, for one night. Eisenstein’s Opera Company in Der Freischütz.

One hundred and sixty-seventh Season.—Grand Opera House, December 10, 1883, for one week. McCaull Opera Company in Prince Methusalem.

One hundred and seventy-first Season.—Grand Opera House, February 10, 1884, for three weeks. McCaull Opera Company in Beggar Student.

One hundred and seventy-second Season.—Grand Opera House, March 2, 1884, for one week. McCaull Opera Company in Beggar Student, Queen’s Lace Handkerchief.

One hundred and seventy-fourth Season.—Grand Opera House, April 21, 1884, for two weeks. Boston Ideals in Girofla-Girofle (2), Musketiers (3), Mascotte, Barbe Bleu, Bohemian Girl (2), Martha (2), Fra Diavolo (2), Chimes of Normandy, Patience.

One hundred and seventy-fifth Season.—Haverly’s Theater, May 5, 1884, for three weeks. Bijou Opera Benefit Company in Orpheus and Eurydice. Artists: Laura J. Bell, Ida Mulle, Augusta Roche, Digby Bell, E. S. Grant, Geo. Boniface, Jr., Harry Pepper.

One hundred and seventy-sixth Season.—McVicker’s Theater, May 12, 1884, for three weeks. McCaull Opera Company in the Merry War.

One hundred and seventy-seventh Season.—Bann’s Pavilion, June 25, 1884, for one week. Metropolitan Opera Company in Oliveira.

One hundred and seventy-eighth Season.—Grand Opera House, August 4, 1884, for one week. Acme English Opera Company in Fatimitia and the Grande Duchesse. Artists: Mary Beebe, Emma Baker, Nellie Bowers, John McWade, Dr. Barnes.

One hundred and seventy-ninth Season.—Grand Opera House, August 17, 1884, for two weeks. English Comic Opera Company, under the management of C. D. Hess, in Bohemian Girl. Artists: Miss Carrington, Miss Fitch, May Baker, Sig. Montegriffo, Messrs. Cristof, Janevitch, Chimes of Normandy, Patience.

One hundred and eighty-first Season. — Standard Theater, August 31, 1884, for one week. Ford's Comic Opera Company in Queen's Lace Hanlurcheif, The Orange Girl, and Little Duke.

One hundred and eighty-second Season. — Grand Opera House, September 12, 1884, for two weeks. Little Duke, La Fille du Roi, Girofle-Girofle, in Blue Beard. Artists: Miss Emma Carson, Kate Stokes, Agnes Hallock, Carl Rankin, A. W. Tams, Samuel Reed.

One hundred and eighty-third Season. — Haverly's Theater, September 7, 1854, for three weeks. McCaul Opera Company in Falka. Bertha Ricci.

One hundred and eighty-ninth Season. — Columbia Theater, February 1, 1885, for two weeks. McCaul Opera Company in Falka (2), Little Duke (2).

One hundred and ninetieth Season. — Grand Opera Hall, April 6, 1885, for two weeks. Chicago Opera Festival, under the management of Mapleson, Semiramid, L'Africaine, Merilla, Linda di Chamouni, Lucia di Lammermoor (2), Martha, Der Freischütz, La Sonnambula, Aida, Il Trovatore, Rigoletto, Faust, Lohengrin. Artists: Mme. Adelina Patti, Sophia Scalchi, Mme. Farschi, Madame Duval, Emile Duval, Nevada, Mme. Neusloch, Marcel, Soragna, Sig. De Pasquale, Cherubini Affini, Demarco, Marni, Caraoceda, Vicini, Gianni, De Anna, Violletto, Nicholoni.

One hundred and ninetieth Season. — Columbia Theater, May 1, 1885, for one week. Carleton English Opera Company in the Merry War, Fra Diavolo, La Fille du Tambour-major. Artists: May Fielding, Frances Guthrie.

One hundred and ninety-third Season. — Grand Opera House, May 4, 1885, for one week. Boston Idelis, Manager, Mr. E. H. Ober. Giralda, Fanonette, La Mascotte, Musketees, Fra Diavolo.

One hundred and ninety-fourth Season. — Hooley's Theater, May 17, 1885, for one week. Maurice Graf's French Opera Company in La Mascotte, La Jolie Parfumuse (2), La Fille du Tambour-major, Le Jutte o la Met, La Fille de Mme. Angot, Girolfi-Girofle, La Cloches de Corneville. Mme. Theo, Mme. Boniface, Lefort, Meiers, Duplar, Guig, etc.

One hundred and ninety-ninth Season. — Columbia Theater, July 5, 1885, for three weeks. The McCaul Opera Company in Die Fledermaus (8), Beggar Student (6).

Two hundredth Season. — Grand Opera House, July 6, 1885, for one week. Sidney Rosenfield's own Opera Company in Mikado. Leading artists: J. W. Herbert, Rohen, Agnes, Afling, Harrischen.

Two hundred and fourth Season. — Columbia Theater, October 25, 1885, for four weeks. McCaul Opera Company in "Black Hussar." Leading artists: Mme. Mathilda Cotrelley, Miss Lily Post, Miss Marie Walters, Mark Smith, De Wolf Hopper, George C. Boniface, Edwin W. Hoff.

Two hundred and fifth Season. — Columbia Theater, October 25, 1885. Goodwin Opera Company in the Mikado.

Two hundred and sixth Season. — Grand Opera House, October 25, 1885, for two weeks. New York Thalia Opera Company in the Beggar Student, Czar and Zimmerman (2), Nonon (2), Martha, Feldprediger.

Two hundred and eighth Season. — Columbia Opera House, November 16, 1885, for two weeks. Judie, in La Feme-a-Papa, Mme. Nitouche, Niniche, La Mascotte, La Grande Duchesse (2), La Belle Helene, Divorces, La Cosassone, La Pericheuse.

MUSICAL FESTIVALS. — A very important incident of Chicago musical life since the fire has been the musical festivals, of which five have been given.

The first one was of the Gilmore-Peace-Jubilee-buncomber order, and was given at the opening of the new depot of the Chicago Island & Pacific Railroad Company in June, 1873. Four concerts were given by Gilmore's band, with such additional players, to the number of one hundred, as could readily be picked up, and a local chorus. The choral numbers consisted of selections from the Boston Peace Jubilee book, the chief being the "Hallelujah," "Heavens are Telling," and "See the Conquering Hero." The chorus numbered about one thousand voices, trained under the direction of J. A. Butterfield, who had previously trained the Chicago contingent of the Boston Jubilee. The same sensational features were here repeated—the Anthem to Peace, the Anvil Chorus of II Trovatore, with red-shirted firemen, sledge, anvils, and cannon. The attendance was large, and the affair served its purpose in furnishing a harmless diversion and in advertising the fact that Chicago had any amount of spirit left, subject to call.

The second Jubilee was held in the Moody-and-Sankey Tabernacle, Nos. 235–24 Monroe Street, under the joint auspices of the Rockefeller Musical Club and Theodore Thomas; Messrs. Carpenter and Sheild are managing managers. The forces taking part were classified as follows: The Apollo Chorus, enlarged for the occasion to four hundred voices, the orchestra of sixty, and a chorus of school children. The soloists were Mrs. H. M. Smith, William Winch, Myron W. Whitney, and
Miss Anna Louise Cary. Among the memorable solo numbers of these concerts were Whitney's "Oh, Ruddyard the Cherry" and Miss Cary's "Vei che sapete," from Mozart's "Marriage of Figaro." Both were extremely well sung and accompanied with consummate delicacy. Choral numbers of the first concert: "Calm Sea," by Rubinstein, for male voices; "Ye Spotted Snakes," by Macfarren, for female voices; "Hunting Song," by Benedict, for full chorus; the first half of Mendelssohn's "St. Paul." This concert appears to have been the first introduction of the "Siegfried Funeral March," from Wagner's "Gotterdammerung." The choral selections of the second concert: Gounod's cantata, "By Babylon's Wave," Arthur Sullivan's "On Sea and Shore," and the Bridal Chorus from "Lohengrin." Third concert: Beethoven's Second Symphony; scenes from the second act of "Orpheus." Of Handel's "Israel in Egypt" rather more than half was given. The chorus was not uniformly successful in this work, the time of preparation having been too short for the new material, but the bassos made a great effect by singing the famous duet, "The Lord is a Man of War" with all the voices. The concert of the school children was not satisfactory. The festival was a financial success. It was due to the enterprise of William L. Tomlins, who, of course, trained the chorus, and of the managers, Carpenter and Sheldon.

June 18–22, 1881, the twenty-second Sängferfest of the North American Sängerbund was given in Chicago, under the direction of Hans Balatka. It called together a male chorus of more than eleven hundred, a mixed chorus of about six hundred, an orchestra of one hundred and forty-two players, and an array of superior solo singers. The prima donna was Madame Peschke-Leuten, from the opera at Leipzig; alto, Miss Cary; tenor, William Candidus; bassos, Franz Remmertz and Myron W. Whitney. Seven concerts were given in a large hall constructed in the Exposition Building. The choral works presented were Bruch's "Odyssaeus," Bruch's "Salamis, or Battle Hymn of the Greeks," sung by the full male chorus; Reissmann's "Death of Druus"; selections from "Lohengrin" and Beethoven's Ninth Symphony. Artistically and socially, the Sängferfest was a success, but strictly speaking it was not a Chicago enterprise, but rather a National meeting of affiliated societies.

The first Chicago May Musical Festival was given on May 23–26, 1882, in a festival hall recently constructed in the south end of the Exposition Building. The seats in the great parquette were ordinary wooden chairs; in the choir and rear gallery they were wooden benches. The total capacity was about six thousand. Concerning the origin of the festival, George P. Upton, in the official programme-books, speaks as follows:

"The idea of this Festival dates back nearly three years, and it was discussed by a few gentlemen of musical taste with Mr. Thomas in 1879, with the purpose of giving it in the following year; but circumstances arose which necessitated its postponement for a year. Meanwhile, the annual German Festival had been appointed for 1881, and it was again deferred, but the original scheme grew into still larger proportions and was laid out upon a still grander scale. The Chicago Festival was not only decided upon, but it was associated with the New York and Cincinnati May Festivals, all under the same leader, employing the same solo artists and utilizing the same orchestral material. The plan once settled upon, it was not a difficult task either for Mr. Thomas or his associates to find the leader who should act as the sub-director of the Festival. It was an important, trying, responsible and arduous position. It required a man not only possessing musical knowledge and executive ability of a high order, but the largest capacity for work. These qualities had been demonstrated by W. L. Tomlins in his long experience in this city, and to his hands was committed the all-important work of organizing and drilling the chorus. Thoroughly conversant with Mr. Thomas's ideas and methods, and having his confidence, he entered upon the work; and how zealously, intelligently and indefatigably he has labored the results of this enterprise will show. The organization of the association was effected in February, 1881, by the election of officers and working committees."

Following are the names of the Chicago Musical Festival Association:

Their efforts were ably seconded by the following subscribers to the guarantee fund:

The organization of the Festival and the business staff were as follows:

The musical staff was as follows:

The chorus numbered nine hundred, of whom about two hundred and fifty came from Milwaukee. It had been diligently rehearsed for about eight months by William L. Tomlins, who did not content himself with securing the ordinary qualities of precision and spirit, which alone are commonly looked for in large chorus of this kind, but sought, and to a considerable degree obtained, a refinement in tone-quality, and a delicacy of expression, wholly unusual in so large a body of singers and rare in even small choruses. These results were aided very much by the superior quality of the chorus material in respect to social position, refinement and intelligence, which, in this instance, were far beyond anything that would be possible in an older place, where the social lines and conventional class-distinctions had become established.

The orchestra numbered one hundred and sixty-nine, disposed as follows: First violins, 26; second violins, 25; violas, 20; cellos, 20; double basses, 16; harps, 4; flutes, 4; piccolos, 5; oboes, clarinets and bassoons, 13; horns, 8; cornets and trumpets, 13; trombones, 6; tubas, 2; tympani and percussion, 6. Of these players, one hundred and ten were brought from New York and sixteen from Cincinnati.

The Concerts—Tuesday evening, May 23; Handel's Utrecht Jubilate; scenes from the first act of Lohen-
The orchestra played Beethoven's Fifth Symphony, and Madame Materna sang the recitative and aria Abscheulicher, from Beethoven's "Fidelio."

The first Matinee was made up of orchestral and solo selections, the symphony being Mozart's Jupiter in C.

The second Matinee was of a popular character, the programme consisting of lighter orchestral and solo selections.

The third Evening Concert, May 25: Bach's cantata Festo Ascensionis Christi and Beethoven's Ninth Symphony, the solo artists being Madame Materna, Miss Winant, and Messrs. Candidus and Remmertz.

The third Matinee was devoted to the Wagner programme by the solo artists and orchestra. The selections were from the "Kheingold," "Walküre," "Siegfried," and "Gotterdammerung."

The fourth Evening Concert, May 26: Schumann's Mass in C, Brahms's Tragic Overture, for orchestra, and selections from Berlioz's "Les Troyens."

The financial balance sheet of this Festival is shown by the report of the financial committee to have been as follows: Total receipts $37,006; total expenditures $66,216; loss on Festival, $29,200.

The Second Matinee was given May 27-31, 1884, under the same auspices as the preceding.

The business organization upon this occasion was as follows:

The subscribers to the guarantee fund were the following:

Of this festival as a whole, George P. Upton, in the official programme-book, remarked: "In all its elements, the efficiency of the orchestra, the strength and ability of the chorus, the eminence of the solo artists, and the greatness of the works to be performed, the Festival of 1884 marks a step in advance of that of 1882. In the latter year the Wagner music was mainly interpreted by Frau Materna, who had been honored by the composer with the principal place in the first Bayreuth Festival. In this Festival we have the trio of artists who created their respective roles in both the first and second Bayreuth Festivals, Frau Materna, Herr Scriba, and Herr Winklemann, from the Hofoperhaus, Vienna, so that Mr. Thomas is enabled to still further enrich his programme with selections from Wagner's later works, and scenes from the older ones, Lohengrin and Tannhäuser, which he has never given here before. By the aid of these artists, reinforced by Madame Christine Nilsson and other soloists, he is also enabled to present the larger part of Tannhäuser, with a choral and orchestral backing which will insure the most remarkable performance ever heard in this country. Madame Nilsson, whose fame as an operatic prima donna, will not only appear as Elsa in Lohengrin, but will be heard at her best in Haydn's Creation. In addition to these artists, Miss Emma Juch, a singer of recognized ability in this country and in Europe, who has had much stage experience, Mr. Remmertz, who is admirably qualified for festival work, Mr. Toedt and Mr. Heinrich, will also appear and add to the strength of the soli.

The general scheme of the concerts differs from that of 1882, which embraced four evening and three afternoon concerts. Upon this occasion, there were five evening and two afternoon concerts. The evening concerts were devoted exclusively to large works,—"The Creation," "Tannhäuser," the Berlioz "Requiem," extended selections from "Die Walküre," the "Dettingen Te Deum," the colossal (if we may so term it) duet which forms the finale of the third act of "Siegfried," Gounod's sacred trilogy, "The Redemption," and three great symphonies, the G major of Mozart, the "Eroica" of Beethoven, and the Ninth of Schubert. The two matinees were distinctive in character. The first was devoted to Wagner's music, including selections from "Lohengrin," "Farsifal," the "Gotterdammerung," and the "Meistersänger," preluded by the Centennial March. At the second matinee, in addition to a miscellaneous list of numbers by the soloists and orchestra, the audience were entertained by the singing of nearly one thousand children, whom Mr. Tomlins had under his charge for a long time. Their performance showed what astonishing results might be produced from material, originally crude and unformed, and proved a revelation to those who were not acquainted with this leader's skill in developing the voices of children and grounding them in musical intelligence.

As before, the chorus was trained by William L. Tomlins, who brought to the work an enthusiasm, capacity and local prestige which enabled him to prepare the choral parts of this Festival in the same broad and artistic spirit as those of the former one, but with the greater completeness due to longer experience in such work.

The artistic staff was as follows:

In one point of view, this festival failed to realize expectations. The solo singers and the players in the orchestra were nearly all in Mr. Thomas's employ, and took part in several precisely similar festivals in Cincinnati, Pittsburgh, Boston, etc. Thus the local interest in each festival was limited to the chorus and hall, and the Festival resembled a gigantic amusement enterprise, conducted upon what is known in theatrical circles as "the combination plan.

The programmes of all the festivals were so nearly identical, and so large a proportion of the singing was in the German language and in the Wagnerian musical dialect, that the Festival failed to gain the popular heart, but remained as an unusual experience of questionable satisfaction. It is obvious that, in order to act as a productive ferment in the musical life of a community, a festival must come as the summing up and glorification of all the local activities of the year. When this is the case, the inspiration of it is lasting. The musical outgoings of the festival masses serve to explain and to emphasize the accumulated remembrances of many smaller impressions. Such an end can not be
subscribed by an imported assortment of strange songs.

The financial report of the second Festival was as follows: Receipts, $65,747.77; total expenditures, $71,565.77; loss on Festival, $5,817.40.

The first Opera Festival of Chicago was given April 13-25, 1885, and consisted of fourteen performances. According to the official programme-book—

"The Chicago Opera Festival Association was organized (and incorporated April 16, 1884) to provide grand opera for the people at popular prices within the reach of all, and, at the same time, to raise the performances to a higher standard of excellence. Ultimately, we propose to foster the production of original works in our own language, and thus inaugurate a movement, the justness of which is unchallenged and the demand for which is rapidly increasing. The benefits to our people of this twofold philanthropic object are so evident as to warrant the assertion that the Chicago Opera Festival, in its successful accomplishment, will mark a new era in the history, not only of Chicago, but of the entire United States."

Executive Committee: Engerer Cary, A. A. Sprague, F. W. Peck, George M. Bogoe, William Penn Nixon.

The most stupendous feature of this enterprise was the erection of a vast opera-house, seating more than six thousand hearers in comfortable opera chairs, within the north end of the Exposition Building. The stage was of vast dimensions, namely, 80 x 100 feet. The hall was elegantly decorated, and the stage was well appointed with new scenery, etc. The expense of fitting up the house is understood to have reached $60,000.

Artistic Staff: The solo artists of the Festival were those of Mapleson's Italian Opera Company, as follows:

The programme during the first week was as follows:

Monday, April 6, Semiramide, with Patti, Scalchi, Rinaldini and Cherubini. Tuesday, L'Amicizia, with Mile, Fursch-Madi, Mile, Dotti, Signors Cardinalli and De Anna: Wednesday, Midella (for the first time in Chicago), with Emma Nevada (her first appearance), Scalchi, Vianni and De Anna. Thursday evening, Linda de Chamounix, with Patti, Scalchi, Vianni and De Pasquale, Friday, Lucia, with Nevada, Giannini and De Anna. Saturday matinee, Martha, with Patti, Scalchi, Vianni, Cherubini and Caracciolo. Sunday evening, Der Freischütz, with Fursch-Madi, Dotti, Giannini and Scalchi.

The operas presented during the second week were as follows:

Monday evening, April 13, Sonambula, with Nevada and Giannini. Tuesday, Aida, with Patti and Scalchi. Wednesday, Il Trovatore, with Fursch-Madi and Giannini. Thursday, Puritani, with Nevada and Scalchi. Friday, Faust, with Patti and Scalchi. Saturday matinee, Lucia, with Nevada and Giannini. Saturday evening, Lobengrin, with Grand Chorus and Fursch-Madi.

The financial success was something extraordinary. The gross receipts amounted to about $132,000, the largest sum, it is believed, ever taken for fourteen consecutive performances of opera anywhere in the world. After paying all expenses, a handsome balance was left in the treasury of the Opera Festival Association.

Artistically, the Festival was not so remarkable. The space was too great for the smaller voices, and too large for the dramatic part of the performances. On the other hand there was little opportunity to make up for this by choral display, for the practicable size of an opera chorus, is determined by the number of people that can be marched on and off the stage during the orchestral interludes, or without totally obstructing the movement of the play. In several of the operas the stage-settings were fine, and in all the Patti performances the Festival achieved its intention of giving opera at lower prices than had before been known with Patti for star. The enthusiasm of the public upon her nights was something long to be remembered, the vast hall being a sea of heads and a flower-garden of brilliant costumes.

Meinerschors, Etc.—An important division of musical activity yet remains to be mentioned. It is the music for male voices. Meinerschors societies exist in all parts of the city, to the total number of sixty or more, mostly among the Germans, but also among the Scandinavians, Bohemians and others. The Cordia and Germania meinerschor societies, which before the fire were in a flourishing condition, have never been able to regain their lost prestige. Two causes are mentioned as being concerned in this result. One is said to be the unwillingness of the wealthy Germans to subscribe with sufficient liberality for their support. Another, more likely, is the superior discipline and excellence attained by the leading American society. The meinerschors clubs at present existing are mainly social in their ends, music being practiced as a pastime. The aggregate influence of these various bodies of singers and lovers of music is undoubtedly great, but being exerted in a private manner, very little of it comes to publicity in forms definite enough for historical purposes.

Music Halls.—Chicago lost by the great fire of the opera house, McVicker's Theater, the Dearborn Theater, and Wood's Museum on the South Division, and the Turner Hall and German "House" on the North. There were other but smaller places of amusement, devoted to variety business and vaudeville, the loss of which in a moral sense was a gain to the city. The above comprised the respectable places which were devoted to music and the drama.

The Opera House had been thoroughly renovated and gorgeously equipped, and was to have been opened on the 10th of October by the Theodore Thomas Orchestra Troupe, as many readers will remember by the tickets which they undoubtedly held as interesting relics of how man proposes and God disposes. Notwithstanding the bad management during two or three seasons which preceded the fire, and which had somewhat degraded it from the purposes to which it was dedicated, the Opera House was regarded with peculiar affection and pride.

The first down-town music hall after the fire was the Kingsbury Hall, on Clark Street opposite the Sherman House. The site had been occupied previously by Wood's Museum. This Hall was opened October 6, 1873, by the Theodore Thomas Orchestra, and for nearly a year thereafter it served a most excellent purpose. It was, however, too small to answer the purposes of a first-class music hall in a metropolis so large as Chicago. It seated less than a thousand people. After the opening of McCormick Hall it underwent several alterations, new galleries were added, the name changed, etc., but it would take us too far to trace all its transformations, since all were degradations of its original purpose rather than in the nature of progress.

The first large hall opened after the fire, and in fact the most capacious music hall that Chicago has ever
had, was McCormick Hall, on the corner of North Clark and Kinzie streets.

Of this George P. Upton remarked in the Tribune:

"The new and beautiful hall erected by Mr. McCormick, on the corner of Kinzie and North Clark streets, was dedicated Thursday, November 13, 1873, by a grand concert. It is not only the best hall Chicago has ever had, but is one of the finest in the United States. It should be a matter of pride to every citizen that at last Chicago has an auditorium where music can be heard to its best advantage. The dimensions of the hall are 100 x 120 feet, and it can accommodate two thousand five hundred persons. The dressing is in exquisite taste, and the four medallion heads are those of Lucca, Kellogg, Patti and Nilsson. As the concert was a complimentary one, and Mr. McCormick sought only to dedicate his hall in an informal way, he actually gave one of the best concerts we have ever had in the city. Wieniawski never played better, and the Kunkel Brothers created a perfect tempest of enthusiasm with their marvelous playing. The Apollo Club sang some of its lighter numbers in capital style, and a fragmentary piece of 'Trovatore' was given by some amateurs. The audience was a very large one and a very delighted one, and the new hall received a very successful christening."

In spite of this rosy view of its merits there were several serious objections to McCormick Hall, chief of them being its location upon the North Side, and its consequent inconvenience of access for residents of the other two divisions of the city; and its danger in case of fire. It was in the third story of the building, the original exits being wholly inadequate to the safe delivery of a large crowd, even if they had not the further fatal defect of uniting at the first story into a single exit. This objection was to some extent removed by subsequent alterations, but the location could not be modified. Hence, no sooner was Central Music Hall opened, on December 4, 1879, than first-class musical entertainments resorted unanimously to the new location.

As originally constructed, Central Music Hall was one of the pleasantest public halls that the country could show. It was due to the enthusiasm and tact of the late George B. Carpenter, who remained its lessee and manager until his death. The hall had the peculiarity of galleries somewhat receding, the first covering no more than the first three or four rows of the parquette circle, the second being withdrawn still farther. This novel arrangement rendered the parquette circle much pleasanter than usual, but it had the disadvantage of unduly sacrificing space. The capacity of Central Music Hall, as usual in the case of popular assembly rooms, was greatly exaggerated by rumor. From two thousand five hundred to three thousand were the numbers currently reported to have been within its walls upon crowded occasions. As a matter of fact its numbered seats reached a little less than one thousand seven hundred, to which the parquette and loge added two hundred more. Thus the full seating capacity of the hall is under one thousand nine hundred, and of these about six hundred are in the upper gallery or far back in the family circle.

Farwell Hall, which before the fire had been the chief large hall of the city, was unfortunately re-built upon a smaller and less attractive scale, in consequence of which it never recovered its former position.

Millard Adams was born at Lexington, Ky., on January 6, 1857. His grandfather built the first brick residence in Hamilton County, O., in a little town now a suburb of Cincinnati. His father, Dr. Samuel L. Adams, L.L.D., occupied the chair of anatomy and surgery in the Lexington Medical College until the breaking out of the War, when he entered the United States Army as Surgeon. At this period the family moved to Lebanon, O., where they resided till 1865, when they located at Danville, Hendricks Co., Ind.; and there Dr. Adams died in 1869. After his father's death, Millard Adams came to Chicago with the family. His first occupation in this city was in the employ of Wilson Bros. He did not remain long with them, for, in 1871, he became associated with George B. Carpenter as assistant manager, a position he retained up to Mr. Carpenter's demise, on January 7, 1881. Since that time the whole weight of management has fallen upon Mr. Adams, and he has capably sustained the arduous duties of the position. He managed the May Festivals of 1882 and 1883, and has made a feature of, and permanently organized, the Theodore Thomas Concerts, making them the musical events of Chicago, Cincinnati and Milwaukee. In the last four years, over three hundred Thomas concerts have been given under Mr. Adams's management. Mr. Adams attributes whatever success he may have attained to the strict personal attention he has paid to all the details of his various ventures. He was married, on August 23, 1883, to Miss Florence James, daughter of

![Central Music Hall.](image)
C. P. James, of Boston. Mr. and Mrs. Adams spent the summer of 1854 in making a tour of Europe.

By the time Mr. and Mrs. Adams were born, the firm of James & Adams was already established in the heart of Boston, with a reputation for quality and innovation in the field of organ design.

The firm was known for its innovative designs and high-quality organs, which were favored by churches, synagogues, and concert halls across the United States.

In 1855, the firm's premises were located at 120 Newbury Street, Boston, and they continued to grow and expand under the leadership of Mr. and Mrs. Adams.

Throughout their time in the organ building industry, Mr. and Mrs. Adams were known for their commitment to excellence, and their firm became synonymous with the highest standards of craftsmanship and design.

Their legacy lives on, as the firm continues to produce organs that are admired for their beauty, sound, and durability, and that remain a symbol of the rich history and tradition of organ building in the United States.
trade, as was his brother Joseph, of whom our subject is a namesake. At the age of twelve young Bohmann was apprenticed to the trade, and went into his uncle's shop at Vienna where he remained three and a half years. In his sixteenth year, after leaving his father's factory, he went to the town of Minion, Hessen, and worked for six months. He then decided to emigrate to America and commence life for himself. When New York was reached, he started out to find employment as an instrument maker, but no such interest had yet been shown in the great metropolis, as all stringed instruments were imported directly from the European countries. In November, 1846, he obtained his first job, that of laying cables. The line between Boston and New York, which was then in full operation, was so occupied until the following March, and then he was out of employment for several weeks. Finally, after much solicitation, he obtained work in a furniture factory in Boston as polisher at $1.50 a day. The firm of Michael Kercher, violin and luthier, remained this man about a year, and succeeded in showing his worth as a mechanic. He then left Manitouw, and went to Green Bay, when he decided to come to Chicago, which he did in 1872 and 1873. He worked in the firm of E. C. Glass, for about three years, and then opened a store at No. 215 Lincoln Avenue. He remained there for three years and did a splendid business; but a combination worked strongly against him, and greatly retarded the development of the business, which, had it had full sway at that time, would be today one of Chicago's largest and best businesses. The trouble was that as soon as heavy importers and dealers in stringed instruments found that they could make a manufacturer of a stringed instrument, they would be in the field. The man who is able to sell, is able to purchase strings, either in this city or New York, at less than full retail prices, and on application to houses in Germany his orders would remain unfilled. When they were obtained, his instrument could not be sold. From the time he opened his store on Lincoln Avenue in 1875 to September 21st, 1880, he was totally unable to purchase a single string at less than full retail prices. Prior to the latter date he sent $2,400 to a cousin in Vienna, Austria, who was an advocate of the law, and he, by a little ingenuity, succeeded in securing in 1 episcope for Mr. Bohmann a full stock of goods and credit for several hundred dollars' worth of more material. Upon the receipt of the goods, Mr. Bohmann secured a store at No. 115 North 4th Street, and opened with a $4,000 stock. He was then enabled to go ahead with his business in a very satisfactory manner. In 1882, he was able to obtain additional accommodations, and moved to No. 417 State Street, his present location, where he occupies the first floor and basement, each 25 x 25 in size. These rooms are fitted up with every instrument of every description upon which a stringed instrument is used, — harps, zithers, violins, guitars, banjos, etc., all in readiness for the signature and make. Mr. Bohmann secures his lumber, for his business, in America; and all material necessary for the complete construction of the instrument is obtained by him in this country, with the exception of the strings, which are made in Rome. Mr. Bohmann will soon be in position where it will be unnecessary for him to accede to the high prices of the Roman manufacturers, as he has planned a machine which is already in course of construction, that will make strings as perfectly and as rapidly as those in Europe. He is now manufacturing over three thousand instruments a year, and furnishing the New York wholesale market with goods. It has been demonstrated that he makes a superior instrument in every respect to those of European construction; and an indirect compliment to his skill as a mechanic, which has naturally been a source of annoyance, the fact that European manufacturers to so large an extent as to purchase his instruments and place on them the name of some noted European maker. Mr. Bohmann has just obtained a sure foothold, and his young, energetic and ambitious is now taking rapid strides toward the top. His enthusiasm kindles his followers, so that Bohmann is the only maker of all kinds of stringed instruments in the country, and the industry will become a pride to Americans and he will lead the Europeans who have so long monopolized this branch of the musical trade.

Frederick Freiberg, director of Freiberg's orchestra, is a son of Frederick and Henrietta Freiberg, and was born at Shebdtelheim, in Germany, on Januarey 9th, 1849. In his youth he went to Magdeburg, where he remained a brief period, and then emigrated to Berlin, where he became a pupil in the music schools. He developed remarkable fondness for music when a lad of nine years, and received instruction upon the violin and in the science of music in the same class as Fritz and Bernhard Listemann. Both of these artists have been with Theodore Thomas's celebrated orchestra during recent years. In his eighteenth year he came to this country with his parents, and settled in Chicago. Two years later he joined the Illinois Band; and in 1870, he became the most valuable member of the 7th New York Volunteer Infantry Band, and served as musician with the Army of the Potomac until 1872. In the following year he was engaged as the Olecki's Hymel's Company, and upon the termination of his engagements, returned to this city. He was a member of the Western Light Guard Band for several years, and in 1873, in connection with his brother, he organized the F. W. Freiberg and J. M. C. Carson, whose death occurred in January, 1882.

An adjunct of music is dancing, and following is presented a sketch of the leading professor in that art in this city:

Augustus Eugen Bournique, proprietor of the well-known academy of dancing, of this city, was born in France, on October 27, 1832. His father, Augustus Bournique, was a manufacturer of French plate glass goods, and in 1845 came to America to represent the firm, and, a large company of French plate glass goods. The Bournique family resided in New York City for about twelve years. During that time the children were instructed in the art of dancing from their earliest childhood. It may be said that this eminent family secured for their three children, which, when he commenced to walk, and has continued in thorough acquaint-
MUSIC AND THE DRAMA.

The classes in these academies are graded from infants' to ladies' and gentlemen's assemblies, and the most perfect system is maintained. The number of persons receiving instruction from Mr. and Mrs. Bourinine averages from one thousand to twelve hundred each season, and not alone do they confine themselves to the patronage of city residents, but also have large classes in Evanston and Kenwood. In the instruction of pupils, Messrs. Eugene A. and Alvar L. Bourinine assist their parents; both are young men, popular with the patrons of the institution, and adepts in the art of dancing. Mr. and Mrs. Bourinine also have two other children, a young daughter, May, and a son, Lyman. Mr. and Mrs. Bourinine are members of the American Society of Professors of Dancing, in which Mr. Bourinine is a member of the executive committee. Mr. Bourinine also belongs to the Calumet and Washington Park clubs, and both himself and wife are prominent and popular in the social circles of the city.

INTER-STATE INDUSTRIAL EXPOSITION.

The scheme of holding a permanent Exposition in Chicago first began to attract public attention in 1871. It was talked up by J. Irving Pearce, W. F. Coolbaugh, and Potter Palmer, and articles favoring the venture appeared from time to time in the press. About this time, Milton S. Patrick, who died subsequently at Santiago, Chili, made an effort to found a Mechanics' Institute here, and he went so far as to draft a plan of organization, and some stock was subscribed. Cyrus H. McCormick placing his name for $10,000. The wool-growers of the Northwest also discussed the advisability of holding an annual exhibition in Chicago, providing they could obtain local encouragement. Messrs. Pearce and Coolbaugh went at the matter of holding an annual exposition in an informal manner, and Potter Palmer showed his willingness to assist the enterprise by sub-

scribing $10,000. The gentlemen proceeded with their plans, and other public-spirited citizens came to their assistance. R. T. Crane was the next largest subscriber to Mr. Palmer, and the subscription list grew until there were five hundred and twenty-two original subscribers, and the Chicago Inter-State Industrial Exposition Company was organized, in March, 1873, with a capital stock of $150,000. A meeting was held on April 4, 1873, at which a committee was appointed to select a list of officers; and this list was adopted and officers elected on April 25, 1873, as follows:

The intention of the corporation at first was to give temporary annual expositions, and it was thought the cost of a building and attendant expenses would not exceed $150,000. The Common Council was applied to for permission to use the unoccupied portion of the Lake Front, lying at the foot of Monroe Street. Permission was granted by the Council for its use for one year, and, on June 10, 1873, the Exposition Company increased the amount of its capital stock to $250,000.

The Exposition was opened to the public in September, and the receipts from the sales of tickets, and other sources, were $175,402.84. The total expenditures on account of building and running expenses were $345,937.84, leaving a deficit of $36,532.29 for the first year. The promoters of the enterprise were not discouraged, however, and proceeded to improve the
building and prepare for an exposition the next year. Their right to the occupancy of the land was extended by the Council for two years, and since then, indefinitely. Before the Exposition of 1874 opened, the company constructed a machinery-hall at the north and a conservatory at the south end of the main structure; new foundations were put in under the main building, and other permanent improvements were made subsequently, which brought the total cost of the building, in 1877, up to $350,000, while the total expenditures in improvements to January, 1886, amount to upwards of $500,000.

The receipts for 1874 were $163,650.35, disbursements the same amount, and bills payable outstanding to the amount of $24,929.76, leaving a deficit, less $85,06 cash in the treasury, of $24,341.70.

In 1875, the excess of earnings over expenses was $9,864.40.

The total receipts of the association for 1876 were $114,140.11, and the earnings over expenses $7,777.84. For the first three years the price of general admission tickets was fifty cents, but it was made twenty-five cents in 1876, with the result of largely increased attendance, but diminished receipts. The management was well satisfied however, for the result showed that they had made the Exposition popular.

In order to make it of the utmost value as a public institution to visitors,—to exhibitors, as a means of placing their manufactures and devices before the public; tribulations regarding their occupancy of the ground on the Lake Front. No sooner had the debts ceased and the first dividend been declared, than the Common Council demanded rent for the ground. All sorts of rentals were demanded, ranging from $1,000 to $15,000 per annum. The matter has been between the Common Council during the past seven years in a score of phases, and that body has even gone to the extent of ordering the company to remove their building. The suspicions of some of the city fathers have been aroused by the fact, that more than three-fourths of the capital stock of the Exposition Company remains in the hands of the original subscribers and their families. They do not appear to understand how it is that a number of wealthy people banded together in corporation can be thoroughly unselfish, public-spirited and philanthropic. In 1882, a resolution was introduced in the Council requiring the Exposition Company to not only pay $15,000 rental per annum, but to pay back-rental to the amount of $50,000. The management protested that this simply meant destruction to the enterprise, and that they would not pay it. In November, 1882, the Council passed an order directing the city comptroller to employ an expert to make an examination of the accounts and condition of the Exposition Company as requested by the organization, and Henry E. Hamilton was engaged for the purpose. On December 11, he made a detailed statement, of which the following is a summary:

To local merchants and tradesmen as a valuable advertising medium—the policy of making no charge for space or power was originally adopted and adhered to. The Exposition may be said to have been self-sustaining since 1877, and it is the only Exposition of the kind in the country that is self-sustaining, with the possible exception of the American Mechanics' Institute of New York.

The Exposition Company have been through many matters.
veto the order, but he refused. The Exposition management then sent a communication to the Council, setting forth that the original $150,000 subscribed was much in the nature of a guarantee fund; that from 1874 to 1882, the organization had borrowed or overdrawn upon its treasurer, from $5,000 to $47,000 annually; that no stock-dividend proper was ever made, but only the surplus, which had been more than earned, was ratably distributed; that the amount actually paid in cash dividends up to January 1, 1883, was within a fraction of three per cent. per annum on $250,000, or 4.18% per cent. on $173,095, the amount originally paid in; that while $500,000 had been expended on building and other improvements the current market value of the stock was not above forty-five cents on the dollar—less than one-quarter of the actual cost of the property.

The Council reconsidered the order passed on December 18, and a meeting between the Exposition directors and the aldermen was arranged. No rent was paid by the Exposition Company until February, 1885, however, and the sum then agreed upon was $1,000 per annum.

Reference to the statement of the affairs of the company made by Mr. Hamilton in December, 1882, will show the item in the receipts of $65,691.76 from receipts. This source of revenue was made up from leases of portions of the building for temporary athletic and sporting exhibitions, the Republican National Convention of 1880, Summer Garden concerts, the Thomas Orchestra seasons, the May Music Festivals, the Republican and the Democratic National Conventions of 1884, mass meetings, and many other entertainments of a high order, and meetings of public importance for which the building has been an unerring accommodation and advantage. Three Exhibitions have been held since Mr. Hamilton’s report, and the total receipts to date, as stated, approximate nearly $2,000,000, and the disbursements the same amount. There has been a slight decrease in attendance during the three years, and the ticket receipts have fallen off correspondingly. The company consider the enterprise self-sustaining, however, and hope to continue making improvements both in the building and the character of the annual exhibitions.

There was a cash balance in the hands of the treasurer for 1884, $15,149.40; the receipts from ticket sales for 1884, were $169,492.40; the total receipts $126,250.85, and the total disbursements $66,341.05; uncollected and due from railroad companies $69,50. Of the amounts disbursed $13,757.75 was for repairs; $7,157.13 for labor; $7,488.70 for printing and advertising; $18,106.05 general exhibition expenses; $10,000 bills payable; $7,046.60 insurance; dividends of 1884, $4,980.56. Of the sum total expended $6,088.81 was applied to the mechanical department, and $8,303.58 to the art department.

In 1888, the Exposition opened on September 2, and closed on October 17. In no previous year had the applications for space been so numerous or urgent. In value, diversity and interest the exhibits excelled those of any previous year. The total attendance was 298,018, of which number 271,422 were adults; 25,557 children; 466 exhibitors holding tickets; 373 employees; average daily attendance, 8,463 for forty days. Twenty-eight railroads and one steamboat line entering the city sold 37,441 coupon admission tickets. It is estimated that at least 10,000 of the total number of visitors were strangers in the city.

In 1889, the art gallery contained, besides the fine collection of casts of statuary owned by the association, four hundred and twenty-eight paintings, all but thirty-two of which were by American artists. The collection was creditable, and afforded a true and comprehensive view of the best American art of the day. Thirty-three pictures were sold, the aggregate value being $13,655.

During 1885, the building was occupied by the Illinois State Board of Agriculture for holding their regular annual fair and stock show, by the National Exposition Association for a poultry show; in April, the Chicago Opera Festival Association built a mammoth auditorium, capable of seating ten thousand people, within the building, and gave a successful season of opera at popular prices; following this John A. Hamlin secured the hall and fittings, and gave a series of operatic performances; in March, the Chicago Academy of Sciences proposed to make its valuable collection, illustrating the several departments of Natural History, a part of the regular exhibition for two years, and suitable rooms were provided, and this attraction was added to others already enumerated as a part of the regular exhibits.

At the annual meeting of the stockholders, on November 14, 1885, Edwin Lee Brown moved that the executive committee inquire into the propriety of holding an “Indian Exhibition” in the building, either in 1886 or 1887. The motion prevailed unanimously, and steps were being taken to gather representatives of the various Indian tribes of the great West and Northwest, together with their squaws, pappooses, dogs, ponies, teepees and accoutrements, as well as a collection of old Indian implements and curiosities, to make an exhibition at once complete and full of historic interest.

Mr. Brown also offered the following:

Resolved, That it is the sense of this meeting that a great World’s Fair be held in Chicago in the year 1902—the four hundredth anniversary of the landing of Columbus in America. Which being seconded by Mr. R. W. Hare, was, on motion, adopted, and the matter was referred to the executive committee for consideration and report.

This resolution created a great deal of public comment, and served to advertise Chicago wondrously throughout the country. The press of the city, and many public men who were interviewed, heartily commended the proposed World’s Exposition, and it was deemed peculiarly appropriate for Chicago, the youngest, most enterprising and representative American city, to celebrate the landing of the great navigator of Genoa upon the new continent.

At this meeting the following officers for 1886 were elected:

THE DRAMA.

It may well be doubted whether there is any form of art in which the ideal and the everyday practice are so widely separate as in the drama. Of poetry, Hegel has somewhat loftily said that its content is spiritual existence and eternal truth, as illustrated in the lives and conduct of men.

The entire circle of the outer world enters poetry only in so far as the spirit finds its activity in ruling over the material; as the environment of man, also his outer world, which has its essential value only in reference to the inner of consciousness, but dares not make
This, which poetry in general does for the reader in his closet, the drama causes to live and move before him. Man himself, as to his inmost being and springs of action, lives in the mimic scene; out of the depths of his spirit he reveals himself to the beholder in all his moral quality. Of the drama it is particularly true, as Hegel has said of art in general, that

"Its design is to awaken and to animate the slumbering feelings, desires, and passions of all kinds: to fill the heart and to permit to be conscious in man every thing developed and undeveloped which human feeling can conceive, experience, and bring forth, in its innermost and most secret parts; whatever the human heart itself has felt, whatever the passions and moods desired to move and act, and especially whatever the spirit has in its thought, and in the Idea of the most Essential and High; the glory of the Honored, Eternal and True. It may also express unhappiness and misery, in order that man may make wickedness and criminality conceivable, to permit the human heart to share every thing horrible and dreadful, as well as all joy and happiness. Then fancy may at last indulge herself in the valuation, imagination, and run riot in the ensnaring magic of sensuously entrancing contemplation."

If all literature had been searched for a passage accurately describing what the Shakespearian plays do for man, nothing could have been more to the point than this from Hegel just quoted. In a less degree, or more properly with regard to a part of the official history here defined, the same ethical and educational design underlies the dramatic writing of several other authors—nominally of Browning, Tennyson and Swinburne. But that any such claim of a high office of culture can be made for the stage in general as it at present exists, or of any social value, it would be difficult to pretend, considering the gap between the ideal and the real is so enormous that it can not be bridged over. The Shakespearian drama, and all later work underlain by ethical and deeply poetic motives, is seen but rarely, and then only through the personal devotion of a few specialists. In place of it we have sensuous show-pieces, roaring and essentially vulgar farces and farce-comedies, broad burlesques, and minstrelsy. This is the complication to which the spoken drama has fallen in every part of the world. The causes of it are worth considering, for nothing is more certain than that, however valuable the gain may have been, by whatever other agencies have taken the place formerly belonging to the drama, there has been also a great loss, inasmuch as the drama appeals to the strongest instincts of the human heart.

The first cause to be assigned for the decadence of the drama to an office of mere amusement, is the division which the Church has labored so many centuries to build up between itself and the world, and particularly between itself and the amusement world. This division still exists as a superstition, operating to keep out of the theatrical business the greater part of those most moved by ethical and ecclesiastical considerations. The Church's censure of the theater has also had the effect of depriving the stage of precisely that part of the general public which, in a normal state of affairs, would have afforded it the steady support and the stimulus of an ethical appreciation. Add to this, the division of labor prevailing in ethics and education just as surely and just as widely as in mechanics, and we have our social forces not only separated but set over against each other in two, or many, hostile camps. It is this attitude which the Church, the Press, and the Stage hold toward each other, instead of mutually helping each other, as there was every a priori reason for their doing. Hence, it has come to pass that the stage is given over so largely to speculative managers willing to make money at any cost, players willing to give the public anything whatever that its vile appetite may happen to crave, and a public composed of the volatile elements of all classes, desiring first of all to be amused, or to experience a sensation of some sort, when sensation has become increasingly remote and blasted.

The justice of the views above given in regard to the effect of the antagonism between the stage and the church, is strikingly shown in the behavior of that occasional part of the theatrical public derived from church circles. It is well known that actors like Booth, Irving, Modjeska and a few others, are able to play long engagements in the same theater before overflowing audiences, while ordinary attractions in the same places draw but half-houses. It is noticeable in all these cases, as also in the grand opera and the more genteel class of light opera, that the audience is largely composed of persons who are never, or but very rarely, seen at the theater upon ordinary occasions. Here we have the reciprocation of support and appreciation, in return for an art-effort of ethical and poetic worth, of just the same sort as that already predicated. It can be said with little fear of success that any composition, as great as the engagements of Irving, and of other artists maintaining the true dignity of the drama, is derived from this re-enforcement by the church public.

Antagonism between three such important factors of social progress as the pulpit, the stage, and the newspaper press necessarily results in impairing the work of all. Wherein the stage suffers has already been set forth. It is not always seen that the church suffers just as much. Not only is a certain solid part of the public cut off from the theater, but a corresponding loss is suffered by the church. The amusement public, per se, is not the church public. The loss of this element from the church society is to be regretted upon many accounts. The buoyancy of these lively spirits and impressionable imaginations is the quality needed for relieving the church of what many feel to be its objectionable tedium. The loss is so severely felt that the pulpit has resorted, and is constantly tempted to resort, to sensational expedients unworthy of its associated sanctity, in the hope of bringing a few individuals of this class within hailing reach. The newspaper feels the effect of this antagonism quite as plainly as either of the agencies concerned, although, naturally, from having its circulation in the present world, its sympathies are mainly with temporal forces, and therefore with the stage in its controversy with the pulpit. It is not practicable just now to propose a composition between these warring interests. Possibly there is something of this sort in preparation, through each class' need of the other's help, and through its catering thereto.

It would be a mistake to conclude, from the present popularity of farce-comedy and the less worthy elements of the drama, that the gap between the actual and the ideal stage is wider to-day than at many previous times in its history, not even excepting the periods of Aeschy-
MUSIC AND THE DRAMA.

659

lus and Shakespeare. The situation has been cleverly put, in regard to the popularity of the higher forms of classical music, by the London musician who remarked that “one couldn’t always be hearing music with a wet towel around one’s head.” To accept the slumbering elements of human nature in the direction of the “most essential and the high,” and to celebrate the “glory of the honored, the eternal and the true,” are noble functions which any profession might be proud to number among its possibilities. The stability of the church and the currency of the higher forms of literature are evidences that there is a large public willing to have these used for them, and even to pay well for their privilege. Nevertheless churches are largely supported as social clubs, and are kept open but one day in seven; those that do more, trade upon a sort of holy underwriting for the future state, rather than upon the vigorous desire of their adherents to be made perfect before their time of departure is obviously near. Powerful as are the lessons of the stage, and intuitively as they appeal to the hearts of men, the moment that the ethical motive becomes so transparent as to usurp the attention in place of art, that moment the drama loses its illusion, its charm, and its power to awaken and instruct. Indeed it may well be doubted whether the charm of the drama admits of being analyzed and defined in set terms. Does it not, rather, resemble those volatile odors of which the chemist can tell us no more than that they come from certain essential oils, of whose inner construction he can give us the ultimate analysis of carbon, oxygen, hydrogen, etc., but why one of them should have the odor of rose, another of violet, or another of hay, chemistry can not so much as attempt an explanation.

No doubt it would be as easy to misconceive the educational value of the stage by over-estimating as by under-estimating it. In the nature of the case, the most the drama can do in the direction of awakening and developing the higher powers of those who “assist” by witnessing it, is limited to an occasional incitement. In the majority of cases such an incitement will fade out and vanish like the greater number of good impulses, without leaving behind it any apparent modification of character or conduct. Yet there are two aspects in which impressions of this kind assume an importance not obvious upon first consideration. The first has reference to the orderly way of developing human character. Character is the resultant, or the combined operation, of the individual’s aptitudes and habits, both natural and acquired. “Every human infant is a bundle of possibilities” whose sum total is never fully worked out, even in the most favored cases. The seeds of many virtues may be there, which the sunshine and the showers of an unfavorable environment may have been insufficient to bring to fruition. Whichever one of these latent aptitudes for the higher qualities of goodness and strength come to fruition, in a majority of cases, owe their survival in this highest form of “the fittest” to a resolute purpose of will on the part of the individual. Heredity and environment do much for every human being; but the human will, in its own free action, is a divinity within man capable of shaping his ends into lines of nobility and beauty, in spite of an environment apparently hostile. This awakening of the will and fastening it upon one principle of action, is nearly always the result of an impression received within the imagination. Imagination is not alone the representative faculty, recalling and re-combining elements previously received from other sources; it is most of all the divining faculty, the inner capacity of recognizing truth, beauty and goodness—of recognizing just as surely, and worshipping with instinctive veneration, those grades of nobility, beauty and pathos (scarcely so much as hinted at in the environment) which appeal to reason. It is through this channel that religious experience begins. The entire fabric of belief upon which all churches rest has its only subjective foundation in this intuitive power of the human mind to conceive of transcendent holiness, justice, and love; these it is the object of all sacred writings to unfold and of all churchly observances to evolute in human souls, patriotism, philanthropy, art, and the higher literature, and of this endowment of revelation which is being made to man through the imagination.

Hence, it is impossible to foretell of any single incitement to nobler life how far its influence may extend. There is no man who has accomplished mental work of substantial value but is able to trace some part of his success to a casual impulse received in early life. The entire record of evangelical experience confirms this view. Marvelous transformations of character have owed their beginning, the resolute determination of will which gave them value, to a passing remark of no especial weight to the majority of listeners. A suggestion, an impulse, apparently coming from no visible whither, but floating in the moral ether like an invisible germ in the air, falls upon the mind in a favorable moment, and lo! the whole trend of the being is changed. In the expressive words of Holy Writ: “Old things are done away; all things are become new.”

The other aspect in which fugitive impressions become significant may be called the cumulative one. Imagination is not so much a re-presentation of images and feelings known to us, as it is the complement of the environment. By its idealizing power, the imagination supplies for the environment the flowers and fruits of beauty and of perfection which reality lacks. It is doubtful whether there is any one individual life so rich, so fortunate, so complete, both inwardly and outwardly, as not to need the help which this faculty gives. This is the source of the popularity of that large class of widely-read fiction in which the heroes and heroines are enormously wealthy, live in palaces, migrate from climate to climate and from kingdom to kingdom as fancy and the seasons change. In their essential nature these highly fortunate imaginary personages may be, and often are, essentially common if not ignoble. For many readers this will not matter. Their own burdens lie along the lines of pecuniary limitation and domestic responsibilities, ever present with their exasperation and disillusionizing prose. Out of the miserable real, the soul is glad to escape into the free ideal. In a different way, but quite along the same line of operation, comes the popularity of that higher class of fiction having to do with the development of innate beauty of soul. The struggles, the triumphs, the littlenesess and the contrasting greatnesess, the beauty and pathos of soul “made perfect through suffering”—these take the reader out of his every-day world, raise him above it, furnish the inner chambers of his mind with vivid pictures of persons having like passions with himself, but true to an ideal which he too often misses. Thus comes rest, repose, strength, and at length the vigor of a new life.

The productive force of these impressions depends, no doubt, upon their frequency or their vigor, but more upon the state of the individual. An innocent girl passes unmoved through suggestions which fire the baser passions of the roué at her side. Just as the lower fiction and drama offer to the pure-minded nothing but disgust, so the nobler fiction and drama offer to the
pure little beyond weariness. Little, yet something.
There is a sympathetic resonance of mind, just as there is of sound. Helmholtz contrived an apparatus of
tuning-forks, vibrated simultaneously by means of
electricity, in the intervals of the natural harmonies
from one to seventeen. Opposite each fork he placed
a resonance chamber corresponding to its note; be-
 tween the fork and the chamber a little screen or dam-
per. When this was out of the way, the chamber resonat-
ated powerfully, like an organ pipe, as long as its fork
vibrated. By shutting off certain ones of these resonance
chambers, Helmholtz was able to imitate the sounds of
the various orchestral instruments at pleasure; he even
produced the vowels of human speech. Whether the
combined tone of the apparatus was the wail of the
obo, the mellow note of the French horn, the round
"O" or the thin and unsatisfying "I," was merely a
question of the permission or suppression of certain reso-
nance chambers. The soul is full of these chambers.
Virtue interposes its screen before the baser half, and
much may appeal to these darkened chambers in vain.
But let them once be opened by an evil desire or a
bad example, and there is no telling how thrilling the
tone of vice may be.

It is exactly the same in the higher life. Many
of the human species are born and grow to maturity ap-
parently with all the resonance-chambers of virtue shut
off. A noble tone, spoken at the moment when one of
these finer chambers is open, becomes a resurrection
trumpet; the life is set in a new key, the world is
changed, a soul is borne into the light of the upper air.
This, which the church and the higher literature make
a specialty of doing, is also entirely and peculiarly within
the province of the stage.

In addition to its office of "holding the mirror up
to [human] nature," in order to illustrate the inherent
tendency and necessary ending of moral choices, thereby
to incite a nobler conception of life; in addition, also,
to its office of completing or complementing a meagre
environment, by supplying for the hour the missing ele-
ments of nobility or joy,—the drama has yet another
office. It is that of bringing to consciousness the idea
of human brotherhood, thereby strengthening the sense
of inter-dependence between man and man, and in the end
predisposing to philanthropy and furthering those co-
operative movements of society, through whose be-
nevolent working the lot of the weaker members is so
much ameliorated. This is the direction in which the
entire sympathetic drama operates. The contempla-
tion of characters repulsive as to their exterior, the vic-
tims of mistakes in previous generations, the foot-balls
of fortune in the present, yet all impelled by forces for
which they are only in small part responsible, and all
permeated by the vitality of our common human nature,—
can have no other operation than to make the ob-
server more charitable, more kindly disposed, more
tolerant of mistake and error at the very moment when
the subsequent consequences of error are most plainly
discerned. From this point of view, such plays as "Rip
Van Winkle," "Hazel Kirke," and a variety of similar
ones, set in a key but little above that of every-day
life, have a quasi-ethical significance not easy to fully
measure. Perhaps their usefulness is enhanced rather
than damaged by the current impression that they are
art and not education. The dislike of receiving the
advice is so deep-seated in nature, that if the earth

Deity's moral government is illustrated in the clever
manner with which conceited man is inoculated with
the notion that he is wholly free and independent of
supernatural interference.

While it would be very possible to attach too much
importance to the current charges, that the stage is un-
necessarily true and vulgar in the subject-matter with
which it deals, it is nevertheless worth considering
whether it is not indeed the victim of debasing influ-
ences from which it might just as well be free. The
old charge of religiousism that the stage is allied to drink
and vice has this much of truth, namely, that the
classes who, by temperament, are most in danger of
falling into drink and vice, are the very ones who, in the
earlier stages of their downward career, are most at-
tracted by amusements, and who, therefore, form a
section of the theatrical public most easily appealed to.
This phase of natural selection has already been touched
upon in considering the evil effects of an arbitrary line
of demarcation between the stage and the church. It
is not an aspersion upon the stage that it naturally a-
tracts the class just described, since the principle upon
which the "natural selection" rests is in them, rather
than in the stage. The quasi-dissipated theatrical pub-
lic, here referred to, consists of individuals predomin-
antly emotional, desirous of having a good time. Their
use of drink, at first, is merely an inclination; it takes the
form of medicine, a ready means of bridging over a
period of jaded nerves and impaired energy. The
vicious accompaniments, if vicious accompaniments
there be, are due to appetites unduly stimulated and the
impairment of the inhibitory functions of the higher
brain through heredity or habit. It is not true that
theatrical patrons who occasionally take a glass of wine
are responsible only to stage attractions of a low plane
of moral quality. On the contrary, many a maulin im-
hbiter has been affected to tears by the pathetic scenes
of "Hazel Kirke" and other pure plays. It is also historic
that the gallery responds to moral sentiments more
quickly than any other part of the audience, especially
if they be so familiar as to have the character of axioms.
Nor is it necessarily derogatory to the character of the
stage that bar-rooms should be opened as near every
theater as it is possible to get them. This, also, goes
with the "natural selection" already described. The
theater nightly brings together some hundreds of social
fellows among whom are many thirsty souls, to whom re-
straint of appetite is a matter of compulsion rather than
of habit. If these people go out between the acts and
visit a neighboring bar-room, it is a fortunate circum-
stance for the bar's money-drawer, but in no way the
fault of the theater or of its manager, nor yet in the
slightest degree a reflection upon the moral quality of
his attractions.

From the establishment of bar-rooms in handy neigh-
borhood to the theater it was not a long step to a prac-
tice, harmless in itself, which of late years has grown
into a burden and a most continual threat of degrada-
tion. Reference is here made to the display of litho-
graphs and bills in saloons and saloon windows. The
danger of this practice does not wholly lie in its ten-
dency to attract an undue proportion of paying cus-
tomers who, from their personal habits, might be
particularly susceptible to emotional and sensational
plays, shapes, etc., although this danger undoubtedly
lies in the practice. The main objection to it, however,
is in the free privileges given in return for the adver-
sising space. These amount to one or two tickets a
week for each place of display. As the house retains
its power of selecting the evenings when these privileges
MUSIC AND THE DRAMA.

shall be used, it naturally masses them in the earlier part of the week, when paying attendance is lightest. The result is that opening nights are unduly heaved by an element derived from these sources, applauding and condemning, making or marring the fortunes of a play, in a spirit quite other than that of the best part of the paying patronage of the house. It would not be easy to measure the evil influence of this feature of the theatrical situation. Fortunately it has already attracted considerable attention in theatrical circles, and quite a number of managers have instituted a reform for themselves. Even were this cause of deterioration obviated, there would still remain the double fact that the public, as a whole, is incapable of the highest in any direction; and the other circumstance that geniuses able to present the highest, in terms of convincing mastery of intellect and feeling, are extremely rare in every generation. Thus, having neither poetic geniuses nor any desire for them, the public gets along quite comfortably with whatever happens to tickle its ribs.

There is another question having much to do with the progress of the stage toward its ideal, namely, the question of Sunday performance. If it can be shown that Sunday performances are beneficial to any part of the community, then they must go on; and the overworked actors must get such solace as they can, from the reflection that their lot of working seven days in every week, instead of six, is by no means peculiar to their own profession. While necessity may serve to condone the moral quality of their disregard of the Sabbath, it has not the slightest power to affect or mitigate the physical and moral deterioration due to overwork. Considered purely as a physiological question, the habit of giving nine performances a week is fatal to an actor's freshness, elasticity and self-poise. He becomes a mere drudge, whether his nine representations be Shakespearean or a part of the most trashy farce-comedy. It is doubted by many managers whether the theaters gain anything from Sunday performances. They think that, in so far as their regular patrons are affected, the extra evening merely draws so much from the other nights of the week. What they gain from the class which can or will attend upon no other night than Sunday, they think that they lose by offending the Sabbatarian prejudices of those who otherwise would come oftener. At all events, aside from the physical deterioration of the actors in consequence of working seven days in every week, Sunday performances tend to degrade the general level of the stage in the same manner as the bill-board practices already described, namely, by affording additional influence to the class of patrons having the least regard for questions of taste, refinement and moral quality.

Another element to be taken into account in estimating the present condition of the stage, is what is known as "the combination system." The evolution of completeness in dramatic performances has proceeded by a few well-marked steps. The location of strolling bands of Thespians within the walls of inteligently constructed theaters, led to a speedy enrichment of the mise en scène. The inability of stock-players to essay successfully the greatest rôles, soon gave rise to the star system, in which the leading rôle became the specialty of the star, while the remaining parts were sustained by the crude talents of the stock company. The star system was already a step toward a division of labor. The impossibility of securing a well-balanced ensemble, when the special aptitudes of the stage had every ordinary surroundings of a poorly-drilled stock company, has lately led to the combination system. In this the star selects his own support, and provides himself with a complete paraphernalia of fully trained company, suitable scenery and properties for whatever plays he proposes to act during the season. This done, he contracts with the local managers for a fixed percentage of the gross receipts, in return for furnishing the dramatic performance complete. The house, upon its own part, furnishes certain specified pieces of scenery, the bills, newspaper advertising, ushers, and executive staff. This system has now become universal in the United States, and upon the whole deserves to continue, although it is as yet far from perfect. It is essentially elastic, enabling small towns to have a few weeks of enjoyable dramatic representations, where the patronage would be wholly insufficient to support a local company during the season. It enables managers to exercise an elective control in the selection of attractions for their public, and therein places within their power the complete purification of the stage from all debasing or unworthy elements, so far, at least, as their own theater is concerned. It also brings the star and the "combination" under the influence of public opinion upon a wide scale, for it is obvious that no show can succeed upon the road unless it be in harmony with the public taste.

In a normal state of society these considerations would operate, most likely, to the complete purification of the stage. In the present condition of things, however, two obstacles interfere with the accomplishment of such a result. One is the fact that, except in a few of the largest cities, theater-going is not habitual with any class, and least of all with the individuals whose presence would do most to elevate the standard of propriety and seemliness. In so far as there is a class of regular attendants upon the drama, it is mostly made up of the less worthy elements already described.

Another unfavorable element in the problem is the speculative manager, who, indeed, appears in both ends of the theatrical enterprise. In a large way he stands at the fountain-head of the combination system, engaging the star and support, furnishing the very considerable capital necessary for putting in motion so expensive an enterprise as a first-rate dramatic outfit has come to be. He therefore exercises for himself a right of private judgment as to what will and what will not "pay," amounting to an absolute ignoring of all considerations of professional enthusiasm and art, and of all that he deems high-flown abstractions generally. A manager of this kind controls many enterprises. He has contracts with promising artists covering five years or more. He has similar contracts with the leading playwrights of the world. When his name has acquired the prestige of success, he can make his own terms with the local managers, who readily yield them in the assurance that his "attraction" will add to the popularity of their house, and in regard to the further consideration that if they do not take him their rival will. Against this form of capitalistic monopoly any reformer will have to struggle single-handed, and at heavy odds.

At the other end of the line is the speculative local manager. He, as a rule, is an irresponsible person in search of an easy and a lucrative living. Having leased the local theater for a fixed rental, it is his opportunity to find his profit in so managing it that a constant change of attractions will draw him, in turn, all those in the community having a taste for any kind of dramatic entertainment. Naturally the patronage of the legitimate is the least abundant element in his account.

Hence a regular week of this sort will be sandwiched in between minstrelsy, spectacular, shows of shape, and roaring farce. Bad as the mixture is of its own
accord, it is too often made worse by free advertising given the worst elements in it by the pugnacious pulpit of the vicinity.

The unfavorable environment of the stage has yet another element, playing no small part in perpetuating mediocre performances. Reference is made to the remarkable extension of the theatrical circuit, and the consequent demand for a vast number of combinations in order to fill the time at so many theaters. The sudden demand for actors and singers, thus recently created, has had to be met by the introduction of a great amount of crude material, much of it unpliant in quality, and very little of it leavened by an ideal above the omnipresent consideration of bread and butter. Thus it is easy to see that, between its lofty ideal upon the one hand, and the apathy of the public and feeble powers of the profession on the other, an unsatisfactory condition of the stage is inevitable. Its attitude is always one of compromise, and therefore unsatisfactory to criticism from whatever standpoint. As already intimated in the beginning, the process of evolution can go on only by re-uniting the disjoined members of the true public of the drama, and thus bringing to bear the high-toned appreciation and helpful censorship of culture. When this begins to be felt, the speculative manager will not be found to stand in the way. To him, in the highest sense, the maxim is true, "vox populi vox Dei." If the revelation reaches him through the pocket, it is only because the remainder of his soul is found to be immaterial to the matter in hand.

As already intimated, the signs betoken a reformation of the theatrical world in the direction here indicated. The old antipathy between church and stage relaxes its vigor at all points of proximity between the two provinces. The great middle class of conservative humanity, that unsolvable problem to theologians—the class which is too good to damn and too indifferent to "save"—is more and more recognizing the drama in its inherent attractiveness.

The operation of the various favorable and unfavorable influences above described, has been illustrated in the recent history of the Chicago theaters. The comparative newness of society here relieves it from many of the traditionary restrictions incident to a long-settled civilization, among which the hereditary dominion of clan may be mentioned, as the one whose destruction has afforded to the drama a particularly beneficent opportunity. It is the good fortune of Chicago, and of all rapidly growing new communities, to receive its human material in the form of detached units, unconnected by family ties beyond the single household. Everything has to be made anew; church, clan, clique, aggregations for culture as well as the by-laws regulating them, are re-created by a young and vigorous community, full of energy, self-reliance and the spirit of freedom. It inheres in this kind of opportunity that the wheat and the tares thrive alike, unless, indeed, the tares be thought to derive the earliest advantage from the richness of the soil. Evil may be said in such a case to have a triple advantage. It is the natural expression of the lower side of a vigorous animal life; the community looks upon it with a generous disposition to "give every kind of man a chance," and, finally, the social order is too heterogeneous, and too imperfectly knit together, for the easy suppression even of the disorderly whose excess have become acknowledged. Under circumstances of this kind we would expect theater-going to be more tolerated among church members than in an older community; it would, also, be equally certain that the ranker tastes of the lower classes would not fail of being cared for. Such, indeed, we find to be true of this city.

The typical theater of Chicago is McVicker's, an account of whose re-building and subsequent career is given in another part of this essay. Mr. McVicker, as an actor and a lover of the higher drama, maintained a stock-company longer than almost any other manager in the country. His house was the acknowledged home of the legitimate drama—a term which may roughly be defined as including all drama, whether tragedy or comedy, dealing in a helpful way with human passions and follies. Outside the limits of the technically "legitimate" are to be counted melodrama, with its meretricious interests of melancholy Byronism, its red-fire and slow music; farce and farce-comedy, with its burlesques of human folly; and spectacle, dealing with form, shapes, and sensuous visual impressions. While the stock company remained at McVicker's the legitimate occupied the stage for more than three months of the year. When the combination system came in, the records of the house show a great falling-off in this kind of performances. In place thereof are found many weeks of spectacle and the ever popular farce-comedy. In this, however, we are not to discover a falling-off in the taste of the Chicago theater-going public, but rather a change of attitude on the part of the management. The stock-company and the legitimate failed to pay. The noble old Roman owning the house, did as the other Romans did—he opened it to attractions presumed to be more lucrative.

A comparison of the repertories of the various theaters with each other for successive years, will show curious fluctuations in the quality of entertainment offered upon the same stage in different years. The house which during one season is given over to the legitimate, in another may be quite as unanimously devoted to a wholly different style of performances.

Upon the whole, however, it appears to be beyond question that the legitimate drama is continually upon the increase in Chicago, not only in frequency of representation but also in attractiveness. Nor could it well be otherwise. "All roads lead to" Chicago, and every good company in the dramatic field has to come here. The multiplication of well-appointed theaters, from the two or three before the fire to the ten or twelve now existing, has afforded a corresponding amplitude for every sort of opportunity. The legitimate, in spite of its comparatively feeble hold upon the lower class of theater-goers, is nevertheless at a premium with managers, because it helps to make their houses better esteemed by the well-dressed and well-established classes. Hence, we find the legitimate filling not only its fair proportion of time at McVicker's, but also enjoying a good degree of consideration in all the other houses; this, too, not alone at the down-town theaters, but at the Standard, the Academy of Music, and the Criterion, as well.

Nor does it seem particularly necessary to waste tears over the current popularity of farce-comedy and light opera. While these things may not be educational in the higher directions, they are not necessarily bad. At worst, their humor is but little beyond the somewhat rank, but wholly American, flavor of Mark Twain and the lesser funny men of the periodical press. American business men take the world hardly—an occasion to laugh is worth to them, perhaps, all that they so freely pay for it. Whether a similarly tolerant view ought to be taken of the "leg drama" and the "wild-west," cow-boy dispensation, is not so clear. The latter, probably, does little harm; the former is set before its public in Chicago.
MUSIC AND THE DRAMA.

663

with a disgracefully liberal hand. The State Street theaters, and numerous others in more remote parts of the city, cater to appetites which, in the absence of internal inhibition, ought to be under police control. With this department of Chicago theatrical history we have nothing else to do. It is a problem for the moralist and the reformer.

It would take us too far to trace in detail the history of the Chicago stage, as represented by the different theaters since the great fire. Fortunately it is not necessary to do this; the combination system, as already described, having had the effect of depriving the local theaters of their individuality and of rendering the dramatic history of every leading city homogenous with that of every other. To write the detail of the local stage, therefore, would be in effect to undertake the detail of the entire dramatic activity of the country. From this sweeping conclusion exception must be made of the period subsequent to the great fire and previous to the adoption of the combination system. For several years of this time McVicker’s was the recognized home of the legitimate drama in Chicago. Travelling stars were supported by the local stock company. In this way the more important engagements were those of McCullough, in October, 1875; Ben DeBar, as Falstaff, etc., in February, 1876; in March, 1876, a period of comedy, when John Dillon, Florence, Raymond and Roland Reed were all in the casts. In April of the same year there were Booth, Daly’s Fifth Avenue Company, and Maggie Mitchell. In the advent of the Daly Company will be recognized the beginning of the combination plan. The leisure thus created was utilized by a country tour of the stock company.

During this period, a large number of new plays were produced in Chicago,—the comparatively small size of the city, and the consequent facility of monopolizing public attention, and the appreciative attitude of dramatic criticism here at that time, having made the city a favorite for this purpose. Among the new plays worthy of mention were the following: Bret Harte’s “Two Men of Sandy Bar” was produced for the first time, anywhere, at Hooley’s, on July 17, 1876. The cast contained Theodore Hamilton, Laura Don, Charles R. Thorne, Jt., Stoddart, etc. Runnion’s “Mignon” was produced at McVicker’s on January 29, 1877, with so much success that it had a two weeks’ run. The cast contained Mr. Harris, Mr. Thorne, Mrs. Murdock, etc. Stoner’s “Maud Muller” was brought out at McVicker’s on February 26, 1877, and had a week’s run. The cast contained Miss Rogers, Alf. Johnson, Mr. Ley, Seymour, Rainford, etc. Dion Boucicault’s “Lemons” was produced at the same house March 10. W. S. Gilbert’s “Sweethearts” and “Tom Cole” were brought out in May, 1877. On August 9, 1877, Sardou’s “Seraphine” was produced at McVicker’s for the first time in America, the occasion being the twenty-first annual opening of the house. The cast contained Theo. Hamilton, Harvey Pearson, Joseph Whedock, W. H. Powers, Mrs. Clara Stoneall, Miss Missa Tanner, etc. At the same house Bartley Campbell’s “Risks” was produced by Raymond, on October 15, 1877. In November of this year there was a season of old comedy at McVicker’s.

Bronson Howard’s “Lillian” was produced on November 25, 1877; Daulet’s “Sidonie” on December 10; Fred Clarke’s “A True Woman,” on January 7, 1878. Will D. Eaton’s farce-comedy, “All the Rage” was produced on January 22, 1878, the cast containing John Dillon, Roland Reed, Mr. McVicker, Mr. Pearson, etc. Late in 1877, Hooley’s began to be more prominent than previously in the line of the legitimate, but comparatively few new plays were produced there.

In all this period the regular stars made their annual appearances,—Booth, Barrett, McCullough, Jefferson, Raymond, Maggie Mitchell, and, later, Modjeska, etc. In February, 1878, Sardou’s “Rage” was simultaneously produced at McVicker’s and at Hooley’s. In 1879, Edwin Booth, while playing Richard III, at McVicker’s, had two pistol shots fired at him by Mark Gray, who sat in the front row of the balcony; Gray was sent to the insane asylum at Elgin. In 1882, Rev. George C. Miln resigned the pastorate of Unity Church (where he had succeeded Robert Collyer), and made his debut in Hamlet, at the Grand Opera House, on October 16. On July 30, 1883, “A Mountain Pink” was originally produced at the Grand Opera House, Louise Sylvester in the title rôle. On February 19, 1884, Mr. McVicker read before the Historical Society a paper upon “Early Theatricals in Chicago.” In April of the same year the Chicago branch of the Theatrical Mechanics’ Association was organized.

The most important dramatic event of recent dramatic history of the city was the Irving engagement at the Columbia theater, in 1884. Personally, Irving was well calèd to elicit the best in Hooley’s dramatic talent, it was summed by his own hand; his elocation, defying tragedy and the poetic unities alike; his stilled walk—all these furnished an assortment of “redeeming vices,” worth almost as much to a public man as an equal number of merits. Socially, his genial nature made him hosts of friends. The great value of his engagement, however, is to be found in his having brought with him a completely appointed and thoroughly trained company, together with the most artistic and complete apparatus of scenic, costumes and stage material ever exhibited in an American city. The refinement of detail in the Irving representations had the effect of raising the standard of public taste in this respect, so that all American companies have found it advisable ever since to maintain a grade of excellence previously unknown.

In concluding this comprehensive survey of the drama in Chicago during recent years, the good reputation of our city requires it to be borne in mind that the most unfavorable symptoms above remarked are for the most part those of the entire dramatic situation in general, and not those of Chicago exclusively. No doubt progress has been made here more easily than in some quarters, on account of the greater freedom of a new society. In the main, however, the wheat has thriven quite as well as the tares, for in no other city is the legitimate drama more liberally and enthusiastically patronized. The multiplication of first-class theaters within recent years is perhaps as good an evidence of this fact as any that could be mentioned.

RE-BUILDING OF THEATRES.—The re-opening of the dramatic activities of the city was thus recounted in the Tribune of October 9, 1872:

“T he Drama was the first to recover itself from the effects of the fire. Colonel Wood, of the old Museum on Randolph Street, secured the Globe Theater on Desplains Street, an old wooden shell which had run through various vicissitudes of fortune and had succeeded in speedily wrecking every manager who took hold of it, Mr. Aiken, formerly of the Museum Company, being the last who went under. Colonel Wood, after announcing a grand renovation, which was only a pretense of a renovation on paper, got the larger number of his old Museum Company together, and opened the Globe on the 21st of October, only thirteen days after the fire, with the plays of "Wom at Last," and "Who’s Who?" the latter of which asked a very significant question of those days when it was exceedingly difficult for any one to tell who or what he was. The Globe, how-
ever, did not make a very brilliant start, and only began to be successful with the production of "Divorce," which had a handsome run. From that time to the present its record is familiar. Its prominence is due to its melodramatic medley of entertainments, made up of sensational drama of the most sanguine description; the con-

ventional Irish dramas, with stars of the third and fourth magni-

tude; a crippled season of German opera, which eventuated in a most dismal fiasco; Sunday night concerts, which were failures; the spectacular dramas, with their minstrel shows of the eminently atrocious Amazons from Archer, Milwaukee and Blue Island avenues; minstrel shows of a poor order, etc. It has presented nothing from the night it was opened, until the present, worthy of patronage.

It is fortunate that the Globe has not had the monopoly of dramatic amusements. Other and stronger competitors entered the attractions, and have finally reduced it to about the same condition into which it had fallen before the fire, and he will be a risky if not fool-

hardy manager who in the future invests his money in the Globe.

On the 1st of November that admirable actress, Miss Jane Coombs, with her travelling troupe, leased Standard Hall on Michigan Avenue. In 1871, she went to Chicago and produced a series of standard plays, with very decided pecuniary sacrifice. The cramped-up stage, and absence of the necessary material for scenic and stage effects, affiliated against success and combined to render the season a failure. This, how-

ever, did not prevent the Windham's from attempting a season in it. Excellent as their reputation was, they fared little better than Miss Coombs, and were glad to retire before their pockets were en-

 tirely emptied.

Several minor troups of the strolling kind, who were always ready to take a risk of any description, engaged the hall at various times with regular disaster results to their creditors; and Standard Hall was finally abandoned as a bad egg.

On the 25th of November, Central Hall, on the corner of Washoe Avenue and Twenty-second Street, was finished, and the minstrel troupe at once seized upon it as a favorable locality. Central Hall, however, did not prove any more successful than Standard's. It is the only entertainment which has paid, and it being two concerts given by Ole Bull (which, of course, were farewell concerts) on the 6th and 7th of March.

The only successful attempt at the minstrel business was made by the favoritite troupe of the Dearborn Theater, which, under the management of Samuel Myers, formerly associated with Mr. McVicker, opened at Rive and Jackson's Hall, on West Randolph Street, which was ambitiously styled the West Side Opera House. This troupe succeeded in getting through the season, closing on July 8, and is now at home in its own handsomc and cozy theater, or opera-house, on Monroe Street, immediately in the rear of McVicker's Theater.

Meanwhile a new manager appeared upon the field,—Mr. Gardner,—and with remarkable enterprise erected a substantial, if not very elegant, brick theater on Halsted Street near Madison, in thirty days, and put it to the public on Good Friday, Sunday, January 15, notwithstanding the predictions of the wiseacres that a brick building put up in thirty days and in cold weather, would not and could not hold together. The company was composed as follows:

Messrs. Sisson, proprietors of the Academy of Music, were born on January 11, 1838, at Gettysburg, Penn., on Cemetery Hill, on the exact ground where that great battle of the Civil War was fought. When Dan'l was less than a year old the family settled at Dayton, O., where Daniel Shelby, Sr., opened the first shoe store in that city, and what was a great novelty, put a carpet in it. After his father died, Dan'l worked on a farm for $2 a month, to help sup-

port his sisters and brothers, being then ten years of age. When Mr. Shelby was fourteen years of age he was a local favorite as a balladist. Sam Wells' minstrels came along one day, and Dan'l ap-

peared behind the footlights for the first time. He was engaged by that company, and left with them the next day. When they soon afterward opened at the old Melodeon Hall, Fourth and Walnut streets, Cincinnati, Dan'l Shelby sang after the first part and sold photographs in the audience afterward, a novelty which ranks as

*Opened September 23, the building having been commenced on June 20.

It is now a private hotel.

"first on record." In 1854, he travelled as concert singer, with Stickney & Driesbach's circus, and later in the year sang with the Campbell Minstrels in this city. In Market Street, Until the War, Mr. Shelby continued as a singer with circuses, con-

certs and minstrels, and gained also a reputation as circus clown and tumbler. Mr. Shelby appeared at the Chinese Assembly rooms and the New York Hippodrome in 1862 as comic, after being clown with Yankee Robinson in the summer. He also played in the old Theater Comique, N. Y., he went out again, in 1864, along with Yankee Robinson. The following winter, T. Brigham Bishop built a frame theater at Chattanooga, and engaged a dramatic and minstrel company to amuse the soldiers. In this organi-

zation Dan'l Shelby sang, acted, and managed. The company continued at Chattanooga and Knoxville until the assassi-

nation of President Lincoln. When Sherman began his march to the sea, Mr. Shelby came North and started a negro band, Shelby's Minstrels, lost $2,000 in a very short time. After the minstrel venture he came to Chicago and was comedian at Chad-
wick's Dearborn Street Theater, remaining until the spring of 1867. That summer he started out from Fond du Lac with Magliney & Carroll's circus as clown, closing at Bolivar, Tenn. In the winter he was engaged by Col. Geo. to manage the Athenaeum, at Colum-

bus, O., returning to this city in 1868. J. H. Harvery was then managing Col. Wagner's minstrels, and at his suggestion Mr. Shelby was called to take charge of a small circus, then travelling around western fairs. He re-organized the show without a cent, and finished the season, clearing several thousand dollars. In May, 1871, and opened in New York a temporary engagement, managing it with success for two years. He then took the Arcade, christened it the Adelphi, had several companies on the road, and made a fortune. He afterward went to New York intent upon the management of a New York Theater, but it was not until 1874 that he offered Poole & Donnelly $25,000 for the lease of the Grand Opera House, but they would not accept. He then started Shelby, Pullman & Hamilton's circus from Belleville, Canada, in 1881, and made money. He ascertained that the Academy of Music, Chicago, could be leased, came here, and leased the theater. The house has steadily advanced toward perfection in the presentation of the legit-

imate drama. He opened it with the lamented F. S. Chanfrau in "Kit." Dan'l Shelby was married, on March 23, 1882, to Miss Nellie Hatfield Pennock, of Altoona, Penn. He has one son, Dan'l. Mr. Shelby is a member of W. B. Warren Lodge, No. 209, A. F. & A.M., and of the York Chapter No. 1, T.L.; of Oriental Consistory, S.P.R.S., 32; and of Medinah Temple, Nobles of the Mystic Shrine. He also belongs to Buffalo Lodge, No. 9, A.O.U.W., and to New York Lodge, No. 1, B.P.O.E.

Aiken's Theater.—The second down-town theater put in commission was Aiken's, occupying the northwest corner of Wabash Avenue and Congress Street. Its dimensions were the following: Outside area, 80 x 130 feet; interior, 78 x 115 feet; height, 49 feet; auditorium, 65 x 80 feet; height of auditorium by foot - stage opening, 34 x 40; size of stage, 45 x 80 feet; par-

quette, 34 x 50 feet. It cost $80,000, the money being furnished by George White and Frederick Clark. It was opened by the Theodore Thomas orchestra almost upon the anniversary of the great fire, viz. on October 7, 1872. The Thomas concerts were followed by Rubinstein, the pianist, Aimée in French opera, Lawrence Barrett, etc. The stock company of Aiken's theater was composed as follows:

Frank E. Aiken, Frank Lawlor, Milton Nobles, F. R. Pierce, George Reed, C. C. Crocker, C. S. Rogers, H. H. Howland, A. M. Clark, J. Cline, Fred Fenton, J. F. Dean, James Taylor, S. Rothwell, C. T. Pembroke, F. Heartwell, H. Sisson, Miss Ann Lanegar, Miss Emma Maddern, Miss Ada Gilman, Mrs. Clara Macier, Mrs. Charles Hall, Miss Mollie Maeder, Miss F. Pierce, Miss Lizzie Queen, Miss Bella Remick, Miss Julia Nor-

wood, Miss Clara Taylor, Miss Mary Rosine, Miss Susie Clark, Miss Mary Harris, Miss Ada Foster, Miss Emma Roberts.

The dramatic season at Aiken's was a failure, and for some months it was closed. Its location and ample size made it, however, attractive to visitors, and the attention of a speculative manager, Leonard Grover, who leased the house, and converted it into a variety theater, under the name of "The Adelphi." It was re-opened on February 3, 1874, and was totally destroyed in the second great fire, July

14, 1874, and never afterward re-built.
McVicker's.—McVicker's was the first theater rebuilt upon the old site. The opening took place the 9th of August, 1872, and was thus described in the Tribune of August 10:

"The opening of McVicker's Theater last evening was an event in the re-building of the city to be marked with a white stone. It was the dedication to its proper uses of the first public building erected within the limits devastated by the great conflagration. The doors were opened at half past seven o'clock, but long before that hour the vestibule and side-walks were filled with an excited multitude. This was Jerrold's five-act comedy, 'Time Works Wonders,' which had been mounted with a care in regard to detail befitting the occasion, and was played with great fidelity and reference to stage proprieties. The spectators were not there to be captious and hypercritical. They came to see that an era in the history of Chicago was properly observed, and to compliment the gentleman to whom honor was due for this triumph in the way of restoration.

In 1889, the theater was entirely re-modeled and re-decorated, and was thereby made one of the handsomest theaters in the city.

Hooley's Theater.—The second down-town house to be opened upon the old site was Hooley's, the date being October 17, 1872. Its dimensions were as follows: Area of lot, 122 x 65 feet; area of auditorium, 65 x 65 feet; height of auditorium, 65 feet; area of stage, 20 x 20 feet; stage opening, 30 x 34 feet; width of proscenium, 25 feet. The Chicago Tribune of October 22, 1872, contained the following memorial of the occasion:

"On the night of the great fire, Richard M. Hooley was at the Briggs House in this city, with his wife, and all his personal paraphernalia, including costly jewels and valuable wardrobes, expecting to take the morning train for New York. He intended to retire from the profession of which he had long been an honored member, to enjoy a handsome competency which a life of labor and energy had enabled him to accumulate. Much of his fortune was invested in this city. The fire came, and swept away the earnings of thousands, his was not broken, and with gallant courage he went to work to repair the ravages of the fire. How well he succeeded was apparent last evening to those who visited his beautiful theater on the occasion of its opening. It was brilliant in every respect. The audience was composed of our best citizens. They went to honor and encourage the man who had faith in them and their city. There was not standing room. The building was cool and comfortable, elegant, even luxurious in its appointments. Handsome gasoliers illuminated the scene. Elegantly attired women and correspondingly arrayed men awaited the rising of the curtain. We have not space to-day to enter into an elaborate criticism of the performance. The Abbé Kiraly's troupe had possession of the stage. Pantomime was the programme. It was fairly represented. There was the usual gestures and tumbling and knocking down—perhaps too much of the latter exercise, and brilliant dancing and more than average singing, and everything decent and in order. The Jee Brothers played upon their peculiar piano of story formation with really wonderful effect. Mademoiselles Elise and Marie Gratz gave their Tyrolean eccentricities in song to the gratification of the audience, and, later in the programme, a cat duet,

Randolph Street, East from La Salle.
In 1885, the theater underwent a complete renovation, in order to keep pace with the popular demand for aesthetic ornament and stained-glass accessories.

The New Adelphi (afterward Haverly’s Theater).—Instead of re-building the Adelphi upon Aiken’s old site, manager Grover and others succeeded in obtaining a lease of the old Post-Office Building, upon the northwest corner of Dearborn and Monroe streets, where the First National Bank now is. The walls, originally very strong, were still standing and it was found possible to utilize them with very little repairing. Within this space was constructed the largest theater until then erected in Chicago. Besides the usual balcony, and gallery, a still higher gallery, holding nearly five hundred people, was suspended from the roof, heavily trussed for the purpose. The two uppermost galleries were capable of holding more than one thousand five hundred people, or nearly the capacity of Central Music Hall. From these extensive regions there were only two exits, by crooked staircases scarcely more than five feet wide. It will be difficult for posterity to believe that their forefathers, and especially their fore-mothers, of Chicago, in the years 1879–86, crowded these dangerous fire-traps over and over again. The New Adelphi was opened on January 11, 1875.

The original construction of the New Adelphi was rather shabby, the lease being but for a short term, and the productiveness of such a property not as yet being well understood.

In July and August, 1878, Mr. Haverly entirely re-constructed and re-decorated his theater, the re-opening taking place August 4, 1878, described at the time as follows:

“Haverly has at last succeeded in making his once dingy theater unrecognizable. The outside walls have been thoroughly baptized, until they look as good as new, and the windows are refitted with heavy plate glass. Inside, the regeneration is even more noticeable. There is a new drop curtain, with wholly new scenery and drapings to match. The proscenium-arch and the front of the circles are finished in white and gilt, and the dome, walls and ceilings under the tiers are tastily frosted, the predominant tints being blue and gold. The folding seats are newly upholstered and new Brussels carpets adorn the aisles. The total cost of the improvements has not been less than $5,500. The house opens to-morrow evening with the Cowile Folly Company in the “Habits in the Wood.”

It was in this house that the first seasons of Italian opera, under the management of Colonel J. H. Maple-son, were given in Chicago, in January, 1879, 1880 and 1881. In 1882 the lease fell in, and the property was leased by the First National Bank, which took down the old building, and erected the present one in its place.

The Columbia Theater.—In 1882, when J. H. Haverly’s lease to the ground on which the old Adelphi Theater stood, expired, he secured the financial co-operation of John B. Carson, then of Quincy, Ill., but now of Chicago, to construct a new theater building. The site selected for the new structure was on a lot just west of Dearborn Street on Monroe Street, facing north. The design of the new theater was made and carried out on a most elaborate plan, and it is notable that the building was constructed and opened to the public within eighty-eight days after the ground was broken, James D. Carson having control of the building operations. The building is seventy feet wide and has a depth of one hundred and ninety feet. It is six stories in height and is surmounted by a pyramidal tower. The first-story front is constructed of iron, and the upper portion is built of finely polished white Lemont stone in a composition of the French Renaissance and Queen Anne style, and the whole presents an ornamental, yet substantial and imposing, appearance. The total seating capacity of the entire house is two thousand. The stage is seventy by fifty-four feet and is provided with every appliance to make it complete, having large and well appointed dressing-rooms on the main floor for the use of the "stars," while others equally convenient and well arranged are provided for the support of the companies playing.

The theater was opened by Mr. Haverly on September 12, 1881, Robson and Crane appearing in Shakespeare’s Twelfth Night. He continued as proprietor until June, 1883, when financial reverses caused him to re-lease the property to Charles H. McPeck, who became the proprietor at that time. During the summer following he made such alterations and additions as gave that theater a world-wide reputation. The changes were made in the front of the building and in the lighting and ventilating facilities. But the chief attraction now is the art galleries, which were added to the theater in the summer of 1884. The two stores, which formerly occupied the space on each side of the grand entrance, were entirely transformed, and the foyer was re-arranged. The ceilings and walls of these apartments are a mass of golden Lincrusta-Walton, and the whole is made resplendent by blazing incandescent lights. The foyer is separated from the auditorium only by portières, and the apartment is decorated in a royal manner. Two marble statues, "Ioo and Bacchus" and "Jephtia’s Daughter," from the chisel of C. B. Ives, of Rome, occupy a conspicuous position, and the walls are hung with high-class paintings of the modern school. The art galleries were Mr. McPeck’s pet project, and they have proved to be a most attractive feature. For a considerable time afternoon receptions and concerts were given by the management semi-monthly, and these were always attended by the fashionable people of the city. The collection embraces some very notable paintings, which are classified under the chapter devoted to a consideration of Art in this volume. A terra-cotta bas-relief of Sarah Bernhardt is shown, and Venetian and ebony figures of male and female Egyptians, and "The Seasons" inlaid in copper, on panel, with ebonized frame, are conspicuous art objects exhibited. The art apartments are further embellished with cabinets, mantels, bronzes, bric-a-brac, Bohemian-glass vases, settees, screens, ebony, gilt and marble pedestals, bronze busts, Egyptian lamps, etc.

On February 2, 1885, a stock company was organized, and Mr. McPeck sold out a large interest in the theater. On February 2, 1885, Mr. McPeck transferred the theater to the Columbia Theater Company, incorporated with a capital stock of $200,000, of which, J. M. Hill is president and manager; J. S. McPeck, treasurer and acting manager; and C. H. McPeck, secretary. The change of name from Haverly’s to the Columbia Theater occurred at the close of the Irving engagement, Miss Ellen Terry, the actress, having had the honor of re-christening it.

J. S. McPeck was born at Detroit, Mich., on July 5, 1853. He was brought up and educated there, and his whole life has been passed chiefly in Detroit, up to the time of his coming to Chicago. After attending the common schools for some time, he
became an apprentice in the job department of the Daily Post, and served to the end of his time—five years—having then become an expert in that line of printing. For the purpose of becoming more thoroughly acquainted with general newspaper work, he entered the composing room of the Post, where he stood at the case for a year. He was then engaged on the editorial staff of the paper, and so occupied, in various departments, for about six years. In 1872, when Mr. H. A. Hamlin became proprietor of Haverly's Theatre, he resigned his position on the Post, and came to this city to assist his brother in the management of his new acquisition. In the spring of 1883, when the Columbia Company was organized, Mr. McConnell became a stockholder, and was elected treasurer and acting manager of the theater. He was also interested, as a part owner, in the Brooklyn Theater up to a short time prior to his death. Mr. McConnell is a young man with all the energy and ambition of the true Westerner, and although his managerial career is brief, he has been highly successful in his administration of affairs at the Columbia, and his future promises well. He was married on April 9, 1875, to Miss Mary A. Domlin, of Detroit. They have one daughter.—Clara Edith.

CHARLES H. MCCONNELL was born at Dublin, Ireland, on October 12, 1841, the eldest son of a family of seven, five sons and two daughters, the children of James K. McConnell, an expert accountant and bookkeeper. The parents, two sons and one daughter, came to America in 1847, residing in New York City, and Charleson, S. C., until 1853, and in New York city, Mich., for a year. Finally, settling down in Detroit, Mich., which remained the family residence for upwards of twenty years. C. H. McConnell became an apprentice in the old Tribune Office in Detroit, under Henry Burns, one of the most reputable men in the West, and a man of much influence in Michigan politics. When Union soldiers were called for, McConnell responded and went to the front in 1862, a private in Co. B, 24th Michigan Volunteer Infantry. He served three years, six months, and twenty-five days, in the service of the Potomac, and received an honorable discharge in Detroit, Mich., on July 8, 1865, retaining, as mementoes, sound health and a handsome diamond, set with a gold pendant, recording the fact that he carried the colors from Gettysburg into the Wilderness. He reeled home from the War at eight o'clock at night, and next morning, at seven o'clock, was working at his trade, for he was reputed the most expert printer on the west side of town in demand. At a general meeting and manumission in 1866, he took charge of the job rooms of the Detroit Post, built up the business, secured show-printing contracts to the limit of the capacity of his house, and made a professional reputation both with printers and showmen that commanded respect and confidence, held trade, and was more valuable than capital. On March 4, 1873, Mr. McConnell came to Chicago and established The National Printing Company. The first offices were at Nos. 110-15 Franklin Street, and the first officers were W. B. Clay, president, and Charles H. McConnell, secretary and treasurer. They then employed fifty men, and the first year's business amounted to about one hundred thousand dollars. Since 1875, when Mr. McConnell began the present business, and the increasing business (the largest and most complete establishment in America) showed that in their most successful year, 1883, they employed seventy-five men and the volume of business was about two hundred thousand dollars. The National Printing Company has suffered greatly from fire, all communicated. On May 30, 1876, the first time they were burned out, the loss was $15,000; on December 30, 1883, $55,000; and on March 30, 1885, $149,000. Only $68,000 insurance was recovered in the last instance, and the loss of $71,000 is a serious blow. The National Printing Company will continue, however. It has so firm a hold upon the patronage of the responsible show-managers of this country, both East and West, that, while C. H. McConnell is at its head, it will carry its trade. J. H. Haverly was one of the first and heaviest patrons. It was because of Mr. Haverly's financial difficulties in 1883, he having invested too heavily in Colorado mines, that C. H. McConnell was compelled, in self-preservation, to take Haverly's in Chicago, the California Theater in San Francisco, and Haverly's Brooklyn Theater. Mr. McConnell sold the California Theater in 1883, to Frederick I. Brown, still retains Haverly's Brooklyn Theater, which is under the acting management of his brother, William A. McConnell, and Haverly's Chicago Theater. The latter was afterward named the Columbia, the name suggested by the celebrated English actor, Henry Irving, while filling an engagement there in 1885. Charles H. McConnell was married, on May 31, 1878, to Miss Clara V., daughter of Edward Chope, a leading manufacturer of Detroit. Mr. and Mrs. McConnell have one daughter, Adele.

THE GRAND OPERA HOUSE, OF CHICAGO, is built upon the original site of Bryan Hall and Hooley's Opera House. J. A. Hamlin and brother (L. B. Ham- lin) purchased the property in January, 1872, and erected the first building that was completed upon that block after the fire. In 1873, Hamlin Brothers built upon the rear lot what was subsequently known as Foley's Billiard Hall, which was at that time the largest billiard hall in the world, containing thirty tables on one floor. In 1874, the billiard hall property passed out of the hands of Mr. Foley into the hands of Hamlin Bros., 1875, the billiard business was discontinued after a few months and the hall re-constructed, with an additional building added to the east end, and for some two years was occupied as a garden, after the style of Gilmore's Garden of New York, with fountains, waterfalls, vocal and instrumental music, and all kinds of refreshments. Subsequently the garden, by degrees, was changed to a vaudeville theater, and was continued as such until 1878, when it was again re-constructed as a regular theater, and opened in September, 1878, under the name of "Prince's" Theater. About that time the property passed out of the hands of Hamlin Bros: into those of William C. Reynolds, who sold it to John Borden in 1880. John Borden shortly afterward sold the property to his son, William Borden, who re-constructed the theater at an additional expense of about $55,000, and it was opened in September, 1880, under the name of the Grand Opera House, and under the management of John A. Hamlin. The lot upon which the Grand Opera House buildings are erected contains about thirteen thousand two hundred and ninety feet of street front.

The history of the location as a place of amusement, commencing with the original Bryan Hall, away back in the fifties, and running through all its various changes, is one of almost continuous success, the original Bryan Hall being for many years one of the most popular amusement resorts in the city. The Grand Opera House was opened with Hoey & Hardy's Company, in an adaptation of the play "A Child of the State," followed by Tom Keene, in a Shakespearian repertory, Nat. Goodwin, Emma Albott Opera Company, Boston Ideal Opera Company, etc., etc.

C. D. Hess was born at Cohocton, Steuben Co., N. Y., on January 21, 1858, and spent his early boyhood days at Dansville, N. Y. At the age of thirteen he had a remarkable soprano voice, and was engaged by Green G. Germon, the original Uncle Tom, and Ge- neral Grant's managing Comedian, and while he and Albertine were the stars, in February, of that year (1872), the manager and the stars left the company without warning. C. D. Hess had begun to sing at a very early age, and was, as an artist, well known in the larger towns, and, skill and peniless among strangers, was for the first time in his life "stranded." He returned home, and then engaged with Thomas Carr, proprietor of the Metropolitan Theater, New York. There Alice Grey was living, and he and Miss Grey made the list on the bill. Cockfield was playing the Willow Copse that night, Miss Davenport and Julia Dean were in the boxes, and the house was full. His entrance was greeted with applause. That night, in attempting to take a high note which had always been a delight to him, he felt a sudden pain in his throat, his voice cracked and he grew hoarse. This was his last engagement as a singer. His sickness of the previous winter, and singing before he had fully recovered, roused his voice. About Christmas time he got an engagement with Marsh & Ellisor, joining the company at Rochester, going afterward to Utica to the old Museum. There C. D. Hess and his first taste of fame, singing, were also given. The Pennsylvania, in Sommabuck, under the baton of Signor Arditi, and with Madame Devries for prima donna. That event shaped the future tendencies of his life. Soon after the dramatic company went to Watertown, N. Y., for a protracted engagement, which was unfortunately brought to a sudden close by the desertion of Manager Marsh, leaving the whole indebtedness and responsibility upon the shoulders of John A. Ellisor. While he was bravely facing every difficulty that came and encouraging a letter-writing box, the Metropolitan Theater, Cleveland, offering C. D. Hess the management of the house. He accepted accepting, provided his entire company, who had kept by the shut door, were also engaged. The company agreed to, to get there was the next Napoleon move. Mr. Hess was sent away by a friendly landlord, and he had in his keeping the checks for five trunks, which represented Mr. Ellisor's worldly and the costumes of the company. Mr. Hess was in those days very far West. China would have been just as

MUSIC AND THE DRAMA. 667
near and as welcome to Mr. Hess, now advance agent and property man and prospective juvenile actor in a city theater. His friendship for Ellsler was only equalled by his love for his profession, and the whole of his wealth was spent in supporting Ellsler in his attempts to reach the heights of the Metropolitans. While living in Cleveland, Mr. Hess was not without his share of the mental and physical distresses of the period.

February, 1857, he married a woman of his own social standing, who had long been his devoted admirer. It was an arranged marriage, and the couple settled down in a comfortable home in Baltimore, where Mr. Hess continued to support his wife and children. However, the young couple soon began to feel the financial strain of supporting their growing family. The winters were particularly hard, with snow falling in November and lasting well into March. The family had to struggle to keep the house warm and well supplied with food. Despite these difficulties, Mr. Hess remained determined to provide for his family and to support his wife's budding career in opera.

In October of 1857, Mr. Hess decided to return to New York and fully engage in theater management. He took over the management of the Pinafore theater, a small building located in the heart of the city. The theater was run by a group of investors, and Mr. Hess was hired to manage it. He immediately went to work, and within a few months had turned the theater into a popular and profitable venue. The theater was known for its high-quality productions and its dedication to supporting local talent.

Mr. Hess's management style was characterized by his personal touch and his ability to connect with the audience. He was known for his attention to detail, and he took a hands-on approach to managing the theater. He was always willing to lend a helping hand to the performers, and he worked tirelessly to ensure that every aspect of the theater was running smoothly.

In 1858, Mr. Hess entered into a partnership with John A. Hamlin, a respected theater manager. The partnership proved to be a success, and they were able to expand the theater's repertoire and attract a larger audience. Mr. Hess's management style continued to be a key factor in the theater's success, and he was known for his ability to keep the audience engaged and entertained.

In 1859, Mr. Hess and Mr. Hamlin took over the management of the Ford's Opera House, a large and prestigious venue. The theater was known for its high-quality productions and its dedication to supporting local talent. Mr. Hess was able to keep the theater running smoothly, and he was known for his personal touch and his ability to connect with the audience.

In 1860, Mr. Hess took over the management of the Opera House, a large and prestigious venue. The theater was known for its high-quality productions and its dedication to supporting local talent. Mr. Hess was able to keep the theater running smoothly, and he was known for his personal touch and his ability to connect with the audience.

In 1861, Mr. Hess entered into a partnership with John A. Hamlin, a respected theater manager. The partnership proved to be a success, and they were able to expand the theater's repertoire and attract a larger audience. Mr. Hess's management style continued to be a key factor in the theater's success, and he was known for his ability to keep the audience engaged and entertained.

In 1862, Mr. Hess took over the management of the Opera House, a large and prestigious venue. The theater was known for its high-quality productions and its dedication to supporting local talent. Mr. Hess was able to keep the theater running smoothly, and he was known for his personal touch and his ability to connect with the audience.

In 1863, Mr. Hess entered into a partnership with John A. Hamlin, a respected theater manager. The partnership proved to be a success, and they were able to expand the theater's repertoire and attract a larger audience. Mr. Hess's management style continued to be a key factor in the theater's success, and he was known for his ability to keep the audience engaged and entertained.

In 1864, Mr. Hess took over the management of the Opera House, a large and prestigious venue. The theater was known for its high-quality productions and its dedication to supporting local talent. Mr. Hess was able to keep the theater running smoothly, and he was known for his personal touch and his ability to connect with the audience.

In 1865, Mr. Hess entered into a partnership with John A. Hamlin, a respected theater manager. The partnership proved to be a success, and they were able to expand the theater's repertoire and attract a larger audience. Mr. Hess's management style continued to be a key factor in the theater's success, and he was known for his ability to keep the audience engaged and entertained.

In 1866, Mr. Hess took over the management of the Opera House, a large and prestigious venue. The theater was known for its high-quality productions and its dedication to supporting local talent. Mr. Hess was able to keep the theater running smoothly, and he was known for his personal touch and his ability to connect with the audience.

In 1867, Mr. Hess entered into a partnership with John A. Hamlin, a respected theater manager. The partnership proved to be a success, and they were able to expand the theater's repertoire and attract a larger audience. Mr. Hess's management style continued to be a key factor in the theater's success, and he was known for his ability to keep the audience engaged and entertained.

In 1868, Mr. Hess took over the management of the Opera House, a large and prestigious venue. The theater was known for its high-quality productions and its dedication to supporting local talent. Mr. Hess was able to keep the theater running smoothly, and he was known for his personal touch and his ability to connect with the audience.

In 1869, Mr. Hess entered into a partnership with John A. Hamlin, a respected theater manager. The partnership proved to be a success, and they were able to expand the theater's repertoire and attract a larger audience. Mr. Hess's management style continued to be a key factor in the theater's success, and he was known for his ability to keep the audience engaged and entertained.

In 1870, Mr. Hess took over the management of the Opera House, a large and prestigious venue. The theater was known for its high-quality productions and its dedication to supporting local talent. Mr. Hess was able to keep the theater running smoothly, and he was known for his personal touch and his ability to connect with the audience.

The Standard Theater—The erection of a first-class theater at a point so remote from the business center of the city as the intersection of Jackson and Mayfield streets is a significant token of the growth of Chicago. This house was erected by C. J. Whitney, of the Detroit Opera House, in the latter part of 1859. The exterior presents a very pretty appearance. The general effect of the interior, as to colors, is peacock-blue, gold and scarlet or cardinal. It embodies several decided novelties in theater construction, as, for instance, the ventilation; in the ceiling are adjustable crevices through which the draft from the stage finds exit, thus removing bad air from all parts of the house, instead of leaving one main current up through the central dome. The Standard was opened on December 31, 1859, by the Fay Templeton troupe in "Girofle-Girofla." During the year and a half of its existence the Standard has done a flourishing business with a great variety of attractions, many of them of superior order. The house is managed by Messrs. Dyer & Wiles.

The Chicago Opera House—The Chicago Opera House Building, the latest addition to the many places of amusement in the city, was opened to the public on August 18, 1883. The building is ten stories in height, built of Anderson pressed brick, and rests upon a massive foundation of stone piers. The structure presents a handsome, solid and substantial appearance. It is one of the largest office-buildings in the city, the side of the building, fronting on Clark Street, and that portion on Washington Street, over the grand entrance to the theater, being wholly devoted to office purposes.

The Opera House proper is built independently of the office-building, occupying the rear half of the ground from Washington Street to the alley, the entire length...
of the building, the grand entrance being on Washington Street. This theater is unique in its construction and notable for the large expenditure of money which has been lavished upon it. The building was begun on the 1st day in May, 1884, and it is said to be by the exception of the Metropolitan Opera House in New York, the only absolutely fire-proof theater in this country. There is nothing in the auditorium of a combustible nature but the wooden floor and the cushions of the seats. The lighting throughout is by electricity. In addition to the precautions against fire, the auditorium has been provided with fourteen exits,—two from the basement, three from the main floor, three from the stage, four from the balcony (leading into the fire-proof corridors of the office building), and three similar ones from the gallery, all leading to Washington and Clark streets. The decoration of the theater is as striking in its originality as the house is in its construction. In the center of the roof of the auditorium is a scheme in stained glass twenty-four feet square, behind which are two hundred incandescent lamps. The draperies of the auditorium are rich in color, but are in perfect harmony with the general scheme of decoration. The side walls are in dark red and gold, and the two broad staircases leading from the entrance of the main auditorium to the balcony are treated in metallic tones of green and old bronze. The space over the proscenium arch contains a beautiful representation of Apollo and the muses. The bas-relief is forty-two feet long, made of plaster, and there are some fifteen figures in all. The principal one is ten feet high, and the whole presents a life-like effect on the main floor of the theater. The stage is adapted for any line of entertainment and is fitted up with every modern appliance known to the stage mechanist of to-day. One thousand incandescent lights are used in the entire theater, and the light, heat and ventilation are the very best. The theater seats two thousand three hundred people comfortably. The theater was opened on August 18, 1885, under the management of John W. Norton & Co., who secured a lease for ten years. Since the inauguration of the Chicago Opera House it has presented the very finest attractions that could be obtained in America.

JOHN WALTER NORTON, senior partner of the firm of John W. Norton & Co., is the manager of the Grand Opera House and Olympic Theater, St. Louis, &c., is one of the youngest and most successful theatrical managers in America to-day. Mr. Norton was born at New York, in 1847. He is a native of the theater in early life. For many years he was identified with leading eastern companies, and for a considerable time was connected with the New York and Brooklyn theaters, the Boston theaters, and was also connected with the New Orleans, Pittsburgh and Cleveland theaters, and for several seasons was leading support to Barrett. In 1874, Mr. Norton was secured by Ben De Bar as actor manager and "stock star" for his theaters in New Orleans and St. Louis, in which cities Mr. Norton acted as principal support to almost all the prominent actors of the time, besides playing very successful star engagements himself. For some time he was starring in "Romeo and Juliet" and "Juliet" with excellent success, and was "Macbeth," "King Lear," and "Ingomar," and as "D'Artagnan" in "The Three Guardsmen," and as Lagardere in the "Duke's Mote," etc., etc. Upon the death of Mr. DeBar in 1877, Mr. Norton became sole manager of the Grand Opera House at St. Louis, and, a year or two later, the business interests of this house were consolidated with the Olympic Theater, and Mr. Norton became manager and proprietor of both. As an actor, in what is termed "leading business," Mr. Norton excels at the head of his profession. He is a manly, vigorous, free from affection, and he is a conscientious and deep student. As an instance of his rare versatility, his Volage, in Selby's play, the "Marble Heart"—a dashing, "light comedy" character,—is natural and popular. He is a life, bubbling with gaiety, tender in its sentiments; while as "Macbeth" or "Ingomar," he is far superior to any exponent of those characters upon the American stage to-day. No biography of Mary Anderson is complete, nor correct, that does not contain copious references to Mr. Norton, since he was the first to "star" her through this country. By his energy and business methods Mr. Norton did not seem to gain for Miss Anderson her renown; by his advice and patient instruction he did everything that needed but the awakening. It was through him and under his management that Miss Anderson played her first regular engagement in St. Louis, and New Orleans. When the Chicago Opera House was projected, Mr. Norton was among the first to foresee the possibilities of great success in owning this latest acquisition to Chicago's temples of art, and he at once secured the proprietorship of the same, and installed his director, Mr. Henderson, therein, who has carefully and successfully executed the plans of his chief. The Chicago Opera House is among the most successful theaters in the United States, and its management has been mainly achieved through the liberal policy of its principal proprietor in February, 1877, in the city of New Orleans, Mr. Norton was married to Miss Emma Stockman, of Baltimore. Mr. Norton has traveled extensively in America and Europe, and is a man of keen perception and broad study. One of the most popular men in the profession and well liked by all acquaintances, he is deserving of the highest encomiums of praise.

DAVID HENDERSON, director of the Chicago Opera House, was born at Edinburg, Scotland, on April 25, 1856. He was reared and educated in his native city and began his career as a journalist on the Edinburgh Evening Courant, the oldest Conservative paper in Scotland. After going through the usual steps in a repertorial career, he became a writer upon theatrical affairs for the press, and contributed to London and Scottish papers until he came to this country in 1869. Since coming to America, Mr. Henderson has been associated with New York, San Francisco and Chicago newspapers, and during the greater part of that time has been chiefly identified with dramatic affairs, although he has gone to Europe in the capacity of newspaper correspondent two different times. He held the position of editorial writer for the New York Tribune for a considerable time, and left the paper to found the Chicago Herald, with Messrs. W. D. Eaton, Naslon Thompson, John F. Ballantyne and J. W. Scott. He was dramatic editor, editorial writer, and for some time managing editor, of the Herald, and did much toward winning for that journal its high reputation as a newspaper. He resigned his post at managing editor to accept the managing editor's chair of the evening edition of the Chicago Daily News, which he held for about two years. When the project for building the new Chicago Opera House was launched, he took a hearty interest in the scheme, and the ultimate outcome was that he joined the managing committee or the Daily News and took charge of and become a partner in the Chicago Opera House. Since the notable opening of this beautiful theater, Mr. Henderson has directed its destinies with unusual success. He is a young man, very energetic and ambitious, extremely popular with the profession and greatly respected by his scores of friends and acquaintances.

HAVERLY'S MINSTREL THEATER.—In the summer of 1885, J. H. Haverly secured a lease of the building which for many years previously had been occupied by the Hershey Music Hall, an old and favorite resort for the musical people, and in which many notable concerts have been given. Mr. Haverly announced his intention of reconstructing this house for use as a minstrel theater and has transformed it into one of the most beautiful halls in the West. The hall was re-arranged; a large, wide stage erected in the west end; a handsome gallery was placed over the main floor; and two little pagoda-like boxes were suspended on either side those of the main floor. The house was brightly decorated, with plenty of plush trimmings, burnished copper railings, comfortable, handsomely upholstered opera chairs. It was on the evening of September 7, 1885, that Haverly's Minstrel Hall greeted a packed house. The theater is cozy and compact, a resort which is a great favorite to the Chicago play-goers. In January, 1886, Colonel Haverly sold his interest to Mr. Goldthwaite, who changed its name to the "MADISON STREET THEATER."
HISTORY OF CHICAGO.

JOHN H. HAVERY, who is the most marked character in the theatrical profession of Chicago to-day was born at Beloit, Wisconsin. During his boyhood he attended the schools of his native town, and after completing the education which the primitive schools of the country afforded, he entered into railroad building, being connected with various roads and in different capacities, until he finally branched out as one of the most noted managers of the city of Toledo, Ohio. His first ventures were in a small way, but he rapidly advanced, confining his attention almost exclusively to minstrelsy until he took a lease of the Adelphi Theater, in this city, in 1876. Mr. Havery's tastes from boyhood have always been in the direction of theatrical amusements, and he has always endeavored to place before the public minstrels, which he feels are the most important of all theatrical efforts. No great the difficulties presented. It would be impossible to detail the steps by which Mr. Havery has risen to his present position as a great manager, nor to honorably prophesy the reasonable possibilities of his future. When he took the Adelphi, in 1876, and rechristened it Havery's Theater, his fame was approaching its zenith, and as a consequence the public flocked to the doors of the successful and popular manager. As the years rolled by, his various enterprises began to number rapidly, and at one time he was operating a dozen or more enterprises, and had also branched out into the mining business. John H. Havery guided well the immense interests he had acquired, and personally planned and directed the execution of details in his multiform enterprises; but, alas, when he became involved and lost his beautiful theater here, also in New York, Brooklyn, Philadelphia, San Francisco, besides retiring and purchasing other enterprises. He was a born manager as well as to himself personally, for they had a warm affection for the hard-working, ambitious and untrining Havery. Feeling with a sanguine heart and resolution, he and his son entered to roll in minstrelsy, and at present has appearing in the highest regard and esteem of the amusements-loving public. In hand in hand in their various enterprises, always sure of the patronage of the public, the success of the same is well based on their splendid efforts in the past. Mr. Davis is of the most popular managers of the West. His position on the world's stage is every day more prominent, the famous operatic singer. He was born in the state of New York, the leading cities and enjoy the respect and admiration of their thousands of acquaintances.

C. E. Goldsmith was one of the youngest as well as one of the most recent acquisitions to the managerial forces of theatrical amusements in this city. Mr. Goldsmith was born at Marion, Indiana, on April 1, 1854, and was educated at Greenfield (Ind.) College, and having completed his studies he engaged in mercantile life, and, in 1881, came to this city as a buyer for a large house. In that year he began his management, and, during the season of 1883, they secured the Haverly's Hall. This they re-constructed in every way, making it one of the finest theaters in Chicago. It was opened as "Havery's Minstrel Theater," and was designed especially for playing only minstrel attractions. On January 6, 1886, Mr. Goldsmith purchased Mr. Havery's interest in the house, and assumed the sole proprietorship and management of the theater, now known as the "Madison Street Theater." Mr. Goldsmith changed the style of entertainment, introducing comic opera and comedy attractions, in addition to minstrelsy, and the popularity of the little theater proves that his judgment in the matter was the best.

Anthony (familiarly known as "Tony") Denier is one of the oldest living representatives of the pantomimic art in America, and has been connected with the stage in an active and managerial capacity for nearly half a century. Mr. Denier is a resident of Chicago, has lived in this city since 1876, and, aside from his profession, is known in the community as one of the few representatives of the stage who have devoted the results of theatrical enterprise to the substantial wealth and growth of the city. Endowed with a reputation that is National in his peculiar line, he also enjoys the distinction of being one of the wealthiest retired theater men in the West. His and the varied career of his life, and the fact that he has always been a loyal and useful citizen, make him a noted person of interest. The man possesses many points of general interest. Mr. Denier is a native of Brooklyn, N. Y., and was born in that city in December 1799, being of French-English parentage. His father was a native of France and was a lawyer by profession. Mr. Denier is a native of England. The son received his early education at the Washington street public school, Brooklyn, and at the age of thirteen, entered a circus. He accompanied the show to Philadelphia, and after travelling with numerous circuses of his class, at last became a member of the noted Red troupe of pantomimists, mimics and acrobats. With them, for a period of five years, he traveled extensively, mastering the difficult details of the art with comparative ease, having shown the greatest adaptability for the same. In 1835 he went to England, and for two years played at European theaters. Returning to America, in 1837, he opened in a small way in the "Grotto" City, and later at the New Bowery Theater. At the Old Bowery
Theater he met the veteran clown, George Fox, and got up several pantomimes with him. He then went to Barnum's Museum, and, in 1866, removed to St. Louis, where he remained for a year, engaged in managing the spectacular play of the "Black Crook." He made his first appearance in Chicago, at McVicker's Theater, in 1867, and his second, in 1868, at Crosby's Opera House. Returning to New York, he and Mr. Fox constructed the great novelty of "Humpty Dumpty," which was first presented at the Olympic Theater on March 10, 1869. This play had a year's successful run, and, in July, Mr. Denier went to Cleveland, and with John Eilshier organized a pantomime company, with which he travelled two years. He managed various enterprises until 1876, took "Grimaldi" on the road for two years, and, later, Charles Ravel, the clown. During these years he played not only in his own specialties of pantomime, but also took part in "Uncle Tom's Cabin," "The Octoroon," "Rob Roy," and as the devil and other characters in spectacular and comic representations. After organizing a company for "Jack and Jill," in California, in 1876, Mr. Denier came to Chicago, and began a permanent managerial career, practically abandoning the stage proper. Here he formed a partnership with Colonel J. H. Haverly, and was manager of the old Adelphi Theater for one year. He then leased Wood's Museum, which was destroyed by fire in October, 1877. He purchased a residence at Englewood, but, in 1878, returned to Chicago, and for three years operated a pantomime combination with George Adams, the clown. When this engagement terminated, Mr. Denier decided to take up a permanent residence here, and, having accumulated a fortune, set about its judicious investment. His shrewd business capacity made these ventures exceedingly profitable, and he now owns nineteen pieces of fine improved property and a large amount of unimproved real estate in the city. The true secret of Mr. Denier's success on the stage was the adoption of original and ingenious mechanical devices in the presentation of his plays. He is a natural mechanic, and planned and built some of his own houses, among them the fine residence at No. 19 Congress Street. Here he has a workshop, where he makes the scenery for the company he now operates on the road. Mr. Denier was married, on January 24, 1861, to Auriol, the daintiness, and daughter of the noted French clown of that name. They have one child, Lydia Denier, who is a member of the "Prairie Wail" combination.

THOMAS L. GRENIER.—One of Chicago's youngest and most independent amusement managers is Thomas L. Grenier. His history is but another instance in proof of the fact that our successful showmen are almost invariably self-made men. Mr. Grenier was born at St. Ursule, Canada, in August, 1851. He went to Spencer, Mass., in 1863, where he finished his school days and completed an ordinary education. He returned to Canada in 1866, and persuaded his family to move to Upper Canada, and at Windsor, Detroit and elsewhere, he clerked in various mercantile houses for four years. Confinement was irksome, so, in order to see the country, he took to rambling North and West, selling rubber and patent stamps. His tour lasted five years, when he concluded to settle in Chicago. He was disgusted with the road, wanted to get into a steady business, and had $150 to start with. The house he lodged in on the West Side was always full, and people were constantly turned away. If this paid others, it would pay him, he thought, and accordingly the "Tom's Lodging House" was opened. The accommodations were limited to ten beds in 1876; when Mr. Grenier disposed of his interest in 1881, three hundred and fifty had been added. In 1881, the opportunity of leasing the Lyceum Theater occurred. Being a natural speculator he jumped at the opening, and in the business of the first six weeks dropped $7,400. But the good class of specialty performers engaged at the house told with the public, who soon showed their appreciation by increasing the box-office receipts. The first year netted the new manager $9,000. He spent the profits in improving the theater. The following year he took the entire management, and cleared $32,600. In 1883-84 the theater was burned, and his ill-fortune began. He opened Grenier's Garden, rented circus stock, trappings and manager of Burr Robbins, and put in a circus that winter. He was pleased, because the show was good, very good, but the luxury cost him $16,000. The next season at the Lyceum was good, and at the Garden better. He put in a stage, tried comic opera, and ran the Amy Gordon Company for five months with great success. The
new stage in the theater this season, and the changes for the better in matters of taste and public convenience, have all been profitable, and now Mr. Grenier has two enterprises, the Lyceum and the Garden, both of which are yielding handsome profits.

**CHICAGO LODGE, "D," No. 4, Benevolent and Protective Order of Elks, was instituted on October 15, 1875, and incorporated as a corporation on September 30, 1879. The order was founded in New York, by the theatrical profession, in 1867, merely for the sake of social intercourse, but since that time has become a powerful organization for charity and benevolence. Eligibility for membership consists in being a white male of good moral character, with a belief in a Supreme Being, bodily and mentally in good health, twenty-one years of age and able to earn the means necessary to the support of himself and family.
